AN  
ESSAY  
ON THE  
LIFE AND GENIUS  
OF  
SAMUEL JOHNSON, LL.D.

---

WHEN the works of a great writer, who has bequeathed to posterity a lasting legacy, are presented to the world, it is naturally expected, that some account of his life should accompany the edition. The reader wishes to know as much as possible of the author. The circumstances that attended him, the features of his private character, his conversation, and the means by which he rose to eminence, become the favourite objects of inquiry. Curiosity is excited; and the admirer of his works is eager to know his private opinions, his course of study, the particularities of his conduct, and, above all, whether he pursued the wisdom which he recommends, and practised the virtue which his writings inspire. A principle of gratitude is awakened in every generous mind. For the entertainment and instruction which genius and diligence have provided for the world, men of refined and sensible tempers are ready to pay their tribute of praise, and even to form a posthumous friendship with the author.

In reviewing the life of such a writer, there is, besides, a rule of justice to which the public have an undoubted claim. Fond admiration and partial friendship should not be suffered to represent his virtues with exaggeration; nor should malignity be allowed, under a specious disguise, to magnify mere defects, the usual failings of human nature, into vice or gross deformity. The lights and shades of the character should be given; and, if this be done with a strict regard to truth, a just estimate of Dr. Johnson will afford a lesson, perhaps as valuable as the moral doctrine that speaks with energy in every page of his works.

The present writer enjoyed the conversation and friendship of that excellent man more than thirty years. He thought it an honour to be so connected, and to this hour he reflects on his loss with regret: but regret, he knows, has secret bribes, by which the judgment may be influenced, and partial affection may be carried beyond the bounds of truth. In the present case, however, nothing needs to be disguised, and exaggerated praise is unnecessary. It is an observation of the younger Pliny, in his Epistle to his friend Tacitus, that history ought never to magnify matters of fact, because worthy actions require nothing but the truth. *Nam nec historia debet egredi veritatem, et honeste si, ut veritas sufficit.* This rule the present biographer promises shall guide his pen throughout the following narrative.

It may be said, the death of Dr. Johnson kept the public mind in agitation beyond all former example. No literary character ever excited so much attention; and, when the press has teemed with anecdotes, apophthegms, essays, and publications of every kind, what occasion now for a new tract on the same threadbare subject? The plain truth shall be the answer. The proprietors of Johnson's Works thought the life, which they prefixed to their former edition, too unwieldy for republication. The prodigious variety of foreign matter, introduced into that performance, seemed to overload the memory of Dr. Johnson, and in the account of his own life to leave him hardly visible. They wished to have a more concise, and, for that reason, perhaps a more satisfactory account, such as may exhibit a just picture of the man, and keep him

the principal figure in the foreground of his own picture. To comply with that request is the design of this essay, which the writer undertakes with a trembling hand. He has no discoveries, no secret anecdotes, no occasional controversy, no sudden flashes of wit and humour, no private conversation, and no new facts, to embellish his work. Every thing has been gleaned. Dr. Johnson said of himself, "I am not uncandid nor severe: I sometimes say more than I mean, in jest, and people are apt to think me serious."\* The exercise of that privilege, which is enjoyed by every man in society, has not been allowed to him. His fame has given importance even to trifles; and the zeal of his friends has brought every thing to light. What should be related, and what should not, has been published without distinction. *Dicenda tacenda locuti!* Every thing that fell from him has been caught with eagerness by his admirers, who, as he says in one of his letters, have acted with the diligence of spies upon his conduct. To some of them the following lines, in Mallet's Poem, on verbal criticism, are not inapplicable:

"Such that grave bird in Northern seas is found,  
Whose name a Dutchman only knows to sound;  
Where'er the king of fish moves on before,  
This humble friend attends from shore to shore;  
With eye still earnest, and with bill inclined,  
He picks up what his patron left behind,  
With those choice cates his palate to regale,  
And is the careful TIBBALD of a WHALE."

After so many essays and volumes of *Johnsoniana*, what remains for the present writer? Perhaps, what has not been attempted; a short, yet full—a faithful, yet temperate, history of Dr. Johnson.

SAMUEL JOHNSON was born at Litchfield, September 7, 1709, O. S.† His father Michael Johnson, was a bookseller in that city; a man of large athletic make, and violent passions; wrong-headed, positive, and at times afflicted with a degree of melancholy, little short of madness. His mother was sister to Dr. Ford, a practising physician, and father of Cornelius Ford, generally known by the name of PARSON FORD, the same who is represented near the punch-bowl in Hogarth's *Midnight Modern Conversation*. In the life of Fenton, Johnson

says, that "his abilities, instead of furnishing convivial merriment to the voluptuous and dissolute, might have enabled him to excel among the virtuous and the wise." Being chaplain to the Earl of Chesterfield, he wished to attend that nobleman on his embassy to the Hague. Colley Cibber has recorded the anecdote. "You should go," said the witty peer, "if to your many vices you would add one more." "Pray, my Lord, what is that?" "Hypocrisy, my dear Doctor." Johnson had a younger brother named Nathaniel, who died at the age of twenty-seven or twenty-eight. Michael Johnson, the father, was chosen in the year 1718, under bailiff of Litchfield; and in the year 1726 he served the office of the senior bailiff. He had a brother of the name of Andrew, who, for some years, kept the ring at Smithfield, appropriated to wrestlers and boxers. Our author used to say, that he was never thrown or conquered. Michael, the father, died December 1731, at the age of seventy-six; his mother at eighty-nine, of a gradual decay, in the year 1759. Of the family nothing more can be related worthy of notice. Johnson did not delight in talking of his relations. "There is little pleasure," he said to Mrs. Piozzi, "in relating the anecdotes of beggary."

Johnson derived from his parents, or from an unwholesome nurse, the distemper called the king's evil. The Jacobites at that time believed in the efficacy of the royal touch; and accordingly Mrs. Johnson presented her son, when two years old, before Queen Anne, who, for the first time, performed that office, and communicated to her young patient all the healing virtue in her power. He was afterwards cut for that scrophulous humour, and the under part of his face was seamed and disfigured by the operation. It is supposed that this disease deprived him of the sight of his left eye, and also impaired his hearing. At eight years old he was placed under Mr. Hawkins, at the Free-school in Litchfield, where he was not remarkable for diligence or regular application. Whatever he read, his tenacious memory made his own. In the fields with his school-fellows, he talked more to himself than with his companions. In 1725, when he was about sixteen years old, he went on a visit to his cousin Cornelius Ford, who detained him for some months, and in the mean time assisted him in the classics. The general direction for his studies, which he then received, he related to Mrs. Piozzi. "Obtain," says Ford, "some general principles of every science: he who can talk only on one subject, or act only in one department, is seldom wanted, and perhaps never wished for; while the man of general knowledge can often benefit, and always please." This advice Johnson seems to have pursued with a good inclination. His reading was always desultory, seldom resting on any particular author, but rambling from one book to another,

\* Boswell's Life of Johnson, vol. ii. p. 465, 4to. edit.

† This appears in a note to Johnson's Diary, prefixed to the first of his prayers. After the alteration of the style, he kept his birth-day on the 18th of September, and it is accordingly marked September 18.

and, by hasty snatches, hoarding up a variety of knowledge. It may be proper in this place to mention another general rule laid down by Ford for Johnson's future conduct: "You will make your way the more easily in the world, as you are contented to dispute no man's claim to conversation excellence: they will, therefore, more willingly allow your pretensions as a writer." "But," says Mrs. Piozzi, "the features of peculiarity, which mark a character to all succeeding generations, are slow in coming to their growth." That ingenious lady adds, with her usual vivacity, "Can one, on such an occasion, forbear recollecting the predictions of Boileau's father, who said, stroking the head of the young satirist, 'this little man has too much wit, but he will never speak ill of any one?'"

On Johnson's return from Cornelius Ford, Mr. Hunter, then master of the Free-school at Litchfield, refused to receive him again on that foundation. At this distance of time, what his reasons were, it is vain to inquire; but to refuse assistance to a lad of promising genius must be pronounced harsh and illiberal. It did not, however, stop the progress of the young student's education. He was placed at another school, at Stourbridge in Worcestershire, under the care of Mr. Wentworth. Having gone through the rudiments of classic literature, he returned to his father's house, and was probably intended for the trade of a bookseller. He has been heard to say that he could bind a book. At the end of two years, being then about nineteen, he went to assist the studies of a young gentleman of the name of Corbett, to the University of Oxford; and on the 31st of October, 1733, both were entered of Pembroke College; Corbett, as a gentleman-commoner, and Johnson as a commoner. The college tutor, Mr. Jordan, was a man of no genius; and Johnson, it seems, showed an early contempt of mean abilities, in one or two instances behaving with insolence to that gentleman. Of his general conduct at the university there are no particulars that merit attention, except the translation of Pope's Messiah, which was a college exercise imposed upon him as a task, by Mr. Jordan. Corbett left the university in about two years, and Johnson's salary ceased. He was by consequence straitened in his circumstances: but he still remained at college. Mr. Jordan the tutor, went off to a living; and was succeeded by Dr. Adams, who afterwards became head of the college, and was esteemed through life for his learning, his talents, and his amiable character. Johnson grew more regular in his attendance. Ethics, theology, and classic literature, were his favourite studies. He discovered, notwithstanding, early symptoms of that wandering disposition of mind, which adhered to him to the end of his life. His reading was

by fits and starts, undirected to any particular science. General philology, agreeably to his cousin Ford's advice, was the object of his ambition. He received, at that time, an early impression of piety, and a taste for the best authors, ancient and modern. It may, notwithstanding, be questioned whether, except his Bible, he ever read a book entirely through. Late in life, if any man praised a book in his presence, he was sure to ask, "Did you read it through?" If the answer was in the affirmative, he did not seem willing to believe it. He continued at the university till the want of pecuniary supplies obliged him to quit the place. He obtained, however, the assistance of a friend, and returning in a short time, was able to complete a residence of three years. The history of his exploits, at Oxford, he used to say, was best known to Dr. Taylor and Dr. Adams. Wonders are told of his memory, and, indeed, all who knew him late in life, can witness that he retained that faculty in the greatest vigour.

From the university Johnson returned to Litchfield. His father died soon after, December 1731; and the whole receipt out of his effects, as appeared by a memorandum in the son's hand-writing, dated 15th June, 1732, was no more than twenty pounds.\* In this exigence, determined that poverty should neither depress his spirit nor warp his integrity, he became under-master of a grammar-school at Market-Bosworth in Leicestershire. That resource, however, did not last long. Disgusted by the pride of Sir Wolstan Dixie, the patron of that little seminary, he left the place in discontent, and ever after spoke of it with abhorrence. In 1733 he went on a visit to Mr. Hector, who had been his school-fellow, and was then a surgeon at Birmingham, lodging at the house of Warren, a bookseller. At that place Johnson translated a voyage to Abyssinia, written by Jerome Lobo, a Portuguese missionary. This was the first literary work from the pen of Dr. Johnson. His friend Hector was occasionally his amanuensis. The work was, probably, undertaken at the desire of Warren, the bookseller, and was printed at Birmingham; but it appears in the Literary Magazine, or History of the Works of the Learned, for March 1735, that it was published by Bettesworth and Hitch, Paternoster-row. It contains a narra-

---

\* The entry of this is remarkable, for his early resolution to preserve through life a fair and upright character. "1732, Junii 15. Undecim aureos deposui, quo die, quidquid ante matris funus (quod serum at precor) de paternis bonis sperare licet, viginti scilicet libras, accepi. Usque adeo mihi mea fortuna fingenda est interea, et ne paupertate vires animi languescant, ne in flagitia egestas adigat, cavendum."

tive of the endeavours of a company of missionaries to convert the people of Abyssinia to the Church of Rome. In the preface to this work Johnson observes, "that the Portuguese traveler, contrary to the general view of his countrymen, has amused his readers with no romantic absurdities, or incredible fictions. He appears, by his modest and unaffected narration, to have described things as he saw them; to have copied nature from the life; and to have consulted his senses, not his imagination. He meets with no basilisks, that destroy with their eyes; his crocodiles devour their prey, without tears; and his cataracts fall from the rock, without deafening the neighbouring inhabitants. The reader will here find no regions cursed with irremediable barrenness, or blessed with spontaneous fecundity; no perpetual gloom, or unceasing sunshine: nor are the nations, here described, either void of all sense of humanity, or consummate in all private and social virtues: here are no Hottentots without religion, polity, or articulate language; no Chinese perfectly polite, and completely skilled in all sciences: he will discover, what will always be discovered by a diligent and impartial inquirer, that, wherever human nature is to be found, there is a mixture of vice and virtue, a contest of passion and reason; and that the Creator doth not appear partial in his distributions, but has balanced, in most countries, their particular inconveniences by particular favours."—We have here an early specimen of Johnson's manner; the vein of thinking and the frame of the sentences are manifestly his: we see the infant Hercules. The translation of Lobo's Narrative has been reprinted lately in a separate volume, with some other tracts of Dr. Johnson's, and therefore forms no part of this edition; but a compendious account of so interesting a work as Father Lobo's discovery of the head of the Nile will not, it is imagined, be unacceptable to the reader.

Father Lobo, the Portuguese Missionary, embarked, in 1622, in the same fleet with the Count *Vidigueira*, who was appointed, by the king of Portugal, Viceroy of the Indies. They arrived at Goa; and, in January, 1624, Father Lobo set out on the mission to Abyssinia. Two of the Jesuits, sent on the same commission, were murdered in their attempt to penetrate into that empire. Lobo had better success; he surmounted all difficulties, and made his way into the heart of the country. Then follows a description of Abyssinia, formerly the largest empire of which we have an account in history. It extended from the Red Sea to the kingdom of Congo, and from Egypt to the Indian Sea, containing no less than forty provinces. At the time of Lobo's mission, it was not much larger than Spain, consisting then but of five kingdoms, of which part was entirely subject to the Emperor, and part paid him a tribute, as an

acknowledgment. The provinces were inhabited by Moors, Pagans, Jews, and Christians. The last was, in Lobo's time, the established and reigning religion. The diversity of people and religion is the reason why the kingdom was under different forms of government, with laws and customs extremely various. Some of the people neither sowed their lands, nor improved them by any kind of culture, living upon milk and flesh, and, like the Arabs, encamping without any settled habitation. In some places they practised no rites of worship, though they believed that, in the regions above, there dwells a Being that governs the world. This Deity they call in their language *Chul*. The Christianity professed by the people in some parts, is corrupted with superstitious errors, and heresies, and so mingled with ceremonies borrowed from the Jews, that little, besides the name of Christianity, is to be found among them. The Abyssinians cannot properly be said to have either cities or houses; they live in tents or cottages made of straw or clay, very rarely building with stone. Their villages or towns consist of these huts; yet even of such villages they have but few; because the grandees, the viceroys, and the emperor himself, are always in camp, that they may be prepared, upon the most sudden alarm, to meet every emergence, in a country which is engaged every year either in foreign wars or intestine commotions. Ethiopia produces very near the same kinds of provision as Portugal, though, by the extreme laziness of the inhabitants, in a much less quantity. What the ancients imagined of the torrid zone being a part of the world uninhabitable, is so far from being true, that the climate is very temperate. The blacks have better features than in other countries, and are not without wit and ingenuity. Their apprehension is quick, and their judgment sound. There are in the climate two harvests in the year: one in winter, which lasts through the months of July, August and September; the other in the Spring. They have, in the greatest plenty, raisins, peaches, pomegranates, sugar-canes, and some figs. Most of these are ripe about Lent, which the Abyssinians keep with great strictness. The animals of the country are the lion, the elephant, the rhinoceros, the unicorn, horses, mules, oxen, and cows without number. They have a very particular custom, which obliges every man, that has a thousand cows, to save every year one day's milk of all his herd, and make a buta with it for his relations. This they do so many days in each year, as they have thousands of cattle; so that, to express how rich a man is, they tell you *he bathes so many times*.

"Of the river Nile, which has furnished so much controversy, we have a full and clear description. It is called by the natives, Abayi, the Father of Water. It rises in Sa-

cala, a province of the kingdom of Goïama, the most fertile and agreeable part of the Abyssinian dominions. On the Eastern side of the country, on the declivity of a mountain, whose descent is so easy, that it seems a beautiful plain, is that source of the Nile, which has been sought after at so much expense and labour. This spring, or rather these two springs, are two holes, each about two feet diameter, a stone's cast distant from each other. One of them is about five feet and a half in depth. Lobo was not able to sink his plummet lower, perhaps, because it was stopped by roots, the whole place being full of trees. A line of ten feet did not reach the bottom of the other. These springs are supposed by the Abyssinians to be the vents of a great subterraneous lake. At a small distance to the South, is a village called Guix, through which you ascend to the top of the mountain, where there is a little hill, which the idolatrous Agaci hold in great veneration. Their priest calls them together to this place once a year : and every one sacrifices a cow, or more, according to the different degrees of wealth and devotion. Hence we have sufficient proof, that these nations always paid adoration to the Deity of this famous river.

" As to the course of the Nile, its waters, after the first rise, run towards the East, about the length of a musket-shot; then, turning northward, continue hidden in the grass and weeds for about a quarter of a league, when they re-appear amongst a quantity of rocks. The Nile from its source proceeds with so inconsiderable a current, that it is in danger of being dried up by the hot season; but soon receiving an increase from the Gemma, the Keltu, the Brausa, and the other smaller rivers, it expands to such a breadth in the plains of Boud, which is not above three days' journey from its source, that a musket-ball will scarcely fly from one bank to the other. Here it begins to run northward, winding, however, a little to the East, for the space of nine or ten leagues, and then enters the so-much-talked-of Lake of Dambia, flowing with such violent rapidity, that its waters may be distinguished through the whole passage, which is no less than six leagues. Here begins the greatness of the Nile. Fifteen miles further, in the land of Alata, it rushes precipitately from the top of a high rock, and forms one of the most beautiful waterfalls in the world. Lobo says, he passed under it without being wet, and resting himself, for the sake of the coolness, was charmed with a thousand delightful rainbows, which the sunbeams painted on the water, in all their shining and lively colours.\* The

fall of this mighty stream, from so great a height, makes a noise that may be heard at a considerable distance; but it was not found, that the neighbouring inhabitants were deaf. After the cataract, the Nile collects its scattered stream among the rocks, which are so near each other, that in Lobo's time, a bridge of beams, on which the whole imperial army passed, was laid over them. Sultan Sequed has since built a stone bridge of one arch, in the same place, for which purpose he procured masons from India. Here the river alters its course, and passes through various kingdoms, such as Ambara, Olaca, Chona, Damot, and the kingdom of Goïama, and, after various windings, returns within a short day's journey of its spring. To pursue it through all its mazes, and accompany it round the kingdom of Goïama, is a journey of twenty-nine days. From Abyssinia, the river passes into the countries of Fazulo and Ombarka, two vast regions little known, inhabited by nations entirely different from the Abyssinians. Their hair, like that of the other blacks in those regions, is short and curled. In the year 1615, Rassela Christos, Lieutenant-General to Sultan Sequed, entered those kingdoms in a hostile manner; but, not being able to get intelligence, returned without attempting any thing. As the empire of Abyssinia terminates at these descents, Lobo followed the course of the Nile no farther, leaving it to range over barbarous kingdoms, and convey wealth and plenty into Egypt, which owes to the annual inundations of this river its envied fertility.\* Lobo knows nothing of the Nile in the rest of its passage, except that it receives great increase from many other rivers, has several cataracts like that already described, and that few fish are to be found in it; that scarcity is to be attributed to the river horse and the crocodile, which destroy the weaker inhabitants of the river. Something, likewise, must be imputed to the cataracts, where fish cannot fall without being killed. Lobo adds, that neither he, nor any with whom he conversed about the crocodile, ever saw him weep; and therefore all that hath been said about his tears must be ranked among the fables invented for the amusement of children.

the very foot of the rock; and, allowing that there was a seat or bench (which there is not) in the middle of the pool, it is absolutely impossible, by any exertion of human strength, to have arrived at it. But it may be asked, can Mr. Bruce say, what was the face of the country in the year 1622, when Lobo saw the magnificent sight which he has described? Mr. Bruce's pool of water may have been formed since; and Lobo, perhaps, was content to sit down without a bench.

\* After comparing this description with that lately given by Mr. Bruce, the reader will judge whether Lobo is to lose the honour of having been at the head of the Nile near two centuries before any other European traveller.

\* This Mr. Bruce, the late traveller, avers to be a downright falsehood. He says, a deep pool of water reaches to

"As to the causes of the inundations of the Nile, Lobo observes, that many an idle hypothesis has been framed. Some theorists ascribe it to the high winds, that stop the current, and force the water above its banks. Others pretend a subterraneous communication between the Ocean and the Nile, and that the sea, when violently agitated, swells the river. Many are of opinion, that this mighty flood proceeds from the melting of the snow on the mountains of Ethiopia; but so much snow and such prodigious heat are never met with in the same region. Lobo never saw snow in Abyssinia, except on Mount Semen in the kingdom of Tigre, very remote from the Nile; and on Namara, which is, indeed, not far distant, but where there never falls snow enough to wet, when dissolved, the foot of the mountain. To the immense labours of the Portuguese, mankind is indebted for the knowledge of the real cause of these inundations, so great and so regular. By them we are informed, that Abyssinia, where the Nile rises, is full of mountains, and, in its natural situation, is much higher than Egypt; that in the winter, from June to September, no day is without rain; that the Nile receives in its course, all the rivers, brooks, and torrents, that fall from those mountains, and, by necessary consequence, swelling above its banks, fills the plains of Egypt with inundations, which come regularly about the month of July, or three weeks after the beginning of the rainy season in Ethiopia. The different degrees of this flood are such certain indications of the fruitfulness or sterility of the ensuing year, that it is publicly proclaimed at Cairo how much the water hath gained during the night."

Such is the account of the Nile and its inundations, which it is hoped will not be deemed an improper or tedious digression, especially as the whole is an extract from Johnson's translation. He is all the time the actor in the scene, and in his own words relates the story. Having finished this work, he returned, in February 1734, to his native city, and, in the month of August following, published proposals for printing by subscription the Latin Poems of Politian, with the History of Latin Poetry, from the Era of Petrarch, to the time of Politian; and also the Life of Politian, to be added by the Editor, Samuel Johnson. The book to be printed in thirty octavo sheets, price five shillings. It is to be regretted that this project failed for want of encouragement. Johnson, it seems, differed from Boileau, Voltaire, and D'Alembert, who had taken upon them to proscribe all modern efforts to write with elegance in a dead language. For a decision pronounced in so high a tone, no good reason can be assigned. The interests of learning require that the diction of Greece and Rome should be cultivated with care; and he who can write a language with

correctness, will be most likely to understand its idiom, its grammar, and its peculiar graces of style. What man of taste would willingly forego the pleasure of reading Vida, Fracastorius, Sannazaro, Strada, and others, down to the late elegant productions of Bishop Lowth? The history which Johnson proposed to himself would, beyond all question, have been a valuable addition to the history of letters; but his project failed. His next expedient was to offer his assistance to Cave, the original projector of the Gentleman's Magazine. For this purpose he sent his proposals in a letter, offering, on reasonable terms, occasionally to fill some pages with poems and inscriptions never printed before; with fugitive pieces that deserved to be revived, and critical remarks on authors ancient and modern. Cave agreed to retain him as a correspondent and contributor to the Magazine. What the conditions were cannot now be known; but certainly they were not sufficient to hinder Johnson from casting his eyes about him in quest of other employment. Accordingly, in 1735, he made overtures to the Rev. Mr. Budworth, Master of a Grammar-school at Breckwood, in Staffordshire, to become his assistant. This proposition did not succeed. Mr. Budworth apprehended, that the involuntary motions, to which Johnson's nerves were subject, might make him an object of ridicule with his scholars, and, by consequence, lessen their respect for their master. Another mode of advancing himself presented itself about this time. Mrs. Porter, the widow of a mercer in Birmingham, admired his talents. It is said that she had about eight hundred pounds; and that sum to a person in Johnson's circumstances was an affluent fortune. A marriage took place, and to turn his wife's money to the best advantage, he projected the scheme of an academy for education. Gilbert Walmesley, at that time Registrar of the Ecclesiastical Court of the Bishop of Litchfield, was distinguished by his erudition, and the politeness of his manners. He was the friend of Johnson, and, by his weight and influence endeavoured to promote his interest. The celebrated Garrick, whose father, Captain Garrick, lived at Litchfield, was placed in the new seminary of education, by that gentleman's advice.—Garrick was then about eighteen years old. An accession of seven or eight pupils was the most that could be obtained, though notice was given by a public advertisement,\* that at Edial, near Litchfield, in Staffordshire, young gentlemen are boarded and taught the Latin and Greek Languages, by Samuel Johnson.

The undertaking proved abortive. Johnson having now abandoned all hopes of promoting his fortune in the country, determined to become

\* See the Gentleman's Magazine for 1735, p. 418.

an adventurer in the world at large. His young pupil, Garrick, had formed the same resolution; and, accordingly, in March, 1737, they arrived in London together. Two such candidates for fame, perhaps never before that day entered the metropolis together. Their stock of money was soon exhausted. In his visionary project of an academy, Johnson had probably wasted his wife's substance; and Garrick's father had little more than his half-pay. The two fellow-travellers had the world before them, and each was to choose his road to fortune and to fame. They brought with them genius, and powers of mind, peculiarly formed by nature for the different vocations to which each of them felt himself inclined. They acted from the impulse of young minds, even then meditating great things, and with courage anticipating success. Their friend Mr. Walmsley, by a letter to the Rev. Mr. Colson, who, it seems, was a great mathematician, exerted his good offices in their favour. He gave notice of their intended journey. "Davy Garrick," he said, "will be with you next week; and Johnson, to try his fate with a tragedy, and to get himself employed in some translation either from the Latin or French. Johnson is a very good scholar and a poet, and I have great hopes will turn out a fine tragedy writer. If it should be in your way, I doubt not but you will be ready to recommend and assist your countrymen." Of Mr. Walmsley's merit, and the excellence of his character, Johnson has left a beautiful testimonial at the end of the *Life of Edward Smith*. It is reasonable to conclude, that a mathematician, absorbed in abstract speculations, was not able to find a sphere of action for two men who were to be the architects of their own fortune. In three or four years afterwards Garrick came forth, with talents that astonished the public. He began his career at Goodman's-fields, and there, *monstratus fatis Vespasianus!* he chose a lucrative profession, and consequently soon emerged from all his difficulties. Johnson was left to toil in the humble walks of literature. A tragedy, as appears by Walmsley's letter, was the whole of his stock. This, most probably, was *LÆRÆ*; but, if then finished, it was doomed to wait for a more happy period. It was offered to Fleetwood, and rejected. Johnson looked round him for employment. Having, while he remained in the country, corresponded with Cave, under a feigned name, he now thought it time to make himself known to a man whom he considered as a patron of literature. Cave had announced, by public advertisement, a prize of fifty pounds for the best poem on *Life, Death, Judgment, Heaven, and Hell*; and this circumstance diffused an idea of his liberality. Johnson became connected with him in business, and in a close and intimate acquaintance. Of Cave's character it is unnecessary to say any thing in this place, as Johnson was

afterwards the biographer of his first and most useful patron. To be engaged in the translation of some important book was still the object which Johnson had in view. For this purpose he proposed to give the *History of the Council of Trent*, with copious notes, then lately added to a French edition. Twelve sheets of this work were printed, for which Johnson received forty-nine pounds, as appears by his receipt in the possession of Mr. Nichols, the compiler of that entertaining and useful work, the *Gentleman's Magazine*. Johnson's translation was never completed: a like design was offered to the public, under the patronage of Dr. Zachary Pearce; and by that contention both attempts were frustrated. Johnson had been commended by Pope for the translation of the *Messiah* into Latin verse; but he knew no approach to so eminent a man. With one, however, who was connected with Pope, he became acquainted at St. John's Gate; and that person was no other than the well-known Richard Savage, whose life was afterwards written by Johnson, with great elegance, and a depth of moral reflection. Savage was a man of considerable talents. His address, his various accomplishments, and, above all, the peculiarity of his misfortunes, recommended him to Johnson's notice. They became united in the closest intimacy. Both had great parts, and they were equally under the pressure of want. Sympathy joined them in a league of friendship. Johnson has been often heard to relate, that he and Savage walked round Grosvenor-square till four in the morning; in the course of their conversation reforming the world, dethroning princes, establishing new forms of government, and giving laws to the several states of Europe; till, fatigued at length with their legislative office, they began to feel the want of refreshment, but could not muster up more than fourpence-halfpenny. Savage, it is true, had many vices: but vice could never strike its roots in a mind like Johnson's, seasoned early with religion, and the principles of moral rectitude. His first prayer was composed in the year 1733. He had not at that time renounced the use of wine; and, no doubt, occasionally enjoyed his friend and his bottle. The love of late hours, which followed him through life, was, perhaps, originally contracted in company with Savage. However that may be, their connection was not of long duration. In the year 1738, Savage was reduced to the last distress. Mr. Pope, in a letter to him, expressed his concern for "the miserable withdrawing of his pension after the death of the Queen;" and gave him hopes that, "in a short time, he should find himself supplied with a competence, without any dependence on those little creatures whom we are pleased to call the Great." The scheme proposed to him was, that he should retire to Swansea in Wales, and receive an allowance of

fifty pounds a year, to be raised by subscription; Pope was to pay twenty pounds. This plan, though finally established, took more than a year before it was carried into execution. In the mean time, the intended retreat of Savage called to Johnson's mind the third Satire of Juvenal, in which that poet takes leave of a friend, who was withdrawing himself from all the vices of Rome. Struck with this idea, he wrote that well-known poem, called London. The first lines manifestly point to Savage.

"Though grief and fondness in my breast rebel,  
When injured Thales bids the town farewell;  
Yet still my calmer thoughts his choice commend;  
I praise the hermit, but regret the friend;  
Resolved at length, from Vice and London far,  
To breathe in distant fields a purer air;  
And fixed on Cambria's solitary shore,  
Give to St. David one true Briton more."

Johnson at that time lodged at Greenwich. He there fixes the scene, and takes leave of his friend; who, he says in his *Life*, parted from him with tears in his eyes. The poem, when finished, was offered to Cave. It happened, however, that the late Mr. Dodsley was the purchaser, at the price of ten guineas. It was published in 1738; and Pope, we are told, said, "The author, whoever he is, will not be long concealed;" alluding to the passage in Terence, *Ubi, ubi est, diu celari non potest*. Notwithstanding that prediction, it does not appear that, besides the copy-money, any advantage accrued to the author of a poem, written with the elegance and energy of Pope. Johnson, in August 1738, went, with all the fame of his poetry, to offer himself a candidate for the mastership of the school at Appleby, in Leicestershire. The statutes of the place required, that the person chosen should be a Master of Arts. To remove this objection, the then Lord Gower was induced to write to a friend, in order to obtain for Johnson a Master's degree in the University of Dublin, by the recommendation of Dr. Swift. The letter was printed in one of the Magazines, and was as follows:

"Sir,

"Mr. Samuel Johnson (author of *London*, a Satire, and some other poetical pieces), is a native of this county, and much respected by some worthy gentlemen in the neighbourhood, who are trustees of a charity-school, now vacant; the certain salary of which is sixty pounds per year, of which they are desirous to make him master; but unfortunately he is not capable of receiving their bounty, which would make him happy for life, by not being a Master of Arts, which, by the statutes of the school, the master of it must be.

"Now, these gentlemen do me the honour to think, that I have interest enough in you, to

prevail upon you to write to Dean Swift, to persuade the University of Dublin to send a diploma to me, constituting this poor man Master of Arts in their University. They highly extol the man's learning and probity, and will not be persuaded, that the University will make any difficulty of conferring such a favour upon a stranger, if he is recommended by the Dean. They say he is not afraid of the strictest examination, though he is of so long a journey; and yet he will venture it, if the Dean thinks it necessary, choosing rather to die upon the road, than to be starved to death in translating for booksellers, which has been his only subsistence for some time past.

"I fear there is more difficulty in this affair than these good-natured gentlemen apprehend, especially as their election cannot be delayed longer than the 11th of next month. If you see this matter in the same light that it appears to me, I hope you will burn this, and pardon me for giving you so much trouble about an impracticable thing; but, if you think there is a probability of obtaining the favour asked, I am sure your humanity and propensity to relieve merit in distress will incline you to serve the poor man, without my adding any more to the trouble I have already given you, than assuring you, that I am, with great truth,

"Sir,

"Your faithful humble servant,

"GOWER."

"Trentham, Aug. 1st."

This scheme miscarried. There is reason to think, that Swift declined to meddle in the business; and to that circumstance Johnson's known dislike of Swift has been often imputed.

It is mortifying to pursue a man of merit through all his difficulties; and yet this narrative must be, through many following years, the history of Genius and Virtue struggling with Adversity. Having lost the school at Appleby, Johnson was thrown back on the metropolis. Bred to no profession, without relations, friends, or interest, he was condemned to drudgery in the service of Cave, his only patron. In November 1738 was published a translation of Crousaz's *Examen of Pope's Essay on Man*; "containing a succinct View of the System of the Fatalists, and a Confutation of their Opinions; with an Illustration of the Doctrine of Free-Will; and an Inquiry, what view Mr. Pope might have in touching upon the Leibnitzian Philosophy, and Fatalism. By Mr. Crousaz, Professor of Philosophy and Mathematics at Lausanne." This translation has been generally thought a production of Johnson's pen; but it is now known, that Mrs. Elizabeth Carter has acknowledged it to be one of her early performances. It is certain, however, that Johnson was eager to promote the

publication. He considered the foreign philosopher as a man zealous in the cause of religion; and with him he was willing to join against the system of the Fatalists, and the doctrine of Leibnitz. It is well known that Warburton wrote a vindication of Mr. Pope; but there is reason to think that Johnson conceived an early prejudice against the Essay on Man; and what once took root in a mind like his, was not easily eradicated. His letter to Cave on this subject is still extant, and may well justify Sir John Hawkins, who inferred that Johnson was the translator of Crousaz. The conclusion of the letter is remarkable. "I am yours, IMPRANSUS." If by that Latin word was meant that he had not dined, because he wanted the means, who can read it, even at this hour, without an aching heart?

With a mind naturally vigorous, and quickened by necessity, Johnson formed a multiplicity of projects; but most of them proved abortive. A number of small tracts issued from his pen with wonderful rapidity; such as "MARMOR NORFOLCIENSE; or an Essay on an ancient prophetic Inscription, in Monkish Rhyme, discovered at Lynn in Norfolk. By *Probus Britannicus*." This was a pamphlet against Sir Robert Walpole. According to Sir John Hawkins, a warrant was issued to apprehend the Author, who retired with his wife to an obscure lodging near Lambeth Marsh, and there eluded the search of the messengers. But this story has no foundation in truth. Johnson was never known to mention such an incident in his life; and Mr. Steele (late of the Treasury) caused diligent search to be made at the proper offices, and no trace of such a proceeding could be found. In the same year (1739) the Lord Chamberlain prohibited the representation of a tragedy, called *GUSTAVUS VASA*, by Henry Brooke. Under the mask of irony, Johnson published "A Vindication of the Licensor from the malicious and scandalous Aspersions of Mr. Brooke." Of these two pieces Sir John Hawkins says "they have neither learning nor wit, nor a single ray of that genius which has since blazed forth;" but, as they have lately been reprinted, the reader, who wishes to gratify his curiosity, is referred to the fourteenth volume of Johnson's works, published by Stockdale. The lives of Boerhaave, Blake, Barratier, Father Paul, and others, were, about that time, printed in the Gentleman's Magazine. The subscription of fifty pounds a year for Savage was completed; and in July 1739, Johnson parted with the companion of his midnight hours never to see him more. The separation was, perhaps, an advantage to him, who wanted to make a right use of his time, and even then beheld with self-reproach the waste occasioned by dissipation. His abstinence from wine and strong liquors began soon after the departure of Savage.

What habits he contracted in the course of that acquaintance cannot now be known. The ambition of excelling in conversation, and that pride of victory, which, at times, disgraced a man of Johnson's genius, were, perhaps, native blemishes. A fierce spirit of independence, even in the midst of poverty, may be seen in Savage; and, if not thence transfused by Johnson into his own manners, it may, at least, be supposed to have gained strength from the example before him. During that connection there was, if we believe Sir John Hawkins, a short separation between our author and his wife; but a reconciliation soon took place. Johnson loved her, and showed his affection in various modes of gallantry, which Garrick used to render ridiculous by his mimicry. The affectation of soft and fashionable airs did not become an unwieldy figure: his admiration was received by the wife with the flutter of an antiquated coquette; and both, it is well known, furnished matter for the lively genius of Garrick.

It is a mortifying reflection, that Johnson, with a store of learning and extraordinary talents, was not able, at the age of thirty, to force his way to the favour of the public. *Slow rises worth, by poverty depressed*. "He was still," as he says himself, "to provide for the day that was passing over him." He saw Cave involved in a state of warfare with the numerous competitors, at that time struggling with the Gentleman's Magazine; and gratitude for such supplies as Johnson received dictated a Latin Ode on the subject of that contention. The first lines,

"Urbane, nullis fesse laboribus,  
Urbane, nullis victæ calumnias,"

put one in mind of Casimir's Ode to Pene Urban:

"Urbane, regum maxime, maxime  
Urbane vatum."

The Polish poet was, probably, at that time, in the hands of a man who had meditated the history of the Latin poets. Guthrie the historian had from July 1736 composed the parliamentary speeches for the Magazine; but, from the beginning of the session, which opened on the 19th of November 1740, Johnson succeeded to that department, and continued it from that time to the debate on spirituous liquors, which happened in the House of Lords in February 1742-3. The eloquence, the force of argument, and the splendour of language displayed in the several speeches, are well known, and universally admired. The whole has been collected in two volumes by Mr. Stockdale, and may form a proper supplement to this edition. That Johnson was the author of the debates during that period was not generally known; but the secret transpired several years afterwards, and was avowed

ly himself on the following occasion: Mr. Wedderburne (now Lord Loughborough),\* Dr. Johnson, Dr. Francis (the translator of Horace), the present writer, and others, dined with the late Mr. Foote. An important debate towards the end of Sir Robert Walpole's administration being mentioned, Dr. Francis observed, "That Mr. Pitt's speech, on that occasion, was the best he had ever read." He added, "That he had employed eight years of his life in the study of Demosthenes, and finished a translation of that celebrated orator, with all the decorations of style and language within the reach of his capacity; but he had met with nothing equal to the speech above-mentioned." Many of the company remembered the debate; and some passages were cited, with the approbation and applause of all present. During the ardour of conversation Johnson remained silent. As soon as the warmth of praise subsided, he opened with these words: "That speech-I wrote in a garret in Exeter-street." The company was struck with astonishment. After staring at each other in silent amaze, Dr. Francis asked, "How that speech could be written by him?" Sir," said Johnson, "I wrote it in Exeter-street. I never had been in the gallery of the House of Commons but once. Cave had interest with the door-keepers. He, and the persons employed under him, gained admittance; they brought away the subject of discussion, the names of the speakers, the side they took, and the order in which they rose, together with notes of the arguments advanced in the course of the debate. The whole was afterwards communicated to me, and I composed the speeches in the form which they now have in the Parliamentary Debates." To this discovery Dr. Francis made answer: "Then, Sir, you have exceeded Demosthenes himself; for to say that you have exceeded Francis's Demosthenes, would be saying nothing." The rest of the company bestowed lavish encomiums on Johnson; one, in particular, praised his impartiality; observing, that he dealt out reason and eloquence with an equal hand to both parties. "That is not quite true," said Johnson: "I saved appearances tolerably well; but I took care that the whig dogs should not have the best of it." The sale of the Magazine was greatly increased by the Parliamentary Debates, which were continued by Johnson till the month of March 1742-3. From that time the Magazine was conducted by Dr. Hawkesworth.

In 1743-4, Osborne, the bookseller, who kept a shop in Gray's-Inn, purchased the Earl of Oxford's library, at the price of thirteen thousand pounds. He projected a catalogue in five octavo volumes, at five shillings each. Johnson

was employed in that painful drudgery. He was likewise to collect all such small tracts as were in any degree worth preserving, in order to reprint and publish the whole in a collection, called "The Harleian Miscellany." The catalogue was completed: and the Miscellany, in 1749, was published in eight quarto volumes. In this business Johnson was a day-labourer for immediate subsistence, not unlike Gustavus Vasa working in the mines of Dalecarlia. What Wilcox, a bookseller of eminence in the Strand, said to Johnson, on his first arrival in town, was now almost confirmed. He lent our author five guineas, and then asked him, "How do you mean to earn your livelihood in this town?" "By my literary labours," was the answer. Wilcox, staring at him, shook his head: "By your literary labours!—You had better buy a porter's knot." Johnson used to tell this anecdote to Mr. Nichols; but he said, "Wilcox was one of my best friends, and he meant well." In fact, Johnson, while employed in Gray's-Inn, may be said to have carried a porter's knot. He paused occasionally to peruse the book that came to his hand. Osborne thought that such curiosity tended to nothing but delay, and objected to it with all the pride and insolence of a man who knew that he paid daily wages. In the dispute that of course ensued, Osborne, with that roughness which was natural to him, enforced his argument by giving the lie. Johnson seized a folio and knocked the bookseller down. This story has been related as an instance of Johnson's ferocity; but merit cannot always take the spurs of the unworthy with a patient spirit.\*

That the history of an author must be found in his works, is, in general, a true observation; and was never more apparent than in the present narrative. Every era of Johnson's life is fixed by his writings. In 1744, he published the life of Savage; and then projected a new edition of Shakspeare. As a prelude to that design, he published, in 1745, "Miscellaneous Observations on the Tragedy of Macbeth, with Remarks on Sir Thomas Hanmer's Edition;" to which were prefixed, "Proposals for a new Edition of Shakspeare," with a specimen. Of this pamphlet Warburton, in the Preface to Shakspeare, has given his opinion: "As to all these things, which have been published under the title of Essays, Remarks, Observations, &c. on Shakspeare, if you except some critical notes on *Macbeth*, given as a specimen of a projected edition, and written, as appears, by a man of parts and

\* Mr. Boswell says, "The simple truth I had from Johnson himself. Sir, he was impertinent to me, and I beat him; but it was not in his shop, it was in my own chamber."

\* Afterwards Earl of Roslin. He died Jan. 3, 1805.

genius, the rest are absolutely below a serious notice." But the attention of the public was not excited; there was no friend to promote a subscription; and the project died, to revive at a future day. A new undertaking, however, was soon after proposed; namely, an English Dictionary upon an enlarged plan. Several of the most opulent booksellers had meditated a work of this kind; and the agreement was soon adjusted between the parties. Emboldened by this connection, Johnson thought of a better habitation than he had hitherto known. He had lodged with his wife in courts and alleys about the Strand; but now, for the purpose of carrying on his arduous undertaking, and to be nearer his printer and friend, Mr. Strahan, he ventured to take a house in Gough-square, Fleet-street. He was told that the Earl of Chesterfield was a friend to his undertaking; and in consequence of that intelligence, he published, in 1747, *The Plan of a Dictionary of the English Language, addressed to the Right Honourable Philip Dormer, Earl of Chesterfield, one of his Majesty's principal Secretaries of State*. Mr. Whitehead, afterwards Poet Laureat, undertook to convey the manuscript to his Lordship: the consequence was an invitation from Lord Chesterfield to the author. A stronger contrast of characters could not be brought together; the Nobleman celebrated for his wit, and all the graces of polite behaviour; the Author, conscious of his own merit, towering in idea above all competition, versed in scholastic logic, but a stranger to the arts of polite conversation, uncouth, vehement, and vociferous. The coalition was too unnatural. Johnson expected a Mæcenas, and was disappointed. No patronage, no assistance followed. Visits were repeated; but the reception was not cordial. Johnson one day was left a full hour, waiting in an antichamber, till a gentleman should retire, and leave his lordship at leisure. This was the famous Colley Cibber. Johnson saw him go, and fired with indignation, rushed out of the house.\* What Lord Chesterfield thought of his visitor may be seen in a passage in one of that Nobleman's letters to his son.† "There is a man, whose moral character, deep learning, and superior parts, I acknowledge, admire, and respect; but whom it is so impossible for me to love, that I am almost in a fever whenever I am in his company. His figure (without being deformed) seems made to disgrace or ridicule the common structure of the human body. His legs and arms are never in the position which, according to the situation of his body, they ought to be in, but constantly employed in committing acts of hostility upon the Graces. He throws

any where, but down his throat, whatever he means to drink: and mangles what he means to carve. Inattentive to all the regards of social life, he mis-times and mis-places every thing. He disputes with heat indiscriminately, mindless of the rank, character, and situation of those with whom he disputes. Absolutely ignorant of the several gradations of familiarity and respect, he is exactly the same to his superiors, his equals, and his inferiors; and therefore, by a necessary consequence, is absurd to two of the three. Is it possible to love such a man? No. The utmost I can do for him is, to consider him a respectable Hettentot." Such was the idea entertained by lord Chesterfield. After the incident of Colley Cibber, Johnson never repeated his visits. In his high and decisive tone, he has been often heard to say, "Lord Chesterfield is a Wit among Lords, and a Lord among Wits."

In the course of the year 1747, Garrick, in conjunction with Lacy, became parentee of Drury-Lane playhouse. For the opening of the theatre, at the usual time, Johnson wrote for his friend the well-known prologue, which, to say no more of it, may at least be placed on a level with Pope's to the tragedy of Cato. The playhouse being now under Garrick's direction, Johnson thought the opportunity fair to think of his tragedy of Irene, which was his whole stock on his first arrival in town, in the year 1737. That play was accordingly put into rehearsal in January, 1749. As a precursor to prepare the way, and to awaken the public attention, *The Vanity of Human Wishes*, a poem in imitation of the Tenth Satire of Juvenal, by the Author of *London*, was published in the same month. In the Gentleman's Magazine, for February, 1749, we find that the tragedy of Irene was acted at Drury-Lane, on Monday, February the 6th, and from that time, without interruption, to Monday, February the 20th, being in all thirteen nights. Since that time it has not been exhibited on any stage. Irene may be added to some other plays in our language, which have lost their place in the theatre, but continue to please in the closet. During the representation of this piece, Johnson attended every night behind the scenes. Conceiving that his character as an author required some ornament for his person, he chose upon that occasion to decorate himself with a handsome waistcoat, and a gold-laced hat. The late Mr. Topham Beauclerc, who had a great deal of that humour, which pleases the more for seeming undesigned, used to give a pleasant description of this green-room finery, as related by the author himself; "But," said Johnson, with great gravity, "I soon laid aside my gold-laced hat, lest it should make me proud." The amount of the three benefit nights for the tragedy of Irene, it is to be feared, was not very considerable, as

\* Dr. Johnson denies the whole of this story. See Boswell's Life, vol. i. p. 128. Oct. Edit. 1804. C.

† Letter CCXII.

the profit, that stimulating motive, never invited the author to another dramatic attempt. Some years afterwards, when the present writer was intimate with Garrick, and knew Johnson to be in distress, he asked the manager why he did not produce another tragedy for his Litchfield friend? Garrick's answer was remarkable: "When Johnson writes *tragedy, declamation roars, and passion sleeps*: when Shakespeare wrote, he dipped his pen in his own heart."

There may, perhaps, be a degree of sameness in this regular way of tracing an author from one work to another, and the reader may feel the effect of a tedious monotony: but in the life of Johnson there are no other landmarks. He was now forty years old, and had mixed but little with the world. He followed no profession, transacted no business, and was a stranger to what is called a town life. We are now arrived at the brightest period he had hitherto known. His name broke out upon mankind with a degree of lustre that promised a triumph over all his difficulties. The *Life of Savage* was admired as a beautiful and instructive piece of biography. The two imitations of Juvenal were thought to rival even the excellence of Pope; and the tragedy of *Irene*, though uninteresting on the stage, was universally admired in the closet, for the propriety of the sentiments, the richness of the language, and the general harmony of the whole composition. His fame was widely diffused; and he had made his agreement with the booksellers for his *English Dictionary* at the sum of fifteen hundred guineas; a part of which was to be, from time to time, advanced in proportion to the progress of the work. This was a certain fund for his support, without being obliged to write fugitive pieces for the petty supplies of the day. Accordingly we find that, in 1749, he established a club, consisting of ten or a number, at Horseman's, in Ivy-Lane, on every Tuesday evening. This is the first scene of social life to which Johnson can be traced out of his own house. The members of this little society were, Samuel Johnson; Dr. Salter (father of the late Master of the Charter-House); Dr. Hawkesworth; Mr. Ryland, a merchant; Mr. Payne, a bookseller, in Paternoster-row; Mr. Samuel Dyer, a learned young man; Dr. Wm. M'Ghie, a Scotch physician; Dr. Edmund Barker, a young physician; Dr. Bathurst, another young physician; and Sir John Hawkins. This list is given by Sir John, as it should seem, with no other view than to draw a spiteful and malevolent character of almost every one of them. Mr. Dyer, whom Sir John says he loved with the affection of a brother, meets with the harshest treatment, because it was his maxim, that *to live in peace with mankind, and in a temper to do good offices, was the most essential part of our duty*. That notion of moral goodness gave umbrage to Sir John Hawkins, and drew

down upon the memory of his friend the bitterest imputations. Mr. Dyer, however, was admired and loved through life. He was a man of literature. Johnson loved to enter with him into a discussion of metaphysical, moral, and critical subjects; in those conflicts, exercising his talents, and, according to his custom, always contending for victory. Dr. Bathurst was the person on whom Johnson fixed his affection. He hardly ever spoke of him without tears in his eyes. It was from him, who was a native of Jamaica,\* that Johnson received into his service Frank,\* the black servant, whom, on account of his master, he valued to the end of his life. At the time of instituting the club in Ivy-Lane, Johnson had projected the *Ramblers*. The title was most probably suggested by the *Wanderer*; a poem which he mentions with the warmest praise, in the *Life of Savage*. With the same spirit of independence with which he wished to live, it was now his pride to write. He communicated his plan to none of his friends; he desired no assistance, relying entirely on his own fund, and the protection of the Divine Being, which he implored in a solemn form of prayer, composed by himself for the occasion. Having formed a resolution to undertake a work that might be of use and honour to his country, he thought, with Milton, that this was not to be obtained "but by devout prayer to that Eternal Spirit that can enrich with all utterance and knowledge, and send out his seraphim with the hallowed fire of his altar, to touch and purify the lips of whom he pleases."

Having invoked the special protection of Heaven, and by that act of piety fortified his mind, he began the great work of the *Ramblers*. The first number was published on Tuesday, March the 20th, 1750; and from that time was continued regularly every Tuesday and Saturday, for the space of two years, when it finally closed, on Saturday, March 14, 1752. As it began with motives of piety, so it appears that the same religious spirit glowed with unabating ardour to the last. His conclusion is: "The Essays professedly serious, if I have been able to execute my own intentions, will be found exactly conformable to the precepts of Christianity, without any accommodation to the licentiousness and levity of the present age. I therefore look back on this part of my work with pleasure, which no man shall diminish or augment. I shall never envy the honours which wit and learning obtain in any other cause, if I can be numbered among the writers who have given ardour to virtue, and confidence to truth." The whole number of Essays amounted to two hundred and eight. Addison's, in the *Spectator*, are

\* See Gent. Mag. vol. lxxxi. p. 198.

more in number, but not half in point of quantity: Addison was not bound to publish on stated days; he could watch the ebb and flow of his genius, and send his paper to the press when his own taste was satisfied. Johnson's case was very different. He wrote singly and alone. In the whole progress of the work he did not receive more than ten essays. This was a scanty contribution. For the rest, the author has described his situation. "He that condemns himself to compose on a stated day, will often bring to his task an attention dissipated, a memory embarrassed, an imagination overwhelmed, a mind distracted with anxieties, a body languishing with disease: he will labour on a barren topic, till it is too late to change it; or, in the ardour of invention, diffuse his thoughts into wild exuberance, which the pressing hour of publication cannot suffer judgment to examine or reduce." Of this excellent production, the number sold on each day did not amount to five hundred: of course the bookseller, who paid the author four guineas a week, did not carry on a successful trade. His generosity and perseverance deserve to be commended; and happily, when the collection appeared in volumes, were amply rewarded. Johnson lived to see his labours flourish in a tenth edition. His posterity, as an ingenious French writer has said on a similar occasion, began in his lifetime.

In the beginning of 1760, soon after the Rambler was set on foot, Johnson was induced by the arts of a vile impostor to lend his assistance, during a temporary delusion, to a fraud not to be paralleled in the annals of literature.\* One Lauder, a native of Scotland, who had been a teacher in the University of Edinburgh, had conceived a mortal antipathy to the name and character of Milton. His reason was, because the prayer of Pamela, in Sir Philip Sidney's *Arcadia*, was, as he supposed, maliciously inserted by the great poet in an edition of the *Elkon Basilike*, in order to fix an imputation of impiety on the memory of the murdered king. Fired with resentment, and willing to reap the profits of a gross imposition, this man collected from several Latin poets, such as Masenius the Jesuit, Staphorstius a Dutch divine, Beza, and others, all such passages as bore any kind of resemblance to different places in the *Paradise Lost*; and these he published from time to time, in the *Gentleman's Magazine*, with occasional interpolations of lines, which he himself translated from Milton. The public credulity swallowed all with eagerness; and Milton was supposed to be guilty of plagiarism from inferior modern writers. The fraud succeeded so well, that Lauder collected the whole into a volume,

and advertised it under the title of "An Essay on Milton's Use and Imitation of the Moderns, in his *Paradise Lost*; dedicated to the Universities of Oxford and Cambridge." While the book was in the press, the proof-sheets were shown to Johnson at the Ivy-Lane club, by Payne, the bookseller, who was one of the members. No man in that society was in possession of the authors from whom Lauder professed to make his extracts. The charge was believed, and the contriver of it found his way to Johnson; who is represented by Sir John Hawkins, not indeed as an accomplice in the fraud, but through motives of malignity to Milton, delighting in the detection, and exulting that the poet's reputation would suffer by the discovery. More malice to a deceased friend cannot well be imagined. Hawkins adds, "that he wished well to the argument must be inferred from the preface, which indubitably was written by him." The preface, it is well known, was written by Johnson, and for that reason is inserted in this edition. But if Johnson approved of the argument, it was no longer than while he believed it founded in truth. Let us advert to his own words in that very preface. "Among the inquiries to which the ardour of criticism has naturally given occasion, none is more obscure in itself, or more worthy of rational curiosity, than a retrospection of the progress of this mighty genius in the construction of his work; a view of the fabric gradually rising, perhaps from small beginnings, till its foundation rests in the centre, and its turrets sparkle in the skies; to trace back the structure, through all its varieties, to the simplicity of the first plan; to find what was projected, whence the scheme was taken, how it was improved, by what assistance it was executed, and from what stores the materials were collected; whether its founder dug them from the quarries of nature, or demolished other buildings to embellish his own." These were the motives that induced Johnson to assist Lauder with a preface: and are not these the motives of a critic and a scholar? What reader of taste, what man of real knowledge, would not think his time well employed in an inquiry so curious, so interesting, and instructive? If Lauder's facts were really true, who would not be glad, without the smallest tincture of malevolence, to receive real information? It is painful to be thus obliged to vindicate a man who, in his heart, towered above the petty arts of fraud and imposition, against an injudicious biographer, who undertook to be his editor, and the protector of his memory. Another writer, Dr. Towers, in an *Essay on the Life and Character of Dr. Johnson*, seems to countenance this calumny. He says, "It can hardly be doubted, but that Johnson's aversion to Milton's politics was the cause of that alacrity with

\* It has since been paralleled, in the case of the Shakspeare MSS. by a yet more vile impostor.

which he joined with Lauder in his infamous attack on our great epic poet, and which induced him to assist in that transaction." These words would seem to describe an accomplice, were they not immediately followed by an express declaration, that Johnson was *unacquainted with the imposture*. Dr. Towers adds, "It seems to have been by way of making some compensation to the memory of Milton, for the share he had in the attack of Lauder, that Johnson wrote the Prologue, spoken by Garrick, at Drury-Lane Theatre, 1750, on the performance of the Masque of Comus, for the benefit of Milton's granddaughter." Dr. Towers is not free from prejudice; but, as Shakspeare has it, "he begets a temperance, to give it smoothness." He is, therefore, entitled to a dispassionate answer. When Johnson wrote the prologue, it does not appear that he was aware of the malignant artifices practised by Lauder. In the postscript to Johnson's preface, a subscription is proposed, for relieving the grand-daughter of the author of *Paradise Lost*. Dr. Towers will agree that this shows Johnson's alacrity in doing good. That alacrity showed itself again in the letter printed in the *European Magazine*, January, 1785, and there said to have appeared originally in the *General Advertiser*, 4th April, 1750, by which the public were invited to embrace the opportunity of paying a just regard to the illustrious dead, united with the pleasure of doing good to the living. The letter adds, "to assist industrious indigence, struggling with distress, and debilitated by age, is a display of virtue, and an acquisition of happiness and honour. Whoever, therefore, would be thought capable of pleasure in reading the works of our incomparable Milton, and not so destitute of gratitude as to refuse to lay out a trifle, in a rational and elegant entertainment, for the benefit of his living remains, for the exercise of their own virtue, the increase of their reputation, and the consciousness of doing good, should appear at Drury-Lane Theatre, to-morrow, April 5, when Comus will be performed for the benefit of Mrs. Elizabeth Foster, grand-daughter to the author, and the only surviving branch of his family. *Nota bene*, there will be a new prologue on the occasion, written by the author of *Irene*, and spoken by Mr. Garrick." The man who had thus exerted himself to serve the grand-daughter, cannot be supposed to have entertained personal malice to the grand-father. It is true, that the malevolence of Lauder, as well as the impostures of Archibald Bower, were fully detected by the labours, in the cause of truth, of the Rev. Dr. Douglas, the late Lord Bishop of Salisbury.

—"Diram qui contudit Hydram,  
Notaque fatali portenta labore subegit."

But the pamphlet, entitled, "Milton vindicated

from the charge of Plagiarism brought against him by Mr. Lauder, and Lauder himself convicted of several Forgeries and gross Impositions on the Public, by John Douglas, M. A. Rector of Eaton Constantine, Salop," was not published till the year 1751. In that work, p. 77, Dr. Douglas says, "It is to be hoped, nay, it is *expected*, that the elegant and nervous writer, whose judicious sentiments and inimitable style point out the author of Lauder's preface and postscript, will no longer allow a man to *plume himself with his feathers*, who appears so little to have deserved his assistance, an assistance which I am persuaded would never have been communicated, had there been the least suspicion of those facts, which I have been the instrument of conveying to the world." We have here a contemporary testimony to the integrity of Dr. Johnson throughout the whole of that vile transaction. What was the consequence of the requisition made by Dr. Douglas? Johnson, whose ruffling passion may be said to be the love of truth, convinced Lauder, that it would be more for his interest to make a full confession of his guilt, than to stand forth the convicted champion of a lie; and for this purpose he drew up, in the strongest terms, a recantation, in a Letter to the Rev. Mr. Douglas, which Lauder signed, and published in the year 1751. That piece will remain a lasting memorial of the abhorrence with which Johnson beheld a violation of truth. Mr. Nichols, whose attachment to his illustrious friend was unwearied, showed him, in 1780, a book called "Remarks on Johnson's Life of Milton," in which the affair of Lauder was renewed with virulence, and a *poetical scale* in the *Literary Magazine*, 1758, (when Johnson had ceased to write in that collection) was urged as an additional proof of deliberate malice. He read the libellous passage with attention, and instantly wrote on the margin: "In the business of Lauder I was deceived, partly by thinking the man too frantic to be fraudulent. Of the *poetical scale* quoted from the Magazine I am not the author. I fancy it was put in after I had quitted that work; for I not only did not write it, but I do not remember it." As a critic and a scholar, Johnson was willing to receive what numbers, at the time, believed to be true information: when he found that the whole was a forgery, he renounced all connection with the author.

In March 1752, he felt a severe stroke of affliction in the death of his wife. The last number of the *Rambler*, as already mentioned, was on the 14th of that month. The loss of Mrs. Johnson was then approaching, and probably was the cause that put an end to those admirable periodical essays. It appears that she died on the 28th of March: in a memorandum, at the foot of the Prayers and Meditations, that is called her Dying Day. She was buried at

Bromley, under the care of Dr. Hawkesworth. Johnson placed a Latin inscription on her tomb, in which he celebrated her beauty. With the singularity of his prayers for his deceased wife, from that time to the end of his days, the world is sufficiently acquainted. On Easter-day, 22d April, 1764, his memorandum says: "Thought on Tetty, poor dear Tetty; with my eyes full. Went to church. After sermon I recommended Tetty in a prayer by herself; and my father, mother, brother, and Bathurst, in another. I did it only once, so far as it might be lawful for me." In a prayer, January 23, 1759, the day on which his mother was buried, he commends, as far as may be lawful, her soul to God, imploring for her whatever is most beneficial to her in her present state. In this habit he persevered to the end of his days. The Rev. Mr. Strahan, the editor of the *Prayers and Meditations*, observes, "That Johnson, on some occasions, prays that the Almighty *may have had mercy* on his wife and Mr. Thrale; evidently supposing their sentence to have been already passed in the Divine Mind; and by consequence, proving, that he had no belief in a state of purgatory, and no reason for praying for the dead that could impeach the sincerity of his profession as a Protestant." Mr. Strahan adds, "That, in praying for the regretted tenants of the grave, Johnson conformed to a practice which has been retained by many learned members of the Established Church, though the Liturgy no longer admits it. *If where the tree falleth, there it shall be*; if our state, at the close of life, is to be the measure of our final sentence, then prayers for the dead, being visibly fruitless, can be regarded only as the vain oblations of superstition. But of all superstitions this, perhaps, is one of the least unamiable, and most incident to a good mind. If our sensations of kindness be intense, those, whom we have revered and loved, death cannot wholly seclude from our concern. It is true, for the reason just mentioned, such evidences of our surviving affection may be thought ill-judged; but surely they are generous, and some natural tenderness is due even to a superstition, which thus originates in piety and benevolence." These sentences, extracted from the Rev. Mr. Strahan's preface, if they are not a full justification, are, at least, a beautiful apology. It will not be improper to add what Johnson himself has said on the subject. Being asked by Mr. Boswell,\* what he thought of purgatory as believed by the Roman Catholics? His answer was, "It is a very harmless doctrine. They are of opinion, that the generality of mankind are neither so obstinately wicked as to deserve everlasting punishment; nor so good as to merit being admitted

into the society of blessed spirits; and, therefore, that God is graciously pleased to allow a middle state, where they may be purified by certain degrees of suffering. You see there is nothing unreasonable in this; and if it be once established that there are souls in purgatory, it is as proper to pray for them, as for our brethren of mankind who are yet in this life." This was Dr. Johnson's guess into futurity; and to guess is the utmost that man can do. "Shadows, clouds, and darkness, rest upon it."

Mrs. Johnson left a daughter, Lucy Porter, by her first husband. She had contracted a friendship with Mrs. Anne Williams, the daughter of Zachary Williams, a physician of eminence in South Wales, who had devoted more than thirty years of a long life to the study of the longitude, and was thought to have made great advances towards that important discovery. His letters to Lord Halifax, and the Lords of the Admiralty, partly corrected and partly written by Dr. Johnson, are still extant in the hands of Mr. Nichols.† We there find Dr. Williams, in the eighty-third year of his age, stating, that he had prepared an instrument, which might be called an epitome or miniature of the terraqueous globe, showing, with the assistance of tables constructed by himself, the variations of the magnetic needle, and ascertaining the longitude for the safety of navigation. It appears that this scheme had been referred to Sir Isaac Newton; but that great philosopher excusing himself on account of his advanced age, all applications were useless till 1751, when the subject was referred, by order of Lord Anson, to Dr. Bradley, the celebrated professor of astronomy. His report was unfavourable;‡ though it allows that a considerable progress had been made. Dr. Williams, after all his labour and expense, died in a short time after, a melancholy instance of unrewarded merit. His daughter possessed uncommon talents, and, though blind, had an alacrity of mind that made her conversation agreeable, and even desirable. To relieve and appease melancholy reflections, Johnson took her home to his house in Gough-square. In 1755, Garrick gave her a benefit-play, which produced two hundred pounds. In 1766, she published, by subscription, a quarto volume of *Miscellanies*, and increased her little stock to three hundred pounds. That fund, with Johnson's protection, supported her through the remainder of her life.

During the two years in which the *Rambler* was carried on, the *Dictionary* proceeded by slow degrees. In May 1752, having composed a prayer preparatory to his return from tears and sorrow to the duties of life, he resumed his

\* See *Gentleman's Magazine* for Nov. and Dec. 1787.

† See *Gentleman's Magazine* for 1787, p. 1042.

grand design, and went on with vigour, giving, however, occasional assistance to his friend Dr. Hawkesworth in the *Adventurer*, which began soon after the *Rambler* was laid aside. Some of the most valuable essays in that collection were from the pen of Johnson. The Dictionary was completed towards the end of 1754; and, Cave being then no more, it was a mortification to the author of that noble addition to our language, that his old friend did not live to see the triumph of his labours. In May 1755, that great work was published. Johnson was desirous that it should come from one who had obtained academical honours; and for that purpose his friend, the Rev. Thomas Wharton, obtained for him, in the preceding month of February, a diploma for a master's degree from the University of Oxford. Garrick, on the publication of the Dictionary, wrote the following lines;

"Talk of war with a Briton, he'll boldly advance,  
That one English soldier can beat ten of France.  
Would we alter the boast, from the sword to the pen,  
Our odds are still greater, still greater our men.  
In the deep mines of science, though Frenchmen may  
    [Boyle?] toil,  
Can their strength be compared to Locke, Newton, or  
Let them rally their heroes, send forth all their powers,  
Their versemen and prosemen, then match them with  
    ours.  
First Shakespeare and Milton, like Gods in the fight,  
Have put their whole drama and epic to flight.  
In satires, epistles, and odes would they cope?  
Their numbers retreat before Dryden and Pope.  
And Johnson well arm'd, like a hero of yore,  
Has beat forty French, and will beat forty more."

It is, perhaps, needless to mention, that Forty was the number of the French academy, at the time when their Dictionary was published to settle their language.

In the course of the winter preceding this grand publication, the late Earl of Chesterfield gave two essays in the periodical paper called *The World*, dated November 28, and December 5, 1754, to prepare the public for so important a work. The original plan, addressed to his Lordship in the year 1747, is there mentioned in terms of the highest praise; and this was understood, at the time, to be a courtly way of soliciting a dedication of the Dictionary to himself. Johnson treated this civility with disdain. He said to Garrick and others, "I have sailed a long and painful voyage round the world of the English language; and does he now send out two cock-boats to tow me into harbour?" He had said, in the last number of the *Rambler*, that, "having laboured to maintain the dignity of virtue, I will not now degrade it by the meanness of dedication." Such a man, when he had finished his Dictionary, "not," as he says himself, "in the soft obscurities of retirement, or under the shelter of academic bowers, but amidst inconvenience and distrac-

tion, in sickness and in sorrow, and without the patronage of the Great," was not likely to be caught by the lure thrown out by Lord Chesterfield. He had in vain sought the patronage of that nobleman; and his pride, exasperated by disappointment, drew from him the following letter, dated in the month of February, 1755.

"To the Right Hon. the Earl of CHESTERFIELD.

MY LORD,  
I have been lately informed, by the proprietors of *The World*, that two papers, in which my Dictionary is recommended to the public, were written by your Lordship. To be so distinguished, is an honour which, being very little accustomed to favours from the great, I know not well how to receive, or in what terms to acknowledge.

"When, upon some slight encouragement, I first visited your Lordship, I was overpowered, like the rest of mankind, by the enchantment of your address, and could not forbear to wish, that I might boast myself *le vainqueur du vainqueur de la terre*; that I might obtain that regard for which I saw the world contending. But I found my attendance so little encouraged, that neither pride nor modesty would suffer me to continue it. When I had once addressed your Lordship in public, I had exhausted all the art of pleasing, which a retired and uncourtly scholar can possess. I had done all that I could; and no man is well pleased to have his all neglected, be it ever so little.

"Seven years, my Lord, have now passed since I waited in your outward room, or was repulsed from your door; during which time I have been pushing on my work through difficulties of which it is useless to complain, and have brought it at last to the verge of publication, without one act of assistance, one word of encouragement, or one smile of favour. Such treatment I did not expect, for I never had a patron before.

"The Shepherd in Virgil grew acquainted with Love, and found him a native of the rocks.

"Is not a patron, my Lord, one who looks with unconcern on a man struggling for life in the water, and, when he has reached ground, encumbers him with help? The notice which you have been pleased to take of my labours, had it been early, had been kind; but it has been delayed till I am indifferent, and cannot enjoy it; till I am solitary, and cannot impart it; till I am known, and do not want it. I hope it is no very cynical asperity not to confess obligations where no benefit has been received; or to be unwilling that the public should consider me as owing that to a patron, which Providence has enabled me to do for myself.

"Having carried on my work thus far with so little obligation to any favourer of learning, I

shall not be disappointed, though I should conclude it, if less be possible, with less; for I have been long wakened from that dream of hope, in which I once boasted myself with so much exultation,

My Lord, your Lordship's most humble,  
And most obedient servant,

SAMUEL JOHNSON."

It is said, upon good authority, that Johnson once received from Lord Chesterfield the sum of ten pounds. It were to be wished that the secret had never transpired. It was mean to receive it, and meaner to give it. It may be imagined, that for Johnson's ferocity, as it has been called, there was some foundation in his finances; and, as his Dictionary was brought to a conclusion, that money was now to flow in upon him. The reverse was the case. For his subsistence, during the progress of the work, he had received at different times the amount of his contract; and when his receipts were produced to him at a tavern dinner, given by the booksellers, it appeared that he had been paid a hundred pounds and upwards more than his due. The author of a book, called *Lexiphanes*\* written by a Mr. Campbell, a Scotchman, and purser of a man of war, endeavoured to blast his laurels, but in vain. The world applauded, and Johnson never replied. "Abuse," he said, "is often of service: there is nothing so dangerous to an author as silence; his name, like a shuttlecock, must be beat backward and forward, or it falls to the ground." *Lexiphanes* professed to be an imitation of the pleasant manner of Lucian; but humour was not the talent of the writer of *Lexiphanes*. As Dryden says, "He had too much horse-play in his railery."

It was in the summer of 1754, that the present writer became acquainted with Dr. Johnson. The cause of his first visit is related by Mrs. Piozzi nearly in the following manner: "Mr. Murphy being engaged in a periodical paper, the *Gray's-Inn Journal*, was at a friend's house in the country, and not being disposed to lose pleasure for business, wished to content his bookseller by some unstudied essay. He therefore took up a French *Journal Littéraire*, and translating something he liked, sent it away to town. Time, however, discovered that he translated from the French a *Rambler*, which had been taken from the English without acknowledgment. Upon this discovery, Mr. Murphy thought it right to make his excuses to Dr. Johnson. He went next day, and found him covered with soot, like a chimney-sweeper, in a little room, as if he had been acting Lungs in the *Alchymist*, making *ather*. This being

told by Mr. Murphy in company, 'Come, come,' said Dr. Johnson, 'the story is black enough; but it was a happy day that brought you first to my house.' After this first visit, the author of this narrative by degrees grew intimate with Dr. Johnson. The first striking sentence, that he heard from him, was in a few days after the publication of Lord Bolingbroke's posthumous works. Mr. Garrick asked him, "If he had seen them?" "Yes, I have seen them." "What do you think of them?" "Think of them!" He made a long pause, and then replied: "Think of them! A scoundrel and a coward! A scoundrel, who spent his life in charging a gun against Christianity; and a coward, who was afraid of hearing the report of his own gun; but left half-a-crown to a hungry Scotchman to draw the trigger after his death." His mind, at this time strained and over-laboured by constant exertion, called for an interval of repose and indolence. But indolence was the time of danger; it was then that his spirits, not employed abroad, turned with inward hostility against himself. His reflections on his own life and conduct were always severe: and, wishing to be immaculate, he destroyed his own peace by unnecessary scruples. He tells us, that when he surveyed his past life, he discovered nothing but a barren waste of time, with some disorders of body, and disturbances of mind, very near to madness. His life, he says, from his earliest youth, was wasted in a morning bed; and his reigning sin was a general sluggishness, to which he was always inclined, and in part of his life, almost compelled, by morbid melancholy, and weariness of mind. This was his constitutional malady; derived, perhaps, from his father, who was, at times, overcast with a gloom that bordered on insanity. When to this it is added, that Johnson, about the age of twenty, drew up a description of his infirmities, for Dr. Swinfen, at that time an eminent physician in Staffordshire; and received an answer to his letter, importing, that the symptoms indicated a future privation of reason; who can wonder that he was troubled with melancholy and dejection of spirit? An apprehension of the worst calamity that can befall human nature hung over him all the rest of his life, like the sword of the tyrant suspended over his guest. In his sixtieth year he had a mind to write the history of his melancholy; but he desisted, not knowing whether it would not too much disturb him. In a Latin Poem, however, to which he has prefixed as a title, *INQOI ZEATTON*, he has left a picture of himself, drawn with as much truth, and as firm a hand, as can be seen in the portraits of Hogarth or Sir Joshua Reynolds. The learned reader will find the original Poem in this volume, and it is hoped that a translation, or rather imitation, of so curious a piece will not be improper in this place.

\* This work was not published until the year 1767, when Dr. Johnson's Dictionary was fully established in reputation. C.

## KNOW YOURSELF.

(AFTER REVISING AND ENLARGING THE ENGLISH  
LEXICON OR DICTIONARY.)

WHEN Scaliger, whole years of labour past,  
Beheld his Lexicon complete at last,  
And weary of his task, with wond'ring eyes,  
Saw from words piled on words a fabric rise,  
He cursed the industry, inertly strong,  
In creeping toil that could persist so long,  
And if, enraged he cried, Heaven meant to shed  
Its keenest vengeance on the guilty head,  
The drudgery of words the damn'd would know,  
Doom'd to write Lexicons in endless woe.\*

Yes, you had cause, great Genius, to repent;  
"You lost good days, that might be better spent;"  
You well might grudge the hours of ling'ring pain,  
And view your learned labours with disdain,  
To you were given the large expanded mind,  
The flame of genius, and the taste refined.  
'Twas yours on eagle wings aloft to soar,  
And amidst rolling worlds the Great First Cause ex-  
plore;

To fix the eras of recorded time,  
And live in every age and every clime;  
Record the Chiefs, who propt their Country's cause;  
Who founded Empires, and established Laws;  
To learn whate'er the Sage, with virtue fraught,  
Whate'er the Muse of moral wisdom taught.  
These were your quarry; these to you were known,  
And the world's ample volume was your own.

Yet warn'd by me, ye pigmy Wits, beware,  
Nor with immortal Scaliger compare.  
For me, though his example strike my view,  
Oh! not for me his footsteps to pursue.  
Whether first Nature, unpropitious, cold,  
This clay compounded in a ruder mould;  
Or the slow current, loitering at my heart,  
No gleam of wit or fancy can impart;  
Whate'er the cause, from me no numbers flow  
No visions warm me, and no raptures glow.  
A mind like Scaliger's, superior still,  
No grief could conquer, no misfortunes chill.  
Though for the maze of words his native skies  
He seem'd to quit, 'twas but again to rise;  
To mount once more to the bright source of day,  
And view the wonders of th' ethereal way.  
The love of Fame his generous bosom fired;  
Each Science hail'd him, and each Muse inspired.  
For him the Sons of Learning trimm'd the bays,  
And Nations grew harmonious in his praise.

My task perform'd, and all my labours o'er,  
For me what lot has Fortune now in store?  
The listless will succeeds, that worst disease,  
The rack of indolence, the sluggish ease.  
Care grows on care, and o'er my aching brain  
Black melancholy pours her morbid train.  
No kind relief, no lenthive at hand,  
I seek at midnight clubs the social band  
But midnight clubs, where wit with noise conspires,  
Where Comus revels, and where wine inspires,

Delight no more: I seek my lonely bed,  
And call on Sleep to soothe my languid head.  
But Sleep from these sad lids flies far away;  
I mourn all night, and dread the coming day.  
Exhausted, tired, I throw my eyes around,  
To find some vacant spot on classic ground;  
And soon, vain hope! I form a grand design:  
Languor succeeds, and all my powers decline.  
If Science open not her richest vein,  
Without materials all our toil is vain.  
A form to rugged stone when Phidias gives,  
Beneath his touch a new creation lives.  
Remove his marble, and his genius dies;  
With Nature, then, no breathing statue vies.

Whate'er I plan, I feel my powers confined  
By Fortune's frown and penury of mind.  
I boast no knowledge glean'd with toil and strife,  
That bright reward of a well-acted life.  
I view myself, while Reason's feeble light  
Shoots a pale glimmer through the gloom of night.  
While passion, error, phantoms of the brain,  
And vain opinions, fill the dark domain;  
A dreary void, where fears with grief combined  
Waste all within, and desolate the mind.

What then remains? Must I in slow decline  
To mute inglorious ease old age resign?  
Or, bold Ambition kindling in my breast,  
Attempt some arduous task? Or, were it best,  
Brooding o'er Lexicons to pass the day,  
And in that labour drudge my life away?

Such is the picture for which Dr. Johnson  
sat to himself. He gives the prominent fea-  
tures of his character; his lassitude, his morbid  
melancholy, his love of fame, his dejection, his  
tavern parties, and his wandering reveries. *Vacuæ mala somnia mentis*, about which so much  
has been written; all are painted in miniature,  
but in vivid colours, by his own hand. His  
idea of writing more dictionaries was not  
merely said in verse. Mr. Hamilton, who was  
at that time an eminent printer, and well ac-  
quainted with Dr. Johnson, remembers that he  
engaged in a Commercial Dictionary, and, as  
appears by the receipts in his possession, was  
paid his price for several sheets; but he soon re-  
linquished the undertaking. It is probable that  
he found himself not sufficiently versed in that  
branch of knowledge.

He was again reduced to the expedient of  
short compositions for the supply of the day.  
The writer of this narrative has now before  
him a letter in Dr. Johnson's hand-writing,  
which shows the distress and melancholy situa-  
tion of the man who had written the Rambler,  
and finished the great work of his Dictionary.  
The letter is directed to Mr. Richardson (the  
author of *Clarissa*), and is as follows:

"SIR,

"I am obliged to entreat your assistance. I  
am now under an arrest for five pounds eigh-  
teen shillings. Mr. Strahan, from whom I  
should have received the necessary help in

\* See Scaliger's Epigram on this subject, communicated without  
doubt by Dr. Johnson, *Gent. Mag.* 1748, p. 3.

this case, is not at home; and I am afraid of not finding Mr. Millar. If you will be so good as to send me this sum, I will very gratefully repay you, and add it to all former obligations.

"I am, Sir,

"Your most obedient,

"and most humble servant,

"SAMUEL JOHNSON."

"Gough-square, 16 March."

In the margin of this letter there is a memorandum in these words: "March 16, 1756, Sent six guineas. Witness, Wm. Richardson." For the honour of an admired writer it is to be regretted, that we do not find a more liberal entry. To his friend in distress he sent eight shillings more than was wanted. Had an incident of this kind occurred in one of his Romances, Richardson would have known how to grace his hero; but in fictitious scenes, generosity costs the writer nothing.

About this time Johnson contributed several papers to a periodical Miscellany, called "The Visitor," from motives which are highly honourable to him, a compassionate regard for the late Mr. Christopher Smart. The Criticism on Pope's Epitaphs appeared in that work. In a short time after he became a reviewer in the Literary Magazine, under the auspices of the late Mr. Newbery, a man of a projecting head, good taste, and great industry. This employment engrossed but little of Johnson's time. He resigned himself to indolence, took no exercise, rose about two, and then received the visits of his friends. Authors, long since forgotten, waited on him as their oracle, and he gave responses in the chair of criticism. He listened to the complaints, the schemes, and the hopes and fears, of a crowd of inferior writers, "who," he said, in the words of Roger Ascham, "*lived, men knew not how, and died obscure, men marked not when.*" He believed that he could give a better history of Grub-street than any man living. His house was filled with a succession of visitors till four or five in the evening. During the whole time he presided at his tea-table. Tea was his favourite beverage; and, when the late Jonas Hanway pronounced his anathema against the use of tea, Johnson rose in defence of his habitual practice, declaring himself "in that article a hardened sinner, who had for years diluted his meals with the infusion of that fascinating plant; whose tea-kettle had no time to cool: who with tea solaced the midnight hour, and with tea welcomed the morning."

The proposal for a new edition of Shakspeare, which had formerly miscarried, was resumed in the year 1756. The booksellers readily agreed to his terms; and subscription-tickets were issued out. For undertaking this work, money, he confessed, was the inciting motive. His friends

exerted themselves to promote his interest; and, in the mean time, he engaged in a new periodical production called "The Idler." The first number appeared on Saturday, April 15, 1758; and the last, April 5, 1760. The profits of this work, and the subscriptions for the new edition of Shakspeare, were the means by which he supported himself for four or five years. In 1759 was published "Rasselas, Prince of Abyssinia." His translation of Lobo's Voyage to Abyssinia seems to have pointed out that country for the scene of action; and *Rassila Christos*, the General of *Sultan Segued*, mentioned in that work, most probably suggested the name of the prince. The author wanted to set out on a journey to Litchfield, in order to pay the last offices of filial piety to his mother, who, at the age of ninety, was then near her dissolution; but money was necessary. Mr. Johnston, a bookseller, who has long since left off business, gave one hundred pounds for the copy. With this supply Johnson set out for Litchfield; but did not arrive in time to close the eyes of a parent whom he loved. He attended the funeral, which, as appears among his memorandums, was on the 23d of January, 1759.

Johnson now found it necessary to retrench his expenses. He gave up his house in Gough-square. Mrs. Williams went into lodgings. He retired to Gray's-Inn, and soon removed to chambers in the Inner Temple-lane, where he lived in poverty, total idleness, and the pride of literature. *Magni stat nominis umbrâ*. Mr. Fitzherbert (the father of Lord St. Helens, the present minister at Madrid,) a man distinguished through life for his benevolence and other amiable qualities, used to say, that he paid a morning visit to Johnson, intending from his chambers to send a letter into the City; but, to his great surprise, he found an author by profession without pen, ink, or paper. The late Dr. Douglas, bishop of Salisbury, was also among those who endeavoured, by constant attention, to soothe the cares of a mind which he knew to be afflicted with gloomy apprehensions. At one of the parties made at his house, Boscovich, the Jesuit, who had then lately introduced the Newtonian philosophy at Rome, and, after publishing an elegant Latin poem on the subject, was made a Fellow of the Royal Society, was one of the company invited to meet Dr. Johnson. The conversation at first was mostly in French. Johnson, though thoroughly versed in that language, and a professed admirer of Boileau and La Bruyere, did not understand its pronunciation, nor could he speak it himself with propriety. For the rest of the evening the talk was in Latin. Boscovich had a ready current flow of that flimsy phraseology with which a priest may travel through Italy, Spain, and Germany. Johnson scorned what he called colloquial barbarisms. It was his pride to speak

his best. He went on, after a little practice, with as much facility as if it was his native tongue. One sentence this writer well remembers. Observing that Fontenelle at first opposed the Newtonian philosophy, and embraced it afterwards, his words were: *Fontenellus, ni fallor, in extremâ senectute, fuit transfuga ad castra Newtoniana.*

We have now travelled through that part of Dr. Johnson's life which was a perpetual struggle with difficulties. Halcyon days are now to open upon him. In the month of May 1762, his Majesty, to reward literary merit, signified his pleasure to grant to Johnson a pension of three hundred pounds a year. The Earl of Bute was minister. Lord Loughborough, who, perhaps, was originally a mover in the business, had authority to mention it. He was well acquainted with Johnson; but, having heard much of his independent spirit, and of the downfall of Osborne the bookseller, he did not know but his benevolence might be rewarded with a folio on his head. He desired the author of these memoirs to undertake the task. This writer thought the opportunity of doing so much good the most happy incident in his life. He went, without delay, to the chambers in the Inner Temple-lane, which, in fact, were the abode of wretchedness. By slow and studied approaches the message was disclosed. Johnson made a long pause: he asked if it was seriously intended? He fell into a profound meditation, and his own definition of a pensioner occurred to him. He was told, "That he, at least, did not come within the definition." He desired to meet next day and dine at the Mitre Tavern. At that meeting he gave up all his scruples. On the following day Lord Loughborough conducted him to the Earl of Bute. The conversation that passed was in the evening related to this writer by Dr. Johnson. He expressed his sense of his Majesty's bounty, and thought himself the more highly honoured, as the favour was not bestowed on him for having dipped his pen in faction. "No, Sir," said Lord Bute, "it is not offered to you for having dipped your pen in faction, nor with a design that you ever should." Sir John Hawkins will have it, that, after this interview, Johnson was often pressed to wait on Lord Bute: but with a sullen spirit refused to comply. However that be, Johnson was never heard to utter a disrespectful word of that nobleman. The writer of this essay remembers a circumstance which may throw some light on this subject. The late Dr. Rose, of Chiswick, whom Johnson loved and respected, contended for the pre-eminence of the Scotch writers; and Ferguson's book on Civil Society, then on the eve of publication, he said, would give the laurel to North Britain. "Alas! what can he do upon that subject?" said Johnson: "Aristotle, Polybius, Grotius, Puffendorf,

and Burlemaqui, have reaped in that field before him." "He will treat it," said Dr. Rose, "in a new manner." "A new manner! Buckinger had no hands, and he wrote his name with his toes at Charing-cross, for half-a-crown a-piece; that was a new manner of writing!" Dr. Rose replied, "If that will not satisfy you, I will name a writer, whom you must allow to be the best in the kingdom." "Who is that?" "The Earl of Bute, when he wrote an order for your pension." "There, Sir," said Johnson, "you have me in the toils: to Lord Bute I must allow whatever praise you may claim for him." Ingratitude was no part of Johnson's character.

Being now in the possession of a regular income, Johnson left his chambers in the Temple, and once more became master of a house in Johnson's-court, Fleet-street. Dr. Levet, his friend and physician in ordinary, paid his daily visits with assiduity; made tea all the morning, talked what he had to say, and did not expect an answer. Mrs. Williams had her apartment in the house, and entertained her benefactor with more enlarged conversation. Chemistry was part of Johnson's amusement. For this love of experimental philosophy, Sir John Hawkins thinks an apology necessary. He tells us, with great gravity, that curiosity was the only object in view; not an intention to grow suddenly rich by the philosopher's stone, or the transmutation of metals. To enlarge his circle, Johnson once more had recourse to a literary club. This was at the Turk's Head, in Gerard-street, Soho, on every Tuesday evening through the year. The members were, besides himself, the Right Hon. Edmund Burke, Sir Joshua Reynolds, Dr. Nugent, Dr. Goldsmith, the late Mr. Topham Beauclerk, Mr. Langton, Mr. Chamier, Sir John Hawkins, and some others. Johnson's affection for Sir Joshua was founded on a long acquaintance, and a thorough knowledge of the virtues and amiable qualities of that excellent artist. He delighted in the conversation of Mr. Burke. He met him for the first time at Mr. Garrick's, several years ago. On the next day he said, "I suppose, Murphy you are proud of your countryman. CUM TALIS SIT UTINAM NON ES FEX?" From that time his constant observation was, "That a man of sense could not meet Mr. Burke by accident, under a gateway to avoid a shower, without being convinced that he was the first man in England." Johnson felt not only kindness, but zeal and ardour for his friends. He did every thing in his power to advance the reputation of Dr. Goldsmith. He loved him, though he knew his failings, and particularly the leaven of envy, which corroded

\* See Johnson's Epitaph on him.

the mind of that elegant writer, and made him impatient, without disguise, of the praises bestowed on any person whatever. Of this infirmity, which marked Goldsmith's character, Johnson gave a remarkable instance. It happened that he went with Sir Joshua Reynolds and Goldsmith to see the Fantoccini, which were exhibited some years ago in or near the Haymarket. They admired the curious mechanism by which the puppets were made to walk the stage, draw a chair to the table, sit down, write a letter, and perform a variety of other actions, with such dexterity, that "though Nature's journeymen made the men, they imitated humanity" to the astonishment of the spectator. The entertainment being over, the three friends retired to a tavern. Johnson and Sir Joshua talked with pleasure of what they had seen; and says Johnson, in a tone of admiration, "How the little fellow brandished his spontoon!" "There is nothing in it," replied Goldsmith, starting up with impatience; "give me a spontoon; I can do it as well myself."

Enjoying his amusements at his weekly club, and happy in a state of independence, Johnson gained in the year 1765 another resource, which contributed more than any thing else to exempt him from the solitudes of life. He was introduced to the late Mr. Thrale and his family. Mrs. Piozzi has related the fact, and it is therefore needless to repeat it in this place. The author of this narrative looks back to the share he had in that business with self-congratulation, since he knows the tenderness which from that time clothed Johnson's cares at Streatham, and prolonged a valuable life. The subscribers to Shakspeare began to despair of ever seeing the promised edition. To acquit himself of this obligation, he went to work unwillingly, but proceeded with vigour. In the month of October, 1765, Shakspeare was published; and, in a short time after, the University of Dublin sent over a diploma, in honourable terms, creating him a Doctor of Laws. Oxford, in eight or ten years afterwards, followed the example; and till then Johnson never assumed the title of Doctor. In 1766 his constitution seemed to be in a rapid decline; and that morbid melancholy which often clouded his understanding, came upon him with a deeper gloom than ever. Mr. and Mrs. Thrale paid him a visit in this situation, and found him on his knees, with Dr. Delap, the Rector of Lewes, in Sussex, beseeching God to continue to him the use of his understanding. Mr. Thrale took him to his house at Streatham; and Johnson from that time became a constant resident in the family. He went occasionally to the club in Gerard-street; but his head-quarters were fixed at Streatham. An apartment was fitted up for him, and the library was greatly enlarged. Parties were constantly invited from town; and

Johnson was every day at an elegant table, with select and polished company. Whatever could be devised by Mr. and Mrs. Thrale to promote the happiness, and establish the health of their guest, was studiously performed from that time to the end of Mr. Thrale's life. Johnson accompanied the family in all their summer excursions to Brighthelmstone, to Wales, and to Paris. It is but justice to Mr. Thrale to say, that a more ingenious frame of mind no man possessed. His education at Oxford gave him the habits of a gentleman; his amiable temper recommended his conversation; and the goodness of his heart made him a sincere friend. That he was the patron of Johnson is an honour to his memory.

In petty disputes with contemporary writers, or the wits of the age, Johnson was seldom entangled. A single incident of that kind may not be unworthy of notice, since it happened with a man of great celebrity in his time. A number of friends dined with Garrick on a Christmas-day. Foote was then in Ireland. It was said at table, that the modern Aristophanes (so Foote was called) had been horse-whipped by a Dublin apothecary, for mimicking him on the stage. "I wonder," said Garrick, "that any man should show so much resentment to Foote; he has a patent for such liberties; nobody ever thought it worth his while to quarrel with him in London." "I am glad," said Johnson, "to find that the man is rising in the world." The expression was afterwards reported to Foote; who, in return, gave out, that he would produce the *Caliban of Literature* on the stage. Being informed of this design, Johnson sent word to Foote, "That the theatre being intended for the reformation of vice, he would step from the boxes on the stage, and correct him before the audience." Foote knew the intrepidity of his antagonist, and abandoned the design. No ill-will ensued. Johnson used to say, "That, for broad-faced mirth, Foote had not his equal."

Dr. Johnson's fame excited the curiosity of the King. His Majesty expressed a desire to see a man of whom extraordinary things were said. Accordingly, the librarian at Buckingham-house invited Johnson to see that elegant collection of books, at the same time giving a hint of what was intended. His Majesty entered the room; and, among other things, asked the author, "if he meant to give the world any more of his compositions?" Johnson answered, "That he thought he had written enough." "And I should think so too," replied his Majesty, "if you had not written so well."

Though Johnson thought he had written enough, his genius, even in spite of bodily sluggishness, could not lie still. In 1770 we find him entering the lists as a political writer. The flame of discord that blazed throughout the nation on the expulsion of Mr. Wilkes, and the

final determination of the House of Commons, that Mr. Luttrell was duly elected, by 206 votes against 1143, spread a general spirit of discontent. To allay the tumult, Dr. Johnson published *The False Alarm*. Mrs. Piozzi informs us, "That this pamphlet was written at her house, between eight o'clock on Wednesday night and twelve on Thursday night." This celerity has appeared wonderful to many, and some have doubted the truth. It may, however, be placed within the bounds of probability. Johnson has observed that there are different methods of composition. Virgil was used to pour out a great number of verses in the morning, and pass the day in retrenching the exuberances, and correcting inaccuracies; and it was Pope's custom to write his first thoughts in his first words, and gradually to amplify, decorate, rectify, and refine them. Others employ at once memory and invention, and with little intermediate use of the pen, form and polish large masses by continued meditation, and write their productions only, when, in their opinion, they have completed them. This last was Johnson's method. He never took his pen in hand till he had well weighed his subject, and grasped in his mind the sentiments, the train of argument, and the arrangement of the whole. As he often thought aloud, he had, perhaps, talked it over to himself. This may account for that rapidity with which, in general, he despatched his sheets to the press, without being at the trouble of a fair copy. Whatever may be the logic or eloquence of the *False Alarm*, the House of Commons have since erased the resolution from the Journals. But whether they have not left materials for a future controversy, may be made a question.

In 1771, he published another tract, on the subject of Falkland Islands. The design was to show the impropriety of going to war with Spain for an island thrown aside from human use, stormy in winter, and barren in summer. For this work it is apparent that materials were furnished by direction of the minister.

At the approach of the general election in 1774, he wrote a short discourse, called *The Patriot*; not with any visible application to Mr. Wilkes; but to teach the people to reject the leaders of opposition, who called themselves patriots. In 1775 he undertook a pamphlet of more importance, namely, *Taxation no Tyranny*, in answer to the Resolutions and Address of the American Congress. The scope of the argument was, that distant colonies, which had in their assemblies a legislature of their own, were, notwithstanding, liable to be taxed in a British Parliament, where they had neither peers in one house, nor representatives in the other. He was of opinion, that this country was strong enough to enforce obedience. "When an Englishman," he says, "is told that the Americans shoot up like the hydra, he naturally

considers how the hydra was destroyed." The event has shown how much he and the minister of that day were mistaken.

The Account of the Tour to the Western Islands of Scotland, which was undertaken in the autumn of 1773, in company with Mr. Boswell, was not published till some time in the year 1775. This book has been variously received; by some extolled for the elegance of the narrative, and the depth of observation on life and manners; by others, as much condemned, as a work of avowed hostility to the Scotch nation. The praise was, beyond all question, fairly deserved; and the censure, on due examination, will appear hasty and ill-founded. That Johnson entertained some prejudices against the Scotch, must not be dissembled. It is true, as Mr. Boswell says, "that he thought their success in England exceeded their proportion of real merit, and he could not but see in them that nationality which no liberal-minded Scotsman will deny." The author of these memoirs well remembers, that Johnson one day asked him, "Have you observed the difference between your own country impudence and Scotch impudence?" The answer being in the negative: "Then I will tell you," said Johnson. "The impudence of an Irishman is the impudence of a fly, that buzzes about you, and you put it away, but it returns again, and flutters and teases you. The impudence of a Scotsman is the impudence of a leech, that fixes and sucks your blood." Upon another occasion, this writer went with him into the shop of Davis the bookseller, in Russel-street, Covent-garden. Davis came running to him almost out of breath with joy: "The Scots gentleman is come, Sir; his principal wish is to see you; he is now in the back-parlour." "Well, well, I'll see the gentleman," said Johnson. He walked towards the room. Mr. Boswell was the person. This writer followed with no small curiosity. "I find," said Mr. Boswell, "that I am come to London at a bad time, when great popular prejudice has gone forth against us North Britons; but when I am talking to you, I am talking to a large and liberal mind, and you know that I cannot help coming from Scotland." "Sir," said Johnson, "no more can the rest of your countrymen."

He had other reasons that helped to alienate him from the natives of Scotland. Being a cordial well-wisher to the constitution in Church and State, he did not think that Calvin and John Knox were proper founders of a national religion. He made, however, a wide distinction between the Dissenters of Scotland and the Separatists

\* Mr. Boswell's account of this introduction is very different from the above. See his *Life of Johnson*, vol. I. p. 360, 8vo. Edit. 1804.

of England. To the former he imputed no disaffection, no want of loyalty. Their soldiers and their officers had shed their blood with zeal and courage in the service of Great Britain; and the people, he used to say, were content with their own established modes of worship, without wishing, in the present age, to give any disturbance to the Church of England. This he was at all times ready to admit; and therefore declared, that whenever he found a Scotchman to whom an Englishman was as a Scotchman, that Scotchman should be as an Englishman to him. In this, surely, there was no rancour, no malevolence. The Dissenters on this side the Tweed appeared to him in a different light. Their religion, he frequently said, was too worldly, too political, too restless and ambitious. The doctrine of *cushiering* kings, and erecting on the ruins of the constitution a new form of government, which lately issued from their pulpits, he always thought was, under a calm disguise, the principle that lay lurking in their hearts. He knew that a wild democracy had overturned Kings, Lords, and Commons; and that a set of Republican Fanatics, who would not bow at the name of Jesus, had taken possession of all the livings and all the parishes in the kingdom. That those scenes of horror might never be renewed, was the ardent wish of Dr. Johnson; and though he apprehended no danger from Scotland, it is probable that his dislike of Calvinism mingled sometimes with his reflections on the natives of that country. The association of ideas could not be easily broken; but it is well known that he loved and respected many gentlemen from that part of the island. Dr. Robertson's History of Scotland, and Dr. Beattie's Essays, were subjects of his constant praise. Mr. Boswell, Dr. Rose of Chiswick, Andrew Millar, Mr. Hamilton, the printer, and the late Mr. Strahan, were among his most intimate friends. Many others might be added to the list. He scorned to enter Scotland as a spy; though Hawkins, his biographer, and the professing defender of his fame, allowed himself leave to represent him in that ignoble character. He went into Scotland, to survey men and manners. Antiquities, fossils, and minerals, were not within his province. He did not visit that country to settle the station of Roman camps, or the spot where Galgacus fought the last battle for public liberty. The people, their customs, and the progress of literature, were his objects. The civilities which he received in the course of his tour have been repaid with grateful acknowledgment, and, generally, with great elegance of expression. His crime is, that he found the country bare of trees, and he has stated the fact. This, Mr. Boswell, in his Tour to the Hebrides, has told us, was resented by his countrymen with anger inflamed to rancour; but he admits that there are few

trees on the east side of Scotland. Mr. Pen-nant, in his Tour, says, that in some parts of the eastern side of the country, he saw several large plantations of pine planted by gentlemen near their seats; and in this respect such a laudable spirit prevails, that, *in another half century* it never shall be said, "*To spy the nakedness of the land are you come.*" Johnson could not wait for that half century, and therefore mentioned things as he found them. If in anything he has been mistaken, he has made a fair apology in the last paragraph of his book, avowing with candour, "That he may have been surprised by modes of life, and appearances of nature, that are familiar to men of wider survey, and more varied conversation. Novelty and ignorance must always be reciprocal; and he is conscious that his thoughts on national manners are the thoughts of one who has seen but little."

The Poems of Ossian made a part of Johnson's inquiry during his residence in Scotland and the Hebrides. On his return to England, November 1773, a storm seemed to be gathering over his head; but the cloud never burst, and the thunder never fell.—Ossian, it is well known, was presented to the public as a translation from the *Earse*; but that this was a fraud, Johnson declared without hesitation. "The *Earse*," he says, "was always oral only, and never a written language. The Welsh and the Irish were more cultivated. In *Earse* there was not in the world a single manuscript a hundred years old. Martin, who in the last century published an Account of the Western Islands, mentions *Irish*, but never *Earse* manuscripts, to be found in the islands in his time. The bards could not read; if they could, they might probably have written. But the bard was a barbarian among barbarians, and, knowing nothing himself, lived with others that knew no more. If there is a manuscript from which the translation was made, in what age was it written, and where is it? If it was collected from oral recitation, it could only be in detached parts and scattered fragments: the whole is too long to be remembered. Who put it together in its present form?" For these, and such like reasons, Johnson calls the whole an imposture. He adds, "The editor, or author, never could show the original, nor can it be shown by any other. To revenge reasonable incredulity, by refusing evidence, is a degree of insolence with which the world is not yet acquainted; and stubborn audacity is the last refuge of guilt. This reasoning carries with it great weight. It roused the resentment of Mr. Macpherson. He sent a threatening letter to the author; and Johnson answered him in the rough phrase of stern defiance. The two heroes frowned at a distance, but never came to action.

In the year 1777, the misfortunes of Dr. Dodd excited his compassion. He wrote a speech for

that unhappy man, when called up to receive judgment of death; besides two petitions, one to the King, and another to the Queen: and a sermon to be preached by Dodd to the convicts in Newgate. It may appear trifling to add, that about the same time he wrote a prologue to the comedy of "A Word to the Wise," written by Hugh Kelly. The play, some years before, had been damned by a party on the first night. It was revived for the benefit of the author's widow. Mrs. Piozzi relates, that when Johnson was rallied for these exertions, so close to one another, his answer was, "When they come to me with a dying Parson, and a dead Stay-maker, what can a man do?" We come now to the last of his literary labours. At the request of the Booksellers he undertook the Lives of the Poets. The first publication was in 1779, and the whole was completed in 1781. In a memorandum of that year he says, some time in March he finished the Lives of the Poets, which he wrote in his usual way, dilatorily and hastily, unwilling to work, yet working with vigour and haste. In another place, he hopes they are written in such a manner as may tend to the promotion of piety. That the history of so many men, who, in their different degrees, made themselves conspicuous in their time, was not written recently after their deaths, seems to be an omission that does no honour to the Republic of Letters. Their contemporaries in general looked on with calm indifference, and suffered Wit and Genius to vanish out of the world in total silence, unregarded, and unlamented. Was there no friend to pay the tribute of a tear? No just observer of life, to record the virtues of the deceased? Was even Envy silent? It seemed to have been agreed, that if an author's works survived, the history of the man was to give no moral lesson to after ages. If tradition told us that Ben Johnson went to the Devil Tavern; that Shakspeare stole deer, and held the stirrup at playhouse doors; that Dryden frequented Button's Coffee-house; curiosity was lulled asleep, and biography forgot the best part of her function, which is to instruct mankind by examples taken from the school of life. This task remained for Dr. Johnson, when years had rolled away; when the channels of information were, for the most part, choked up, and little remained besides doubtful anecdote, uncertain tradition, and vague report.

"Nunc situs informis premit et deserta Vetustas."

The value of Biography has been better understood in other ages, and in other countries. Tacitus informs us, that to record the lives and characters of illustrious men was the practice of the Roman authors, in the early periods of the Republic. In France the example has been followed. Fontenelle, D'Alembert, and Monsieur Thomas, have left models in this kind of con-

position. They have embalmed the dead. But it is true, that they had incitements and advantages, even at a distant day, which could not, by any diligence, be obtained by Dr. Johnson. The wits of France had ample materials. They lived in a nation of critics, who had at heart the honour done to their country by their Poets, their Heroes, and their Philosophers. They had, besides, an *Academy of Belles-Lettres*, where Genius was cultivated, refined, and encouraged. They had the tracts, the essays, and dissertations, which remain in the memoirs of the Academy, and they had the speeches of the several members, delivered at their first admission to a seat in that learned Assembly. In those speeches the new Academician did ample justice to the memory of his predecessor; and though his harangue was decorated with the colours of eloquence, and was, for that reason, called panegyric, yet being pronounced before qualified judges, who knew the talents, the conduct, and morals of the deceased, the speaker could not, with propriety, wander into the regions of fiction. The truth was known, before it was adorned. The Academy saw the marble before the artist polished it. But this country has had no Academy of Literature. The public mind, for centuries, has been engrossed by party and faction; by the madness of many for the gain of a few; by civil wars, religious discussions, trade and commerce, and the arts of accumulating wealth. Amidst such attentions, who can wonder that cold praise has been often the only reward of merit? In this country Doctor Nathaniel Hodges, who, like the good bishop of Marseilles, *drew purer breath* amidst the contagion of the plague in London, and, during the whole time, continued in the city, administering medical assistance, was suffered, as Johnson used to relate with tears in his eyes, to die for debt in a gaol. In this country, the man who brought the New River to London was ruined by that noble project; and in this country, Otway died for want on Tower Hill; Butler, the great author of *Hudibras*, whose name can only die with the English language, was left to languish in poverty, the particulars of his life almost unknown, and scarce a vestige of him left except his immortal poem. Had there been an Academy of Literature, the lives, at least, of those celebrated persons would have been written for the benefit of posterity. Swift, it seems, had the idea of such an institution, and proposed it to Lord Oxford; but Whig and Tory were more important objects. It is needless to dissemble, that Dr. Johnson, in the *Life of Roscommon*, talks of the inutility of such a project. "In this country," he says, "an Academy could be expected to do but little. If an Academician's place were profitable, it would be given by interest; if attendance were gratuitous, it would be rarely paid, and no man

would endure the least disgust. Unanimity is impossible, and debate would separate the assembly." To this it may be sufficient to answer, that the Royal Society has not been dissolved by sullen disgust; and the modern Academy at Somerset House has already performed much, and promises more. Unanimity is not necessary to such an assembly. On the contrary, by difference of opinions, and collision of sentiment, the cause of literature would thrive and flourish. The true principles of criticism, the secret of fine writing, the investigation of antiquities, and other interesting subjects, might occasion a clash of opinion; but in that contention Truth would receive illustration, and the essays of the several members would supply the memoirs of the Academy. "But," says Dr. Johnson, "suppose the philosophical decree made and promulgated, what would be its authority? In absolute government there is sometimes a general reverence paid to all that has the sanction of power, the countenance of greatness. How little this is the state of our country needs not be told. The edicts of an English Academy would probably be read by many, only that they may be sure to disobey them. The present manners of the nation would deride authority, and therefore nothing is left, but that every writer should criticise himself." This surely is not conclusive. It is by the standard of the best writers that every man settles for himself his plan of legitimate composition; and since the authority of superior genius is acknowledged, that authority, which the individual obtains, would not be lessened by an association with others of distinguished ability. It may, therefore, be inferred, that an Academy of Literature would be an establishment highly useful, and an honour to Literature. In such an institution profitable places would not be wanted. *Vatis avarus haud facile est animus*; and the minister, who shall find leisure from party and faction to carry such a scheme into execution, will, in all probability, be respected by posterity as the Mæcenas of letters.

We now take leave of Dr. Johnson as an author. Four volumes of his *Lives of the Poets* were published in 1778, and the work was completed in 1781. Should Biography fall again into disuse, there will not always be a Johnson to look back through a century, and give a body of critical and moral instruction. In April 1781, he lost his friend Mr. Thrale. His own words, in his diary, will best tell that melancholy event. "On Wednesday the 11th of April, was buried my dear friend Mr. Thrale, who died on Wednesday the 4th, and with him were buried many of my hopes and pleasures. About five, I think, on Wednesday morning he expired. I felt almost the last flutter of his pulse, and looked for the last time upon the face, that,

for fifteen years before, had never been turned upon me but with respect and benignity. Farewell! may God, that delighteth in mercy, have had mercy on thee! I had constantly prayed for him before his death. The decease of him, from whose friendship I had obtained many opportunities of amusement, and to whom I turned my thoughts as to a refuge from misfortunes, has left me heavy. But my business is with myself." From the close of his last work, the malady that persecuted him through life came upon him with alarming severity, and his constitution declined apace. In 1782 his old friend *Leret* expired without warning, and without a groan. Events like these reminded Johnson of his own mortality. He continued his visits to Mrs. Thrale at Stratham, to the 7th day of October 1782, when having first composed a prayer for the happiness of a family with whom he had for many years enjoyed the pleasures and comforts of life, he removed to his own house in town. He says he was up early in the morning, and read fortuitously in the Gospel, *which was his parting use of the library*. The merit of the family is manifested by the sense he had of it, and we see his heart overflowing with gratitude. He leaves the place with regret, and casts a lingering look behind.

The few remaining occurrences may be soon despatched. In the month of June, 1783, Johnson had a paralytic stroke, which affected his speech only. He wrote to Dr. Taylor of Westminster; and to his friend Mr. Allen, the printer, who lived at the next door. Dr. Brocklesby arrived in a short time, and by his care, and that of Dr. Heberden, Johnson soon recovered. During his illness the writer of this narrative visited him, and found him reading Dr. Watson's Chemistry. Articulating with difficulty, he said "From this book he who knows nothing may learn a great deal; and he who knows, will be pleased to find his knowledge recalled to his mind in a manner highly pleasing." In the month of August he set out for Litchfield, on a visit to Mrs. Lucy Porter, the daughter of his wife by her first husband; and in his way back paid his respects to Dr. Adams at Oxford. Mrs. Williams died at his house in Bolt Court, in the month of September, during his absence. This was another shock to a mind like his, ever agitated by the thoughts of futurity. The contemplation of his own approaching end was constantly before his eyes; and the prospect of death, he declared, was terrible. For many years, when he was not disposed to enter into the conversation going forward, whoever sat near his chair, might hear him repeating from Shakespeare,

Ay, but to die, and go we know not where;  
To lie in cold obstruction and to rot;  
This sensible warm motion to become

A knocaded clod, and the delighted spirit  
To bathe in fiery floods——

And from Milton,

Who would lose,  
For fear of pain, this intellectual being?

By the death of Mrs. Williams he was left in a state of destitution, with nobody but Frank, his black servant, to soothe his anxious moments. In November 1783, he was swelled from head to foot with a dropsy. Dr. Brocklesby, with that benevolence with which he always assists his friends, paid his visits with assiduity. The medicines prescribed were so efficacious, that in a few days Johnson, while he was offering up his prayers, was suddenly obliged to rise, and, in the course of the day, discharged twenty pints of water.

Johnson, being eased of his dropsy, began to entertain hopes that the vigour of his constitution was not entirely broken. For the sake of conversing with his friends, he established a conversation club, to meet on every Wednesday evening; and to serve a man whom he had known in Mr. Thrale's household for many years, the place was fixed at his house in Essex-street, near the Temple. To answer the malignant remarks of Sir John Hawkins on this subject, were a wretched waste of time. Professing to be Johnson's friend, that biographer has raised more objections to his character, than all the enemies to that excellent man. Sir John had a root of bitterness that *put rancours in the vessel of his peace*. Fielding, he says, was the inventor of a cant phrase, *Goodness of heart, which means little more than the virtue of a horse or a dog*. He should have known that kind affections are the essence of virtue: they are the will of God implanted in our nature, to aid and strengthen moral obligation; they incite to action; a sense of benevolence is no less necessary than a sense of duty. Good affections are an ornament not only to an author, but to his writings. He who shows himself upon a cold scent for opportunities to bark and snarl throughout a volume of six hundred pages, may, if he will, pretend to moralize; but Goodness of Heart, or, to use that politer phrase, the *virtue of a horse or a dog*, would redound more to his honour. But Sir John is no more: our business is with Johnson. The members of his club were respectable for their rank, their talents, and their literature. They attended with punctuality till about Midsummer 1784, when, with some appearance of health Johnson went into Derbyshire, and thence to Litchfield. While he was in that part of the world, his friends in town were labouring for his benefit. The air of a more southern climate they thought might prolong a valuable life. But a pension of £300 a-year was a slender fund for a travel-

ling valetudinarian, and it was not then known that he had saved a moderate sum of money. Mr. Boswell and Sir Joshua Reynolds undertook to solicit the patronage of the Chancellor. With Lord Thurlow, while he was at the bar, Johnson was well acquainted. He was often heard to say, "Thurlow is a man of such vigour of mind, that I never knew I was to meet him, but—I was going to say, I was afraid, but that would not be true, for I never was afraid of any man; but I never knew that I was to meet Thurlow, but I knew I had something to encounter." The Chancellor undertook to recommend Johnson's case; but without success. To protract if possible the days of a man whom he respected, he offered to advance the sum of five hundred pounds. Being informed of this at Litchfield, Johnson wrote the following letter:

"My Lord,

"After a long and not inattentive observation of mankind, the generosity of your Lordship's offer raises in me not less wonder than gratitude. Bounty, so liberally bestowed, I should gladly receive if my condition made it necessary; for to such a mind who would not be proud to own his obligations? But it has pleased God to restore me to so great a measure of health, that, if I should now appropriate so much of a fortune destined to do good, I could not escape from myself the charge of advancing a false claim. My journey to the continent, though I once thought it necessary, was never much encouraged by my physicians: and I was very desirous that your Lordship should be told it by Sir Joshua Reynolds as an event very uncertain; for if I grew much better, I should not be willing; if much worse, I should not be able to migrate. Your Lordship was first solicited without my knowledge; but when I was told that you were pleased to honour me with your patronage, I did not expect to hear of a refusal; yet, as I have had no long time to brood hopes, and have not rioted in imaginary opulence, this cold reception has been scarce a disappointment; and from your Lordship's kindness I have received a benefit which only men like you are able to bestow. I shall now live *in illucentia*, with a higher opinion of my own merit.

I am, my Lord,

Your Lordship's most obliged,  
most grateful, and most humble servant,

SAMUEL JOHNSON.

"Sept. 1784."

We have in this instance the exertion of two congenial minds: one, with a generous impulse relieving merit in distress; and the other, by gratitude and dignity of sentiment, rising to an equal elevation.

It seems, however, that greatness of mind is not confined to greatness of rank. Dr. Brock-

lesby was not content to assist with his medical art; he resolved to *minister to his patient's mind*, and *pluck from his memory the sorrow* which the late refusal from a high quarter might occasion. To enable him to visit the south of France in pursuit of health, he offered from his own funds an annuity of one hundred pounds, payable quarterly. This was a *sweet oblivious antidote*, but it was not accepted for the reasons assigned to the Chancellor. The proposal, however, will do honour to Dr. Brocklesby, as long as liberal sentiment shall be ranked among the social virtues.

In the month of October, 1784, we find Dr. Johnson corresponding with Mr. Nichols, the intelligent compiler of the *Gentleman's Magazine*, and, in the languor of sickness, still desirous to contribute all in his power to the advancement of science and useful knowledge. He says, in a letter to that gentleman, dated Litchfield, October 20, that he should be glad to give so skilful a lover of antiquities any information. He adds, "At Ashburne, where I had very little company, I had the luck to borrow Mr. Bowyer's *Life*, a book so full of contemporary history, that a literary man must find some of his old friends. I thought that I could now and then have told you some hints worth your notice: We perhaps may talk a life over. I hope we shall be much together. You must now be to me what you were before, and what dear Mr. Allen was besides. He was taken unexpectedly away, but I think he was a very good man. I have made very little progress in recovery. I am very weak, and very sleepless; but I live on and hope."

In that languid condition he arrived, on the 16th of November, at his house in Bolt Court, there to end his days. He laboured with the dropsy and an asthma. He was attended by Dr. Heberden, Dr. Warren, Dr. Brocklesby, Dr. Butter, and Mr. Cruikshank, the eminent surgeon. Eternity presented to his mind an awful prospect, and, with as much virtue as perhaps ever is the lot of man, he shuddered at the thought of his dissolution. His friends awakened the comfortable reflection of a well-spent life; and, as his end drew near, they had the satisfaction of seeing him composed, and even cheerful, insomuch that he was able, in the course of his restless nights, to make translations of Greek epigrams from the *Anthologia*; and to compose a Latin epitaph for his father, his mother, and his brother Nathaniel. He meditated, at the same time, a Latin inscription to the memory of Garrick; but his vigour was exhausted.

His love of literature was a passion that stuck to his last sand. Seven days before his death he wrote the following letter to his friend Mr. Nichols:

"Sir,

"The late learned Mr. Swinton, of Oxford,

having one day remarked that one man, meaning, I suppose, no man but himself, could assign all the parts of the *Ancient Universal History* to their proper authors, at the request of Sir Robert Chambers, or myself, gave the account which I now transmit to you in his own hand, being willing that of so great a work the history should be known, and that each writer should receive his due proportion of praise from posterity.

"I recommend to you to preserve this scrap of literary intelligence in Mr. Swinton's own hand, or to deposit it in the Museum,\* that the veracity of this account may never be doubted.

"I am, Sir,

"Your most humble servant,

"SAM. JOHNSON."

Dec. 6, 1784."

Mr. Swinton.

The Cosmogony, and a small part of the history immediately following. By M. Sale.

To the Birth of Abraham. Chiefly by Mr. Shelvock.

History of the Jews, Gauls, and Spaniards. By Mr. Psalmanazar.

Xenophon's Retreat. By the same.

History of the Persians, and the Constantinopolitan Empire. By Dr. Campbell.

History of the Romans. By Mr. Bower.†

On the morning of Dec. 7, Dr. Johnson requested to see Mr. Nichols. A few days before, he had borrowed some of the early volumes of the *Magazine*, with a professed intention to point out the pieces which he had written in that collection. The books lay on the table, with many leaves doubled down, and in particular those which contained his share in the *Parliamentary Debates*. Such was the goodness of Johnson's heart, that he then declared, that "those debates were the only parts of his writings which gave him any compunction: but that at the time he wrote them he had no

\* It is there deposited. J. N.

† Before this authentic communication, Mr. Nichols had given, in the volume of the *Gentleman's Magazine* for 1781, p. 370, the following account of the *Universal History*. The proposals were published October 6, 1729; and the authors of the first seven volumes were,

Vol. I. Mr. Sale, translator of the *Koran*. — II. George Psalmanazar. — III. George Psalmanazar, Archibald Bower, Captain Shelvock, Dr. Campbell. — IV. The same as vol. III. — V. Mr. Bower. — VI. Mr. Bower, Rev. John Swinton. — VII. Mr. Swinton, Mr. Bower.

conception that he was imposing upon the world, though they were frequently written from very slender materials, and often from none at all, the mere coinage of his own imagination." He added, "that he never wrote any part of his work with equal velocity. Three columns of the Magazine in an hour," he said, "was no uncommon effort; which was faster than most persons could have transcribed that quantity. In one day in particular, and that not a very long one, he wrote twelve pages, more in quantity than ever he wrote at any other time, except in the *Life of Savage*, of which forty-eight pages in octavo were the production of one long day, including a part of the night."

In the course of the conversation he asked, whether any of the family of Faden the printer, were living. Being told that the geographer near Charing-Cross was Faden's son, he said, after a short pause, "I borrowed a guinea of his father near thirty years ago; be so good as to take this, and pay it for me."

Wishing to discharge every duty, and every obligation, Johnson recollected another debt of ten pounds, which he had borrowed from his friend Mr. Hamilton the printer, about twenty years before. He sent the money to Mr. Hamilton, at his house in Bedford-Row, with an apology for the length of time. The Reverend Mr. Strahan was the bearer of the message, about four or five days before Johnson breathed his last.

Mr. Sastres (whom Dr. Johnson esteemed and mentioned in his will) entered the room during his illness. Dr. Johnson, as soon as he saw him, stretched forth his hand, and, in a tone of lamentation, called out, *JAM MORITURUS*! But the love of life was still an active principle. Feeling himself swelled with the dropsy, he conceived that by incisions in his legs, the water might be discharged. Mr. Cruikshank apprehended that a mortification might be the consequence; but, to appease a distempered fancy, he gently lanced the surface. Johnson cried out, "Deeper, deeper! I want length of life, and you are afraid of giving me pain, which I do not value."

On the 8th of December, the Reverend Mr. Strahan drew his will, by which, after a few legacies, the residue, amounting to about fifteen hundred pounds, was bequeathed to Frank, the black servant, formerly consigned to the testator by his friend Dr. Bathurst.

The history of a death-bed is painful. Mr. Strahan informs us, that the strength of religion prevailed against the infirmity of nature; and his foreboding dread of the Divine Justice subsided into a pious trust and humble hope of mercy at the Throne of Grace. On Monday the 13th day of December (the last of his existence on this side the grave), the desire of life returned with all its former vehemence. He

still imagined, that, by puncturing his legs relief might be obtained. At eight in the morning he tried the experiment, but no water followed. In an hour or two after he fell into a doze, and about seven in the evening expired without a groan.

On the 20th of the month his remains, with due solemnities, and a numerous attendance of his friends, were buried in Westminster Abbey, near the foot of Shakspeare's monument, and close to the grave of the late Mr. Garrick. The funeral service was read by his friend Dr. Taylor.

A black marble over his grave has the following inscription:

SAMUEL JOHNSON, L.L.D.  
obit XIII die Decembris,  
Anno Domini  
MDCCCLXXXIV.  
Ætatis sue LXXV.

If we now look back, as from an eminence, to view the scenes of life, and the literary labours in which Dr. Johnson was engaged, we may be able to delineate the features of the man, and to form an estimate of his genius.

As a man, Dr. Johnson stands displayed in open daylight. Nothing remains undiscovered. Whatever he said is known; and without allowing him the usual privilege of hazarding sentiments, and advancing positions, for mere amusement, or the pleasure of discussion, Criticism has endeavoured to make him answerable for what, perhaps, he never seriously thought. His diary, which has been printed, discovers still more. We have before us the very heart of the man, with all his inward consciousness. And yet neither in the open paths of life, nor in his secret recesses, has any one vice been discovered. We see him reviewing every year of his life, and severely censuring himself for not keeping resolutions, which morbid melancholy, and other bodily infirmities, rendered impracticable. We see him for every little defect imposing on himself voluntary penance, going through the day with only one cup of tea without milk, and to the last, amidst paroxysms and remissions of illness, forming plans of study and resolutions to amend his life.\* Many of his scruples may be called weaknesses; but they are the weaknesses of a good, a pious and most excellent man.

His person, it is well-known, was large and unwieldy. His nerves were affected by that disorder, for which, at two years of age, he was presented to the royal touch. His head shook, and involuntary motions made it uncertain that his legs and arms would, even at a tea-table, remain in their proper place. A person of Lord Chesterfield's delicacy might in his company be in a fever. He would sometimes of his own

\* On the subject of voluntary penance, see the Rambler, No. CX.

accord do things inconsistent with the established modes of behaviour. Sitting at table with the celebrated Mrs. Cholmondeley, who exerted herself to circulate the subscription for Shakspeare, he took hold of her hand in the middle of dinner, and held it close to his eye, wondering at the delicacy and whiteness, till with a smile she asked, "Will he give it to me again when he has done with it?" The exteriors of politeness did not belong to Johnson. Even that civility which proceeds, or ought to proceed, from the mind, was sometimes violated. His morbid melancholy had an effect on his temper; his passions were irritable, and the pride of science, as well as of a fierce, independent spirit, inflamed him on some occasions above all bounds of moderation. Though not in the shade of academic bowers, he led a scholastic life; and the habit of pronouncing decisions to his friends and visitors gave him a dictatorial manner, which was much enforced by a voice naturally loud, and often overstrained. Metaphysical discussion, moral theory, systems of religion, and anecdotes of literature, were his favourite topics. General history had little of his regard. Biography was his delight. *The proper study of mankind is man.* Sooner than hear of the Punic war, he would be rude to the person that introduced the subject.

Johnson was born a logician; one of those, to whom only books of logic are said to be of use. In consequence of his skill in that art, he loved argumentation. No man thought more profoundly, nor with such acute discernment. A fallacy could not stand before him; it was sure to be refuted by strength of reasoning, and a precision both in idea and expression almost unequalled. When he chose by apt illustration to place the argument of his adversary in a ludicrous light, one was almost inclined to think *ridicule the test of truth*. He was surprised to be told, but it is certainly true, that, with great powers of mind, wit and humour were his shining talents. That he often argued for the sake of triumph over his adversary, cannot be dissembled. Dr. Rose, of Chiswick, has been heard to tell of a friend of his, who thanked him for introducing him to Dr. Johnson, as he had been convinced, in the course of a long dispute, that an opinion, which he had embraced as a settled truth, was no better than a vulgar error. This being reported to Johnson, "Nay," said he, "do not let him be thankful, for he was right, and I was wrong." Like his uncle Andrew, in the ring at Smithfield, Johnson, in a circle of disputants, was determined *neither to be thrown nor conquered*. Notwithstanding all his piety, self-government, or the command of his passions in conversation, does not seem to have been among his attainments. Whenever he thought the contention was for superiority, he has been known to break out with violence, and even ferocity. When the fray was over, he

generally softened into repentance, and, by conciliating measures, took care that no animosity should be left rankling in the breast of his antagonist. Of this defect he seems to have been conscious. In a letter to Mrs. Thrale, he says, "Poor Baretti! do not quarrel with him; to neglect him a little will be sufficient. He means only to be frank and manly, and independent, and perhaps, as you say a little wise. To be frank, he thinks, is to be cynical; and to be independent, is to be rude. Forgive him, dearest lady, the rather, because of his misbehaviour I am afraid he learned part of me. I hope to set him hereafter a better example." For his own intolerant and overbearing spirit he apologized by observing, that it had done some good; obscenity and impiety were repressed in his company.

It was late in life before he had the habit of mixing, otherwise than occasionally, with polite company. At Mr. Thrale's, he saw a constant succession of well-accomplished visitors. In that society he began to wear off the rugged points of his own character. He saw the advantages of mutual civility, and endeavoured to profit by the models before him. He aimed at what has been called by Swift the *lesser morals*, and by Cicero *minores virtutes*. His endeavour, though new and late, gave pleasure to all his acquaintance. Men were glad to see that he was willing to be communicative on equal terms and reciprocal complaisance. The time was then expected when he was to cease being what George Garrick, brother to the celebrated actor, called him the first time he heard him converse, "A TREMENDOUS COMPANION." He certainly wished to be polite, and even thought himself so; but his civility still retained something uncouth and harsh. His manners took a milder tone, but the endeavour was too palpably seen. He laboured even in trifles. He was a giant gaining a purchase to lift a feather.

It is observed by the younger Pliny, that in the confines of virtue and great qualities there are generally vices of an opposite nature. In Dr. Johnson not one ingredient can take the name of vice. From his attainments in literature grew the pride of knowledge; and from his powers of reasoning, the love of disputation and the vain-glory of superior vigour. His piety, in some instances, bordered on superstition. He was willing to believe in preternatural agency, and thought it not more strange that there should be evil spirits than evil men. Even the question about second sight held him in suspense. "Second sight," Mr. Pennant tells us, "is a power of seeing images impressed on the organs of sight by the power of fancy, or on the fancy by the disordered spirits operating on the mind. It is the faculty of seeing spectres or visions, which represent an event actually passing at a distance, or likely to happen at a future day. In 1771, a gentleman, the last who was supposed to be possessed of this faculty, had a

boat at sea in a tempestuous night, and, being anxious for his freight, suddenly started up, and said his men would be drowned, for he had seen them pass before him with wet garments and dripping locks. The event corresponded with his disordered fancy. And thus," continues Mr. Pennant, "a distempered imagination, clouded with anxiety, may make an impression on the spirits; as persons, restless and troubled with indignation, see various forms and figures while they lie awake in bed." This is what Dr. Johnson was not willing to reject. He wished for some positive proof of communications with another world. His benevolence embraced the whole race of man, and yet was tinged with particular prejudices. He was pleased with the minister in the Isle of Sky, and loved him so much that he began to wish him not a Presbyterian. To that body of Dissenters his zeal for the Established Church made him in some degree an adversary; and his attachment to a mixed and limited Monarchy led him to declare open war against what he called a sullen Republican. He would rather praise a man of Oxford than of Cambridge. He disliked a Whig, and loved a Tory. These were the shades of his character, which it has been the business of certain party-writers to represent in the darkest colours.

Since virtue, or moral goodness, consists in a just conformity of our actions to the relations in which we stand to the Supreme Being and to our fellow-creatures, where shall we find a man who has been, or endeavoured to be, more diligent in the discharge of those essential duties? His first prayer was composed in 1738; he continued those fervent ejaculations of piety to the end of his life. In his Meditations we see him scrutinizing himself with severity, and aiming at perfection unattainable by man. His duty to his neighbour consisted in universal benevolence, and a constant aim at the production of happiness. Who was more sincere and steady in his friendships? It has been said that there was no real affection between him and Garrick. On the part of the latter, there might be some corrosions of jealousy. The character of Phosreno, in the Rambler, No. 200, was, beyond all question, occasioned by Garrick's ostentatious display of furniture and Dresden china. It was surely fair to take from this incident a hint for a moral essay; and, though no more was intended, Garrick, we are told, remembered it with uneasiness. He was also hurt that his Litchfield friend did not think so highly of his dramatic art as the rest of the world. The fact was, Johnson could not see the passions as they rose and chased one another in the varied features of that expressive face; and by his own manner of reciting verses, which was wonderfully impressive, he plainly showed that he thought there was too much of artificial tone and measured cadence in the declamation of the

theatre. The present writer well remembers being in conversation with Dr. Johnson near the side of the scenes during the tragedy of King Lear: when Garrick came off the stage, he said, "You two talk so loud you destroy all my feelings." "Prithee," replied Johnson, "do not talk of feelings, Punch has no feelings." This seems to have been his settled opinion; admirable as Garrick's imitation of nature always was, Johnson thought it no better than mere mimicry. Yet it is certain that he esteemed and loved Garrick; that he dwelt with pleasure on his praise; and used to declare, that he deserved his great success, because on all applications for charity he gave more than was asked. After Garrick's death he never talked of him without a tear in his eye. He offered, if Mrs. Garrick would desire it of him, to be the editor of his works and the historian of his life.\* It has been mentioned, that on his death-bed he thought of writing a Latin inscription to the memory of his friend. Numbers are still living who know these facts, and still remember with gratitude the friendship which he showed to them with unaltered affection for a number of years. His humanity and generosity, in proportion to his slender income, were unbounded. It has been truly said, that the lame, the blind, and the sorrowful, found in his house a sure retreat. A strict adherence to truth he considered as a sacred obligation, inasmuch that, in relating the most minute anecdote, he would not allow himself the smallest addition to embellish his story. The late Mr. Tyers, who knew Dr. Johnson intimately, observed, "that he always talked as if he was talking upon oath."

After a long acquaintance with this excellent man, and an attentive retrospect to his whole conduct, such is the light in which he appears to the writer of this essay. The following lines of Horace may be deemed his picture in miniature.

*Irascunlior est paulo, minus cytharus amicus  
Naribus horum hominum, ridere pariter, et quod  
Rusticius tonso toga defuit, et male locus  
In pede calcens haret; at est bonus, et melior omni  
Non alius quisquam: at ille amicus, et ingratum imperat,  
Inculto latet hoc sub corpore.*

"Your friend is passionate, perhaps unfit  
For the brisk petulance of modern wit.  
His hair ill-cut, his robe that awkward fit on,  
Or his large shoes, to railery expose  
The man you love; yet is he not proud  
Of virtues, with which very few are blessed  
While underneath this rude, uncouth disguise,  
A genius of extensive knowledge lies."

FRANCIS HOD. Book I. Sat. II.

\* It is to be regretted that he was not encouraged in this undertaking. The assistance, however, which he gave to Davies, in writing the Life of Garrick, has been acknowledged in general terms by that writer, and, from the evidence of style, appears to have been very considerable. C.

It remains to give a review of Johnson's works; and this, it is imagined, will not be unwelcome to the reader.

Like Milton and Addison, he seems to have been fond of his Latin poetry. These compositions show that he was an early scholar; but his verses have not the graceful ease that gave so much suavity to the poems of Addison. The translation of the Messiah labours under two disadvantages; it is first to be compared with Pope's inimitable performance, and afterwards with the *Pollio* of Virgil. It may appear trifling to remark, that he has made the letter *o*, in the word *Virgo*, long and short in the same line; *Virgo*, *Virgo* parit. But the translation has great merit, and some admirable lines. In the odes there is a sweet flexibility, particularly, To his worthy friend Dr. Laurence; on himself at the theatre, March 8, 1771; the Ode in the Isle of Sky; and that to Mrs. Thrale from the same place.

His English poetry is such as leaves room to think, if he had devoted himself to the Muses, that he would have been the rival of Pope. His first production in this kind was London, a poem in imitation of the third satire of Juvenal. The vices of the metropolis are placed in the room of ancient manners. The author had heated his mind with the ardour of Juvenal, and, having the skill to polish his numbers, he became a sharp accuser of the times. The *Vanity of Human Wishes* is an imitation of the tenth Satire of the same author. Though it is translated by Dryden, Johnson's imitation approaches nearest to the spirit of the original. The subject is taken from the *Alcibiades* of Plato, and has an intermixture of the sentiments of Socrates concerning the object of prayers offered up to the Deity. The general proposition is, that good and evil are so little understood by mankind, that their wishes when granted are always destructive. This is exemplified in a variety of instances, such as riches, state preferment, eloquence, military glory, long life, and the advantages of form and beauty. Juvenal's conclusion is worthy of a Christian poet, and such a pen as Johnson's. "Let us," he says, "leave it to the Gods to judge what is fittest for us. Man is dearer to his Creator than to himself. If we must pray for special favour, let it be for a sound mind in a sound body. Let us pray for fortitude, that we may think the labours of Hercules and all his sufferings preferable to a life of luxury and the soft repose of Sardanapalus. This is a blessing within the reach of every man; this we can give ourselves. It is virtue, and virtue only, that can make us happy." In the translation the zeal of the Christian conspired with the warmth and energy of the poet; but Juvenal is not eclipsed.—For the various characters in the original, the reader is pleased, in the English poem, to meet with Cardinal Wolsey, Bucking-

ham stabbed by Felton, Lord Strafford, Clarendon, Charles XII. of Sweden; and for Tully and Demosthenes, Lydiat, Galileo, and Archbishop Laud. It is owing to Johnson's delight in biography that the name of Lydiat is called forth from obscurity. It may, therefore, not be useless to tell, that Lydiat was a learned divine and mathematician in the beginning of the last century. He attacked the doctrine of Aristotle and Scaliger, and wrote a number of sermons on the harmony of the Evangelists. With all his merit, he lay in the prison of *Bocardo* at Oxford, till Bishop Usher, Laud, and others, paid his debts. He petitioned Charles I. to be sent to Ethiopia to procure manuscripts. Having spoken in favour of monarchy and bishops, he was plundered by the Puritans, and twice carried away a prisoner from his rectory. He died very poor in 1646.

The tragedy of Irene is founded on a passage in Knolles' History of the Turks; an author highly commended in the Rambler, No. 122. An incident in the Life of Mahomet the Great, first emperor of the Turks, is the hinge on which the fable is made to move. The substance of the story is shortly this. In 1453 Mahomet laid siege to Constantinople, and having reduced the place, became enamoured of a fair Greek, whose name was Irene. The sultan invited her to embrace the law of the Prophet, and to grace his throne. Enraged at this intended marriage, the Janizaries formed a conspiracy to dethrone the Emperor. To avert the impending danger, Mahomet, in a full assembly of the grandees, "catching with one hand," as Knolles relates it, "the fair Greek by the hair of her head, and drawing his falchion with the other, he, at one blow, struck off her head, to the great terror of them all; and, having so done, said unto them, Now, by this, judge whether your emperor is able to bridle his affections or not." The story is simple, and it remained for the author to amplify it with proper episodes, and give it complication and variety. The catastrophe is changed, and horror gives place to terror and pity. But, after all, the fable is cold and languid. There is not, throughout the piece, a single situation to excite curiosity, and raise a conflict of passions. The diction is nervous, rich, and elegant; but splendid language, and melodious numbers, will make a fine poem, not a tragedy. The sentiments are beautiful, always happily expressed, but seldom appropriated to the character, and generally too philosophic. What Johnson has said of the tragedy of Cato may be applied to Irene: "It is rather a poem in dialogue than a drama; rather a succession of just sentiments in elegant language, than a representation of natural affections. Nothing excites or assuages emotion. The events are expected without solicitude, and are remembered without joy or sorrow. Of the agents we have no care; we con-

sider not what they are doing, nor what they are suffering; we wish only to know what they have to say. It is unassuming elegance, and chill philosophy." The following speech, in the mouth of a Turk, who is supposed to have heard of the British constitution, has been often selected from the numberless beauties with which Irene abounds:

"If there be any land, as fame reports,  
Where common laws restrain the prince and subject;  
A happy land, where circulating power  
Flows through each member of the embodied state;  
Sure, not unconscious of the mighty blessing,  
Her grateful sons shine bright with every virtue;  
Untainted with the Lust of Innovation;  
Sure all unite to hold her league of rule,  
Unbroken as the sacred chain of nature,  
That links the jarring elements in peace."

These are British sentiments. Above forty years ago they found an echo in the breast of applauding audiences; and to this hour they are the voice of the people, in defiance of the *metaphysics* and the *new lights* of certain politicians, who would gladly find their private advantage in the disasters of their country; a race of men, *quibus nulla ex honesto spes*.

The prologue to Irene is written with elegance, and, in a peculiar style, shows the literary pride and lofty spirit of the author. The epilogue, we are told in a late publication, was written by Sir William Young. This is a new discovery, but by no means probable. When the appendages to a dramatic performance are not assigned to a friend, or an unknown hand, or a person of fashion, they are always supposed to be written by the author of the play. It is to be wished, however, that the epilogue in question could be transferred to any other writer. It is the worst *jeu d'esprit* that ever fell from Johnson's pen.\*

An account of the various pieces contained in this edition, such as miscellaneous tracts, and philological dissertations, would lead beyond the intended limits of this essay. It will suffice to say, that they are the productions of a man who never wanted decorations of language, and always taught his readers to think. The life of the late king of Prussia, as far as it extends, is a model of the biographical style. The Review of the Origin of Evil was, perhaps, written with asperity; but the angry epitaph which it provoked from Soame Jenyns, was an ill-timed resentment, unworthy of the genius of that amiable author.

The Rambler may be considered as Johnson's great work. It was the basis of that high repu-

tation which went on increasing to the end of his days. The circulation of those periodical essays was not, at first, equal to their merit. They had not, like the Spectators, the art of charming by variety; and indeed how could it be expected? The wits of Queen Anne's reign sent their contributions to the Spectator; and Johnson stood alone. "A stage-coach," says Sir Richard Steele, "must go forward on stated days, whether there are passengers or not." So it was with the Rambler, every Tuesday and Saturday, for two years. In this collection Johnson is the great moral teacher of his countrymen; his essays form a body of ethics; the observations on life and manners are acute and instructive; and the papers, professedly critical, serve to promote the cause of literature. It must, however, be acknowledged, that a settled gloom hangs over the author's mind; and all the essays, except eight or ten, coming from the same fountain-head, no wonder that they have the raciness of the soil from which they sprang. Of this uniformity Johnson was sensible. He used to say, that if he had joined a friend or two, who would have been able to intermix papers of a sprightly turn, the collection would have been more miscellaneous, and by consequence more agreeable to the generality of readers. This he used to illustrate by repeating two beautiful stanzas from his own Ode to Cæsar, or *Sylvanus Urban*;

Non ulla Musis pagina gratior,  
Quam quæ severis luctibus æquare  
Novit, fatigantibus hæc  
Utilibus recreare mentem.

Textente nymphis sæta Lycæi  
Rosa: ruborem sic vicia adjungit  
Inmixta, sic Iris refusa  
Æthereis variat, nuda

It is remarkable, that the pomp of diction, which has been objected to Johnson, was first assumed in the Rambler. His Dictionary was going on at the same time, and, in the course of that work, as he grew familiar with technical and scholastic words, he thought that the bulk of his readers were equally learned; or at least would admire the splendour and dignity of the style. And yet it is well known that he praised in Cowley the easy and unaffected structure of the sentences. Cowley may be placed at the head of those who cultivated a clear and natural style. Dryden, Tillotson, and Sir William Temple, followed. Addison, Swift, and Pope, with more correctness, carried our language well nigh to perfection. Of Addison, Johnson was used to say, *He is the Bryant of English Writers*. How he differed so widely from such elegant models is a problem not to be solved, unless it be true that he took an early tincture from the writers of the last century, particularly Sir Thomas Browne. Hence the peculiarities of his style, new combinations, sentences of an

\* Dr. Johnson informed Mr. Boswell that this Epilogue was written by Sir William Young. See Boswell's Life of Johnson, vol. i. p. 168-70. 8vo. edit. 1804. The internal evidence that it is not Johnson's is very strong, particularly in the line, "Ere, how the devil," &c.

unusual structure, and words derived from the learned languages. His own account of the matter is, "When common words were less pleasing to the ear, or less distinct in their signification, I familiarized the terms of philosophy, by applying them to popular ideas." But he forgot the observation of Dryden: *If too many foreign words are poured in upon us, it looks as if they were designed, not to assist the natives, but to conquer them.* There is, it must be admitted, a swell of language, often out of all proportion to the sentiment; but there is, in general, a fulness of mind, and the thought seems to expand with the sound of the words. Determined to discard colloquial barbarisms and licentious idioms, he forgot the elegant simplicity that distinguishes the writings of Addison. He had what Locke calls a round-about view of his subject; and though he was never tainted, like many modern wits, with the ambition of shining in paradox, he may be fairly called an ORIGINAL THINKER. His reading was extensive. He treasured in his mind whatever was worthy of notice, but he added to it from his own meditation. He collected, *quæ reconderet, aulaque promeret.* Addison was not so profound a thinker. He was born to write, converse, and live with ease; and he found an early patron in Lord Somers. He depended, however, more upon a fine taste than the vigour of his mind. His Latin poetry shows, that he relished, with a just selection, all the refined and delicate beauties of the Roman classics; and when he cultivated his native language, no wonder that he formed that graceful style, which has been so justly admired; simple, yet elegant; adorned, yet never over-wrought; rich in allusion, yet pure and perspicuous; correct, without labour; and though sometimes deficient in strength, yet always musical. His essays, in general, are on the surface of life; if ever original, it was in pieces of humour. Sir Roger de Coverly, and the Tory Fox-hunter, need not to be mentioned. Johnson had a fund of humour, but he did not know it: nor was he willing to descend to the familiar idiom and the variety of diction which that mode of composition required. The letter, in the Rambler, No. 12, from a young girl that wants a place, will illustrate this observation. Addison possessed an unclouded imagination, alive to the first objects of nature and of art. He reaches the sublime without any apparent effort. When he tells us, "If we consider the fixed stars as so many oceans of flame, that are each of them attended with a different set of planets; if we still discover new firmaments and new lights that are sunk further in those unfathomable depths of æther, we are lost in a labyrinth of suns and worlds, and confounded with the magnificence and immensity of nature;" the ease with which this passage rises to unaffected grandeur, is the secret charm that captivates the reader. Johnson is always lofty; he seems, to use Dryden's

phrase, to be o'er-inform'd with meaning, and his words do not appear to himself adequate to his conception. He moves in state, and his periods are always harmonious. His Oriental Tales are in the true style of Eastern magnificence, and yet none of them are so much admired as the Visions of Mirza. In matters of criticism, Johnson is never the echo of preceding writers. He thinks and decides for himself. If we except the Essays on the Pleasures of Imagination, Addison cannot be called a philosophical critic. His moral Essays are beautiful: but in that province nothing can exceed the Rambler, though Johnson used to say, that the Essay on *The burthens of mankind* (in the Spectator, No. 558) was the most exquisite he had ever read. Talking of himself, Johnson said, "Topham Beauclerk has wit, and every thing comes from him with ease; but when I say a good thing I seem to labour." When we compare him with Addison, the contrast is still stronger. Addison lends grace and ornament to truth: Johnson gives it force and energy. Addison makes virtue amiable; Johnson represents it as an awful duty. Addison insinuates himself with an air of modesty; Johnson commands like a dictator; but a dictator in his splendid robes, not labouring at the plough. Addison is the Jupiter of Virgil, with placid serenity talking to Venus:

"Vultu, quo cælum tempestatesque serenat."

Johnson is Jupiter tonans: he darts his lightning, and rolls his thunder, in the cause of virtue and piety. The language seems to fall short of ideas; he pours along, familiarizing the terms of philosophy, with bold inversions, and sonorous periods; but we may apply to him what Pope has said of Homer: "It is the sentiment that swells and fills out the diction, which rises with it, and forms itself about it; like glass in the furnace, which grows to a greater magnitude, as the breath within is more powerful, and the heat more intense."

It is not the design of this comparison to decide between these two eminent writers. In matters of taste every reader will choose for himself. Johnson is always profound, and of course gives the fatigue of thinking. Addison charms while he instructs; and writing, as he always does, a pure, an elegant and idiomatic style, he may be pronounced the safest model for imitation.

The essays written by Johnson in the *Adventurer* may be called a continuation of the *Rambler*. The *Idler*, in order to be consistent with the assumed character, is written with abated vigour, in a style of ease and unlaboured elegance. It is the *Odyssey* after the *Iliad*. Intense thinking would not become the *Idler*. The first number presents a well-drawn portrait of an *Idler*, and from that character no deviation could be made. Accordingly, Johnson forgets his austere manner, and plays us into

sense. He still continues his lectures on human life, but he adverts to common occurrences, and is often content with the topic of the day. An advertisement in the beginning of the first volume informs us, that twelve entire essays were a contribution from different hands. One of these, No. 33, is the journal of a Senior Fellow at Cambridge, but as Johnson, being himself an original thinker, always revolted from servile imitation, he has printed the piece, with an apology, importing that the journal of a citizen in the *Spectator* almost precluded the attempt of any subsequent writer. This account of the *Idler* may be closed, after observing, that the author's mother being buried on the 23d of January, 1759, there is an admirable paper occasioned by that event, on Saturday the 27th of the same month, No. 41. The reader, if he pleases, may compare it with another fine paper in the *Rambler*, No. 54, on the conviction that rushes on the mind at the bed of a dying friend.

"*Rasselas*," says Sir John Hawkins, "is a specimen of our language scarcely to be paralleled; it is written in a style refined to a degree of *immaculate purity*, and displays the whole force of *turgid eloquence*." One cannot but smile at this encomium. *Rasselas* is undoubtedly both elegant and sublime. It is a view of human life, displayed, it must be owned, in gloomy colours. The author's natural melancholy, depressed, at the time, by the approaching dissolution of his mother, darkened the picture. A tale, that should keep curiosity awake by the artifice of unexpected incidents, was not the design of a mind pregnant with better things. He, who reads the heads of the chapters, will find, that it is not a course of adventures that invites him forward, but a discussion of interesting questions; *Reflections on Human Life*; the *History of Imlac*, the *Man of Learning*; a *Dissertation upon Poetry*; the *Character of a wise and happy Man*, who discourses with energy on the government of the passions, and on a sudden, when Death deprives him of his daughter, forgets all his maxims of wisdom and the eloquence that adorned them, yielding to the stroke of affliction with all the vehemence of the bitterest anguish. It is by pictures of life, and profound moral reflection, that expectation is engaged and gratified throughout the work. The *History of the Mad Astronomer*, who imagines that, for five years, he possessed the regulation of the weather, and that the sun passed from tropic to tropic by his direction, represents in striking colours the sad effect of a distempered imagination. It becomes the more affecting when we recollect that it proceeds from one who lived in fear of the same dreadful visitation; from one who says emphatically, "*Of the uncertainties in our present state, the most dreadful and alarming is the uncertain continuance of reason.*" The inquiry into the cause of

madness, and the dangerous prevalence of imagination, till in time some particular train of ideas fixes the attention, and the mind recurs constantly to the favourite conception, is carried on in a strain of acute observation; but it leaves us room to think that the author was transcribing from his own apprehensions. The discourse on the nature of the soul gives us all that philosophy knows, not without a tincture of superstition. It is remarkable that the vanity of human pursuits was, about the same time, the subject that employed both Johnson and Voltaire: but *Candide* is the work of a lively imagination; and *Rasselas*, with all its splendour of eloquence, exhibits a gloomy picture. It should, however, be remembered, that the world has known the weeping as well as the laughing philosopher.

The Dictionary does not properly fall within the province of this essay. The preface, however, will be found in this edition. He who reads the close of it, without acknowledging the force of the pathetic and sublime, must have more insensibility in his composition than usually falls to the share of a man. The work itself, though in some instances abuse has been loud, and in others malice has endeavoured to undermine its fame, still remains the *MOUNT ATLAS* of English Literature.

Though storms and tempests thunder on its brow,  
And oceans break their billows at its feet,  
It stands unmoved, and glories in its height.

That Johnson was eminently qualified for the office of a commentator on Shakspeare, no man can doubt; but it was an office which he never cordially embraced. The public expected more than he had diligence to perform; and yet his edition has been the ground on which every subsequent commentator has chosen to build. One note for its singularity, may be thought worthy of notice in this place. Hamlet says; "For if the sun breed maggots in a dead dog, being a God-kissing carrion." In this Warburton discovered the *origin of evil*. Hamlet, he says, breaks off in the middle of the sentence; but the learned commentator knows what he was going to say, and being unwilling to keep the secret, he goes on in a train of philosophical reasoning that leaves the reader in astonishment. Johnson, with true piety, adopts the fanciful hypothesis, declaring it to be a noble emanation, which almost sets the critic on a level with the author. The general observations at the end of the several plays, and the preface, will be found in this edition. The former, with great elegance and precision, give a summary view of each drama. The preface is a tract of great erudition and philosophical criticism.

Johnson's political pamphlets, whatever was his motive for writing them, whether gratitude for his pension, or the solicitation of men in

power, did not support the cause for which they were undertaken. They are written in a style truly harmonious, and with his usual dignity of language. When it is said that he advanced positions repugnant to the *common rights of mankind*, the virulence of party may be suspected. It is, perhaps, true that in the clamour raised throughout the kingdom Johnson over-heated his mind; but he was a friend to the rights of man, and he was greatly superior to the littleness of spirit that might incline him to advance what he did not think and firmly believe. In the *False Alarm*, though many of the most eminent men in the kingdom concurred in petitions to the throne, yet Johnson, having well surveyed the mass of the people, has given, with great humour and no less truth, what may be called, *the birth, parentage, and education of a remonstrance*. On the subject of Falkland's Islands, the fine dissuasive from too hastily involving the world in the calamities of war, must extort applause even from the party that wished, at that time, for the scenes of tumult and commotion. It was in the same pamphlet that Johnson offered battle to JUNIUS; a writer, who, by the uncommon elegance of his style, charmed every reader, though his object was to inflame the nation in favour of a faction. Junius fought in the dark; he saw his enemy and had his full blow; while he himself remained safe in obscurity. But let us not, said Johnson, mistake the venom of the shaft for the vigour of the bow. The keen invective which he published on that occasion, promised a paper war between two combatants, who knew the use of their weapons. A battle between them was as eagerly expected as between Mendoza and Big Ben. But Junius, whatever was his reason, never returned to the field. He laid down his arms, and has, ever since, remained as secret as the man in the mask in Voltaire's History.

The account of his journey to the Hebrides, or Western Isles of Scotland, is a model for such as shall hereafter relate their travels. The author did not visit that part of the world in the character of an Antiquary, to amuse us with wonders taken from the dark and fabulous ages; nor as a Mathematician, to measure a degree, and settle the longitude and latitude of the several islands. Those, who expected such information, expected what was never intended. In every work regard the writer's end. Johnson went to see men and manners, modes of life, and the progress of civilization. His remarks are so artfully blended with the rapidity and elegance of his narrative, that the reader is inclined to wish, as Johnson did with regard to Gray, that *to travel, and to tell his travels, had been more of his employment*.

As to Johnson's Parliamentary Debates, nothing with propriety can be said in this place. They are collected in two volumes by Mr.

Stockdale, and the flow of eloquence which runs through the several speeches is sufficiently known.

It will not be useless to mention two more volumes, which may form a proper supplement to this edition. They contain a set of Sermons left for publication by John Taylor, LL. D. The Reverend Mr. Hayes, who ushered these Discourses into the world, has not given them as the composition of Dr. Taylor. All he could say for his departed friend was, that he left them in silence among his papers. Mr. Hayes knew them to be the production of a superior mind; and the writer of these Memoirs owes it to the candour of that elegant scholar, that he is now warranted to give an additional proof of Johnson's ardour in the cause of piety, and every moral duty. The last discourse in the collection was intended to be delivered by Dr. Taylor at the funeral of Johnson's wife; but that reverend gentleman declined the office, because, as he told Mr. Hayes, the praise of the deceased was too much amplified. He, who reads the piece, will find it a beautiful moral lesson, written with temper, and no where over-charged with ambitious ornaments. The rest of the Discourses were the fund, which Dr. Taylor, from time to time, carried with him to his pulpit. He had the largest Bull \* in England, and some of the best Sermons.

We come now to the Lives of the Poets, a work undertaken at the age of seventy, yet the most brilliant, and certainly the most popular, of all our Author's writings. For this performance he needed little preparation. Attentive always to the history of letters, and by his own natural bias fond of biography, he was the more willing to embrace the proposition of the Booksellers. He was versed in the whole body of English Poetry, and his rules of criticism were settled with precision. The dissertation, in the Life of Cowley, on the metaphysical Poets of the last century, has the attraction of novelty as well as sound observation. The writers who followed Dr. Donne, went in quest of something better than truth and nature. As Sancho says in Don Quixote, they wanted better bread than is made with wheat. They took pains to bewilder themselves, and were ingenious for no other purpose than to err. In Johnson's review of Cowley's works, false wit is detected in all its shapes, and the Gothic taste for glittering conceits, and far-fetched allusions, is exploded, never, it is hoped, to revive again.

An author who has published his observations on the Life and Writings of Dr. Johnson, speaking of the Lives of the Poets, says, "These compositions, abounding in strong and acute remark, and with many fine and even sublime

\* See Johnson's Letters from Ashbourne, in this edition.

passages, have unquestionably great merit; but if they be regarded merely as containing narrations of the lives, delineations of the characters, and strictures of the several authors, they are far from being always to be depended on." He adds, "The characters are sometimes partial, and there is sometimes too much malignity of misrepresentation, to which, perhaps, may be joined no inconsiderable portion of erroneous criticism." The several clauses of this censure deserve to be answered as fully as the limits of this essay will permit.

In the first place, the facts are related upon the best intelligence, and the best vouchers that could be gleaned, after a great lapse of time. Probability was to be inferred from such materials as could be procured, and no man better understood the nature of historical evidence than Dr. Johnson; no man was more religiously an observer of truth. If his History is any where defective, it must be imputed to the want of better information, and the errors of uncertain tradition.

Ad nos vix tenuis famæ perlabitur aura.

If the strictures on the works of the various authors are not always satisfactory, and if erroneous criticism may sometimes be suspected, who can hope that in matters of taste all shall agree? The instances in which the public mind has differed from the positions advanced by the author, are few in number. It has been said, that justice has not been done to Swift; that Gay and Prior are undervalued: and that Gray has been harshly treated. This charge, perhaps, ought not to be disputed. Johnson, it is well known, had conceived a prejudice against Swift. His friends trembled for him when he was writing that life: but were pleased, at last, to see it executed with temper and moderation. As to Prior, it is probable that he gave his real opinion, but an opinion that will not be adopted by men of lively fancy. With regard to Gray, when he condemns the apostrophe, in which Father Thames is desired to tell who drives the hoop, or tosses the ball, and then adds, that Father Thames had no better means of knowing than himself; when he compares the abrupt beginning of the first stanza of the Bard to the ballad of Johnny Armstrong, "*Is there ever a man in all Scotland;*" there are, perhaps, few friends of Johnson, who would not wish to blot out both the passages. It may be questioned whether the remarks on Pope's Essay on Man can be received without great caution. It has been already mentioned, that Crousaz, a professor in Switzerland, eminent for his Treatise of Logic, started up a professed enemy to that poem. Johnson says, "his mind was one of those, in which philosophy and piety are happily united. He looked with distrust upon all metaphysical systems of theology, and was persuaded, that the positions of Pope were intended to draw mankind away from Revelation, and to repre-

sent the whole course of things as a necessary concatenation of indissoluble fatality." This is not the place for a controversy about the Leibnitzian system. Warburton, with all the powers of his large and comprehensive mind, published a Vindication of Pope; and yet Johnson says, that "in many passages a religious eye may easily discover expressions not very favourable to morals, or to liberty." This sentence is severe, and, perhaps, dogmatical. Crousaz wrote an Examen of The Essay on Man, and afterwards a Commentary on every remarkable passage; and though it now appears that Mrs. Elizabeth Carter translated the foreign Critic, yet it is certain that Johnson encouraged the work, and, perhaps, imbibed those early prejudices which adhered to him to the end of his life. He shuddered at the idea of irreligion. Hence we are told in the Life of Pope, "Never were penury of knowledge and vulgarity of sentiment so happily disguised; Pope, in the chair of wisdom tells much that every man knows, and much that he did not know himself; and gives us comfort in the position, that *though man's a fool, yet God is wise*; that human advantages are unstable; that our true honour is, not to have a great part, but to act it well; that virtue only is our own, and that happiness is always in our power. The reader, when he meets all this in its new array, no longer knows the talk of his mother and his nurse." But may it not be said, that every system of ethics must or ought to terminate in plain and general maxims for the use of life? and, though in such axioms no discovery is made, does not the beauty of the moral theory consist in the premises, and the chain of reasoning that leads to the conclusion? May not truth, as Johnson himself says, be conveyed to the mind by a new train of intermediate images? Pope's doctrine about the ruling passion does not seem to be refuted, though it is called, in harsh terms, pernicious as well as false, tending to establish a kind of moral predestination, or over-ruling principle, which cannot be resisted. But Johnson was too easily alarmed in the cause of religion. Organized as the human race is, individuals have different inlets of perception, different powers of mind, and different sensations of pleasure and pain.

All spread their charms, but charms not all alike,  
On different senses different objects strike:  
Hence different passions move or less inflame,  
As strong or weak the organs of the frame,  
And hence one master passion in the breast,  
Like Aaron's serpent, swallows up the rest.

Broumy says, Pascal from his infancy felt himself a geometrician; and Vandyke, in like manner, was a painter. Shakspeare, who of all poets, had the deepest insight into human nature, was aware of a prevailing bias in the operations of every mind. By him we are told, "Masterless passion sways us to the mood what it likes or loathes."

It remains to inquire whether in the lives before us the characters are partial, and too often drawn with malignity of misrepresentation. To prove this it is alleged, that Johnson has misrepresented the circumstance relative to the translation of the first Iliad, and maliciously ascribed that performance to Addison, instead of Tickell, with too much reliance on the testimony of Pope, taken from the account in the papers left by Mr. Spence. For a refutation of the fallacy imputed to Addison, we are referred to a note in the *Biographia Britannica*, written by the late Judge Blackstone, who, it is said, examined the whole matter with accuracy, and found that the first regular statement of the accusation against Addison was published by Luffhead, in his *Life of Pope*, from the materials which he received from Dr. Warburton. But with all due deference to the learned Judge, whose talents deserve all praise, this account is by no means accurate.

Sir Richard Steele, in a dedication of the *Comedy of the Drummer* to Mr. Congreve, gave the first insight into that business. He says, in a style of anger and resentment, "If that gentleman (Mr. Tickell) thinks himself injured, I will allow I have wronged him upon this issue, that (if the reputed translator of the first book of *Homer* shall please to give us another book) there shall appear another good judge of poetry, besides Mr. Alexander Pope, who shall like it." The authority of Steele outweighs all opinions founded on vain conjecture, and, indeed, seems to be decisive, since we do not find that Tickell, though warmly pressed, thought proper to vindicate himself.

But the grand proof of Johnson's malignity is the manner in which he has treated the character and conduct of Milton. To enforce this charge has wearied sophistry, and exhausted the invention of a party. What they cannot deny, they palliate; what they cannot prove, they say is probable. But why all this rage against Dr. Johnson? Addison, before him, had said of Milton:

Oh! had the Poet ne'er prophaned his pen,  
To varnish o'er the guilt of faithless men!

And had not Johnson an equal right to avow his sentiments? Do his enemies claim a privilege to abuse whatever is valuable to Englishmen, either in Church or State? and must the liberty of UNLICENSED PRINTING be denied to the friends of the British constitution?

It is unnecessary to pursue the argument through all its artifices, since, dismantled of ornament and seducing language, the plain truth may be stated in a narrow compass. Johnson knew that Milton was a republican; he says, "an acrimonious and surly republican, for which it is not known that he gave any better reason than that a popular government was the most frugal; for, the trappings of a monarchy

would set up an ordinary commonwealth." Johnson knew that Milton talked aloud "of the danger of RE-ADMITTING KINGSHIP in this nation;" and when Milton adds, "that a commonwealth was commended, or rather enjoined, by our Saviour himself, to all Christians, not without a remarkable disallowance, and the brand of Gentilism UPON KINGSHIP," Johnson thought him no better than a wild enthusiast. He knew as well as Milton, "that the happiness of a nation must needs be firmest and certainest in a full and free council of their own electing, where no single person but reason only sways;" but the example of all the republics, recorded in the annals of mankind, gave him no room to hope that REASON only would be heard. He knew that the republican form of government, having little or no complication, and no consonance of parts by a nice mechanism forming a regular whole, was too simple to be beautiful even in theory. In practice, it perhaps never existed. In its most flourishing state, at Athens, Rome, and Carthage, it was a constant scene of tumult and commotion. From the mischiefs of a wild democracy, the progress has ever been to the dominion of an aristocracy: and the word *aristocracy* fatally includes the boldest and most turbulent citizens, who rise by their crimes, and call themselves the best men in the state. By intrigue, by cabal, and faction, a pernicious oligarchy is sure to succeed, and end at last in the tyranny of a single ruler. Tacitus, the great master of political wisdom, saw, under the mixed authority of king, nobles, and people, a better form of government than Milton's boasted republic; and what Tacitus admired in theory, but despaired of enjoying, Johnson saw established in this country. He knew that it had been overturned by the rage of frantic men; but he knew that, after the iron rod of Cromwell's usurpation, the constitution was once more restored to its first principles. Monarchy was established, and this country was regenerated. It was regenerated a second time at the Revolution: the rights of men were then defined, and the blessings of good order and civil liberty have been ever since diffused through the whole community.

The peace and happiness of society were what Dr. Johnson had at heart. He knew that Milton called his defence of the *Regicides* a defence of the people of England, but, however glossed and varnished, he thought it an apology for murder. Had the men, who, under a show of liberty, brought their king to the scaffold, proved by their subsequent conduct, that the public good inspired their actions, the end might have given some sanction to the means; but usurpation and slavery followed. Milton undertook the office of secretary under the despotic power of Cromwell, offering the incense of adulation to his master, with the titles of *Director of public Councils*, the *Leader of unconquered*

*Armies, the Father of his Country.* Milton declared at the same time, that *nothing is more pleasing to God, or more agreeable to reason, than that the highest mind should have the sovereign power.* In this strain of servile flattery Milton gives us the right divine of tyrants. But it seems, in the same piece, he exhorts Cromwell "not to desert those great principles of liberty which he had professed to espouse; for, it would be a grievous enormity, if, after having successfully opposed tyranny, he should himself act the part of a tyrant, and betray the cause that he had defended." This desertion of every honest principle the advocate for liberty lived to see. Cromwell acted the tyrant; and with vile hypocrisy, told the people, that he had consulted the Lord, and the Lord would have it so. Milton took an underpart in the tragedy. Did that become the defender of the people of England? Brutus saw his country enslaved; he struck the blow for freedom, and he died with honour in the cause. Had he lived to be a secretary under Tiberius, what would now be said of his memory?

But still, it seems, the prostitution with which Milton is charged, since it cannot be defended, is to be retorted on the character of Johnson. For this purpose a book has been published, called *Remarks on Dr. Johnson's Life of Milton*; to which are added *Milton's Tractate of Education, and Areopagitica.* In this laboured tract we are told, "There is one performance ascribed to the pen of the Doctor, where the prostitution is of so singular a nature, that it would be difficult to select an adequate motive for it out of the mountainous heap of conjectural causes of human passions or human caprice. It is the speech of the late unhappy Dr. William Dodd, when he was about to hear the sentence of the law pronounced upon him, in consequence of an indictment for forgery. The voice of the public has given the honour of manufacturing this speech to Dr. Johnson; and the style and figuration of the speech itself confirm the imputation. But it is hardly possible to divine what could be his motive for accepting the office. A man, to express the precise state of mind of another, about to be destined to an ignominious death for a capital crime, should, one would imagine, have some consciousness, that he himself had incurred some guilt of the same kind." In all the schools of sophistry is there to be found so vile an argument? In the purlieus of Grubstreet is there such another mouthful of dirt? In the whole quiver of malice is there so envenomed a shaft?

After this it is to be hoped, that a certain class of men will talk no more of Johnson's malignity. The last apology for Milton is, that

he acted according to his principles. But Johnson thought those principles detestable; pernicious to the constitution in Church and State, destructive of the peace of society, and hostile to the great fabric of civil policy, which the wisdom of ages has taught every Briton to revere, to love and cherish. He reckoned Milton in that class of men, of whom the Roman historian says, when they want, by a sudden convulsion, to overturn the government, they roar and clamour for liberty; if they succeed, they destroy liberty itself. *Ut imperium evrant, libertatem præferunt; si pervererint, libertatem ipsam aggredientur.* Such were the sentiments of Dr. Johnson; and it may be asked, in the language of Bolingbroke, "Are these sentiments, which any man, who is born a Briton, in any circumstances, in any situation, ought to be ashamed or afraid to avow?" Johnson has done ample justice to Milton's poetry: the Criticism on *Paradise Lost* is a sublime composition. Had he thought the author as good and pious a citizen as Dr. Watts, he would have been ready, notwithstanding his non-conformity, to do equal honour to the memory of the man.

It is now time to close this Essay, which the author fears has been drawn too much into length. In the progress of the work, feeble as it may be, he thought himself performing the last human office to the memory of a friend, whom he loved, esteemed, and honoured.

His saltem accumulem donis, et fangor tanti Munere.—

The author of these Memoirs has been anxious to give the features of the man, and the true character of the author. He has not suffered the hand of partiality to colour his excellences with too much warmth; nor has he endeavoured to throw his singularities too much into the shade. Dr. Johnson's failings may well be forgiven for the sake of his virtues. His defects were spots in the sun. His piety, his kind affections, and the goodness of his heart, present an example worthy of imitation. His works still remain a monument of genius and of learning. Had he written nothing but what is contained in this edition, the quantity shows a life spent in study and meditation. If to this be added the labour of his Dictionary and other various productions, it may be fairly allowed, as he used to say of himself, that he has written his share. In the volumes here presented to the public, the reader will find a perpetual source of pleasure and instruction. With due precautions authors may learn to grace their style with elegance, harmony, and precision; they may be taught to think with vigour and perspicuity; and to crown the whole, by a diligent attention to these books, all may advance in virtue.

## CHAPTER I.

### *Description of a Palace in a Valley.*

YE who listen with credulity to the whispers of fancy, and pursue with eagerness the phantoms of hope; who expect that age will perform the promises of youth, and that the deficiencies of the present day will be supplied by the morrow; attend to the history of Rasselas prince of Abissinia.

Rasselas was the fourth son of the mighty emperor, in whose dominions the father of waters begins his course; whose bounty pours down the streams of plenty, and scatters over the world the harvests of Egypt.

According to the custom which has descended from age to age among the monarchs of the torrid zone, Rasselas was confined in a private palace, with the other sons and daughters of Abissinian royalty, till the order of succession should call him to the throne.

The place, which the wisdom or policy of antiquity had destined for the residence of the Abissinian princes, was a spacious valley in the kingdom of Amhara, surrounded on every side by mountains, of which the summits overhang the middle part. The only passage by which it could be entered was a cavern that passed under a rock, of which it had long been disputed whether it was the work of nature or of human industry. The outlet of the cavern was concealed by a thick wood, and the mouth which opened into the valley was closed with gates of iron, forged by the artificers of ancient days, so massy, that no man, without the help of engines, could open or shut them.

From the mountains on every side rivulets descended, that filled all the valley with verdure and fertility, and formed a lake in the middle, inhabited by fish of every species, and frequented by every fowl whom nature has taught to dip the wing in water. This lake discharged its

superfluities by a stream, which entered a dark cleft of the mountain on the northern side, and fell with dreadful noise from precipice to precipice, till it was heard no more.

The sides of the mountains were covered with trees, the banks of the brooks were diversified with flowers: every blast shook spices from the rocks, and every month dropped fruits upon the ground. All animals that bite the grass, or browse the shrubs, whether wild or tame, wandered in this extensive circuit, secured from beasts of prey by the mountains which confined them. On one part were flocks and herds feeding in the pastures, on another all the beasts of chase frisking in the lawns: the sprightly kid was bounding on the rocks, the subtle monkey frolicking in the trees, and the solemn elephant reposing in the shade. All the diversities of the world were brought together, the blessings of nature were collected, and its evils extracted and excluded.

The valley, wide and fruitful, supplied its inhabitants with the necessities of life; and all delights and superfluities were added at the annual visit which the emperor paid his children, when the iron gate was opened to the sound of music; and during eight days, every one that resided in the valley was required to propose whatever might contribute to make seclusion pleasant, to fill up the vacancies of attention, and lessen the tediousness of time. Every desire was immediately granted. All the artificers of pleasure were called to gladden the festivity; the musicians exerted the power of harmony, and the dancers showed their activity before the princes, in hopes that they should pass their lives in blissful captivity, to which those only were admitted whose performance was thought able to add novelty to luxury. Such was the appearance of security and delight which this retirement afforded, that they to whom it was new always desired that it might be perpetual; and as those on whom the

iron gate had once closed were never suffered to return, the effect of longer experience could not be known. Thus every year produced new scenes of delight, and new competitors for imprisonment.

The palace stood on an eminence, raised about thirty paces above the surface of the lake. It was divided into many squares, or courts, built with greater or less magnificence, according to the rank of those for whom they were designed. The roofs were turned into arches of massy stone, joined by a cement that grew harder by time; and the building stood from century to century, deriding the solstitial rains and equinoctial hurricanes, without need of reparation.

This house, which was so large as to be fully known to none but some ancient officers, who successively inherited the secrets of the place, was built as if Suspicion herself had dictated the plan. To every room there was an open and secret passage; every square had a communication with the rest, either from the upper stories by private galleries, or by subterraneous passages from the lower apartments. Many of the columns had unsuspected cavities, in which a long race of monarchs had reposed their treasures. They then closed up the opening with marble, which was never to be removed but in the utmost exigencies of the kingdom; and recorded their accumulations in a book, which was itself concealed in a tower, not entered but by the emperor, attended by the prince who stood next in succession.

## CHAPTER II.

### *The Discontent of Rasselas in the happy Valley.*

HERE the sons and daughters of Abissinia lived only to know the soft vicissitudes of pleasure and repose, attended by all that were skilful to delight, and gratified with whatever the senses can enjoy. They wandered in gardens of fragrance, and slept in the fortresses of security. Every art was practised to make them pleased with their own condition. The sages who instructed them told them of nothing but the miseries of public life, and described all beyond the mountains as regions of calamity, where discord was always raging, and where man preyed upon man. To heighten their opinion of their own felicity, they were daily entertained with songs, the subject of which was the happy valley. Their appetites were excited by frequent enumerations of different enjoyments, and revelry and merriment were the business of every hour, from the dawn of morning to the close of the evening.

These methods were generally successful: few of the princes had ever wished to enlarge their

bounds, but passed their lives in full conviction that they had all within their reach that art or nature could bestow, and pitied those whom nature had excluded from this seat of tranquillity, as the sport of chance and the slaves of misery.

Thus they rose in the morning and lay down at night, pleased with each other and with themselves, all but Rasselas, who, in the twenty-sixth year of his age, began to withdraw himself from the pastimes and assemblies, and to delight in solitary walks and silent meditation. He often sat before tables covered with luxury, and forgot to taste the dainties that were placed before him: he rose abruptly in the midst of the song, and hastily retired beyond the sound of music. His attendants observed the change, and endeavoured to renew his love of pleasure: he neglected their officiousness, repulsed their invitations, and spent day after day on the banks of rivulets sheltered with trees, where he sometimes listened to the birds in the branches, sometimes observed the fish playing in the stream, and anon cast his eyes upon the pastures and mountains filled with animals, of which some were biting the herbage, and some sleeping among the bushes. The singularity of his humour made him much observed. One of the sages, in whose conversation he had formerly delighted, followed him secretly, in hope of discovering the cause of his disquiet. Rasselas, who knew not that any one was near him, having for some time fixed his eyes upon the goats that were browsing among the rocks, began to compare their condition with his own.

"What," said he, "makes the difference between man and all the rest of the animal creation? Every beast that strays beside me has the same corporal necessities with myself: he is hungry, and crops the grass; he is thirsty, and drinks the stream: his thirst and hunger are appeased; he is satisfied, and sleeps: he rises again, and is hungry; he is again fed, and is at rest. I am hungry and thirsty, like him, but when thirst and hunger cease, I am not at rest; I am, like him, pained with want, but am not, like him, satisfied with fulness. The intermediate hours are tedious and gloomy: I long again to be hungry, that I may again quicken the attention. The birds peck the berries or the corn, and fly away to the groves, where they sit in seeming happiness on the branches, and waste their lives in tuning one unvaried series of sounds. I likewise can call the lutanist and the singer; but the sounds that pleased me yesterday weary me to-day, and will grow yet more wearisome to-morrow. I can discover in me no power of perception which is not glutted with its proper pleasure, yet I do not feel myself delighted. Man surely has some latent sense, for which this place affords no gratification: or he has some desires distinct from sense, which must be satisfied before he can be happy."

After this he lifted up his head, and seeing the moon rising, walked towards the palace. As he passed through the fields, and saw the animals around him, "Ye," said he, "are happy, and need not envy me, that walk thus among you, burdened with myself; nor do I, ye gentle beings, envy your felicity; for it is not the felicity of man. I have many distresses from which ye are free; I fear pain when I do not feel it: I sometimes shrink at evils recollected, and sometimes start at evils anticipated: surely the equity of Providence has balanced peculiar sufferings with peculiar enjoyments."

With observations like these the prince amused himself as he returned, uttering them with a plaintive voice, yet with a look that discovered him to feel some complacency in his own perspicacity, and to receive some solace of the miseries of life, from consciousness of the delicacy with which he felt, and the eloquence with which he bewailed them. He mingled cheerfully in the diversions of the evening, and all rejoiced to find that his heart was lightened.

### CHAPTER III.

*The Wants of him that wants nothing.*

On the next day, his old instructor, imagining that he had now made himself acquainted with his disease of mind, was in hope of curing it by counsel, and officiously sought an opportunity of conference, which the prince, having long considered him as one whose intellects were exhausted, was not very willing to afford. "Why," said he, "does this man thus intrude upon me? shall I never be suffered to forget these lectures, which pleased only while they were new, and to become new again, must be forgotten?" He then walked into the wood, and composed himself to his usual meditations; when, before his thoughts had taken any settled form, he perceived his pursuer at his side, and was at first prompted by his impatience to go hastily away; but being unwilling to offend a man whom he had once revered, and still loved, he invited him to sit down with him on the bank.

The old man, thus encouraged, began to lament the change which had been lately observed in the prince, and to inquire why he so often retired from the pleasures of the palace, to loneliness and silence. "I fly from pleasure," said the prince, "because pleasure has ceased to please: I am lonely because I am miserable, and am unwilling to cloud with my presence the happiness of others."—"You, Sir," said the sage, "are the first who has complained of misery in the happy valley. I hope to convince you that your complaints have no real cause. You

are here in full possession of all the emperor of Abissinia can bestow; here is neither labour to be endured nor danger to be dreaded, yet here is all that labour or danger can procure or purchase. Look round and tell me which of your wants is without supply: if you want nothing, how are you unhappy?"

"That I want nothing," said the prince, "or that I know not what I want, is the cause of my complaint: if I had any known want, I should have a certain wish; that wish would excite endeavour, and I should not then repine to see the sun move so slowly towards the western mountains, or to lament when the day breaks, and sleep will no longer hide me from myself. When I see the kids and the lambs chasing one another, I fancy that I should be happy if I had something to pursue. But, possessing all that I can want, I find one day and one hour exactly like another, except that the latter is still more tedious than the former. Let your experience inform me how the day may now seem as short as in my childhood, while nature was yet fresh, and every moment showed me what I never had observed before. I have already enjoyed too much: give me something to desire." The old man was surprised at this new species of affliction, and knew not what to reply, yet was unwilling to be silent. "Sir," said he, "if you had seen the miseries of the world, you would know how to value your present state."—"Now," said the prince, "you have given me something to desire: I shall long to see the miseries of the world, since the sight of them is necessary to happiness."

### CHAPTER IV.

*The Prince continues to grieve and muse.*

At this time the sound of music proclaimed the hour of repast, and the conversation was concluded. The old man went away sufficiently discontented to find that his reasonings had produced the only conclusion which they were intended to prevent. But in the decline of life, shame and grief are of short duration: whether it be that we bear easily what we have borne long; or that, finding ourselves in age less regarded, we less regard others; or, that we look with slight regard upon afflictions, to which we know that the hand of death is about to put an end.

The prince, whose views were extended to a wider space, could not speedily quiet his emotions. He had been before terrified at the length of life which nature promised him, because he considered that in a long time much must be endured: he now rejoiced in his youth, because in many years much might be done. This first

beam of hope that had been ever darted into his mind rekindled youth in his cheeks, and doubled the lustre of his eyes. He was fired with the desire of doing something, though he knew not yet, with distinctness, either end or means. He was now no longer gloomy and unsocial; but, considering himself as master of a secret stock of happiness, which he could only enjoy by concealing it, he affected to be busy in all the schemes of diversion, and endeavoured to make others pleased with the state of which he himself was weary. But pleasures can never be so multiplied or continued as not to leave much of life unemployed; there were many hours, both of the night and day, which he could spend without suspicion in solitary thought. The load of life was much lightened; he went eagerly into the assemblies, because he supposed the frequency of his presence necessary to the success of his purposes; he retired gladly to privacy, because he had now a subject of thought. His chief amusement was to picture to himself that world which he had never seen, to place himself in various conditions, to be entangled in imaginary difficulties, and to be engaged in wild adventures; but his benevolence always terminated his projects in the relief of distress, the detection of fraud, the defeat of oppression, and the diffusion of happiness.

Thus passed twenty months of the life of Rasselas. He busied himself so intensely in visionary bustle that he forgot his real solitude; and, amidst hourly preparations for the various incidents of human affairs, neglected to consider by what means he should mingle with mankind.

One day, as he was sitting on a bank, he feigned to himself an orphan virgin robbed of her little portion by a treacherous lover, and crying after him for restitution. So strongly was the image impressed upon his mind, that he started up in the maid's defence, and ran forward to seize the plunderer with all the eagerness of real pursuit. Fear naturally quickens the flight of guilt. Rasselas could not catch the fugitive with his utmost efforts: but, resolving to weary by perseverance him whom he could not surpass in speed, he pressed on till the foot of the mountain stopped his course.

Here he recollected himself, and smiled at his own useless impetuosity. Then raising his eyes to the mountain, "This," said he, "is the fatal obstacle that hinders at once the enjoyment of pleasure and the exercise of virtue. How long is it that my hopes and wishes have flown beyond this boundary of my life, which yet I never have attempted to surmount!"—Struck with this reflection, he sat down to muse, and remembered, that since he first resolved to escape from his confinement, the sun had passed

twice over him in his annual course. He now felt a degree of regret with which he had never been before acquainted. He considered how much might have been done in the time which had passed, and left nothing real behind it. He compared twenty months with the life of man.—"In life," said he, "is not to be counted the ignorance of infancy or imbecility of age. We are long before we are able to think, and we soon cease from the power of acting. The true period of human existence may be reasonably estimated at forty years, of which I have mused away the four-and-twentieth part. What I have lost was certain, for I have certainly possessed it; but of twenty months to come who can assure me?"

The consciousness of his own folly pierced him deeply, and he was long before he could be reconciled to himself. "The rest of my time," said he, "has been lost by the crime or folly of my ancestors, and the absurd institutions of my country; I remember it with disgust, yet without remorse: but the months that have passed since new light darted into my soul, since I formed a scheme of reasonable felicity, have been squandered by my own fault. I have lost that which can never be restored: I have seen the sun rise and set for twenty months, an idle gazer on the light of heaven: in this time the birds have left the nest of their mother, and committed themselves to the woods and to the skies; the kid has forsaken the tent, and learned by degrees to climb the rocks in quest of independent sustenance. I only have made no advances, but am still helpless and ignorant. The moon, by more than twenty changes, admonished me of the flux of life: the stream that rolled before my feet upbraided my inactivity. I sat feasting on intellectual luxury, regardless alike of the examples of the earth and the instructions of the planets. Twenty months are passed, who shall restore them?"

These sorrowful meditations fastened upon his mind: he passed four months in resolving to lose no more time in idle resolves, and was awakened to more vigorous exertion, by hearing a maid, who had broken a porcelain cup, remark, that what cannot be repaired is not to be regretted.

This was obvious; and Rasselas reproached himself that he had not discovered it; having not known, or not considered, how many useful hints are obtained by chance, and how often the mind, hurried by her own ardour to distant views, neglects the truths that lie opened before her. He, for a few hours, regretted his regret, and from that time bent his whole mind upon the means of escaping from the valley of happiness.

CHAPTER V.

*The Prince meditates his Escape.*

He now found that it would be very difficult to effect that which it was very easy to suppose effected. When he looked round about him, he saw himself confined by the bars of nature, which had never yet been broken, and by the gate, through which none that once had passed it were ever able to return. He was now impatient as an eagle in a grate. He passed week after week in clambering the mountains, to see if there was any aperture which the bushes might conceal, but found all the summits inaccessible by their prominence. The iron gate he despaired to open; for it was not only secured with all the power of art, but was always watched by successive sentinels, and was by its position exposed to the perpetual observation of all the inhabitants.

He then examined the cavern through which the waters of the lake were discharged; and, looking down at a time when the sun shone strongly upon its mouth, he discovered it to be full of broken rocks, which, though they permitted the stream to flow through many narrow passages, would stop any body of solid bulk. He returned discouraged and dejected: but, having now known the blessing of hope, resolved never to despair.

In these fruitless researches he spent ten months. The time, however, passed cheerfully away: in the morning he rose with new hope, in the evening applauded his own diligence, and in the night slept sound after his fatigue. He met a thousand amusements, which beguiled his labour and diversified his thoughts. He discerned the various instincts of animals, and properties of plants, and found the place replete with wonders, of which he proposed to solace himself with the contemplation, if he should never be able to accomplish his flight; rejoicing that his endeavours, though yet unsuccessful, had supplied him with a source of inexhaustible inquiry.

But his original curiosity was not yet abated: he resolved to obtain some knowledge of the ways of men. His wish still continued, but his hope grew less. He ceased to survey any longer the walls of his prison, and spared to search by new toils for interstices which he knew could not be found, yet determined to keep his design always in view, and lay hold on any expedient that time should offer.

CHAPTER VI.

*A Dissertation on the Art of Flying.*

Among the artists that had been allured into the

happy valley, to labour for the accommodation and pleasure of its inhabitants, was a man eminent for his knowledge of the mechanic powers, who had contrived many engines both of use and recreation. By a wheel which the stream turned, he forced the water into a tower, whence it was distributed to all the apartments of the palace. He erected a pavilion in the garden, around which he kept the air always cool by artificial showers. One of the groves, appropriated to the ladies, was ventilated by fans, to which the rivulets that ran through it gave a constant motion; and instruments of soft music were played at proper distances, of which some played by the impulse of the wind, and some by the power of the stream.

This artist was sometimes visited by Rasselas, who was pleased with every kind of knowledge, imagining that the time would come when all his acquisitions should be of use to him in the open world. He came one day to amuse himself in his usual manner, and found the master busy in building a sailing chariot: he saw that the design was practicable upon a level surface, and with expressions of great esteem solicited its completion. The workman was pleased to find himself so much regarded by the prince, and resolved to gain yet higher honours. "Sir," said he, "you have seen but a small part of what the mechanic sciences can perform. I have been long of opinion, that instead of the tardy conveyance of ships and chariots, man might use the swifter migration of wings; that the fields of air are open to knowledge, and that only ignorance and idleness need crawl upon the ground."

This hint rekindled the prince's desire of passing the mountains. Having seen what the mechanist had already performed, he was willing to fancy that he could do more; yet resolved to inquire farther before he suffered hope to afflict him by disappointment. "I am afraid," said he to the artist, "that your imagination prevails over your skill, and that you now tell me rather what you wish than what you know. Every animal has his element assigned him; the birds have the air, and man and beasts the earth."—"So," replied the mechanist, "fishes have the water, in which yet beasts can swim by nature, and man by art. He that can swim needs not despair to fly: to swim is to fly in a grosser fluid, and to fly is to swim in a subtler. We are only to proportion our power of resistance to the different density of matter through which we are to pass. You will be necessarily upborne by the air, if you can renew any impulse upon it faster than the air can recede from the pressure."

"But the exercise of swimming," said the prince, "is very laborious: the strongest limbs are soon wearied: I am afraid the act of flying will be yet more violent; and wings will be of

no great use, unless we can fly further than we can swim."

"The labour of rising from the ground," said the artist, "will be great, as we see it in the heavier domestic fowls; but, as we mount higher, the earth's attraction, and the body's gravity, will be gradually diminished, till we shall arrive at a region where the man shall float in the air without any tendency to fall; no care will then be necessary but to move forward, which the gentlest impulse will effect. You, Sir, whose curiosity is so extensive, will easily conceive with what pleasure a philosopher, furnished with wings, and hovering in the sky, would see the earth, and all its inhabitants, rolling beneath him, and presenting to him successively, by its diurnal motion, all the countries within the same parallel. How must it amuse the pendent spectator to see the moving scene of land and ocean, cities and deserts! to survey with equal security the marts of trade, and the fields of battle; mountains infested by barbarians, and fruitful regions gladdened by plenty and lulled by peace! How easily shall we then trace the Nile through all his passages, pass over to distant regions, and examine the face of nature from one extremity of the earth to the other."

"All this," said the prince, "is much to be desired, but I am afraid that no man will be able to breathe in these regions of speculation and tranquillity. I have been told that respiration is difficult upon lofty mountains; yet from these precipices, though so high as to produce great tenuity of air, it is very easy to fall: therefore I suspect, that from any height, where life can be supported, there may be danger of too quick descent."

"Nothing," replied the artist, "will ever be attempted, if all possible objections must be first overcome. If you will favour my project, I will try the first flight at my own hazard. I have considered the structure of all volant animals, and find the folding continuity of the bat's wings most easily accommodated to the human form. Upon this model I shall begin my task to-morrow; and, in a year, expect to tower into the air beyond the malice and pursuit of man. But I will work only on this condition, that the art shall not be divulged, and that you shall not require me to make wings for any but ourselves."

"Why," said Rasselas, "should you envy others so great an advantage? All skill ought to be exerted for universal good; every man has owed much to others, and ought to repay the kindness that he has received."

"If men were all virtuous," returned the artist, "I should with great alacrity teach them to fly. But what would be the security of the good if the bad could at pleasure invade them from the sky? Against an army sailing through

the clouds, neither walls, mountains, nor seas, could afford security. A flight of northern savages might hover in the wind, and light with irresistible violence upon the capital of a fruitful region. Even this valley, the retreat of princes, the abode of happiness, might be violated by the sudden descent of some of the naked nations that swarm on the coast of the southern sea!"

The prince promised secrecy, and waited for the performance, not wholly hopeless of success. He visited the work from time to time, observed its progress, and remarked many ingenious contrivances to facilitate motion, and unite levity with strength. The artist was every day more certain that he should leave vultures and eagles behind him, and the contagion of his confidence seized upon the prince. In a year the wings were finished; and, on a morning appointed, the maker appeared furnished for flight on a little promontory: he waved his pious a while to gather air, then leaped from his stand, and in an instant dropped into the lake. His wings, which were of no use in the air, sustained him in the water; and the prince drew him to land half dead with terror and vexation.

## CHAPTER VII.

### *The Prince finds a Man of Learning.*

THE prince was not much afflicted by this disaster, having suffered himself to hope for a happier event only because he had no other means of escape in view. He still persisted in his design to leave the happy valley by the first opportunity.

His imagination was now at a stand; he had no prospect of entering into the world; and, notwithstanding all his endeavours to support himself, discontent, by degrees, preyed upon him; and he began again to lose his thoughts in sadness, when the rainy season, which in these countries is periodical, made it inconvenient to wander in the woods.

The rain continued longer and with more violence than had ever been known: the clouds broke on the surrounding mountains, and the torrents streamed into the plain on every side, till the cavern was too narrow to discharge the water. The lake overflowed its banks, and all the level of the valley was covered with the inundation. The eminence on which the palace was built, and some other spots of rising ground, were all that the eye could now discover. The herds and flocks left the pasture, and both the wild beasts and the tame retreated to the mountains.

This inundation confined all the princes to

domestic amusements; and the attention of Rasselas was particularly seized by a poem, which Imlac rehearsed, upon the various conditions of humanity. He commanded the poet to attend him in his apartment, and recite his verses a second time; then, entering into familiar talk, he thought himself happy in having found a man who knew the world so well, and could so skillfully paint the scenes of life. He asked a thousand questions about things, to which, though common to all other mortals, his confinement from childhood had kept him a stranger. The poet pitied his ignorance, and loved his curiosity, and entertained him from day to day with novelty and instruction, so that the prince regretted the necessity of sleep, and longed till the morning should renew his pleasure.

As they were sitting together, the prince commanded Imlac to relate his history, and to tell by what accident he was forced, or by what motive induced, to close his life in the happy valley. As he was going to begin his narrative, Rasselas was called to a concert, and obliged to restrain his curiosity till the evening.

## CHAPTER VIII.

### *The History of Imlac.*

THE close of the day is, in the regions of the torrid zone, the only season of diversion and entertainment, and it was therefore midnight before the music ceased and the princesses retired. Rasselas then called for his companion, and required him to begin the story of his life.

"Sir," said Imlac, "my history will not be long: the life that is devoted to knowledge passes silently away, and is very little diversified by events. To talk in public, to think in solitude, to read and to hear, to inquire and answer inquiries, is the business of a scholar. He wanders about the world without pomp or terror, and is neither known nor valued but by men like himself.

"I was born in the kingdom of Goiama, at no great distance from the fountain of the Nile. My father was a wealthy merchant, who traded between the inland countries of Africa and the ports of the Red Sea. He was honest, frugal, and diligent, but of mean sentiments and narrow comprehension; he desired only to be rich, and to conceal his riches, lest he should be spoiled by the governors of the province."

"Surely," said the prince, "my father must be negligent of his charge, if any man in his dominions dares take that which belongs to another. Does he not know that kings are accountable for injustice permitted as well as done? If I were emperor, not the meanest of my subjects should be oppressed with impunity. My

blood boils when I am told that a merchant durst not enjoy his honest gains for fear of losing them by the rapacity of power. Name the governor who robbed the people, that I may declare his crimes to the emperor!"

"Sir," said Imlac, "your ardour is the natural effect of virtue animated by youth: the time will come when you will acquit your father, and perhaps hear with less impatience of the governor. Oppression is, in the Abissinian dominions, neither frequent nor tolerated; but no form of government has been yet discovered, by which cruelty can be wholly prevented. Subordination supposes power on one part and subjection on the other; and if power be in the hands of men, it will sometimes be abused. The vigilance of the supreme magistrate may do much, but much will still remain undone. He can never know all the crimes that are committed, and can seldom punish all that he knows."

"This," said the prince, "I do not understand; but I had rather hear thee than dispute. Continue thy narration."

"My father," proceeded Imlac, "originally intended that I should have no other education than such as might qualify me for commerce; and discovering in me great strength of memory and quickness of apprehension, often declared his hope that I should be some time the richest man in Abissinia."

"Why," said the prince, "did thy father desire the increase of his wealth, when it was already greater than he durst discover or enjoy? I am unwilling to doubt thy veracity, yet inconsistencies cannot both be true."

"Inconsistencies," answered Imlac, "cannot both be right; but, imputed to man, they may both be true. Yet diversity is not inconsistency. My father might expect a time of greater security. However, some desire is necessary to keep life in motion; and he, whose real wants are supplied, must admit those of fancy."

"This," said the prince, "I can in some measure conceive. I repent that I interrupted thee."

"With this hope," proceeded Imlac, "he sent me to school: but when I had once found the delight of knowledge, and felt the pleasure of intelligence and the pride of invention, I began silently to despise riches, and determined to disappoint the purposes of my father, whose grossness of conception raised my pity. I was twenty years old before his tenderness would expose me to the fatigue of travel; in which time I had been instructed, by successive masters, in all the literature of my native country. As every hour taught me something new, I lived in a continual course of gratifications; but, as I advanced towards manhood, I lost much of the reverence with which I had been used to look on my instructors; because, when the lo-

sons were ended, I did not find them wiser or better than common men.

"At length my father resolved to initiate me in commerce; and, opening one of his subterranean treasures, counted out ten thousand pieces of gold. This, young man, said he, is the stock with which you must negotiate. I began with less than a fifth part, and you see how diligence and parsimony have increased it. This is your own, to waste or to improve. If you squander it by negligence or caprice, you must wait for my death before you will be rich; if in four years you double your stock, we will thenceforward let subordination cease, and live together as friends and partners: for he shall be always equal with me, who is equally skilled in the art of growing rich.

"We laid our money upon camels, concealed in bales of cheap goods, and travelled to the shore of the Red Sea. When I cast my eye on the expanse of waters, my heart bounded like that of a prisoner escaped. I felt an unextinguishable curiosity kindle in my mind, and resolved to snatch this opportunity of seeing the manners of other nations, and of learning sciences unknown in Abissinia.

"I remembered that my father had obliged me to the improvement of my stock, not by a promise, which I ought not to violate, but by a penalty, which I was at liberty to incur; and therefore determined to gratify my predominant desire, and, by drinking at the fountain of knowledge, to quench the thirst of curiosity.

"As I was supposed to trade without connection with my father, it was easy for me to become acquainted with the master of a ship, and procure a passage to some other country. I had no motives of choice to regulate my voyage. It was sufficient for me, that, wherever I wandered, I should see a country which I had not seen before. I therefore entered a ship bound for Surat, having left a letter for my father declaring my intention."

## CHAPTER IX.

### *The History of Imrac continued.*

"WHEN I first entered upon the world of waters, and lost sight of land, I looked round about me in pleasing terror, and thinking my soul enlarged by the boundless prospect, imagined that I could gaze around for ever without satiety; but, in a short time, I grew weary of looking on barren uniformity, where I could only see again what I had already seen. I then descended into the ship, and doubted for a while whether all my future pleasures would not end, like this, in disgust and disappointment. Yet surely, said I, the ocean and the land are very different; the

only variety of water is rest and motion, but the earth has mountains and valleys, deserts and cities; it is inhabited by men of different customs and contrary opinions; and I may hope to find variety in life, though I should miss it in nature.

"With this thought I quieted my mind; and amused myself during the voyage, sometimes by learning from the sailors the art of navigation, which I have never practised, and sometimes by forming schemes for my conduct in different situations, in not one of which I have been ever placed.

"I was almost weary of my naval amusements, when we safely landed at Surat. I secured my money, and, purchasing some commodities for show, joined myself to a caravan that was passing into the inland country. My companions, for some reason or other, conjecturing that I was rich, and, by my inquiries and admiration, finding that I was ignorant, considered me as a novice whom they had a right to cheat, and who was to learn, at the usual expense, the art of fraud. They exposed me to the theft of servants and the exaction of officers, and saw me plundered upon false pretences, without any advantage to themselves, but that of rejoicing in the superiority of their own knowledge."

"Stop a moment," said the prince; "is there such depravity in man, as that he should injure another without benefit to himself? I can easily conceive that all are pleased with superiority; but your ignorance was merely accidental, which, being neither your crime nor your folly, could afford them no reason to applaud themselves; and the knowledge which they had, and which you wanted, they might as effectually have shown by warning, as betraying you."

"Pride," said Imrac, "is seldom delicate; it will please itself with very mean advantages; and envy feels not its own happiness but when it may be compared with the misery of others. They were my enemies because they grieved to think me rich, and my oppressors because they delighted to find me weak."

"Proceed," said the prince: "I doubt not of the facts which you relate, but imagine that you impute them to mistaken motives."

"In this company," said Imrac, "I arrived at Agra, the capital of Indostan, the city in which the Great Mogul commonly resides. I applied myself to the language of the country, and in a few months was able to converse with the learned men; some of whom I found morose and reserved, and others easy and communicative: some were unwilling to teach another what they had with difficulty learned themselves; and some showed that the end of their studies was to gain the dignity of instructing.

"To the tutor of the young princes I recommended myself so much, that I was presented to

the emperor as a man of uncommon knowledge. The emperor asked me many questions concerning my country and my travels; and though I cannot now recollect any thing that he uttered above the power of a common man, he dismissed me astonished at his wisdom, and enamoured of his goodness.

"My credit was now so high, that the merchants with whom I had travelled applied to me for recommendations to the ladies of the court. I was surprised at their confidence of solicitation, and gently reproached them with their practices on the road. They heard me with cold indifference, and showed no tokens of shame or sorrow.

"They then urged their request with the offer of a bribe; but what I would not do for kindness I would not do for money, and refused them; not because they had injured me; but because I would not enable them to injure others; for I knew they would have made use of my credit to cheat those who should buy their wares.

"Having resided at Agra till there was no more to be learned, I travelled into Persia, where I saw many remains of ancient magnificence, and observed many new accommodations of life. The Persians are a nation eminently social, and their assemblies afforded me daily opportunities of remarking characters and manners, and of tracing human nature through all its variations.

"From Persia I passed into Arabia, where I saw a nation pastoral and warlike; who lived without any settled habitation, whose wealth is their flocks and herds, and who have carried on, through ages, an hereditary war with mankind, though they neither covet nor envy their possessions."

## CHAPTER X.

*Imlac's History continued. A Dissertation upon Poetry.*

"WHEREVER I went, I found that poetry was considered as the highest learning, and regarded with a veneration somewhat approaching to that which man would pay to angelic nature. And yet it fills me with wonder, that, in almost all countries, the most ancient poets are considered as the best: whether it be that every other kind of knowledge is an acquisition gradually attained, and poetry is a gift conferred at once; or that the first poetry of every nation surprised them as a novelty, and retained the credit by consent which it received by accident at first; or whether as the province of poetry is to describe nature and passion, which are always the same, the first writers took possession of the

most striking objects for description and the most probable occurrences for fiction, and left nothing to those that followed them but transcription of the same events, and new combinations of the same images. Whatever be the reason, it is commonly observed that the early writers are in possession of nature, and their followers of art; that the first excel in strength and invention, and the latter in elegance and refinement.

"I was desirous to add my name to this illustrious fraternity. I read all the poets of Persia and Arabia, and was able to repeat by memory the volumes that are suspended in the mosque of Mecca. But I soon found that no man was ever great by imitation. My desire of excellence impelled me to transfer my attention to nature and to life. Nature was to be my subject, and men to be my auditors. I could never describe what I had not seen; I could not hope to move those with delight or terror, whose interests and opinions I did not understand.

"Being now resolved to be a poet, I saw every thing with a new purpose; my sphere of attention was suddenly magnified; no kind of knowledge was to be overlooked. I ranged mountains and deserts for images and resemblances, and pictured upon my mind every tree of the forest and flower of the valley. I observed with equal care the crags of the rock and the pinnacles of the palace.—Sometimes I wandered along the mazes of the rivulet, and sometimes watched the changes of the summer clouds.—To a poet nothing can be useless. Whatever is beautiful, and whatever is dreadful, must be familiar to his imagination; he must be conversant with all that is awfully vast or elegantly little. The plants of the garden, the animals of the wood, the minerals of the earth, and meteors of the sky, must all concur to store his mind with inexhaustible variety; for every idea is useful for the enforcement or decoration of moral or religious truth; and he who knows most will have most power of diversifying his scenes, and of gratifying his reader with remote allusions and unexpected instruction.

"All the appearances of nature I was therefore careful to study; and every country which I have surveyed has contributed something to my poetical powers."

"In so wide a survey," said the prince, "you must surely have left much unobserved. I have lived till now within the circuit of the mountains, and yet cannot walk abroad without the sight of something which I had never beheld before, or never heeded."

"The business of a poet," said Imlac, "is to examine, not the individual, but the species; to remark general properties and large appearances; he does not number the streaks of the tulip, or describe the different shades of the ves-

ture of the forest. He is to exhibit in his portraits of nature such prominent and striking features as recal the original to every mind; and must neglect the minuter discriminations, which one may have remarked, and another have neglected, for those characteristics which are alike obvious to vigilance and carelessness.

"But the knowledge of nature is only half the task of a poet; he must be acquainted likewise with all the modes of life. His character requires that he estimate the happiness and misery of every condition; observe the power of all the passions in all their combinations; and trace the changes of the human mind, as they are modified by various institutions and accidental influences of climate or custom, from the sprightliness of infancy to the despondence of decrepitude. He must divest himself of the prejudices of his age and country; he must consider right and wrong in their abstracted and invariable state; he must disregard present laws and opinions, and rise to general and transcendental truths, which will always be the same: he must, therefore, content himself with the slow progress of his name: condemn the praise of his own time, and commit his claims to the justice of posterity. He must write as the interpreter of nature, and the legislator of mankind, and consider himself as presiding over the thoughts and manners of future generations, as a being superior to time and place.

"His labour is not yet at an end; he must know many languages and many sciences; and, that his style may be worthy of his thoughts, must, by incessant practice, familiarise to himself every delicacy of speech and grace of harmony."

## CHAPTER XI.

*Imlac's Narrative continued. A Hint on Pilgrimage.*

IMLAC now felt the enthusiastic fit, and was proceeding to aggrandise his own profession, when the prince cried out, "Enough! thou hast convinced me that no human being can ever be a poet. Proceed with thy narration."

"To be a poet," said Imlac, "is indeed very difficult." "So difficult," returned the prince, "that I will at present hear no more of his labours. Tell me whither you went when you had seen Persia."

"From Persia," said the poet, "I travelled through Syria, and for three years resided in Palestine, where I conversed with great numbers of the northern and western nations of Europe; the nations which are now in possession of all power and all knowledge; whose armies are irresistible, and whose fleets com-

mand the remotest parts of the globe. When I compared these men with the natives of our own kingdom and those that surround us, they appeared almost another order of beings. In their countries it is difficult to wish for any thing that may not be obtained: a thousand arts, of which we never heard, are continually labouring for their convenience and pleasure; and whatever their own climate has denied them is supplied by their commerce."

"By what means," said the prince, "are the Europeans thus powerful? or why, since they can so easily visit Asia and Africa for trade or conquest, cannot the Asiatics and Africans invade their coasts, plant colonies in their ports, and give laws to their natural princes? The same wind that carries them back would bring us thither."

"They are more powerful, Sir, than we," answered Imlac, "because they are wiser; knowledge will always predominate over ignorance, as man governs the other animals. But why their knowledge is more than ours, I know not what reason can be given but the unsearchable will of the Supreme Being."

"When," said the prince with a sigh, "shall I be able to visit Palestine, and mingle with this mighty confluence of nations? Till that happy moment shall arrive, let me fill up the time with such representations as thou canst give me. I am not ignorant of the motive that assembles such numbers in that place, and cannot but consider it as the centre of wisdom and piety, to which the best and wisest men of every land must be continually resorting."

"There are some nations," said Imlac, "that send few visitants to Palestine; for many numerous and learned sects in Europe concur to censure pilgrimage as superstitious, or deride it as ridiculous."

"You know," said the prince, "how little my life has made me acquainted with diversity of opinions: it will be too long to hear the arguments on both sides; you, that have considered them, tell me the result."

"Pilgrimage," said Imlac, "like many other acts of piety, may be reasonable or superstitious, according to the principles upon which it is performed. Long journeys in search of truth are not commanded. Truth, such as is necessary to the regulation of life, is always found where it is honestly sought. Change of place is no natural cause of the increase of piety, for it inevitably produces dissipation of mind. Yet, since men go every day to view the fields where great actions have been performed, and return with stronger impressions of the event, curiosity of the same kind may naturally dispose us to view that country whence our religion had its beginning; and I believe no man surveys those awful scenes without some confirmation of holy resolutions. That the Supreme Being may be

more easily propitiated in one place than in another, is the dream of idle superstition; but that some places may operate upon our own minds in an uncommon manner, is an opinion which hourly experience will justify. He who supposes that his vices may be more successfully combated in Palestine will, perhaps, find himself mistaken; yet he may go thither without folly: he who thinks they will be more freely pardoned, dishonours at once his reason and religion."

"These," said the prince, "are European distinctions. I will consider them another time. What have you found to be the effect of knowledge? Are those nations happier than we?"

"There is so much infelicity," said the poet, "in the world, that scarce any man has leisure from his own distresses to estimate the comparative happiness of others. Knowledge is certainly one of the means of pleasure, as is confessed by the natural desire which every mind feels of increasing its ideas. Ignorance is mere privation, by which nothing can be produced; it is a vacuity in which the soul sits motionless and torpid for want of attraction; and, without knowing why, we always rejoice when we learn, and grieve when we forget. I am therefore inclined to conclude, that if nothing counteracts the natural consequence of learning, we grow more happy as our minds take a wider range.

"In enumerating the particular comforts of life, we shall find many advantages on the side of the Europeans. They cure wounds and diseases with which we languish and perish. We suffer inclemencies of weather which they can obviate. They have engines for the despatch of many laborious works, which we must perform by manual industry. There is such communication between distant places, that one friend can hardly be said to be absent from another. Their policy removes all public inconveniences: they have roads cut through the mountains; and bridges laid upon their rivers. And, if we descend to the privacies of life, their habitations are more commodious, and their possessions are more secure."

"They are surely happy," said the prince, "who have all these conveniences, of which I envy none so much as the facility with which separated friends interchange their thoughts."

"The Europeans," answered Imlac, "are less unhappy than we, but they are not happy. Human life is every where a state in which much is to be endured, and little to be enjoyed."

## CHAPTER XII.

*The Story of Imlac continued.*

"I am not willing," said the prince, "to sup-

pose that happiness is so parsimoniously distributed to mortals; nor can I believe but that, if I had the choice of life, I should be able to fill every day with pleasure. I would injure no man, and should provoke no resentments: I would relieve every distress, and should enjoy the benedictions of gratitude. I would choose my friends among the wise, and my wife among the virtuous; and therefore should be in no danger from treachery or unkindness. My children should, by my care, be learned and pious, and would repay to my age what their childhood had received. What would dare to molest him who might call on every side to thousands enriched by his bounty, or assisted by his power? And why should not life glide away in the soft reciprocation of protection and reverence? All this may be done without the help of European refinements, which appear by their effects to be rather specious than useful. Let us leave them, and pursue our journey."

"From Palestine," said Imlac, "I passed through many regions of Asia; in the more civilized kingdoms as a trader, and among the barbarians of the mountains as a pilgrim. At last I began to long for my native country, that I might repose, after my travels and fatigues, in the places where I had spent my earliest years, and gladden my old companions with the recital of my adventures. Often did I figure to myself those with whom I had sported away the gay hours of dawning life, sitting round me in its evening, wondering at my tales, and listening to my counsels.

"When this thought had taken possession of my mind, I considered every moment as wasted which did not bring me nearer to Abissinia. I hastened into Egypt, and, notwithstanding my impatience, was detained ten months in the contemplation of its ancient magnificence, and in inquiries after the remains of its ancient learning. I found in Cairo a mixture of all nations; some brought thither by the love of knowledge, some by the hope of gain, many by the desire of living after their own manner without observation, and of lying hid in the obscurity of multitudes: for in a city populous as Cairo, it is possible to obtain at the same time the gratifications of society, and the secrecy of solitude.

"From Cairo I travelled to Suez, and embarked on the Red Sea, passing along the coast till I arrived at the port from which I had departed twenty years before. Here I joined myself to a caravan, and re-entered my native country.

"I now expected the caresses of my kinsmen, and the congratulations of my friends; and was not without hope that my father, whatever value he had set upon riches, would own with gladness and pride a son who was able to add to the felicity and honour of the nation. But I was soon convinced that my

thoughts were vain. My father had been dead fourteen years, having divided his wealth among my brothers, who were removed to some other provinces. Of my companions, the greater part was in the grave; of the rest, some could with difficulty remember me, and some considered me as one corrupted by foreign manners.

"A man used to vicissitudes is not easily dejected. I forgot, after a time, my disappointment, and endeavoured to recommend myself to the nobles of the kingdom: they admitted me to their tables, heard my story, and dismissed me. I opened a school, and was prohibited to teach. I then resolved to sit down in the quiet of domestic life, and addressed a lady that was fond of my conversation, but rejected my suit because my father was a merchant.

"Wearyed at last with solicitation and repulses, I resolved to hide myself for ever from the world, and depend no longer on the opinion or caprice of others. I waited for the time when the gate of the happy valley should open, that I might bid farewell to hope and fear: the day came; my performance was distinguished with favour, and I resigned myself with joy to perpetual confinement."

"Hast thou here found happiness at last?" said Rasselas. "Tell me without reserve; art thou content with thy condition? or dost thou wish to be again wandering and inquiring? All the inhabitants of this valley celebrate their lot, and, at the annual visit of the emperor, invite others to partake of their felicity."

"Great prince," said Imlac, "I shall speak the truth: I know not one of all your attendants who does not lament the hour when he entered this retreat. I am less unhappy than the rest, because I have a mind replete with images, which I can vary and combine at pleasure. I can amuse my solitude by the renovation of the knowledge which begins to fade from my memory, and by recollection of the accidents of my past life. Yet all this ends in the sorrowful consideration that my acquirements are now useless, and that none of my pleasures can be again enjoyed. The rest, whose minds have no impression but of the present moment, are either corroded by malignant passions, or sit stupid in the gloom of perpetual vacancy."

"What passions can infest those," said the prince, "who have no rivals? We are in a place where impotence precludes malice, and where all envy is repressed by community of enjoyments."

"There may be community," said Imlac, "of material possessions, but there can never be community of love or of esteem. It must happen that one will please more than another: he that knows himself despised will always be envious; and still more envious and malevolent if he is condemned to live in the presence of those who despise him. The invitations, by which

they allure others to a state which they feel to be wretched, proceed from the natural malignity of hopeless misery. They are weary of themselves, and of each other, and expect to find relief in new companions. They envy the liberty which their folly has forfeited, and would gladly see all mankind imprisoned like themselves.

"From this crime, however, I am wholly free. No man can say that he is wretched by my persuasion. I look with pity on the crowds who are annually soliciting admission to captivity, and wish that it were lawful for me to warn them of their danger."

"My dear Imlac," said the prince, "I will open to thee my whole heart. I have long meditated an escape from the happy valley. I have examined the mountain on every side, but find myself insuperably barred: teach me the way to break my prison; thou shalt be the companion of my flight, the guide of my rambles, the partner of my fortune, and my sole director in the choice of life."

"Sir," answered the poet, "your escape will be difficult, and, perhaps, you may soon repent your curiosity. The world, which you figure to yourself smooth and quiet as the lake in the valley, you will find a sea foaming with tempests, and boiling with whirlpools; you will be sometimes overwhelmed by the waves of violence, and sometimes dashed against the rocks of treachery. Amidst wrongs and frauds, competitions and anxieties, you will wish a thousand times for these seats of quiet, and willingly quit hope to be free from fear."

"Do not seek to deter me from my purpose," said the prince: "I am impatient to see what thou hast seen; and since thou art thyself weary of the valley, it is evident that thy former state was better than this. Whatever be the consequence of my experiment, I am resolved to judge with mine own eyes of the various conditions of men, and then to make deliberately my choice of life."

"I am afraid," said Imlac, "you are hindered by stronger restraints than my persuasions; yet, if your determination is fixed, I do not counsel you to despair. Few things are impossible to diligence and skill."

## CHAPTER XIII.

*Rasselas discovers the Means of Escape.*

THE prince now dismissed his favourite to rest but the narrative of wonders and novelties filled his mind with perturbation. He revolved all that he had heard, and prepared innumerable questions for the morning.

Much of his uneasiness was now removed. He had a friend to whom he could impart his

thoughts, and whose experience could assist him in his designs. His heart was no longer condemned to swell with silent vexation. He thought that even the happy valley might be endured with such a companion, and that, if they could range the world together, he should have nothing further to desire.

In a few days the water was discharged, and the ground dried. The prince and Im-lac then walked out together, to converse without the notice of the rest. The prince, whose thoughts were always on the wing, as he passed by the gate, said, with a countenance of sorrow, "Why art thou so strong, and why is man so weak?"

"Man is not weak," answered his companion; "knowledge is more than equivalent to force. The master of mechanics laughs at strength. I can burst the gate, but cannot do it secretly. Some other expedient must be tried."

As they were walking on the side of the mountain, they observed that the cones, which the rain had driven from their burrows, had taken shelter among the bushes, and formed holes behind them, tending upwards in an oblique line. "It has been the opinion of antiquity," said Im-lac, "that human reason borrowed many arts from the instinct of animals; let us, therefore, not think ourselves degraded by learning from the cony. We may escape by piercing the mountain in the same direction. We will begin where the summit hangs over the middle part, and labour upward till we shall issue out beyond the prominence."

The eyes of the prince, when he heard this proposal, sparkled with joy. The execution was easy, and the success certain.

No time was now lost. They hastened early in the morning to choose a place proper for their mine. They clambered with great fatigue among crags and brambles, and returned without having discovered any part that favoured their design. The second and the third day were spent in the same manner, and with the same frustration. But on the fourth they found a small cavern, concealed by a thicket, where they resolved to make their experiment.

Im-lac procured instruments proper to hew stone and remove earth, and they fell to their work on the next day with more eagerness than vigour. They were presently exhausted by their efforts, and sat down to pant upon the grass. The prince, for a moment, appeared to be discouraged. "Sir," said his companion, "practice will enable us to continue our labour for a longer time: mark, however, how far we have advanced, and ye will find that our toil will sometime have an end. Great works are performed not by strength, but perseverance: yonder palace was raised by single stones, yet you see its height and speciousness. He that shall walk with vigour three hours a day, will pass

in seven years a space equal to the circumference of the globe."

They returned to their work day after day, and, in a short time, found a fissure in the rock, which enabled them to pass far with very little obstruction. This Rasselas considered as a good omen. "Do not disturb your mind," said Im-lac, "with other hopes or fears than reason may suggest: if you are pleased with prognostics of good, you will be terrified likewise with tokens of evil, and your whole life will be a prey to superstition. Whatever facilitates our work is more than an omen; it is a cause of success. This is one of those pleasing surprises which often happen to active resolution. Many things difficult to design prove easy to performance."

#### CHAPTER XIV.

##### *Rasselas and Im-lac receive an unexpected Visit.*

THEY had now wrought their way to the middle, and solaced their toil with the approach of liberty, when the prince, coming down to refresh himself with air, found his sister Nekayah standing at the mouth of the cavity. He started, and stood confused, afraid to tell his design, and yet hopeless to conceal it. A few moments determined him to repose on her fidelity, and secure her secrecy by a declaration without reserve.

"Do not imagine," said the princess, "that I came hither as a spy: I had long observed from my window that you and Im-lac directed your walk every day towards the same point, but I did not suppose you had any better reason for the preference than a cooler shade, or more fragrant bank; nor followed you with any other design than to partake of your conversation. Since, then, not suspicion but fondness has detected you, let me not lose the advantage of my discovery. I am equally weary of confinement with yourself, and not less desirous of knowing what is done or suffered in the world. Permit me to fly with you from this tasteless tranquillity, which will yet grow more loathsome when you have left me. You may deny me to accompany you, but cannot hinder me from following."

The prince, who loved Nekayah above his other sisters, had no inclination to refuse her request, and grieved that he had lost an opportunity of showing his confidence by a voluntary communication. It was therefore agreed, that she should leave the valley with them; and that, in the mean time, she should watch lest any other straggler should, by chance or curiosity, follow them to the mountain.

At length their labour was at an end: they saw light beyond the prominence, and, issuing to the top of the mountain, beheld the Nile, yet a narrow current, wandering beneath them.

The prince looked round with rapture, anticipated all the pleasures of travel, and in thought was already transported beyond his father's dominions. Imlac, though very joyful at his escape, had less expectation of pleasure in the world, which he had before tried, and of which he had been weary.

Rasselas was so much delighted with a wider horizon, that he could not soon be persuaded to return into the valley. He informed his sister that the way was now open, and that nothing now remained but to prepare for their departure.

---

## CHAPTER XV.

*The Prince and Princess leave the Valley, and see many Wonders.*

THE prince and princess had jewels sufficient to make them rich whenever they came into a place of commerce, which, by Imlac's direction, they hid in their clothes, and, on the night of the next full moon, all left the valley. The princess was followed only by a single favourite, who did not know whither she was going.

They clambered through the cavity, and began to go down on the other side. The princess and her maid turned their eyes toward every part, and seeing nothing to bound their prospect, considered themselves in danger of being lost in a dreary vacuity. They stopped and trembled. "I am almost afraid," said the princess, "to begin a journey, of which I cannot perceive an end, and to venture into this immense plain, where I may be approached on every side by men whom I never saw." The prince felt nearly the same emotions, though he thought it more manly to conceal them.

Imlac smiled at their terrors, and encouraged them to proceed; but the princess continued irresolute till she had been imperceptibly drawn forward too far to return.

In the morning they found some shepherds in the field, who set some milk and fruits before them. The princess wondered that she did not see a palace ready for her reception, and a table spread with delicacies; but being faint and hungry, she drank the milk and ate the fruits, and thought them of a higher flavour than the products of the valley.

They travelled forward by easy journeys, being all unaccustomed to toil and difficulty, and knowing that, though they might be missed, they could not be pursued. In a few days they came into a more populous region, where

Imlac was diverted with the admiration which his companions expressed at the diversity of manners, stations, and employments. Their dress was such as might not bring upon them the suspicion of having any thing to conceal; yet the prince, wherever he came, expected to be obeyed, and the princess was frightened, because those who came into her presence did not prostrate themselves. Imlac was forced to observe them with great vigilance, lest they should betray their rank by their unusual behaviour, and detained them several weeks in the first village, to accustom them to the sight of common mortals.

By degrees the royal wanderers were taught to understand that they had for a time laid aside their dignity, and were to expect only such regard as liberality and courtesy could procure. And Imlac, having, by many admonitions, prepared them to endure the tumults of a port, and the ruggedness of the commercial race, brought them down to the sea-coast.

The prince and his sister, to whom every thing was new, were gratified equally at all places, and therefore remained for some months at the port without any inclination to pass further. Imlac was content with their stay, because he did not think it safe to expose them, unpractised in the world, to the hazards of a foreign country.

At last he began to fear lest they should be discovered, and proposed to fix a day for their departure. They had no pretensions to judge for themselves, and referred the whole scheme to his direction. He therefore took passage in a ship to Suez, and when the time came, with great difficulty prevailed on the princess to enter the vessel. They had a quick and prosperous voyage; and from Suez travelled by land to Cairo.

---

## CHAPTER XVI.

*They enter Cairo, and find every Man happy.*

As they approached the city, which filled the strangers with astonishment, "This," said Imlac to the prince, "is the place where travellers and merchants assemble from all corners of the earth. You will here find men of every character, and every occupation. Commerce is here honourable: I will act as a merchant, and you shall live as strangers, who have no other end of travel than curiosity; it will soon be observed that we are rich: our reputation will procure us access to all whom we shall desire to know; you shall see all the conditions of humanity, and enable yourselves at leisure to make your choice of life."

They now entered the town, stunned by the

noise, and offended by the crowds. Instruction had not yet so prevailed over habit, but that they wondered to see themselves pass undistinguished along the streets, and met by the lowest of the people without reverence or notice. The princess could not at first bear the thought of being levelled with the vulgar, and for some time continued in her chamber, where she was served by her favourite, Pekuah, as in the palace of the valley.

Imlac, who understood traffic, sold part of the jewels the next day, and hired a house, which he adorned with such magnificence, that he was immediately considered as a merchant of great wealth. His politeness attracted many acquaintance, and his generosity made him courted by many dependants. His companions, not being able to mix in the conversation, could make no discovery of their ignorance or surprise, and were gradually initiated in the world as they gained knowledge of the language.

The prince had, by frequent lectures, been taught the use and nature of money; but the ladies could not, for a long time, comprehend what the merchants did with small pieces of gold and silver, or why things of so little use should be received as an equivalent to the necessities of life.

They studied the language two years, while Imlac was preparing to set before them the various ranks and conditions of mankind. He grew acquainted with all who had any thing uncommon in their fortune or conduct. He frequented the voluptuous and the frugal, the idle and the busy, the merchants and the men of learning.

The prince now being able to converse with fluency, and having learned the caution necessary to be observed in his intercourse with strangers, began to accompany Imlac to places of resort, and to enter into all assemblies, that he might make his *choice of life*.

For some time he thought choice needless, because all appeared to him really happy. Wherever he went he met gayety and kindness, and heard the song of joy or the laugh of carelessness. He began to believe that the world overflowed with universal plenty, and that nothing was withheld either from want or merit; that every hand showered liberality, and every heart melted with benevolence: "and who then," says he, "will be suffered to be wretched?"

Imlac permitted the pleasing delusion, and was unwilling to crush the hope of inexperience: till one day, having sat a while silent, "I know not," said the prince, "what can be the reason that I am more unhappy than any of our friends. I see them perpetually and unalterably cheerful, but feel my own mind restless and uneasy. I am unsatisfied with those pleasures which I seem most to court. I live in the crowds of joy-

lity, not so much to enjoy company as to shun myself, and am only loud and merry to conceal my sadness."

"Every man," said Imlac, "may, by examining his own mind, guess what passes in the minds of others: when you feel that your own gayety is counterfeit, it may justly lead you to suspect that of your companions not to be sincere. Envy is commonly reciprocal. We are long before we are convinced that happiness is never to be found, and each believes it possessed by others, to keep alive the hope of obtaining it for himself. In the assembly, where you passed the last night, there appeared such sprightliness of air, and volatility of fancy, as might have suited beings of a higher order, formed to inhabit serener regions, inaccessible to care or sorrow: yet, believe me, prince, there was not one who did not dread the moment when solitude should deliver him to the tyranny of reflection."

"This," said the prince, "may be true of others, since it is true of me; yet, whatever be the general infelicity of man, one condition is more happy than another, and wisdom surely directs us to take the least evil in the *choice of life*."

"The causes of good and evil," answered Imlac, "are so various and uncertain, so often entangled with each other, so diversified by various relations, and so much subject to accidents which cannot be foreseen, that he who would fix his condition upon incontestible reasons of preference must live and die inquiring and deliberating."

"But surely," said Rasselas, "the wise men, to whom we listen with reverence and wonder, chose that mode of life for themselves which they thought most likely to make them happy."

"Very few," said the poet, "live by choice. Every man is placed in the present condition by causes which acted without his foresight, and with which he did not always willingly co-operate; and therefore you will rarely meet one who does not think the lot of his neighbour better than his own."

"I am pleased to think," said the prince, "that my birth has given me at least one advantage over others, by enabling me to determine for myself. I have here the world before me; I will review it at leisure: surely happiness is somewhere to be found."

## CHAPTER XVII.

*The Prince associates with young Men of Spirit and Gayety.*

RASSELAS rose next day, and resolved to begin his experiments upon life. "Youth," cried he, "is the time of gladness: I will join myself to

the young men, whose only business is to gratify their desires, and whose time is all spent in a succession of enjoyments."

To such societies he was readily admitted; but a few days brought him back weary and disgusted. Their mirth was without images, their laughter without motive; their pleasures were gross and sensual, in which the mind had no part; their conduct was at once wild and mean: they laughed at order and at law, but the frown of power dejected, and the eye of wisdom abashed them.

The prince soon concluded that he should never be happy in a course of life of which he was ashamed. He thought it unsuitable to a reasonable being to act without a plan, and to be sad or cheerful only by chance. "Happiness," said he, "must be something solid and permanent, without fear and without uncertainty."

But his young companions had gained so much of his regard by their frankness and courtesy, that he could not leave them without warning and remonstrance. "My friends," said he, "I have seriously considered our manners and our prospects, and find that we have mistaken our own interest. The first years of man must make provision for the last. He that never thinks, never can be wise. Perpetual levity must end in ignorance; and intemperance, though it may fire the spirits for an hour, will make life short or miserable. Let us consider that youth is of no long duration, and that in mature age, when the enchantments of fancy shall cease, and phantoms of delight dance no more about us, we shall have no comforts but the esteem of wise men, and the means of doing good. Let us, therefore, stop, while to stop is in our power: let us live as men who are sometime to grow old, and to whom it will be the most dreadful of all evils to count their past years by follies, and to be reminded of their former luxuriance of health only by the maladies which riot has produced."

They stared awhile in silence one upon another, and, at last, drove him away by a general chorus of continued laughter.

The consciousness that his sentiments were just, and his intention kind, was scarcely sufficient to support him against the horror of derision. But he recovered his tranquillity, and pursued his search.

## CHAPTER XVIII.

*The Prince finds a wise and happy man.*

As he was one day walking in the street, he saw a spacious building, which all were, by the open doors, invited to enter; he followed the

stream of people, and found it a hall or school of declamation, in which professors read lectures to their auditory. He fixed his eye upon a sage raised above the rest, who discoursed with great energy on the government of the passions. His look was venerable, his action graceful, his pronunciation clear, and his diction elegant. He showed, with great strength of sentiment, and variety of illustration, that human nature is degraded and debased, when the lower faculties predominate over the higher; that when fancy, the parent of passion, usurps the dominion of the mind, nothing ensues but the natural effect of unlawful government, perturbation, and confusion; that she betrays the fortresses of the intellect to rebels, and excites her children to sedition against their lawful sovereign. He compared reason to the sun, of which the light is constant, uniform, and lasting; and fancy to a meteor, of bright but transitory lustre, irregular in its motion and delusive in its direction.

He then communicated the various precepts given from time to time for the conquest of passion, and displayed the happiness of those who had obtained the important victory, after which man is no longer the slave of fear, nor the fool of hope; is no more emaciated by envy, inflamed by anger, emasculated by tenderness, or depressed by grief; but walks on calmly through the tumults or privacies of life, as the sun pursues alike his course through the calm or the stormy sky.

He enumerated many examples of heroes immovable by pain or pleasure, who looked with indifference on those modes or accidents to which the vulgar give the names of good and evil. He exhorted his hearers to lay aside their prejudices, and arm themselves against the shafts of malice or misfortune, by invulnerable patience: concluding, that this state only was happiness, and that this happiness was in every one's power.

Rasselas listened to him with the veneration due to the instructions of a superior being, and, waiting for him at the door, humbly implored the liberty of visiting so great a master of true wisdom. The lecturer hesitated a moment, when Rasselas put a purse of gold into his hand, which he received with a mixture of joy and wonder.

"I have found," said the prince, at his return to Imrac, "a man who can teach all that is necessary to be known; who, from the unshaken throne of rational fortitude, looks down on the scenes of life changing beneath him. He speaks, and attention watches his lips. He reasons, and conviction closes his periods. This man shall be my future guide: I will learn his doctrines, and imitate his life."

"Be not too hasty," said Imrac, "to trust, or to admire, the teachers of morality: they discourse like angels, but they live like men."

Rasselas, who could not conceive how any

man could reason so forcibly without feeling the cogency of his own arguments, paid his visit in a few days, and was denied admission. He had now learned the power of money, and made his way by a piece of gold to the inner apartment, where he found the philosopher in a room half darkened, with his eyes misty, and his face pale. "Sir," said he, "you are come at a time when all human friendship is useless; what I suffer cannot be remedied, what I have lost cannot be supplied. My daughter, my only daughter, from whose tenderness I expected all the comforts of my age, died last night of a fever. My views, my purposes, my hopes are at an end: I am now a lonely being, disunited from society."

"Sir," said the prince, "mortality is an event by which a wise man can never be surprised: we know that death is always near, and it should therefore always be expected."—"Young man," answered the philosopher, "you speak like one that has never felt the pangs of separation." "Have you then forgot the precepts," said Rasselas, "which you so powerfully enforced? Has wisdom no strength to arm the heart against calamity? Consider that external things are naturally variable, but truth and reason are always the same." "What comfort," said the mourner, "can truth and reason afford me?—of what effect are they now, but to tell me, that my daughter will not be restored?"

The prince, whose humanity would not suffer him to insult misery with reproof, went away, convinced of the emptiness of rhetorical sounds, and the inefficacy of polished periods and studied sentences.

## CHAPTER XIX.

### *A Glimpse of Pastoral Life.*

He was still eager upon the same inquiry; and having heard of a hermit, that lived near the lowest cataract of the Nile, and filled the whole country with the fame of his sanctity, resolved to visit his retreat, and inquire whether that felicity, which public life could not afford, was to be found in solitude; and whether a man, whose age and virtue made him venerable, could teach any peculiar art of shunning evils, or enduring them.

Imlac and the princess agreed to accompany him; and, after the necessary preparations, they began their journey. Their way lay through the fields, where shepherds tended their flocks, and the lambs were playing upon the pasture. "This," said the poet, "is the life which has been often celebrated for its innocence and quiet; let us pass the heat of the day among the shep-

herds' tents, and know whether all our searches are not to terminate in pastoral simplicity."

The proposal pleased them, and, they induced the shepherds, by small presents and familiar questions, to tell the opinion of their own state: they were so rude and ignorant, so little able to compare the good with the evil of the occupation, and so indistinct in their narratives and descriptions, that very little could be learned from them. But it was evident that their hearts were cankered with discontent; that they considered themselves as condemned to labour for the luxury of the rich, and looked up with stupid malevolence towards those that were placed above them.

The princess pronounced with vehemence, that she would never suffer these envious savages to be her companions, and that she should not soon be desirous of seeing any more specimens of rustic happiness; but could not believe that all the accounts of primeval pleasures were fabulous, and was in doubt whether life had any thing that could be justly preferred to the placid gratifications of fields and woods. She hoped that the time would come, when, with a few virtuous and elegant companions, she should gather flowers planted by her own hands, fondle the lambs of her own ewe, and listen without care, among brooks and breezes, to one of her maidens reading in the shade.

## CHAPTER XX.

### *The Danger of Prosperity.*

On the next day they continued their journey, till the heat compelled them to look round for shelter. At a small distance they saw a thick wood, which they no sooner entered than they perceived that they were approaching the habitations of men. The shrubs were diligently cut away to open walks where the shades were darkest; the boughs of opposite trees were artificially interwoven, seats of flowery turf were raised in vacant spaces, and a rivulet, that waned along the side of a winding path, had its banks sometimes opened into small basins, and its stream sometimes obstructed by little mounds of stone heaped together to increase its murmurs.

They passed slowly through the wood, delighted with such unexpected accommodations, and entertained each other with conjecturing what, or who, he could be, that in those rude and unfrequented regions had leisure and art for such harmless luxury.

As they advanced they heard the sound of music, and saw youths and virgins dancing in the grove; and, going still farther, beheld a

stately palace built upon a hill, surrounded with woods. The laws of eastern hospitality allowed them to enter, and the master welcomed them like a man liberal and wealthy.

He was skilful enough in appearances soon to discern that they were no common guests, and spread his table with magnificence. The eloquence of Imlac caught his attention, and the lofty courtesy of the princess excited his respect. When they offered to depart, he entreated their stay, and was the next day more unwilling to dismiss them than before. They were easily persuaded to stop, and civility grew up in time to freedom and confidence.

The prince now saw all the domestics cheerful, and all the face of nature smiling round the place, and could not forbear to hope that he should find here what he was seeking: but when he was congratulating the master upon his possessions, he answered with a sigh, "My condition has indeed the appearance of happiness, but appearances are delusive. My prosperity puts my life in danger; the Bassa of Egypt is my enemy, incensed only by my wealth and popularity. I have been hitherto protected against him by the princes of the country: but, as the favour of the great is uncertain, I know not how soon my defenders may be persuaded to share the plunder with the Bassa. I have sent my treasures into a distant country, and, upon the first alarm, am prepared to follow them. Then will my enemies riot in my mansion, and enjoy the gardens which I have planted."

They all joined in lamenting his danger, and deprecating his exile; and the princess was so much disturbed with the tumult of grief and indignation, that she retired to her apartment. They continued with their kind inviter a few days longer, and then went to find the hermit.

## CHAPTER XXI.

### *The Happiness of Solitude. The Hermit's History.*

THEY came, on the third day, by the direction of the peasants, to the hermit's cell: it was a cavern in the side of a mountain, overshadowed with palm trees: at such a distance from the cataract, that nothing more was heard than a gentle uniform murmur, such as composes the mind to pensive meditation, especially when it was assisted by the wind whistling among the branches. The first rude essay of nature had been so much improved by human labour, that the cave contained several apartments appropriated to different uses, and often afforded lodging to travellers, whom darkness or tempests happened to overtake.

The hermit sat on a bench at the door, to en-

joy the coolness of the evening. On one side lay a book with pens and paper, on the other mechanical instruments of various kinds. As they approached him unregarded, the princess observed that he had not the countenance of a man that had found or could teach the way to happiness.

They saluted him with great respect, which he repaid like a man not unaccustomed to the forms of courts. "My children," said he, "if you have lost your way, you shall be willingly supplied with such conveniences for the night as this cavern will afford. I have all that nature requires, and you will not expect delicacies in a hermit's cell."

They thanked him; and, entering, were pleased with the neatness and regularity of the place. The hermit set flesh and wine before them, though he fed only upon fruits and water. His discourse was cheerful without levity, and pious without enthusiasm. He soon gained the esteem of his guests, and the princess repented her hasty censure.

At last Imlac began thus: "I do not now wonder that your reputation is so far extended: we have heard at Cairo, of your wisdom, and came hither to implore your direction for this young man and maiden in the *choice of life*."

"To him that lives well," answered the hermit, "every form of life is good; nor can I give any other rule for choice, than to remove all apparent evil."

"He will most certainly remove from evil," said the prince, "who shall devote himself to that solitude which you have recommended by your example."

"I have indeed lived fifteen years in solitude," said the hermit, "but have no desire that my example should gain any imitators. In my youth I professed arms, and was raised by degrees to the highest military rank. I have traversed wide countries at the head of my troops, and seen many battles and sieges. At last, being disgusted by the preferments of a younger officer, and feeling that my vigour was beginning to decay, I resolved to close my life in peace, having found the world full of snares, discord, and misery. I had once escaped from the pursuit of the enemy by the shelter of this cavern, and therefore chose it for my final residence. I employed artificers to form it into chambers, and stored it with all that I was likely to want.

"For some time after my retreat, I rejoiced like a tempest-beaten sailor at his entrance into the harbour, being delighted with the sudden change of the noise and hurry of war to stillness and repose. When the pleasure of novelty went away, I employed my hours in examining the plants which grow in the valley, and the minerals which I collected from the rocks. But that inquiry is now grown tasteless and

irksome. I have been for some time unsettled and distracted: my mind is disturbed with a thousand perplexities of doubt, and vanities of imagination, which hourly prevail upon me, because I have no opportunities of relaxation or diversion. I am sometimes ashamed to think that I could not secure myself from vice but by retiring from the exercise of virtue, and begin to suspect that I was rather impelled by resentment than led by devotion into solitude. My fancy riots in scenes of folly; and I lament that I have lost so much, and have gained so little. In solitude, if I escape the example of bad men, I want likewise the counsel and conversation of the good. I have been long comparing the evils with the advantages of society, and resolve to return into the world to-morrow. The life of a solitary man will be certainly miserable, but not certainly devout."

They heard his resolution with surprise, but, after a short pause, offered to conduct him to Cairo. He dug up a considerable treasure which he had hid among the rocks, and accompanied them to the city, on which, as he approached it, he gazed with rapture.

## CHAPTER XXII.

### *The Happiness of a Life led according to Nature.*

RASSELAS went often to an assembly of learned men, who met at stated times to unbend their minds, and compare their opinions. Their manners were somewhat coarse, but their conversation was instructive, and their disputations acute, though sometimes too violent, and often continued till neither controvertist remembered upon what question they began. Some faults were almost general among them: every one was pleased to hear the genius or knowledge of another depreciated.

In this assembly Rasselas was relating his interview with the hermit, and the wonder with which he heard him censure a course of life which he had so deliberately chosen, and so laudably followed. The sentiments of the hearers were various. Some were of opinion, that the folly of his choice had been justly punished by condemnation to perpetual perseverance. One of the youngest among them, with great vehemence, pronounced him a hypocrite. Some talked of the right of society to the labour of individuals, and considered retirement as a desertion of duty. Others readily allowed, that there was a time when the claims of the public were satisfied, and when a man might properly sequester himself, to review his life, and purify his heart.

One, who appeared more affected with the narrative than the rest, thought it likely, that

the hermit would, in a few years, go back to his retreat, and, perhaps, if shame did not restrain, or death intercept him, return once more from his retreat into the world. "For the hope of happiness," said he, "is so strongly impressed, that the longest experience is not able to efface it. Of the present state, whatever it be, we feel, and are forced to confess, the misery; yet, when the same state is again at a distance, imagination paints it as desirable. But the time will surely come when desire will no longer be our torment, and no man shall be wretched but by his own fault."

"This," said a philosopher, who had heard him with tokens of great impatience, "is the present condition of a wise man. The time is already come, when none are wretched but by their own fault. Nothing is more idle than to inquire after happiness, which nature has kindly placed within our reach. The way to be happy, is to live according to nature, in obedience to that universal and unalterable law with which every heart is originally impressed; which is not written on it by precept, but engraven by destiny; not instilled by education, but infused at our nativity. He that lives according to nature will suffer nothing from the delusions of hope or importunities of desire; he will receive and reject with equability of temper; and act or suffer as the reason of things shall alternately prescribe. Other men may amuse themselves with subtle definitions, or intricate ratiocination. Let them learn to be wise by easier means: let them observe the hind of the forest, and the linnet of the grove: let them consider the life of animals, whose motions are regulated by instinct; they—obey their guide, and are happy. Let us, therefore, at length, cease to dispute, and learn to live: throw away the encumbrance of precepts, which they who utter them with so much pride and pomp do not understand, and carry with us this simple and intelligible maxim. That deviation from nature is deviation from happiness."

When he had spoken, he looked round him with a placid air, and enjoyed the consciousness of his own beneficence. "Sir," said the prince, with great modesty, "as I, like all the rest of mankind, am desirous of felicity, my closest attention has been fixed upon your discourse: I doubt not the truth of a position which a man so learned has so confidently advanced. Let me only know what it is to live according to nature."

"When I find young men so humble and so docile," said the philosopher, "I can deny them no information which my studies have enabled me to afford. To live according to nature, is to act always with due regard to the fitness arising from the relations and qualities of causes and effects; to concur with the great and unchangeable scheme of universal felicity; to act

operate with the general disposition and tendency of the present system of things."

The prince soon found that this was one of the sages whom he should understand less as he heard him longer. He therefore bowed and was silent; and the philosopher, supposing him satisfied, and the rest vanquished, rose up and departed with the air of a man that had co-operated with the present system.

### CHAPTER XXIII.

*The Prince and his Sister divide between them the Work of Observation.*

RASSELAS returned home full of reflections, doubting how to direct his future steps. Of the way to happiness he found the learned and simple equally ignorant; but, as he was yet young, he flattered himself that he had time remaining for more experiments, and farther inquiries.—He communicated to Imlac his observations and his doubts, but was answered by him with new doubts, and remarks that gave him no comfort. He therefore discoursed more frequently and freely with his sister, who had yet the same hope with himself, and always assisted him to give some reason why, though he had been hitherto frustrated, he might succeed at last.

"We have hitherto," said she, "known but little of the world; we have never yet been either great or mean. In our own country, though we had royalty, we had no power; and in this we have not yet seen the private recesses of domestic peace. Imlac favours not our search, lest we should in time find him mistaken. We will divide the task between us: you shall try what is to be found in the splendour of courts, and I will range the shades of humbler life. Perhaps command and authority may be the supreme blessings, as they afford the most opportunities of doing good: or, perhaps, what this world can give may be found in the modest habitations of middle fortune: too low for great designs, and too high for penury and distress."

### CHAPTER XXIV.

*The Prince examines the Happiness of high Stations.*

RASSELAS applauded the design, and appeared next day with a splendid retinue at the court of the Bassa. He was soon distinguished for his magnificence, and admitted, as a prince whose curiosity had brought him from distant countries, to an intimacy with the great officers, and frequent conversation with the Bassa himself.

He was at first inclined to believe, that the man must be pleased with his own condition, whom all approached with reverence, and heard with obedience, and who had the power to extend his edicts to a whole kingdom.—"There can be no pleasure," said he, "equal to that of feeling at once the joy of thousands all made happy by wise administration. Yet, since, by the law of subordination, this sublime delight can be in one nation but the lot of one, it is surely reasonable to think that there is some satisfaction more popular and accessible, and that millions can hardly be subjected to the will of a single man, only to fill his particular breast with incommunicable content."

These thoughts were often in his mind, and he found no solution of the difficulty. But as presents and civilities gained him more familiarity, he found that almost every man who stood high in employment hated all the rest, and was hated by them, and that their lives were a continual succession of plots and detections, stratagems and escapes, faction and treachery. Many of those who surrounded the Bassa were sent only to watch and report his conduct: every tongue was muttering censure, and every eye was searching for a fault.

At last the letters of revocation arrived, the Bassa was carried in chains to Constantinople, and his name was mentioned no more.

"What are we now to think of the prerogatives of power?" said Rasselas to his sister: "is it without any efficacy to good? or, is the subordinate degree only dangerous, and the supreme safe and glorious? Is the Sultan the only happy man in his dominions? or is the Sultan himself subject to the torments of suspicion, and the dread of enemies?"

In a short time the second Bassa was deposed. The Sultan that had advanced him was murdered by the Janizaries, and his successor had other views or different favourites.

### CHAPTER XXV.

*The Princess pursues her Inquiry with more Diligence than Success.*

THE princess, in the meantime, insinuated herself into many families: for there are few doors through which liberality, joined with good-humour, cannot find its way. The daughters of many houses were airy and cheerful; but Nekayah had been too long accustomed to the conversation of Imlac and her brother, to be much pleased with childish levity and prattle which had no meaning. She found their thoughts narrow, their wishes low, and their merriment often artificial. Their pleasures, poor as they were, could not be preserved pure,

but were imbibed by petty competitions and worthless emulation. They were always jealous of the beauty of each other; of a quality to which solicitude can add nothing, and from which detraction can take nothing away. Many were in love with triflers like themselves, and many fancied that they were in love when in truth they were only idle. Their affection was not fixed on sense or virtue, and therefore seldom ended but in vexation. Their grief, however, like their joy, was transient; every thing floated in their mind unconnected with the past or future, so that one desire easily gave way to another, as a second stone, cast into the water, effaces and confounds the circles of the first.

With these girls she played as with inoffensive animals, and found them proud of her countenance, and weary of her company.

But her purpose was to examine more deeply, and her affability easily persuaded the hearts that were swelling with sorrow to discharge their secrets in her ear; and those whom hope flattered, or prosperity delighted, often courted her to partake their pleasure.

The princess and her brother commonly met in the evening in a private summer-house on the banks of the Nile, and related to each other the occurrences of the day. As they were sitting together, the princess cast her eyes upon the river that flowed before her. "Answer," said she, "great father of waters, thou that rollest thy floods through eighty nations, to the invocations of the daughter of thy native king: tell me if thou waterest, through all thy course, a single habitation from which thou dost not hear the murmurs of complaint."

"You are then," said Rasselas, "not more successful in private houses than I have been in courts." "I have, since the last partition of our provinces," said the princess, "enabled myself to enter familiarly into many families, where there was the fairest show of prosperity and peace, and know not one house that is not haunted by some fury that destroys their quiet."

"I did not seek ease among the poor, because I concluded that there it could not be found. But I saw many poor whom I had supposed to live in affluence. Poverty has, in large cities, very different appearances; it is often concealed in splendour, and often in extravagance. It is the care of a very great part of mankind to conceal their indigence from the rest: they support themselves by temporary expedients, and every day is lost in contriving for the morrow."

"This, however, was an evil, which, though frequent, I saw with less pain, because I could relieve it. Yet some have refused my bounties; more offended with my quickness to detect their wants, than pleased with my readiness to succour them: and others, whose exigences compelled them to admit my kindness, have never been able to forgive their benefactress. Many,

however, have been sincerely grateful without the ostentation of gratitude, or the hope of other favours."

## CHAPTER XXVI.

*The Princess continues her Remarks upon private Life.*

NEKATAN, perceiving her brother's attention fixed, proceeded in her narrative.

"In families, where there is or is not poverty, there is commonly discord: if a kingdom be, as Imlac tells us, a great family, a family likewise is a little kingdom, torn with factions and exposed to revolutions. An unpractised observer expects the love of parents and children to be constant and equal: but this kindness seldom continues beyond the years of infancy: in a short time the children become rivals to their parents. Benefits are allowed by reproaches, and gratitude debased by envy."

"Parents and children seldom act in concert; each child endeavours to appropriate the esteem or fondness of the parents; and the parents, with yet less temptation, betray each other to their children; thus some place their confidence in the father, and some in the mother, and by degrees the house is filled with artifices and feuds."

"The opinions of children and parents, of the young and the old, are naturally opposite, by the contrary effects of hope and despondence, of expectation and experience, without crime or folly on either side. The colours of life in youth and age appear different, as the face of nature in spring and winter. And how can children credit the assertions of parents, which their own eyes show them to be false?"

"Few parents act in such a manner as much to enforce their maxims by the credit of their lives. The old man trusts wholly to slow contrivance and gradual progression; the youth expects to force his way by genius, vigour, and precipitance. The old man pays regard to riches, and the youth reverences virtue. The old man deifies prudence: the youth commits himself to magnanimity and chance. The young man, who intends no ill, believes that none is intended, and therefore acts with openness and candour: but his father, having suffered the injuries of fraud, is impelled to suspect, and too often allured to practise it. Age looks with anger on the temerity of youth, and youth with contempt on the scrupulosity of age. Thus parents and children, for the greatest part, live on, to love less and less: and, if those whom nature has thus closely united are the torments of each other, where shall we look for tenderness and consolation?"

"Surely," said the prince, "you must have been unfortunate in your choice of acquaintance: I am unwilling to believe that the most tender of all relations is thus impeded in its effects by natural necessity."

"Domestic discord," answered she, "is not inevitably and fatally necessary; but yet it is not easily avoided. We seldom see that a whole family is virtuous: the good and the evil cannot well agree; and the evil can yet less agree with one another: even the virtuous fall sometimes to variance, when their virtues are of different kinds, and tending to extremes. In general, those parents have most reverence who most deserve it; for he that lives well cannot be despised."

"Many other evils infest private life. Some are the slaves of servants whom they have trusted with their affairs. Some are kept in continual anxiety by the caprice of rich relations, whom they cannot please, and dare not offend. Some husbands are imperious, and some wives perverse; and, as it is always more easy to do evil than good, though the wisdom or virtue of one can very rarely make many happy, the folly or vice of one may make many miserable."

"If such be the general effect of marriage," said the prince, "I shall for the future think it dangerous to connect my interest with that of another, lest I should be unhappy by my partner's fault."

"I have met," said the princess, "with many who live single for that reason; but I never found that their prudence ought to raise envy. They dream away their time without friendship, without fondness, and are driven to rid themselves of the day, for which they have no use, by childish amusements or vicious delights. They act as beings under the constant sense of some known inferiority, that fills their minds with rancour, and their tongues with censure. They are peevish at home, and malevolent abroad; and, as the outlaws of human nature, make it their business and their pleasure to disturb that society which debars them from its privileges. To live without feeling or exciting sympathy, to be fortunate without adding to the felicity of others, or afflicted without tasting the balm of pity, is a state more gloomy than solitude: it is not retreat, but exclusion from mankind. Marriage has many pains, but celibacy has no pleasures."

"What then is to be done?" said Rasselas; "the more we inquire the less we can resolve. Surely he is most likely to please himself that has no other inclination to regard."

## CHAPTER XXVII.

### *Disquisition upon Greatness.*

THE conversation had a short pause. The prince, having considered his sister's observation, told her, that she had surveyed life with prejudice, and supposed misery where she did not find it. "Your narrative," says he, "throws yet a darker gloom upon the prospects of futurity: the predictions of Imlac were but faint sketches of the evils painted by Nekayah. I have been lately convinced that quiet is not the daughter of grandeur, or of power: that her presence is not to be bought by wealth, nor enforced by conquest. It is evident, that as any man acts in a wider compass, he must be more exposed to opposition from enmity, or miscarriage from chance: whoever has many to please or to govern must use the ministry of many agents, some of whom will be wicked, and some ignorant; by some he will be misled, and by others betrayed. If he gratifies one, he will offend another; those that are not favoured will think themselves injured; and, since favours can be conferred but upon few, the greater number will be always discontented."

"The discontent," said the princess, "which is thus unreasonable, I hope that I shall always have spirit to despise, and you power to repress."

"Discontent," answered Rasselas, "will not always be without reason under the most just and vigilant administration of public affairs. None, however attentive, can always discover that merit which indigence or faction may happen to obscure; and none, however powerful, can always reward it. Yet, he that sees inferior desert advanced above him will naturally impute that preference to partiality or caprice; and, indeed, it can scarcely be hoped that any man, however magnanimous by nature, or exalted by condition, will be able to persist forever in fixed and inexorable justice of distribution: he will sometimes indulge his own affections, and sometimes those of his favourites: he will permit some to please him who can never serve him: he will discover in those whom he loves qualities which in reality they do not possess; and to those, from whom he receives pleasure, he will in his turn endeavour to give it. Thus will recommendations sometimes prevail which were purchased by money, or by the more destructive bribery of flattery and servility."

"He that hath much to do will do something wrong, and of that wrong must suffer the consequences; and if it were possible that he should always act rightly, yet when such numbers are to judge of his conduct, the bad will censure and obstruct him by malevolence, and the good, sometimes, by mistake."

"The highest stations cannot therefore hope to be the abodes of happiness, which I would willingly believe to have fled from thrones and palaces, to seats of humble privacy and placid obscurity. For what can hinder the satisfaction, or intercept the expectations, of him whose abilities are adequate to his employments, who sees with his own eyes the whole circuit of his influence, who chooses by his own knowledge all whom he trusts, and whom none are tempted to deceive by hope or fear? Surely he has nothing to do but to love and to be loved, to be virtuous and to be happy."

"Whether perfect happiness would be procured by perfect goodness," said Nekayah, "this world will never afford an opportunity of deciding. But this, at least, may be maintained, that we do not always find visible happiness in proportion to visible virtue. All natural, and almost all political evils, are incident alike to the bad and good: they are confounded in the misery of a famine, and not much distinguished in the fury of a faction; they sink together in a tempest, and are driven together from their country by invaders. All that virtue can afford is quietness of conscience, and a steady prospect of a happier state: this may enable us to endure calamity with patience; but, remember that patience must suppose pain."

## CHAPTER XXVIII.

*Rasselas and Nekayah continue their Conversation.*

"DEAR princess," said Rasselas, "you fall into the common errors of exaggeratory declamation, by producing, in a familiar disquisition, examples of national calamities, and scenes of extensive misery, which are found in books rather than in the world, and which, as they are horrid, are ordained to be rare. Let us not imagine evils which we do not feel, nor injure life by misrepresentations. I cannot bear that querulous eloquence which threatens every city with a siege like that of Jerusalem, that makes famine attend on every flight of locusts, and suspends pestilence on the wing of every blast that issues from the south,

"On necessary and inevitable evils which overwhelm kingdoms at once, all disputation is vain: when they happen, they must be endured. But it is evident, that these bursts of universal distress are more dreaded than felt: thousands and ten thousands flourish in youth, and wither in age, without the knowledge of any other than domestic evils, and share the same pleasures and vexations, whether their kings are mild or cruel, whether the armies of their country pursue their enemies, or retreat before them. While courts are disturbed with intestine competitions,

and ambassadors are negotiating in foreign countries, the smith still plies his anvil, and the husbandman drives his plough forward; the necessities of life are required and obtained, and the successive business of the season continues to make its wonted revolutions.

"Let us cease to consider what, perhaps, may never happen, and what, when it shall happen, will laugh at human speculation. We will not endeavour to modify the motions of the elements, or to fix the destiny of kingdoms. It is our business to consider what beings like us may perform; each labouring for his own happiness, by promoting within his circle, however narrow, the happiness of others.

"Marriage is evidently the dictate of nature; men and women were made to be the companions of each other; and, therefore, I cannot be persuaded but that marriage is one of the means of happiness."

"I know not," said the princess, "whether marriage be more than one of the innumerable modes of human misery. When I see and reckon the various forms of connubial infelicity, the unexpected causes of lasting discord, the diversities of temper, the oppositions of opinion, the rude collisions of contrary desire where both are urged by violent impulses, the obstinate contest of disagreeing virtues where both are supported by consciousness of good intention, I am sometimes disposed to think, with the severer casuists of most nations, that marriage is rather permitted than approved, and that none, but by the instigation of a passion too much indulged, entangle themselves with indissoluble compact."

"You seem to forget," replied Rasselas, "that you have, even now, represented celibacy as less happy than marriage. Both conditions may be bad, but they cannot both be worst. Thus it happens when wrong opinions are entertained, that they mutually destroy each other, and leave the mind open to truth."

"I did not expect," answered the princess, "to hear that imputed to falsehood, which is the consequence only of frailty. To the mind, as to the eye, it is difficult to compare with exactness objects vast in their extent, and various in their parts. When we see or conceive the whole at once, we readily note the discriminations, and decide the preference: but of two systems, of which neither can be surveyed by any human being in its full compass of magnitude and multiplicity of complication, where is the wonder, that, judging of the whole by parts, I am alternately affected by one and the other, as either presses on my memory or fancy? We differ from ourselves just as we differ from each other, when we see only part of the question, as in the multifarious relations of politics and morality; but when we perceive the whole at once, as in numerical computations, all agree in one judgment, and none ever varies in his opinion."

"Let us not add," said the prince, "to the other evils of life the bitterness of controversy, nor endeavour to vie with each other in subtleties of argument. We are employed in a search of which both are equally to enjoy the success, or suffer by the miscarriage. It is therefore fit that we assist each other. You surely conclude too hastily from the infelicity of marriage against its institution; will not the misery of life prove equally that life cannot be the gift of Heaven? The world must be peopled by marriage, or peopled without it."

"How the world is to be peopled," returned Nekayah, "is not my care, and needs not be yours. I see no danger that the present generation should omit to leave successors behind them: we are not now inquiring for the world, but for ourselves."

## CHAPTER XXIX.

### *The Debate on Marriage continued.*

"THE good of the whole," says Rasselas, "is the same with the good of all its parts. If marriage be best for mankind, it must be evidently best for individuals; or a permanent and necessary duty must be the cause of evil, and some must be inevitably sacrificed to the convenience of others. In the estimate which you have made of the two states, it appears that the incommunities of a single life are, in a great measure, necessary and certain, but those of the conjugal state accidental and avoidable. I cannot forbear to flatter myself that prudence and benevolence will make marriage happy. The general folly of mankind is the cause of general complaint. What can be expected but disappointment and repentance from a choice made in the immaturity of youth, in the ardour of desire, without judgment, without foresight, without inquiry after conformity of opinions, similarity of manners, rectitude of judgment, or purity of sentiment?"

"Such is the common process of marriage. A youth and maiden meeting by chance, or brought together by artifice, exchange glances, reciprocate civilities, go home and dream of one another. Having little to divert attention, or diversify thought, they find themselves uneasy when they are apart, and therefore conclude that they shall be happy together. They marry, and discover what nothing but voluntary blindness before had concealed; they wear out life in altercations, and charge nature with cruelty.

"From those early marriages proceeds likewise the rivalry of parents and children: the son is eager to enjoy the world before the father is willing to forsake it, and there is hardly room for once for two generations. The daughter be-

gins to bloom before the mother can be content to fade, and neither can forbear to wish for the absence of the other.

"Surely all these evils may be avoided by that deliberation and delay which prudence prescribes to irrevocable choice. In the variety and jollity of youthful pleasures, life may be well enough supported without the help of a partner. Longer time will increase experience, and wider views will allow better opportunities of inquiry and selection: one advantage at least will be certain; the parents will be visibly older than their children."

"What reason cannot collect," said Nekayah, "and what experiment has not yet taught, can be known only from the report of others. I have been told that late marriages are not eminently happy. This is a question too important to be neglected; and I have often proposed it to those, whose accuracy of remark and comprehensiveness of knowledge made their suffrages worthy of regard. They have generally determined, that it is dangerous for a man and woman to suspend their fate upon each other at a time when opinions are fixed, and habits are established; when friendships have been contracted on both sides, when life has been planned into method, and the mind has long enjoyed the contemplation of its own prospects.

"It is scarcely possible, that two travelling through the world under the conduct of chance should have been both directed to the same path, and it will not often happen that either will quit the track which custom has made pleasing. When the desultory levity of youth has settled into regularity, it is soon succeeded by pride ashamed to yield, or obstinacy delighting to contend. And even though mutual esteem produces mutual desire to please, time itself, as it modifies unchangeably the external mien, determines likewise the direction of the passions, and gives an inflexible rigidity to the manners. Long customs are not easily broken; he that attempts to change the course of his own life very often labours in vain, and how shall we do that for others which we are seldom able to do for ourselves?"

"But surely," interposed the prince, "you suppose the chief motive of choice forgotten or neglected. Whenever I shall seek a wife, it shall be my first question, whether she be willing to be led by reason?"

"Thus it is," said Nekayah, "that philosophers are deceived. There are a thousand familiar disputes which reason never can decide; questions that elude investigation, and make logic ridiculous; cases where something must be done, and where little can be said. Consider the state of mankind, and inquire how few can be supposed to act upon any occasions, whether small or great, with all the reasons of action present to their minds. Wretched would be the

pair, above all names of wretchedness, who should be doomed to adjust by reason, every morning, all the minute detail of a domestic day.

"Those who marry at an advanced age will probably escape the encroachments of their children; but in the diminution of this advantage, they will be likely to leave them, ignorant and helpless, to a guardian's mercy: or if that should not happen, they must at least go out of the world before they see those whom they love best either wise or great.

"From their children, if they have less to fear, they have less also to hope; and they lose, without equivalent, the joys of early love, and the convenience of uniting with manners pliant, and minds susceptible of new impressions, which might wear away their dissimilarities by long cohabitation, as soft bodies, by continual attrition, conform their surfaces to each other.

"I believe it will be found that those who marry late are best pleased with their children, and those who marry early with their partners."

"The union of these two affections," said Rasselas, "would produce all that could be wished. Perhaps there is a time when marriage might unite them; a time neither too early for the father nor too late for the husband."

"Every hour," answered the princess, "confirms my prejudice in favour of the position so often uttered by the mouth of Imlac, 'That Nature sets her gifts on the right hand and on the left.' Those conditions which flatter hope and attract desire are so constituted, that as we approach one we recede from another. There are goods so opposed that we cannot seize both, but, by too much prudence, may pass between them at too great a distance to reach either. This is often the fate of long consideration: he does nothing who endeavours to do more than is allowed to humanity. Flatter not yourself with contraries of pleasure. Of the blessings set before you make your choice, and be content. No man can taste the fruits of autumn, while he is delighting his scent with the flowers of the spring: no man can at the same time fill his cup from the source and from the mouth of the Nile."

### CHAPTER XXX.

*Imlac enters and changes the Conversation.*

HERE Imlac entered, and interrupted them. "Imlac," said Rasselas, "I have been taking from the princess the dismal history of private life, and am almost discouraged from further search."

"It seems to me," said Imlac, "that while

you are making the choice of life, you neglect to live. You wander about a single city, which, however large and diversified, can now afford few novelties, and forget that you are in a country famous among the earliest monarchies for the power and wisdom of its inhabitants; a country where the sciences first dawned that illuminate the world, and beyond which the arts cannot be traced of civil society or domestic life.

"The old Egyptians have left behind them monuments of industry and power before which all European magnificence is confessed to fade away. The ruins of their architecture are the schools of modern builders, and from the wonders which time has spared, we may conjecture, though uncertainly, what it has destroyed."

"My curiosity," said Rasselas, "does not very strongly lead me to survey piles of stone, or mounds of earth; my business is with man. I came hither not to measure fragments of temples, or trace chocked aqueducts, but to look upon the various scenes of the present world."

"The things that are now before us," said the princess, "require attention, and deserve it. What have I to do with the heroes or the monuments of ancient times—with times which never can return, and heroes, whose form of life was different from all that the present condition of mankind requires or allows?"

"To know any thing," returned the poet, "we must know its effects; to see men, we must see their works, that we may learn what reason has dictated, or passion has incited, and find what are the most powerful motives of action. To judge rightly of the present, we must oppose it to the past; for all judgment is comparative, and of the future nothing can be known. The truth is, that no mind is much employed upon the present: recollection and anticipation fill up almost all our moments. Our passions are joy and grief, love and hatred, hope and fear. Of joy and grief, the past is the object; and the future, of hope and fear: even love and hatred respect the past, for the cause must have been before the effect.

"The present state of things is the consequence of the former; and it is natural to inquire what were the sources of the good that we enjoy, or the evils that we suffer. If we act only for ourselves, to neglect the study of history is not prudent: if we are intrusted with the care of others, it is not just. Ignorance, when it is voluntary, is criminal: and he may properly be charged with evil who refused to learn how he might prevent it.

"There is no part of history so generally useful as that which relates to the progress of the human mind, the gradual improvement of reason, the successive advances of science, the vicissitudes of learning and ignorance, which are

the light and darkness of thinking beings, the extinction and resuscitation of arts, and the revolutions of the intellectual world. If accounts of battles and invasions are peculiarly the business of princes, the useful or elegant arts are not to be neglected; those who have kingdoms to govern, have understandings to cultivate.

"Example is always more efficacious than precept. A soldier is formed in war, and a painter must copy pictures. In this, contemplative life has the advantage: great actions are seldom seen, but the labours of art are always at hand for those who desire to know what art has been able to perform.

"When the eye, or the imagination, is struck with any uncommon work, the next transition of an active mind is to the means by which it was performed. Here begins the true use of such contemplation; we enlarge our comprehension by new ideas, and perhaps recover some art lost to mankind, or learn what is less perfectly known in our own country. At least we compare our own with former times, and either rejoice at our improvements, or, what is the first motion towards good, discover our defects."

"I am willing," said the prince, "to see all that can deserve my search."—"And I," said the princess, "shall rejoice to learn something of the manners of antiquity."

"The most pompous monument of Egyptian greatness, and one of the most bulky works of manual industry," said Imlac, "are the pyramids: fabrics raised before the time of history, and of which the earliest narratives afford us only uncertain traditions. Of these the greatest is still standing, very little injured by time."

"Let us visit them to-morrow," said Nekayah: "I have often heard of the pyramids, and shall not rest till I have seen them, within and without, with my own eyes."

## CHAPTER XXXI.

### *They visit the Pyramids.*

THE resolution being thus taken, they set out the next day. They laid tents upon their camels, being resolved to stay among the pyramids till their curiosity was fully satisfied. They travelled gently, turned aside to every thing remarkable, stopped from time to time and conversed with the inhabitants, and observed the various appearances of towns ruined and inhabited, of wild and cultivated nature.

When they came to the great pyramid, they were astonished at the extent of the base, and the height of the top. Imlac explained to them the principles upon which the pyramidal form was chosen for a fabric intended to co-extend its

duration with that of the world: he showed that its gradual diminution gave it such stability, as defeated all the common attacks of the elements, and could scarcely be overthrown by earthquakes themselves, the least resistible of natural violence. A conclusion that should shatter the pyramid would threaten the dissolution of the continent.

They measured all its dimensions, and pitched their tents at its foot. Next day they prepared to enter its interior apartments, and having hired the common guides, climbed up to the first passage; when the favourite of the princess, looking into the cavity, stepped back and trembled. "Pekuah," said the princess, "of what art thou afraid?"—"Of the narrow entrance," answered the lady, "and of the dreadful gloom. I dare not enter a place which must surely be inhabited by unquiet souls. The original possessors of these dreadful vaults will start up before us, and perhaps shut us in for ever." She spoke, and threw her arms round the neck of her mistress.

"If all your fear be of apparitions," said the prince, "I will promise you safety: there is no danger from the dead; he that is once buried will be seen no more."

"That the dead are seen no more," said Imlac, "I will not undertake to maintain against the concurrent and unvaried testimony of all ages and of all nations. There is no people, rude or learned, among whom apparitions of the dead are not related and believed. This opinion, which, perhaps, prevails as far as human nature is diffused, could become universal only by its truth: those that never heard of one another would not have agreed in a tale which nothing but experience can make credible. That it is doubted by single cavillers can very little weaken the general evidence; and some who deny it with their tongues confess it by their fears.

"Yet I do not mean to add new terrors to those which have already seized upon Pekuah. There can be no reason why spectres should haunt the pyramid more than other places, or why they should have power or will to hurt innocence and purity. Our entrance is no violation of their privileges; we can take nothing from them; how then can we offend them?"

"My dear Pekuah," said the princess, "I will always go before you, and Imlac shall follow you. Remember that you are the companion of the princess of Abissinia."

"If the princess is pleased that her servant should die," returned the lady, "let her command some death less dreadful than inclosure in this horrid cavern. You know I dare not disobey you; I must go if you command me; but, if I once enter, I never shall come back."

The princess saw that her fear was too strong for expostulation or reproof, and, embracing

her, told her that she should stay in the tent till their return. Pekuah was not yet satisfied, but entreated the princess not to pursue so dreadful a purpose as that of entering the recesses of the pyramids. "Though I cannot teach courage," said Nekayah, "I must not learn cowardice; nor leave at last undone what I came hither only to do."

CHAPTER XXXII.

*They enter the Pyramid.*

PEKUAH descended to the tents, and the rest entered the pyramid; they passed through the galleries, surveyed the vaults of marble, and examined the chest in which the body of the founder is supposed to have been repositied. They then sat down in one of the most spacious chambers to rest awhile, before they attempted to return.

"We have now," said Imlac, "gratified our minds with an exact view of the greatest work of man, except the wall of China.

"Of the wall, it is very easy to assign the motive. It secured a wealthy and timorous nation from the incursions of barbarians, whose unskilfulness in the arts made it easier for them to supply their wants by rapine than by industry, and who from time to time poured in upon the inhabitants of peaceful commerce, as vultures descend upon domestic fowl. Their celerity and fierceness made the wall necessary, and their ignorance made it efficacious.

"But for the pyramids, no reason has ever been given, adequate to the cost and labour of the work. The narrowness of the chambers proves that it could afford no retreat from enemies, and treasures might have been repositied at far less expense with equal security. It seems to have been erected only in compliance with that hunger of imagination which preys incessantly upon life, and must be always appeased by some employment. Those who have already all that they can enjoy, must enlarge their desires. He that has built for use till use is supplied, must begin to build for vanity, and extend his plan to the utmost power of human performance, that he may not be soon reduced to form another wish.

"I consider this mighty structure as a monument of the insufficiency of human enjoyments. A king, whose power is unlimited, and whose treasures surmount all real and imaginary wants, is compelled to solace, by the erection of a pyramid, the satiety of dominion and tastelessness of pleasures, and to amuse the tediousness of

declining life, by seeing thousands labouring without end, and one stone, for no purpose, laid upon another. Whoever thou art, that, not content with a moderate condition, imaginest happiness in royal magnificence, and dreamest that command or riches can feed the appetite of novelty with perpetual gratifications, survey the pyramids, and confess thy folly!"

CHAPTER XXXIII.

*The Princess meets with an unexpected Misfortune.*

THEY rose up, and returned through the cavity at which they had entered; and the princess prepared for her favourite a long narrative of dark labyrinths and costly rooms, and of the different impressions which the varieties of the way had made upon her. But when they came to their train, they found every one silent and dejected: the men discovered shame and fear in their countenances, and the women were weeping in their tents.

What had happened they did not try to conjecture, but immediately inquired. "You had scarcely entered into the pyramid," said one of the attendants, "when a troop of Arabs rushed upon us: we were too few to resist them, and too slow to escape. They were about to search the tents, set us on our camels, and drive us along before them, when the approach of some Turkish horsemen put them to flight: but they seized the lady Pekuah with her two maids, and carried them away: the Turks are now pursuing them by our instigation, but I fear they will not be able to overtake them."

The princess was overpowered with surprise and grief. Rasselas, in the first heat of his resentment, ordered his servants to follow him, and prepared to pursue the robbers with his sabre in his hand. "Sir," said Imlac, "what can you hope from violence or valour? the Arabs are mounted on horses trained to battle and retreat; we have only beasts of burden. By leaving our present station we may lose the princess, but cannot hope to regain Pekuah."

In a short time the Turks returned, having not been able to reach the enemy. The princess burst out into new lamentations, and Rasselas could scarcely forbear to reproach them with cowardice; but Imlac was of opinion, that the escape of the Arabs was no addition to their misfortune, for, perhaps, they would have killed their captives rather than have resigned them.

## CHAPTER XXXIV.

*Their return to Cairo without Pekuah.*

THERE was nothing to be hoped from longer stay. They returned to Cairo, repenting of their curiosity, censuring the negligence of the government, lamenting their own rashness, which had neglected to procure a guard, imagining many expedients by which the loss of Pekuah might have been prevented, and resolving to do something for her recovery, though none could find any thing proper to be done.

Nekayah retired to her chamber, where her women attempted to comfort her, by telling her that all had their troubles, and that lady Pekuah had enjoyed much happiness in the world for a long time, and might reasonably expect a change of fortune. They hoped that some good would befall her wheresoever she was, and that their mistress would find another friend, who might supply her place.

The princess made them no answer; and they continued the form of condolence, not much grieved in their hearts that the favourite was lost.

Next day, the prince presented to the Bassa a memorial of the wrong which he had suffered, and a petition for redress. The Bassa threatened to punish the robbers, but did not attempt to catch them; nor indeed could any account or description be given by which he might direct the pursuit.

It soon appeared that nothing would be done by authority. Governors being accustomed to hear of more crimes than they can punish, and more wrongs than they can redress, set themselves at ease by indiscriminate negligence, and presently forget the request when they lose sight of the petitioner.

Imlac then endeavoured to gain some intelligence by private agents. He found many who pretended to an exact knowledge of all the haunts of the Arabs, and to regular correspondence with their chiefs, and who readily undertook the recovery of Pekuah. Of these, some were furnished with money for their journey, and came back no more; some were liberally paid for accounts which a few days discovered to be false. But the princess would not suffer any means, however improbable, to be left untried. While she was doing something, she kept her hope alive. As one expedient failed, another was suggested; when one messenger returned unsuccessful, another was despatched to a different quarter.

Two months had now passed, and of Pekuah nothing had been heard; the hopes which they had endeavoured to raise in each other grew more languid; and the princess, when she saw nothing more to be tried, sunk down inconsolable in hopeless dejection. A thousand times

she reproached herself with the easy compliance by which she permitted her favourite to stay behind her. "Had not my fondness," said she, "lessened my authority, Pekuah had not dared to talk of her terrors. She ought to have feared me more than spectres. A severe look would have overpowered her; a peremptory command would have compelled obedience. Why did foolish indulgence prevail upon me? why did I not speak, and refuse to hear?"

"Great princess," said Imlac, "do not reproach yourself for your virtue, or consider that as blameable by which evil has accidentally been caused. Your tenderness for the timidity of Pekuah was generous and kind.—When we act according to our duty, we commit the events to Him by whose laws our actions are governed, and who will suffer none to be finally punished for obedience. When, in prospect of some good, whether natural or moral, we break the rules prescribed us, we withdraw from the direction of superior wisdom, and take all consequences upon ourselves. Man cannot so far know the connection of causes and events, as that he may venture to do wrong in order to do right. When we pursue our end by lawful means, we may always console our miscarriage by the hope of future recompense. When we consult only our own policy, and attempt to find a nearer way to good, by overleaping the settled boundaries of right and wrong, we cannot be happy even by success, because we cannot escape the consciousness of our fault; but if we miscarry, the disappointment is irremediably imbibited. How comfortless is the sorrow of him who feels at once the pangs of guilt and the vexation of calamity, which guilt has brought upon him!

"Consider, princess, what would have been your condition, if the lady Pekuah had entreated to accompany you, and, being compelled to stay in the tents, had been carried away; or how would you have borne the thought if you had forced her into the pyramid, and she had died before you in agonies of terror."

"Had either happened," said Nekayah, "I could not have endured life till now; I should have been tortured to madness by the remembrance of such cruelty, or must have pined away in abhorrence of myself."

"This, at least," said Imlac, "is the present reward of virtuous conduct, that no unlucky consequence can oblige us to repent it."

## CHAPTER XXXV.

*The Princess languishes for Want of Pekuah.*

NEKAYAH, being thus reconciled to herself, found that no evil is insupportable but that which is accompanied with consciousness of

wrong. She was, from that time, delivered from the violence of tempestuous sorrow, and sunk into silent pensiveness and gloomy tranquillity. She sat from morning to evening recollecting all that had been done or said by her Pekuah, treasured up with care every trifle on which Pekuah had set an accidental value, and which might recal to mind any little incident or careless conversation. The sentiments of her whom she now expected to see no more were treasured in her memory as rules of life, and she deliberated to no other end than to conjecture on any occasion what would have been the opinion and counsel of Pekuah.

The women by whom she was attended knew nothing of her real condition, and therefore she could not talk to them but with caution and reserve. She began to remit her curiosity, having no great desire to collect notions which she had no convenience of uttering. Rasselas endeavoured first to comfort and afterwards to divert her; he hired musicians, to whom she seemed to listen, but did not hear them; and procured masters to instruct her in various arts, whose lectures, when they visited her again, were again to be repeated. She had lost her taste of pleasure, and her ambition of excellence. And her mind, though forced into short excursions, always recurred to the image of her friend.

Imlac was every morning earnestly enjoined to renew his inquiries, and was asked every night whether he had yet heard of Pekuah; till, not being able to return the princess the answer that she desired, he was less and less willing to come into her presence. She observed his backwardness, and commanded him to attend her. "You are not," said she, "to confound impatience with resentment, or to suppose that I charge you with negligence, because I repine at your unsuccessfulness. I do not much wonder at your absence. I know that the unhappy are never pleasing, and that all naturally avoid the contagion of misery. To hear complaints is wearisome, alike to the wretched and the happy; for who would cloud, by adventitious grief, the short gleams of gayety which life allows us? or who, that is struggling under his own evils, will add to them the miseries of another?"

"The time is at hand, when none shall be disturbed any longer by the sighs of Nekayah: my search after happiness is now at an end. I am resolved to retire from the world with all its flatteries and deceits, and will hide myself in solitude, without any other care than to compose my thoughts, and regulate my hours by a constant succession of innocent occupations, till, with a mind purified from earthly desires, I shall enter into that state, to which all are hastening, and in which I hope again to enjoy the friendship of Pekuah."

"Do not entangle your mind," said Imlac, "by irrevocable determinations, nor increase the burden of life by a voluntary accumulation of misery: the weariness of retirement will continue or increase when the loss of Pekuah is forgot. That you have been deprived of one pleasure is no very good reason for rejection of the rest."

"Since Pekuah was taken from me," said the princess, "I have no pleasure to reject or to retain. She that has no one to love or trust, has little to hope. She wants the radical principle of happiness. We may, perhaps, allow that what satisfaction this world can afford must arise from the conjunction of wealth, knowledge, and goodness: wealth is nothing but as it is bestowed, and knowledge nothing but as it is communicated: they must therefore be imparted to others, and to whom could I now delight to impart them? Goodness affords the only comfort which can be enjoyed without a partner, and goodness may be practised in retirement."

"How far solitude may admit goodness, or advance it, I shall not," replied Imlac, "dispute at present. Remember the confession of the pious hermit. You will wish to return into the world when the image of your companion has left your thoughts." "That time," said Nekayah, "will never come. The generous frankness, the modest obsequiousness, and the faithful secrecy of my dear Pekuah, will always be more missed, as I shall live longer to see vice and folly."

"The state of a mind oppressed with a sudden calamity," said Imlac, "is like that of the fabulous inhabitants of the new-created earth, who, when the first night came upon them, supposed that day would never return. When the clouds of sorrow gather over us, we see nothing beyond them, nor can imagine how they will be dispelled: yet a new day succeeded to the night, and sorrow is never long without a dawn of ease. But they who restrain themselves from receiving comfort, do as the savages would have done, had they put out their eyes when it was dark. Our minds, like our bodies, are in continual flux: something is hourly lost, and something acquired. To lose much at once is inconvenient to either, but while the vital powers remain uninjured, nature will find the means of reparation. Distance has the same effect on the mind as on the eye; and while we glide along the stream of time, whatever we leave behind us is always lessening; and that which we approach increasing in magnitude. Do not suffer life to stagnate; it will grow maddy for want of motion; commit yourself again to the current of the world; Pekuah will vanish by degrees; you will meet in your way some other favourite, or learn to diffuse yourself in general conversation."

"At least," said the prince, "do not despair before all remedies have been tried: the inquiry after the unfortunate lady is still continued, and shall be carried on with yet greater diligence, on condition that you will promise to wait a year for the event, without any unalterable resolution."

Nekayah thought this a reasonable demand, and made the promise to her brother, who had been advised by Imlac to require it. Imlac had, indeed, no great hope of regaining Pekuah; but he supposed, that if he could secure the interval of a year, the princess would be then in no danger of a cloister.

### CHAPTER XXXVI.

*Pekuah is still remembered. The Progress of Sorrow.*

NEKAYAH, seeing that nothing was omitted for the recovery of her favourite, and having, by her promise, set her intention of retirement at a distance, began imperceptibly to return to common cares and common pleasures. She rejoiced without her own consent at the suspension of her sorrows, and sometimes caught herself with indignation in the act of turning away her mind from the remembrance of her whom yet she resolved never to forget.

She then appointed a certain hour of the day for meditation on the merits and fondness of Pekuah, and for some weeks retired constantly at the time fixed, and returned with her eyes swollen and her countenance clouded. By degrees she grew less scrupulous, and suffered any important and pressing avocation to delay the tribute of daily tears. She then yielded to less occasions; and sometimes forgot what she was indeed afraid to remember; and, at last, wholly released herself from the duty of periodical affliction.

Her real love of Pekuah was not yet diminished. A thousand occurrences brought her back to memory, and a thousand wants, which nothing but the confidence of friendship can supply, made her frequently regretted. She, therefore, solicited Imlac never to desist from inquiry, and to leave no art of intelligence untried, that at least she might have the comfort of knowing that she did not suffer by negligence or sluggishness. "Yet what," said she, "is to be expected from our pursuit of happiness, when we find the state of life to be such that happiness itself is the cause of misery? Why should we endeavour to attain that of which the possession cannot be secured? I shall henceforward fear to yield my heart to excellence, however bright, or to fondness, however ten-

der, lest I should lose again what I have lost in Pekuah."

### CHAPTER XXXVII.

*The Princess hears News of Pekuah.*

IN seven months, one of the messengers, who had been sent away upon the day when the promise was drawn from the princess, returned, after many unsuccessful rambles, from the borders of Nubia, with an account that Pekuah was in the hands of an Arab chief, who possessed a castle or fortress on the extremity of Egypt. The Arab, whose revenue was plunder, was willing to restore her, with her two attendants, for two hundred ounces of gold.

The price was no subject of debate. The princess was in ecstasies when she heard that her favourite was alive, and might so cheaply be ransomed. She could not think of delaying for a moment Pekuah's happiness or her own, but entreated her brother to send back the messenger with the sum required. Imlac, being consulted, was not very confident of the veracity of the relater, and was still more doubtful of the Arab's faith, who might, if he were too liberally trusted, detain at once the money and the captives. He thought it dangerous to put themselves in the power of the Arab, by going into his district; and could not expect that the rover would so much expose himself as to come into the lower country, where he might be seized by the forces of the Bassa.

It is difficult to negotiate where neither will trust. But Imlac, after some deliberation, directed the messenger to propose that Pekuah should be conducted by ten horsemen to the monastery of St. Anthony, which is situated in the deserts of Upper Egypt, where she should be met by the same number, and her ransom should be paid.

That no time might be lost, as they expected that the proposal would not be refused, they immediately began their journey to the monastery; and when they arrived, Imlac went forward with the former messenger to the Arab's fortress. Rasselas was desirous to go with them; but neither his sister nor Imlac would consent. The Arab, according to the custom of his nation, observed the laws of hospitality with great exactness to those who put themselves into his power, and, in a few days, brought Pekuah with her maids, by easy journeys, to the place appointed, where, receiving the stipulated price, he restored her, with great respect, to liberty and her friends, and undertook to conduct them back towards Cairo beyond all danger of robbery or violence.

The princess and her favourite embraced each

other with transport too violent to be expressed, and went out together to pour the tears of tenderness in secret, and exchange professions of kindness and gratitude. After a few hours they returned into the refectory of the convent, where, in the presence of the prior and his brethren, the prince required of Pekuah the history of her adventures.

## CHAPTER XXXVIII.

### *The Adventures of the Lady Pekuah.*

"At what time, and in what manner I was forced away," said Pekuah, "your servants have told you. The suddenness of the event struck me with surprise, and I was at first rather stupified than agitated with any passion of either fear or sorrow. My confusion was increased by the speed and tumult of our flight, while we were followed by the Turks, who, as it seemed, soon despaired to overtake us, or were afraid of those whom they made a show of menacing.

"When the Arabs saw themselves out of danger, they slackened their course; and as I was less harassed by external violence, I began to feel more uneasiness in my mind. After some time, we stopped near a spring shaded with trees, in a pleasant meadow, where we were set upon the ground, and offered such refreshments as our masters were partaking. I was suffered to sit with my maids apart from the rest, and none attempted to comfort or insult us. Here I first began to feel the full weight of my misery. The girls sat weeping in silence, and from time to time looked on me for succour. I knew not to what condition we were doomed, nor could conjecture where would be the place of our captivity, or whence to draw any hope of deliverance. I was in the hands of robbers and savages, and had no reason to suppose that their pity was more than their justice, or that they would forbear the gratification of any ardour of desire, or caprice of cruelty. I, however, kissed my maids, and endeavoured to pacify them by remarking, that we were yet treated with decency, and that since we were now carried beyond pursuit, there was no danger of violence to our lives.

"When we were to be set again on horseback, my maids clung round me, and refused to be parted; but I commanded them not to irritate those who had us in their power. We travelled the remaining part of the day through an unfrequented and pathless country, and came by moonlight to the side of a hill, where the rest of the troop was stationed. Their tents were pitched, and their fires kindled, and our chief

was welcomed as a man much beloved by his dependants.

"We were received into a large tent, where we found women who had attended their husbands in the expedition. They set before us the supper which they had provided, and I ate it rather to encourage my maids than to comply with any appetite of my own. When the meat was taken away, they spread the carpets for repose. I was weary, and hoped to find in sleep that remission of distress which nature seldom denies. Ordering myself, therefore, to be undressed, I observed that the women looked very earnestly upon me, not expecting, I suppose, to see me so submissively attended. When my upper vest was taken off, they were apparently struck with the splendour of my clothes, and one of them timorously laid her hand upon the embroidery. She then went out, and, in a short time, came back with another woman, who seemed to be of higher rank and greater authority. She did, at her entrance, the usual act of reverence, and, taking me by the hand, placed me in a smaller tent, spread with finer carpets, where I spent the night quietly with my maids.

"In the morning, as I was sitting on the grass, the chief of the troop came towards me. I rose up to receive him, and he bowed with great respect. 'Illustrious lady,' said he, 'my fortune is better than I had presumed to hope; I am told, by my women, that I have a princess in my camp.' Sir, answered I, your women have deceived themselves and you; I am not a princess, but an unhappy stranger, who intended soon to have left this country, in which I am now to be imprisoned for ever. 'Whoever, or whencesoever, you are,' returned the Arab, 'your dress, and that of your servants, show your rank to be high, and your wealth to be great. Why should you, who can so easily procure your ransom, think yourself in danger of perpetual captivity? The purpose of my incursions is to increase my riches, or more properly to gather tribute. The sons of Ishmael are the natural and hereditary lords of this part of the continent, which is usurped by late invaders and low-born tyrants, from whom we are compelled to take by the sword what is denied to justice. The violence of war admits no distinction; the lance that is lifted at guilt and power will sometimes fall on innocence and gentleness.'

"How little, said I, did I expect that yesterday it should have fallen upon me.

"'Misfortunes,' answered the Arab, 'should always be expected. If the eye of hostility could learn reverence or pity, excellence like yours had been exempt from injury. But the angels of affliction spread their toils alike for the virtuous and the wicked, for the mighty and the mean. Do not be disconsolate; I am

not one of the lawless and cruel rovers of the desert; I know the rules of civil life; I will fix your ransom, give a passport to your messenger, and perform my stipulation with nice punctuality.

"You will easily believe that I was pleased with his courtesy; and finding that his predominant passion was desire of money, I began now to think my danger less; for I knew that no sum would be thought too great for the release of Pekuah. I told him that he should have no reason to charge me with ingratitude, if I was used with kindness; and that any ransom which could be expected for a maid of common rank would be paid, but that he must not persist to rate me as a princess. He said he would consider what he should demand, and then, smiling, bowed and retired.

"Soon after, the women came about me, each contending to be more officious than the other, and my maids themselves were served with reverence. We travelled onward by short journeys. On the fourth day, the chief told me that my ransom must be two hundred ounces of gold; which I not only promised him, but told him that I would add fifty more, if I and my maids were honourably treated.

"I never knew the power of gold before—From that time I was the leader of the troop.—The march of every day was longer or shorter as I commanded, and the tents were pitched where I chose to rest. We now had camels and other conveniences for travel: my own women were always at my side, and I amused myself with observing the manners of the vagrant nations, and with viewing remains of ancient edifices with which these deserted countries appear to have been, in some distant age, lavishly embellished.

"The chief of the band was a man far from illiterate: he was able to travel by the stars or the compass, and had marked in his erratic expeditions such places as are most worthy the notice of a passenger. He observed to me, that buildings are always best preserved in places little frequented, and difficult of access; for when once a country declines from its primitive splendour, the more inhabitants are left, the quicker ruin will be made. Walls supply stones more easily than quarries; and palaces and temples will be demolished, to make stables of granite and cottages of porphyry."

## CHAPTER XXXIX.

### *The Adventures of Pekuah continued.*

"We wandered about in this manner for some weeks, either, as our chief pretended, for my gratification, or, as I rather suspected, for some

convenience of his own. I endeavoured to appear contented where sullenness and resentment would have been of no use, and that endeavour conduced much to the calmness of my mind; but my heart was always with Nekayah, and the troubles of the night much overbalanced the amusements of the day. My women, who threw all their cares upon their mistress, set their minds at ease from the time when they saw me treated with respect, and gave themselves up to the incidental alleviations of our fatigue without solicitude or sorrow. I was pleased with their pleasure, and animated with their confidence. My condition had lost much of its terror, since I found that the Arab ranged the country merely to get riches. Avarice is a uniform and tractable vice: other intellectual distempers are different in different constitutions of mind; that which soothes the pride of one will offend the pride of another; but to the favour of the covetous there is a ready way—bring money, and nothing is denied.

"At last we came to the dwelling of our chief; a strong and spacious house, built with stone in an island of the Nile, which lies, as I was told, under the tropic. Lady, said the Arab, you shall rest after your journey a few weeks in this place, where you are to consider yourself as sovereign. My occupation is war: I have therefore chosen this obscure residence, from which I can issue unexpected, and to which I can retire unpursued. You may now repose in security: here are few pleasures, but here is no danger. He then led me into the inner apartments, and, seating me on the richest couch, bowed to the ground.

"His women, who considered me as a rival, looked on me with malignity; but being soon informed that I was a great lady detained only for my ransom, they began to vie with each other in obsequiousness and reverence.

"Being again comforted with new assurances of speedy liberty, I was for some days diverted from impatience by the novelty of the place. The turrets overlooked the country to a great distance, and afforded a view of many windings of the stream. In the day I wandered from one place to another, as the course of the sun varied the splendour of the prospect, and saw many things which I had never seen before. The crocodiles and river-horses are common in this unpeopled region; and I often looked upon them with terror, though I knew that they could not hurt me. For some time I expected to see mermaids and tritons, which, as Imbec has told me, the European travellers have stationed in the Nile; but no such beings ever appeared, and the Arab, when I inquired after them, laughed at my credulity.

"At night the Arab always attended me to a tower set apart for celestial observations, where he endeavoured to teach me the names and

courses of the stars. I had no great inclination to this study; but an appearance of attention was necessary to please my instructor, who valued himself for his skill, and, in a little while, I found some employment requisite to beguile the tediousness of time, which was to be passed always amidst the same objects. I was weary of looking in the morning on things from which I had turned away weary in the evening: I therefore was at last willing to observe the stars rather than do nothing, but could not always compose my thoughts, and was very often thinking on Nekayah when others imagined me contemplating the sky. Soon after the Arab went upon another expedition, and then my only pleasure was to talk with my maids about the accident by which we were carried away, and the happiness that we should all enjoy at the end of our captivity."

"There were women in your Arab's fortress," said the princess; "why did you not make them your companions, enjoy their conversation, and partake their diversions? In a place where they found business or amusement, why should you alone sit corroded with idle melancholy? or why could not you bear for a few months that condition to which they were condemned for life?"

"The diversions of the women," answered Pekuah, "were only childish play, by which the mind, accustomed to stronger operations, could not be kept busy. I could do all which they delighted in doing by powers merely sensitive, while my intellectual faculties were flown to Cairo. They ran from room to room, as a bird hops from wire to wire in his cage. They danced for the sake of motion, as lambs frisk in a meadow. One sometimes pretended to be hurt that the rest might be alarmed, or hid herself that another might seek her. Part of their time passed in watching the progress of light bodies that floated on the river, and part in marking the various forms into which clouds broke in the sky.

"Their business was only needle-work, in which I and my maids sometimes helped them; but you know that the mind will easily straggle from the fingers, nor will you suspect that captivity and absence from Nekayah could receive solace from silken flowers.

"Nor was much satisfaction to be hoped from their conversation: for of what could they be expected to talk? They had seen nothing, for they had lived from early youth in that narrow spot: of what they had not seen they could have no knowledge, for they could not read. They had no idea but of the few things that were within their view, and had hardly names for any thing but their clothes and their food. As I bore a superior character, I was often called to terminate their quarrels, which I decided as equitably as I could. If it could have amused

me to hear the complaints of each against the rest, I might have been often detained by long stories; but the motives of their animosity were so small that I could not listen without interrupting the tale."

"How," said Rasselas, "can the Arab, whom you represented as a man of more than common accomplishments, take any pleasure in his seraglio when it is filled only with women like these? Are they exquisitely beautiful?"

"They do not," said Pekuah, "want that unassuming and ignoble beauty which may subsist without sprightliness or sublimity, without energy of thought or dignity of virtue. But to a man like the Arab, such beauty was only a flower casually plucked and carelessly thrown away. Whatever pleasures he might find among them, they were not those of friendship or society. When they were playing about him, he looked on them with inattentive superiority: when they vied for his regard, he sometimes turned away disgusted. As they had no knowledge, their talk could take nothing from the tediousness of life: as they had no choice, their fondness, or appearance of fondness, excited in him neither pride nor gratitude: he was not exalted in his own esteem by the smiles of a woman who saw no other man, nor was much obliged by that regard, of which he could never know the sincerity, and which he might often perceive to be exerted not so much to delight him as to pain a rival. That which he gave, and they received, as love, was only a careless distribution of superfluous time; such love as man can bestow upon that which he despises, such as has neither hope nor fear, neither joy nor sorrow."

"You have reason, lady, to think yourself happy," said Imhac, "that you have been thus easily dismissed. How could a mind, hungry for knowledge, be willing, in an intellectual famine, to lose such a banquet as Pekuah's conversation?"

"I am inclined to believe," answered Pekuah, "that he was for some time in suspense; for notwithstanding his promise, whenever I proposed to despatch a messenger to Cairo, he found some excuse for delay. While I was detained in his house, he made many incursions into the neighbouring countries, and, perhaps, he would have refused to discharge me, had his plunder been equal to his wishes. He returned always courteous, related his adventures, delighted to hear my observations, and endeavoured to advance my acquaintance with the stars. When I importuned him to send away my letters, he soothed me with professions of honour and sincerity; and when I could be no longer decently denied, put his troop again in motion, and left me to govern in his absence. I was much afflicted by this studied procrastination, and was sometimes afraid that I should be forgotten;

that you would leave Cairo, and I must end my days in an island of the Nile.

"I grew at last hopeless and dejected, and cared so little to entertain him, that he for a while more frequently talked with my maids. That he should fall in love with them, or with me, might have been equally fatal; and I was not much pleased with the growing friendship. My anxiety was not long; for, as I recovered some degree of cheerfulness, he returned to me, and I could not forbear, to despise my former uneasiness.

"He still delayed to send for my ransom, and would, perhaps, never have determined, had not your agent found his way to him. The gold, which he would not fetch, he could not reject when it was offered. He hastened to prepare for our journey hither, like a man delivered from the pain of an intestine conflict. I took leave of my companions in the house, who dismissed me with cold indifference."

Nekayah, having heard her favourite's relation, rose and embraced her: and Rasselas gave her a hundred ounces of gold, which she presented to the Arab for the fifty that were promised.

## CHAPTER XL.

### *The History of a Man of Learning.*

THEY returned to Cairo, and were so well pleased at finding themselves together, that none of them went much abroad. The prince began to love learning, and one day declared to Imlac that he intended to devote himself to science, and pass the rest of his days in literary solitude.

"Before you make your final choice," answered Imlac, "you ought to examine its hazards, and converse with some of those who are grown old in the company of themselves. I have just left the observatory of one of the most learned astronomers in the world, who has spent forty years in unwearied attention to the motion and appearances of the celestial bodies, and has drawn out his soul in endless calculations. He admits a few friends once a month to hear his deductions and enjoy his discoveries. I was introduced as a man of knowledge worthy of his notice. Men of various ideas and fluent conversation are commonly welcome to those whose thoughts have been long fixed upon a single point, and who find the images of other things stealing away. I delighted him with my remarks: he smiled at the narrative of my travels, and was glad to forget the constellations, and descend for a moment into the lower world.

"On the next day of vacation I renewed my

visit, and was so fortunate as to please him again. He relaxed from that time the severity of his rule, and permitted me to enter at my own choice. I found him always busy, and always glad to be relieved. As each knew much which the other was desirous of learning, we exchanged our notions with great delight. I perceived that I had every day more of his confidence, and always found new cause of admiration in the profundity of his mind. His comprehension is vast, his memory capacious and retentive; his discourse is methodical, and his expression clear.

"His integrity and benevolence are equal to his learning. His deepest researches and most favourite studies are willingly interrupted for any opportunity of doing good by his counsel or his riches. To his closest retreat, at his most busy moments, all are admitted that want his assistance: For though I exclude idleness and pleasure, I will never, says he, bar my doors against charity. To man is permitted the contemplation of the skies, but the practice of virtue is commanded."

"Surely," said the princess, "this man is happy."

"I visited him," said Imlac, "with more and more frequency, and was every time more enamoured of his conversation: he was sublime without haughtiness, courteous without formality, and communicative without ostentation. I was at first, great princess, of your opinion, thought him the happiest of mankind, and often congratulated him on the blessing that he enjoyed. He seemed to hear nothing with indifference but the praises of his condition, to which he always returned a general answer, and diverted the conversation to some other topic.

"Amidst this willingness to be pleased, and labour to please, I had quickly reason to imagine that some painful sentiment pressed upon his mind. He often looked up earnestly towards the sun, and let his voice fall in the midst of his discourse. He would sometimes, when we were alone, gaze upon me in silence with the air of a man who longed to speak what he was yet resolved to suppress. He would often send for me with vehement injunctions of haste, though, when I came to him, he had nothing extraordinary to say. And sometimes, when I was leaving him, would call me back, pause a few moments, and then dismiss me."

## CHAPTER XLI.

### *The Astronomer discovers the Cause of his Uneasiness.*

"At last, the time came when the secret burst his reserve. We were sitting together last night

in the turret of his house, watching the emission of a satellite of Jupiter. A sudden tempest clouded the sky, and disappointed our observation. We sat a while silent in the dark, and then he addressed himself to me in these words: Imlac, I have long considered thy friendship as the greatest blessing of my life. Integrity without knowledge is weak and useless, and knowledge without integrity is dangerous and dreadful. I have found in thee all the qualities requisite for trust; benevolence, experience, and fortitude. I have long discharged an office which I must soon quit at the call of nature, and shall rejoice in the hour of imbecility and pain to devolve it upon thee.

"I thought myself honoured by this testimony, and protested that whatever could conduce to his happiness would add likewise to mine.

"Hear, Imlac, what thou wilt not without difficulty credit. I have possessed for five years the regulation of the weather, and the distribution of the seasons: the sun has listened to my dictates, and passed from tropic to tropic by my direction: the clouds, at my call, have poured their waters, and the Nile has overflowed at my command: I have restrained the rage of the dog-star, and mitigated the fervours of the crab. The winds alone, of all the elemental powers, have hitherto refused my authority, and multitudes have perished by equinoctial tempests which I found myself unable to prohibit or restrain. I have administered this great office with exact justice, and made to the different nations of the earth an impartial dividend of rain and sunshine. What must have been the misery of half the globe, if I had limited the clouds to particular regions, or confined the sun to either side of the equator?"

## CHAPTER XLII.

*The Opinion of the Astronomer is explained and justified.*

"I SUPPOSE he discovered in me, through the obscurity of the room, some tokens of amazement and doubt; for, after a short pause, he proceeded thus:

"Not to be easily credited will neither surprise nor offend me; for I am probably the first of human beings to whom this trust has been imparted. Nor do I know whether to deem this distinction a reward or punishment; since I have possessed it, I have been far less happy than before, and nothing but the consciousness of good intention could have enabled me to support the weariness of unremitted vigilance.

"How long, Sir, said I, has this great office been in your hands?

"About ten years ago, said he, my daily observations of the changes of the sky led me to consider, whether, if I had the power of the seasons, I could confer greater plenty upon the inhabitants of the earth. This contemplation fastened on my mind, and I sat days and nights in imaginary dominion, pouring upon this country and that the showers of fertility, and seconding every fall of rain with a due proportion of sunshine. I had yet only the will to do good, and did not imagine that I should ever have the power.

"One day as I was looking on the fields withering with heat, I felt in my mind a sudden wish that I could send rain on the southern mountains, and raise the Nile to an inundation. In the hurry of my imagination, I commanded rain to fall; and by comparing the time of my command with that of the inundation, I found that the clouds had listened to my lips.

"Might not some other cause, said I, produce this concurrence? The Nile does not always rise on the same day.

"Do not believe, said he, with impatience, that such objections could escape me: I reasoned long against my own conviction, and laboured against truth with the utmost obstinacy. I sometimes suspected myself of madness, and should not have dared to impart this secret but to a man like you, capable of distinguishing the wonderful from the impossible, and the incredible from the false.

"Why, Sir, said I, do you call that incredible which you know, or think you know, to be true?

"Because, said he, I cannot prove it by any external evidence: and I know too well the laws of demonstration, to think that my conviction ought to influence another, who cannot, like me, be conscious of its force. I, therefore, shall not attempt to gain credit by disputation. It is sufficient that I feel this power, that I have long possessed, and every day exerted it. But the life of man is short: the infirmities of age increase upon me, and the time will soon come when the regulator of the year must mingle with the dust. The care of appointing a successor has long disturbed me: the night and the day have been spent in comparisons of all the characters which have come to my knowledge, and I have yet found none so worthy as thyself."

## CHAPTER XLIII.

*The Astronomer leaves Imlac his Directions.*

"HEAR, therefore, what I shall impart with attention, such as the welfare of a world requires. If the task of a king be considered as

difficult, who has the care only of a few millions, to whom he cannot do much good or harm, what must be the anxiety of him, on whom depends the action of the elements, and the great gifts of light and heat? Hear me, therefore, with attention.

"I have diligently considered the position of the earth and sun, and formed innumerable schemes, in which I changed their situation. I have sometimes turned aside the axis of the earth, and sometimes varied the ecliptic of the sun: but I have found it impossible to make a disposition by which the world may be advantaged; what one region gains, another loses by an imaginable alteration, even without considering the distant parts of the solar system with which we are acquainted. Do not, therefore, in thy administration of the year, indulge thy pride by innovation; do not please thyself with thinking that thou canst make thyself renowned to all future ages, by disordering the seasons. The memory of mischief is no desirable fame. Much less will it become thee to let kindness or interest prevail. Never rob other countries of rain to pour it on thine own. For us the Nile is sufficient.

"I promised that when I possessed the power, I would use it with inflexible integrity; and he dismissed me, pressing my hand.—My heart, said he, will be now at rest, and my benevolence will no more destroy my quiet: I have found a man of wisdom and virtue, to whom I can cheerfully bequeath the inheritance of the sun."

The prince heard this narration with very serious regard; but the princess smiled, and Pekuah convulsed herself with laughter. "Ladies," said Imlac, "to mock the heaviest of human afflictions is neither charitable nor wise. Few can attain this man's knowledge, and few practise his virtues; but all may suffer his calamity. Of the uncertainties of our present state, the most dreadful and alarming is the uncertain continuance of reason."

The princess was recollected, and the favourite was abashed. Rasselas, more deeply affected, inquired of Imlac, whether he thought such maladies of the mind frequent, and how they were contracted.

#### CHAPTER XLIV.

##### *The dangerous Prevalence of Imagination.*

"DISORDERS of intellect," answered Imlac, "happen much more often than superficial observers will easily believe. Perhaps if we speak with rigorous exactness, no human mind is in its right state. There is no man whose imagination does not sometimes predominate over

his reason, who can regulate his attention wholly by his will, and whose ideas will come and go at his command. No man will be found in whose mind airy notions do not sometimes tyrannize, and force him to hope or fear beyond the limits of sober probability. All power of fancy over reason is a degree of insanity; but while this power is such as we can control and repress, it is not visible to others, nor considered as any depravation of the mental faculties: it is not pronounced madness but when it becomes ungovernable, and apparently influences speech or action.

"To indulge the power of fiction, and send imagination out upon the wing, is often the sport of those who delight too much in silent speculation. When we are alone we are not always busy; the labour of excogitation is too violent to last long; the ardour of inquiry will sometimes give way to idleness or satiety. He who has nothing external that can divert him must find pleasure in his own thoughts, and must conceive himself what he is not; for who is pleased with what he is? He then expatiates in boundless futurity, and culls from all imaginable conditions that which for the present moment he should most desire, amuses his desires with impossible enjoyments, and confers upon his pride unattainable dominion. The mind dances from scene to scene, unites all pleasures in all combinations, and riots in delights which nature and fortune, with all their bounty, cannot bestow.

"In time, some particular train of ideas fixes the attention: all other intellectual gratifications are rejected; the mind, in weariness or leisure, recurs constantly to the favourite conception, and feasts on the luscious falsehood whenever she is offended with the bitterness of truth. By degrees, the reign of fancy is confirmed; she grows first imperious, and in time despotic. Then fictions begin to operate as realities, false opinions fasten upon the mind, and life passes in dreams of rapture or of anguish.

"This, Sir, is one of the dangers of solitude; which the hermit has confessed not always to promote goodness, and the astronomer's misery has proved to be not always propitious to wisdom."

"I will no more," said the favourite, "imagine myself the queen of Abissinia. I have often spent the hours, which the princess gave to my own disposal, in adjusting ceremonies, and regulating the court; I have repressed the pride of the powerful, and granted the petitions of the poor; I have built new palaces in more happy situations, planted groves upon the tops of mountains, and have exulted in the beneficence of royalty, till, when the princess entered, I had almost forgotten to bow down before her."

"And I," said the princess, "will not allow

myself any more to play the shepherdess in my waking dreams. I have often soothed my thoughts with the quiet and innocence of pastoral employments, till I have in my chamber heard the winds whistle, and the sheep bleat; sometimes freed the lamb entangled in the thicket, and sometimes with my crook encountered the wolf. I have a dress like that of the village maids, which I put on to help my imagination, and a pipe on which I play softly, and suppose myself followed by my flocks."

"I will confess," said the prince, "an indulgence of fantastic delight more dangerous than yours. I have frequently endeavoured to imagine the possibility of a perfect government, by which all wrong should be restrained, all vice reformed, and all the subjects preserved in tranquillity and innocence. This thought produced innumerable schemes of reformation, and dictated many useful regulations and salutary edicts. This has been the sport, and sometimes the labour, of my solitude: and I start, when I think with how little anguish I once supposed the death of my father and my brothers."

"Such," said Imlac, "are the effects of visionary schemes: when we first form them, we know them to be absurd, but familiarize them by degrees, and in time lose sight of their folly."

#### CHAPTER XLV.

*They discourse with an Old Man.*

THE evening was now far past, and they rose to return home. As they walked along the bank of the Nile, delighted with the beams of the moon quivering on the water, they saw, at a small distance, an old man whom the prince had often heard in the assembly of the sages. "Yonder," said he, "is one whose years have calmed his passions, but not clouded his reason: let us close the disquisitions of the night, by inquiring what are his sentiments of his own state, that we may know whether youth alone is to struggle with vexation, and whether any better hope remains for the latter part of life."

Here the sage approached and saluted them. They invited him to join their walk, and prattled a while as acquaintance that had unexpectedly met one another. The old man was cheerful and talkative, and the way seemed short in his company. He was pleased to find himself not disregarded, accompanied them to their house, and, at the prince's request, entered with them. They placed him in the seat of honour, and set wine and conserves before him.

"Sir," said the princess, "an evening walk must give to a man of learning like you pleasures which ignorance and youth can hardly conceive.

You know the qualities and the causes of all that you behold, the laws by which the river flows, the periods in which the planets perform their revolutions. Every thing must supply you with contemplation, and renew the consciousness of your own dignity."

"Lady," answered he, "let the gay and the vigorous expect pleasure in their excursions: it is enough that age can attain ease. To me the world has lost its novelty: I look round, and see what I remember to have seen in happier days. I rest against a tree, and consider, that in the same shade I once disputed upon the annual overflow of the Nile with a friend who is now silent in the grave. I cast my eyes upwards, fix them on the changing moon, and think with pain on the vicissitudes of life. I have ceased to take much delight in physical truth; for what have I to do with those things which I am soon to leave?"

"You may at least recreate yourself," said Imlac, "with the recollection of an honourable and useful life, and enjoy the praise which all agree to give you."

"Praise," said the sage, with a sigh, "is to an old man an empty sound. I have neither mother to be delighted with the reputation of her son, nor wife to partake the honours of her husband. I have outlived my friends and my rivals. Nothing is now of much importance; for I cannot extend my interest beyond myself. Youth is delighted with applause, because it is considered as the earnest of some future good, and because the prospect of life is far extended: but to me, who am now declining to decrepitude, there is little to be feared from the malevolence of men, and yet less to be hoped from their affection or esteem. Something they may yet take away, but they can give me nothing. Riches would now be useless, and high employment would be pain. My retrospect of life recalls to my view many opportunities of good neglected, much time squandered upon trifles, and more lost in idleness and vacancy. I leave many great designs unattempted, and many great attempts unfinished. My mind is burdened with no heavy crime, and therefore I compose myself to tranquillity; endeavour to abstract my thoughts from hopes and cares, which, though reason knows them to be vain, still try to keep their old possession of the heart; expect, with serene humility, that hour which nature cannot long delay, and hope to possess, in a better state, that happiness which here I could not find, and that virtue which here I have not attained."

He arose and went away, leaving his audience not much elated with the hope of long life. The prince consoled himself with remarking, that it was not reasonable to be disappointed by this account; for age had never been considered as the season of felicity, and, if it was possible to-

be easy in decline and weakness, it was likely that the days of vigour and alacrity might be happy: that the noon of life might be bright, if the evening could be calm.

The princess suspected that age was querulous and malignant, and delighted to repress the expectations of those who had newly entered the world. She had seen the possessors of estates look with envy on their heirs, and known many who enjoyed pleasure no longer than they could confine it to themselves.

Pekuah conjectured that the man was older than he appeared, and was willing to impute his complaints to delirious dejection; or else supposed that he had been unfortunate, and was therefore discontented: "For nothing," said she, "is more common than to call our own condition the condition of life."

Imlac, who had no desire to see them depressed, smiled at the comforts which they could so readily procure to themselves; and remembered, that at the same age he was equally confident of unmingled prosperity, and equally fertile of consolatory expedients. He forbore to force upon them unwelcome knowledge, which time itself would too soon impress. The princess and her lady retired; the madness of the astronomer hung upon their minds; and they desired Imlac to enter upon his office, and delay next morning the rising of the sun.

## CHAPTER XLVI.

### *The Princess and Pekuah visit the Astronomer.*

THE princess and Pekuah, having talked in private of Imlac's astronomer, thought his character at once so amiable and so strange, that they could not be satisfied without a nearer knowledge; and Imlac was requested to find the means of bringing them together.

This was somewhat difficult; the philosopher had never received any visits from women, though he lived in a city that had in it many Europeans, who followed the manners of their own countries, and many from other parts of the world, that lived there with European liberty. The ladies would not be refused, and several schemes were proposed for the accomplishment of their design. It was proposed to introduce them as strangers in distress, to whom the sage was always accessible; but, after some deliberation, it appeared, that by this artifice, no acquaintance could be formed, for their conversation would be short, and they could not decently importune him often. "This," said Rasselas, "is true: but I have yet a stronger objection against the misrepresentation of your state. I have always considered it as treason against the great republic of human nature, to

make any man's virtues the means of deceiving him, whether on great or little occasions. All imposture weakens confidence, and chills benevolence. When the sage finds that you are not what you seemed, he will feel the resentment natural to a man who, conscious of great abilities, discovers that he has been tricked by understandings meaner than his own, and, perhaps, the distrust which he can never afterwards wholly lay aside may stop the voice of counsel, and close the hand of charity; and where will you find the power of restoring his benefactions to mankind, or his peace to himself?"

To this no reply was attempted, and Imlac began to hope that their curiosity would subside; but, next day, Pekuah told him, she had now found an honest pretence for a visit to the astronomer, for she would solicit permission to continue under him the studies in which she had been initiated by the Arab, and the princess might go with her, either as a fellow-student, or because a woman could not decently come alone. "I am afraid," said Imlac, "that he will soon be weary of your company; men advanced far in knowledge do not love to repeat the elements of their art; and I am not certain that even of the elements, as he will deliver them connected with inferences and mingled with reflections, you are a very capable audittress."—"That," said Pekuah, "must be my care: I ask of you only to take me thither. My knowledge is, perhaps, more than you imagine it; and by concurring always with his opinions, I shall make him think it greater than it is."

The astronomer, in pursuance of this resolution, was told that a foreign lady, travelling in search of knowledge, had heard of his reputation, and was desirous to become his scholar. The uncommonness of the proposal raised at once his surprise and curiosity, and when after a short deliberation, he consented to admit her, he could not stay without impatience till the next day.

The ladies dressed themselves magnificently, and were attended by Imlac to the astronomer, who was pleased to see himself approached with respect by persons of so splendid an appearance. In the exchange of the first civilities, he was timorous and bashful; but when the talk became regular, he recollected his powers, and justified the character which Imlac had given. Inquiring of Pekuah what could have turned her inclination towards astronomy, he received from her a history of her adventure at the pyramid, and of the time passed in the Arab's island. She told her tale with ease and elegance, and her conversation took possession of his heart. The discourse was then turned to astronomy: Pekuah displayed what she knew: he looked upon her as a prodigy of genius, and entreated her not to desist from a study which she had so happily begun.

They came again and again, and were every time more welcome than before. The sage endeavoured to amuse them, that they might prolong their visits, for he found his thoughts grow brighter in their company; the clouds of solicitude vanished by degrees, as he forced himself to entertain them, and he grieved when he was left, at their departure, to his old employment of regulating the seasons.

The princess and her favourite had now watched his lips for several months, and could not catch a single word from which they could judge whether he continued, or not, in the opinion of his preternatural commission. They often contrived to bring him to an open declaration; but he easily eluded all their attacks, and, on which side soever they pressed him, escaped from them to some other topic.

As their familiarity increased, they invited him often to the house of Imlac, where they distinguished him by extraordinary respect. He began gradually to delight in sublimary pleasures. He came early, and departed late; laboured to recommend himself by assiduity and compliance, excited their curiosity after new arts, that they might still want his assistance; and when they made any excursion of pleasure or inquiry, entreated to attend them.

By long experience of his integrity and wisdom, the prince and his sister were convinced that he might be trusted without danger: and, lest he should draw any false hopes from the civilities which he received, discovered to him their condition, with the motives of their journey, and required his opinion on the choice of life.

"Of the various conditions which the world spreads before you, which you shall prefer," said the sage, "I am not able to instruct you. I can only tell that I have chosen wrong. I have passed my time in study without experience: in the attainment of sciences which can, for the most part, be but remotely useful to mankind. I have purchased knowledge at the expense of all the common comforts of life: I have missed the endearing elegance of female friendship, and the happy commerce of domestic tenderness. If I have obtained any prerogatives above other students, they have been accompanied with fear, disquiet, and scrupulosity; but even of these prerogatives, whatever they were, I have, since my thoughts have been diversified by more intercourse with the world, begun to question the reality. When I have been for a few days lost in pleasing dissipation, I am always tempted to think that my inquiries have ended in error, and that I have suffered much, and suffered it in vain."

Imlac was delighted to find that the sage's understanding was breaking through its mists, and resolved to detain him from the planets till he should forget his task of ruling them, and reason should recover its original influence.

From this time the astronomer was received into familiar friendship, and partook of all their projects and pleasures: his respect kept him attentive, and the activity of Rasselas did not leave much time unengaged. Something was always to be done: the day was spent in making observations, which furnished talk for the evening, and the evening was closed with a scheme for the morrow.

The sage confessed to Imlac, that since he had mingled in the gay tumults of life, and divided his hours by a succession of amusements, he found the conviction of his authority over the skies fade gradually from his mind, and began to trust less to an opinion which he never could prove to others, and which he now found subject to variation, from causes in which reason had no part. "If I am accidentally left alone for a few hours," said he, "my inveterate persuasion rushes upon my soul, and my thoughts are chained down by some irresistible violence; but they are soon disentangled by the prince's conversation, and instantaneously released at the entrance of Pekuah. I am like a man habitually afraid of spectres, who is set at ease by a lamp, and wonders at the dread which harassed him in the dark, yet, if his lamp be extinguished, feels again the terrors which he knows that when it is light he shall feel no more. But I am sometimes afraid, lest I indulge my quiet by criminal negligence, and voluntarily forget the great charge with which I am intrusted. If I favour myself in a known error, or am determined by my own ease in a doubtful question of this importance, how dreadful is my crime!"

"No disease of the imagination," answered Imlac, "is so difficult of cure, as that which is complicated with the dread of guilt; fancy and conscience then act interchangeably upon us, and so often shift their places, that the illusions of one are not distinguished from the dictates of the other. If fancy presents images not moral or religious, the mind drives them away when they give it pain; but when melancholy notions take the form of duty, they lay hold on the faculties without opposition, because we are afraid to exclude or banish them. For this reason the superstitious are often melancholy, and the melancholy almost always superstitious.

"But do not let the suggestions of timidity overpower your better reason: the danger of neglect can be but as the probability of the obligation, which, when you consider it with freedom, you find very little, and that little growing every day less. Open your heart to the influence of the light, which, from time to time, breaks in upon you: when scruples importune you, which you in your lucid moments know to be vain, do not stand to parley but fly to business, or to Pekuah; and keep this thought always prevalent, that you are only one atom of the mass of humanity, and have neither such virtue nor vice

as that you should be singled out for supernatural favours or afflictions."

## CHAPTER XLVII.

*The Prince enters and brings a new Topic.*

"ALL this," said the astronomer, "I have often thought; but my reason has been so long subjugated by an uncontrollable and overwhelming idea, that it durst not confide in its own decisions. I now see how fatally I betrayed my quiet, by suffering chimeras to prey upon me in secret; but melancholy shrinks from communication, and I never found a man before to whom I could impart my troubles, though I had been certain of relief. I rejoice to find my own sentiments confirmed by yours, who are not easily deceived, and can have no motive or purpose to deceive. I hope that time and variety will dissipate the gloom that has so long surrounded me, and the latter part of my days will be spent in peace."

"Your learning and virtue," said Imlac, "may justly give you hopes."

Rasselas then entered, with the princess and Pekuah, and inquired whether they had contrived any new diversion for the next day. "Such," said Nekayah, "is the state of life, that none are happy but by the anticipation of change: the change itself is nothing; when we have made it, the next wish is to change again. The world is not yet exhausted; let me see something to-morrow which I never saw before."

"Variety," said Rasselas, "is so necessary to content, that even the happy valley disgusted me by the recurrence of its luxuries; yet I could not forbear to reproach myself with impatience, when I saw the monks of St. Anthony support, without complaint, a life, not of uniform delight, but uniform hardship."

"Those men," answered Imlac, "are less wretched in their silent convent than the Abissinian princes in their prison of pleasure. Whatever is done by the monks is incited by an adequate and reasonable motive. Their labour supplies them with necessities; it therefore cannot be omitted, and is certainly rewarded. Their devotion prepares them for another state, and reminds them of its approach, while it fits them for it. Their time is regularly distributed; one duty succeeds another; so that they are not left open to the distraction of unguided choice, nor lost in the shades of listless inactivity. There is a certain task to be performed at an appropriated hour; and their toils are cheerful, because they consider them as acts of piety, by which they are always advancing towards endless felicity."

"Do you think," said Nekayah, "that the monastic rule is a more holy and less imperfect

state than any other? May not he equally hope for future happiness who converses openly with mankind, who succours the distressed by his charity, instructs the ignorant by his learning, and contributes by his industry to the general system of life; even though he should omit some of the mortifications which are practised in the cloister, and allow himself such harmless delights, as his condition may place within his reach?"

"This," said Imlac, "is a question which has long divided the wise, and perplexed the good. I am afraid to decide on either part. He that lives well in the world is better than he that lives well in a monastery. But, perhaps, every one is not able to stem the temptations of public life; and, if he cannot conquer, he may properly retreat. Some have little power to do good, and have likewise little strength to resist evil. Many are weary of their conflicts with adversity, and are willing to eject those passions which have long busied them in vain. And many are dismissed by age and diseases from the more laborious duties of society. In monasteries the weak and timorous may be happily sheltered, the weary may repose, and the penitent may meditate. Those retreats of prayer and contemplation have something so congenial to the mind of man, that, perhaps, there is scarcely one that does not purpose to close his life in pious abstraction, with a few associates serious as himself."

"Such," said Pekuah, "has often been my wish; and I have heard the princess declare, that she should not willingly die in a crowd."

"The liberty of using harmless pleasures," proceeded Imlac, "will not be disputed; but it is still to be examined what pleasures are harmless. The evil of any pleasure that Nekayah can image is not in the act itself, but in its consequences. Pleasure, in itself harmless, may become mischievous, by endeavouring to us a state which we know to be transient and probatory, and withdrawing our thoughts from that, of which every hour brings us nearer to the beginning, and of which no length of time will bring us to the end. Mortification is not virtuous in itself, nor has any other use, but that it disengages us from the allurements of sense. In the state of future perfection, to which we all aspire, there will be pleasure without danger, and security without restraint."

The princess was silent, and Rasselas, turning to the astronomer, asked him whether he could not delay her retreat, by showing her something which she had not seen before.

"Your curiosity," said the sage, "has been so general, and your pursuit of knowledge so vigorous, that novelties are not now very easily to be found: but what you can no longer procure from the living may be given by the dead. Among the wonders of this country are the catacombs, or the ancient repositories, in which the

bodies of the earliest generations were lodged, and where, by the virtue of the gums which embalmed them, they yet remain without corruption."

"I know not," said Rasselas, "what pleasure the sight of the catacombs can afford; but, since nothing else is offered, I am resolved to view them, and shall place this with my other things which I have done, because I would do something."

They hired a guard of horsemen, and the next day visited the catacombs. When they were about to descend into the sepulchral caves, "Pekuah," said the princess, "we are now again invading the habitations of the dead, I know that you will stay behind; let me find you safe when I return."—"No, I will not be left," answered Pekuah: "I will go down between you and the prince."

They then all descended, and roved with wonder through the labyrinth of subterraneous passages, where the bodies were laid in rows on either side.

## CHAPTER XLVIII.

*Imlac discourses on the Nature of the Soul.*

"WHAT reason," said the prince, "can be given, why the Egyptians should thus expensively preserve those carcases which some nations consume with fire, others lay to mingle with the earth, and all agree to remove from their sight as soon as decent rites can be performed?"

"The original of ancient customs," said Imlac, "is commonly unknown; for the practice often continues when the cause has ceased: and concerning superstitious ceremonies, it is vain to conjecture; for what reason did not dictate, reason cannot explain. I have long believed that the practice of embalming arose only from tenderness to the remains of relations or friends; and to this opinion I am more inclined, because it seems impossible that this care should have been general; had all the dead been embalmed, their repositories must in time have been more spacious than the dwellings of the living. I suppose only the rich or honourable were secured from corruption, and the rest left to the course of nature.

"But it is commonly supposed that the Egyptians believed the soul to live as long as the body continued undissolved, and therefore tried this method of eluding death."

"Could the wise Egyptians," said Nekayah, "think so grossly of the soul? If the soul could once survive its separation, what could it afterwards receive or suffer from the body?"

"The Egyptians would doubtless think erro-

neously," said the astronomer, "in the darkness of heathenism, and the first dawn of philosophy. The nature of the soul is still disputed, amidst all our opportunities of clearer knowledge: some yet say, that it may be material, who, nevertheless, believe it to be immortal."

"Some," answered Imlac, "have indeed said that the soul is material, but I can scarcely believe that any man has thought it who knew how to think; for all the conclusions of reason enforce the immateriality of mind, and all the notices of sense and investigations of science concur to prove the unconsciousness of matter.

"It was never supposed that cogitation is inherent in matter, or that every particle is a thinking being. Yet if any part of matter be devoid of thought, what part can we suppose to think? Matter can differ from matter only in form, density, bulk, motion, and direction of motion. To which of these, however varied or combined, can consciousness be annexed? To be round or square, to be solid or fluid, to be great or little, to be moved slowly or swiftly, one way or another, are modes of material existence, all equally alien from the nature of cogitation. If matter be once without thought, it can only be made to think by some new modification; but all the modifications which it can admit are equally unconnected with cognitive powers."

"But the materialists," said the astronomer, "urge that matter may have qualities with which we are unacquainted."

"He who will determine," returned Imlac, "against that which he knows, because there may be something which he knows not; he that can set hypothetical possibility against acknowledged certainty, is not to be admitted among reasonable beings. All that we know of matter is, that matter is inert, senseless, and lifeless; and if this conviction cannot be opposed but by referring us to something that we know not, we have all the evidence that human intellect can admit. If that which is known may be overruled by that which is unknown, no being, not omniscient, can arrive at certainty."

"Yet let us not," said the astronomer, "too arrogantly limit the Creator's power."

"It is no limitation of Omnipotence," replied the poet, "to suppose that one thing is not consistent with another, that the same proposition cannot be at once true and false, that the same number cannot be even and odd, that cogitation cannot be conferred on that which is created incapable of cogitation."

"I know not," said Nekayah, "any great use of this question. Does that immateriality, which, in my opinion, you have sufficiently proved, necessarily include eternal duration?"

"Of immateriality," said Imlac, "our ideas

are negative, and therefore obscure. Immateriality seems to imply a natural power of perpetual duration as a consequence of exemption from all causes of decay: whatever perishes is destroyed by the solution of its contexture, and separation of its parts; nor can we conceive how that which has no parts, and therefore admits no solution, can be naturally corrupted or impaired."

"I know not," said Rasselas, "how to conceive any thing without extension: what is extended must have parts, and you allow that whatever has parts may be destroyed."

"Consider your own conceptions," replied Imlac, "and the difficulty will be less. You will find substance without extension. An ideal form is no less real than material bulk; yet an ideal form has no extension. It is no less certain, when you think on a pyramid, that your mind possesses the idea of a pyramid, than that the pyramid itself is standing. What space does the idea of a pyramid occupy more than the idea of a grain of corn? or how can either idea suffer laceration? As is the effect, such is the cause; as thought, such is the power that thinks, a power impassive and indiscerptible."

"But the Being," said Nekayah, "whom I fear to name, the Being which made the soul, can destroy it."

"He surely can destroy it," answered Imlac, "since, however unperishable, it receives from a superior nature its power of duration. That it will not perish by any inherent cause of decay, or principle of corruption, may be shown by philosophy; but philosophy can tell no more. That it will not be annihilated by Him that made it, we must humbly learn from higher authority."

The whole assembly stood a while silent, and collected. "Let us return," said Rasselas, "from this scene of mortality. How gloomy would be these mansions of the dead to him who did not know that he should never die; that what now acts shall continue its agency, and what now thinks shall think on for ever. Those that lie here stretched before us, the wise and the powerful of ancient times, warn us to remember the shortness of our present state: they were, perhaps, snatched away while they were busy, like us, in the choice of life."

"To me," said the princess, "the choice of life is become less important; I hope hereafter to think only on the choice of eternity."

They then hastened out of the caverns, and, under the protection of their guard, returned to Cairo.

## CHAPTER XLIX.

*The Conclusion, in which Nothing is concluded.*

It was now the time of the inundation of the Nile: a few days after their visit to the catacombs the river began to rise.

They were confined to their house. The whole region being under water, gave them no invitation to any excursions; and being well supplied with materials for talk, they diverted themselves with comparisons of the different forms of life which they had observed, and with various schemes of happiness which each of them had formed.

Pekuah was never so much charmed with any place as the convent of St. Anthony, where the Arab restored her to the princess, and wished only to fill it with pious maidens, and to be made prioress of the order: she was weary of expectation and disgust, and would gladly be fixed in some unvariable state.

The princess thought, that, of all sublunary things, knowledge was the best. She desired first to learn all sciences, and then proposed to found a college of learned women, in which she would preside, that, by conversing with the old, and educating the young, she might divide her time between the acquisition and communication of wisdom, and raise up for the next age models of prudence and patterns of piety.

The prince desired a little kingdom, in which he might administer justice in his own person, and see all the parts of government with his own eyes; but he could never fix the limits of his dominion, and was always adding to the number of his subjects.

Imlac and the astronomer were contented to be driven along the stream of life, without directing their course to any particular port.

Of these wishes that they had formed, they well knew that none could be obtained. They deliberated a while what was to be done, and resolved, when the inundation should cease, to return to Abissinia.

## A Poem :

IN IMITATION OF THE

### THIRD SATIRE OF JUVENAL.

WRITTEN IN 1738.

—Quis inepta

Tam patiens urbis, tam ferreus ut teneat se?

JUV.

Though grief and fondness in my breast rebel,  
When injured Thales\* bids the town farewell,  
Yet still my calmer thoughts his choice commend,

I praise the hermit, but regret the friend,  
Resolved at length, from vice and London far,  
To breathe in distant fields a purer air,

#### JUV. SAT. III.

<sup>1</sup> Quamvis digressu veteris confusus amici;  
Laudo tamen vacuis quod sedem figere Cumis  
Destinet, atque unum civem donare Sibyllæ.

\* Sir John Hawkins says, that by Thales we are here to understand Savage. Mr. Boswell asserts that this is entirely groundless, and adds, "I have been assured that Dr. Johnson said, he was not so much as acquainted with Savage when he wrote his 'London.'" This added to the circumstance of the date (for Savage did not set out for Wales till 1739) might be decisive, if, unfortunately for Mr. Boswell, he had not, a few pages after, given us some highly complimentary lines which "he was assured were written by Dr. Johnson," "Ad Ricardum Savage," in April, 1738, about a month before "London" was published. This surely implies previous acquaintance with Savage, for Dr. Johnson would not have praised a stranger in such terms, and gives a very strong probability to Sir John Hawkins' conjecture. That Savage did not set out for Wales until the following year, is a matter of little consequence, as the *intention* of such a journey would justify the lines alluding to it. See Boswell's *Life of Johnson*, vol. i. p. 100, and p. 139, 8vo. edit. 1804.—C.

And fix'd on Cambria's solitary shore,  
Give to St. David one true Briton more.

<sup>2</sup> For who would leave, unbribed, Hibernia's  
land,

Or change the rocks of Scotland for the Strand?  
There none are swept by sudden fate away,  
But all, whom hunger spares, with age decay:  
Here malice, rapine, accident conspire,  
And now a rabble rages, now a fire;  
Their ambush here relentless ruffians lay,  
And here the fell attorney prowls for prey;  
Here falling houses thunder on your head,  
And here a female Atheist talks you dead.

<sup>3</sup> While Thales waits the wherry that contains  
Of dissipated wealth the small remains,  
On Thames's banks, in silent thought we stood  
Where Greenwich smiles upon the silver flood;  
Struck with the seat that gave Eliza\* birth,  
We kneel and kiss the consecrated earth;  
In pleasing dreams the blissful age renew,  
And call Britannia's glories back to view;

<sup>4</sup> —Ego vel Prochytam præpono Suburræ.  
Nam quid tam miserum, et tam solum vidimus,  
ut non

Deterius credas horrere incendia, lapsus  
Tectorum assiduus, ac mille pericula sævæ  
Urbis, et Augusto recitantes mense poetæ?

<sup>5</sup> Sed dum tota domus rhedâ componitur unâ,  
Substitit ad veteres arcus.—

\* Queen Elizabeth, born at Greenwich.

Behold her cross triumphant on the main,  
The guard of commerce, and the dread of Spain,  
Ere masquerades debauch'd, excise oppress'd,  
Or English honour grew a standing jest.

A transient calm the happy scenes bestow,  
And for a moment lull the sense of woe.  
At length awaking, with contemptuous frown,  
Indignant Thales eyes the neighbouring town.

<sup>4</sup> Since worth, he cries, in these degenerate days

Wants even the cheap reward of empty praise;  
In those cursed walls, devote to vice and gain,  
Since unrewarded Science toils in vain;  
Since hope but soothes to double my distress,  
And every moment leaves my little less;  
While yet my steady steps no <sup>5</sup> staff sustains,  
And life still vigorous revels in my veins;  
Grant me, kind Heaven, to find some happier place,

Where honesty and sense are no disgrace;  
Some pleasing bank where verdant osiers play,  
Some peaceful vale with Nature's paintings gay;  
Where once the harass'd Briton found repose,  
And, safe in poverty, defy'd his foes;  
Some secret cell, ye Powers, indulgent give,  
<sup>6</sup> Let — live here, for — has learn'd to live.  
Here let those reign, whom pensions can incite  
To vote a patriot black, a courtier white;  
Explain their country's dear-bought rites away,  
And plead for <sup>\*</sup> pirates in the face of day;  
With slavish tenets taint our poison'd youth,  
And lend a lie the confidence of truth.

<sup>7</sup> Let such raise palaces, and manors buy,  
Collect a tax, or farm a lottery;  
With warbling eunuchs † fill a licensed stage,  
And lull to servitude a thoughtless age.

Heroes, proceed! what bounds your pride  
shall hold? [gold?  
What check restrain your thirst for power and  
Behold rebellious Virtue quite o'erthrown,  
Behold our fame, our wealth, our lives your  
own.

<sup>4</sup> Hinc tunc Umbritius: Quando artibus, inquit, honestis

Nullus in urbe locus, nulla emolumenta laborum,  
Res hodie minor est, heri quam fuit, atque eadem cras

Deteret exiguis aliquid: proponimus illuc  
Ire, fatigatas ubi Dædalus exiit alas:

Dum nova canities. —

<sup>5</sup> — et pedibus me  
Porto meis, nullo dextram subeunte bacillo.

<sup>6</sup> Cedamus patriâ: vivant Arturii istic  
Et Catulus: maneant qui nigra in candida vertunt.

<sup>7</sup> Queis facile est ædem conducere, flumina, portus, [daver —  
Siccandam eluviem, portandum ad busta camunera nunc edunt.

To such the plunder of a land is given,  
When public crimes inflame the wrath of Heaven: [we,

<sup>8</sup> But what, my friend, what hope remains for  
Who start at theft, and blush at perjury?  
Who scarce forbear, though Britain's court he  
To pluck a titled poet's borrow'd wing; [sing,  
A statesman's logic unconvinced can hear,  
And dare to slumber o'er the <sup>\*</sup> Gazetteer;  
And strive in vain to laugh at Clodio's jest.

<sup>9</sup> Others with softer smiles and subtler art,  
Can sap the principles, or taint the heart;  
With more address a lover's note convey,  
Or bribe a virgin's innocence away.  
Well may they rise, while I, whose rustic tongue  
Ne'er knew to puzzle right, or varnish wrong,  
Spurn'd as a beggar, dreaded as a spy,  
Live unregarded, unlamented die.

<sup>10</sup> For what but social guilt the friend endears?  
Who shares Orgilio's crimes, his fortune shares;  
<sup>11</sup> But thou, should tempting Villany present  
All Marlborough hoarded, or all Villiers spent,  
Turn from the glittering bribe thy scornful eye,  
Nor sell for gold, what gold could never buy,  
The peaceful slumber, self-approving day,  
Unsullied fame, and conscience ever gay.

<sup>12</sup> The cheated nation's happy favourites see!  
Mark whom the great caress, who frown on me!  
London! the needy villain's general home,  
The common-sewer of Paris and of Rome!  
With eager thirst, by folly or by fate,  
Sucks in the dregs of each corrupted state.  
Forgive my transports on a theme like this,  
<sup>13</sup> I cannot bear a French metropolis.

<sup>14</sup> Illustrious Edward! from the realms of day,  
The land of heroes and of saints survey;  
Nor hope the British lineaments to trace  
The rustic grandeur, or the surly grace;  
But, lost in thoughtless ease and empty show,  
Behold the warrior dwindled to a beau;  
Sense, freedom, piety, refined away,  
Of France the mimic, and of Spain the prey.

<sup>8</sup> Quid Romæ faciam? mentiri nescio: librum,  
Si malus est, nequeo laudare et poscere. —

<sup>9</sup> — Ferre ad nuptiam quæ mittit adulter,  
Quæ mandat, norint alii; me nemo ministro  
Fur erit, atque ideo nulli comes exeo.

<sup>10</sup> Quis nunc diligitur, nisi conscius? —  
Carus erit Verri, qui Verrem tempore, quo vult,  
Accusare potest. —

<sup>11</sup> — Tanti tibi non sit opaci  
Omnis arena Tagi, quodque in mare volvitur  
Ut somno careas. [aurum.

<sup>12</sup> Quæ nunc divitibus gens acceptissima  
nostris,

Et quos præcipue fugiam, properabo fateri.

<sup>13</sup> — Non possum ferre, Quirites,

Græcam urbem. —

<sup>14</sup> Rusticus ille tuns sumit trechedipna,  
Et ceromatico fert niceteria collo. [Quirine,

\* The invasions of the Spaniards were defended in the Houses of Parliament.

† The Licensing Act was then lately made.

\* The paper which at that time contained apologies for the Court.

All that at home no more can beg or steal,  
Or like a gibbet better than a wheel;  
Hiss'd from the stage, or hooted from the court,  
Their air, their dress, their politics, import;  
<sup>15</sup> Obsequious, artful, voluble and gay,  
On Britain's fond credulity they prey.  
No gainful trade their industry can 'scape,  
<sup>16</sup> They sing, they dance, clean shoes, or cure a  
clap:

All sciences a fasting Monsieur knows,  
And, bid him go to hell, to hell he goes.

<sup>17</sup> Ah! what avails it, that from slavery far,  
I drew the breath of life in English air;  
Was early taught a Briton's right to prize,  
And lisp the tale of Henry's victories;  
If the gull'd conqueror receives the chain,  
And flattery prevails when arms are vain?

<sup>18</sup> Studious to please, and ready to submit,  
The supple Gaul was born a parasite:  
Still to his interest true where'er he goes,  
Wit, bravery, worth, his lavish tongue bestows;  
In every face a thousand graces shine,  
From every tongue flows harmony divine.  
<sup>19</sup> These arts in vain our rugged natives try,  
Strain out with falt'ring diffidence, a lie,  
And get a kick for awkward flattery.

Besides, with justice, this discerning age  
Admires their wondrous talents for the stage:

<sup>20</sup> Well may they venture on the mimic's art,  
Who play from morn to night a borrow'd part;  
Practised their master's notions to embrace,  
Repeat his maxims, and reflect his face;  
With every wild absurdity comply,  
And view each object with another's eye;  
To shake with laughter ere the jest they hear,  
To pour at will the counterfeited tear;  
And, as their patron hints the cold or heat,  
To shake in dog-days, in December sweat.

<sup>21</sup> How, when competitors like these contend,  
Can surly virtue hope to fix a friend?  
Slaves that with serious impudence beguile,  
And lie without a blush, without a smile;  
Exalt each trifle, every vice adore,  
Your taste in snuff, your judgment in a whore;

<sup>15</sup> Ingenium velox, audacia perdita, sermo  
Promptus.——

<sup>16</sup> Augur, schenobates, medicus, magus:  
omnia novit.

Græculus esuriens, in cælum, jusseris, ibit.

<sup>17</sup> Usque adeo nihil est, quod nostra infantia  
Hæsit Aventini?—— [cælum]

<sup>18</sup> Quid? quod adulandi gens prudentissima,  
laudat

Sermonem indocti, faciem deformis amici?

<sup>19</sup> Hæc eadem licet et nobis laudare: sed illis  
Creditor.——

<sup>20</sup> Natio comæda est. Rides? majore ca-  
Concutitur, &c. [chinno]

<sup>21</sup> Non sumus ergo pares: melior qui semper  
et omni

Nocte dieque potest alienum sumere vultum,  
A facie jactare manus: laudare paratus,  
Si bene ructavit, si rectum minxit amicus.——

Can Balbo's eloquence applaud, and swear  
He gropes his breeches with a Monarch's air.

For arts like these preferr'd, admired, caress'd,  
They first invade your table, then your breast;  
<sup>22</sup> Explore your secrets with insidious art,  
Watch the weak hour, and ransack all the  
heart;

Then soon your ill-placed confidence repay,  
Commence your lords, and govern or betray.

<sup>23</sup> By numbers here from shame or censure  
All crimes are safe, but hated poverty. [free,

This, only this, the rigid law pursues,  
This, only this, provokes the snarling Muse.  
The sober trader at a tatter'd cloak

Wakes from his dream, and labours for a joke;  
With brisker air the silken courtiers gaze,  
And turn the varied taunt a thousand ways.

<sup>24</sup> Of all the griefs that harass the distress'd,  
Sure the most bitter is a scornful jest;  
Fate never wounds more deep the generous  
heart,

Than when a blockhead's insult points the dart.

<sup>25</sup> Has Heaven reserved, in pity to the poor,  
No pathless waste, or undiscover'd shore?  
No secret island in the boundless main?  
No peaceful desert yet unclaim'd\* by Spain?  
Quick let us rise, the happy seats explore,  
And bear Oppression's insolence no more.

This mournful truth is every where confess'd,  
<sup>26</sup> Slow rises worth by poverty depress'd:

But here more slow, where all are slaves to  
gold, [sold:  
Where looks are merchandise and smiles are  
Where, won by bribes, by flatteries implored,  
The groom retails the favours of his lord.

But hark! the affrighted crowd's tumultu-  
ous cries [skies:

Roll through the streets, and thunder to the  
Raised from some pleasing dream of wealth and  
power,

Some pompous palace, or some blissful bower,  
Aghast you start, and scarce with aching sight  
Sustain the approaching fire's tremendous light;

<sup>22</sup> Scire volunt secreta domus atque inde timeri.

<sup>23</sup> —— Materiam præbet causasque jocorum  
Omnibus hîc idem? si fœda et scissa lacerna, &c.

<sup>24</sup> Nil habet infelix paupertas durius in se,  
Quam quod ridiculos homines facit.

<sup>25</sup> —— Agmine facto,

Debuerant olim tenues migrasse Quirites.

<sup>26</sup> Haud facile emergunt, quorum virtutibus  
obstat

Res angusta domi; sed Romæ durior illis  
Conatus.——

—— Omnia Romæ

Cum pretio.——

Cogimur, et cultis augere peculia servis.

\* The Spaniards at this time were said to make  
claim to some of our American provinces.

Swift from pursuing horrors take your way,  
And leave your little all to flames a prey;  
27 Then through the world a wretched vagrant  
    roam,

For where can starving merit find a home?  
In vain your mournful narrative disclose,  
While all neglect, and most insult your woes.

28 Should Heaven's just bolts Orgilio's wealth  
    confound,

And spread his flaming palace on the ground,  
Swift o'er the land the dismal rumour flies,  
And public mournings pacify the skies;  
The laureat tribe in venal verse relate,  
How virtue wars with persecuting fate;

29 With well-feign'd gratitude the pension'd  
    band

Refund the plunder of the beggar'd land.  
See! while he builds, the gaudy vassals come,  
And crowd with sudden wealth the rising dome;  
The price of boroughs and of souls restore;  
And raise his treasures higher than before:  
Now bless'd with all the baubles of the great,  
The polish'd marble, and the shining plate,  
30 Orgilio sees the golden pile aspire,  
And hopes from angry Heaven another fire.

31 Couldst thou resign the park and play con-  
    tent,

For the fair banks of Severn or of Trent;  
There might'st thou find some elegant retreat,  
Some hiring senator's deserted seat;  
And stretch thy prospects o'er the smiling land,  
For less than rents the dungeons of the Strand:  
There prune thy walks, support the drooping  
    flowers,

Direct thy rivulets, and twine thy bowers;  
And, while thy grounds a cheap repast afford,  
Despise the dainties of a venal lord;  
There every bush with Nature's music rings;  
There every breeze bears health upon its wings;  
On all thy hours security shall smile,  
And bless thine evening walk and morning toil.

32 Prepare for death, if here at night you  
    roam,

And sign your will before you sup from home.

33 ———— Ultimus autem

*Ærumnæ cumulus, quod nudum et frusta ro-  
    gantem*

*Nemo cibo, nemo hospitio, tectoque juvabit.*

34 Si magna Asturici cecidit domus, horrida  
    Pullati proceres. ———— [mater,

35 ———— Jam accurrit, qui marmora donet,

*Conferat impensas: hic, &c.*

*Hic modium argenti. ————*

36 ———— Meliora ac plura reponit

*Persicus orborum lautissimus. ————*

37 Si potes avelli Circensibus, optima Soræ,  
Aut Fabrateriæ domus, aut Frusinone paratur,  
Quanti nunc tenebras unum conducis in annum.  
*Hortulus hic. ————*

*Vive bidentis amans, et culti villiens horti,  
Unde epulum possis centum dare Pythagoræis.*

38 ———— Possis ignavus haberi,

*Et subiti casus improvidus, ad cenam si  
Intestatus eas. ————*

39 Some fiery fop, with new commission  
    vain,

Who sleeps on brambles till he kills his man;  
Some frolic drunkard, reeling from a feast,  
Provokes a broil, and stabs you for a jest.

40 Yet even these heroes, mischievously gay,  
Lords of the street, and terrors of the way;  
Flush'd as they are, with folly, youth, and  
    wine,

Their prudent insults to the poor confine:  
Afar they mark the flambeau's bright approach  
And shun the shining train, and golden coach.

41 In vain, these dangers past, your doors you  
    close,

And hope the balmy blessings of repose;  
Cruel with guilt, and daring with despair,  
The midnight murderer bursts the faithless bar;  
Invades the sacred hour of silent rest,  
And leaves, unseen, a dagger in your breast.

42 Scarce can our fields, such crowds at Tyburn  
    die,

With hemp the gallows and the fleet supply.  
Propose your schemes, ye senatorian band,  
Whose ways and means \* support the sinking  
    land:

Lest ropes be wanting in the tempting spring,  
To rig another convoy for the king. †

43 A single gaol, in Alfred's golden reign,  
Could half the nation's criminals contain:  
Fair justice, then, without constraint adored,  
Held high the steady scale, but sheath'd the  
    sword;

No spies were paid, no special juries known;  
Blest age! but ah! how different from our  
    own!

44 Much could I add—but see the boat at hand,  
The tide, retiring, calls me from the land:

45 Ebruius, ac petulans, qui nullum forte ceci-  
    dit,

*Dat penas, noctem patitur lugentis amicum  
Peleidae. ————*

46 ———— Sed, quamvis improbus annis,  
Atque mero fervens, cavet hunc, quem coecina  
    lena

*Vitari jubet, et comitum longissimus ordo,  
Multum præterea flammæ, atque ænea lam-  
    pas.*

47 Nec tamen hoc tantum metuas: nam qui  
    spoliet te  
Non deerit; clausis domibus, &c.

48 Maximus in vinculis ferri modus, ut timeas,  
Vomer deficiat, ne maræ et sarcula desint. [ne

49 Felices proavorum atavos, felicia dicas  
Sæcula, quæ quondam sub regibus atque tribunis  
Viderunt uno contentam carcere Romanam.

50 His alias poteram et plures subnectere cau-  
Sed jumenta vocant ———— [sas:

\* A cant term in the House of Commons, for the  
methods of raising money.

† The nation was discontented at the visits made  
by the king to Hanover.

<sup>20</sup> Farewell!—When youth, and health, and  
fortune spent,  
Thou fly'st for refuge to the Wilds of Kent;

<sup>21</sup> —Ergo vale nostri memor: et quoties te  
Roma tuo refici properantem reddet Aquino,  
Me quoque ad Elvinam Cererem, vestramque  
Dianam  
Convelle a Cumis: satirarum ego, ni pudet illas,  
Adjutor gelidos veniam caligatus in agros.

And, tired, like me, with follies and with  
crimes,  
In angry numbers warn'st succeeding times;  
Then shall thy friend, nor thou refuse his  
aid,  
Still foe to vice, forsake his Cambrian shade;  
In virtue's cause once more exert his rage,  
Thy satire point, and animate thy page.

## THE

## VANITY OF HUMAN WISHES;

IN IMITATION OF THE

TENTH SATIRE OF JUVENAL.

LET \* Observation, with extensive view,  
Survey mankind from China to Peru;  
Remark each anxious toil, each eager strife,  
And watch the busy scenes of crowded life;  
Then say, how hope and fear, desire and hate,  
O'erspread with snares the clouded maze of  
fate, [pride,

Where wavering man, betray'd by vent'rous  
To tread the dreary paths without a guide,  
As treacherous phantoms in the mist delude,  
Shuns fancied ills, or chases airy good;  
How rarely reason guides the stubborn choice,  
Rules the bold hand, or prompts the suppliant  
voice;

How nations sink, by darling schemes oppress'd,  
When Vengeance listens to the fool's request.  
Fate wings with every wish th' afflictive dart,  
Each gift of nature, and each grace of art;  
With fatal heat impetuous courage glows,  
With fatal sweetness elocution flows;  
Impeachment stops the speaker's powerful  
breath,

And restless fire precipitates on death.

† But, scarce observed, the knowing and the  
Fall in the general massacre of gold; [bold  
Wide wasting pest! that rages unconfined,  
And crowds with crimes the records of man-  
kind:

For gold his sword the hireling ruffian draws,  
For gold the hireling judge distorts the laws;  
Wealth heap'd on wealth, nor truth nor safety  
The dangers gather as the treasures rise. [buys,

Let History tell where rival kings command,  
And dubious title shakes the maddened land,  
When statutes glean the refuse of the sword,  
How much more safe the vassal than the lord;  
Low sculks the hind beneath the rage of power,  
And leaves the wealthy traitor in the Tower,  
Untouch'd his cottage, and his slumbers sound,  
Though Confiscation's vultures hover round.

The needy traveller, serene and gay,  
Walks the wild heath, and sings his toil away.  
Does envy seize thee? crush th' upbraiding joy;  
Increase his riches, and his peace destroy;  
Now fears in dire vicissitude invade,  
The rustling brake alarms, and quivering shade;  
Nor light nor darkness bring his pain relief,  
One shows the plunder, and one hides the thief.

Yet \* still one general cry the skies assails,  
And gain and grandeur load the tainted gales;  
Few know the tolling statesman's fear or care,  
Th' insidious rival and the gaping heir.

Once † more, Democritus, arise on earth,  
With cheerful wisdom and instructive mirth.  
See motley life in modern trappings dress'd,  
And feed with varied fools th' eternal jest:

\* Ver. 1—11. † Ver. 12—22.

\* Ver. 23—27. † Ver. 28—55.

Thou who could'st laugh where want enchain'd  
caprice,  
Toil crush'd conceit, and man was of a piece;  
Where wealth, unloved, without a mourner  
died;

And scarce a sycophant was fed by pride;  
Where ne'er was known the form of mock de-  
bate,

Or seen a new-made mayor's unwieldy state;  
Where change of favourites made no change of  
laws,

And senates heard before they judged a cause;  
How wouldst thou shake at Briton's modish  
tribe, [gibe?

Dart the quick taunt, and edge the piercing  
Attentive truth and nature to descry,  
And pierce each scene with philosophic eye,  
To thee were solemn toys, or empty show,  
The robes of pleasure and the veils of wo:  
All aid the farce, and all thy mirth maintain,  
Whose joys are causeless, and whose griefs are  
vain.

Such was the scorn that fill'd the sage's mind,  
Renew'd at every glance on human kind;  
How just that scorn ere yet thy voice declare,  
Search every state, and canvass every prayer.

\* Unnumber'd suppliants crowd Preferment's  
gate,

A thirst for wealth, and burning to be great;  
Delusive Fortune hears th' incessant call,  
They mount, they shine, evaporate, and fall.  
On every stage the foes of peace attend,  
Hate dogs their flight, and insult mocks their  
end.

Love ends with hope, the sinking statesman's  
door

Pours in the morning worshipper no more;  
For growing names the weekly scribbler lies,  
To growing wealth the dedicat'or flies,  
From every room descends the painted face,  
That hung the bright palladium of the place;  
And, smoked in kitchens, or in auctions sold,  
To better features yields the frame of gold;  
For now no more we trace in every line  
Heroic worth, benevolence divine:  
The form distorted, justifies the fall,  
And detestation rides th' indignant wall.

But will not Britain hear the last appeal,  
Sign her foes' doom, or guard her favourites'  
zeal? [rings,

Through Freedom's sons no more remonstrance  
Degrading nobles, and controlling kings;  
Our supple tribes repress their patriot throats,  
And ask no questions but the price of votes;  
With weekly libels and septennial ale,  
Their wish is full to riot and to rail.

In full-blown dignity, see Wolsey stand,  
Law in his voice, and fortune in his hand:

To him the church, the realm, their powers  
consign,

Through him the rays of regal bounty shine,  
Turn'd by his nod the stream of honour flows,  
His smile alone security bestows:  
Still to new heights his restless wishes tower,  
Claim leads to claim, and power advances  
power;

Till conquest unresisted ceased to please,  
And rights submitted, left him none to seize.

At length his sovereign frowns—the train of  
state [hate.

Mark the keen glance, and watch the sign to  
Where'er he turns, he meets a stranger's eye,  
His suppliants scorn him, and his followers fly;  
Now drops at once the pride of awful state,  
The golden canopy, the glittering plate,  
The regal palace, the luxurious board,  
The liveried army, and the menial lord.  
With age, with cares, with maladies oppress'd,  
He seeks the refuge of monastic rest.  
Grief aids disease, remember'd folly stings,  
And his last sighs reproach the faith of kings.

Speak thou, whose thoughts at humble peace  
repine,

Shall Wolsey's wealth, with Wolsey's end, be  
thine?

Or livest thou now, with safer pride content,  
The wisest justice on the banks of Trent?  
For, why did Wolsey, near the steep of fate,  
On weak foundations raise th' enorm weight?  
Why but to sink beneath misfortune's blow,  
With louder ruin to the gulphs below?

\* What gave great Villiers to th' assassin's  
knife,

And fix'd disease on Harley's closing life?  
What murder'd Wentworth, and what exiled  
Hyde,

By kings protected, and to kings allied?  
What but their wish indulged in courts to shine,  
And power too great to keep, or to resign?

† When first the college rolls receive his name,  
The young enthusiast quits his ease for fame;  
Resistless burns the fever of renown.

Caught from the strong contagion of the gown;  
O'er Bodley's dome his future labours spread,  
And ‡ Bacon's mansion trembles o'er his head.  
Are these thy views? Proceed, illustrious youth,  
And Virtue guard thee to the throne of Truth!

Yet, should thy soul indulge the generous heat  
Till captive Science yields her last retreat;  
Should Reason guide thee with her brightest  
ray,

And pour on misty Doubt resistless day;

\* Ver. 108—113.

† Ver. 114—132.

‡ There is a tradition, that the study of friar Bacon, built on an arch over the bridge, will fall when a man greater than Bacon shall pass under it. To prevent so shocking an accident, it was pulled down many years since.

Should no false kindness lure to loose delight,  
Nor praise relax, nor difficulty fright;  
Should tempting Novelty thy cell refrain,  
And Sloth effuse her opiate fumes in vain;  
Should beauty blunt on fops her fatal dart,  
Nor claim the triumph of a letter'd heart;  
Should no disease thy torpid veins invade,  
Nor Melancholy's phantoms haunt thy shade,  
Yet hope not life from grief or danger free,  
Nor think the doom of man reversed for thee:  
Deign on the passing world to turn thine eyes,  
And pause awhile from Letters, to be wise;  
There mark what ills the scholar's life assail,  
Toil, envy, want, the patron, and the gnat.  
See nations, slowly wise, and meanly just,  
To buried merit raise the tardy bust.  
If dreams yet flatter, once again attend,  
Hear Lydiat's life, and Galileo's end.\*

Nor deem, when Learning her last prize bestows,

The glitt'ring eminence exempt from woes;  
See, when the vulgar 'scape, despised or awed,  
Rebellion's vengeful talons seize on Laud.  
From meaner minds though smaller fines content,

The plunder'd palace, or sequester'd tent;  
Mark'd out by dangerous parts, he meets the shock,

And fatal Learning leads him to the block:  
Around his tomb let Art and Genius weep,  
But hear his death, ye blockheads, hear and sleep.

† The festal blazes, the triumphal show,  
The ravish'd standard, and the captive foe,  
The senate's thanks, the Gazette's pompous tale,  
With force resistless o'er the brave prevail.  
Such bribes the rapid Greek o'er Asia whirl'd,  
For such the steady Romans shook the world;  
For such in distant lands the Britons shine;  
And stain with blood the Danube or the Rhine;  
'This power has praise that virtue scarce can warm,

Till fame supplies the universal charm.  
Yet Reason frowns on War's unequal game,  
Where wasted nations raise a single name;  
And mortgaged states their grandsires' wreaths  
From age to age in everlasting debt; [regret,  
Wreaths which at last the dear-bought right convey,

To rust on medals, or on stones decay.

‡ On what foundation stands the warrior's pride,

How just his hopes, let Swedish Charles decide;  
A frame of adamant, a soul of fire,  
No dangers fright him, and no labours tire;  
O'er love, o'er fear, extends his wide domain,  
Unconquer'd lord of pleasure and of pain;

No joys to him pacific sceptres yield,  
War sounds the trump, he rushes to the field;  
Behold surrounding kings their power combine,  
And one capitulate, and one resign;  
Peace courts his hand, but spreads her charms  
in vain; [remain,

"Think nothing gain'd," he cries, "till nought  
On Moscow's walls till Gothic standards fly,  
And all be mine beneath the polar sky."

The march begins in military state,  
And nations on his eye suspended wait;  
Stern Famine guards the solitary coast,  
And Winter barricades the realm of Frost;  
He comes, nor want nor cold his course delay;  
Hide, blushing Glory, hide Pultowa's day:  
The vanquish'd hero leaves his broken bands,  
And shows his miseries in distant lands;  
Condemn'd a needy supplicant to wait,  
While ladies interpose and slaves debate.

But did not Chance at length her error mend?  
Did no subverted empire mark his end?

Did rival monarchs give the fatal wound?  
Or hostile millions press him to the ground?

His fall was destined to a barren strand,  
A petty fortress, and a dubious hand;  
He left a name, at which the world grew pale,  
To point a moral, or adorn a tale.

\* All times their scenes of pompous words afford,  
From Persia's tyrant to Bavaria's lord.

In gay hostility and barbarous pride,  
With half mankind embattled at his side,  
Great Xerxes comes to seize the certain prey,  
And starves exhausted regions in his way;  
Attendant Flattery counts his myriads o'er,  
Till counted myriads soothe his pride no more;  
Fresh praise is try'd till madness fires his mind,  
The waves he lashes, and enchains the wind,  
New powers are claim'd, new powers are still  
bestow'd,

Till rude Resistance lops the spreading god;  
The daring Greeks deride the martial show,  
And heap their valleys with the gaudy foe;  
Th' insulted sea with humbler thoughts he gains,

A single skiff to speed his flight remains;  
The incumbered oar scarce leaves the dreaded coast,

Through purple billows and a floating host.

The bold Bavarian, in a luckless hour,  
Tries the dread summits of Cæsarian power,  
With unexpected legions bursts away,  
And sees defenceless realms receive his away;  
Short sway! fair Austria spreads her mournful charms,

The queen, the beauty, sets the world in arms;  
From hill to hill the beacon's rousing blaze  
Spreads wide the hope of plunder and of praise;  
The fierce Croatian, and the wild Hussar,  
With all the sons of ravage crowd the war;

\* See Gent. Mag. Vol. LXVII. p. 251. 1027.

† Ver. 133—140.

‡ Ver. 147—167.

\* Ver. 168—187.

The baffled prince, in honour's flattering bloom  
Of hasty greatness, finds the fatal doom;  
His foes' derision, and his subjects' blame,  
And steals to death from anguish and from shame.

\* Enlarge my life with multitude of days!  
In health, in sickness, thus the suppliant prays:  
Hides from himself his state, and shuns to know,  
That life protracted is protracted woe,  
Time hovers o'er, impatient to destroy,  
And shuts up all the passages of joy:  
In vain their gifts the bounteous seasons pour,  
The fruit autumnal, and the vernal flower;  
With listless eyes the dotard views the store;  
He views, and wonders that they please no more:

Now pall the tasteless meats and joyless wines,  
And luxury with sighs her slave resigns.  
Approach, ye minstrels, try the soothing strain,  
Diffuse the tuneful lenitives of pain:  
No sounds, alas! would touch th' impervious ear,

Though dancing mountains witness'd Orpheus [near;  
Nor lute nor lyre his feeble powers attend,  
Nor sweeter music of a virtuous friend;  
But everlasting dictates crowd his tongue,  
Perversely grave, or positively wrong.  
The still returning tale, and lingering jest,  
Pérplex the fawning niece and pamper'd guest,  
While growing hopes scarce awe the gathering  
And scarce a legacy can bribe to hear; [sneer,  
The watchful guests still hint the last offence;  
The daughter's petulance, the son's expense,  
Improve his heady rage with treach'rous skill,  
And mould his passions till they make his will.

Unnumber'd maladies his joints invade,  
Lay siege to life, and press the dire blockade;  
But unextinguish'd Avarice still remains,  
And dreaded losses aggravate his pains;  
He turns, with anxious heart and crippled hands,

His bonds of debt, and mortgages of lands;  
Or views his coffers with suspicious eyes,  
Unlocks his gold, and counts it till he dies.

But grant, the virtues of a temperate prime  
Bless with an age exempt from scorn or crime;  
An age that melts in unperceived decay,  
And glides in modest innocence away;  
Whose peaceful day Benevolence endears,  
Whose night congratulating Conscience cheers;  
The general favourite as the general friend;  
Such age there is, and who shall wish its end?

Yet even on this her load Misfortune flings,  
To press the weary minutes' flagging wings;  
New sorrow rises as the day returns,  
A sister sickens, or a daughter mourns.  
Now kindred Merit fills the sable bier,  
Now lacerated Friendship claims a tear;

Year chases year, decay pursues decay,  
Still drops some joy from withering life away;  
New forms arise, and different views engage,  
Superfluous lags the veteran on the stage,  
Till pitying Nature signs the last release,  
And bids afflicted worth retire to peace.

But few there are whom hours like these  
await,

Who set unclouded in the gulphs of Fate,  
From Lydia's monarch should the search des-  
By Solon caution'd to regard his end, [cend.  
In life's last scene what prodigies surprise,  
Fears of the brave, and follies of the wise!  
From Marlborough's eyes the streams of dotage  
flow

And swift expires a driveller and a show.

\* The teeming mother, anxious for her race,  
Begs for each birth the fortune of a face;  
Yet Vane could tell what ills from beauty  
spring;

And Sedley cursed the form that pleased a king.  
Ye nymphs of rosy lips and radiant eyes,  
Whom Pleasure keeps too busy to be wise;  
Whom joys with soft varieties invite,  
By day the frolic, and the dance by night;  
Who frown with vanity, who smile with art,  
And ask the latent fashion of the heart;  
What care, what rules, your heedless charms  
shall save, [slave?

Each nymph your rival, and each youth your  
Against your fame with fondness hate combines,  
The rival batters, and the lover mines.  
With distant voice neglected Virtue calls,  
Less heard and less, the faint remonstrance  
falls; [reign,

Tired with contempt, she quits the slippery  
And Pride and Prudence take her seat in vain.  
In crowd at once, where none the pass defend,  
The harmless freedom, and the private friend.  
The guardians yield, by force superior plied,  
To Interest, Prudence; and to Flattery, Pride.  
Here Beauty falls betray'd, despised, distress'd,  
And hissing Infamy proclaims the rest.

† Where then shall Hope and Fear their ob-  
jects find?

Must dull suspense corrupt the stagnant mind?  
Must helpless man, in ignorance sedate,  
Roll darkling down the torrent of his fate?  
Must no dislike, alarm, no wishes rise,  
No cries invoke the mercies of the skies?  
Enquirer, cease; petitions yet remain  
Which Heaven may hear, nor deem Religion  
vain.

Still raise for good the supplicating voice,  
But leave to Heaven the measure and the  
choice.

Safe in his power, whose eyes discern afar  
The secret ambush of a specious prayer;

Implore his aid, in his decisions rest,  
Secure, whate'er he gives, he gives the best.  
Yet, when the sense of sacred presence fires,  
And strong devotion to the skies aspires,  
Pour forth thy fervours for a healthful mind,  
Obedient passions and a will resign'd;  
For love, which scarce collective man can fill;  
For patience, sovereign o'er transmuted ill;  
For faith, that, panting for a happier seat,  
Counts death kind Nature's signal of retreat.  
These goods for man the laws of Heaven ordain,  
[gain;  
These goods he grants, who grants the power to  
With these celestial Wisdom calms the mind,  
And makes the happiness she does not find.

PROLOGUE,

SPOKEN BY MR. GARRICK,

AT THE

*Opening of the Theatre-Royal, Drury-Lane, 1747.*

WHEN Learning's triumph o'er her barbarous  
foes [rose;  
First rear'd the stage, immortal Shakspeare  
Each change of many-colour'd life he drew,  
Exhausted worlds, and then imagined new:  
Existence saw him spurn her bounded reign,  
And panting Time toil'd after him in vain.  
His powerful strokes presiding Truth impress'd,  
And unresisted Passion storm'd the breast.  
Then Jonson came, instructed from the school,  
To please in method, and invent by rule;  
His studious patience and laborious art,  
By regular approach assail'd the heart:  
Cold approbation gave the lingering bays,  
For those, who durst not censure, scarce could  
praise.  
A mortal born, he met the general doom,  
But left, like Egypt's kings, a lasting tomb.  
The wits of Charles found easier ways to  
fame, [flame,  
Nor wish'd for Jonson's art, or Shakspeare's  
Themselves they studied—as they felt they writ;  
Intrigue was plot, obscenity was wit.

Vice always found a sympathetic friend;  
They pleased their age, and did not aim to mend.  
Yet bards like these aspired to lasting praise,  
And proudly hoped to pimp in future days.  
Their cause was general, their supports were  
strong, [long:  
Their slaves were willing, and their reign was  
Till Shame regain'd the post that Sense betray'd  
And Virtue call'd Oblivion to her aid.  
Then, crush'd by rules, and weaken'd as re-  
fin'd,  
For years the power of Tragedy declined;  
From bard to bard the frigid caution crept,  
Till Declamation roar'd, while Passion slept;  
Yet still did Virtue deign the stage to tread,  
Philosophy remain'd though Nature fled.  
But forced, at length, her ancient reign to quit,  
She saw great Faustus lay the ghost of Wit;  
Exulting Folly hail'd the joyful day,  
And Pantomime and Song confirm'd her sway.  
But who the coming changes can presage,  
And mark the future periods of the Stage?  
Perhaps, if skill could distant times explore,  
New Behns, new Durseys, yet remain in store;  
Perhaps, where Lear has raved, and Hamlet  
On flying cars new sorcerers may ride: [died,  
Perhaps (for who can guess th' effects of  
chance?) [dance.  
Here Hunt may box, or Mahomet\* may  
Hard is his lot that, here by Fortune placed,  
Must watch the wild vicissitudes of taste;  
With every meteor of caprice must play,  
And chase the new-blown bubbles of the day.  
Ah! let not Censure term our fate our choice,  
The stage but echoes back the public voice;  
The drama's laws, the drama's patrons give,  
For we that live to please, must please, to live.  
Then prompt no more the follies you decry,  
As tyrants doom their tools of guilt to die;  
'Tis yours, this night, to bid the reign commence  
Of rescued Nature and reviving Sense; [Show,  
To chase the charms of Sound, the pomp of  
For useful Mirth, and salutary Wo;  
Bid scenic Virtue form the rising age,  
And Truth diffuse her radiance from the stage.

\* Hunt, a famous boxer on the stage; Mahomet, a rope-dancer, who had exhibited at Covent-Garden Theatre the winter before, said to be a Turk.

## A TRAGEDY,

IN FIVE ACTS.

### DRAMATIS PERSONÆ.

MAHOMET, Emperor of the Turks, . . . . .	Mr. Barry.
CALI BASSA, First Vizier, . . . . .	Mr. Berry.
MUSTAPHA, a Turkish Aga, . . . . .	Mr. Sowden.
ABDALLA, an Officer, . . . . .	Mr. Havard.
HASEN, } Turkish Captains, . . . . .	{ Mr. Usher.
CARAZA, } . . . . .	{ Mr. Burton.
DEMETRIUS, } Greek Noblemen, . . . . .	{ Mr. Garrick.
LEONTIUS, } . . . . .	{ Mr. Blakes.
MURZA, an Eunuch, . . . . .	Mr. King.
ASPASIA, } Greek Ladies, . . . . .	{ Mrs. Cibber.
IRENE, } . . . . .	{ Mrs. Pritchard.

Attendants on IRENE.

### PROLOGUE.

Ye glittering train, whom lace and velvet  
Suspend the soft solitudes of dress ! [bless,  
From grovelling business and superfluous care,  
Ye sons of Avarice, a moment spare !  
Votaries of Fame, and worshippers of Power,  
Dismiss the pleasing phantoms for an hour !  
Our daring bard, with spirit unconfined,  
Spreads wide the mighty moral for mankind.  
Learn here how Heaven supports the virtuous  
mind, [sign'd.  
Daring, though calm, and vigorous, though re-  
Learn here what anguish racks the guilty breast,  
In power dependent, in success deprest.  
Learn here that Peace from Innocence must  
flow ;  
All else is empty sound and idle show.  
If truths like these with pleasing language  
join ;  
Ennobled, yet unchanged, if Nature shine ;  
If no wild draught depart from Reason's rules,  
Nor gods his heroes, nor his lovers fools :  
Intriguing Wits ! his artless plot forgive ;  
And spare him, Beauties ! though his lovers live.  
Be this at least his praise, be this his pride ;  
To force applause no modern arts are try'd.

Should partial catcalls all his hopes confound,  
He bids no trumpet quell the fatal sound.  
Should welcome sleep relieve the weary wit.  
He rolls no thunders o'er the drowsy pit.  
No snares to captivate the judgment spreads,  
Nor bribes your eyes to prejudice your heads.  
Unmoved though Witlings sneer and Rivals  
rail ;  
Studious to please, yet not ashamed to fail.  
He scorns the meek address, the suppliant  
strain,  
With merit needless, and without it vain.  
In Reason, Nature, Truth, he dares to trust :  
Ye Fops, be silent : and ye Wits, be just !

### ACT I.

SCENE I.—DEMETRIUS and LEONTIUS, in  
Turkish Habits.

Leon. And is it thus Demetrius meets his  
friend,  
Hid in the mean disguise of Turkish robes,  
With servile secrecy to lurk in shades,  
And vent our sufferings in clandestine groans ?

*Dem.* Till breathless fury rested from destruction,

These groans were fatal, these disguises vain;  
But now our Turkish conquerors have quench'd  
Their rage, and pall'd their appetite of murder;  
No more the glutted sabre thirsts for blood,  
And weary cruelty renits her tortures.

*Leon.* Yet Greece enjoys no gleam of transient hope,

No soothing interval of peaceful sorrow;  
The lust of gold succeeds the rage of conquest,  
The lust of gold, unfeeling and remorseless,  
The last corruption of degenerate man!  
Urged by the imperious soldier's fierce command,

The groaning Greeks break up their golden  
Pregnant with stores that India's mines might envy,

Th' accumulated wealth of toiling ages.

*Dem.* That wealth too sacred for their country's use!

That wealth, too pleasing to be lost for freedom!  
That wealth, which, granted to their weeping prince,

Had ranged embattled nations at our gates!  
But, thus reserved to lure the wolves of Turkey,  
Adds shame to grief, and infamy to ruin.  
Lamenting Avarice now too late discovers  
Her own neglected in the public safety.

*Leon.* Reproach not misery.—The sons of Greece,

Ill-fated race! so oft besieged in vain,  
With false security beheld invasion.  
Why should they fear?—That power that kindly spreads

The clouds, a signal of impending showers,  
To warn the wandering linnet to the shade,  
Behold without concern expiring Greece,  
And not one prodigy foretold our fate.

*Dem.* A thousand horrid prodigies foretold it.  
A feeble government, eluded laws,  
A factious populace, luxurious nobles,  
And all the maladies of sinking states.  
When public Villany, too strong for justice,  
Shows his bold front, the harbinger of ruin,  
Can brave Leontius call for airy wonders,  
Which cheats interpret, and which fools regard?  
When some neglected fabric nods beneath  
The weight of years, and totters to the tempest,  
Must Heaven despatch the messengers of light,  
Or wake the dead, to warn us of its fall?

*Leon.* Well might the weakness of our empire sink

Before such foes of more than human force;  
Some Power invisible, from heaven or hell,  
Conducts their armies, and asserts their cause.

*Dem.* And yet, my friend, what miracles were wrought

Beyond the power of constancy and courage?  
Did unresisted lightning aid their cannon?  
Did roaring whirlwinds sweep us from the ramparts?

'Twas vice that shook our nerves, 'twas vice,  
Leontius,

That froze our veins, and wither'd all our powers.  
*Leon.* Whate'er our crimes, our woes demand compassion.

Each night, protected by the friendly darkness,  
Quitting my close retreat, I range the city,  
And, weeping, kiss the venerable ruins:

With silent pangs I view the towering domes,  
Sacred to prayer, and wander through the streets,

Where commerce lavish'd unexhausted plenty,  
And jollity maintain'd eternal revels.—

*Dem.* —How changed, alas!—Now ghastly Desolation

In triumph sits upon our shatter'd spires;  
Now superstition, ignorance, and error,  
Usurp our temples, and profane our altars.

*Leon.* From every palace bursts a mingled clamour,

The dreadful dissonance of barbarous triumph,  
Shrieks of affright and wallings of distress.  
Oft when the cries of violated beauty  
Arose to Heaven, and pierced my bleeding breast,

I felt thy pains, and trembled for Aspasia.

*Dem.* Aspasia! spare that loved, that mournful name:

Dear, hapless maid—tempestuous grief o'erbears  
My reasoning powers—Dear, hapless, lost Aspasia!

*Leon.* Suspend the thought.

*Dem.* All thought on her is madness;

Yet let me think—I see the helpless maid,  
Behold the monsters gaze with savage rapture,  
Behold how lust and rapine struggle round her;

*Leon.* Awake, Demetrius, from this dismal  
Sink not beneath imaginary sorrows; [dream,  
Call to your age your courage and your wisdom;  
Think on the sudden change of human scenes;  
Think on the various accidents of war;  
Think on the mighty power of awful virtue;  
Think on that Providence that guards the good.

*Dem.* O Providence! extend thy care to me,  
For Courage droops unequal to the combat,  
And weak Philosophy denies her succours.  
Sure some kind sabre in the heat of battle,  
Ere yet the foe found leisure to be cruel,  
Dismissed her to the sky.

*Leon.* Some virgin martyr,  
Perhaps, enamour'd of resembling virtue,  
With gentle hand restrain'd the streams of life,  
And snatch'd her timely from her country's fate.

*Dem.* From those bright regions of eternal day,

Where now thou shin'st among thy fellow-saints,  
Array'd in purer light, look down on me:  
In pleasing visions and assuasive dreams,  
O! soothe my soul, and teach me how to lose thee.

*Leon.* Enough of unavailing tears, Demetrius:

I come obedient to thy friendly summons,  
And hoped to share thy counsels, not thy sor-  
rows:

While thus we mourn the fortune of Aspasia,  
To what are we reserved?

*Dem.* To what I know not:

But hope, yet hope, to happiness and honour;  
If happiness can be without Aspasia.

*Leon.* But whence this new-sprung hope?

*Dem.* From Cali Bassa, [counsels.  
The chief, whose wisdom guides the Turkish  
He, tired of slavery, though the highest slave,  
Projects at once our freedom and his own;  
And bids us thus disguised await him here.

*Leon.* Can he restore the state he could not  
save? [walls,

In vain, when Turkey's troops assail'd our  
His kind intelligence betray'd their measures;  
Their arms prevailed, though Cali was our  
friend.

*Dem.* When the tenth sun had set upon our  
sorrows,

At midnight's private hour, a voice unknown  
Sounds in my sleeping ear, "Awake, De-  
metrius,

Awake, and follow me to better fortune."  
Surprised I start, and bless the happy dream;  
Then, rousing, know the fiery chief Abdalla,  
Whose quick impatience seized my doubtful  
hand,

And led me to the shore where Cali stood,  
Pensive and list'ning to the beating surge.  
There, in soft hints and in ambiguous phrase,  
With all the diffidence of long experience,  
That oft had practised fraud, and oft detected,  
The veteran courtier half revealed his project.  
By his command, equip'd for speedy flight,  
Deep in a winding creek a galley lies,  
Mann'd with the bravest of our fellow-captives,  
Selected by my care, a hardy band,  
That long to hail thee chief.

*Leon.* But what avails  
So small a force? or why should Cali fly?  
Or how can Cali's flight restore our country?

*Dem.* Reserve these questions for a safer  
hour;

Or hear himself, for see the Bassa comes.

## SCENE II.

DEMETRIUS, LEONTIUS, and CALI BASSA.

*Cali.* Now summon all thy soul, illustrious  
Christian!

Awake each faculty that sleeps within thee,  
The courtier's policy, the sage's firmness,  
The warrior's ardour, and the patriot's zeal:  
If, chasing past events with vain pursuit,  
Or wandering in the wilds of future being,  
A single thought now rove, recall it home.  
But can thy friend sustain the glorious cause,  
The cause of liberty, the cause of nations?

*Dem.* Observe him closely with a statesman's  
eye, [Nature,

Thou that hast long perused the draughts of  
And know'st the characters of Vice and Virtue,  
Left by the hand of Heaven on human clay.

*Cali.* His mien is lofty, his demeanour great  
Nor sprightly fully wantons in his air,  
Nor dull serenity becalms his eyes.

Such had I trusted once as soon as seen,  
But cautious age suspects the flattering form,  
And only credits what experience tells.  
Has silence press'd her seal upon his lips?  
Does adamant faith invest his heart?  
Will he not bend beneath a tyrant's frown?  
Will he not melt before ambition's fire?  
Will he not soften in a friend's embrace?  
Or flow dissolving in a woman's tears?

*Dem.* Sooner the trembling leaves shall find  
a voice,

And tell the secrets of their conscious walks;  
Sooner the breeze shall catch the flying sounds,  
And shock the tyrant with a tale of treason.  
Your slaughter'd multitudes that swell the shore  
With monuments of death, proclaim his cou-  
virtue and liberty engross his soul, [rage;  
And leave no place for perfidy or fear.

*Leon.* I scorn a trust unwillingly reposed;  
Demetrius will not lead me to dishonour;  
Consult in private, call me when your scheme  
Is ripe for action, and demands the sword.

[Going.

*Dem.* Leontius, stay.

*Cali.* Forgive an old man's weakness,  
And share the deepest secrets of my soul,  
My wrongs, my fears, my motives, my de-  
signs.—

When unsuccessful wars, and civil factions,  
Embroll'd the Turkish state, our Sultan's fa-  
ther,

Great Amurath, at my request forsook,  
The cloister's ease, resumed the tottering throne,  
And snatch'd the reins of abdicated power  
From giddy Mahomet's unskillful hand.

This fired the youthful king's ambitious breast;  
He murmurs vengeance at the name of Cali,  
And dooms my rash fidelity to ruin.

*Dem.* Unhappy lot of all that shine in courts,  
For forced compliance, or for zealous virtue,  
Still odious to the monarch or the people.

*Cali.* Such are the woes when arbitrary  
power,

And lawless passion, hold the sword of justice.

If there be any land, as fame reports,  
Where common laws restrain the prince and  
subject,

A happy land, where circulating power  
Flows through each member of th' embodied  
state;

Sure, not unconscious of the mighty blessing,  
Her grateful sons shine bright with every virtue;  
Untainted with the lust of innovation,  
Sure all unite to hold her league of rule

Unbroken as the sacred chain of nature,  
That links the jarring elements in peace.

*Leon.* But say, great Bassa, why the Sultan's  
anger,

Burning in vain, delays the stroke of death?

*Cali.* Young and unsettled in his father's king-  
doms,

Fierce as he was, he dreaded to destroy  
The empire's darling and the soldier's boast;  
But now confirm'd, and swelling with his con-  
Secure he tramples my declining fame, [quests,  
Frowns unrestrain'd, and dooms me with his  
eyes.

*Dem.* What can reverse thy doom?

*Cali.* The tyrant's death.

*Dem.* But Greece is still forgot.

*Cali.* On Asia's coast,  
Which lately bless'd my gentle government,  
Soon as the Sultan's unexpected fate  
Fills all th' astonish'd empire with confusion,  
My policy shall raise an easy throne;  
The Turkish powers from Europe shall retreat,  
And harass Greece no more with wasteful war.  
A galley mann'd with Greeks, thy charge, Leon-  
tius,

Attends to waft us to repose and safety.

*Dem.* That vessel, if observed, alarms the  
court,

And gives a thousand fatal questions birth:  
Why stored for flight? and why prepared by  
Cali?

*Cali.* This hour I'll beg, with unsuspecting  
face,

Leave to perform my pilgrimage to Mecca:  
Which granted, hides my purpose from the  
world, [tan.

And, though refused, conceals it from the Sul-  
*Leon.* How can a single hand attempt a life  
Which armies guard, and citadels enclose?

*Cali.* Forgetful of command, with captive  
beauties,

Far from his troops, he toys his hours away.  
A roving soldier seized, in Sophia's temple,  
A virgin shining with distinguish'd charms,  
And brought his beauteous plunder to the Sul-  
tan.

*Dem.* In Sophia's temple!—what alarm!—  
Proceed.

*Cali.* The Sultan gazed, he wonder'd, and he  
loved:

In passion lost, he bade the conquering fair  
Renounce her faith, and be the Queen of Tur-  
key.

The pious maid, with modest indignation,  
Threw back the glittering bribe.

*Dem.* Celestial goodness!

It must, it must be she! her name?

*Cali.* Aspasia.

*Dem.* What hopes, what terrors rush upon my  
soul!

O lead me quickly to the scene of fate;  
Break through the politician's tedious forms,

Aspasia calls me, let me fly to save her.

*Leon.* Did Mahomet reproach or praise her  
virtue?

*Cali.* His offers oft repeated, still refused,  
At length rekindled his accustom'd fury,  
And changed th' endearing smile and am'rous  
whisper

To threats of torture, death, and violation.

*Dem.* These tedious narratives of frozen age  
Distract my soul; despatch thy lingering tale;  
Say, did a voice from heaven restrain the tyrant?  
Did interposing angels guard her from him?

*Cali.* Just in the moment of impending fate,  
Another plunderer brought the bright Irene;  
Of equal beauty, but of softer mien,  
Fear in her eye, submission on her tongue,  
Her mournful charms attracted his regards,  
Disarm'd his rage, and in repeated visits  
Gain'd all his heart; at length his eager love  
To her transferr'd the offer of a crown.

*Leon.* Nor found again the bright temptation  
fail?

*Cali.* Trembling to grant, nor daring to refuse,  
While Heaven and Mahomet divide her fears,  
With coy caresses and with pleasing wiles  
She feeds his hopes, and soothes him to delay.  
For her, repose is banish'd from the night,  
And business from the day. In her apartments  
He lives——

*Leon.* And there must fall.

*Cali.* But yet th' attempt  
Is hazardous.

*Leon.* Forbear to speak of hazards;  
What has the wretch that has survived his  
country,  
His friends, his liberty, to hazard?

*Cali.* Life.

*Dem.* Th' inestimable privilege of breathing!  
Important hazard! What's that airy bubble,  
When weigh'd with Greece, with virtue, with  
Aspasia?

A floating atom, dust that falls unheeded  
Into the adverse scale, nor shakes the balance.

*Cali.* At least this day be calm—If we suc-  
ceed,

Aspasia's thine, and all thy life is rapture.—

See! Mustapha, the tyrant's minion comes;

Invest Leontius with his new command;

And wait Abdalla's unsuspected visits;

Remember Freedom, Glory, Greece, and Love.

[*Exeunt DEM. and LEON.*]

### SCENE III.

*CALI, and MUSTAPHA.*

*Mus.* By what enchantment does this lovely  
Greek

Hold in her chains the captivated Sultan?  
He tires his favourites with Irene's praise,  
And seeks the shades to muse upon Irene;

Irene steals unheeded from his tongue,  
And mingles unperceived with every thought.

*Cali.* Why should the Sultan shun the joys of  
beauty,

Or arm his breast against the force of love?  
Love, that with sweet vicissitude relieves  
The warrior's labours, and the monarch's cares.  
But will she yet receive the faith of Mecca?

*Mus.* Those powerful tyrants of the female  
breast,

Fear and Ambition, urge her to compliance;  
Dress'd in each charm of gay magnificence,  
Alluring grandeur courts her to his arms,  
Religion calls her from the wish'd embrace,  
Paints future joys, and points to distant glories.

*Cali.* Soon will th' unequal contest be decided;  
Prospects, obscured by distance, faintly strike;  
Each pleasure brightens at its near approach,  
And every danger shocks with double horror.

*Mus.* How shall I scorn the beautiful apos-  
tate;

How will the bright Aspasia shine above her!

*Cali.* Should she, for proselytes are always  
zealous,

With pious warmth receive our prophet's law—

*Mus.* Heaven will condemn the mercenary  
fervour,

Which love of greatness, not of truth, inflames.

*Cali.* Cease, cease thy censures; for the Sultan  
comes

Alone, with amorous haste to seek his love.

#### SCENE IV.

MAHOMET, CALI BASSA, and MUSTAPHA.

*Cali.* Hail! terror of the monarchs of the  
world,

Unshaken be thy throne as earth's firm base,  
Live till the sun forgets to dart his beams,  
And weary planets loiter in their courses!

*Mah.* But, Cali, let Irene share thy prayers;  
For what is length of days without Irene?

I come from empty noise, and tasteless pomp,  
From crowds that hide a monarch from himself,  
To prove the sweets of privacy and friendship,  
And dwell upon the beauties of Irene.

*Cali.* O may her beauties last unchanged by  
time,

As those that bless the mansions of the good!

*Mah.* Each realm where beauty turns the  
graceful shape,

Swells the fair breast, or animates the glance,  
Adorns my palace with its brightest virgins;  
Yet, unacquainted with these soft emotions,  
I walk'd superior through the blaze of charms,  
Praised without rapture, left without regret.  
Why rove I now, when absent from my fair,  
From solitude to crowds, from crowds to soli-  
tude,

Still restless, till I clasp the lovely maid,  
And ease my loaded soul upon her bosom?

*Mus.* Forgive, great Sultan, that intrusive  
duty

Enquires the final doom of Menodorus,  
The Grecian counsellor.

*Mah.* Go see him die;

His martial rhetoric taught the Greeks resist-  
ance;

Had they prevail'd, I ne'er had known Irene.

[Exit MUSTAPHA.]

#### SCENE V.

MAHOMET, and CALI.

*Mah.* Remote from tumult, in th' adjoining  
palace,

Thy care shall guard this treasure of my soul:  
There let Aspasia, since my fair entreats it,  
With converse chase the melancholy moments.  
Sure, chill'd with sixty winter camps, thy blood  
At sight of female charms will glow no more.

*Cali.* These years, unconquer'd Mahomet, de-  
mand

Desires more pure, and other cares than love.  
Long have I wish'd, before our prophet's tomb,  
To pour my prayers for thy successful reign,  
To quit the tumults of the noisy camp,  
And sink into the silent grave in peace.

*Mah.* What! think of peace while haughty  
Scanderbeg,

Elate with conquest, in his native mountains,  
Prowls o'er the wealthy spoils of bleeding  
Turkey!

While fair Hungaria's unexhausted valleys  
Pour forth their legions, and the roaring Danube  
Rolls half his floods unheard through shouting  
camps!

Nor couldst thou more support a life of sloth  
Than Amurath—

*Cali.* Still full of Amurath. [Aside.]

*Mah.* Than Amurath, accusom'd to com-  
mand,

Could bear his son upon the Turkish throne.

*Cali.* This pilgrimage our lawgiver ordain'd—

*Mah.* For those who could not please by nobler  
service.

Our warlike Prophet loves an active faith.  
The holy flame of enterprising virtue  
Mocks the dull vows of solitude and penance,  
And scorns the lazy hermit's cheap devotion.  
Shine thou, distinguish'd by superior merit,  
With wonted zeal pursue the task of war,  
Till every nation reverence the Koran,  
And every suppliant lift his eyes to Mecca.

*Cali.* This regal confidence, this pious ardour,  
Let prudence moderate, though not suppress.  
Is not each realm that smiles with kinder suns,  
Or boasts a happier soil, already thine?  
Extended empire, like expanded gold,  
Exchanges solid strength for feeble splendour.

*Mah.* Preach thy dull politics to vulgar  
kings,

Thou know'st not yet thy master's future greatness,  
 His vast designs, his plans of boundless power.  
 When every storm in my domain shall roar,  
 When every wave shall beat a Turkish shore;  
 Then, Cali, shall the toils of battle cease,  
 Then dream of prayer, and pilgrimage, and peace. [Exeunt.]

## ACT II.

## SCENE I.

ASPASIA and IRENE.

*Irene.* Aspasia, yet pursue the sacred theme:  
 Exhaust the stores of pious eloquence,  
 And teach me to repel the Sultan's passion.  
 Still at Aspasia's voice a sudden rapture  
 Exalts my soul, and fortifies my heart.  
 The glittering vanities of empty greatness,  
 The hopes and fears, the joys and pains of life,  
 Dissolve in air, and vanish into nothing.

*Asp.* Let nobler hopes and juster fears succeed,  
 And bar the passes of Irene's mind  
 Against returning guilt.

*Irene.* When thou art absent,  
 Death rises to my view, with all his terrors:  
 Then visions, horrid as a murderer's dreams,  
 Chill my resolves, and blast my blooming virtue: [me,  
 Stern Torture shakes his bloody scourge before  
 And Anguish gnashes on the fatal wheel.

*Asp.* Since fear predominates in every thought,  
 And sways thy breast with absolute dominion,  
 Think on the insulting scorn, the conscious pangs,

The future miseries that wait the apostate;  
 So shall Timidity assist thy reason,  
 And Wisdom into virtue turn thy frailty.

*Irene.* Will not that Power that form'd the heart of woman,

And wove the feeble texture of her nerves,  
 Forgive those fears that shake the tender frame?

*Asp.* The weakness we lament, ourselves create;

Instructed from our infant years to court,  
 With counterfeited fears, the aid of man,  
 We learn to shudder at the rustling breeze,  
 Start at the light, and tremble in the dark;  
 Till, affectation ripening to belief,  
 And Folly frightened at her own chimeras,  
 Habitual cowardice usurps the soul.

*Irene.* Not all like thee can brave the shocks of fate. [ledge,

Thy soul, by nature great, enlarged by know-  
 Soars unencumber'd with our idle cares,  
 And all Aspasia, but her beauty's man.

*Asp.* Each generous sentiment is thine, Demetrius,

Whose soul, perhaps, yet mindful of Aspasia,  
 Now hovers o'er this melancholy shade,

Well pleased to find thy precepts not forgotten.  
 O! could the grave restore the pious hero,  
 Soon would his art or valour set us free,  
 And bear us far from servitude and crimes.

*Irene.* He yet may live.

*Asp.* Alas! delusive dream!

Too well I know him; his immoderate courage,  
 The impetuous sallies of excessive virtue,  
 Too strong for love, have hurried him on death.

## SCENE II.

ASPASIA, IRENE, CALI, and ABDALLA.

*Cali.* [To *ABD.* as they advance.] Behold our future Sultanness, Abdalla;  
 Let artful flattery now, to lull suspicion,  
 Glide through Irene to the Sultan's ear.  
 Wouldst thou subdue the obdurate cannibal  
 To tender friendship, praise him to his mistress,

[To *IRENE.*  
 Well may those eyes that view these heavenly charms

Reject the daughters of contending kings;  
 For what are pompous titles, proud alliance,  
 Empire or wealth, to excellence like thine?

*Abd.* Receive the impatient Sultan to thy arms;

And may a long posterity of monarchs,  
 The pride and terror of succeeding days,  
 Rise from the happy bed; and future queens  
 Diffuse Irene's beauty through the world!

*Irene.* Can Mahomet's imperial hand descend  
 To clasp a slave? or can a soul like mine,  
 Unused to power, and form'd for humbler scenes,

Support the splendid miseries of greatness?

*Cali.* No regal pageant deck'd with casual honours,

Scorn'd by his subjects, trampled by his foes,  
 No feeble tyrant of a petty state,  
 Courts thee to shake on a dependant throne;  
 Born to command, as thou to charm mankind,  
 The Sultan from himself derives his greatness.  
 Observe, bright maid, as his resistless voice  
 Drives on the tempest of destructive war,  
 How nation after nation falls before him.

*Abd.* At his dread name the distant mountains shake [ness,

Their cloudy summits, and the sons of fierce-  
 That range uncivilized from rock to rock,  
 Distrust the eternal fortresses of Nature,  
 And wish their gloomy caverns more obscure.

*Asp.* Forbear this lavish pomp of dreadful praise;

The horrid images of war and slaughter  
 Renew our sorrows and awake our fears.

*Abd.* Cali, methinks you waving trees afford  
 A doubtful glimpse of our approaching friends;  
 Just as I mark'd them they forsook the shore,  
 And turn'd their hasty steps towards the garden.

*Cali.* Conduct these queens, Abdalla, to the palace :  
Such heavenly beauty, form'd for adoration,  
The pride of monarchs, the reward of conquest !  
Such beauty must not shine to vulgar eyes.

## SCENE III.

*Cali.* [Solus.] How Heaven, in scorn of human arrogance,  
Commits to trivial chance the fate of nations !  
While with incessant thought laborious man  
Extends his mighty schemes of wealth and power,  
And towers and triumphs in ideal greatness ;  
Some accidental gust of opposition  
Blasts all the beauties of his new creation.  
O'erturns the fabric of presumptuous reason,  
And whelms the swelling architect beneath it.  
Had not the breeze untwined the meeting boughs,  
[Greeks,  
And through the parted shade disclosed the  
Th' important hour had pass'd unheeded by,  
In all the sweet oblivion of delight,  
In all the fopperies of meeting lovers :  
In sighs and tears, in transports and embraces,  
In soft complaints, and idle protestations.

## SCENE IV.

*CALI, DEMETRIUS, and LEONTIUS.*

*Celi.* Could omens fright the resolute and wise,  
Well might we fear impending disappointments.

*Leon.* Your artful suit, your monarch's fierce denial,  
The cruel doom of hapless Menodorus.—

*Dem.* And your new charge, that dear that heavenly maid.—

*Leon.* All this we know already from Abdalla.

*Dem.* Such slight defects but animate the brave  
To stronger efforts and maturer counsels.

*Cali.* My doom confirm'd establishes my purpose.

Calmly he heard, till Amurath's resumption  
Rose to his thought, and set his soul on fire :  
When from his lips the fatal name burst out,  
A sudden pause th' imperfect sense suspended,  
Like the dread stillness of condensing storms.

*Dem.* The loudest cries of Nature urge us for—  
Despotic rage pursues the life of Cali ; [ward ;  
His groaning country claims Leontius' aid ;  
And yet another voice, forgive me, Greece,  
The powerful voice of Love inflames Demetrius,  
Each lingering hour alarms me for Aspasia.

*Cali.* What passions reign among thy crew,  
Leontius ?

Does cheerless diffidence oppress their hearts ?  
Or sprightly hope exalt their kindling spirits ?  
Do they with pain repress the struggling shout,  
And listen eager to the rising wind ?

*Leon.* All there is hope, and gayety and courage,

No cloudy doubts, or languishing delays,  
Ere I could range them on the crowded deck,  
At once a hundred voices thunder'd round me,  
And every voice was Liberty and Greece.

*Dem.* Swift let us rush upon the careless tyrant,

Nor give him leisure for another crime.

*Leon.* Then let us now resolve, nor idly waste  
Another hour in dull deliberation.

*Cali.* But see, where, destined to protract our counsels,

Comes Mustapha.—Your Turkish robes conceal you.

Retire with speed, while I prepare to meet him  
With artificial smiles and seeming friendship.

## SCENE V.

*CALI and MUSTAPHA.*

*Cali.* I see the gloom that low'rs upon thy brow : [thee ;

These days of love and pleasure charm not  
Too slow these gentle constellations roll ;

Thou long'st for stars that frown on human kind,

And scatter discord from their baleful beams.

*Mus.* How blest art thou, still jocund and serene,

Beneath the load of business, and of years !

*Cali.* Sure by some wondrous sympathy of souls,

My heart still beats responsive to the Sultan's ;

I share, by secret instinct, all his joys,

And feel no sorrow while my sovereign smiles.

*Mus.* The Sultan comes, impatient for his love ;

Conduct her hither : let no rude intrusion

Molest these private walks, or care invade

These hours assign'd to Pleasure and Irene.

## SCENE VI.

*MAHOMET and MUSTAPHA.*

*Mah.* Now, Mustapha, pursue thy tale of horror.

Has treason's dire infection reach'd my palace ?

Can Cali dare the stroke of heavenly justice

In the dark precincts of a gaping grave,

And load with perjuries his parting soul ?

Was it for this, that sickening in Epirus,

My father call'd me to his couch of death,

Join'd Cali's hand to mine, and faltering cried,

Restrain the fervour of impetuous youth

With venerable Cali's faithful counsels ?

Are these the counsels, this the faith of Cali ?

Were all our favours lavish'd on a villain ?

Confest ?—

*Mus.* Confest by dying Menodorus.

In his last agonies the gasping coward,

Amidst the tortures of the burning steel,  
Still fond of life, groan'd out the dreadful secret,  
Held forth this fatal scroll, then sunk to nothing.

*Mah.* [*Examining the Paper.*] His correspondence  
with our foes of Greece!

His hand! his seal! The secrets of my soul  
Conceal'd from all but him! All, all conspire  
To banish doubt, and brand him for a villain!  
Our schemes for ever cross'd, our mines dis-  
cover'd,

Betray'd some traitor lurking near my bosom.  
Oft have I raged, when their wide wasting  
cañon

Lay pointed at our batteries yet unform'd,  
And broke the meditated lines of war.  
Detested Cali, too, with artful wonder,  
Would shake his wily head, and closely whisper,  
Beware of Mustapha, beware of treason.

*Mus.* The faith of Mustapha disdains sus-  
picion;

But yet, great emperor, beware of treason;  
Th' insidious Bassa, fired by disappointment—

*Mah.* Shall feel the vengeance of an injured  
king.

Go, seize him, load him with reproachful chains,  
Before th' assembled troops proclaim his crimes;  
Then leave him stretch'd upon the lingering rack,  
Amidst the camp to howl his life away.

*Mus.* Should we before the troops proclaim  
his crimes;

I dread his arts of seeming innocence,  
His bland address, and sorcery of tongue;  
And, should he fall unheard by sudden justice,  
Th' adoring soldiers would revenge their idol.

*Mah.* Cali, this day, with hypocritic zeal,  
Implor'd my leave to visit Mecca's temple;  
Struck with the wonder of a statesman's good-  
ness,

I raised his thoughts to more sublime devotion.  
Now let him go, pursued by silent wrath,  
Meet unexpected daggers in his way,  
And in some distant land obscurely die.

*Mus.* There will his boundless wealth, the  
spoil of Asia, [him,

Heap'd by your father's ill-placed bounties on  
Disperse rebellion through the Eastern world;  
Bribe to his cause, and list beneath his banners,  
Arabia's roving troops, the sons of swiftness,  
And arm the Persian heretic against thee;  
There shall he waste thy frontiers, check thy  
conquests, [geance.

And, though at length subdued, elude thy ven-  
*Mah.* Elude my vengeance! No—my troops  
shall range

Th' eternal snows that freeze beyond Mæotis,  
And Afric's torrid sands, in search of Cali.  
Should the fierce North upon his frozen wings  
Bear him aloft above the wondering clouds,  
And seat him in the Pleiads' golden chariots,  
Thence shall my fury drag him down to tor-  
tures;

Wherever guilt can fly, revenge can follow.

*Mus.* Wilt thou dismiss the savage from the  
toils,

Only to hunt him round the ravaged world?

*Mah.* Suspend his sentence—Empire and  
Irene

Claim my divided soul. This wretch, unworthy  
To mix with nobler cares, I'll throw aside  
For idle hours, and crush him at my leisure.

*Mus.* Let not th' unbounded greatness of his  
mind

Betray my king to negligence of danger.  
Perhaps the clouds of dark conspiracy [head.  
Now roll full fraught with thunder o'er your  
Twice since the morning rose I saw the Bassa,  
Like a fell adder swelling in a brake,  
Beneath the covert of this verdant arch  
In private conference; beside him stood  
Two men unknown, the partners of his bosom;  
I mark'd them well, and traced in either face  
The gloomy resolution, horrid greatness,  
And stern composure, of despairing heroes;  
And, to confirm my thoughts, at sight of me,  
As blasted by my presence, they withdrew  
With all the speed of terror and of guilt.

*Mah.* The strong emotions of my troubled  
soul

Allow no pause for art or for contrivance;  
And dark perplexity distracts my counsels.  
Do thou resolve: for see Irene comes!

At her approach each ruder gust of thought  
Sinks like the sighing of a tempest spent,  
And gales of softer passion fan my bosom.

[CALI enters with IRENE, and exit with  
MUSTAPHA.

## SCENE VII.

MAHOMET and IRENE.

*Mah.* Wilt thou descend, fair daughter of per-  
fection,

To hear my vows, and give mankind a queen?

Ah! cease, Irene, cease those flowing sorrows,

That melt a heart impregnable till now,

And turn thy thoughts henceforth to love and  
empire.

How will the matchless beauties of Irene,  
Thus bright in tears, thus amiable in ruin,  
With all the graceful pride of greatness height-  
ened,

Amidst the blaze of jewels and of gold,

Adorn a throne, and dignify dominion!

*Irene.* Why all this glare of splendid elo-  
quence,

To paint the pagantries of guilty state?

Must I for these renounce the hope of heaven,

Immortal crowns, and fulness of enjoyment?

*Mah.* Vain raptures all—For your inferior  
natures,

Form'd to delight, and happy by delighting,

Heaven has reserved no future paradise,

But bids you rove the paths of bliss, secure

Of total death, and careless of hereafter;  
While Heaven's high minister, whose awful  
volume [man,  
Records each act, each thought of sovereign  
Surveys your plays with inattentive glance,  
And leaves the lovely trifer unregarded.

*Irene.* Why then has Nature's vain munificence  
Profusely pour'd her bounties upon woman?  
Whence then those charms thy tongue has  
deign'd to flatter,  
That air resistless, and enchanting blush,  
Unless the beauteous fabric was design'd  
A habitation for a fairer soul?

*Mah.* Too high, bright maid, thou rat'st exterior grace:

Not always do the fairest flowers diffuse  
The richest odours, nor the speckled shells  
Conceal the gem; let female arrogance  
Observe the feather'd wanderers of the sky;  
With purple varied and bedropp'd with gold,  
They prune the wing, and spread the glossy  
plumes,

Ordain'd, like you, to flutter and to shine,  
And cheer the weary passenger with music.

*Irene.* Mean as we are, this tyrant of the world

Implores our smiles, and trembles at our feet.  
Whence flow the hopes and fears, despair and  
rapture,

Whence all the bliss and agonies of love?

*Mah.* Why, when the balm of sleep descends  
on man,

Do gay delusions, wandering o'er the brain,  
Soothe the delighted soul with empty bliss?  
To want give affluence? and to slavery freedom?  
Such are love's joys, the lenitives of life,  
A fancy'd treasure, and a waking dream.

*Irene.* Then let me once, in honour of our  
Assume the boastful arrogance of man. [sex,  
The attractive softness, and the endearing  
smile,

And powerful glance, 'tis granted are our own;  
Nor has impartial Nature's frugal hand  
Exhausted all her nobler gifts on you.

Do not we share the comprehensive thought,  
The enlivening wit, the penetrating reason?  
Beats not the female breast with generous pas-  
sions

The thirst of empire, and the love of glory?

*Mah.* Illustrious maid, new wonders fix me  
thine,

Thy soul completes the triumphs of thy face.  
I thought (forgive, my fair,) the noblest aim,  
The strongest effort of a female soul,  
Was but to choose the graces of the day,  
To tune the tongue, to teach the eyes to roll,  
Dispose the colour of the flowing robe,  
And add new roses to the faded cheek.  
Will it not charm a mind like thine exalted,  
To shine the goddess of applauding nations,  
To scatter happiness and plenty round thee,

To bid the prostrate captive rise and live,  
To see new cities tower at thy command,  
And blasted kingdoms flourish at thy smile?

*Irene.* Charm'd with the thought of blessing  
human kind,

Too calm I listen to the flattering sounds.

*Mah.* O seize the power to bless—Irene's nod  
Shall break the fetters of the groaning Christian;  
Greece, in her lovely patroness secure,  
Shall mourn no more her plunder'd palaces.

*Irene.* Forbear—O do not urge me to my  
ruin!

*Mah.* To state and power I court thee, not to  
ruin:

Smile on my wishes, and command the globe.  
Security shall spread her shield before thee,  
And Love enfold thee with her downy wings.

If greatness please thee, mount the imperial  
seat;

If pleasure charm thee, view this soft retreat;  
Here every warbler of the sky shall sing;  
Here every fragrance breathe of every spring:  
To deck these bowers each region shall com-  
bine,

And e'en our Prophet's gardens envy thine:  
Empire and love shall share the blissful day,  
And varied life steal unperceived away.

[*Exeunt.*]

### ACT III.

### SCENE I.

*CALI and ABDALLA.*—*CALI enters with a discon-  
tented air; to him enters ABDALLA.*

*Cali.* Is this the fierce conspirator, Abdalla?  
Is this the restless diligence of treason?

Where hast thou linger'd while the encumber'd  
hours

Fly labouring with the fate of future nations,  
And hungry slaughter scents imperial blood?

*Abd.* Important cares detain'd me from your  
counsels.

*Cali.* Some petty passion! some domestic  
trifle!

Some vain amusement of a vacant soul!

A weeping wife, perhaps, or dying friend,

Hung on your neck, and hinder'd your depar-  
ture.

Is this a time for softness or for sorrow?

Unprofitable, peaceful, female virtues!

When eager vengeance shows a naked foe,

And kind ambition points the way to greatness.

*Abd.* Must then ambition's votaries infringe  
The law of kindness, break the bonds of nature,  
And quit the names of brother, friend, and  
father?

*Cali.* This sovereign passion, scornful of re-  
straint,

E'en from the birth affects supreme command,  
 Swells in the breast, and with resistless force  
 O'erbears each gentler motion of the mind.  
 As when a deluge overspreads the plains,  
 The wandering rivulet and silver lake,  
 Mix undistinguish'd with the general roar.

*Abd.* Yet can ambition in Abdalla's breast  
 Claim but the second place : there mighty Love  
 Has fix'd his hopes, inquietudes, and fears,  
 His glowing wishes, and his jealous pangs.

*Cali.* Love is indeed the privilege of youth :  
 Yet on a day like this, when expectation  
 Pants for the dread event—But let us reason—

*Abd.* Hast thou grown old amidst the crowd  
 of courts,

And turn'd th' instructive page of human life,  
 To cant at last, of reason to a lover ?  
 Such ill-timed gravity, such serious folly,  
 Might well besit the solitary student,  
 Th' unpractis'd dervise, or sequester'd faquir.  
 Know'st thou not yet, when Love invades the  
 soul,

That all her faculties receive his chains ?  
 That Reason gives her sceptre to his hand,  
 Or only struggles to be more enslaved ?  
 Aspasia, who can look upon thy beauties ?  
 Who hear thee speak, and not abandon reason ?  
 Reason ! the hoary dotard's dull directress,  
 That loses all because she hazards nothing !  
 Reason ! the tim'rous pilot, that, to shun  
 The rocks of life, for ever flies the port !

*Cali.* But why this sudden warmth ?

*Abd.* Because I love :

Because my slighted passion burns in vain !  
 Why roars the lioness distress'd by hunger ?  
 Why foam the swelling waves when tempests  
 rise ?

Why shakes the ground when subterraneous fires  
 Fierce through the bursting caverns rend their  
 way ?

*Cali.* Not till this day thou saw'st this fatal  
 fair :

Did ever passion make so swift a progress ?  
 Once more reflect, suppress this infant folly.

*Abd.* Gross fires, enkindled by a mortal hand,  
 Spread by degrees, and dread th' oppressing  
 stream ;

The subtler flames emitted from the sky [tance.  
 Flash out at once, with strength above resis-

*Cali.* How did Aspasia welcome your address ?  
 Did you proclaim this unexpected conquest ?  
 Or pay with speaking eyes a lover's homage ?

*Abd.* Confounded, awed, and lost in admira-  
 tion,

I gazed, I trembled ; but I could not speak :  
 When e'en as love was breaking off from won-  
 der,

And tender accents quivering on my lips,  
 She mark'd my sparkling eyes, and heaving  
 breast,

And smiling, conscious of her charms, with-  
 drew. [Enter DEM. and LEON.

*Cali.* Now be some moments master of thy-  
 self ;

Nor let Demetrius know thee for a rival.  
 Hence ! or be calm—To disagree is ruin.

## SCENE II.

CALI, DEMETRIUS, LEONTIUS, and ABDALLA.

*Dem.* When will occasion smile upon our  
 wishes,

And give the tortures of suspense a period ?

Still must we linger in uncertain hope ?

Still languish in our chains, and dream of free-  
 dom,

Like thirsty sailors gazing on the clouds,  
 Till burning death shoots through their wither'd  
 limbs ?

*Cali.* Deliverance is at hand ; for Turkey's  
 tyrant,

Sunk in his pleasures, confident and gay,  
 With all the hero's dull security,

Trusts to my care his mistress and his life,  
 And laughs and wantons in the jaws of death.

*Leon.* So weak is man when destined to des-  
 truction !—

The watchful slumber, and the crafty trust.

*Cali.* At my command yon iron gates unfold ;  
 At my command the sentinels retire ;

With all the license of authority, [rooms,  
 Through bowing slaves, I range the private  
 And of to-morrow's action fix the scene.

*Dem.* To-morrow's action ! Can that hoary  
 wisdom, [morrow !

Borne down with years, still doat upon to-  
 That fatal mistress of the young, the lazy,

The coward, and the fool, condemn'd to lose

A useless life in waiting for to-morrow,

To gaze with longing eyes upon to-morrow,

Till interposing death destroys the prospect.

Strange ! that this general fraud from day to day  
 Should fill the world with wretches undetected.

The soldier, labouring through a winter's march,  
 Still sees to-morrow drest in robes of triumph ;

Still to the lover's long-expecting arms

To-morrow brings the visionary bride.

But thou, too old to bear another cheat,

Learn, that the present hour alone is man's.

*Leon.* The present hour with open arms in-  
 vites ;

Seize the kind fair, and press her to thy bosom.

*Dem.* Who knows, ere this important morrow  
 rise,

But fear or mutiny may taint the Greeks ?

Who knows, if Mahomet's awaking anger

May spare the fatal bow-string till to-morrow ?

*Abd.* Had our first Asian foes but known  
 this ardour,

We still had wander'd on Tartarian hills.

Rouse, Cali ; shall the sons of conquer'd  
 Greece

Lead us to danger, and abash their victors ?

This night with all her conscious stars be witness,

Who merits most, Demetrius or Abdalla.

*Dem.* Who merits most!—I knew not we were rivals.

*Cal.* Young man, forbear—the heat of youth no more— [fate.]

Well,—'tis decreed—This night shall fix our  
Soon as the veil of evening clouds the sky,  
With cautious secrecy, Leontius, steer  
Th' appointed vessel to yon shaded bay,  
Form'd by this garden jutting on the deep;  
There, with your soldiers arm'd, and sails expanded,

Await our coming, equally prepared  
For speedy flight, or obstinate defence.

[*Exit LEONTIUS.*]

### SCENE III.

CALI, ABDALLA, and DEMETRIUS.

*Dem.* Now pause, great Bassa, from the thoughts of blood,

And kindly grant an ear to gentler sounds.

If e'er thy youth has known the pangs of absence,

Or felt th' impatience of obstructed love,  
Give me, before the approaching hour of fate,  
Once to behold the charms of bright Aspasia,  
And draw new virtue from her heavenly tongue.

*Cal.* Let prudence, ere the suit be farther urged,

Impartial weigh the pleasure with the danger.  
A little longer, and she's thine for ever.

*Dem.* Prudence and love conspire in this request,

Lest, unacquainted with our bold attempt,  
Surprise o'erwhelm her, and retard our flight.

*Cal.* What I can grant, you cannot ask in vain—

*Dem.* I go to wait thy call; this kind consent  
Completes the gift of freedom and of life.

[*Exit DEMETRIUS.*]

### SCENE IV.

CALI and ABDALLA.

*Abd.* And this is my reward—to burn, to languish,

To rave unheeded; while the happy Greek,  
The refuse of our swords, the dross of conquest,  
Throws his fond arms about Aspasia's neck,  
Dwells on her lips, and sighs upon her breast.  
Is't not enough he lives by our indulgence,  
But he must live to make his masters wretched?

*Cal.* What claim hast thou to plead?

*Abd.* The claim of power,  
The unquestion'd claim of conquerors and kings!

*Cal.* Yet in the use of power remember justice.

*Abd.* Can then th' assassin lift his treacherous hand

Against his king, and cry, remember justice?

Justice demands the forfeit life of Cali;

Justice demands that I reveal your crimes;

Justice demands—but see th' approaching Sultan!

Oppose my wishes, and—remember justice.

*Cal.* Disorder sits upon thy face—retire.

[*Exit ABDALLA, enter MAHOMET.*]

### SCENE V.

CALI and MAHOMET.

*Cal.* Long be the Sultan bless'd with happy love!

My zeal marks gladness dawning on thy cheek,  
With raptures such as fire the Pagan crowds,  
When, pale and anxious for their years to come,  
They see the sun surmount the dark eclipse,  
And hail unanimous their conquering god.

*Mah.* My vows, 'tis true, she hears with less aversion;

She sighs, she blushes, but she still denies.

*Cal.* With warmer courtship press the yielding fair;

Call to your aid, with boundless promises,  
Each rebel wish, each traitor inclination,  
That raises tumults in the female breast,  
The love of power, of pleasure, and of show.

*Mah.* These arts I tried, and, to inflame her more,

By hateful business hurried from her sight,  
I bade a hundred virgins wait around her,  
Sooth her with all the pleasures of conuivial,  
Applaud her charms, and court her to be great.

[*Exit MAHOMET.*]

### SCENE VI.

*Cal.* [*Solus.*] He's gone—Here rest, my soul,  
thy fainting wing,

Here recollect thy dissipated powers.—

Our distant interests, and our different passions,

Now haste to mingle in one common centre,

And fate lies crowded in a narrow space.

Yet in that narrow space what dangers rise!—

Far more I dread Abdalla's fiery folly,

Than all the wisdom of the grave divan.

Reason with reason fights on equal terms;

The raging madman's unconnected schemes

We cannot obviate, for we cannot guess.

Deep in my breast be treasured this resolve,

When Cali mounts the throne, Abdalla dies,

Too fierce, too faithless, for neglect or trust.

[*Enter IRENE with Attendants.*]

### SCENE VII.

CALI, IRENE, ASPASIA, &c.

*Cal.* Amidst the splendour of encircling beauty,

Superior majesty proclaims thee queen,  
And nature justifies our monarch's choice.

*Irene.* Reserve this homage for some other fair;

Urge me not on to glittering guilt, nor pour  
In my weak ear the intoxicating sounds.

*Cali.* Make haste, bright maid, to rule the willing world;

Awed by the rigour of the Sultan's justice,  
We court thy gentleness.

*Asp.* Can Cal's voice

Concur to press a hapless captive's ruin?

*Cali.* Long would my zeal for Mahomet and thee

Detain me here. But nations call upon me,  
And duty bids me choose a distant walk,  
Nor taint with care the privacies of love.

## SCENE VIII.

IRENE, ASTASIA, and Attendants.

*Asp.* If yet this shining pomp, these sudden honours,

Swell not thy soul beyond advice or friendship,  
Nor yet inspire the follies of a queen,  
Or tune thine ear to soothing adulation,  
Suspend awhile the privilege of power,  
To hear the voice of Truth; dismiss thy train,  
Shake off the incumbrances of state a moment,  
And lay the towering sultaness aside,

[*IRENE signs to her Attendants to retire.*

While I foretell thy fate; that office done,—  
No more I boast the ambitious name of friend,  
But sink among thy slaves without a murmur.

*Irene.* Did regal diadems invest my brow,  
Yet should my soul still faithful to her choice  
Esteem Aspasia's breast the noblest kingdom.

*Asp.* The soul, once tainted with so foul a crime,

[ardour:  
No more shall glow with friendship's hallow'd  
These holy beings, whose superior care  
Guides erring mortals to the paths of virtue,  
Affrighted at impiety like thine,  
Resign their charge to baseness and to ruin.

*Irene.* Upbraid me not with fancied wicked;  
I am not yet a queen or an apostate. [ness;  
But should I sin beyond the hope of mercy,  
If, when religion prompts me to refuse,  
The dread of instant death restrains my tongue?

*Asp.* Reflect that life and death, affecting sounds!

Are only varied modes of endless being;  
Reflect that life, like every other blessing,  
Derives its value from its use alone;  
Not for itself but for a nobler end,  
The Eternal gave it, and that end is virtue.  
When inconsistent with a greater good,  
Reason commands to cast the less away;  
Thus life, with loss of wealth is well-preserved,  
And virtue cheaply saved with loss of life.

*Irene.* If built on settled thought, this constancy

Not idly flutters on a boastful tongue,  
Why, when destruction raged around our walls,  
Why fled this haughty heroine from the battle?  
Why then did not this warlike Amazon  
Mix in the war, and shine among the heroes?

*Asp.* Heaven, when its hand pour'd softness on our limbs,

Unfit for toil, and polish'd into weakness,  
Made passive fortitude the praise of woman:  
Our only arms are innocence and meekness.  
Not then with raving cries I fill'd the city;  
But, while Demetrius, dear lamented name!  
Pour'd storms of fire upon our fierce invaders,  
Implored the Eternal Power to shield my country,

With silent sorrows, and with calm devotion.

*Irene.* O! did Irene shine the queen of Turkey,

[rejected;  
No more should Greece lament those prayers  
Again should golden splendour grace her cities,  
Again her prostrate palaces should rise,  
Again her temples sound with holy music:  
No more should danger fright, or want distress  
The smiling widows, and protected orphans.

*Asp.* Be virtuous ends pursued by virtuous means,

Nor think the intention sanctifies the deed:  
That maxim, published in an impious age,  
Would loose the wild enthusiast to destroy,  
And fix the fierce usurper's bloody title;  
Then Bigotry might send her slaves to war,  
And bid success become the test of truth:  
Unpitied massacre might waste the world,  
And persecution boast the call of Heaven.

*Irene.* Shall I not wish to cheer afflicted kings,

And plan the happiness of mourning millions?  
*Asp.* Dream not of power thou never canst attain:

When social laws first harmonized the world,  
Superior man possess'd the charge of rule,  
The scale of justice, and the sword of power,  
Nor left us aught but flattery and state.

*Irene.* To me my lover's fondness will restore  
Whate'er man's pride has ravish'd from our sex.

*Asp.* When soft security shall prompt the Sultan

Freed from the tumults of unsettled conquest  
To fix his court, and regulate his pleasures,  
Soon shall the dire seraglio's horrid gates  
Close like the eternal bars of death upon thee.  
Immured and buried in perpetual sloth,  
That gloomy slumber of the stagnant soul,  
There shalt thou view from far the quiet cottage,  
And sigh for cheerful poverty in vain;  
There wear the tedious hours of life away,  
Beneath each curse of unrelenting Heaven,  
Despair and slavery, solitude and guilt.

*Irene.* There shall we find the yet untasted bliss  
Of grandeur and tranquillity combined.

*Asp.* Tranquillity and guilt, disjoin'd by Heaven,

Still stretch in vain their longing arms afar;  
Nor dare to pass th' insuperable bound.  
Ah! let me rather seek the convent's cell;  
There when my thoughts, at interval of prayer,  
Descend to range these mansions of misfortune,  
Oft shall I dwell on our disastrous friendship,  
And shed the pitying tear for lost Irene.

*Irene.* Go, languish on in dull obscurity;  
Thy dazzled soul, with all its boasted greatness,  
Shrinks at the o'erpowering gleams of regal state,

Stoops from the blaze like a degenerate eagle,  
And flies for shelter to the shades of life.

*Asp.* On me should Providence, without a crime,

The weighty charge of royalty confer,  
Call me to civilize the Russian wilds,  
Or bid soft science polish Britain's heroes:  
Soon should'st thou see, how false thy weak reproach.

My bosom feels, enkindled from the sky,  
The lambent flames of mild benevolence,  
Untouch'd by fierce ambition's raging fires.

*Irene.* Ambition is the stamp impress'd by Heaven

To mark the noblest minds; with active heat  
Inform'd they mount the precipice of power,  
Grasp at command, and tower in quest of empire;

While vulgar souls compassionate their cares,  
Gaze at their height, and tremble at their danger:

Thus meaner spirits with amazement mark  
The varying seasons, and revolving skies,  
And ask, what guilty Power's rebellious hand  
Rolls with eternal toil the ponderous orbs;  
While some archangel, nearer to perfection,  
In easy state presides o'er all their motions,  
Directs the planets with a careless nod,  
Conducts the sun, and regulates the spheres.

*Asp.* Well may'st thou hide in labyrinths of sound [voice.

The cause that shrinks from Reason's powerful  
Stoop from thy flight, trace back th' entangled thought,

And set the glittering fallacy to view.

Not power I blame, but power obtain'd by crime;

Angelic greatness is angelic virtue.

Amidst the glare of courts, the shout of armies,  
Will not th' apostate feel the pangs of guilt,  
And wish, too late, for innocence and peace?  
Curs'd as the tyrant of th' infernal realms,  
With gloomy state and agonizing pomp!

### SCENE LX.

IRENE, ASPASIA, and MAID.

*Maid.* A Turkish stranger of majestic mien,

Asks at the gate admission to Aspasia,  
Commission'd, as he says, by Cali Bassa.

*Irene.* Whoe'er thou art or whatso'er thy message, [Aside.

Thanks for this kind relief—With speed admit him.

*Asp.* He comes, perhaps, to separate us forever;

When I am gone, remember, O! remember,  
That none are great, or happy, but the virtuous.  
[Exit IRENE; enter DEMETRIUS.

### SCENE X.

ASPASIA and DEMETRIUS.

*Dem.* 'Tis she—my hope, my happiness, my love!

Aspasia! do I once again behold thee?

Still, still the same—unclouded by misfortune!

Let my blest eyes for ever gaze—

*Asp.* Demetrius!

*Dem.* Why does the blood forsake thy lovely cheek? [nerves?

Why shoots this chillness through thy shaking

Why does thy soul retire into herself?

Recline upon my breast thy sinking beauties:

Revive—Revive, to freedom and to love.

*Asp.* What well-known voice pronounced the grateful sounds

Freedom and love? Alas! I'm all confusion,

A sudden mist o'ercasts my darken'd soul;

The present, past, and future, swim before me,

Lost in a wild perplexity of joy.

*Dem.* Such ecstacy of love, such pure affection,

What worth can merit? or what faith reward?

*Asp.* A thousand thoughts, imperfect and distracted,

Demand a voice, and struggle into birth;

A thousand questions press upon my tongue,

But all give way to rapture and Demetrius.

*Dem.* O say, bright Being, in this age of absence, [known?

What fears, what griefs, what dangers hast thou

Say, how the tyrant threaten'd, flatter'd, sigh'd!

Say, how he threaten'd, flatter'd, sigh'd in vain!

Say, how the hand of Violence was rais'd!

Say, how thou call'dst in tears upon Demetrius!

*Asp.* Inform me rather how thy happy courage [tion.

Stemm'd in the breach the deluge of destruc-

And pass'd uninjured through the walks of death.

Did savage anger and licentious conquest

Behold the hero with Aspasia's eyes?

And, thus protected in the general ruin,

O say, what guardian power convey'd thee hither.

*Dem.* Such strange events, such unexpected chances,

Beyond my warmest hope, or wildest wishes,

Concurr'd to give me to Aspasia's arms,  
I stand amazed, and ask, if yet I clasp thee.

*Asp.* Sure Heaven (for wonders are not  
wrought in vain!)  
That joins us thus, will never part us more!

## SCENE XI.

DEMETRIUS, ASPASIA, and ABDALLA.

*Abd.* It parts you now—The hasty Sultan  
sign'd

The laws unread, and flies to his Irene.

*Dem.* Fix'd and intent on his Irene's charms,  
He envies none the converse of Aspasia.

*Abd.* Aspasia's absence will inflame suspicion!  
She cannot, must not, shall not, linger here;  
Prudence and Friendship bid me force her from  
you.

*Dem.* Force her! profane her with a touch,  
and die!

*Abd.* 'Tis Greece, 'tis Freedom, calls Aspasia  
hence;

Your careless love betrays your country's cause.

*Dem.* If we must part—

*Asp.* No! let us die together.

*Dem.* If we must part—

*Abd.* Despatch; th' increasing danger

Will not admit a lover's long farewell,

The long-drawn intercourse of sighs and kisses.

*Dem.* Then—O my fair, I cannot bid thee  
go.

Receive her and protect her, gracious Heaven!

Yet let me watch her dear departing steps,

If Fate pursues me, let it find me here.

Reproach not, Greece, a lover's fond delays,

Nor think thy cause neglected while I gaze;

New force, new courage, from each glance I  
gain,

And find our passions not infused in vain.

[*Exeunt.*]

## ACT IV.

## SCENE I.

DEMETRIUS and ASPASIA, *enter as talking.*

*Asp.* Enough—resistless Reason calms my  
soul—

Approving Justice smiles upon your cause.

And Nature's rights entreat th' asserting sword.

Yet, when your hand is lifted to destroy,

Think, but excuse a woman's needless caution—

Purge well thy mind from every private passion,

Drive interest, love, and vengeance, from thy  
thoughts,

[*Virtue,*

Fill all thy ardent breast with Greece and

Then strike secure, and Heaven assist the blow!

*Dem.* Thou kind assistant of my better angel,

Propitious guide of my bewilder'd soul,

Calm of my cares, and guardian of my virtue!

*Asp.* My soul, first kindled by thy bright ex-  
ample,

To noble thought and generous emulation,  
Now but reflects those beams that flow'd from  
thee.

*Dem.* With native lustre and unborrow'd  
greatness,

Thou shinest, bright maid, superior to distress;  
Unlike the trifling race of vulgar beauties,  
Those glittering dew-drops of a vernal morn,  
That spread their colours to the genial beam,  
And sparkling quiver to the breath of May;  
But, when the tempest with sonorous wing  
Sweeps o'er the grove, forsake the labouring  
bough,

Dispersed in air, or mingled with the dust.

*Asp.* Forbear this triumph—still new conflicts  
wait us,

Foes unforeseen, and dangers unsuspected.

Oft, when the fierce besiegers' eager host

Beholds the fainting garrison retire,

And rushes joyful to the naked wall,

Destruction flashes from the insidious mine,

And sweeps the exulting conqueror away.

Perhaps in vain the Sultan's anger spared me,

To find a meaner fate from treacherous friend-  
ship—

Abdalla!—

*Dem.* Can Abdalla then dissemble?

That fiery chief, renown'd for generous freedom,

For zeal unguarded, undissembled hate,

For daring truth, and turbulence of honour!

*Asp.* This open friend, this undesigning hero,  
With noisy falsehoods forced me from your  
arms,

To shock my virtue with a tale of love.

*Dem.* Did not the cause of Greece restrain my  
sword,

Aspasia could not fear a second insult.

*Asp.* His pride and love by turns inspired his  
tongue,

And intermix'd my praises with his own;

His wealth, his rank, his honours, he recounted,

Till, in the midst of arrogance and fondness,

Th' approaching Sultan forced me from the  
palace;

Then, while he gazed upon his yielding mistress,

I stole unheeded from their ravish'd eyes,

And sought this happy grove in quest of thee.

*Dem.* Soon may the final stroke decide our  
fate,

Lest baneful discord crush our infant scheme,

And strangled freedom perish in the birth.

*Asp.* My bosom, harass'd with alternate pas-  
sions,

Now hopes, now fears—

[*sions,*

*Dem.* The anxieties of love.

*Asp.* Think how the Sovereign Arbitrator of  
kingdoms

Detests thy false associates' black designs,

And frowns on perjury, revenge, and murder

Embark'd with treason on the seas of fate,

When Heaven shall bid the swelling billows rage,

And point vindictive lightnings at rebellion,  
Will not the patriot share the traitor's danger?  
Oh could thy hand unaided free thy country!  
Nor mingled guilt pollute the sacred cause!

*Dem.* Permitted oft, though not inspired by  
Heaven,

Successful treasours punish impious kings.

*Asp.* Nor end my terrors with the Sultan's  
Far as futurity's untravell'd waste [death;  
Lies open to conjecture's dubious ken,  
On every side confusion, rage, and death,  
Perhaps the phantoms of a woman's fear,  
Beset the treacherous way with fatal ambush;  
Each Turkish bosom burns for thy destruction,  
Ambitious Cali dreads the statesman's arts,  
And hot Abdalla hates the happy lover.

*Dem.* Capricious man! to good and ill in-  
constant,

Too much to fear or trust is equal weakness.

Sometimes the wretch, unawed by heaven or  
With mad devotion idolizes honour. [hell,  
The Bassa, reeking with his master's murder,  
Perhaps may start at violated friendship.

*Asp.* How soon, alas! will interest, fear, or  
envy,

O'erthrow such weak, such accidental, virtue,  
Nor built on faith, nor fortified by conscience?

*Dem.* When desperate ills demand a speedy  
cure,

Distrust is cowardice, and prudence folly.

*Asp.* Yet think a moment, ere you court de-  
struction, [metrius,

What hand, when death has snatch'd away De-  
shall guard Aspasia from triumphant lust.

*Dem.* Dismiss these needless fears—a troop  
of Greeks,

Well known, long try'd, expect us on the shore.  
Borne on the surface of the smiling deep,  
Soon shalt thou scorn, in safety's arms reposed,  
Abdalla's rage and Cali's stratagems.

*Asp.* Still, still, distrust sits heavy on my  
heart;

Will e'er a happier hour revisit Greece?

*Dem.* Should Heaven, yet unappeased, refuse  
its aid,

Disperse our hopes, and frustrate our designs,  
Yet shall the conscience of the great attempt  
Diffuse a brightness on our future days;  
Nor will his country's groans reproach De-  
metrius.

But how canst thou support the woes of exile?  
Canst thou forget hereditary splendours,  
To live obscure upon a foreign coast,  
Content with science, innocence, and love?

*Asp.* Nor wealth, nor titles, make Aspasia's  
bliss.

O'erwhelm'd and lost amidst the public ruins,  
Unmoved I saw the glittering trifles perish,  
And thought the petty dross beneath a sigh.  
Cheerful I follow to the rural cell;  
Love be my wealth, and my distinction virtuous.

*Dem.* Submissive, and prepared for each event,

Now let us wait the last award of Heaven,  
Secure of happiness from flight or conquest,  
Nor fear the fair and learn'd can want pro-  
tection.

The mighty Tuscan courts the banish'd arts;  
To kind Italia's hospitable shades;  
There shall soft leisure wing the excursive soul,  
And peace propitious smile on soft desire;  
There shall despotic Eloquence resume  
Her ancient empire o'er the yielding heart;  
There Poetry shall tune her sacred voice,  
And wake from ignorance the Western world.

## SCENE II.

DEMETRIUS, ASPASIA, and CALI.

*Cali.* At length the unwilling sun resigns the  
world

To silence and to rest. The hours of darkness,  
Propitious hours to stratagem and death,  
Pursue the last remains of lingering light.

*Dem.* Count not these hours as parts of vul-  
gar time,

Think them a sacred treasure lent by Heaven,  
Which, squander'd by neglect, or fear, or folly,  
No prayer recalls, no diligence redeems.

To-morrow's dawn shall see the Turkish king  
Stretch'd in the dust, or towering on his throne;  
To-morrow's dawn shall see the mighty Cali  
The sport of tyranny, or lord of nations.

*Cali.* Then waste no longer these important  
moments

In soft endearments and in gentle murmurs;  
Nor lose in love the patriot and the hero.

*Dem.* 'Tis love, combined with guilt alone,  
that melts

The soften'd soul to cowardice and sloth;  
But virtuous passion prompts the great resolve,  
And fans the slumbering spark of heavenly fire.  
Retire, my fair; that Power that smiles on  
goodness

Guide all thy steps, calm every stormy thought,  
And still thy bosom with the voice of peace!

*Asp.* Soon may we meet again, secure and free,  
To feel no more the pangs of separation! [Exit

DEMETRIUS and CALI.

*Dem.* This night alone is ours—Our mighty  
No longer lost in amorous solitude, [see,  
Will now remount the slighted seat of empire,  
And show Irene to the shouting people:

Aspasia left her sighing in his arms,  
And listening to the pleasing tale of power;  
With soften'd voice she dropp'd the faint refusal,  
Smiling consent she sat, and blushing love.

*Cali* Now, tyrant, with satiety of beauty,  
Now feast thine eyes, thine eyes that ne'er here-  
after

Shall dart their amorous glances at the fair,  
Or glare on Cali with malignant beams.

## SCENE III.

DEMETRIUS, CALI, LEONTIUS, and ABDALLA.

*Leon.* Our bark unseen has reach'd th' appointed bay, [surge,

And where yon trees wave o'er the foaming  
Reclines against the shore; our Grecian troop  
Extends its lines along the sandy beach,  
Elate with hope, and panting for a foe.

*Abd.* The favouring winds assist the great design,

Sport in our sails, and murmur o'er the deep.

*Cali.* 'Tis well—A single blow completes our wishes;

Return with speed, Leontius, to your charge;  
The Greeks, disorder'd by their leader's absence,  
May droop dismay'd, or kindle into madness.

*Leon.* Suspected still!—What villain's poisonous tongue [hood?

Dares join Leontius' name with fear or falsehood?  
Have I for this preserved my guiltless bosom,  
Pure as the thoughts of infant innocence?  
Have I for this defy'd the chiefs of Turkey,  
Intrepid in the flaming front of war?

*Cali.* Hast thou not search'd my soul's profoundest thoughts?

Is not the fate of Greece and Cali thine?

*Leon.* Why has thy choice then pointed out Leontius,

Unfit to share this night's illustrious toils?  
To wait remote from action and from honour,  
An idle listener to the distant cries  
Of slaughter'd infidels, and clash of sword?  
Tell me the cause, that while thy name, Demetrius,

Shall soar triumphant on the wings of Glory,  
Despised and cursed, Leontius must descend  
Through hissing ages, a proverbial coward,  
The tale of women, and the scorn of fools?

*Dem.* Can brave Leontius be the slave of Glory?

Glory, the casual gift of thoughtless crowds!  
Glory, the bribe of avaricious virtue!

Be but my country free, be thine the praise;  
I ask no witness, but attesting conscience,  
No records, but the records of the sky.

*Leon.* Will thou then head the troop upon the shore,

While I destroy the oppressor of mankind?

*Dem.* What canst thou boast superior to Demetrius?

Ask to whose sword the Greeks will trust their cause, [field:

My name shall echo through the shouting  
Demand whose force yon Turkish heroes dread,  
The shuddering camp shall murmur out Demetrius.

*Cali.* Must Greece, still wretched by her children's folly,

For ever mourn their avarice or factions?  
Demetrius justly pleads a double title;

The lover's interest aids the patriot's claim.

*Leon.* My pride shall ne'er protract my country's woes;

Succeed, my friend, unenvied by Leontius.

*Dem.* I feel new spirit shoot along my nerves,  
My soul expands to meet the approaching freedom.

Now hover o'er us with propitious wings,  
Ye sacred shades of patriots and of martyrs!  
All ye, whose blood tyrannic rage effused,  
Or persecution drank, attend our call;  
And from the mansions of perpetual peace  
Descend, to sweeten labours once your own!

*Cali.* Go then, and with united eloquence  
Confirm your troops; and when the moon's fair beam

Plays on the quivering waves, to guide our flight,  
Return, Demetrius, and be free for ever.

[*Exeunt DEM. and LEON.*

## SCENE IV.

CALI and ABDALLA.

*Abd.* How the new monarch, swell'd with airy rule,

Looks down, contemptuous, from his fancied height,

And utters fate, unmindful of Abdalla!

*Cali.* Far be such black ingratitude from Cali!  
When Asia's nations own me for their lord,  
Wealth, and command, and grandeur, shall be thine.

*Abd.* Is this the recompense reserved for me?

Dar'st thou thus dally with Abdalla's passion?  
Henceforward hope no more my slighted friendship,

Wake from thy dream of power to death and  
And bid thy visionary throne farewell.

*Cali.* Name, and enjoy thy wish—

*Abd.* I need not name it;

Aspasia's lovers know but one desire,

Nor hope, nor wish, nor live but for Aspasia.

*Cali.* That fatal beauty, plighted to Demetrius,  
Heaven makes not mine to give.

*Abd.* Nor to deny.

*Cali.* Obtain her, and possess; thou know'st thy rival.

*Abd.* Too well I know him, since on Thracia's plains,

I felt the force of his tempestuous arm,  
And saw my scatter'd squadrons fly before him.

Nor will I trust th' uncertain chance of combat;  
The rights of princes let the sword decide,

The petty claims of empire and of honour:

Revenge and subtle jealousy shall teach

A surer passage to his hated heart.

*Cali.* O spare the gallant Greek, in him we lose  
The politician's arts, and hero's flame.

*Abd.* When next we meet before we storm the palace,

Deny'd the government of Servia's province.

*Car.* We mark'd him storming in excess of fury,

And heard, within the thicket that conceal'd us,  
An undistinguish'd sound of threatening rage.

*Mus.* How guilt, once harbour'd in the conscious breast,

Intimidates the brave, degrades the great;  
See Cal, dread of kings, and pride of armies,  
By treason levell'd with the dregs of men!  
Ere guilty fear depress'd the hoary chief,  
An angry murmur, a rebellious frown,  
Had stretch'd the fiery boaster in the grave.

*Mah.* Shall monarchs fear to draw the sword of justice, [strain'd?]

Awed by the crowd, and by their slaves re-  
Seize him this night, and through the private passage

Convey him to the prison's inmost depths,  
Reserved to all the pangs of tedious death.

[*Exeunt* MAHOMET and MUSTAPHA.]

## SCENE IX.

HASAN and CARAZA.

*Has.* Shall then the Greeks, unpunish'd and conceal'd,

Contrive perhaps the ruin of our empire,  
League with our chiefs, and propagate sedition?

*Car.* What'er their scheme, the Bassa's death defeats it,

And gratitude's strong ties restrain my tongue.

*Has.* What ties to slaves? what gratitude to foes?

*Car.* In that black day when slaughter'd thousands fell

Around these fatal walls, the tide of war  
Bore me victorious onward, where Demetrius  
Tore unresisted from the giant hand  
Of stern Sebalias the triumphant crescent,  
And dash'd the might of Asam from the ramparts.

There I became, nor blush to make it known,  
The captive of his sword. The coward Greeks,  
Enraged by wrongs, exulting with success,  
Doom'd me to die with all the Turkish captains;  
But brave Demetrius scorn'd the mean revenge,  
And gave me life.—

*Has.* Do thou repay the gift,  
Lest unrewarded mercy lose its charms.  
Profuse of wealth, or bounteous of success,  
When Heaven bestows the privilege to bless;  
Let no weak doubt the generous hand restrain,  
For when was power beneficent in vain?

[*Exeunt.*]

## ACT V.

## SCENE I.

*Asp.* [*Sola.*] In these dark moments of suspended fate,

While yet the future fortune of my country  
Lies in the womb of Providence conceal'd,  
And anxious angels wait the mighty birth;  
O grant thy sacred influence, powerful Virtue!  
Attentive rise, survey the fair creation,  
Till, conscious of th' encircling Deity,  
Beyond the mists of care thy pinion towers.  
This calm, these joys, dear Innocence! are  
thine; [pire.  
Joys ill exchanged for gold, and pride, and em-  
[*Enter* IRENE and Attendants.]

## SCENE II.

ASPASIA, IRENE, and Attendants.

*Irene.* See how the moon through all th' un-  
clouded sky  
Spreads her mild radiance, and descending dews  
Revive the languid flowers; thus nature shone  
New from the Maker's hand, and fair array'd  
In the bright colours of primæval spring;  
When purity, while fraud was yet unknown,  
Play'd fearless in th' inviolated shades.  
This elemental joy, this general calm,  
Is sure the smile of unoffended Heaven  
Yet! why—

*Maid.* Behold within th' embowering grove  
Aspasia stands—

*Irene.* With melancholy mien,  
Pensive and envious of Irene's greatness.  
Steal unperceived upon her meditations—  
But see, the lofty maid, at our approach,  
Resumes th' imperious air of haughty virtue.  
Are these th' unceasing joys, th' unmingled pleasures  
[*To* ASPASIA.]

For which Aspasia scorn'd the Turkish crown?  
Is this th' unshaken confidence in Heaven?  
Is this the boasted bliss of conscious virtue?  
When did Content sigh out her cares in secret?  
When did Felicity repine in deserts?

*Asp.* Ill suits with guilt the gayeties of triumph;

When daring Vice insults eternal Justice,  
The ministers of wrath forget compassion,  
And snatch the flaming bolt with hasty hand.

*Irene.* Forbear thy threats, proud Prophetess of ill,

Versed in the secret counsels of the sky.

*Asp.* Forbear! But thou art sunk beneath reproach;

In vain affected raptures flush the cheek,  
And songs of pleasure warble from the tongue,  
When fear and anguish labour in the breast,  
And all within is darkness and confusion.

Thus on deceitful Ætna's flowery side  
Unfading verdure glads the roving eye;  
While secret flames, with unextinguish'd rage,  
Insatiate on her wasted entrails prey,  
And melt her treacherous beauties into ruin.

[*Enter* DEMETRIUS.]

## SCENE III.

ASPASIA, IRENE, and DEMETRIUS.

*Dem.* Fly, fly, my love! destruction rushes on us,

The rack expects us, and the sword pursues.

*Asp.* Is Greece deliver'd? is the tyrant fallen?

*Dem.* Greece is no more; the prosperous tyrant lives,

Reserved for other lands, the scourge of Heaven.

*Asp.* Say, by what fraud, what force, were you defeated?

Betray'd by falsehood, or by crowds o'erborne?

*Dem.* The pressing exigence forbids relation.

*Asp.* Hated name! his jealous rage  
Broke out in perfidy—O cursed Aspasia,  
Born to complete the ruin of her country!  
Hide me, oh hide me from upbraiding Greece;  
Oh, hide me from myself!

*Dem.* Be fruitless grief  
The doom of guilt alone, nor dare to seize  
The breast where Virtue guards the throne of  
Peace,

Devolve, dear maid, thy sorrows on the wretch,  
Whose fear, or rage, or treachery, betray'd us!

*Irene.* [*Aside.*] A private station may discover more;

Then let me rid them of Irene's presence;  
Proceed, and give a loose to love and treason.

[*Withdraws.*]

*Asp.* Yet tell.

*Dem.* To tell or hear were waste of life.

*Asp.* The life, which only this design supported,

Were now well lost in hearing how you fail'd.

*Dem.* Or meanly fraudulent, or madly gay,  
Abdalla, while we waited near the palace,  
With ill-timed mirth proposed the bowl of love.  
Just as it reach'd my lips, a sudden cry  
Urged me to dash it to the ground untouch'd,  
And seize my sword with disencumber'd hand.

*Asp.* What cry? The stratagem? Did then  
Abdalla—

*Dem.* At once a thousand passions fired his  
cheek!

Then all is past, he cried—and darted from us;  
Nor at the call of Cali deign'd to turn.

*Asp.* Why did you stay, deserted and betray'd?

What more could force attempt, or art contrive?

*Dem.* Amazement seized us, and the hoary  
Bassa

Stood torpid in suspense; but soon Abdalla  
Return'd with force that made resistance vain,  
And bade his new confederates seize the  
traitors.

Cali, disarm'd, was borne away to death;  
Myself escaped, or favour'd, or neglected.

*Asp.* O Greece! renown'd for science and for  
wealth,

Behold thy boasted honours snatch'd away.

*Dem.* Though disappointment blast our general scheme,

Yet much remains to hope. I shall not call

The day disastrous that secures our flight:

Nor think that effort lost which rescues thee.

[*Enter ABDALLA.*]

## SCENE IV.

IRENE, ASPASIA, DEMETRIUS, and ABDALLA.

*Abd.* At length the prize is mine—The  
haughty maid

That bears the fate of empires in her air,

Henceforth shall live for me; for me alone

Shall plume her charms, and, with attentiv  
watch,

Steal from Abdalla's eye the sign to smile.

*Dem.* Cease this wild roar of savage exultation:

Advance, and perish in the frantic boast.

*Asp.* Forbear, Demetrius, 'tis Aspasia calls  
thee;

Thy love, Aspasia, calls: restrain thy sword;

Nor rush on useless wounds with idle courage.

*Dem.* What now remains?

*Asp.* It now remains to fly!

*Dem.* Shall then the savage live, to boast his  
insult?

Tell how Demetrius shunn'd his single hand,  
And stole his life and mistress from his sabre?

*Abd.* Infatuate loiterer, has Fate in vain

Unclass'd his iron gripe to set thee free?

Still dost thou flutter in the jaws of death;

Snared with thy fears, and mazed in stupefaction?

*Dem.* Forgive, my fair: 'tis life, 'tis nature  
calls:

Now, traitor, feel the fear that chills my hand.

*Asp.* 'Tis madness to provoke superfluous  
danger,

And cowardice to dread the boast of folly.

*Abd.* Fly, wretch, while yet my pity grants  
thee flight,

The power of Turkey waits upon my call.

Leave but this maid, resign a hopeless claim,

And drag away thy life in scorn and safety.

Thy life, too mean a prey to lure Abdalla.

*Dem.* Once more I dare thy sword; behold  
the prize,

Behold I quit her to the chance of battle.

[*Quitting ASPASIA.*]

*Abd.* Well may'st thou call thy master to the  
combat,

And try the hazard, that hast nought to stake;

Alike my death or thine is gain to thee;

But soon thou shalt repent: another moment

Shall throw th' attending janizaries round thee

[*Exit hastily ABDALLA.*]

## SCENE V.

ASPASIA, IRENE, and DEMETRIUS.

*Irene.* Abdalla fails; now Fortune, all is mine.

[*Aside.*

Haste, Murza, to the palace, let the sultan

[*To one of her Attendants.*

Despatch his guards to stop the flying traitors,  
While I protract their stay. Be swift and faithful.

[*Exit MURZA.*

This lucky stratagem shall charm the Sultan,

[*Aside.*

Secure his confidence, and fix his love.

*Dem.* Behold a boaster's worth! Now snatch,  
my fair,

The happy moment; hasten to the shore,  
Ere he return with thousands at his side.

*Asp.* In vain I listen to th' inviting call  
Of freedom and of love; my trembling joints,  
Relax'd with fear, refuse to bear me forward.  
Depart, Demetrius, lest my fate involve thee;  
Forsake a wretch abandon'd to despair,  
To share the miseries herself has caused.

*Dem.* Let us not struggle with th' eternal  
Nor languish o'er irreparable ruins; [will,  
Come, haste and live—Thy innocence and truth  
Shall bless our wanderings, and propitiate Heaven.

*Irene.* Press not her flight, while yet her feeble  
nerves

Refuse their office, and uncertain life  
Still labours with imaginary woe;  
Here let me tend her with officious care,  
Watch each unquiet flutter of the breast,  
And joy to feel the vital warmth return,  
To see the cloud forsake her kindling cheek,  
And hail the rosy dawn of rising health.

*Asp.* Oh! rather, scornful of flagitious greatness,

Resolve to share our dangers and our toils,  
Companion of our flight, illustrious exile,  
Leave slavery, guilt, and infamy behind.

*Irene.* My soul attends thy voice, and banish'd  
Virtue

Strives to regain her empire of the mind:  
Assist her efforts with thy strong persuasion?  
Sure 'tis the happy hour ordain'd above,  
When vanquish'd Vice shall tyrannize no more.

*Dem.* Remember peace and anguish are before  
thee,

And honour and reproach, and Heaven and Hell.

*Asp.* Content with freedom, and precarious  
greatness.

*Dem.* Now make thy choice, while yet the  
power of choice

Kind Heaven affords thee, and inviting Mercy  
Holds out her hand to lead thee back to truth.

*Irene.* Stay—in this dubious twilight of conviction,

The gleams of reason, and the clouds of passion,  
Irradiate and obscure my breast by turns:

Stay but a moment, and prevailing truth  
Will spread resistless light upon my soul.

*Dem.* But since none knows the danger of a  
moment,

And Heaven forbids to lavish life away,  
Let kind compulsion terminate the contest.

[*Seizing her hand.*

Ye Christian captives follow me to freedom:

A galley waits us, and the winds invite.

*Irene.* Whence is this violence?

*Dem.* Your calmer thought,

Will teach a gentler term.

*Irene.* Forbear this rudeness,

And learn the reverence due to Turkey's queen;  
Fly, slaves, and call the Sultan to my rescue.

*Dem.* Farewell, unhappy maid; may every  
joy

Be thine, that wealth can give, or guilt receive!

*Asp.* And when contemptuous of imperial  
power,

Disease shall chase the phantoms of ambition,  
May penitence attend thy mournful bed,  
And wing thy latest prayer to pitying Heaven.

[*Exit DEM. and ASP. with part of the  
Attendants.*

## SCENE VI.

IRENE walks at a distance from her Attendants.

*Irene.* [*After a pause.*] Against the head which  
innocence secures,

Insidious Malice aims her darts in vain,  
Turn'd backwards by the powerful breath of  
Heaven.

Perhaps even now the lovers unpursued  
Bound o'er the sparkling waves. Go, happy  
bark,

Thy sacred freight shall still the raging main.

To guide thy passage shall th' aerial spirits

Fill all the starry lamps with double blaze;

Th' applauding sky shall pour forth all its beams,

To grace the triumph of victorious virtue;

While I, not yet familiar to my crimes,

Recoil from thought, and shudder at myself.

How am I changed! How lately did Irene

Fly from the busy pleasures of her sex,

We'll pleased to search the treasures of remem-  
brance,

And live her guiltless moments o'er anew!

Come, let us seek new pleasures in the palace,

[*To her Attendants going off.*

Till soft fatigue invites us to repose.

## SCENE VII.

*Enter MUSTAPHA, meeting and stopping her.*

*Mus.* Fair Falsehood, stay.

*Irene.* What dream of sudden power

Has taught my slave the language of command!  
Henceforth be wise, nor hope a second pardon.

*Mus.* Who calls for pardon from a wretch condemn'd?

*Irene.* Thy look, thy speech, thy action, all is Who charges guilt on me? [wildness—

*Mus.* Who charges guilt! [science.  
Ask of thy heart; attend the voice of Con-  
Who charges guilt! lay by this proud resent-  
ment

That fires thy cheek, and elevates thy mien,  
Nor thus usurp the dignity of virtue.

Review this day.

*Irene.* Whate'er thy accusation,  
The Sultan is my judge.

*Mus.* That hope is past;  
Hard was the strife of justice and of love;  
But now 'tis o'er, and justice has prevail'd.  
Know'st thou not Cali? know'st thou not De-  
metrius?

*Irene.* Bold slave, I know them both—I know  
them traitors.

*Mus.* Perfidious!—yes—too well thou know'st  
them traitors.

*Irene.* Their treason throws no stain upon  
Irene.

This day has proved my fondness for the Sultan:  
He knew Irene's truth.

*Mus.* The Sultan knows it,  
He knows how near apostasy to treason—  
But 'tis not mine to judge—I scorn and leave  
thee.

I go, lest vengeance urge my hand to blood,  
To blood too mean to stain a soldier's sabre.

[Exit MUSTAPHA.]

*Irene.* [To her Attendants.] Go, blustering  
slave—He has not heard of Murza,  
That dexterous message frees me from suspicion.

### SCENE VIII.

*Enter HASAN and CARAZA, with Mutes, who  
throw the black robe upon IRENE, and sign to her  
Attendants to withdraw.*

*Has.* Forgive, fair Excellence, the unwilling  
tongue,

The tongue, that, forced by strong necessity,  
Bids beauty, such as thine, prepare to die.

*Irene.* What wild mistake is this! Take  
hence with speed

Your robe of mourning, and your dogs of death.  
Quick from my sight, you inauspicious monsters,  
Nor dare henceforth to shock Irene's walks.

*Has.* Alas! they come commanded by the  
Sultan,

The un pitying ministers of Turkish justice,  
Nor dare to spare the life his frown condemns.

*Irene.* Are these the rapid thunderbolts of  
war,  
That pour with sudden violence on kingdoms,  
And spread their flames resistless o'er the  
world?

What sleepy charms benumb these active heroes,  
Depress their spirits, and retard their speed?  
Beyond the fear of lingering punishment,  
Aspasia now, within her lover's arms,  
Securely sleeps, and in delightful dreams  
Smiles at the threat'nings of defeated rage.

*Car.* We come, bright Virgin, though relent-  
ing Nature

Shrinks at the hated task, for thy destruction;  
When summon'd by the Sultan's clamorous  
fury, [name,

We ask'd with timorous tongue the offender's  
He struck his tortured breast, and roar'd, Irene!  
We started at the sound, again inquired;  
Again his thundering voice return'd, Irene!

*Irene.* Whence is this rage? what barbarous  
tongue has wrong'd me? [cense?

What fraud misleads him? or what crimes in-  
*Has.* Expiring Cali named Irene's chamber,  
The place appointed for his master's death.

*Irene.* Irene's chamber! from my faithful  
bosom

Far be the thought—But hear my protestation.

*Car.* 'Tis ours, alas! to punish, not to judge,  
Not call'd to try the cause, we heard the sen-  
tence,

Ordain'd the mournful messengers of death.

*Irene.* Some ill-designing statesman's base  
intrigue!

Some cruel stratagem of jealous beauty!  
Perhaps yourselves the villains that defame me,  
Now haste to murder, ere returning thought  
Recall the extorted doom.—It must be so:  
Confess your crime, or lead me to the Sultan,  
There dauntless truth shall blast the vile ac-  
cuser;

Then shall you feel what language cannot utter,  
Each piercing torture, every change of pain,  
That vengeance can invent, or power inflict.

[Enter ABDALLA: he stops short and listens.]

### SCENE IX.

IRENE, HASAN, CARAZA, and ABDALLA.

*Abd.* [Aside.] All is not lost, Abdalla; see  
the queen,

See the last witness of thy guilt and fear  
Enrobed in death—despatch her, and be great.

*Car.* Unhappy fair! compassion calls upon  
To check this torrent of imperious rage; [use

While unavailing anger crowds thy tongue  
With idle threats and fruitless exclamation,  
The fraudulent moments ply their silent wings,  
And steal thy life away. Death's horrid angel  
Already shakes his bloody sabre o'er thee.

The raging Sultan burns till our return,  
Curses the dull delays of lingering mercy,  
And thinks his fatal mandates ill obey'd.

*Abd.* Is then your sovereign's life so cheaply  
rated,

That thus you parly with detected treason?  
Should she prevail to gain the Sultan's presence,  
Soon might her tears engage a lover's credit;  
Perhaps her malice might transfer the charge;  
Perhaps her poisonous tongue might blast Abdalla.

*Irene.* O let me but be heard, nor fear from me  
Or flights of power or projects of ambition.  
My hopes, my wishes, terminate in life,  
A little life, for grief, and for repentance.

*Abd.* I mark'd her wily messenger afar,  
And saw him skulking in the closest walks:  
I guess'd her dark designs, and warn'd the Sultan,  
And bring her former sentence new confirm'd.

*Has.* Then call it not our cruelty, nor crime;  
Deem us not deaf to woe, nor blind to beauty,  
That thus constrain'd we speed the stroke of death.

[*Beckons the Mutes.*]

*Irene.* O, name not death! Distraction and amazement,

Horror and agony are in that sound!

Let me but live, heap woes on woes upon me,  
Hide me with murderers in the dungeon's gloom,

Send me to wander on some pathless shore,  
Let shame and hooting infamy pursue me,  
Let slavery harass, and let hunger gripe.

*Car.* Could we reserve the sentence of the Sultan,

Our bleeding bosoms plead Irene's cause.

But cries and tears are vain; prepare with patience

To meet that fate we can delay no longer.

[*The Mutes at the sign lay hold of her.*]

*Abd.* Despatch, ye lingering slaves; or nimble hands,

Quick at my call shall execute your charge;  
Despatch, and learn a fitter time for pity.

*Irene.* Grant me one hour, O grant me but a moment,

And bounteous Heaven repay the mighty mercy  
With peaceful death, and happiness eternal.

*Car.* The prayer I cannot grant—I dare not hear.

Short be thy pains. [*Signs again to the Mutes.*]

*Irene.* Unutterable anguish!

Guilt and despair, pale spectres, grin around me,  
And stun me with the yellings of damnation!

O, hear my prayers! accept, all-pitying Heaven,  
These tears, these pangs, these last remains of

Nor let the crimes of this detested day [life;  
Be charged upon my soul. O, mercy! mercy!

[*Mutes force her out.*]

#### SCENE X.

ABDALLA, HASAN, and CARAZA.

*Abd.* [*Aside.*] Safe in her death, and in  
Demetrius' flight,

Abdalla, bid thy troubled breast be calm.

Now shalt thou shine the darling of the Sultan,  
The plot all Cali's, the detection thine.

*Has.* [*To CAR.*] Does not thy bosom (for I  
know thee tender,

A stranger to th' oppressor's savage joy),  
Melt at Irene's fate, and share her woes?

*Car.* Her piercing cries yet fill the loaded air,  
Dwell on my ear, and sadden all my soul.  
But let us try to clear our clouded brows,  
And tell the horrid tale with cheerful face;  
The stormy Sultan rages at our stay.

*Abd.* Frame your report with circumspective art:

Inflame her crimes, exalt your own obedience;  
But let no thoughtless hint involve Abdalla.

*Car.* What need of caution to report the fate  
Of her the Sultan's voice condemn'd to die?  
Or why should he, whose violence of duty  
Has served his prince so well, demand our silence?

*Abd.* Perhaps my zeal, too fierce, betray'd my  
prudence;

Perhaps my warmth exceeded my commission;  
Perhaps—I will not stoop to plead my cause,  
Or argue with the slave that saved Demetrius.

*Car.* From his escape learn thou the power of  
virtue; [worth,

Nor hope his fortune, while thou want'st his

*Has.* The Sultan comes, still gloomy, still  
enraged.

#### SCENE XI.

HASAN, CARAZA, MAHOMET, MUSTAPHA, and  
ABDALLA.

*Mah.* Where's this fair traitress? Where's  
this smiling mischief,

Whom neither vows could fix, nor favours bind?

*Has.* Thine orders, mighty Sultan! are perform'd,

And all Irene now is breathless clay.

*Mah.* Your hasty zeal defrauds the claim of  
justice,

And disappointed vengeance burns in vain.

I came to heighten tortures by reproach,

And add new terrors to the face of death.

Was this the maid whose love I bought with  
empire?

True, she was fair; the smile of innocence

Play'd on her cheek—So shone the first apostate—

Irene's chamber! Did not roaring Cali,

Just as the rack forced out his struggling soul,

Name for the scene of death, Irene's chamber?

*Mus.* His breath prolong'd but to detect her  
treason,

Then in short sighs forsook his broken frame.

*Mah.* Decreed to perish in Irene's chamber!

There had she lull'd me with endearing falsehoods,

Clasp'd in her arms, or slumbering on her breast,  
And bared my bosom to the ruffian's dagger.

## SCENE XII.

HASAN, CARAZA, MAHOMET, MUSTAPHA,  
MURZA, and ABDALLA.

*Mur.* Forgive, great Sultan! that, by fate prevented,

I bring a tardy message from Irene.

*Mah.* Some artful wile of counterfeited love!  
Some soft decoy to lure me to destruction!  
And thou, the curst accomplice of her treason,  
Declare thy message, and expect thy doom.

*Mur.* The queen requested that a chosen troop  
Might intercept the traitor Greek, Demetrius,  
Then lingering with his captive mistress here.

*Mus.* The Greek Demetrius! whom th' expiring  
Bassa

Declared the chief associate of his guilt!

*Mah.* A chosen troop—to intercept—Demetrius—

[sage;  
The queen requested—Wretch, repeat the message,  
And, if one varied accent prove thy falsehood,  
Or but one moment's pause betray confusion,  
Those trembling limbs—Speak out thou shivering traitor.

*Mur.* The queen requested—

*Mah.* Who? the dead Irene?

Was she then guiltless? has my thoughtless rage  
Destroyed the fairest workmanship of Heaven!  
Doom'd her to death un pity'd and unheard,  
Amidst her kind solicitudes for me!

Ye slaves of cruelty, ye tools of rage,

[To HAS. and CAR.

Ye blind officious ministers of folly, [der?  
Could not her charms repress your zeal for murder?  
Could not her prayers, her innocence, her tears,  
Suspend the dreadful sentence for an hour?  
One hour had freed me from the fatal error;  
One hour had saved me from despair and madness.

*Car.* Your fierce impatience forced us from  
your presence,

Urged us to speed, and bade us banish pity,  
Nor trust our passions with her fatal charms.

*Mah.* What hadst thou lost by slighting those  
commands?

Thy life, perhaps—Were but Irene spared,  
Well if a thousand lives like thine had perish'd;  
Such beauty, sweetness, love, were cheaply  
bought [globe.

With half the groveling slaves that load the

*Mus.* Great is thy wo! But think, illustrious  
Sultan,

Such ills are sent for souls like thine to conquer.  
Shake off this weight of unavailing grief,  
Rush to the war, display thy dreadful banners,  
And lead thy troops victorious round the world.

*Mah.* Robb'd of the maid with whom I wish'd  
to triumph,

No more I burn for fame, or for dominion;  
Success and conquest now are empty sounds,  
Remorse and anguish seize on all my breast;

Those groves, whose shades embowered the dear  
Irene, [ties,

Heard her last cries, and fann'd her dying beauty—  
Shall hide me from the tasteless world for ever.

[MAHOMET goes back, and returns

Yet, ere I quit the sceptre of dominion,

Let one just act conclude the hateful day.

Hew down, ye guards, those vassals of destruction,  
[Pointing to HAS. and CAR.

Those hounds of blood, that catch the hint to  
kill,

Bear off with eager haste th' unfinished sentence,  
And speed the stroke lest mercy should o'ertake  
them.

*Car.* Then hear, great Mahomet, the voice of  
truth.

*Mah.* Hear! shall I hear thee? didst thou  
hear Irene?

*Car.* Hear but a moment.

*Mah.* Hadst thou heard a moment, [Irene.  
Thou might'st have lived, for thou hadst spared  
*Car.* I heard her, pitied her, and wish'd to  
save her.

*Mah.* And wish'd—Be still thy fate to wish  
in vain.

*Car.* I heard, and soften'd, till Abdalla brought  
Her final doom, and hurried her destruction.

*Mah.* Abdalla brought her doom! Abdalla  
brought it! [Cali,

The wretch whose guilt, declared by tortured  
My rage and grief had hid from my remembrance—  
Abdalla brought her doom! [brance:

*Has.* Abdalla brought it, [thee.

While yet she begg'd to plead her cause before  
*Mah.* O seize me Madness—Did she call on  
me!

I feel, I see the ruffian's barbarous rage.  
He seized her melting in the fond appeal,  
And stopp'd the heavenly voice that call'd on me.  
My spirits fail; awhile support me, Vengeance—  
Be just, ye slaves; and, to be just, be cruel;  
Contrive new racks, imbitter every pang,  
Inflict whatever treason can deserve,  
Which murder'd innocence that call'd on me.

[Exit MAHOMET; ABDALLA is dragged off.]

## SCENE XIII.

HASAN, CARAZA, MUSTAPHA, and MURZA.

*Mus.* [To MURZA.] What plagues, what tortures,  
are in store for thee,

Thou sluggish idler, dilatory slave!

Behold the model of consummate beauty,

Torn from the mourning earth by thy neglect.

*Mur.* Such was the will of Heaven—A band  
of Greeks, [pose.

That mark'd my course, suspicious of my pur-  
sue—Kush'd out and seized me, thoughtless and un-  
arm'd,

Breathless, amazed, and on the guarded beach  
Detain'd me, till Demetrius set me free.

*Mus.* So sure the fall of greatness, raised on crimes;  
 So fix'd the justice of all-conscious Heaven!  
 When haughty guilt exults with impious joy,  
 Mistake shall blast, or accident destroy;  
 Weak man with impious rage may throw the dart,  
 But Heaven shall guide it to the guilty heart.

## EPILOGUE,

BY SIR WILLIAM YONGE.

MARRY a Turk! a haughty tyrant king!  
 Who thinks us women born to dress and sing  
 To please his fancy! see no other man!  
 Let him persuade me to it—if he can;  
 Besides, he has fifty wives, and who can bear  
 To have the fiftieth part her paltry share?

'Tis true, the fellow's handsome, straight, and tall,  
 But how the devil should he please us all!  
 My swain is little—true—but he it known,  
 My pride's to have that little all my own.  
 Men will be ever to their errors blind,  
 Where woman's not allow'd to speak her mind.  
 I swear this Eastern pageantry is nonsense,  
 And for one man—one wife's enough in conscience.

In vain proud man usurps what's woman's due;  
 For us alone they honour's paths pursue:  
 Inspired by us, they glory's heights ascend;  
 Woman the source, the object, and the end.  
 Though wealth, and power, and glory, they receive,  
 These are all trifles to what we can give.  
 For us the statesman labours, hero fights,  
 Bears toilsome days, and wakes long tedious nights;  
 And, when blest peace has silenced war's alarms,  
 Receives his full reward in Beauty's arms.

## MISCELLANEOUS POEMS.

### PROLOGUE,

SPOKEN BY MR. GARRICK, APRIL 5, 1750.

BEFORE THE MASQUE OF COMUS,

ACTED AT DRURY-LANE THEATRE FOR THE BENEFIT OF  
MILTON'S GRAND-DAUGHTER.

YE patriot crowds, who burn for England's  
fame, [name,  
Ye nymphs, whose bosoms beat at Milton's  
Whose generous zeal, unbought by flattering  
rhymes,  
Shames the mean pensions of Augustan times,  
Immortal patrons of succeeding days,  
Attend this prelude of perpetual praise;  
Let wit, condemn'd the feeble war to wage  
With close malevolence, or public rage,  
Let study, worn with virtue's fruitless lore,  
Behold this theatre, and grieve no more.  
This night, distinguish'd by your smiles, shall  
That never Briton can in vain excel; [tell  
The slighted arts futurity shall trust,  
And rising ages hasten to be just.

At length our mighty bard's victorious lays  
Fill the loud voice of universal praise;  
And baffled spite, with hopeless anguish dumb,  
Yields to renown the centuries to come:  
With ardent haste each candidate of fame,  
Ambitious, catches at his towering name;  
He sees, and pitying sees, vain wealth bestow,  
Those pageant honours which he scorn'd below,  
While crowds aloft the laureat bust behold,  
Or trace his form on circulating gold,  
Unknown, unheeded, long his offspring lay,  
And want hung threatening o'er her slow decay.  
What though she shine with no Miltonian fire,  
No favouring Muse her morning dreams inspire;  
Yet softer claims the melting heart engage,  
Her youth laborious, and her blameless age;  
Hers the mild merits of domestic life,  
The patient sufferer, and the faithful wife.

Thus graced with humble virtue's native charms,  
Her grandsire leaves her in Britannia's arms;  
Secure with peace, with competence, to dwell,  
While tutelary nations guard her cell.  
Yours is the charge, ye fair, ye wise, ye brave!  
'Tis yours to crown desert—beyond the grave.

### PROLOGUE

TO THE COMEDY OF

THE GOOD-NATURED MAN, 1763.

Prest by the load of life, the weary mind  
Surveys the general toil of human kind,  
With cool submission joins the labouring train,  
And social sorrow loses half its pain:  
Our anxious bard without complaint may share  
This bustling season's epidemic care;  
Like Cæsar's pilot dignified by Fate,  
Tost in one common storm with all the great;  
Distrest alike the statesman and the wit,  
When one a Borough courts, and one the Pit.  
The busy candidates for power and fame  
Have hopes, and fears, and wishes, just the  
same;  
Disabled both to combat or to fly,  
Must hear all taunts, and hear without reply.  
Uncheck'd on both loud rabbles vent their rage,  
As mongrels bay the lion in a cage.  
Th' offended burgess hoards his angry tale,  
For that blest year when all that vote may rail;  
Their schemes of spite the poet's foes dismiss,  
Till that glad night when all that hate may  
hiss.

"This day the powder'd curls and golden  
coat," [vote."  
Says swelling Crispin, "begg'd a cobbler's  
"This night our wit," the pert apprentice cries,  
"Lies at my feet; I hiss him, and he dies."  
The great, 'tis true, can charm the electing  
tribe;  
The bard may supplicate, but cannot bribe.

Yet, judged by those whose voices ne'er were  
sold,  
He feels no want of ill-persuading gold;  
But, confident of praise, if praise be due,  
Trusts without fear to merit and to you.

## PROLOGUE

TO THE COMEDY OF

### A WORD TO THE WISE.\*

*Spoken by Mr. Hull.*

This night presents a play which public rage,  
Or right, or wrong, once hooted from the stage.†  
From zeal or malice, now no more we dread,  
For English vengeance wars not with the dead.  
A generous foe regards with pitying eye  
The man whom fate has laid where all must lie.

To wit reviving from its author's dust,  
Be kind, ye judges, or at least be just,  
For no renew'd hostilities invade  
The oblivious grave's inviolable shade.  
Let one great payment every claim appease,  
And him, who cannot hurt, allow to please;  
To please by scenes unconscious of offence,  
By harmless merriment or useful sense.  
Where aught of bright, or fair, the piece dis-  
plays,  
Approve it only—'tis too late to praise.  
If want of skill, or want of care appear,  
Forbear to hiss—the poet cannot hear.  
By all, like him, must praise and blame be  
found,

At best a fleeting gleam, or empty sound.  
Yet then shall calm reflection bless the night,  
When liberal pity dignify'd delight;  
When pleasure fired her torch at Virtue's flame,  
And Mirth was Bounty with an humbler name.

## SPRING.

AN ODE.

STERN Winter now, by Spring repress'd  
Forbears the long-continued strife:  
And Nature on her naked breast  
Delights to catch the gales of life.

\* Performed at Covent-Garden Theatre, May 29, 1777, for the benefit of Mrs. Kelly, widow of Hugh Kelly, Esq. (the author of the play) and her children.

† Upon the first representation of this play, 1770, a party assembled to damn it, and succeeded.

Now o'er the rural kingdom roves  
Soft pleasure with the laughing train,  
Love warbles in the vocal groves,  
And vegetation plants the plain,  
Unhappy! whom to beds of pain,  
Arthritic\* tyranny consigns;  
Whom smiling nature courts in vain,  
Though rapture sings and beauty shines.  
Yet though my limbs disease invades,  
Her wings imagination tries,  
And bears me to the peaceful shades,  
Where —'s humble turrets rise.  
Here stop, my soul, thy rapid flight,  
Nor from the pleasing groves depart,  
Where first great nature charm'd my sight,  
Where wisdom first inform'd my heart.  
Here let me through the vales pursue  
A guide—a father—and a friend,  
Once more great Nature's works renew,  
Once more on Wisdom's voice attend.  
From false caresses, causeless strife,  
Wild hope, vain fear, alike removed;  
Here let me learn the use of life,  
When best enjoy'd—when most improved.  
Teach me, thou venerable bower,  
Cool meditation's quiet seat,  
The generous scorn of venal power,  
The silent grandeur of retreat.  
When pride by guilt to greatness climbs,  
Or raging factions rush to war,  
Here let me learn to shun the crimes  
I can't prevent, and will not share.  
But lest I fall by subtler foes,  
Bright Wisdom, teach me Curio's art,  
The swelling passions to compose,  
And quell the rebels of the heart.

## MIDSUMMER.

AN ODE.

O PHŒBUS! down the western sky,  
Far hence diffuse thy burning ray,  
Thy light to distant worlds supply,  
And wake them to the cares of day.  
Come, gentle Eve, the friend of care,  
Come, Cynthia, lovely queen of night!  
Refresh me with a cooling air,  
And cheer me with a lambent light:  
Lay me where o'er the verdant ground  
Her living carpet Nature spreads:  
Where the green bower, with roses crown'd,  
In showers its fragrant foliage sheds;  
Improve the peaceful hour with wine,  
Let music die along the grove;  
Around the bowl let myrtles twine,  
And every strain be tuned to love.

\* The author being ill of the gout.

Come, Stella, queen of all my heart !  
 Come, born to fill its vast desires !  
 Thy looks perpetual joys impart,  
 Thy voice perpetual love inspires.  
 Whilst all my wish and thine complete,  
 By turns we languish and we burn,  
 Let sighing gales our sighs repeat,  
 Our murmurs—murmuring brooks return.  
 Let me when nature calls to rest,  
 And blushing skies the morn foretell,  
 Sink on the down of Stella's breast,  
 And bid the waking world farewell.

### AUTUMN.

AN ODE.

ALAS ! with swift and silent pace,  
 Impatient time rolls on the year ;  
 The seasons change, and nature's face  
 Now sweetly smiles, now frowns severe.  
 'Twas Spring, 'twas Summer, all was gay,  
 Now Autumn bends a cloudy brow ;  
 The flowers of Spring are swept away,  
 And Summer-fruits desert the bough.  
 The verdant leaves that play'd on high,  
 And wanton'd on the western breeze,  
 Now trod in dust neglected lie,  
 As Boreas strips the bending trees.  
 The fields that waved with golden grain,  
 As russet heaths, are wild and bare ;  
 Not moist with dew, but drench'd with rain,  
 Nor health nor pleasure, wanders there.  
 No more while through the midnight shade,  
 Beneath the moon's pale orb I stray,  
 Soft pleasing woes my heart invade,  
 As Progne pours the melting lay.  
 From this capricious clime she soars,  
 Oh ! would some god but wings supply !  
 To where each morn the Spring restores,  
 Companion of her flight I'd fly.  
 Vain wish ! me fate compels to bear  
 The downward season's iron reign,  
 Compels to breathe polluted air,  
 And shiver on a blasted plain.  
 What bliss to life can Autumn yield,  
 If glooms, and showers, and storms prevail,  
 And Ceres flies the naked field,  
 And flowers, and fruits, and Phœbus fall ?  
 Oh ! what remains, what lingers yet,  
 To cheer me in the darkening hour !  
 The grape remains ! the friend of wit,  
 In love, and mirth, of mighty power.  
 Haste—press the clusters, fill the bowl  
 Apollo ! shoot thy parting ray :  
 This gives the sunshine of the soul,  
 This god of health, and verse, and day.

Still—still the jocund strain shall flow,  
 The pulse with vigorous rapture beat ;  
 My Stella with new charms shall glow,  
 And every bliss in wine shall meet.

### WINTER.

AN ODE.

No more the morn, with tepid rays,  
 Unfolds the flower of various hue ;  
 Noon spreads no more the genial blaze,  
 Nor gentle eve distills the dew.  
 The lingering hours prolong the night,  
 Usurping Darkness shares the day ;  
 Her mists restrain the force of light,  
 And Phœbus holds a doubtful sway.  
 By gloomy twilight half reveal'd,  
 With sighs we view the hoary hill,  
 The leafless wood, the naked field,  
 The snow-topt cot, the frozen rill.  
 No music warbles through the grove,  
 No vivid colours paint the plain ;  
 No more with devious steps I rove  
 Through verdant paths, now sought in vain.  
 Aloud the driving tempest roars,  
 Congeal'd, impetuous, showers descend ;  
 Haste, close the window, bar the doors,  
 Fate leaves me Stella, and a friend.  
 In nature's aid, let art supply  
 With light and heat my little sphere ;  
 Rouse, rouse the fire, and pile it high,  
 Light up a constellation here.  
 Let music sound the voice of joy,  
 Or mirth repeat the jocund tale ;  
 Let Love his wanton wiles employ,  
 And o'er the season wine prevail.  
 Yet time life's dreary winter brings,  
 When Mirth's gay tale shall please no more ;  
 Nor music charm—though Stella sings ;  
 Nor love, nor wine, the Spring restore.  
 Catch, then, Oh ! catch the transient hour,  
 Improve each moment as it flies ;  
 Life's a short summer—man a flower :  
 He dies—alas ! how soon he dies !

### THE WINTER'S WALK.

BEHOLD, my fair, where'er we rove,  
 What dreary prospects round us rise ;  
 The naked hill, the leafless grove,  
 The hoary ground, the frowning skies !  
 Nor only through the wasted plain,  
 Stern Winter ! is thy force confess'd ;  
 Still wider spreads thy horrid reign,  
 I feel thy power usurp my breast.

Enlivening hope, and fond desire,  
 Resign the heart to spleen and care;  
 Scarce frighted Love maintains her fire,  
 And rapture saddens to despair,  
 In groundless hope, and causeless fear,  
 Unhappy man! behold thy doom;  
 Still changing with the changeful year,  
 The slave of sunshine and of gloom.  
 Tired with vain joys, and false alarms,  
 With mental and corporeal strife,  
 Snatch me, my Stella, to thy arms,  
 And screen me from the ills of life.\*

TO MISS \*\*\*\*\*.

*On her giving the Author a gold and silk net-work  
 Purse of her own weaving.†*

THOUGH gold and silk their charras unite  
 To make thy curious web delight,  
 In vain the varied work would shine,  
 If wrought by any hand but thine;  
 Thy hand, that knows the subtler art  
 To weave those nets that catch the heart.  
 Spread out by me, the roving coin  
 Thy nets may catch, but not confine;  
 Nor can I hope thy silken chain  
 The glittering vagrants shall restrain.  
 Why, Stella, was it then decreed  
 The heart once caught should ne'er be freed?

TO MISS \*\*\*\*\*.

*On her playing upon the Harpsichord in a Room  
 hung with Flower Pieces of her own Painting.‡*

WHEN Stella strikes the tuneful string  
 In scenes of imitated Spring,  
 Where Beauty lavishes her powers  
 On beds of never-fading flowers,  
 And pleasure propagates around  
 Each charm of modulated sound;  
 Ah! think not, in the dangerous hour,  
 The Nymph fictitious as the flower;  
 But shun, rash youth, the gay alcove,  
 Nor tempt the snares of wily love.

When charms thus press on every sense,  
 What thought of flight, or of defence?  
 Deceitful hope, and vain desire,  
 For ever flutter o'er her lyre,  
 Delighting as the youth draws nigh,  
 To point the glances of her eye,

And forming with unerring art  
 New chains to hold the captive heart.

But on those regions of delight  
 Might truth intrude with daring flight,  
 Could Stella, sprightly, fair, and young,  
 One moment hear the moral song,  
 Instruction with her flowers might spring,  
 And wisdom warble from her string.

Mark, when from thousand mingled dyes  
 Thou seest one pleasing form arise,  
 How active light, and thoughtful shade,  
 In greater scenes each other aid;  
 Mark, when the different notes agree  
 In friendly contrariety,  
 How passion's well-accorded strife  
 Gives all the harmony of life;  
 Thy pictures shall thy conduct frame,  
 Consistent still, though not the same;  
 Thy music teach the nobler art,  
 To tune the regulated heart.

EVENING.

AN ODE.

TO STELLA.

EVENING now from purple wings  
 Sheds the grateful gifts she brings;  
 Brilliant drops bedeck the mead,  
 Cooling breezes shake the reed;  
 Shake the reed, and curl the stream,  
 Silver'd o'er with Cynthia's beam:  
 Near the chequer'd, lonely grove,  
 Hears, and keeps thy secrets, Love.  
 Stella, thither let us stray,  
 Lightly o'er the dewy way.  
 Phœbus drives his burning car,  
 Hence, my lovely Stella, far;  
 In his stead, the Queen of Night  
 Round us pours a lambent light;  
 Light that seems but just to show  
 Breasts that beat, and cheeks that glow.  
 Let us now, in whisper'd joy,  
 Evening's silent hours employ,  
 Silence best, and conscious shades,  
 Please the hearts that love invades,  
 Other pleasures give them pain,  
 Lovers all but love disdain.

TO THE SAME.

WHETHER Stella's eyes are found  
 Fix'd on earth, or glancing round,  
 If her face with pleasure glow,  
 If she sigh at others' woe,

\* And hide me from the sight of life. 1st edition.

† Printed among Mrs. Williams's Miscellanies.

‡ Ibid.

If her easy air express  
 Conscious worth, or soft distress,  
 Stella's eyes, and air, and face,  
 Charm'd with undiminish'd grace.

If on her we see display'd  
 Pendant gems, and rich brocade,  
 If her chintz with less expense  
 Flows in easy negligence;  
 Still she lights the conscious flame,  
 Still her charms appear the same;  
 If she strikes the vocal strings,  
 If she's silent, speaks, or sings,  
 If she sit, or if she move,  
 Still we love and still approve.

Vain the casual, transient glance,  
 Which alone can please by chance,  
 Beauty, which depends on art,  
 Changing with the changing heart,  
 Which demands the toilet's aid,  
 Pendant gems and rich brocade.  
 I those charms alone can prize  
 Which from constant nature rise,  
 Which not circumstance nor dress  
 E'er can make, or more, or less.

### TO A FRIEND.

No more thus brooding o'er yon heap,  
 With Avarice painful vigils keep;  
 Still unenjoy'd the present store,  
 Still endless sighs are breath'd for more,  
 Oh! quit the shadow, catch the prize,  
 Which not all India's treasure buys!  
 To purchase Heaven has gold the power?  
 Can gold remove the mortal hour?  
 In life can love be bought with gold?  
 Are friendship's pleasures to be sold?  
 No—all that's worth a wish—a thought,  
 Fair virtue gives unbribed, unbought.  
 Cease then on trash thy hopes to bind,  
 Let nobler views engage thy mind.

With science tread the wondrous way,  
 Or learn the Muses' moral lay;  
 In social hours indulge thy soul,  
 Where mirth and temperance mix the bowl;  
 To virtuous love resign thy breast,  
 And be, by blessing beauty—blest.

Thus taste the feast by nature spread,  
 Ere youth and all its joys are fled;  
 Come taste with me the balm of life,  
 Secure from pomp, and wealth, and strife.  
 I boast whate'er for man was meant,  
 In health, and Stella, and content;  
 And scorn—oh! let that scorn be thine—  
 Mere things of clay that dig the mine.

### STELLA IN MOURNING.

WHEN lately Stella's form display'd  
 The beauties of the gay brocade,  
 The nymphs, who found their power decline,  
 Proclaim'd her not so fair as fine.  
 "Fate! snatch away the bright disguise,  
 And let the goddess trust her eyes."  
 Thus blindly pray'd the fretful fair,  
 And Fate, malicious, heard the prayer;  
 But, brighten'd by the sable dress,  
 As virtue rises in distress,  
 Since Stella still extends her reign,  
 Ah! how shall envy soothe her pain?

Th' adoring Youth and envious Fair,  
 Henceforth shall form one common prayer;  
 And love and hate alike implore  
 The skies—"That Stella mourn no more."

### TO STELLA.

Nor the soft sighs of vernal gales,  
 The fragrance of the flowery vales,  
 The murmurs of the crystal rill,  
 The vocal grove, the verdant hill;  
 Not all their charms, though all unite,  
 Can touch my bosom with delight.

Not all the gems on India's shore,  
 Not all Peru's unbounded store,  
 Not all the power, nor all the fame,  
 That heroes, kings, or poets, claim;  
 Nor knowledge, which the learn'd approve;  
 To form one wish my soul can move.

Yet Nature's charms allure my eyes,  
 And knowledge, wealth, and fame I prize;  
 Fame, wealth, and knowledge, I obtain,  
 Nor seek I Nature's charms in vain;  
 In lovely Stella all combine;  
 And, lovely Stella! thou art mine.

### VERSES

*Written at the request of a Gentleman to whom  
 a Lady had given a Sprig of Myrtle.\**

WHAT hopes, what terrors, does thy gift create;  
 Ambiguous emblem of uncertain fate!  
 The myrtle (ensign of supreme command,  
 Consign'd by Venus to Melissa's hand)

\* These verses were first printed in the Gentleman's Magazine for 1768, p. 439, but were written many years earlier. Elegant as they are, Dr. Johnson assured me, they were composed in the short space of five minutes. N.

Not less capricious than a reigning fair,  
 Oft favours, oft rejects, a lover's prayer.  
 In myrtle shades oft sings the happy swain,  
 In myrtle shades despairing ghosts complain.  
 The myrtle crowns the happy lovers' heads,  
 Th' unhappy lovers' graves the myrtle spreads.  
 Oh! then, the meaning of thy gift impart,  
 And ease the throbbings of an anxious heart.  
 Soon must this bough, as you shall fix its doom,  
 Adorn Philander's head, or grace his tomb.

TO

LADY FIREBRACE.\*

AT BURY ASSIZES.

At length must Suffolk's beauties shine in vain,  
 So long renown'd in B——n's deathless strain?  
 Thy charms at least, fair Firebrace, might inspire  
 Some zealous bard to wake the sleeping lyre;  
 For such thy beauteous mind and lovely face,  
 Thou seem'st at once, bright nymph, a *Muse*  
 and *Grace*.

TO LYCE,

AN ELDERLY LADY.

Ye nymphs whom starry rays invest,  
 By flattering poets given,  
 Who shine, by lavish lovers drest,  
 In all the pomp of Heaven;

Engross not all the beams on high,  
 Which gilds a lover's lays,  
 But, as your sister of the sky,  
 Let Lyce share the praise.

Her silver locks display the moon,  
 Her brows a cloudy show,  
 Stripp'd rainbows round her eyes are seen,  
 And showers from either flow.

\* This lady was Bridget, third daughter of Philip Bacon, Esq. of Ipswich, and relict of Philip Evers, Esq. of that town. She became the second wife of Sir Cordell Firebrace, the last Baronet of that name (to whom she brought a fortune of £25,000), July 26, 1737. Being again left a widow in 1759, she was a third time married, April 7, 1762, to William Campbell, Esq. uncle to the present Duke of Argyll, and died July 3, 1782.

Her teeth the night with darkness dyes,  
 She's starr'd with pimples o'er;  
 Her tongue like nimble lightning plies,  
 And can with thunder roar.

But some Zelinda, while I sing,  
 Denies my Lyce shines;  
 And all the pens of Cupid's wing  
 Attack my gentle lines.

Yet, spite of fair Zelinda's eye,  
 And all her bards express,  
 My Lyce makes as good a sky,  
 And I but flatter less.

ON THE DEATH OF

MR. ROBERT LEVET,

A PRACTISER IN PHYSIC.

CONDEMN'D to Hope's delusive mine,  
 As on we toil from day to day,  
 By sudden blasts, or slow decline,  
 Our social comforts drop away.

Well tried through many a varying year,  
 See Levett to the grave descend,  
 Officious, innocent, sincere,  
 Of every friendless name the friend.

Yet still he fills Affection's eye,  
 Obscurely wise, and coarsely kind;  
 Nor letter'd arrogance deny  
 Thy praise to merit unrefined.

When fainting nature call'd for aid,  
 And hovering death prepared the blow,  
 His vigorous remedy display'd  
 The power of art without the show.

In misery's darkest cavern known,  
 His useful care was ever nigh,  
 Where hopeless anguish pour'd his groan,  
 And lonely want retired to die.

No summons mock'd by chill delay,  
 No petty gain disdain'd by pride,  
 The modest wants of every day  
 The toil of every day supplied.

His virtues walk'd their narrow round,  
 Nor made a pause, nor left a void;  
 And sure th' Eternal Master found  
 The single talent well employ'd.

The busy day—the peaceful night,  
 Unfelt, uncounted, glided by;  
 His frame was firm—his powers were bright,  
 Though now his *eightieth* year was nigh.

Then, with no fiery throbbing pain,  
No cold gradations of decay,  
Death broke at once the vital chain,  
And freed his soul the nearest way.

### EPITAPH ON CLAUDE PHILLIPS,

AN ITINERANT MUSICIAN.\*

PHILLIPS! whose touch harmonious could re-  
move

The pangs of guilty power, and hapless love,  
Rest here, distress'd by poverty no more,  
Find here that calm thou gav'st so oft before;  
Sleep undisturb'd within this peaceful shrine,  
Till angels wake thee with a note like thine.

### EPITAPHIUM†

IN

THOMAM HANMER, BARONETTUM.

HONORABILIS admodum Thomas Hanmer,  
Baronettus,  
Wilhelmi Hanmer armigeri, è Peregrinâ Hen-  
rici North  
De Mildenhall in Com. Suffolciæ Baronetti so-  
rore et hæredes,  
Filius;  
Johannis Hanmer de Hanmer Baronetti  
Hæres patruellis  
Antiquo gentis suæ et titulo et patrimonio suc-  
cessit.  
Duas uxores sortitus est;  
Alteram Isabellam, honore à patre derivato, de  
Arlington comitissam,  
Deindè celsissimi principis ducis de Grafton  
viduam dotariam:  
Alteram Elizabetham Thomæ Foulkes de Bar-  
ton in Com. Suff. armigeri  
Filiam et hæredem.  
Inter humanitates studia feliciter enutritus,  
Omnes liberalium artium disciplinas avidè ar-  
ripuit,  
Quas morum suavitate haud leviter ornavit.  
Postquam excessit ex ephebis,  
Continuò inter populares suos famâ eminens,

Et comitatus sui legatus ad Parlamentum  
missus,  
Ad ardua regni negotia per annos prope triginta  
se accinxit:  
Cumque apud illos amplissimorum virorum  
ordines  
Solent nihil temerè effutire,  
Sed probè perpensa disertè expromere,  
Orator gravis et pressus;  
Non minus integritatis quam eloquentiæ laude  
commendatus,  
Æquè omnium, utcumque inter se aliqui dissi-  
dentium,  
Aures atque animos attraxit.  
Annoque demum M.DCC.XIII. regnante Annâ  
Felicissimæ florentissimæque memoriæ reginâ,  
Ad Prolocutoris cathedram  
Communi Senatûs universi voce designatus est:  
Quod munus,  
Cum nullo tempore non difficile,  
Tum illo certè, negotiis  
Et variis et lubricis et implicatis difficillimum,  
Cum dignitate sustinuit.  
Honores alios, et omnia quæ sibi in lucrum ce-  
derent munera,  
Sedulò detrectavit,  
Ut rei totus inserviret publicæ;  
Justi rectique tenax,  
Et fide in patriam incorruptâ notus.  
Ubi omnibus, quæ virum civemque bonum de-  
cent, officiis satisfacisset,  
Paulatim se à publicis consiliis in otium re-  
cipiens,  
Inter literarum amoenitates,  
Inter ante-actæ vitæ haud insuaves recordationes,  
Inter amicorum convictus et amplexus,  
Honorificè consenuit;  
Et bonis omnibus, quibus charissimus vixit,  
Desideratissimus obiit.  
Hic, juxta cineres avi, suos condi voluit, et  
curavit  
Gulielmus Bunbury Bt<sup>us</sup>. nepos et hæres.

### PARAPHRASE OF THE ABOVE EPITAPH.

BY DR. JOHNSON.\*

THOU who survey'st these walls with curious  
eye,  
Pause at the tomb where Hanmer's ashes lie!  
His various worth through varied life attend,  
And learn his virtues while thou mourn'st his  
end.

\* These lines are among Mrs. Williams's Miscel-  
lanies: they are nevertheless recognised as John-  
son's in a memorandum of his hand-writing, and  
were probably written at her request. Phillips was  
a travelling fiddler up and down Wales, and was  
greatly celebrated for his performance.

† At Hanmer church, in Flintshire.

\* This Paraphrase is inserted in Mrs. Williams's  
Miscellanies. The Latin is there said to be written  
by Dr. Freind. Of the person whose memory it  
celebrates, a copious account may be seen in the  
Appendix to the Supplement to the Biographia Bri-  
tannica.

His force of genius burn'd in early youth,  
With thirst of knowledge, and with love of  
truth;

His learning, join'd with each endearing art,  
Charm'd every ear, and gain'd on every heart.

Thus early wise, th' endanger'd realm to aid,  
His country call'd him from the studious shade;  
In life's first bloom his public toils began,  
At once commenced the senator and man.

In business dexterous, weighty in debate,  
Thrice ten long years he labour'd for the State:  
In every speech persuasive wisdom flow'd,  
In every act refulgent virtue glow'd:

Suspended faction ceased from rage and strife,  
To hear his eloquence, and praise his life.

Resistless merit fix'd the Senate's choice  
Who hail'd him Speaker with united voice.  
Illustrious age! how bright thy glories shone,  
When Hammer fill'd the chair—and Anne the  
throne! [bate,

Then when dark arts obscured each fierce de-  
When mutual frauds perplex'd the maze of state,  
The moderator firmly mild appear'd —  
Beheld with love—with veneration heard.

This task perform'd—he sought no gainful  
post,

Nor wish'd to glitter at his country's cost;  
Strict on the right he kept his steadfast eye,  
With temperate zeal and wise anxiety;  
Nor e'er from Virtue's paths was lured aside,  
To pluck the flowers of pleasure or of pride.  
Her gifts despised, Corruption blush'd and fled,  
And Fame pursued him where Conviction led.

Age call'd, at length, his active mind to rest,  
With honour sated, and with cares oppress;  
To letter'd ease retired, and honest mirth,  
To rural grandeur and domestic worth:  
Delighted still to please mankind, or mend,  
The patriot's fire yet sparkled in the friend.

Calm Conscience, then, his former life sur-  
vey'd,

And recollected toils endear'd the shade,  
Till Nature call'd him to the general doom,  
And Virtue's sorrow dignified his tomb.

## TO MISS HICKMAN.\*

PLAYING ON THE SPINNET.

BRIGHT Stella form'd for universal reign,  
Too well you know to keep the slaves you gain;

\* These lines, which have been communicated by Dr. Turton, son to Mrs. Turton, the lady to whom they are addressed by her maiden name of Hickman, must have been written at least as early as the year 1734, as that was the year of her marriage: at how much earlier a period of Dr. Johnson's life they may have been written, is not known.

When in your eyes resistless lightnings play,  
Awed into love our conquer'd hearts obey,  
And yield reluctant to despotic sway:  
But when your music soothes the raging pain,  
We bid propitious Heaven prolong your reign,  
We bless the tyrant, and we hug the chain.

When old Timotheus struck the vocal string,  
Ambition's fury fired the Grecian king:  
Unbounded projects labouring in his mind,  
He pants for room, in one poor world confined.  
Thus waked to rage, by music's dreadful  
power,

He bids the sword destroy, the flame devour.  
Had Stella's gentle touches moved the lyre,  
Soon had the monarch felt a nobler fire;  
No more delighted with destructive war,  
Ambitious only now to please the fair;  
Resign'd his thirst of empire to her charms,  
And found a thousand worlds in Stella's arms.

## PARAPHRASE OF PROVERBS,

CHAP. VI. Verses 6—11.

*"Go to the Ant, thou Sluggard."* \*

TUAN on the prudent ant thy heedful eyes,  
Observe her labours, sluggard, and be wise:  
No stern command, no monitory voice,  
Prescribes her duties, or directs her choice;  
Yet, timely provident, she hastes away,  
To snatch the blessings of the plenteous day;  
When fruitful summer loads the teeming plain,  
She crops the harvest, and she stores the grain.  
How long shall Sloth usurp thy useless hours,  
Unnerve thy vigour, and enchain thy powers:  
While artful shades thy downy couch inclose,  
And soft solicitation courts repose?  
Amidst the drowsy charms of dull delight,  
Year chases year with unremitted flight,  
Till Want, now following, fraudulent and slow,  
Shall spring to seize thee like an ambush'd foe.

## HORACE, LIB. IV. ODE VII.

TRANSLATED.

THE snow dissolved, no more is seen  
The fields and woods, behold! are green;  
The changing year renews the plain,  
The rivers know their banks again;

\* In Mrs. Williams's *Miscellanies*, but now printed from the original in Dr. Johnson's own hand-writing.

The sprightly nymph and naked grace  
 The mazy dance together trace ;  
 The changing year's successive plan  
 Proclaims mortality to man ;  
 Rough winter's blasts to spring give way,  
 Spring yields to summer's sovereign ray ;  
 Then summer sinks in autumn's reign,  
 And winter chills the world again ;  
 Her losses soon the moon supplies,  
 But wretched man, when once he lies  
 Where Priam and his sons are laid,  
 Is nought but ashes and a shade.  
 Who knows if Jove, who counts our score,  
 Will toss us in a morning more ?  
 What with your friend you nobly share  
 At least you rescue from your heir.  
 Not you, Torquatus, boast of Rome,  
 When Minos once has fixed your doom,  
 Or eloquence, or splendid birth,  
 Or virtue, shall restore to earth.  
 Hippolytus, unjustly slain,  
 Diana calls to life in vain ;  
 Nor can the might of Theseus rend  
 The chains of Hell that hold his friend.

Nov. 1784.

 The following TRANSLATIONS, PARODIES,  
 and BURLESQUE VERSES, most of them extem-  
 pore, are taken from ANECDOTES of Dr. JOHN-  
 SON, published by Mrs. Piozzi.

### ANACREON, ODE IX.

LOVELY courier of the sky,  
 Whence and whither dost thou fly ?  
 Scattering, as thy pinions play,  
 Liquid fragrance all the way :  
 Is it business ? is it love ?  
 Tell me, tell me, gentle dove.  
 Soft Anacreon's vows I bear,  
 Vows to Myrtale the fair ;  
 Graced with all that charms the heart,  
 Blushing nature, smiling art.  
 Venus, courted by an ode,  
 On the bard her dove bestow'd ;  
 Vested with a master's right,  
 Now Anacreon rules my flight ;  
 His the letters that you see,  
 Weighty charge consign'd to me ;  
 Think not yet my service hard,  
 Joyless task without reward ;  
 Smiling at my master's gates,  
 Freedom my return awaits ;  
 But the liberal grant in vain  
 Tempts me to be wild again.  
 Can a prudent dove decline  
 Blissful bondage such as mine ?  
 Over hills and fields to roam,  
 Fortune's guest without a home ;

Under leaves to hide one's head,  
 Slightly shelter'd, coarsely fed :  
 Now my better lot bestows  
 Sweet repast, and soft repose ;  
 Now the generous bowl I sip  
 As it leaves Anacreon's lip :  
 Void of care, and free from dread,  
 From his fingers snatch his bread ;  
 Then, with luscious plenty gay,  
 Round his chamber dance and play ;  
 Or from wine, as courage springs,  
 O'er his face extend my wings ;  
 And when feast and frolic tire,  
 Drop asleep upon his lyre.  
 This is all, be quick and go,  
 More than all thou canst not know ;  
 Let me now my pinions ply,  
 I have chatter'd like a pye.

### LINES

Written in Ridicule of certain Poems published  
 in 1777.

WHERESOEVER I turn my view,  
 All is strange, yet nothing new ;  
 Endless labour all along ;  
 Endless labour to be wrong ;  
 Phrase that time hath flung away,  
 Uncouth words in disarray,  
 Trick'd in antique ruff and bonnet,  
 Ode, and elegy, and sonnet.

### PARODY OF A TRANSLATION

From the *Medea* of Euripides.

ERR shall they not, who resolute explore,  
 Times gloomy backward with judicious eyes ;  
 And scanning right the practices of yore,  
 Shall deem our hoar progenitors unwise.

They to the dome where smoke, with curling  
 play,

Announced the dinner to the regions round,  
 Summon'd the singer blithe and harper gay,  
 And aided wine with dulcet-streaming sound.

The better use of notes, or sweet or shrill,  
 By quivering string or modulated wind ;  
 Trumpet or lyre—to their harsh bosoms chill  
 Admission ne'er had sought, or could not find.

Oh ! send them to the sullen mansions dun,  
 Her baleful eyes where Sorrow rolls around ;  
 Where gloom-ennamour'd Mischief loves to dwell,  
 And Murder, all blood-bolter'd, schemes the  
 wound.

Then cates luxuriant pile the spacious dish,  
And purple nectar glads the festive hour;  
The guest, without a want, without a wish,  
Can yield no room to music's soothing power.

## TRANSLATION

*Of the two first Stanzas of the Song "Rio Verde,  
Rio Verde," printed in Bishop Percy's Reliques  
of Ancient English Poetry.*

### AN IMPROMPTU.

GLASSY water, glassy water,  
Down whose current, clear and strong,  
Chiefs confused in mutual slaughter,  
Moor and Christian, roll along.

## IMITATION

OF

### THE STYLE OF \*\*\*\*.

HERMIT hoar, in solemn cell  
Wearing out life's evening grey,  
Strike thy bosom, sage, and tell,  
What is bliss, and which the way?

Thus I spoke, and speaking sigh'd,  
Scarce repress'd the starting tear,  
When the hoary sage reply'd,  
Come, my lad, and drink some beer!

## BURLESQUE

*Of the following Lines of Lopez de Vega.*

### AN IMPROMPTU.

SE acquien los leones vence  
Vence una muger hermosa  
O ei de flaco averguence  
O ella di ser mais furiosa.

If the man who turnips cries,  
Cry not when his father dies,  
'Tis a proof that he had rather  
Have a turnip than his father.

## TRANSLATION

*Of the following Lines at the end of Baretti's Essay  
Phraseology.*

### AN IMPROMPTU.

Viva ! viva la padrona !  
Tutta bella, e tutta buona,  
La padrona è un angiolella  
Tutta buona e tutta bella ;  
Tutta bella e tutta buona ;  
Viva ! viva la padrona !

Long may live my lovely Hetty !  
Always young, and always prettv  
Always pretty, always young  
Live, my lovely Hetty, long !  
Always young, and always pretty,  
Long may live my lovely Hetty !

## IMPROVISO TRANSLATION

*Of the following Distich on the Duke of Modena  
running away from the Comet in 1742 or 1743.*

SE al venir vostro i principi se n' vanno  
Deh venga ogni di ——— durate un anno.

If at your coming princes disappear,  
Comets ! come every day ——— and stay a  
year.

## IMPROVISO TRANSLATION

*Of the following Lines of M. Benserade à son Lit.*

THEATRE des ris, et des pleurs,  
Lit ! où je nais, et où je meurs,  
Tu nous fais voir comment voisins,  
Sont nos plaisirs, et nos chagrins.

In bed we laugh, in bed we cry,  
And born in bed, in bed we die ;  
The near approach a bed may show  
Of human bliss to human woe.

## EPITAPH FOR MR. HOGARTH.

THE hand of him here torpid lies,  
That drew th' essential form of grace ;  
Here closed in death th' attentive eyes,  
That saw the manners in the face.

M

## TRANSLATION

*Of the following Lines written under a Print representing Persons Skaiting.*

Sur un mince crystal l'hyver conduit leurs pas,  
Le précipice est sous la glace :  
Telle est de nos plaisirs la légère surface :  
Glissez, mortels ; n'appuyez pas.

O'ER ice the rapid skaiter flies,  
With sport above, and death below ;  
Where mischief lurks in gay disguise,  
Thus lightly touch and quickly go.

## IMPROMPTU TRANSLATION

*Of the same.*

O'ER crackling ice, o'er gulphs profound,  
With nimble glide the skaiters play ;  
O'er treacherous Pleasure's flowery ground  
Thus lightly skim and haste away.

## TO MRS. THRALE,

*On her completing her thirty-fifth year.*

## AN IMPROMPTU.

Off in danger, yet alive  
We are come to thirty-five ;  
Long may better years arrive,  
Better years than thirty-five !  
Could philosophers contrive  
Life to stop at thirty-five,  
Time his hours should never drive  
O'er the bounds of thirty-five.  
High to soar, and deep to dive,  
Nature gives at thirty-five.

Ladies, stock and tend your hive  
Trifle not at thirty-five ;  
For, howe'er we boast and strive,  
Life declines from thirty-five.  
He that ever hopes to thrive  
Must begin by thirty-five ;  
And all who wisely wish to wive  
Must look on Thrale at thirty-five.

## IMPROMPTU TRANSLATION

*Of an air in the Clemenza de Tito of Metastasio beginning "Dich se piacermi vuoi."*

WOULD you hope to gain my heart,  
Bid your teasing doubts depart ;  
He, who blindly trusts, will find  
Faith from every generous mind :  
He, who still expects deceit,  
Only teaches how to cheat.

## TRANSLATION

*Of a Speech of Aquileio in the Adriano of Metastasio, beginning "Tu che in corte invecchiasti."*

GROWN old in courts, thou surely art not one  
Who keeps the rigid rules of ancient honour ;  
Who skill'd to soothe a foe with looks of kind-  
To sink the fatal precipice before him, [ness,  
And then lament his fall by seeming friendship ;  
Open to all, true only to thyself,  
Thou know'st those arts which blast with en-  
vious praise,  
Which aggravate a fault with feign'd excuses,  
And drive discountenanced virtue from the  
throne ;  
That leave the blame of rigour to the prince,  
And of his every gift usurp the merit ;  
That hide in seeming zeal a wicked purpose,  
And only build upon another's ruin.

# P O E M A T A.

## MESSIA.\*

Ex alieno ingenio poeta, ex suo tantum versificator.  
SCALIG. Poet.

TOLLITE concentum, Solymæ tollite nymphæ,  
Nil mortale loquor; cœlum mihi carminis alta  
Materies; poscunt gravibus cœlestia plectrum.  
Muscose fontes, sylvestria tecta valete,  
Aonidesque Deæ, et mendacis somnia Pindi:  
Tu, mihi qui flammâ movisti pectora sancti  
Sidereâ Isaie, dignos accende furores!

Immatura calens rapitur per secula vates  
Sic orsus—Qualis rerum mihi nascitur ordo!  
Virgo! virgo parit! felix radiibus arbor  
Jesseis surgit, mulcentesque æthera flores  
Cœlestes lambunt animæ, ramisque columba,  
Nuncia sacra Dei, plaudentibus insidet alis.  
Nectareos rores, alimenta que mitia cœlum  
Præbeat, et tacite fœcundos irriget imbres.  
Huc, fœdat quos lepra, urit quos febris, adeste,  
Dia salutare spirant medicamina rami;  
Hic requies fessis: non sacra sævit in umbra  
Vis Boreæ gelida, aut rapidi violentia solis.  
Irrita vanescent prisca vestigia fraudis,  
Justitiæque manus pretio interemerata bilancem  
Attollet reducis; bellis prætendit olivas  
Compositis pax alma suas, terrasque revisens  
Sedatas niveo virtus lucebit amictu:  
Volvantur celeres anni! lux purpuret ortum  
Expectata diu! naturæ claustra refringens,  
Nascere, magne puer! tibi primas, ecce, corollas  
Deproperat tellus, fundit tibi munera quicquid  
Carpit Arabs, hortis quicquid frondescit Eois.  
Altius, en! Lebanon gaudentia culmina tollit.  
En! summo exultant nutantes vertice sylvæ.  
Mittit aromaticas vallis Saronica nubes,  
Et juga Carmeli recreant fragrantia cœlum.  
Deserti lætâ mollescent aspera voce,

Auditor Deus! ecce Deus! reboantia circum,  
Saxa sonant, Deus! ecce Deus! deflectitur  
æther,

Demissumque Deum tellus capit; ardua cedrus,  
Gloria sylvarum, dominum inclinata salutet.  
Surgite convalles, tumidi subsidite montes!  
Sternite saxa viam, rapidi discedite fluctus;  
En! quem turba diu cecinerunt enthea, vates,  
En! salvator adest; vultus agnoscite cæci  
Divinos, surdos sacra vox permulceat aures.  
Ille cutim spissam visus hebetare vetabit,  
Reclusisque oculis infundet amabile lumen;  
Obstrictasque diu linguas in carmina solvet.  
Ille vias vocis pandet, flexusque liquentis  
Harmoniæ purgata novos mirabitur auris.  
Accrescunt teneris tactu nova robora nervis:  
Consuetus fulcro innixus reptare bacilli  
Nunc saltu capreas, nunc cursu provocat euros.  
Non planctus, non mœsta sonant suspiria;  
pectus

Singultans mulcet, lachrymantes tergit ocellos.  
Vincla coercebunt luctantem adamantina  
mortem

Æternoque Orci dominator vulnere languens  
Invalidi raptos sceptri plorabit honores.  
Ut qua dulce strepent scatebræ, qua lata  
virescunt

Pascua, qua blandum spirat purissimus aer,  
Pastor agit pecudes, teneros modo suscipit agnos  
Et gremio fotis selectas porrigit herbas,  
Amixtas modo querit oves, revocatque vagantes;  
Fidus adest custos, seu nox furat horrida nimbis,  
Sive dies medius morientia torreat arva.  
Postera sic pastor divinus secla beabit,  
Et curas felix patrias testabitur orbis.  
Non ultra infestis concurrent agmina signis,  
Hostiles oculis flammis jaculantia torvis;  
Non litui accendent bellum, non campus ahenis  
Triste coruscabit radiis; dabit hasta recusa  
Vomerem, et in falcem rigidus curvabitur ensis.  
Atria, pacis opus, surgent, finemque caduci  
Natus ad optatum perducet cœpta parentis.  
Qui duxit sulcos, illi teret area messem,  
Et seræ texent vites umbracula proli.  
Attoniti dumeta vident inculto coloni  
Suave rubere rosis, sitientesque inter arenas  
Garrula mirantur salientis murmura rivi.

\* This translation has been severely criticised by Dr. Warton, in his edition of Pope, vol. i. p. 105, 8vo. 1797. It certainly contains some expressions that are not classical. Let it be remembered, however, that it was a college exercise, performed with great rapidity, and was at first praised beyond all suspicion of defect.—C.

Per saxa, ignivomi nuper spelæa draconis.  
 Canna viret, juncique tremuit variabilis umbra.  
 Horrui implexo qua vallis sente, figuræ  
 Surgit amans abies teretis, buxique sequaces  
 Artificis frondent dextræ; palmisque rubeta  
 Aspera, odoratæ cedunt mala gramina myrto.  
 Per valles sociata lupo lasciviet agna,  
 Cumque leone petet tutus præsepe juvenus.  
 Florea mansuetæ petulantes vincula tigri  
 Per ludum pueri injicient, et fessa colubri  
 Membra viatoris recreabunt frigore linguæ.  
 Serpentes teneris nil jam lethale micantes  
 Tractabit palmis infans, motusque trisulcæ  
 Rildebit linguæ innocuos, squamasque virentes  
 Aureaque admirans rutilantis fulgura cristæ.  
 Indue reginam, turritæ frontis honores  
 Tolle Salema sacros, quam circum gloria pennas  
 Explicat, incinctam radiatæ luce tiaræ!  
 En! formosa tibi spatiosa per atria, proles  
 Ordinibus surgit densis, vitamque requirit  
 Impatiens, lenteque fluentes increpat annos.  
 Ecce peregrinis fervent tua limina turbis;  
 Barbarus en! clarum divino lumine templum  
 Ingreditur, cultuque tuo mansuescere gaudet.  
 Cinnameos cumulos, Nabathæi munera veris,  
 Ecce cremant genibus tritæ regalibus aræ!  
 Solis Ophyreæ crudum tibi montibus aurum  
 Maturant radii; tibi balsama sudat Idume.  
 Ætheris en portas sacro fulgore micantes  
 Cœlicolæ pandunt, torrentis aurea lucis  
 Flumina prorumpunt; non posthac sole rubescet  
 India nascenti, placidæve argentea noctis  
 Luna vices revehet; radios pater ipse diei  
 Proferet archetypos; cœlestis gaudia lucis  
 Ipso fonte bibes, quæ circumfusa beatam  
 Regiam inundabit, nullis cessura tenebris.  
 Littora deficiens arentia deseret æquor;  
 Sidera fumabunt, diro labefacta tremore  
 Saxa cadent, solidique liquescent robora montis:  
 Tu secura tamen confusa elementa videbis,  
 Lætæque Messia semper dominabere rege,  
 Pollicitis firmata Dei, stabilita ruinis.

[Jan. 20, 21, 1773.]

VITÆ qui varias vices  
 Rerum perpetuus temperat Arbiter,  
 Læto cedere lumini  
 Noctis tristitiam qui gelidæ jubet,  
 Acri sanguine turgidos,  
 Obductosque oculos nubibus humidis  
 Sanari voluit meos;  
 Et me, cuncta beans cui nocuit dies,  
 Luci reddidit et mihi.  
 Qua te laude, Deus, qua prece prosequare?  
 Sacri discipulis libri  
 Te semper studiis utilibus colam:  
 Grates, summe Pater, tuis  
 Recte qui fruiat muneribus, dedit.

[Dec. 25, 1779.]

Nunc dies Christo memoranda nato  
 Fulsit, in pectus mihi fonte purum  
 Gaudium sacro fluat, et benigni  
 Gratia Cœli!

Christe, da tutam trepido quietem,  
 Christe, spem præsta stabilem timentis;  
 Da fidem certam, precibusque fidis  
 Annue, Christe.

[In Lecto, die Passionis, Apr. 13, 1781.]

SUMME Deus, qui semper amas quodcunque  
 creâsti;  
 Judice quo, scelerum est poenituisse salus;  
 Da veteres noxas animo sic flere novato,  
 Per Christum ut veniam sit reperire mihi.

[In Lecto, Dec. 25, 1782.]

Sæ non inani confugis,  
 Peccator, ad latus meum;  
 Quod poscis, haud unquam tibi  
 Negabitur solatium.

[Nocti, inter 16 et 17 Junii, 1783.\*]

SUMME Pater, quodcunque tuum† de corpore  
 Numen‡ [velit:  
 Hoc statuatur, || precibus § Christus adesce  
 Ingenio parcas, nec sit mihi culpa rogasse,¶  
 Qua solum potero parte, placere \*\* tibi.

[Cal. Jan. in lecto, ante lucem. 1784.]

SUMME dator vitæ, naturæ æternæ magister,  
 Causarum series quo moderante fluit,

\* The night above referred to by Dr. Johnson, was that in which a paralytic stroke had deprived him of his voice; and, in the anxiety he felt lest it should likewise have impaired his understanding, he composed the above lines, and said, concerning them, that he knew at the time that they were not good, but then that he deemed his discerning this to be sufficient for the quieting the anxiety before mentioned, as it showed him that his power of judging was not diminished.

† Al. tuæ. ‡ Al. leges. § Al. statuatur.  
 § Al. votis ¶ Al. precari. \*\* Al. litare.

Respice quem subiget senium, morbique seniles,  
 Quem terret vitæ meta propinqua suæ.  
 Respice inutiliter lapsi quem pœnitet ævi;  
 Recte ut pœniteat, respice, magne parens.

PATER benigne, summa semper lenitas,  
 Crimine gravatam plurimo mentem leva:  
 Concede veram pœnitentiam, precor,  
 Concede agendam legibus vitam tuis.  
 Sacri vagantes luminis gressus face  
 Rege, et tuere, quæ nocent pellens procul;  
 Veniam petenti, summe da veniam, pater;  
 Veniæque sancta pacis adde gaudia:  
 Sceleris ut expers, omni et vacuus metu,  
 Te, mente purâ, mente tranquillâ colam:  
 Mihi dona morte hæc impetret Christus suâ.

[Jan. 18, 1784.]

SUMME Pater, puro collustra lumine pectus,  
 Anxietas noceat ne tenebrosa mihi.  
 In me sparsa manu virtutum semina larga  
 Sic ale, proveniat messis ut ampla boni.  
 Noctes atque dies animo spes læta recurset,  
 Certa mihi sancto flagret amore fides.  
 Certa vetat dubitare fides, spes læta timere.  
 Velle vetet cuiquam non bene sanctus amor.  
 Da, ne sint permissa, Pater, mihi præmia frus-  
 Et colere, et leges semper amare tuas. [tra,  
 Hæc mihi, quo gentes, quo secula, Christe, piâsti,  
 Sanguine, precanti promerere tuo!

[Feb. 27, 1784.]

MENS mea, quid quereris? veniet tibi mollior  
 hora,  
 In summo ut videas numine læta patrem;  
 Divinam insontes iram placavit Iesus;  
 Nunc est pro pœna pœnituisse reis.

### CHRISTIANUS PERFECTUS.

QUI cupit in sanctos Christo cogente referri,  
 Abstergat mundi labem, nec gaudia carnis  
 Captans, nec fastu tumidus, semperque futuro  
 Instet, et evellens terroris spicula corde,  
 Suspicat tandem clementem in numine patrem.  
 Huic quoque, nec genti nec sectæ noxius ulli,  
 Sit sacer orbis amor, miseris qui semper adesce  
 Gestiat, et, nullo pietatis limite clausus,  
 Cunctorum ignoscat vitilis, pietate fruatur.  
 Ardeat huic toto sacer ignis pectore, possit

Ut vitam, poscat si res, impendere vero.  
 Cura placere Deo sit prima, sit ultima, sanctæ  
 Irruptum vitæ cupiat servare tenorem;  
 Et sibi, delirans quanquam et peccator in horas  
 Displiceat, servet tutum sub pectore rectum:  
 Nec natet, et nunc has partes, nunc eligat illas,  
 Nec dubitet quem dicat herum, sed, totus in uno,  
 Se fidum addicat Christo, mortalia temens.  
 Sed timeat semper, caveatque ante omnia,  
 turbæ  
 Ne stolidæ similis, leges sibi segreget audax  
 Quas servare velit, leges quas lentus omittat,  
 Plenum opus effugiens, aptans juga mollia collo,  
 Sponte sua demens; nihilum decedere summæ  
 Vult Deus, at qui cuncta dedit tibi, cuncta re-  
 poscit.  
 Denique perpetuo contendit in ardua nisu,  
 Auxilioque Dei fretus, jam mente serena  
 Pergit, et imperiis sentit se dulcibus actum.  
 Paulatim mores, animum, vitamque refigit,  
 Effigiemque Dei, quantum servare licebit,  
 Induit, et, terris major, cœlestia spirat.

ÆTERNE rerum conditor,  
 Salutis æternæ dator;  
 Felicitatis sedibus  
 Qui nec scelestos exigis,  
 Quoscumque scelerum pœnitet;  
 Da, Christe, pœnitentiam,  
 Veniamque, Christe, da mihi;  
 Egrum trahenti spiritum  
 Succurre præsens corpori,  
 Multo gravatam crimine  
 Mentem benignus alleva.

LUX collustret mihi pectus alma,  
 Pellat et tristes animi tenebras,  
 Nec sinat semper tremere ac dolere,  
 Gratia Christi:  
 Me Pater tandem reducem benigno  
 Summus amplexu foveat, beato  
 Me gregi Sanctus socium beatum  
 Spiritus addat.

### JEJUNIUM ET CIBUS.

SERVAT ut menti corpus jejunia serva,  
 Ut mens utatur corpore, sume cibos.

### AD URBANUM.\* 1738.

URBANE, nullis fesse laboribus,  
 Urbane, nullis victæ calumniis,

\* See Gent. Mag. Vol. VIII. p. 156; and see also the Introduction to Vol. LIV.

Cui fronte sertum in erudita  
 Perpetuo viret, et virebit;  
 Quid molietur gens imitantium,  
 Quid et minetur, sollicitus parum,  
 Vacare solis perge Musis,  
 Juxta animo studiisque felix.  
 Linguae procacis plumbea spicula,  
 Fidens, superbo frange silentio;  
 Vitrix per obstantes catervas  
 Sedulitas animosa tendet.  
 Intende nervos fortis, inanibus  
 Risurus olim nisibus æmuli;  
 Intende jam nervos, habebis  
 Participes opera Camænas.  
 Non ulla Musis pagina gratior,  
 Quam quæ severis ludicra jungere  
 Novit, fatigatamque nugis  
 Utilibus recreare mentem.  
 Texente nymphis sarta Lycoride,  
 Rosæ ruborem sic viola adjuvat  
 Immista, sic Iris refulget  
 Æthereis variata fucis.

IN RIVUM A MOLA STOANA LICH-  
 FELDIAE DIFFLUENTEM.

ERRAT adhuc vitreus per prata virentia rivus,  
 Quo toties lavi membra tenella puer;  
 Hic delusa rudi frustrabar brachia motu,  
 Dum docuit blanda voce natare pater.  
 Fecerunt rami latebras, tenebrisque diurnis  
 Pendula secretas addidit arbor aquas.  
 Nunc veteres duris periære securibus umbræ,  
 Longinquisque oculis nuda lavacra patent.  
 Lympha tamen cursus agit indefessa perennis,  
 Tectaque qua fluxit, nunc et aperta fluit.  
 Quid ferat externi velox, quid deterat ætas,  
 Tu quoque securus res age, Nise, tuas.

ΓΝΩΘΙ ΣΕΑΤΤΟΝ.\*

[*Post Lexicon Anglicanum auctum et emendatum.*]

LEXICON ad finem longo luctamine tandem  
 Scaliger ut duxit, tenuis pertasus opellæ,  
 Vile indignatus studium, nugasque molestas,

\* See the life of Dr. Johnson.

Ingemit exosus, scribendaque lexica mandat  
 Damnatis, penam pro penis omnibus unam.  
 Ille quidem recte, sublimis, doctus et acer,  
 Quem decuit majora sequi, majoribus aptum,  
 Qui veterum modo facta ducum, modo carmina  
 vatum,  
 Gesserat et quicquid virtus, sapientia quicquid  
 Dixerat, imperique vices, cœlique meatus,  
 Ingentemque animo seclorum volveret orbem.  
 Fallimur exemplis; temere sibi turba scho-  
 larum  
 Ima tuas credit permitti Scaliger iras.  
 Quisque suum nôrit modulum; tibi, prime  
 virorum,  
 Ut studiis sperem, aut ausim par esse querelis,  
 Non mihi sorte datum; lenti seu sanguinis ob-  
 sint  
 Frigora, seu nimium longa jacuisse veterino,  
 Sive mihi mentem dederit natura minorem.  
 Te sterili functum cura, vocumque salebris  
 Tuto elactatum spatii sapientia dia  
 Excipit æthereis, ars omnis plaudit amico,  
 Linguarumque omni terrâ discordia concors  
 Multiplici reducem circumsonat ore magistrum.  
 Me, pensi immunis cum jam mihi reddor, in-  
 erdis

Desidiæ sors dura manet, graviorque labore  
 Tristis et atra quies, et tardæ tædia vitæ.  
 Nascuntur curis curæ, vexatque dolorum  
 Importuna cohors, vacuæ mala somnia mentis.  
 Nunc clamosa juvant nocturnæ gaudia mense,  
 Nunc loca sola placent; frustra te, Somne, re-  
 cumbens  
 Alme voco, impatiens noctis metuensque diei.  
 Omnia percurro trepidus, circum omnia lustror,  
 Si qua usquam pateat melioris semita vitæ,  
 Nec quid agam invenio; meditatus grandia,  
 cogo:

Notior ipse mihi fieri, incultumque fateri  
 Pectus, et ingenium vano se robore jactans.  
 Ingenium, nisi materiem doctrina ministrat,  
 Cessat inops rerum, ut torpet, si marmoris absit  
 Copia, Phidiaci fecunda potentia celi.  
 Quicquid agam, quocunque ferar, conatibus ob-  
 stat

Res angusta domi, et macræ penuria mentis.  
 Non rationis opes animus, nunc parta re-  
 censens

Conspicit aggestas, et se miratur in illis;  
 Nec sibi de gaza præsens quod postulat usus  
 Summus adesse jubet celsa dominator ab arce;  
 Non, operum serie seriem dum computat ævi,  
 Præteritis fruitur, letos aut sumit honores  
 Ipse sui iudex, actæ bene munera vitæ;  
 Sed sua regna videns, loca nocte silentia late  
 Horret, ubi vanæ species, umbræque fugaces,  
 Et rerum volitant rare per inane figuræ.

Quid faciam? tenebrisne pigram damnare se-  
 nectam

Restat? an accingar studiis gravioribus audax?  
 Aut, hoc si nimium est, tandem nova lexica  
 poscam?

## AD THOMAM LAURENCE,

## MEDICUM DOCTISSIMUM,

*Cum filium peregre agentem æsidærio nimis tristi  
prosequeretur.*

FATERIS ergo, quod populus solet  
Crepare vecors, nil sapientiam  
Prodesse vite, literasque,  
In dubiis dare terga rebus.

Tu, quis laborat sors hominum, mala,  
Nec viuis acer, nec pateris pius :  
Te mille succorem potentem  
Destituit medicina mentis.

Per cæca noctis tædia turbida,  
Pigræ per horas lucis inutiles,  
Torpesque, languescisque, curis  
Solicitus nimis heu ! paternis.

Tandem dolori plus satis est datum,  
Exurge fortis, hunc animis opus,  
Te, docta, Laurenti, vetustas,  
Te medici revocant labores.

Permitte summo quicquid habes Patri,  
Permitte fidens ; et mullebribus,  
Amice, maiorem querelis  
Redde tuis, tibi redde, mentem.

## IN THEATRO, MARCH 8, 1771.

TERTII verso quater orbe lustrî,  
Quid theatrales tibi, Crispe, pompæ ?  
Quam decet canos male litteratos  
Sera voluptas !

Tene mulceri fidibus canoris ?  
Tene cantorum modulis stupere ?  
Tene per pictas oculo elegante  
Currere formas ?

Inter æquales, sine felle liber,  
Codices, veri studiosus, inter  
Rectius vives. Sua quisque carpat  
Gaudia gratus.

Lusibus gaudet puer otiosis,  
Luxus oblectat juvenem theatri,  
At seni fluxo sapienter uti  
Tempore restat.

INSULA KENNETHI, INTER  
HEBRIDAS.

PARVA quidem regio, sed religione priorum  
Clara, Caledonias panditur inter aquas.

Voce ubi Cennethus populos domuisse feroces  
Dicitur, et vanos dedocuisse deos.  
Huc ego delatus placido per cæcula cursu,  
Scire locus volui quid daret iste novi.  
Illie Leniades humili regnabat in aula,  
Leniades, magnis nobilitatis avis.  
Una duas cepit casa cum genitore puellas,  
Quas Amor undarum crederet esse deas.  
Nec tamen inculti gelidis latuere sub antris,  
Accola Danubii qualia sævus habet.  
Mollia non desunt vacuæ solatia vite,  
Sive libros poscant otia, sive lyram.  
Fulserat illa dies, legis qua docta supernæ  
Spes hominum et curas gens procul esse iubet.  
Ut precibus justas avertat numinis iras  
Et summi accendat pectus amore boni.  
Ponte inter strepitus non sacri munera cultus  
Cessarunt, pietas hic quoque cura fuit.  
Nil opus est æris sacra de turre sonantis  
Admonitu, ipsa suas nunciat hora vices.  
Quid, quod sacrifici versavit femina libros ?  
Sint pro legitimis pura labella sacris.  
Quo vapor ulterius ? quod ubique requiritur hic  
est,  
Hic securâ quies, hic et honestus amor.

## SKIA.

PONTI profundis clausa recessibus,  
Strepens procellis, rupibus obsita,  
Quam grata defesso virentem,  
Skia, sinum nebuloza pandis !

His cura, credo, sedibus exulat ;  
His blanda certe pax habitat locis ;  
Non ira, non mœror quietis  
Insidias meditatur horis.

At non cavatâ rupe latescere,  
Menti nec ægræ montibus aviis  
Prodest vagari, nec frementes  
In specula numerare fluctus.

Humana virtus non sibi sufficit ;  
Datur nec æquum cuique animum sibi  
Parare posse, utcumque jactet  
Grandiloquus nimis alta Zeno.

Exæstuantis pectoris impetum  
Rex summe, solus tu regis, arbiter ;  
Mentisque, te tollente, fluctus ;  
Te, resident, moderante fluctus.

## ODE DE SKIA INSULA.

PRÆMEO terras ubi nuda rupes  
Saxeas miscet nebulis ruinas,

Torva ubi ridēt steriles coloni  
Rura labores.

Pervagor gentes hominum ferorum,  
Vita ubi nullo decorata cultu  
Squallet informis, tigurique fumis  
Fedā latescit.

Inter erroris salebrosa longi,  
Inter ignotæ strepitus loquelæ,  
Quot modis, mecum, quid agat, requiro,  
Thrallia dulcis?

Seu viri curas, pia nupta mulcet,  
Seu fovet mater sobolem benigna,  
Sive cum libris novitate pascit  
Sedula mentem,

Sit memor nostri, fideique solvat  
Fida mercedem, meritoque blandum  
Thrallie discant resonare nomen  
Littora Skiæ.

## S P E S.

April 16, 1783.

HORA sic peragit citata cursum;  
Sic diem sequitur dies fugacem!  
Spes novas nova lux parit, secunda  
Spondens omnia credulis homullis;  
Spes ludit stolidas, metuque cæco  
Lux angit, miseros ludens homullos.

## V E R S U S,

COLLARI CAPRÆ DOMINI BANKS INSCRIBENDI.

PERPETUI, ambitâ bis terrâ præmia lactis  
Hæc habet, altrici capra secunda Jovis.

AD FEMINAM QUANDAM GENEROSAM QUÆ LIBERTATIS CAUSÆ IN SERMONE PATROCINATA FUERAT.

LIBER ut esse velim suasisti, pulchra Maria:  
Ut maneam liber, pulchra Maria, vale.

## JACTURA TEMPORIS.

HORA perit furtim lætis, mens temporis ægra  
Pigritiam incusat, nec minus hora perit.

QUAS navis recipit, quantum sit pondus aquarum,  
Dimidium tanti ponderis intret onus.

QUOT vox missa pedes abit horæ parte secunda?  
Undecies centum denos quater adde duosque.

## Εἰς BIPXION.\*

Εἶδ' Ἀλγεῖν πρῶτον χαίρουσα γέροντα  
'Ηρώων τε βίους Βέρχων, ἡδὲ σφῶν,  
Καὶ βίον, εἶπεν, ὅταν ῥίψης θανάτῳ βέλοςσι,  
Σοῦ ποτὶ γενηψόμενον Βέρχων ἄλλον ἔχουσιν.

Εἰς τὸ τῆς 'ΕΛΙΣΣΗΣ περὶ τῶν 'Ονειρῶν  
Δῖνγμα.†

Τῇ κάλλους δυνάμει τί τίλος; Ζεὺς πάντα δίδωκεν  
Κόρυδι, μὴδ' αὐτοῦ σκῆπτρον μέγας Θεός.  
'Εκ Διὸς ἰστὴν 'Οναε, δούεσσι ἔγραψεν 'Ομηροε,  
'Ἀλλὰ τίδ' εἰς Σπυριδὸς Κόρυς ἔγραψεν 'Οναε.  
Ζεὺς μοῦνος φλογέοντι πύλαις ἔκπτεσι μετάνω,  
'Ομμασι λαμπρῇ Διὸς Κόρυς εἶσθ' αἶψα φέου.

## IN ELIZÆ ENIGMA.

QUIS formæ modus imperio? Venus arrogat  
audax

Omnia, nec curæ sunt sua sceptrâ Jovi.  
Ab Jove Mæonides descendere somnia narrat;  
Hæc veniunt Cypriæ somnia missa Deæ,  
Jupiter unus erat, qui stravit fulmine gentes;  
Nunc armant Veneris lumina tela Jovis.

‡ O qui benignus crimina ignoscis, Pater,  
Facilisque semper confitenti ades reo,

\* The Rev. Dr. Thomas Birch, author of the History of the Royal Society, and other works of note.

† The lady on whom these verses, and the Latin ones that immediately follow, were written, is the celebrated Mrs. Elizabeth Carter, who translated the works of Epictetus from the Greek.

‡ This and the three following articles are metrical versions of collects in the Liturgy; the first, of that, beginning, "O God, whose nature and property;" the 2d and 3d, of the collects for the 17th and 21st Sundays after Trinity; and the 4th, of the 1st collect in the communion service.

Aurem faventem precibus O præbe meis;  
 Scelerum cutenâ me laborantem gravè  
 Æterna tandem liberet clementia,  
 Ut summa laus sit, summa Christo gloria.

PER vitæ tenebras rerumque incerta vagantem  
 Numine præsentem me tuare, Pater!  
 Me ducat lux sancta, Deus, lux sancta sequatur;  
 Usque regat gressus, gratia fida meos.  
 Sic peragam tua jussa libens, accinctus ad omne  
 Mandatum, vivam, sic moriarque tibi.

ME, Pater omnipotens, de puro respice cælo,  
 Quem mœstum et timidum crimina dira gra-  
 vant;

Da veniam pacemque mihi, da, mente serena,  
 Ut tibi quæ placeant, omnia promptus agam.  
 Solvi, quo Christus cunctis delicta redemit,  
 Et pro me pretium, tu patiare, Pater.

[Dec. 5. 1784.\*]

SUMME Dens, cui cæca patent penetrallia cordis;  
 Quem nulla anxietas, nulla cupido fugit;  
 Quem nil vafrities peccantium subdola celat;  
 Omnia qui spectans, omnia ubique regis;  
 Mentibus afflatu terrenas ejice sordes  
 Divino, sanctus regnet ut intus amor:  
 Eloquiumque potens linguis torpentibus affer,  
 Ut tibi laus omni semper ab ore sonet.  
 Sanguine quo gentes, quo secula cuncta piavit,  
 Hæc nobis Christus promeruisse velit!

#### PSALMUS CXVII.

ANNI qua volueris ducitur orbita,  
 Patrem cœlicolum perpetuo colunt  
 Quovis sanguine cretæ  
 Gentes undique carmine.  
 Patrem, cujus amor blandior in dies  
 Mortales miseros servat, alit, fovet,  
 Omnes undique gentes,  
 Sancto dicite carmine.

† SEU te sevea, levitas sive improba fecit,  
 Musra, mee comitem, participemque dapis,

\* The day on which he received the sacrament for the last time; and eight days before his decease.

† The above is a version of the song, "Busy, curious, thirsty fly."

Pone metum, rostrum fidens immitte culullo,  
 Nam licet, et toto proleue læta mero.  
 Tu, quamcumque tibi velox indulserit annus,  
 Carpe diem, fugit, heu, non revocanda dies!  
 Quæ nos blanda comes, quæ nos perducit eodem,  
 Volvitur hora mihi, volvitur hora tibi!  
 Una quidem, sic fata volunt, tibi vivitur æstas,  
 Eheu, quid decies plus mihi sexta dedit!  
 Olim præteritæ numeranti tempora vitæ,  
 Sexaginta annis non minor unus erit.

\* HABEO, dedi quod alteri;  
 Habuique, quod dedi mihi;  
 Sed quod reliqui, perdidit.

#### † E WALTONI PISCATORE PERFEC- TO EXCERPTUM.

NUNC, per gramina fusi,  
 Densâ fronde salicti,

\* These lines are a version of three sentences that are said in the manuscript to be "On the monument of John of Doncaster;" and which are as follow:

What I gave that I have;  
 What I spent that I had;  
 What I left that I lost.

† These Lines are a Translation of part of a Song in the Complete Angler of Isaac Walton, written by John Chalkhill, a friend of Spenser, and a good poet in his time. They are but part of the last stanza, which, that the reader may have it entire, is here given at length.

If the sun's excessive heat  
 Make our bodies swelter,  
 To an osier hedge we get  
 For a friendly shelter.  
 Where in a dike,  
 Perch or pike,  
 Roach or dace,  
 We do chase,  
 Bleak or gudgeon,  
 Without grudging,  
 We are still contented.

Or we sometimes pass an hour  
 Under a green willow,  
 That defends us from a shower,  
 Making earth our pillow  
 Where we may  
 Think and pray,  
 Before death  
 Stops our breath;  
 Other joys  
 Are but toys,  
 And to be lamented.

Dum defenditur imber,  
Molles ducimus horas.  
Hic, dum debita morti  
Paulum vita moratur,  
Nunc rescire priora,  
Nunc instare futuris,  
Nunc summi prece sanctâ  
Patris numen adire est.  
Quicquid quaeritur ultra,  
Cæco ducit amore,  
Vel spe ludit inani,  
Luctus mox paritutum.

\* Quisquis iter tendis, vitreas qua lucidas undas  
Speluncæ latè Thamesis præterdit opacæ;  
Marmoreâ trepidant qua lente in fornice guttæ,  
Crystallisque latex fractus scintillat acutis;  
Gemmaque, luxuriæ nondum famulata nitenti  
Splendit, et incoquitur tectum sine fraude met-  
tallum;

Ingrederè O! rerum purâ cole mente parentem;  
Auriferasque auri metuens scrutare cavernas.  
Ingrederè! Egeriæ sacrum en tibi panditur an-  
trum!

Hic, in se totum, longe per opaca futuri  
Temporis, Henricum rapuit vis vivida mentis:  
Hic pia Vindamius traxit suspiria, in ipsâ  
Morte memor patriæ; hic, Marmonti pectore  
prima

Celestis fido caluerunt semina flammæ.  
Temnere opes, pretium sceleris, patriamque tueri  
Fortis, ades; tibi sponte patet venerabile limen.

#### GRÆCORUM EPIGRAMMATUM VERSIONES METRICÆ.

Pag. 2. Brodæi edit. Bas. Ann. 1549.

NON Argos pugilem, non me Messana creavit;  
Patria Sparta mihi est, patria clara virum.  
Arte valent isti, mihi robo revivere solo est,  
Convenit ut natis, inelyta Sparta, tuis

Br. 2.

QUANDOQUIDEM passim nulla ratione feruntur,  
Cuncta cinis, cuncta et ludicra, cuncta nihil.

\* The above lines are a version of Pope's verses on his own grotto, which begin, "Thou who shalt stop where Thames' translucent wave."

Br. 5.

PECTORE qui duro, crudos de vite racemos  
Venturi exsecuit, vascula prima meri,  
Labraque constrictus, semesos, jamque terendos  
Sub pedibus, populo prætereunte, jacet.  
Supplicium huic, quoniam crescentia gaudia  
læsit,  
Det Bacchus, dederat quale, Lycurge, tibi.  
Hæ poterant uvæ læto convivia cantu  
Mulcere, aut pectus triste levare malis.

Br. 8.

FERT humeris claudum validis per compita  
cæcus,  
Hic oculos socio commodat, ille pedes.

Br. 10.

QUI, mutare vias ausus terræque marisque,  
Trajecit montes nauta, fretumque pedes,  
Xerxi, tercentum Spartæ Mars obstitit acris  
Militibus; terris sit pelagoque pudor!

Br. 11.

SIT tibi, Calliope, Parnassum, cura, tenenti,  
Alter ut adsit Homerus, adest etenim alter  
Achilles.

Br. 18.

AD Musas Venus hæc; Veneri parete puellæ,  
In vos ne missus spicula tendat amor.  
Hæc Musæ ad Venerem; sic Marti, diva,  
mineris,  
Huc nunquam volitat debilis iste puer.

Br. 19.

PROSPERA sors nec te strepitoso turbine tollat,  
Nec menti injiciat sordida cura jugum;  
Nam vita incertis incerta impellitur auris,  
Omnesque in partes tracta, retracta fluit;  
Firma manet virtus; virtuti innitere, tutus  
Per fluctus vitæ sic tibi cursus erit.

Br. 24.

HORA bonis quasi nunc instet suprema fruaris,  
Plura ut victurus secula, parce bonis;  
Divitiis, utrinque cavens, qui tempore parci,  
Tempore divitiis utitur, ille sapit.

Br. 24.

NUNQUAM jugera messibus onusta, aut  
Quos Gyges cumulos habebat auri;  
Quod vitæ satis est, peto, Macrine,  
Mi, nequid nimis, est nimis probatum.

Br. 24.  
 Nox opto aut precibus posco dītescere, paucis  
 Sit contenta mihi vita dolore carens.

Br. 24.  
 RECTA ad pauperiem tendit, cui corpora cordi  
 est  
 Multa alere, et multas ædificare domos.

Br. 24.  
 Tu neque dulce putes alienæ accumbere mensæ,  
 Nec probrosa avidæ grata sit offa gulæ;  
 Nec ficto fletu, fictis solvare cachinnis,  
 Arridens domino, collacrymansque tuo.  
 Lætior haud tecum, tecum neque tristior un-  
 quam,  
 Sed Milie ridens, atque dolens Milie.

Br. 26.  
 NIL non mortale est mortalibus; omne quod est  
 hic  
 Prætereunt, aut hos præterit omne bonum.

Br. 26.  
 DEMOCRITE, invisas homines majore cachinno,  
 Plus tibi ridendum secula nostra dabunt.  
 Heraclite, fluat lacrymarum crebrior imber;  
 Vita hominum nunc plus quod misereris habet.  
 Interea dubito: tecum me causa nec ulla  
 Ridere, aut tecum me lacrimare jubet.

Br. 26.  
 ELIGE iter vitæ ut possis: rixisque dolisque  
 Perstrepat omne forum; cura molesta domi  
 est.

Rura labor lassat; mare mille pericula terrent;  
 Verte solum, fient causa timoris opes;  
 Paupertas misera est; multæ cum conjuge lites  
 Tecta ineunt; cœlebs omnia solus ages. [est  
 Proles aucta gravat, rapta orbat, cæca juventæ  
 Virtus, canities cauta vigore caret. [oras  
 Ergo optent homines, aut nunquam in luminis  
 Venisse, aut visâ luce repente mori.

ELIGE iter vitæ ut mavis, prudentia lausque  
 Permeat omne forum; vita quieta domi est.  
 Rus ornat natura; levat maris aspera lucrum,  
 Verte solum, donet plena crumena decus;  
 Pauperies latitat, cum conjuge gaudia multa  
 Tecta ineunt, cœlebs impedire minus;  
 Mulcet amor prolis, sopor est sine prole pro-  
 fundus;  
 Præcellit juvenis vi, pietate senex.

Nemo optet nunquam venisse in luminis oras,  
 Aut periisse, scatet vita benigna bonis.

Br. 27.  
 VITA omnis scena est ludusque, aut ludere disce  
 Seria seponens, aut mala dura pati.

Br. 27.  
 QUÆ sine morte fuga est vitæ, quam turba ma-  
 lorum  
 Non vitanda gravem, non toleranda facit?  
 Dulcia dat natura quidem, mare, sidera, terras,  
 Lunaque quas et sol itque reditque vias.  
 Terror inest aliis, mœrorque, et siquid habebis  
 Forte boni, ultrices experiere vices.

Br. 27.  
 TERRAM adis nudus, de terra nudus abibo.  
 Quid labor efficiet? non nisi nudus ero.

Br. 27.  
 NATUS eram lacrymans, lacrymans e luce re-  
 cedo:  
 Sunt quibus a lacrymis vix vacat ulla dies.  
 Tale hominum genus est, infirmum, triste, mi-  
 sellum,  
 Quod mors in cineres solvit, et addit humo.

Br. 29.  
 QUISQUIS adit lectos elatâ uxore secundos,  
 Naufragus iratas ille retentat aquas.

Br. 30.  
 FELIX ante alios nullius debitor æris;  
 Hunc sequitur cœlebs; tertius, orbe, venis.  
 Nec male res cessit, subito si funere sponsam  
 Ditatus magna dote, recondis humo.  
 His sapiens lectis, Epicurum quærere frustra  
 Quales sint monades, quâ fit inane, sinas.

Br. 31.  
 OPTARIT quicumque senex sibi longius ævum,  
 Dignus qui multa in lustra senescat, erit.  
 Cum procul est, optat, cum venit, quisque se-  
 nectam  
 Incusat, semper spe meliora videt.

Br. 46.  
 OMNIS vita nimis brevis est felicibus, una  
 Nox miseris longi temporis instar habet.

Br. 55.

GRATIA ter grata est velox, sin forte moretur,  
Gratia vix restat nomine digna suo.

Br. 56.

SEU prece poscatur, seu non, da Jupiter omne,  
Magne, bonum; omne malum, et poscentibus  
abnue nobis.

Br. 69.

ME, cane vitato, canis excipit alter: eodem  
In me animo tellus gignit et unda feras,  
Nec mirum; restat lepori conscendere cælum,  
Sidereus tamen hic territat, ecce canis!

Br. 70.

TELLURI, arboribus ver frondens, sidera cælo,  
Græciæ et urbs, urbi est ista propago, decus.

Br. 75.

IMPIA facta patrans, homines fortasse latebis,  
Non poteris, meditans prava, latere Deos.

Br. 75.

ANTIOPE satyrum, Danae aurum, Europa juven-  
cum,  
Et cynnum fecit, Leda petita Jovem.

Br. 92.

ÆVI sat novi quam sim brevis; astra tuenti,  
Per certas stabili lege voluta vices,  
Tangitur haud pedibus tellus; conviva Deorum  
Expleor ambrosiis exhilarorque cibis.

Br. 96.

QUOD nimium est sit ineptum, hinc, ut dixere  
piores,  
Et melli nimio fellis amaror inest.

Br. 103.

PURPE gubernatrix sedisti, audacia, prima  
Divitiis acuens aspera corda virum;  
Sola rates struis infidas, et dulcis amorem  
Lucri ulciscendum mox nece sola doces.  
Aurea secla hominum, quorum spectandus  
ocellis  
E longinquo iidem pontus et orcus erat.

Br. 126.

DITESCIS, credo, quid restat? quicquid habebis  
In tumultum tecum, morte jacentis, trahes?

DIVITIIS cumulas, pereuntes negligis horas,  
Incrementa ævi non cumulare potes.

Br. 126.

MATER adulantum, prolesque pecunia curæ,  
Teque frui timor est, teque carere dolor.

Br. 126.

ME miserum sors omnis habet; florentibus annis  
Pauper eram, nummis diffluit arca senis;  
Queis uti poteram quondam Fortuna negavit,  
Queis uti nequeo, nunc mihi præbet opes.

Br. 127.

MNEMOSYNE, ut Sappho mellita voce canentem  
Audiit, irata est ne nova Musa foret.

Br. 132.

CUM tacet inductus, sapientior esse videtur,  
Et morbus tegitur, dum premit ora pudor.

Br. 155.

NUNC huic, nunc aliis cedens, cura farra Me-  
nippus  
Credit, Achæmenidæ nuper agellus eram.  
Quod nulli proprium versat Fortuna, putabat  
Ille suum stolidus, nunc putat ille suum.

Br. 156.

NON Fortuna sibi te gratum tollit in altum;  
At docet, exemplo, vis sibi quanta, tuo.

Br. 162.

HIC, aurum ut reperit, laqueum abjicit, alter ut  
aurum  
Non reperit, necit quem reperit, laqueum.

Br. 167.

VIVE tuo ex animo, vario rursus loquatur  
De te plebs audax, hic bene, et ille male.

Br. 168.

VITÆ rosa brevis est, properans si carpere nolis,  
Querenti obveniet mox sine flore rubus.

Br. 170.

PULCRUS morsus, restinctâ lampade, stultus  
Exclamat: nunc me cernere desinitis.

Br. 202.

MENODOTUM pinxit Diodorus, et exit imago,  
Præter Menodotum, nullius absimilis.

Br. 205.

HAUD lavit Phido, haud tetigit, mihi febre ca-  
lenti  
In mentem ut venit nominis, interii.

Br. 210.

NYCTICORAX cantat lethale, sed ipsa eamēti  
Demophilo auscultans Nycticorax moritur.

Br. 212.

HERMEM Deorum nuncium, pennis levern,  
Quo rege gaudent Arcades, furem boum,  
Hujus palestræ qui vigil custos stetit,  
Clam nocte tollit Aulus, et ridens ait:  
Præstat magistro sepe discipulus suo.

Br. 223.

QUI jacet hic, servus vixit, nunc, lumine cassus,  
Dario magno non minus ille potest.

Br. 227.

FUNUS Alexandri mentitur fama: fidesque  
Si Phæbo, victor nescit obire diem.

Br. 241.

NAUTA, quis hoc jaceat ne percontere sepulchro,  
Eveniat tantum mitior unda tibi!

Br. 253.

UTR opulentus egēs? tua cuncta in fœnore ponis.  
Sic aliis dives, tu tibi pauper agis.

Br. 262.

QUI pascit barbam si crescit mente, Platoni,  
Hircæ, parem nitido tua barba facit.

Br. 266.

CLARUS Joannes, reginæ affinis, ab alto  
Sanguine Anastasii; cuncta sepulta jacent:  
Et pius, et recti cultor: non illa jacere  
Dicam; stat virtus non subigenda neci.

Br. 267.

CUNCTIPARENS tellus salve, levis esto pusillo  
Lysigeni, fuerat non gravis ille tibi.

Br. 285.

NAUFRAGUS hic jaceo; contra, jacet ecce co-  
lonus!

Idem oreus terræ, sic, pelagoque subest.

Br. 301.

QUID salvere jubes me, pessime? Corriphe  
Gressus;  
Est mihi quod non te rideo, plena salus.

Br. 304.

EX ferus est Timon sub terris; janitor orci,  
Cerberæ, te morsa ne, petat ille, cave.

Br. 307.

VITAM a terdecimo sextus mihi finiet annus,  
Astra mathematicos si modo vera docent.  
Sufficit hoc votis, flos hic pulcherrimus avi est,  
Et senium triplex Nestoris urna capit.

Br. 322.

ZOSIMA, quæ solo fuit olim corpore serva,  
Corpore nunc etiam libera facta fuit.

Br. 326.

EXIGUUM en! Priami monumentum; haud ille  
meretur  
Quale, sed hostiles, quale dedere manus.

Br. 326.

HECTOR dat gladium Ajaci, dat balteum et Ajax  
Hectori, et exitio munus utrique fuit.

Br. 344.

UT vis, ponte minax; modo tres discesseris  
ulnas,  
Ingemina fluctus, ingeminaque sonum.

Br. 344.

NAUFRAGUS hic jaceo; fidens tamen utere velis,  
Tutam aliis æquor, me pereunte, fuit.

Br. 398.

HERACLITUS ego; indoctæ ne lædite linguæ  
Subtile ingenium quæro, capaxque mei,  
Unus homo mihi pro sexcentis, turba popelli  
Pro nullo, clamo nunc tumulatus idem.

Br. 399.

AMBRACIOTA, vale lux alma, Cleombrotus infit,  
Et saltu e muro ditis opaca petit:  
Triste nihil passus, animi at de sorte Platonis  
Scripta legens, solâ vivere mente cupit.

Br. 399.

SERVUS, Epictetus, mutilato corpore, vixi,  
Fauperieque Irus, curaque summa Deûm.

Br. 445.

UNDE hic Praxiteles? nudam vidistis, Adoni,  
Et Pari, et Anchisa, non alius, Venerem.

Br. 451.

SUFFLATO accendis quisquis carbone lucernam,  
Corde meo accendens; ardeo totus ego.

Br. 466.

JUPITER hoc templum, ut, siquando relinquit  
Olympum,  
Atthide non alius desit Olympus, habet.

Br. 487.

CIVIS et externus grati; domus hospita nescit  
Quærere, quis, cujus, quis pater, unde venis.

## P O M P E I I.

Br. 487.

CUM fugere haud possit, fractis Victoria pennis,  
Te manet imperii, Roma, perenne decus.

Br. 488.

LATRONES alibi locupletum quærite tecta,  
Assidet huic custos strenua pauperies.

FORTUNÆ malim adversæ tolerare procellas,  
Quam domini ingentis ferre supercilium.

EN, Sexto, Sexti meditatur imago, silente,  
Orator statua est, statuæque orator imago.

PULCHRA est virginitas intacta, at vita periret,  
Omnes si vellent virginitate frui;  
Nequitiam fugiens, servatâ contrahe lege  
Conjugium, ut pro te des hominem patriæ.

FERT humeris, venerabile onus, Cythereius heros  
Per Trojæ flammæ, densaque tela, patrem,  
Clamat et Argivis, vetuli, ne tangite, vita  
Exiguum est Marti, sed mihi grande lucrum.

FORMA animos hominum capit, at, si gratia desit,  
Non tenet; esca natat pulchra, sed hamus  
abest.

COGITAT aut loquitur nil vir, nil cogitat uxor,  
Felici thalamo non, puto, rixa strepit.

BUCCINA disjecit Thebarum mœnia, struxit  
Quæ lyra, quam sibi non concinit harmonia!

MENTE senes olim juvenis, Faustine, premebas,  
Nunc juvenum terras robore corda senex.  
Lævum at utrumque decus, juveni quod præbuit  
olim  
Turba senum, juvenes nunc tribuere seni.

EXCEPTÆ hospitio musæ, tribuere libellos  
Herodoto hospitii præmia, quæque suum.

STELLA mea, observans stellas. Dii me æthera  
faxint  
Multis ut te oculis sim potis aspicere.

CLARA Cheronææ soboles, Plutarche, dicavit  
Hanc statuam ingenio, Roma benigna, tuo.  
Das bene collatos, quos Roma et Græcia jactat,  
Ad Divos paribus passibus ire duces;  
Sed similem, Plutarche, tuæ describere vitam  
Non poteras, regio non tulit ulla parem.

DAT tibi Pythagoram pictor; quod ni ipse tacer  
Pythagoras mallet, vocem habuisset opus.

PROLEM Hippi et sua quâ meliorem secula nul-  
lum  
Videre, Archidicen hæc tumulavit humus:

Quam, regum sobolem, nuptam, matrem, atque  
sororem  
Fecerunt nulli sors titulique gravem.

CECROPIDIS gravis hic ponor, Martique dicatus,  
Quo tua signantur gesta, Philippe, lapis.  
Spreta jacet Marathon, jacet et Salamina laurus,  
Omnia dum Macedum gloria et arma pre-  
munt.  
Sint Demosthenica ut jurata cadavera voce,  
Stabo illis qui sunt, quique fuere, gravis.

FLORIBUS in pratis, legi quos ipse, coronam  
Contextam variis, do, Rhodoclea, tibi:  
Hic anemone humet, confert narcissus odores  
Cum violis; spirant lilia mista rosis.  
His redimita comas, mores depone superbos,  
Hæc peritura nitent; tu peritura nites!

MUREM Asclepiades sub tecto ut vidit avarus,  
Quid tibi, mus, mecum, dixit, amice, tibi?  
Mus blandum ridens, respondit, pelle timorem;  
Hic, bone vir, sedem, non alimenta, peto.

SÆPE tuum in tumultum lacrymarum decedit  
imber  
Quem fundit blando junctus amore dolor;  
Charus enim cunctis, tanquam, dam vita ma-  
nebat,  
Cuique esses natus, cuique sodalis, eras.  
Heu quam dura preces sprevit, quam surda que-  
relas  
Parca, juventutem non miserata tuam!

ARTI ignis lucem tribui, tamen artis et ignis  
Nunc ope, supplicii vivit imago mei.  
Gratia nulla hominum mentes tenet, ista Pro-  
methei  
Munera muneribus, si retulere fabri.

ILLA triumphatrix Graiùm consueta procorum  
Ante suas agmen Lais habere fores,  
Hoc Veneri speculum; nolo me cernere qualis  
Sum nunc, nec possum cernere qualis eram.

CRETHIDA fabellas dulces garrire peritam  
Prosequitur lacrymis filia mœsta Sami:  
Blandam lanifici sociam sine fine loquacem,  
Quam tenet hic, cunctas quæ manet, alta  
quies.

DICTÆ, Causidici, gelido nunc marmore magni  
Mugitum tumulus comprimit Amphiloeci.

Si forsant tumultum quo conditur Eumarus au-  
fers  
Nil lucri facies; ossa habet et cinerem.

## EPICETI.

ME, rex deorum, tuque, duc, necessitas,  
Quo, lege vestrâ, vita me feret mea.  
Sequar libenter, sin reluctari velim,  
Fiam scelestus, nec tamen minus sequar.

## E THEOCRITO.

POETA, lector, hic quiescit Hipponax,  
Si sis scelestus, præteri, procul, marmor:  
At te bonum si nôris, et bonis natum,  
Tutum hic sedile, et si placet, sopor tutus.

## EUR. MED. 193—203.

Nox immerito culpanda venit  
Proavum vœcors insipientia,  
Qui convivia lautasque dapes  
Hilarare suis jussere modis  
Cantum, vitæ dulce levamen,  
At nemo feras iras hominum,  
Domibus claris extiales,  
Voce aut fidibus pellere docuit  
Queis tamen aptam ferre medelam  
Utile cunctis hoc opus esset;  
Namque, ubi mensas onerant epulæ,  
Quorsum dulcis luxuria soni?  
Sat lætitiâ sine subsidiis,  
Pectora molli mulcet dubiæ  
Copia cœnæ.

Ταῖος ὁ ἄγος βροτολογίης ἐν πολέμοισι μέγιστος  
καὶ τοῖος Παρίησι πλοῦτος ἔστιν Οἰάης.

The above is a Version of a Latin Epigram on the famous John Duke of Marlborough, by the Abbé Salvini, which is as follows :

Haud alio vultu, fremuit Mars acer in armis :  
Haud alio, Cyprium percussit ore Deum.

The Duke was, it seems, remarkably handsome in his person, to which the second line has reference.

### SEPTEM ÆTATES.

PRIMA parit terras ætas, siccatque secunda,  
Evocat Abramum dein tertia : quarta relinquit  
Ægyptum ; templo Solomonis quinta supersit ;  
Cyrum sexta timet ; lætatur septima Christo.

\* His Tempelmanni numeris descripseris orbem,

<sup>1</sup> Cum sex centuriis Judæo millia septem.  
Myrias <sup>2</sup> Ægypto cessit bis septima piugui.  
Myrias adsciscit sibi nonagesima septem  
Imperium qua Turca <sup>3</sup> ferox exercet iniquum.  
Undecies binas decadas et millia septem,  
Sortitur <sup>4</sup> Pelopis tellus quæ nomine gaudet.  
Myriadas decies septem numerare jubebit

\* To the above Lines (which are unfinished, and can therefore be only offered as a fragment) in the Doctor's manuscript, are prefixed the words, "Geographia Metrica." As we are referred, in the first of the verses, to Templeman, for having furnished the numerical computations that are the subject of them, his work has been accordingly consulted, the title of which is, "A New Survey of the Globe," and which professes to give an accurate mensuration of all the empires, kingdoms, and other divisions thereof, in the square miles that they respectively contain. On comparison of the several numbers in these verses with those set down by Templeman, it appears that nearly half of them are precisely the same; the rest are not quite so exactly done. For the convenience of the reader, it has been thought right to subjoin each number, as it stands in Templeman's works, to that in Doctor Johnson's verses which refers to it.

1. In this first article that is versified, there is an accurate conformity in Dr. Johnson's number to Templeman's; who sets down the square miles of Palestine at 7,600.—2. The square miles of Egypt are, in Templeman, 140,700.—3. The whole Turkish empire, in Templeman, is computed at 960,057 square miles.—4. In the four following articles, the numbers

Pastor <sup>5</sup> Arabs : decies octo sibi Persa <sup>6</sup> requirit.  
Myriadas sibi pulchra duas, duo millia poscit  
Parthenope. <sup>7</sup> Novies vult tellus mille Sicana.  
<sup>8</sup> Papa suo regit imperio ter millia quinque.  
Cum sex centuriis numerat sex millia Tuscus. <sup>9</sup>  
Centuriâ Ligures <sup>10</sup> augent duo millia quartâ.  
Centuriæ octavam decadem addit Lucca <sup>11</sup> secundæ.

Ut dicas, spatiis quam latis imperet orbi

<sup>12</sup> Russia, myriadas ter denas adde trecentis :

<sup>13</sup> Sardiniam cum sexcentis sex millia complect.

Cum sexagenis, dum plura recluserit ætas,

Myriadas ter mille homini dat terra <sup>14</sup> colendas.

Vult sibi vicienas millesima myrias addi,

Vicenis quinas, Asiam <sup>15</sup> metata celebrem.

Se quinquagenis octingentesima jungit

Myrias, ut menti pateat tota Africa <sup>16</sup> doctæ.

Myriadas septem decies Europa <sup>17</sup> ducentis

Et quadragenis quoque ter tria millia jungit.

Myriadas denas dat, quinque et millia, sexque

Centurias, et tres decadas Europa Britannis. <sup>18</sup>

Ter tria myriadi conjungit millia quarta,

Centuriæ quartæ decades quinque <sup>19</sup> Anglia necit.

Millia myriadi septem fecunda secundæ

Et quadragenis decadas quinque addit Ierne. <sup>20</sup>

Quingentis quadragenis socialis adauget

Millia Belgæ <sup>21</sup> novem.

Ter sex centurias Hollandia <sup>22</sup> jactat opima.

Undecimum Camber <sup>23</sup> vult septem millibus addi.

in Templeman and in Johnson's verses are alike. We find, accordingly, the Morea, in Templeman, to be set down at 7,220 square miles.—Arabia, at 700,000.—Persia, at 800,000.—And Naples, at 22,000.—5. Sicily, in Templeman, is put down at 9,400.—6. The Pope's dominions, at 14,803.—7. Tuscany, at 6,640.—8. Genoa, in Templeman, as in Johnson likewise, is set down, at 2,400.—9. Lucca, at 286.—10. The Russian empire, in the 29th plate of Templeman, is set down at 3,303,485 sq. miles.—11. Sardinia, in Templeman, as likewise in Johnson, 6,600.—12. The habitable world, in Templeman, is computed, in square miles, at 30,666,806.—13. Asia, at 10,257,147.—14. Africa at 8,506,208.—15. Europe, at 2,749,310.—16. The British dominions, at 105,634.—17. England, as likewise in Johnson's expression of the number, at 40,450.—18. Ireland, at 27,457.—19. In the three remaining instances, which make the whole that Dr. Johnson appears to have rendered into Latin verse, we find the numbers exactly agreeing with those of Templeman; who makes the square miles of the United Provinces, 9,540; of the Province of Holland, 1,800; and of Wales, 7,011.

## ADDITIONAL POEMS.

### FRIENDSHIP,

AN ODE.

(This originally appeared in the Gentleman's Magazine, for the year 1743. See Boswell's Life of Johnson under that year. It was afterwards printed in Mrs. Williams's Miscellanies, in 1766, with several variations, which are pointed out below. J. B.)

FRIENDSHIP! peculiar boon of heaven,  
The noble mind's delight and pride,  
To men and angels only given,  
To all the lower world denied.

While love, unknown among the blest,  
Parent of thousand wild desires,  
The savage and the human breast  
Torments alike with raging fires;

With bright, but oft destructive, gleam,  
Alike, o'er all his lightnings fly;  
Thy lambent glories only beam  
Around the favourites of the sky.

Thy gentle flows of guiltless joys  
On fools and villains ne'er descend;  
In vain for thee the tyrant sighs,  
And hugs a flatterer for a friend.

Directress of the brave and just,  
O guide us through life's darksome way!  
And let the tortures of mistrust  
On selfish bosoms only prey.

Nor shall thine ardours cease to glow,  
When souls to blissful climes remove:  
What raised our virtue here below,  
Shall aid our happiness above.

Stanza. 1. This stanza is omitted in Mrs. Williams's Miscellanies, and instead of it we have the following, which may be suspected from internal evidence not to have been Johnson's.

When virtues kindred virtues meet,  
And sister souls together join,

Thy pleasures, permanent as great,  
Are all transporting, all divine.

Stanza 2, line 2d. Parent of rage and hot desires  
Mrs. W.

line 4th. Inflames alike with equal fires.

Stanza 4, line 3d. In vain for thee the monarch  
sighs.

Stanza 6, line 1st. O! shall thy flames then cease to  
glow.

### TRANSLATION

FROM THE MEDEA OF EURIPIDES, V. 190.

[This was written by Johnson for his friend, Dr. Burney, and was inserted as the work of "A learned friend," in that gentleman's History of Music, Vol. II. p. 349. It has always been ascribed to Johnson; but to put the matter beyond a doubt, Mr. Malone ascertained the fact by applying to Dr. Burney himself. J. B.]

THE rites derived from ancient days  
With thoughtless reverence we praise,  
The rites that taught us to combine  
The joys of music and of wine,  
And bid the feast, and song, and bowl,  
O'erfill the saturated soul:  
But ne'er the flute or lyre applied  
To cheer despair and soften pride;  
Nor call them to the gloomy cells,  
Where Want repines and Vengeance swells;  
Where Hate sits musing to betray,  
And Murder meditates his prey.  
To dens of guilt and shades of care,  
Ye sons of melody repair;  
Nor deign the festive dome to cloy,  
With superfluities of joy.  
Ah! little needs the minstrel's power,  
To speed the light convivial hour.  
The board with varied plenty crown'd,  
May spare the luxuries of sound.

END OF THE POEMS.

## FATHER PAUL SARPI.

---

FATHER PAUL, whose name, before he entered into the monastic life, was Peter Sarpi, was born at Venice, August 14, 1552. His father followed merchandize, but with so little success, that, at his death, he left his family very ill provided for, but under the care of a mother, whose piety was likely to bring the blessing of Providence upon them, and whose wise conduct supplied the want of fortune by advantages of greater value.

Happily for young Sarpi, she had a brother master of a celebrated school, under whose direction he was placed by her. Here he lost no time, but cultivated his abilities, naturally of the first rate, with unwearied application. He was born for study, having a natural aversion to pleasure and gayety, and a memory so tenacious, that he could repeat thirty verses upon once hearing them.

Proportionable to his capacity was his progress in literature: at thirteen, having made himself master of school-learning, he turned his studies to philosophy and the mathematics, and entered upon logic under Capella of Cremona, who, though a celebrated master of that science, confessed himself in a very little time unable to give his pupil farther instructions.

As Capella was of the order of the Servites, his scholar was induced, by his acquaintance with him, to engage in the same profession, though his uncle and his mother represented to him the hardships and austerities of that kind of life, and advised him with great zeal against it. But he was steady in his resolutions, and in 1566 took the habit of the order, being then only in his 14th year, a time of life in most persons very improper for such engagements, but in him attended with such maturity of thought, and such a settled temper, that he never seemed to regret the choice he then made, and which he confirmed by a solemn public profession in 1572.

At a general chapter of the Servites, held at

Mantua, Paul (for so we shall now call him), being then only twenty years old, distinguished himself so much in a public disputation by his genius and learning, that William Duke of Mantua, a great patron of letters, solicited the consent of his superiors to retain him at his court, and not only made him public professor of divinity in the cathedral, but honoured him with many proofs of his esteem.

But Father Paul, finding a court life not agreeable to his temper, quitted it two years afterwards, and retired to his beloved privacies, being then not only acquainted with the Latin, Greek, Hebrew, and Chaldee languages, but with philosophy, the mathematics, canon and civil law, all parts of natural philosophy, and chemistry itself; for his application was uninterrupted, his head clear, his apprehension quick, and his memory retentive.

Being made a priest at twenty-two, he was distinguished by the illustrious cardinal Borromeo with his confidence, and employed by him on many occasions, not without the envy of persons of less merit, who were so far exasperated as to lay a charge against him, before the Inquisition, for denying that the Trinity could be proved from the first chapter of Genesis; but the accusation was too ridiculous to be taken notice of.

After this he passed successively through the dignities of his order, and in the intervals of his employment applied himself to the studies with so extensive a capacity, as left no branch of knowledge untouched. By him Aquapendente, the great anatomist, confesses that he was informed how vision is performed; and there are proofs that he was not a stranger to the circulation of the blood. He frequently conversed upon astronomy with mathematicians, upon anatomy with surgeons, upon medicine with physicians, and with chemists upon the analysis of metals, not as a superficial inquirer, but as a complete master.

But the hours of repose, that he employed so well, were interrupted by a new information in the Inquisition, where a former acquaintance produced a letter written by him in cyphers, in which he said, "that he detested the court of Rome, and that no preferment was obtained there but by dishonest means." This accusation, however dangerous, was passed over on account of his great reputation, but made such impression on that court, that he was afterwards denied a bishopric by Clement VIII. After these difficulties were surmounted, Father Paul again retired to his solitude, where he appears, by some writings drawn up by him at that time, to have turned his attention more to improvements in piety than learning. Such was the care with which he read the scriptures, that, it being his custom to draw a line under any passage which he intended more nicely to consider, there was not a single word in his New Testament but was underlined; the same marks of attention appeared in his Old Testament, Psalter, and Breviary.

But the most active scene of his life began about the year 1603, when Pope Paul Vth, exasperated by some decrees of the senate of Venice that interfered with the pretended rights of the church, laid the whole state under an interdict.

The senate, filled with indignation at this treatment, forbade the bishops to receive or publish the Pope's bull; and convening the rectors of the churches, commanded them to celebrate divine service in the accustomed manner, with which most of them readily complied; but the Jesuits and some others refusing, were by a solemn edict expelled the state.

Both parties, having proceeded to extremities, employed their ablest writers to defend their measures: on the Pope's side, among others, Cardinal Bellarmine entered the lists, and with his confederate authors defended the papal claims with great scurrility of expression, and very sophistical reasonings, which were confuted by the Venetian apologist in much more decent language, and with much greater solidity of argument.

On this occasion Father Paul was most eminently distinguished, by his "Defence of the Rights of the supreme Magistrate," his "Treatise of Excommunication" translated from Gerson, with an "Apology," and other writings, for which he was cited before the Inquisition at Rome; but it may be easily imagined that he did not obey the summons.

The Venetian writers, whatever might be the abilities of their adversaries, were at least superior to them in the justice of their cause. The propositions maintained on the side of Rome were these: that the Pope is invested with all the authority of heaven and earth. That all princes are his vassals, and that he may annul

their laws at pleasure. That kings may appeal to him, as he is temporal monarch of the whole earth. That he can discharge subjects from their oaths of allegiance, and make it their duty to take up arms against their sovereign. That he may depose kings without any fault committed by them, if the good of the church requires it. That the clergy are exempt from all tribute to kings, and are not accountable to them even in cases of high treason. That the Pope cannot err: that his decisions are to be received and obeyed on pain of sin, though all the world should judge them to be false: that the Pope is God upon earth; that his sentence and that of God are the same; and that to call his power in question, is to call in question the power of God: maxims equally shocking, weak, pernicious, and absurd; which did not require the abilities or learning of Father Paul, to demonstrate their falsehood, and destructive tendency.

It may be easily imagined that such principles were quickly overthrown, and that no court but that of Rome thought it for its interest to favour them. The Pope, therefore, finding his authors confuted, and his cause abandoned, was willing to conclude the affair by treaty, which, by the mediation of Henry IV. of France, was accommodated upon terms very much to the honour of the Venetians.

But the defenders of the Venetian rights were, though comprehended in the treaty, excluded by the Romans from the benefit of it; some upon different pretences were imprisoned, some sent to the galleys, and all debarred from preferment. But their malice was chiefly aimed against Father Paul, who soon found the effects of it; for as he was going one night to his convent, about six months after the accommodation, he was attacked by five ruffians armed with stilettoes, who gave him no less than fifteen stabs, three of which wounded him in such a manner, that he was left for dead. The murderers fled for refuge to the nuncio, and were afterwards received into the Pope's dominions, but were pursued by divine justice, and all, except one man, who died in prison, perished by violent deaths. This and other attempts upon his life obliged him to confine himself to his convent, where he engaged in writing the history of the Council of Trent, a work unequalled for the judicious disposition of the matter, and artful texture of the narration, commended by Dr. Burnet as the completest model of historical writing, and celebrated by Mr. Wotton as equivalent to any production of antiquity; in which the reader finds "Liberty without licentiousness, piety without hypocrisy, freedom of speech without neglect of decency, severity without rigour, and extensive learning without ostentation."

In this and other works of less consequence, he spent the remaining part of his life, to the beginning of the year 1622, when he was seized

with a cold and fever, which he neglected till it became incurable. He languished more than twelve months, which he spent almost wholly in a preparation for his passage into eternity; and among his prayers and aspirations was often heard to repeat, *Lord! now let thy servant depart in peace.*

On Sunday the eighth of January of the next year, he rose, weak as he was, to mass, and went to take his repast with the rest, but on Monday was seized with a weakness that threatened immediate death; and on Thursday prepared for his change by receiving the *Vaticum* with such marks of devotion, as equally melted and edified the beholders.

Through the whole course of his illness to the last hour of his life, he was consulted by the senate in public affairs, and returned answers, in his greatest weakness, with such presence of mind as could only arise from the consciousness of innocence.

On Sunday, the day of his death, he had the passion of our blessed Saviour read to him out of St. John's gospel, as on every other day of that week, and spoke of the mercy of his Redeemer, and his confidence in his merits.

As his end evidently approached, the brethren of the convent came to pronounce the last

prayers, with which he could only join in his thoughts, being able to pronounce no more than these words, *Esto perpetua, Mayest thou last for ever*; which was understood to be a prayer for the prosperity of his country.

Thus died Father Paul, in the 71st year of his age; hated by the Romans as their most formidable enemy, and honoured by all the learned for his abilities, and by the good for his integrity. His detestation of the corruption of the Roman church appears in all his writings, but particularly in this memorable passage of one of his letters: "There is nothing more essential than to ruin the reputation of the Jesuits: by the ruin of the Jesuits, Rome will be ruined; and if Rome is ruined, religion will reform of itself."

He appears by many passages of his life to have had a high esteem of the church of England; and his friend, Father Fulgentio, who had adopted all his notions, made no scruple of administering to Dr. Duncomb, an English gentleman that fell sick at Venice, the communion in both kinds, according to the Common Prayer which he had with him in Italian.

He was buried with great pomp at the public charge, and a magnificent monument was erected to his memory.

## BOERHAAVE.

THE following account of the late Dr. BOERHAAVE, so loudly celebrated, and so universally lamented through the whole learned world, will, we hope, be not unacceptable to our readers: we could have made it much larger, by adopting flying reports, and inserting unattested facts; a close adherence to certainty has contracted our narrative, and hindered it from swelling to that bulk, at which modern histories generally arrive.

Dr. Herman Boerhaave was born on the last day of December, 1668, about one in the morning, at Voorhout, a village two miles distant from Leyden; his father, James Boerhaave, was minister of Voorhout, of whom his son,\*

in a small account of his own life, has given a very amiable character, for the simplicity and openness of his behaviour, for his exact frugality in the management of a narrow fortune, and the prudence, tenderness, and diligence, with which he educated a numerous family of nine children. He was eminently skilled in history and genealogy, and versed in the Latin, Greek, and Hebrew languages.

His mother was Hagar Daelder, a tradesman's daughter of Amsterdam, from whom he might, perhaps, derive an hereditary inclination to the study of physic, in which she was very inquisitive, and had obtained a knowledge of it not common in female students.

This knowledge, however, she did not live to communicate to her son; for she died in 1673, ten years after her marriage.

His father, finding himself encumbered with the care of seven children, thought it necessary to take a second wife, and in July 1674, was married to Eva du Bois, daughter of a minister of Leyden, who, by her prudent and impartial

\* *Erat Hermannii Genitor Latine, Græce, Hebraice sciens: peritus valde historiarum et gentium. Vir apertus, candidus, simplex; paterfamilias optimus amore, cura, diligentia, frugalitate, prudentia. Qui non magna in re, sed plenus virtutis, novem liberis educandis, exemplum præbuit singulare, quid exacta parsimonia polleat, et frugalitas. Orig. Edit.*

conduct, so endeared herself to her husband's children, that they all regarded her as their own mother.

Herman Boerhaave was always designed by his father for the ministry, and with that view instructed by him in grammatical learning, and the first elements of languages; in which he made such a proficiency, that he was, at the age of eleven years, not only master of the rules of grammar, but capable of translating with tolerable accuracy, and not wholly ignorant of critical niceties.

At intervals, to recreate his mind, and strengthen his constitution, it was his father's custom to send him into the fields, and employ him in agriculture and such kind of rural occupations, which he continued through all his life to love and practise; and by this vicissitude of study and exercise preserved himself, in a great measure, from those distempers and depressions which are frequently the consequences of indiscreet diligence, and uninterrupted application; and from which students, not well acquainted with the constitution of the human body, sometimes fly for relief to wine instead of exercise, and purchase temporary ease by the hazard of the most dreadful consequences.

The studies of young Boerhaave were, about this time, interrupted by an accident, which deserves particular mention, as it first inclined him to that science, to which he was by nature so well adapted, and which he afterwards carried to so great perfection.

In the twelfth year of his age, a stubborn, painful, and malignant ulcer, broke out upon his left thigh; which, for near five years, defeated all the art of the surgeons and physicians, and not only afflicted him with most excruciating pains, but exposed him to such sharp and tormenting applications, that the disease and remedies were equally insufferable. Then it was that his own pain taught him to compassionate others, and his experience of the inefficacy of the methods then in use incited him to attempt the discovery of others more certain.

He began to practise at least honestly, for he began upon himself; and his first essay was a prelude to his future success, for, having laid aside all the prescriptions of his physicians, and all the applications of his surgeons, he at last, by tormenting the part with salt and urine, effected a cure.

That he might, on this occasion, obtain the assistance of surgeons with less inconvenience and expense, he was brought, by his father, at fourteen, to Leyden, and placed in the fourth class of the public school, after being examined by the master: here his application and abilities were equally conspicuous. In six months, by gaining the first prize in the fourth class, he was raised to the fifth: and in six months more, upon the same proof of the superiority of his genius,

rewarded with another prize, and translated to the sixth: from whence it is usual in six months more to be removed to the university.

Thus did our young student advance in learning and reputation, when, as he was within view of the university, a sudden and unexpected blow threatened to defeat all his expectations.

On the 12th of November, in 1682, his father died, and left behind him a very slender provision for his widow and nine children, of which the eldest was not yet seventeen years old.

This was a most afflicting loss to the young scholar, whose fortune was by no means sufficient to bear the expenses of a learned education, and who therefore seemed to be now summoned by necessity to some way of life more immediately and certainly lucrative; but, with a resolution equal to his abilities, and a spirit not so depressed and shaken, he determined to break through the obstacles of poverty, and supply, by diligence, the want of fortune.

He therefore asked and obtained the consent of his guardians to prosecute his studies, so long as his patrimony would support him; and, continuing his wonted industry, gained another prize.

He was now to quit the school for the university, but on account of the weakness yet remaining in his thigh, was at his own intreaty continued six months longer under the care of his master, the learned Winschoten, where he once more was honoured with the prize.

At his removal to the university, the same genius and industry met with the same encouragement and applause. The learned Triglandius, one of his father's friends, made soon after professor of divinity at Leyden, distinguished him in a particular manner, and recommended him to the friendship of Mr. Van Apphen, in whom he found a generous and constant patron.

He became now a diligent hearer of the most celebrated professors, and made great advances in all the sciences; still regulating his studies with a view principally to divinity, for which he was originally intended by his father, and for that reason exerted his utmost application to attain an exact knowledge of the Hebrew tongue.

Being convinced of the necessity of mathematical learning, he began to study those sciences in 1687, but without that intense industry with which the pleasure he found in that kind of knowledge induced him afterwards to cultivate them.

In 1690, having performed the exercises of the university with uncommon reputation, he took his degree in philosophy; and on that occasion discussed the important and arduous subject of the distinct natures of the soul and body, with such accuracy, perspicuity, and subtlety, that he entirely confuted all the sophistry of Epicurus.

Hobbes, and Spinoza, and equally raised the characters of piety and erudition.

Divinity was still his great employment, and the chief aim of all his studies. He read the scriptures in their original languages, and when difficulties occurred, consulted the interpretations of the most ancient fathers, whom he read in order of time, beginning with Clemens Romanus.

In the perusal of those early writers,\* he was struck with the profoundest veneration of the simplicity and purity of their doctrines, the holiness of their lives, and the sanctity of the discipline practised by them; but, as he descended to the lower ages, found the peace of Christianity broken by useless controversies, and its doctrines sophisticated by the subtleties of the schools. He found the holy writers interpreted according to the notions of philosophers, and the chimeras of metaphysicians adopted as articles of faith. He found difficulties raised by niceties, and fomented to bitterness and rancour. He saw the simplicity of the Christian doctrine corrupted by the private fancies of particular parties, while each adhered to its own philosophy, and orthodoxy was confined to the sect in power.

Having now exhausted his fortune in the pursuit of his studies, he found the necessity of applying to some profession, that, without engrossing all his time, might enable him to support himself; and, having obtained a very uncommon knowledge of the mathematics, he read lectures in those sciences to a select number of young gentlemen in the university.

At length, his propensity to the study of physic grew too violent to be resisted; and, though he still intended to make divinity the great em-

ployment of his life, he could not deny himself the satisfaction of spending some time upon the medical writers, for the perusal of which he was so well qualified by his acquaintance with mathematics and philosophy.

But this science corresponded so much with his natural genius, that he could not forbear making that his business which he intended only as his diversion; and still growing more eager as he advanced farther, he at length determined wholly to master that profession, and to take his degree in physic, before he engaged in the duties of the ministry.

It is, I believe, a very just observation, that men's ambition is generally proportioned to their capacity. Providence seldom sends any into the world with an inclination to attempt great things, who have not abilities likewise to perform them. To have formed the design of gaining a complete knowledge of medicine by way of digression from theological studies, would have been little less than madness in most men, and would have only exposed them to ridicule and contempt. But Boerhaave was one of those mighty geniuses, to whom scarce any thing appears impossible, and who think nothing worthy of their efforts but what appears insurmountable to common understandings.

He began this new course of study by a diligent perusal of Vesalius, Bartholine, and Fallopius; and, to acquaint himself more fully with the structure of bodies, was a constant attendant upon Nuck's public dissections in the theatre, and himself very accurately inspected the bodies of different animals.

Having furnished himself with this preparatory knowledge, he began to read the ancient physicians in the order of time, pursuing his inquiries downwards from Hippocrates through all the Greek and Latin writers.

Finding, as he tells us himself, that Hippocrates was the original source of all medical knowledge, and that all the later writers were little more than transcribers from him, he returned to him with more attention, and spent much time in making extracts from him, digesting his treatises into method, and fixing them in his memory.

He then descended to the moderns, among whom none engaged him longer, or improved him more, than Sydenham, to whose merit he has left this attestation, "that he frequently perused him, and always with greater eagerness."

His insatiable curiosity after knowledge engaged him now in the practice of chemistry, which he prosecuted with all the ardour of a philosopher, whose industry was not to be wearied, and whose love of truth was too strong to suffer him to acquiesce in the reports of others.

"Jungebat his exercitiis quotidianam patrum lectionem, secundum chronologiam, a Clemente Romano exorsus, et juxta seriem seculorum descendens: ut Jesu Christi doctrinam in N. T. traditam, primis patribus interpretantibus, addiceret.

"Horum simplicitatem sincere doctrine, disciplinæ sanctitatem, vitæ Deo dicatæ integritatem adorabat. Subtilitatem scholarum divina postmodum inquinasse dolebat. Ægerrime tulit, Sacrorum interpretationem ex sectis sophistarum peti: et Platonis, Aristotelis, Thomæ Aquinatis, Scoti; suo tempore Cartesii, cogitata metaphysica adhiberi pro legibus, ad quas castigarentur sacrorum scriptorum de Deo sententiæ. Experiebatur acerba dissidia, ingeniorumque subtilissimorum acerrima certamina, odia, ambitiones, inde cieri, foveri; adeo contraria paci cum Deo et homine. Nihil hic magis illi obstabat; quam quod omnes asserant sacram scripturam *incomprehensibilem* loquentem, *obscuram* explicandam; et *diversorum* singuli definiant ex placitis suæ metaphysicæ. Horrebat, inde dominantis sectæ prævalentem opinionem, orthodoxiæ modum, et regulas, unice dare juxta dictatâ metaphysicorum, non sacrarum literarum; unde tam variæ sententiæ de doctrina simplicissima." *Origin. Edit.*

Yet did he not suffer one branch of science to withdraw his attention from others: anatomy did not withhold him from chemistry, nor chemistry, enchanting as it is, from the study of botany, in which he was no less skilled than in other parts of physic. He was not only a careful examiner of all the plants in the garden of the university, but made excursions for his farther improvement into the woods and fields, and left no place unvisited where any increase of botanical knowledge could be reasonably hoped for.

In conjunction with all these inquiries he still pursued his theological studies, and still, as we are informed by himself, "proposed, when he had made himself master of the whole art of physic, and obtained the honour of a degree in that science, to petition regularly for a license to preach, and to engage in the cure of souls," and intended in his theological exercise to discuss this question, "why so many were formerly converted to Christianity by illiterate persons, and so few at present by men of learning."

In pursuance of this plan he went to Hardewich, in order to take the degree of doctor in physic, which he obtained in July, 1693, having performed a public disputation, "*de utilitate explorandorum excrementorum in ægris, ut signorum.*"

Then returning to Leyden full of his pious design of undertaking the ministry, he found to his surprise unexpected obstacles thrown in his way, and an insinuation dispersed through the university that made him suspected, not of any slight deviation from received opinions, not of any pertinacious adherence to his own notions in doubtful and disputable matters, but of no less than Spinosism, or, in plainer terms, of Atheism itself.

How so injurious a report came to be raised, circulated, and credited, will be doubtless very eagerly inquired; we shall therefore give the relation, not only to satisfy the curiosity of mankind, but to show that no merit, however exalted, is exempt from being not only attacked, but wounded, by the most contemptible whippers. Those who cannot strike with force, can however poison their weapon, and, weak as they are, give mortal wounds, and bring a hero to the grave: so true is that observation, that many are able to do hurt, but few to do good.

This detestable calumny owed its rise to an incident from which no consequence of importance could be possibly apprehended. As Boerhaave was sitting in a common boat, there arose a conversation among the passengers upon the impious and pernicious doctrine of Spinoza, which, as they all agreed, tends to the utter overthrow of all religion. Boerhaave sat, and attended silently to this discourse for some time, till one of the company, willing to distinguish

himself by his zeal, instead of confuting the positions of Spinoza by argument, began to give a loose to contumelious language, and virulent invectives, which Boerhaave was so little pleased with, that at last he could not forbear asking him whether he had ever read the author he de-claimed against.

The orator, not being able to make much answer, was checked in the midst of his invectives, but not without feeling a secret resentment against the person who had at once interrupted his harangue, and exposed his ignorance.

This was observed by a stranger who was in the boat with them; he inquired of his neighbour the name of the young man, whose question had put an end to the discourse, and having learned it, set it down in his pocket-book, as it appears, with a malicious design, for in a few days it was the common conversation at Leyden, that Boerhaave had revolted to Spinoza.

It was in vain that his advocates and friends pleaded his learned and unanswerable confutation of all atheistical opinions, and particularly of the system of Spinoza, in his discourse of the distinction between soul and body. Such calumnies are not easily suppressed, when they are once become general. They are kept alive and supported by the malice of bad, and sometimes by the zeal of good men, who, though they do not absolutely believe them, think it yet the securest method to keep not only guilty, but suspected men out of public employments, upon this principle, that the safety of many is to be preferred before the advantage of few.

Boerhaave, finding this formidable opposition raised against his pretensions to ecclesiastical honours or preferments, and even against his design of assuming the character of a divine, thought it neither necessary nor prudent to struggle with the torrent of popular prejudice, as he was equally qualified for a profession, not indeed of equal dignity or importance, but which must undoubtedly claim the second place among those which are of the greatest benefit to mankind.

He therefore applied himself to his medical studies with new ardour and alacrity, reviewed all his former observations and inquiries, and was continually employed in making new acquisitions.

Having now qualified himself for the practice of physic, he began to visit patients, but without that encouragement which others, not equally deserving, have sometimes met with. His business, was, at first, not great, and his circumstances by no means easy; but still, superior to any discouragement, he continued his search after knowledge, and determined that prosperity, if ever he was to enjoy it, should be the consequence not of mean art, or disingenuous solicitations, but of real merit, and solid learning.

His steady adherence to his resolutions appears yet more plainly from this circumstance: he was, while he yet remained in this unpleasant situation, invited by one of the first favourites of King William III. to settle at the Hague, upon very advantageous conditions; but declined the offer. For having no ambition but after knowledge, he was desirous of living at liberty, without any restraint upon his looks, his thoughts, or his tongue, and at the utmost distance from all contentions, and state parties. His time was wholly taken up in visiting the sick, studying, making chemical experiments, searching into every part of medicine with the utmost diligence, teaching the mathematics, and reading the scriptures, and those authors who profess to teach a certain method of loving God.\*

This was his method of living to the year 1701, when he was recommended by Van Berg to the university, as a proper person to succeed Drelincurtius in the professorship of physic, and elected without any solicitations on his part, and almost without his consent, on the 18th of May.

On this occasion, having observed, with grief, that Hippocrates, whom he regarded not only as the father but as the prince of physicians, was not sufficiently read or esteemed by young students, he pronounced an oration, "De commendando Studio Hippocratico;" by which he restored that great author to his just and ancient reputation.

He now began to read public lectures with great applause, and was prevailed upon by his audience to enlarge his original design, and instruct them in chemistry.

This he undertook, not only to the great advantage of his pupils, but to the great improvement of the art itself, which had hitherto been treated only in a confused and irregular manner, and was little more than a history of particular experiments, not reduced to certain principles, nor connected one with another: this vast chaos he reduced to order, and made that clear and easy, which was before to the last degree difficult and obscure.

His reputation now began to bear some pro-

portion to his merit, and extended itself to distant universities; so that, in 1703, the professorship of physic being vacant at Groningen, he was invited thither; but he refused to leave Leyden, and chose to continue his present course of life.

This invitation and refusal being related to the governors of the university of Leyden, they had so grateful a sense of his regard for them, that they immediately voted an honorary increase of his salary, and promised him the first professorship that should be vacant.

On this occasion he pronounced an oration upon the use of mechanics in the science of physic, in which he endeavoured to recommend a rational and mathematical enquiry into the causes of diseases, and the structure of bodies; and to show the follies and weaknesses of the jargon introduced by Paracelsus, Helmont, and other chemical enthusiasts, who have obtruded upon the world the most airy dreams, and instead of enlightening their readers with explanations of nature, have darkened the plainest appearances, and bewildered mankind in error and obscurity.

Boerhaave had now for nine years read physical lectures, but without the title or dignity of a professor, when, by the death of professor Hotten, the professorship of physic and botany fell to him of course.

On this occasion he asserted the simplicity and facility of the science of physic, in opposition to those that think obscurity contributes to the dignity of learning, and that to be admired it is necessary not to be understood.

His profession of botany made it part of his duty to superintend the physical garden, which improved so much by the immense number of new plants which he procured, that it was enlarged to twice its original extent.

In 1714, he was deservedly advanced to the highest dignities of the university, and in the same year made physician of St. Augustine's hospital, in Leyden, into which the students are admitted twice a-week, to learn the practice of physic.

This was of equal advantage to the sick and to the students, for the success of his practice was the best demonstration of the soundness of his principles.

When he laid down his office of governor of the university, in 1715, he made an oration upon the subject of "attaining to certainty in natural philosophy;" in which he declares, in the strongest terms, in favour of experimental knowledge, and reflects, with just severity, upon those arrogant philosophers, who are too easily disgusted with the slow methods of obtaining true notions by frequent experiments, and who, possessed with too high an opinion of their own abilities, rather choose to consult their own imaginations, than enquire into na-

\* "Circa hoc tempus, lautis conditionibus, laetioribus promissis, invitatus, plus vice simplici, a viro primarie dignationis, qui gratia flagrantissima florabat regis Gulielmi III. ut Hagam comitum sedem caperet fortunarum, declinavit constans. Contentus videlicet vita libera, remota a turbis, studiisque porro percolendis unice impensa, ubi non cogeretur alia dicere et simulare, alia sentire et dissimulare: affectuum studiis rapti, regi. Sic tum vita erat, ægros visere, mox domi in musæo se condere, officinam Vulcaniam exercere; omnes medicinas partes acerrime persequi; mathematica etiam aliis tradere; sacra legere, et auctores qui profitentur docere rationem certam amandi Deum. *Orig. Edit.*

ture, and are better pleased with the charming amusement of forming hypotheses, than the toilsome drudgery of making observations.

The emptiness and uncertainty of all those systems, whether venerable for their antiquity, or agreeable for their novelty, he has evidently shown; and not only declared, but proved, that we are entirely ignorant of the principles of things, and that all the knowledge we have is of such qualities alone as are discoverable by experience, or such as may be deduced from them by mathematical demonstration.

This discourse, filled as it was with piety, and a true sense of the greatness of the Supreme Being, and the incomprehensibility of his works, gave such offence to a professor of Franeker, who professed the utmost esteem for Des Cartes, and considered his principles as the bulwark of his orthodoxy, that he appeared in vindication of his darling author, and spoke of the injury done him with the utmost vehemence, declaring little less than that the Cartesian system and the Christian must inevitably stand and fall together, and that to say that we were ignorant of the principles of things, was not only to enlist among the Sceptics, but sink into Atheism itself.

So far can prejudice darken the understanding, as to make it consider precarious systems as the chief support of sacred and invariable truth.

This treatment of Boerhaave was so far resented by the governors of his university, that they procured from Franeker a recantation of the invective that had been thrown out against him; this was not only complied with, but offers were made him of more ample satisfaction; to which he returned an answer not less to his honour than the victory he gained, "that he should think himself sufficiently compensated, if his adversary received no farther molestation on his account."

So far was this weak and injudicious attack from shaking a reputation not casually raised by fashion or caprice, but founded upon solid merit, that the same year his correspondence was desired upon Botany and Natural Philosophy by the Academy of Sciences at Paris, of which he was, upon the death of Count Marsigli, in the year 1728, elected a member.

Nor were the French the only nation by which this great man was courted and distinguished; for, two years after, he was elected fellow of our Royal Society.

It cannot be doubted but, thus caressed and honoured with the highest and most public marks of esteem by other nations, he became more celebrated in the university; for Boerhaave was not one of those learned men, of whom the world has seen too many, that disgrace their studies by their vices, and by unaccountable weaknesses make themselves ridicu-

lous at home, while their writings procure them the veneration of distant countries, where their learning is known, but not their follies.

Not that his countrymen can be charged with being insensible of his excellencies till other nations taught them to admire him; for in 1718, he was chosen to succeed Le Mort in the professorship of chemistry; on which occasion he pronounced an oration "De chemia errores suos expurgante," in which he treated that science with an elegance of style not often to be found in chemical writers, who seem generally to have affected not only a barbarous, but unintelligible phrase, and to have, like the Pythagoreans of old, wrapt up their secrets in symbols and enigmatical expressions, either because they believed that mankind would reverence most what they least understood, or because they wrote not from benevolence but vanity, and were desirous to be praised for their knowledge, though they could not prevail upon themselves to communicate it.

In 1722, his course both of lectures and practice was interrupted by the gout, which, as he relates it in his speech after his recovery, he brought upon himself, by an imprudent confidence in the strength of his own constitution, and by transgressing those rules which he had a thousand times inculcated to his pupils and acquaintance. Rising in the morning before day, he went immediately, hot and sweating, from his bed into the open air, and exposed himself to the cold dews.

The history of his illness can hardly be read without horror: he was for five months confined to his bed, where he lay upon his back without daring to attempt the least motion, because any effort renewed his torments, which were so exquisite, that he was at length not only deprived of motion but of sense. Here art was at a stand, nothing could be attempted, because nothing could be proposed with the least prospect of success. At length having, in the sixth month of his illness, obtained some remission, he took simple medicines\* in large quantities, and at length wonderfully recovered.

His recovery, so much desired, and so unexpected, was celebrated on Jan. 11, 1723, when he opened his school again, with general joy and public illuminations.

It would be an injury to the memory of Boerhaave not to mention what was related by himself to one of his friends, that when he lay whole days and nights without sleep, he found no method of diverting his thoughts so effectual as meditation upon his studies, and that he often relieved and mitigated the sense of his torments

\* "Succos pressos bibit Noster herbarum Cichorea, Endivia, Fumaria, Nasturtii aquatici, Veronice aquaticæ latifoliae, copia ingenti; simul deglutiens abundantissime gummi ferulacea Asiatica." *Orig. Edit.*

by the recollection of what he had read, and by reviewing those stores of knowledge which he had reposit in his memory.

This is perhaps an instance of fortitude and steady composure of mind, which would have been for ever the boast of the Stoic schools, and increased the reputation of Seneca or Cato. The patience of Boerhaave, as it was more rational, was more lasting than theirs; it was that *patientia Christiana* which Lipsius, the great master of the Stoical Philosophy, begged of God in his last hours; it was founded on religion, not vanity, not on vain reasonings, but on confidence in God.

In 1727, he was seized with a violent burning fever, which continued so long that he was once more given up by his friends.

From this time he was frequently afflicted with returns of his distemper, which yet did not so far subdue him, as to make him lay aside his studies or his lectures, till, in 1729, he found himself so worn out that it was improper for him to continue any longer the professorships of botany and chemistry, which he therefore resigned, April 28, and upon his resignation spoke a "Sermo Academicus," or oration, in which he asserts the power and wisdom of the Creator from the wonderful fabric of the human body; and confutes all those idle reasoners, who pretend to explain the formation of parts, or the animal operations, to which he proves that art can produce nothing equal, nor any thing parallel. One instance I shall mention, which is produced by him, of the vanity of any attempt to rival the work of God. Nothing is more boasted by the admirers of chemistry, than that they can, by artificial heats and digestion, imitate the productions of Nature. "Let all these heroes of science meet together," says Boerhaave; let them take bread and wine, the food that forms the blood of man, and by assimilation contributes to the growth of the body: let them try all their arts, they shall not be able from these materials to produce a single drop of blood.—So much is the most common act of Nature beyond the utmost efforts of the most extended Science!"

From this time Boerhaave lived with less public employment indeed, but not an idle or a useless life; for, besides his hours spent in instructing his scholars, a great part of his time was taken up by patients which came, when the distemper would admit it, from all parts of Europe to consult him, or by letters which, in more urgent cases, were continually sent, to inquire his opinion, or ask his advice.

Of his sagacity, and the wonderful penetration with which he often discovered and described, at the first sight of a patient, such distempers as betray themselves by no symptoms to common eyes, such wonderful relations have been spread over the world, as, though attested

beyond doubt, can scarcely be credited. I mention none of them, because I have no opportunity of collecting testimonies, or distinguishing between those accounts which are well proved, and those which owe their rise to fiction and credulity.

Yet I cannot but implore, with the greatest earnestness, such as have been conversant with this great man, that they will not so far neglect the common interest of mankind, as to suffer any of these circumstances to be lost to posterity. Men are generally idle, and ready to satisfy themselves, and intimidate the industry of others, by calling that impossible which is only difficult. The skill to which Boerhaave attained, by a long and unwearied observation of nature, ought therefore to be transmitted in all its particulars to future ages, that his successors may be ashamed to fall below him, and that none may hereafter excuse his ignorance by pleading the impossibility of clearer knowledge.

Yet so far was this great master from presumptuous confidence in his abilities, that, in his examinations of the sick, he was remarkably circumstantial and particular. He well knew that the originals of distempers are often at a distance from their visible effects; that to conjecture, where certainty may be obtained, is either vanity or negligence; and that life is not to be sacrificed, either to an affectation of quick discernment, or of crowded practice, but may be required, if trifled away, at the hand of the physician.

About the middle of the year 1737, he felt the first approaches of that fatal illness that brought him to the grave, of which we have inserted an account, written by himself Sept. 8, 1738, to a friend at London;\* which deserves not only to be preserved as an historical relation of the disease which deprived us of so great a man, but as a proof of his piety and resignation to the divine will.

In this last illness, which was to the last degree lingering, painful, and afflictive, his constancy and firmness did not forsake him. He

\* "Ætas, labor, corporisque opima pinguetudo, effecerant, ante annum, ut inertibus refertum, grave, hebes, plenitudine turgens corpus, anhelum ad motus minimos, cum sensu suffocationis, pulsu mirifice anomalo, ineptum evaderet ad ullum motum. Urgebat præcipue subsistens prorsus et intercepta respiratio ad prima somni initia: unde somnus prorsus prohibebatur, cum formidabili strangulationis molestia. Hinc hydrops pedum, crurum, femorum, scroti, præputii, et abdominis. Quæ tamen omnia sublata. Sed dolor manet in abdomine, cum anxietate summa, anhelitu suffocante, et debilitate incredibili: somno paucio, coque vago, per somnia turbatissimo: animus vero rebus agendis impar. Cum his luctor fœsus nec emergo; patienter expectans Dei jussa, quibus resigno data, quæ sola amo, et honore unice—*Orig. Edit.*

neither intermitted the necessary cares of life, nor forgot the proper preparations for death. Though dejection and lowness of spirit was, as he himself tells us, part of his distemper, yet even this, in some measure, gave way to that vigour which the soul receives from a consciousness of innocence.

About three weeks before his death he received a visit at his country house from the Rev. Mr. Schultens, his intimate friend, who found him sitting without-door, with his wife, sister, and daughter: after the compliments of form, the ladies withdrew, and left them to private conversation; when Boerhaave took occasion to tell him what had been, during his illness, the chief subject of his thoughts. He had never doubted of the spiritual and immaterial nature of the soul; but declared that he had lately had a kind of experimental certainty of the distinction between corporeal and thinking substances, which mere reason and philosophy cannot afford, and opportunities of contemplating the wonderful and inexplicable union of soul and body, which nothing but long sickness can give. This he illustrated by a description of the effects which the infirmities of his body had upon his faculties, which yet they did not so oppress or vanquish, but his soul was always master of itself, and always resigned to the pleasure of its Maker.

He related, with great concern, that once his patience so far gave way to extremity of pain, that, after having lain fifteen hours in exquisite tortures, he prayed to God that he might be set free by death.

Mr. Schultens, by way of consolation, answered, that he thought such wishes, when forced by continued and successive torments, unavoidable in the present state of human nature; that the best men, even Job himself, were not able to refrain from such starts of impatience. This he did not deny; but said, "He that loves God, ought to think nothing desirable but what is most pleasing to the Supreme Goodness."

Such were his sentiments, and such his conduct, in this state of weakness and pain: as death approached nearer, he was so far from terror or confusion, that he seemed even less sensible of pain, and more cheerful under his torments, which continued till the 23d day of September, 1738, on which he died, between four and five in the morning, in the 70th year of his age.

Thus died Boerhaave, a man formed by nature for great designs, and guided by religion in the exertion of his abilities. He was of a robust and athletic constitution of body, so hardened by early severities, and wholesome fatigue, that he was insensible of any sharpness of air, or inclemency of weather. He was tall, and remarkable for extraordinary strength. There was in his air and motion something rough and

artless, but so majestic and great at the same time, that no man ever looked upon him with out veneration, and a kind of tacit submission to the superiority of his genius.

The vigour and activity of his mind sparkled visibly in his eyes; nor was it ever observed that any change of his fortune, or alteration in his affairs, whether happy or unfortunate, affected his countenance.

He was always cheerful, and desirous of promoting mirth by a facetious and humorous conversation; he was never soured by calumny and detraction, nor ever thought it necessary to confute them; "for they are sparks," said he, "which, if you do not blow them, will go out of themselves."

Yet he took care never to provoke enemies by severity of censure, for he never dwelt on the faults or defects of others, and was so far from inflaming the envy of his rivals by dwelling on his own excellences, that he rarely mentioned himself or his writings.

He was not to be overawed or depressed by the presence, frowns, or insolence of great men, but persisted on all occasions in the right, with a resolution always present and always calm. He was modest, but not timorous, and firm without rudeness.

He could, with uncommon readiness and certainty, make a conjecture of men's inclinations and capacity by their aspect.

His method of life was to study in the morning and evening, and to allot the middle of the day to his public business. His usual exercise was riding, till, in his latter years, his distempers made it more proper for him to walk: when he was weary he amused himself with playing on the violin.

His greatest pleasure was to retire to his house in the country, where he had a garden stored with all the herbs and trees which the climate would bear; here he used to enjoy his hours unmolested, and prosecute his studies without interruption.

The diligence with which he pursued his studies, is sufficiently evident from his success. Statesmen and generals may grow great by unexpected accidents, and a fortunate concurrence of circumstances, neither procured nor foreseen by themselves; but reputation in the learned world must be the effect of industry and capacity. Boerhaave lost none of his hours, but, when he had attained one science, attempted another: he added physic to divinity, chemistry to the mathematics, and anatomy to botany. He examined systems by experiments, and formed experiments into systems. He neither neglected the observations of others, nor blindly submitted to celebrated names. He neither thought so highly of himself as to imagine he could receive no light from books, nor so meanly as to believe he could discover nothing but

what was to be learned from them. He examined the observations of other men, but trusted only to his own.

Nor was he unacquainted with the art of recommending truth by elegance, and embellishing the philosopher with polite literature: he knew that but a small part of mankind will sacrifice their pleasure to their improvement, and those authors who would find many readers, must endeavour to please while they instruct.

He knew the importance of his own writings to mankind, and lest he might, by a roughness and barbarity of style, too frequent among men of great learning, disappoint his own intentions, and make his labours less useful, he did not neglect the politer arts of eloquence and poetry. Thus was his learning at once various and exact, profound and agreeable.

But his knowledge, however uncommon, holds, in his character, but the second place; his virtue was yet much more uncommon than his learning. He was an admirable example of temperance, fortitude, humility, and devotion. His piety, and a religious sense of his dependence on God, was the basis of all his virtues, and the principle of his whole conduct. He was too sensible of his weakness to ascribe any thing to himself, or to conceive that he could subdue passion, or withstand temptation, by his own natural power; he attributed every good thought, and every laudable action, to the Father of goodness. Being once asked by a friend, who had often admired his patience under great provocations, whether he knew what it was to be angry, and by what means he had so entirely suppressed that impetuous and ungovernable passion? he answered, with the utmost frankness and sincerity, that he was naturally quick of resentment, but that he had, by daily prayer and meditation, at length attained to this mastery over himself.

As soon as he rose in the morning, it was, throughout his whole life, his daily practice to retire for an hour to private prayer and meditation; this, he often told his friends, gave him spirit and vigour in the business of the day, and this he therefore commended as the best rule of life; for nothing, he knew, could support the soul in all distresses but a confidence in the Supreme Being, nor can a steady and rational magnanimity flow from any other source than a consciousness of the divine favour.

He asserted on all occasions the divine authority and sacred efficacy of the holy Scriptures; and maintained that they alone taught the way of salvation, and that they only could give peace of mind. The excellency of the Christian religion was the frequent subject of his conversation. A strict obedience to the doctrine, and a diligent imitation of the example of our blessed Saviour, he often declared to be the foundation of true tranquillity. He recommended to his friends a

careful observation of the precept of Moses concerning the love of God and man. He worshipped God as he is in himself, without attempting to inquire into his nature. He desired only to think of God, what God knows of himself. There he stopped, lest, by indulging his own ideas, he should form a Deity from his own imagination, and sin by falling down before him. To the will of God he paid an absolute submission, without endeavouring to discover the reason of his determinations; and this he accounted the first and most inviolable duty of a Christian. When he heard of a criminal condemned to die, he used to think, who can tell whether this man is not better than I? or, if I am better, it is not to be ascribed to myself, but to the goodness of God.

Such were the sentiments of Boerhaave, whose words we have added in the note.\* So far was this man from being made impious by philosophy, or vain by knowledge, or by virtue, that he ascribed all his abilities to the bounty, and all his goodness to the grace of God. May his example extend its influence to his admirers and followers! May those who study his writings imitate his life! and those who endeavour after his knowledge aspire likewise to his piety!

He married, September 17, 1710, Mary Drolenveaux, the only daughter of a burgo-master of Leyden, by whom he had Joanna Maria, who survives her father, and three other children who died in their infancy.

The works of this great writer are so generally known and so highly esteemed, that though it may not be improper to enumerate them in the order of time in which they were published, it is wholly unnecessary to give any other account of them.

He published in 1707, "*Institutiones Medicæ*," to which he added in 1708, "*Aphorismi de cognoscendis et curandis morbis*."

---

\* "*Doctrinam sacris literis Hebraice et Græce traditam, solam animæ salutarem et agnovit et sensit. Omni opportunitate profitebatur disciplinam, quam Jesus Christus ore et vita expressit, unice tranquillitatem dare mentis. Semperque dixit amicis, pacem animi haud reperiendam nisi in magno Mosis præcepto de sincero amore Dei et hominis bene observato. Neque extra sacra monumenta uspiam inveniri, quod mentem serenet. Deum pius adoravit, qui est. Intelligere de Deo, unico volebat id, quod Deus de se intelligit. Eo contentus ultra nihil requisivit, ne idololatria erraret. In voluntate Dei sic requiescebat, ut illius nullam omnino rationem indagandam putaret. Hanc unice supremam omnium legem esse contendebat; deliberata constantia perfectissime colendam. De aliis et seipso sentiebat: ut quoties criminis reos ad pœnas letales damnatos audiret, semper cogitaret, sæpe diceret; 'quis dixerat annon me sint meliores? Utique, si ipse melior, id non mihi auctori tribuendum esse palam aio, confiteor; sed ita largienti Deo.' "* Orig. Edit.

1710, "Index stirpium in horto academico."

1719, "De materia medica, et remediorum formulis liber;" and in 1727, a second edition.

1720, "Alter index stirpium," &c. adorned with plates, and containing twice the number of plants as the former.

1722, "Epistola ad cl. Ruischium, qua sententiam Malpighianam de glandulis defendit."

1724, "Atrocis nec prius descripti morbi historia illustrissimi baronis Wassenariae."

1725, "Opera anatomica et chirurgica Andree Vesalii," with the life of Vesalius.

1728, "Altera atrocis rarissimique morbi marchionis de Sancto Albano historia."

"Auctores de lue Aphrodisiaca, cum tractatu præfixo."

1731, "Aretæi Cappadocis nova editio."

1732, "Elementa Chemiæ."

1734, "Observata de argento vivo, ad Reg. Soc. et Acad. Scient."

These are the writings of the great Boerhaave, which have made all encomiums useless and vain, since no man can attentively peruse them without admiring the abilities, and reverencing the virtue of the author.\*

## BLAKE.

At a time when a nation is engaged in a war with an enemy, whose insults, ravages, and barbarities, have long called for vengeance, an account of such English commanders as have merited the acknowledgments of posterity, by extending the powers and raising the honour of their country, seems to be no improper entertainment for our readers.† We shall therefore attempt a succinct narration of the life and actions of Admiral Blake, in which we have nothing farther in view than to do justice to his bravery and conduct, without intending any parallel between his achievements and those of our present admirals.

ROBERT BLAKE was born at Bridgewater, in Somersetshire, in August, 1598, his father being a merchant of that place, who had acquired a considerable fortune by the Spanish trade. Of his earliest years we have no account, and therefore can amuse the reader with none of those prognostics of his future actions, so often met with in memoirs.

In 1615, he entered into the university of Oxford, where he continued till 1623, though without being much countenanced or caressed by his superiors, for he was more than once disappointed in his endeavours after academical preferments. It is observable that Mr. Wood (in his *Athenæ Oxonienses*) ascribes the repulse he met

with at Wadham College, where he was competitor for a fellowship, either to want of learning, or of stature. With regard to the first objection, the same writer had before informed us, that he was an *early riser* and *studious*, though he sometimes relieved his attention by the amusements of fowling and fishing. As it is highly probable that he did not want capacity, we may therefore conclude, upon this confession of his diligence, that he could not fail of being learned, at least in the degree requisite to the enjoyment of a fellowship; and may safely ascribe his disappointment to his want of stature, it being the custom of Sir Henry Savil, then warden of that college, to pay much regard to the outward appearance of those who solicited preferment in that society. So much do the greatest events owe sometimes to accident or folly!

He afterwards retired to his native place, where "he lived," says Clarendon, "without any appearance of ambition to be a greater man than he was, but inveighed with great freedom against the license of the times, and power of the court."

In 1640, he was chosen Burgess for Bridgewater by the Puritan party, to whom he had recommended himself by the disapprobation of bishop Laud's violence and severity, and his non-compliance with those new ceremonies which he was then endeavouring to introduce.

When the civil war broke out, Blake, in conformity with his avowed principles, declared for the parliament; and thinking a bare declaration

\* Gent. Mag. 1739, vol. ix. p. 176. N.

† This life was first printed in the *Gentleman's Magazine* for the year 1740. N.

for right not all the duty of a good man, raised a troop of dragoons for his party, and appeared in the field with so much bravery, that he was in a short time advanced, without meeting any of those obstructions which he had encountered in the university.

In 1645, he was governor of Taunton, when the Lord Goring came before it with an army of 10,000 men. The town was ill fortified and unsupplied with almost every thing necessary for supporting a siege. The state of this garrison encouraged Colonel Windham, who was acquainted with Blake, to propose a capitulation; which was rejected by Blake with indignation and contempt: nor were either menaces or persuasion of any effect, for he maintained the place under all its disadvantages, till the siege was raised by the parliament's army.

He continued on many other occasions, to give proofs of an insuperable courage, and a steadiness of resolution not to be shaken: and, as a proof of his firm adherence to the parliament, joined with the borough of Taunton in returning thanks for their resolution to make no more addresses to the King. Yet was he so far from approving the death of Charles I. that he made no scruple of declaring, that he would venture his life to save him, as willingly as he had done to serve the parliament.

In February, 1648-9, he was made a commissioner of the navy, and appointed to serve on that element, for which he seems by nature to have been designed. He was soon afterwards sent in pursuit of Prince Rupert, whom he shut up in the harbour of Kingsale, in Ireland, for several months, till want of provisions and despair of relief, excited the Prince to make a daring effort for his escape, by forcing through the parliament's fleet: this design he executed with his usual intrepidity, and succeeded in it, though with the loss of three ships. He was pursued by Blake to the coast of Portugal, where he was received into the Tagus, and treated with great distinction by the Portuguese.

Blake, coming to the mouth of that river, sent to the King a messenger, to inform him, that the fleet in his port belonging to the public enemies of the commonwealth of England, he demanded leave to fall upon it. This being refused, though the refusal was in very soft terms, and accompanied with declarations of esteem, and a present of provisions, so exasperated the admiral, that, without any hesitation, he fell upon the Portuguese fleet, then returning from Brasil, of which he took seventeen ships, and burnt three. It was to no purpose that the King of Portugal alarmed at so unexpected a destruction, ordered Prince Rupert to attack him, and retake the Brasil ships. Blake carried home his prizes without molestation, the Prince not having force enough to pursue him, and

well pleased with the opportunity of quitting a port where he could no longer be protected.

Blake soon supplied his fleet with provision, and received orders to make reprisals upon the French who had suffered their privateers to molest the English trade; an injury which, in those days, was always immediately resented, and if not repaired, certainly punished. Sailing with this commission, he took in his way a French man of war valued at a million. How this ship happened to be so rich, we are not informed; but as it was a cruiser, it is probable the rich lading was the accumulated plunder of many prizes. Then following the unfortunate Rupert, whose fleet by storms and battles was now reduced to five ships, into Carthagea, he demanded leave of the Spanish governor to attack him in the harbour, but received the same answer which had been returned before by the Portuguese: "That they had a right to protect all ships that came into their dominions; that if the admiral were forced in thither, he should find the same security; and that he required him not to violate the peace of a neutral port." Blake withdrew upon this answer into the Mediterranean; and Rupert then leaving Carthagea entered the port of Malaga, where he burnt and sunk several English merchant ships. Blake, judging this to be an infringement of the neutrality professed by the Spaniards, now made no scruple to fall upon Rupert's fleet in the harbour of Malaga, and having destroyed three of his ships, obliged him to quit the sea, and take sanctuary at the Spanish court.

In February 1650-1, Blake, still continuing to cruise in the Mediterranean, met a French ship of considerable force, and commanded the captain to come on board, there being no war declared between the two nations. The captain, when he came, was asked by him, whether "he was willing to lay down his sword, and yield?" which he gallantly refused, though in his enemy's power. Blake, scorning to take advantage of an artifice, and detesting the appearance of treachery, told him, "that he was at liberty to go back to his ship, and defend it as long as he could." The captain willingly accepted his offer, and after a fight of two hours, confessed himself conquered, kissed his sword, and surrendered it.

In 1652, broke out the memorable war between the two commonwealths of England and Holland; a war, in which the greatest admirals, that perhaps any age has produced, were engaged on each side, in which nothing less was contested than the dominion of the sea, and which was carried on with vigour, animosity, and resolution, proportioned to the importance of the dispute. The chief commanders of the Dutch fleets were Van Trump, De Ruyter, and De Witt, the most celebrated names of their

own nation, and who had been perhaps more renowned, had they been opposed by any other enemies. The States of Holland, having carried on their trade without opposition, and almost without competition, not only during the inactive reign of James I. but during the commotions of England, had arrived to that height of naval power, and that affluence of wealth, that, with the arrogance which a long continued prosperity naturally produces, they began to invent new claims, and to treat other nations with insolence, which nothing can defend but superiority of force. They had for some time made uncommon preparations at a vast expense, and had equipped a large fleet, without any apparent danger threatening them, or any avowed design of attacking their neighbours. This unusual armament was not beheld by the English without some jealousy, and care was taken to fit out such a fleet as might secure the trade from interruption, and the coasts from insults; of this Blake was constituted admiral for nine months. In this situation the two nations remained, keeping a watchful eye upon each other, without acting hostilities on either side, till the 18th of May, 1652, when Van Trump appeared in the Downs with a fleet of forty-five men of war. Blake, who had then but twenty ships, upon the approach of the Dutch admiral saluted him with three single shots, to require that he should, by striking his flag, show that respect to the English, which is due to every nation in their own dominions; to which the Dutchman answered with a broadside; and Blake, perceiving that he intended to dispute the point of honour, advanced with his own ship before the rest of his fleet, that, if it were possible, a general battle might be prevented. But the Dutch, instead of admitting him to treat, fired upon him from their whole fleet, without any regard to the customs of war, or the law of nations. Blake for some time stood alone against their whole force, till the rest of his squadron coming up, the fight was continued from between four and five in the afternoon till nine at night, when the Dutch retired with the loss of two ships, having not destroyed a single vessel, nor more than fifteen men, most of which were on board the Admiral, who, as he wrote to the parliament, was himself engaged for four hours with the main body of the Dutch fleet, being the mark at which they aimed; and, as Whitlock relates, received above a thousand shot. Blake, in his letter, acknowledges the particular blessing and preservation of God, and ascribes his success to the justice of the cause, the Dutch having first attacked him upon the English coast. It is indeed little less than miraculous, that a thousand great shot should not do more execution; and those who will not admit the interposition of providence, may draw at least

this inference from it, that *the bravest man is not always in the greatest danger.*

In July he met the Dutch fishery fleet with a convoy of twelve men of war, all which he took, with 100 of their herring-busses. And in September, being stationed in the Downs, with about Sixty sail, he discovered the Dutch admirals De Witt and De Ruyter with near the same number, and advanced towards them; but the Dutch being obliged, by the nature of their coast, and shallowness of their rivers, to build their ships in such a manner that they require less depth of water than the English vessels, took advantage of the form of their shipping, and sheltered themselves behind a flat, called *Kentish Knock*; so that the English, finding some of their ships aground, were obliged to alter their course; but perceiving early the next morning that the Hollanders had forsaken their station, they pursued them with all the speed that the wind, which was weak and uncertain, allowed, but found themselves unable to reach them with the bulk of their fleet, and therefore detached some of the lightest frigates to chase them. These came so near as to fire upon them about three in the afternoon; but the Dutch, instead of tacking about, hoisted their sails, steered toward their own coast, and finding themselves the next day followed by the whole English fleet, retired into Goree. The sailors were eager to attack them in their own harbours; but a council of war being convened, it was judged imprudent to hazard the fleet upon the shoals, or to engage in any important enterprise without a fresh supply of provisions.

\* That in this engagement the victory belonged to the English is beyond dispute, since, without the loss of one ship, and with no more than forty men killed, they drove the enemy into their own ports, took the rear-admiral and another vessel, and so discouraged the Dutch admirals, who had not agreed in their measures, that De Ruyter, who had declared against hazarding a battle, desired to resign his commission, and De Witt, who had insisted upon fighting, fell sick, as it was supposed, with vexation. But how great the loss of the Dutch was, is not certainly known: that two ships were taken they are too wise to deny, but affirm that those two were all that were destroyed. The English, on the other side, affirm that three of their vessels were disabled at the first encounter, that their numbers on the second day were visibly diminished, and that on the last day they saw three or four ships sink in their flight.

De Witt being now discharged by the Hollanders as unfortunate, and the chief command restored to Van Trump, great preparations were made for retrieving their reputation, and repairing their losses. Their endeavours were assisted by the English themselves, now made

factions by success; the men who were intrusted with the civil administration being jealous of those whose military commands had procured so much honour, lest they who raised them should be eclipsed by them. Such is the general revolution of affairs in every state; danger and distress produce unanimity and bravery, virtues which are seldom unattended with success; but success is the parent of pride, and pride of jealousy and faction; faction makes way for calamity, and happy is that nation whose calamities renew their unanimity. Such is the rotation of interests, that equally tend to hinder the total destruction of a people, and to obstruct an exorbitant increase of power.

Blake had weakened his fleet by many detachments, and lay with no more than forty sail in the Downs, very ill provided both with men and ammunition, and expecting new supplies from those whose animosity hindered them from providing them, and who chose rather to see the trade of their country distressed, than the sea-officers exalted by a new acquisition of honour and influence.

Van Trump, desirous of distinguishing himself at the resumption of his command by some remarkable action, had assembled eighty ships of war, and ten fire-ships, and steered towards the Downs, where Blake, with whose condition and strength he was probably acquainted, was then stationed. Blake, not able to restrain his natural ardour, or perhaps not fully informed of the superiority of his enemies, put out to encounter them, though his fleet was so weakly manned, that half of his ships were obliged to lie idle without engaging, for want of sailors. The force of the whole Dutch fleet was therefore sustained by about twenty-two ships. Two of the English frigates, named the Vanguard and the Victory, after having for a long time stood engaged amidst the whole Dutch fleet, broke through without much injury, nor did the English lose any ships till the evening, when the Garland, carrying forty guns, was boarded at once by two great ships, which were opposed by the English till they had scarcely any men left to defend the decks; then retiring into the lower part of the vessel, they blew up their decks, which were now possessed by the enemy, and at length were overpowered and taken. The Bonaventure, a stout well-built merchant-ship, going to relieve the Garland, was attacked by a man of war, and after a stout resistance, in which the captain, who defended her with the utmost bravery, was killed, was likewise carried off by the Dutch. Blake, in the Triumph, seeing the Garland in distress, pressed forward to relieve her, but in his way had his foremast shattered, and was himself boarded; but beating off the enemies, he disengaged himself, and retired into the Thames with the loss only of two ships of force, and four small fri-

gates, but with his whole fleet much shattered. Nor was the victory gained at a cheap rate, notwithstanding the unusual disproportion of strength; for of the Dutch flag-ships one was blown up, and the other two disabled; a proof of the English bravery, which should have induced Van Trump to have spared the insolence of carrying a broom at his top-mast in his triumphant passage through the Channel, which he intended as a declaration that he would sweep the seas of the English shipping; this, which he had little reason to think of accomplishing, he soon after perished in attempting.

There are sometimes observations and inquiries, which all historians seem to decline by agreement, of which this action may afford us an example: nothing appears at the first view more to demand our curiosity, or afford matter for examination, than this wild encounter of twenty-two ships with a force, according to their accounts who favour the Dutch, three times superior. Nothing can justify a commander in fighting under such disadvantages, but the impossibility of retreating. But what hindered Blake from retiring as well before the fight as after it? To say he was ignorant of the strength of the Dutch fleet, is to impute to him a very criminal degree of negligence; and, at least, it must be confessed that, from the time he saw them, he could not but know that they were too powerful to be opposed by him, and even then there was time for retreat. To urge the ardour of his sailors, is to divest him of the authority of a commander, and to charge him with the most reproachful weakness that can enter into the character of a general. To mention the impetuosity of his own courage, is to make the blame of his temerity equal to the praise of his valour; which seems indeed to be the most gentle censure that the truth of history will allow. We must then admit, amidst our eulogies and applause, that the great, the wise, and the valiant Blake was once betrayed to an inconsiderate and desperate enterprize, by the resistless ardour of his own spirit, and a noble jealousy of the honour of his country.

It was not long before he had an opportunity of revenging his loss, and restraining the insolence of the Dutch. On the 18th of February 1652-3, Blake being at the head of eighty sail, and assisted, at his own request, by Colonels Monk and Dean, espied Van Trump with a fleet of above 100 men of war as Clarendon relates, of 70 by their own public accounts, and 300 merchant ships under his convoy. The English, with their usual intrepidity, advanced towards them; and Blake in the Triumph, in which he always led his fleet, with twelve ships more, came to an engagement with the main body of the Dutch fleet, and by the disparity of their force was reduced to the last extremity, having received in his hull no fewer than 700 shots,

when Lawson in the Fairfax came to his assistance. The rest of the English fleet now came in, and the fight was continued with the utmost degree of vigour and resolution, till the night gave the Dutch an opportunity of retiring, with the loss of one flag-ship, and six other men of war. The English had many vessels damaged, but none lost. On board Lawson's ship were killed 100 men, and as many on board Blake's, who lost his captain and secretary, and himself received a wound in the thigh.

Blake, having set ashore his wounded men, sailed in pursuit of Van Trump, who sent his convoy before, and himself retired fighting towards Bulloign. Blake ordered his light frigates to follow the merchants, still continued to harass Van Trump, and on the third day, the 20th of February, the two fleets came to another battle, in which Van Trump once more retired before the English, and making use of the peculiar form of his shipping, secured himself in the shoals. The accounts of this fight, as of all the others, are various; but the Dutch writers themselves confess that they lost eight men of war, and more than twenty merchant ships; and it is probable that they suffered much more than they are willing to allow, for these repeated defeats provoked the common people to riots and insurrections, and obliged the States to ask, though ineffectually, for peace.

In April following, the form of government in England was changed, and the supreme authority assumed by Cromwell; upon which occasion Blake, with his associates, declared that, notwithstanding the change in the administration, they should still be ready to discharge their trust, and to defend the nation from insults, injuries, and encroachments. "It is not," says Blake, "the business of a seaman to mind state affairs, but to hinder foreigners from fooling us." This was the principle from which he never deviated, and which he always endeavoured to inculcate in the fleet, as the surest foundation of unanimity and steadiness. "Disturb not one another with domestic disputes, but remember that we are English, and our enemies are foreigners. Enemies! which, let what party soever prevail, it is equally the interest of our country to humble and restrain."

After the 30th of April 1653, Blake, Monk, and Dean, sailed out of the English harbours with 100 men of war, and finding the Dutch with 70 sail on their own coasts, drove them to the Texel, and took fifty doggers. Then they sailed northward in pursuit of Van Trump, who, having a fleet of merchants under his convoy, durst not enter the Channel, but steered towards the Sound, and, by great dexterity and address, escaped the three English admirals, and brought all his ships into their harbour; then, knowing that Blake was still in the North, came before

Dover, and fired upon that town, but was driven off by the castle.

Monk and Dean stationed themselves again at the mouth of the Texel, and blocked up the Dutch in their own ports with eighty sail; but hearing that Van Trump was at Gorée with 120 men of war, they ordered all ships of force in the river and ports to repair to them.

On June 3d, the two fleets came to an engagement, in the beginning of which Dean was carried off by a cannon-ball; yet the fight continued from about twelve to six in the afternoon, when the Dutch gave way, and retreated fighting.

On the 4th, in the afternoon, Blake came up with eighteen fresh ships, and procured the English a complete victory; nor could the Dutch any otherwise preserve their ships than by retiring once more into the flats and shallows, where the largest of the English vessels could not approach.

In this battle Van Trump boarded vice-admiral Pen; but was beaten off, and himself boarded, and reduced to blow up his decks, of which the English had gotten possession. He was then entered at once by Pen and another; nor could possibly have escaped, had not De Ruyter and De Witt arrived at that instant and rescued him.

However the Dutch may endeavour to extenuate their loss in this battle, by admitting no more than eight ships to have been taken or destroyed, it is evident that they must have received much greater damages, not only by the accounts of more impartial historians, but by the remonstrances and exclamations of their admirals themselves; Van Trump declaring before the States, that "without a numerous reinforcement of large men of war, he could serve them no more;" and De Witt crying out before them, with the natural warmth of his character, "Why should I be silent before my lords and masters? The English are our masters, and by consequence masters of the sea."

In November, 1654, Blake was sent by Cromwell into the Mediterranean with a powerful fleet, and may be said to have received the homage of all that part of the world, being equally courted by the haughty Spaniards, the surly Dutch, and the lawless Algerines.

In March, 1656, having forced Algiers to submission, he entered the harbour of Tunis, and demanded reparation for the robberies practised upon the English by the pirates of that place, and insisted that the captives of his nation should be set at liberty. The governor having planted batteries along the shore, and drawn up his ships under the castles, sent Blake a haughty and insolent answer: "There are our castles of Goletta, and Porto Ferino," said he, "upon which you may do your worst;" adding other menaces and insults, and mentioning in terms

of ridicule the inequality of a fight between ships and castles. Blake had likewise demanded leave to take in water, which was refused him. Fired with this inhuman and insolent treatment, he curled his whiskers, as was his custom when he was angry, and, entering Porto Ferino with his great ships, discharged his shot so fast upon the batteries and castles, that in two hours the guns were dismantled, and the works forsaken, though he was at first exposed to the fire of sixty cannon. He then ordered his officers to send out their long boats well manned to seize nine of the piratical ships lying in the road, himself continuing to fire upon the castle. This was so bravely executed, that with the loss of only twenty-five men killed, and forty-eight wounded, all the ships were fired in the sight of Tunis. Thence sailing to Tripoly, he concluded a peace with that nation; then returning to Tunis, he found nothing but submission. And such indeed was his reputation, that he met with no farther opposition, but collected a kind of tribute from the princes of those countries, his business being to demand reparation for all the injuries offered to the English during the civil wars. He exacted from the Duke of Tuscany £60,000, and, as it is said, sent home sixteen ships laden with the effects which he had received from several states.

The respect with which he obliged all foreigners to treat his countrymen, appears from a story related by Bishop Burnet. When he lay before Malaga, in a time of peace with Spain, some of his sailors went ashore, and meeting a procession of the host, not only refused to pay any respect to it, but laughed at those that did. The people, being put by one of the priests upon resenting this indignity, fell upon them and beat them severely. When they returned to their ship, they complained of their ill-treatment; upon which Blake sent to demand the priest who had procured it. The viceroy answered that, having no authority over the priests, he could not send him; to which Blake replied, "that he did not inquire into the extent of the viceroy's authority, but that if the priest were not sent within three hours, he would burn the town." The viceroy then sent the priest to him, who pleaded the provocation given by the seamen. Blake bravely and rationally answered, that if he had complained to him, he would have punished them severely, for he would not have his men affront the established religion of any place; but that he was angry that the Spaniards should assume that power, for he would have all the world know "that an Englishman was only to be punished by an Englishman." So having used the priest civilly, he sent him back, being satisfied that he was in his power. This conduct so much pleased Cromwell, that he read the letter in council with great satisfaction, and said, "he hoped to make

the name of an Englishman as great as ever that of a Roman had been."

In 1656, the Protector, having declared war against Spain, despatched Blake with twenty-five men of war to infest their coasts, and intercept their shipping. In pursuance of these orders he cruised all winter about the Straits, and then lay at the mouth of the harbour of Cales, where he received intelligence that the Spanish plate-fleet lay at anchor in the bay of Santa-Cruz, in the isle of Teneriffe. On the 13th of April, 1657, he departed from Cales, and on the 20th arrived at Santa-Cruz, where he found sixteen Spanish vessels. The bay was defended on the north side by a castle well mounted with cannon, and in other parts with seven forts with cannon proportioned to the bigness, all united by a line of communication manned with musqueteers. The Spanish admiral drew up his small ships under the cannon of the castle, and stationed six great galleons with their broadsides to the sea; an advantageous and prudent disposition, but of little effect against the English commander; who determining to attack them, ordered Stayner to enter the bay with his squadron; then posting some of his larger ships to play upon the fortifications, himself attacked the galleons, which, after a gallant resistance, were at length abandoned by the Spaniards, though the least of them was bigger than the biggest of Blake's ships. The forts and smaller vessels being now shattered and forsaken, the whole fleet was set on fire, the galleons by Blake, and the smaller vessels by Stayner, the English vessels being too much shattered in the fight to bring them away. Thus was the whole plate-fleet destroyed, "and the Spaniards," according to Rapin's remark, "sustained a great loss of ships, money, men, and merchandise, while the English gained nothing but glory." As if he that increases the military reputation of a people did not increase their power, and he that weakens his enemy in effect strengthens himself.

"The whole action," says Clarendon, "was so incredible, that all men, who knew the place, wondered that any sober man, with what courage soever endowed, would ever have undertaken it, and they could hardly persuade themselves to believe what they had done: while the Spaniards comforted themselves with the belief, that they were devils and not men who had destroyed them in such a manner. So much a strong resolution of bold and courageous men can bring to pass, that no resistance or advantage of ground can disappoint them; and it can hardly be imagined how small a loss the English sustained in this unparalleled action, not one ship being left behind, and the killed and wounded not exceeding 200 men; when the slaughter on board the Spanish ships and on shore was incredible." The general cruised for some time afterwards

with his victorious fleet at the mouth of Cales, to intercept the Spanish shipping; but finding his constitution broken by the fatigue of the last three years, determined to return home, and died before he came to land.

His body was embalmed, and having lain some time in state at Greenwich-house, was buried in Henry VII's chapel, with all the funeral solemnity due to the remains of a man so famed for his bravery, and so spotless in his integrity; nor is it without regret that I am obliged to relate the treatment his body met a year after the Restoration, when it was taken up by express command, and buried in a pit in St. Margaret's church-yard. Had he been guilty of the murder of Charles I. to insult his body had been a mean revenge; but as he was innocent, it was, at least, inhumanity, and, perhaps, ingratitude. "Let no man," says the oriental proverb, "pull a dead lion by the beard."

But that regard which was denied his body has been paid to his better remains, his name and his memory. Nor has any writer dared to deny him the praise of intrepidity, honesty, contempt of wealth, and love of his country. "He was the first man," says Clarendon, "that declined the old track, and made it apparent that the sciences might be attained in less time than was imagined. He was the first man that brought ships to contemn castles on shore, which had ever been thought very formidable, but were discovered by him to make a noise only, and to fright those who could rarely be hurt by them. He was the first that infused that proportion of courage into seamen, by making them see, by experience, what mighty things they could do if they were resolved, and taught them to fight in fire, as well as upon the water; and though he has been very well imitated and followed, was the first that gave the example of that kind of naval courage, and bold and resolute achievements."

To this attestation of his military excellence, it may be proper to subjoin an account of his moral character, from the author of "Lives English and Foreign." "He was jealous," says that writer, "of the liberty of the subject, and the glory of his nation; and as he made use of no mean artifices to raise himself to the highest command at sea, so he needed no interest but his merit to support him in it. He scorned nothing more than money, which, as fast as it came in, was laid out by him in the service of the state, and to show that he was animated by that brave public spirit, which has since been reckoned rather romantic than heroic. And he was so disinterested, that though no man had more opportunities to enrich himself than he, who had taken so many millions from the enemies of England, yet he threw it all into the public treasury, and did not die £500 richer than his father left him; which the author avers, from his personal knowledge of his family and their circumstances, having been bred up in it, and often heard his brother give this account of him. He was religious according to the pretended purity of these times, but would frequently allow himself to be merry with his officers, and by his tenderness and generosity to the seamen had so endeared himself to them, that when he died they lamented his loss as that of a common father."

Instead of more testimonies, his character may be properly concluded with one incident of his life, by which it appears how much the spirit of Blake was superior to all private views. His brother, in the last action with the Spaniards, having not done his duty, was at Blake's desire discarded, and the ship was given to another; yet was he not less regardful of him as a brother, for when he died he left him his estate, knowing him well qualified to adorn or enjoy a private fortune, though he had found him unfit to serve his country in a public character, and had therefore not suffered him to rob it.

## SIR FRANCIS DRAKE.\*

FRANCIS DRAKE was the son of a clergyman in Devonshire, who being inclined to the doctrine of the Protestants, at that time much opposed

by Henry VIII. was obliged to fly from his place of residence into Kent for refuge, from the persecution raised against him, and those of the same opinion; by the law of the six articles.

How long he lived there, or how he was supported, was not known; nor have we any account of the first years of Sir Francis Drake's

\* This Life was first printed in the Gentleman's magazine for the year 1740.

life, of any disposition to hazards and adventures which might have been discovered in his childhood, or of the education which qualified him for such wonderful attempts.

We are only informed, that he was put apprentice by his father to the master of a small vessel that traded to France and the Low Countries, under whom he probably learned the rudiments of navigation, and familiarized himself to the dangers and hardships of the sea.

But how few opportunities soever he might have in this part of his life for the exercise of his courage, he gave so many proofs of diligence and fidelity, that his master, dying unmarried, left him his little vessel in reward of his services; a circumstance that deserves to be remembered, not only as it may illustrate the private character of this brave man, but as it may hint, to all those who may hereafter propose his conduct for their imitation, that virtue is the surest foundation both of reputation and fortune, and that the first step to greatness is to be honest.

If it were not improper to dwell longer on an incident at the first view so inconsiderable, it might be added, that it deserves the reflection of those, who, when they are engaged in affairs not adequate to their abilities, pass them over with a contemptuous neglect, and while they amuse themselves with chimerical schemes, and plans of future undertakings, suffer every opportunity of smaller advantage to slip away as unworthy their regard. They may learn from the example of Drake, that diligence in employments of less consequence is the most successful introduction to greater enterprizes.

After having followed for some time his master's profession, he grew weary of so narrow a province, and having sold his little vessel, ventured his effects in the new trade to the West Indies, which, having not been long discovered, and very little frequented by the English till that time, were conceived so much to abound in wealth, that no voyage thither could fail of being recompensed by great advantages. Nothing was talked of among the mercantile or adventurous part of mankind, but the beauty and riches of the new world. Fresh discoveries were frequently made, new countries and nations never heard of before were daily described, and it may easily be concluded that the relaters did not diminish the merit of their attempts, by suppressing or diminishing any circumstance that might produce wonder, or excite curiosity. Nor was their vanity only engaged in raising admirers, but their interest likewise in procuring adventurers, who were indeed easily gained by the hopes which naturally arise from new prospects; though through ignorance of the American seas, and by the malice of the Spaniards, who from the first discovery of those countries considered every other nation that attempted to follow them as

invaders of their rights, the best concerted designs often miscarried.

Among those who suffered most from the Spanish injustice, was Captain John Hawkins, who, having been admitted by the viceroy to traffic in the bay of Mexico, was, contrary to the stipulation then made between them, and, in violation of the peace between Spain and England, attacked without any declaration of hostilities, and obliged, after an obstinate resistance, to retire with the loss of four ships, and a great number of his men, who were either destroyed or carried into slavery.

In this voyage Drake had adventured almost all his fortune, which he in vain endeavoured to recover, both by his own private interest, and by obtaining letters from Queen Elizabeth; for the Spaniards, deaf to all remonstrances, either vindicated the injustice of the viceroy, or at least forbore to redress it.

Drake, thus oppressed and impoverished, retained at least his courage and his industry, that ardent spirit that prompted him to adventures, and that indefatigable patience that enabled him to surmount difficulties. He did not sit down idly to lament misfortunes, which Heaven had put it in his power to remedy, or to repine at poverty while the wealth of his enemies was to be gained. But having made two voyages to America for the sake of gaining intelligence of the state of the Spanish settlements, and acquainted himself with the seas and coasts, he determined on a third expedition of more importance, by which the Spaniards should find how imprudently they always act who injure and insult a brave man.

On the 24th of May, 1572, Francis Drake set sail from Plymouth, in the *Pascha* of seventy tons, accompanied by the *Swan* of twenty-five tons, commanded by his brother John Drake, having in both the vessels seventy-three men and boys, with a year's provision, and such artillery and ammunition as was necessary for his undertaking, which, however incredible it may appear to such as consider rather his force than his fortitude, was no less than to make reprisals upon the most powerful nation in the world.

The wind continuing favourable, they entered, June 29, between Guadaloupe and Dominica, and on July 6th saw the island of Santa Martha; then continuing their course, after having been becalmed for some time, they arrived at Port Pheasant, so named by Drake in a former voyage to the east of *Nombre de Dois*. Here he proposed to build his pinnaces, which he had brought in pieces ready framed from Plymouth, and was going ashore with a few men unarmed, but, discovering a smoke at a distance, ordered the other boat to follow him with a greater force.

Then marching towards the fire, which was

in the top of a high tree, he found a plate of lead-nailed to another tree, with an inscription engraved upon it by one Garret an Englishman, who had left that place but five days before, and had taken this method of informing him that the Spaniards had been advertised of his intention to anchor at that place, and that it therefore would be prudent to make a very short stay there.

But Drake, knowing how convenient this place was for his designs, and considering that the hazard and waste of time which could not be avoided in seeking another station, was equivalent to any other danger which was to be apprehended from the Spaniards, determined to follow his first resolution; only, for his greater security, he ordered a kind of palisade or fortification to be made by felling large trees, and laying the trunks and branches one upon another by the side of the river.

On July 20, having built their pinnaces, and being joined by one Captain Rause, who happened to touch at the same place with a bark of fifty men, they set sail towards Nombre de Dios, and, taking two frigates at the island of Pines, were informed by the negroes which they found in them, that the inhabitants of that place were in expectation of some soldiers, which the governor of Panama had promised, to defend them from the Symérons, or fugitive negroes, who, having escaped from the tyranny of their masters in great numbers, had settled themselves under two kings or leaders, on each side of the way between Nombre de Dios and Panama, and not only asserted their natural right to liberty and independence, but endeavoured to revenge the cruelties they had suffered, and had lately put the inhabitants of Nombre de Dios into the utmost consternation.

These Negroes the captain set on shore on the main land, so that they might, by joining the Symérons, recover their liberty, or at least might not have it in their power to give the people of Nombre de Dios any speedy information of his intention to invade them.

Then selecting fifty-three men from his own company, and twenty from the crew of his new associate Captain Rause, he embarked with them in his pinnaces, and set sail for Nombre de Dios.

On July 23th, at night, he approached the town undiscovered, and dropt his anchors under the shore, intending, after his men were refreshed, to begin the attack; but, finding that they were terrifying each other with formidable accounts of the strength of the place, and the multitude of the inhabitants, he determined to hinder the panic from spreading farther, by leading them immediately to action; and therefore ordered them to their oars: he landed without any opposition, there being only one gunner upon the bay, though it was secured with six brass cannons of the largest size ready mounted. But

the gunner, while they were throwing the cannons from their carriages, alarmed the town, as they soon discovered by the bell, the drums, and the noise of the people.

Drake, leaving twelve men to guard the pinnaces, marched round the town with no great opposition, the men being more hurt by treading on the weapons left on the ground by the flying enemy, than by the resistance which they encountered.

At length, having taken some of the Spaniards, Drake commanded them to show him the governor's house, where the mules that bring the silver from Panama were unloaded: there they found the door open, and, entering the room where the silver was deposited, found it heaped up in bars in such quantities as almost exceed belief, the pile being, they conjectured, seventy feet in length, ten in breadth, and twelve in height, each bar weighing between thirty and forty-five pounds.

It is easy to imagine that, at the sight of this treasure, nothing was thought on by the English but by what means they might best convey it to their boats; and, doubtless it was not easy for Drake, who, considering their distance from the shore, and the number of their enemies, was afraid of being intercepted in his retreat, to hinder his men from encumbering themselves with so much silver as might have retarded their march, and obstructed the use of their weapons; however, by promising to lead them to the king's treasure-house, where there was gold and jewels to a far greater value, and where the treasure was not only more portable, but nearer the coast, he persuaded them to follow him, and rejoin the main body of his men then drawn up under the command of his brother in the market-place.

Here he found his little troop much discouraged by the imagination, that, if they stayed any longer, the enemy would gain possession of their pinnaces, and that they should then, without any means of safety, be left to stand alone against the whole power of that country. Drake, not indeed easily terrified, but sufficiently cautious, sent to the coast to inquire the truth, and see if the same terror had taken possession of the men whom he had left to guard his boats; but finding no foundation for these dreadful apprehensions, he persisted in his first design, and led the troop forward to the treasure-house. In their way there fell a violent shower of rain, which wet some of their bow-strings, and extinguished many of their matches; a misfortune which might soon have been repaired, and which perhaps the enemy might suffer in common with them, but which, however, on this occasion, very much embarrassed them, as the delay produced by it repressed that ardour which sometimes is only to be kept up by continued action, and gave time to the timorous and slothful to spread their insinuations, and propa-

gate their cowardice. Some, whose fear was their predominant passion, were continually magnifying the numbers and courage of their enemies, and represented whole nations as ready to rush upon them; others, whose avarice mingled with their concern for their own safety, were more solicitous to preserve what they had already gained, than to acquire more; and others brave in themselves, and resolute, began to doubt of success in an undertaking in which they were associated with such cowardly companions. So that scarcely any man appeared to proceed in their enterprise with that spirit and alacrity which could give Drake a prospect of success.

This he perceived, and with some emotion told them, that if, after having had the chief treasure of the world within their reach, they should go home and languish in poverty, they could blame nothing but their own cowardice; that he had performed his part, and was still desirous to lead them on to riches and to honour.

Then finding that either shame or conviction made them willing to follow him, he ordered the treasure-house to be forced, and commanding his brother, and Oxenham of Plymouth, a man known afterwards for his bold adventures in the same parts, to take charge of the treasure, he commanded the other body to follow him to the market-place, that he might be ready to oppose any scattered troops of the Spaniards, and hinder them from uniting into one body.

But as he stepped forward, his strength failed him on a sudden, and he fell down speechless. Then it was that his companions perceived a wound in his leg, which he had received in the first encounter, but hitherto concealed, lest his men, easily discouraged, should make their concern for his life a pretence for returning to their boats. Such had been his loss of blood as was discovered upon nearer observation, that it had filled the prints of his footsteps; and it appeared scarce credible that after such effusion of blood, life should remain.

The bravest were now willing to retire: neither the desire of honour nor of riches was thought enough to prevail in any man over his regard for his leader. Drake, whom cordials had now restored to his speech, was the only man who could not be prevailed on to leave the enterprise unfinished. It was to no purpose that they advised him to submit to go on board to have his wound dressed, and promised to return with him and complete their design; he well knew how impracticable it was to regain the opportunity when it was once lost; and could easily foresee that a respite, but of a few hours, would enable the Spaniards to recover from their consternation, to assemble their forces, refit their batteries, and remove their treasure. What he had undergone so much danger to obtain was now in his hands, and the thought of leaving it

untouched was too mortifying to be patiently borne.

However, as there was little time for consultation, and the same danger attended their stay in that perplexity and confusion, as their return, they bound up his wound with his scarf, and partly by force, partly by entreaty, carried him to the boats, in which they all embarked by break of day.

Then taking with them, out of the harbour, a ship loaded with wines, they went to Bastimentes, an island about a league from the town, where they stayed two days to repose the wounded men, and to regale themselves with the fruits which grew in great plenty in the gardens of that island.

During their stay here, there came over from the main land a Spanish gentleman, sent by the governor, with instructions to inquire whether the captain was that Drake who had been before on their coast, whether the arrows with which many of their men were wounded were not poisoned, and whether they wanted provisions or other necessaries. The messenger likewise extolled their courage with the highest encomiums, and expressed his admiration of their daring undertaking. Drake, though he knew the civilities of an enemy are always to be suspected, and that the messenger, amidst all his professions of regard, was no other than a spy, yet knowing that he had nothing to apprehend, treated him with the highest honours that his condition admitted of. In answer to his inquiries, he assured him that he was the same Drake with whose character they were before acquainted, that he was a rigid observer of the laws of war, and never permitted his arrows to be poisoned: he then dismissed him with considerable presents, and told him that, though he had unfortunately failed in this attempt, he would never desist from his design, till he had shared with Spain the treasures of America.

They then resolved to return to the isle of Pines, where they had left their ships, and consult about the measures they were now to take: and having arrived, August 1, at their former station, they dismissed Captain Rause, who, judging it unsafe to stay any longer on the coast, desired to be no longer engaged in their designs.

But Drake, not to be discouraged from his purpose by a single disappointment, after having inquired of a negro, whom he took on board at Nombre de Dios, the most wealthy settlements, and weakest parts of the coast, resolved to attack Carthagena; and setting sail without loss of time, came to anchor, August 13, between Charesha and St. Barnards, two islands at a little distance from the harbour of Carthagena; then passing with his boats round the island he entered the harbour, and in the mouth of it found a frigate with only an old man in it, who voluntarily informed them, that about an hour

before a pinnacle had passed by with sails and oars, and all the appearance of expedition and importance; that, as she passed, the crew on board her bid them take care of themselves: and that, as soon as she touched the shore, they heard the noise of cannon fired as a warning, and saw the shipping in the port drawn up under the guns of the castle.

The captain, who had himself heard the discharge of the artillery, was soon convinced that he was discovered, and that therefore nothing could be attempted with any probability of success. He therefore contented himself with taking a ship of Seville of two hundred and forty tons, which the relator of this voyage mentions as a very large ship, and two small frigates, in which he found letters of advice from Nombre de Dios, intended to alarm that part of the coast.

Drake, now finding his pinnaces of great use, and not having a sufficient number of sailors for all his vessels, was desirous of destroying one of his ships, that his pinnaces might be better manned: this, necessary as it was, could not easily be done without disgusting his company, who, having made several prosperous voyages in that vessel, would be unwilling to have it destroyed. Drake well knew that nothing but the love of their leaders could animate his followers to encounter such hardships as he was about to expose them to, and therefore rather chose to bring his designs to pass by artifice than authority. He sent for the carpenter of the Swan, took him into his cabin, and, having first engaged him to secrecy, ordered him in the middle of the night to go down into the well of the ship, and bore three holes through the bottom, laying something against them that might hinder the bubbling of the water from being heard. To this the carpenter, after some expostulation, consented, and the next night performed his promise.

In the morning, August 15, Drake going out with his pinnace a-fishing, rowed up to the Swan, and having invited his brother to partake of his diversions, inquired, with a negligent air, why their bark was so deep in the water; upon which the steward going down, returned immediately with an account that the ship was leaky, and in danger of sinking in a little time. They had recourse immediately to the pump; but, having laboured till three in the afternoon, and gained very little upon the water, they willingly, according to Drake's advice, set the vessel on fire, and went on board the pinnaces.

Finding it now necessary to lie concealed for some time till the Spaniards should forget their danger, and remit their vigilance, they set sail for the Sound of Darien, and without approaching the coast, that their course might not be observed, they arrived there in six days.

This being a convenient place for their recep-

tion, both on account of privacy, as it was out of the road of all trade, and as it was well supplied with wood, water, wild fowl, hogs, deer, and all kinds of provisions, he stayed here fifteen days to clean his vessels, and refresh his men, who worked interchangeably, on one day the one half, and on the next the other.

On the 5th day of September, Drake left his brother with the ship at Darien, and set out with two pinnaces towards the Rio Grande, which they reached in three days, and on the 9th were discovered by a Spaniard from the bank, who believing them to be his countrymen, made a signal to them to come on shore, with which they very readily complied; but he, soon finding his mistake, abandoned his plantation, where they found great plenty of provisions, with which having laden their vessels, they departed. So great was the quantity of provisions which they amassed here and in other places, that in different parts of the coast they built four magazines or storehouses, which they filled with necessaries for the prosecution of their voyage. These they placed at such a distance from each other, that the enemy, if he should surprise one, might yet not discover the rest.

In the mean time, his brother, Captain John Drake, went, according to the instructions that had been left him, in search of the Symérons or fugitive negroes, from whose assistance alone they had now any prospect of a successful voyage; and touching upon the main land, by means of the negro whom they had taken from Nombre de Dios, engaged two of them to come on board his pinnace, leaving two of their own men as hostages for their returning. These men, having assured Drake of the affection of their nation, appointed an interview between him and their leaders. So leaving Port Plenty, in the Isle of Pines, so named by the English from the great stores of provisions which they had amassed at that place, they came, by the direction of the Symérons, into a secret bay among beautiful islands covered with trees, which concealed their ship from observation, and where the channel was so narrow and rocky that it was impossible to enter it by night, so that there was no danger of a sudden attack.

Here they met, and entered into engagements, which common enemies and common dangers preserved from violation. But the first conversation informed the English, that their expectations were not immediately to be gratified; for upon their inquiries, after the most probable means of gaining gold and silver, the Symérons told them, that, had they known sooner the chief end of their expedition, they could easily have gratified them: but that during the rainy season, which was now begun, and which continues six months, they could not recover the treasure, which they had taken from the

Spaniards, out of the rivers in which they had concealed it.

Drake, therefore, proposing to wait in this place till the rains were past, built, with the assistance of the Symerons, a fort of earth and timber, and leaving part of his company with the Symerons, set out with three pinnaces towards Carthagena, being of a spirit too active to lie still patiently, even in a state of plenty and security, and with the most probable expectations of immense riches.

On the 16th of October, he anchored within sight of Carthagena, without landing; and on the 17th, going out to sea, took a Spanish bark, with which they entered the harbour, where they were accosted by a Spanish gentleman, whom they had some time before taken and set at liberty, who coming to them in a boat, as he pretended, without the knowledge of the governor, made them great promises of refreshment and professions of esteem; but Drake, having waited till the next morning without receiving the provisions he had been prevailed upon to expect, found that all this pretended kindness was no more than a stratagem to amuse him, while the governor was raising forces for his destruction.

October 20, they took two frigates coming out of Carthagena without lading. Why the Spaniards knowing Drake to lie at the mouth of the harbour, sent out their vessels on purpose to be taken, does not appear. Perhaps they thought that, in order to keep possession of his prizes, he would divide his company, and by that division be more easily destroyed.

In a few hours afterwards they sent out two frigates well manned, which Drake soon forced to retire, and having sunk one of his prizes, and burnt the other in their sight, leaped afterwards ashore, single, in defiance of their troops, which hovered at a distance in the woods and on the hills, without ever venturing to approach within reach of the shot from the pinnaces.

To leap upon an enemy's coast in sight of a superior force, only to show how little they were feared, was an act that would in these times meet with little applause, nor can the general be seriously commended, or rationally vindicated, who exposes his person, to destruction, and by consequence his expedition to miscarriage, only for the pleasure of an idle insult, an insignificant bravado. All that can be urged in his defence is, that perhaps it might contribute to heighten the esteem of his followers, as few men, especially of that class, are philosophical enough to state the exact limits of prudence and bravery, or not to be dazzled with an intrepidity, how improperly soever exerted. It may be added, that perhaps the Spaniards, whose notions of courage are sufficiently romantic, might look upon him as a more formidable enemy, and yield more easily to a hero of whose fortitude they had so high an idea.

However, finding the whole country advertised of his attempts and in arms to oppose him, he thought it not proper to stay longer where there was no probability of success, and where he might in time be overpowered by multitudes, and therefore determined to go forward to Rio de Heha.

This resolution, when it was known by his followers, threw them into astonishment; and the company of one of his pinnaces remonstrated to him, that, though they placed the highest confidence in his conduct, they could not think of undertaking such a voyage without provisions, having only a gammon of bacon, and a small quantity of bread, for seventeen men. Drake answered them, that there was on board his vessel even a greater scarcity; but yet, if they would adventure to share his fortune, he did not doubt of extricating them from all their difficulties.

Such was the heroic spirit of Drake, that he never suffered himself to be diverted from his designs by any difficulties, nor ever thought of relieving his exigencies, but at the expense of his enemies.

Resolution and success reciprocally produce each other. He had not sailed more than three leagues before they discovered a large ship, which they attacked with all the intrepidity that necessity inspires, and happily found it laden with excellent provisions.

But finding his crew growing faint and sickly with their manner of living in the pinnaces, which was less commodious than on board the ships, he determined to go back to the Symerons, with whom he left his brother and part of his force, and attempt by their conduct to make his way over, and invade the Spaniards in the inland parts, where they would probably never dream of an enemy.

When they arrived at Port Diego, so named from the negro who had procured them their intercourse with the Symerons, they found Captain John Drake and one of his company dead, being killed in attempting, almost unarmed, to board a frigate well provided with all things necessary for its defence. The captain was unwilling to attack it, and represented to them the madness of their proposal; but, being overborne by their clamours and importunities, to avoid the imputation of cowardice, complied to his destruction. So dangerous is it for the chief commander to be absent.

Nor was this their only misfortune, for in a very short time many of them were attacked by the calenture, a malignant fever, very frequent in the hot climates, which carried away, among several others, Joseph Drake, another brother of the commander.

While Drake was employed in taking care of the sick men, the Symerons, who ranged the country for intelligence, brought him an account that the Spanish fleet had arrived at Nombre de

Dios, the truth of which was confirmed by a pinnacle, which he sent out to make observations.

This, therefore, was the time for their journey, when the treasures of the American mines were to be transported from Panama, over land, to Nombre de Dios. He therefore, by the direction of the Symérons, furnished himself with all things necessary, and on February 3, set out from Port Diego.

Having lost already twenty-eight of his company, and being under the necessity of leaving some to guard his ship, he took with him only eighteen English and thirty Symérons, who not only served as guides to show the way, but as purveyors to procure provisions.

They carried not only arrows for war, but for hunting and fowling; the heads of which are proportioned in size to the game which they are pursuing: for oxen, stags, or wild boars, they have arrows or javelins, with heads weighing a pound and a half, which they discharge near hand, and which scarcely ever fail of being mortal. The second sort are about half as heavy as the other, and are generally shot from their bows; these are intended for smaller beasts. With the third sort, of which the heads are an ounce in weight, they kill birds. As this nation is in a state that does not set them above continual cares for the immediate necessities of life, he that can temper iron best is among them most esteemed, and, perhaps, it would be happy for every nation, if honours and applauses were as justly distributed, and he were most distinguished whose abilities were most useful to society. How many chimerical titles to precedence, how many false pretences to respect, would this rule bring to the ground!

Every day, by sun-rising, they began to march, and, having travelled till ten, rested near some river till twelve, then travelling again till four, they reposed all night in houses, which the Symérons had either left standing in their former marches, or very readily erected for them, by setting up three or four posts in the ground, and laying poles from one to another in form of a roof, which they thatched with palmetto boughs and plantane leaves. In the valleys, where they were sheltered from the winds, they left three or four feet below open; but on the hills, where they were more exposed to the chill blasts of the night, they thatched them close to the ground, leaving only a door for entrance, and a vent in the middle of the room for the smoke of three fires, which they made in every house.

In their march they met not only with plenty of fruits upon the banks of the rivers, but with wild swine in great abundance, of which the Symérons, without difficulty, killed, for the most part, as much as was wanted. One day, however, they found an otter, and were about

to dress it; at which Drake expressing his wonder, was asked by Pedro, the chief Symeron, "Are you a man of war and in want, and yet doubt whether this be meat that hath blood in it?" For which Drake in private rebuked him, says the relator; whether justly or not, it is not very important to determine. There seems to be in Drake's scruple somewhat of superstition, perhaps not easily to be justified; and the negro's answer was, at least martial, and will, I believe, be generally acknowledged to be rational.

On the third day of their march, Feb. 6, they came to a town of the Symérons, situated on the side of a hill, and encompassed with a ditch and a mud wall, to secure it from a sudden surprise: here they lived with great neatness and plenty, and some observation of religion, paying great reverence to the cross; a practice which Drake prevailed upon them to change for the Lord's prayer. Here they importuned Drake to stay for a few days, promising to double his strength, but he either thinking greater numbers unnecessary, or fearing that if any difference should arise, he should be overborne by the number of Symérons, or that they would demand to share the plunder that should be taken in common, or for some other reason that might easily occur, refused any addition to his troop, endeavouring to express his refusal in such terms as might heighten their opinion of his bravery.

He then proceeded on his journey through cool shades, and lofty woods, which sheltered them so effectually from the sun, that their march was less toilsome than if they had travelled in England during the heat of the summer. Four of the Symérons, that were acquainted with the way, went about a mile before the troop, and scattered branches to direct them; then followed twelve Symérons, after whom came the English, with the two leaders, and the other Symérons closed the rear.

On February 11, they arrived at the top of a very high hill, on the summit of which grew a tree of wonderful greatness, in which they had cut steps for the more easy ascent to the top, where there was a kind of tower, to which they invited Drake, and from thence showed him not only the North Sea, from whence they came, but the great South Sea, on which no English vessel had ever sailed. This prospect exciting his natural curiosity and ardour for adventures and discoveries, he lifted up his hands to God, and implored his blessing upon the resolution, which he then formed, of sailing in an English ship on that sea.

Then continuing their march, they came, after two days, into an open, level country, where their passage was somewhat incommoded with the grass, which is of a peculiar kind, consisting of a stalk like that of wheat, and a blade,

on which the oxen and other cattle feed, till it grows too high for them to reach; then the inhabitants set it on fire, and in three days it springs up again: this they are obliged to do thrice-a-year, so great is the fertility of the soil.

At length, being within view of Panama, they left all frequented roads for fear of being discovered, and posted themselves in a grove near the way between Panama and Nombre de Dios: then they sent a Symeron in the habit of a negro of Panama, to inquire on what night the recoes, or drivers of mules, by which the treasure is carried, were to set forth. The messenger was so well qualified for his undertaking, and so industrious in the prosecution of it, that he soon returned with an account that the treasure of Lima, intending to return to Europe, would pass that night, with eight mules laden with gold, and one with jewels.

Having received this information, they immediately marched towards Venta Cruz, the first town on the way to Nombre de Dios, sending for security, two Symerons before, who as they went, perceived, by the scent of a match, that some Spaniard was before them, and going silently forwards, surprised a soldier asleep upon the ground. They immediately bound him and brought him to Drake, who, upon inquiry, found that their spy had not deceived them in his intelligence. The soldier, having informed himself of the captain's name, conceived such a confidence in his well known clemency, that, after having made an ample discovery of the treasure that was now at hand, he petitioned not only that he would command the Symerons to spare his life, but that, when the treasure should fall into his hands, he would allow him as much as might maintain him and his mistress, since they were about to gain more than their whole company could carry away.

Drake then ordered his men to lie down in the long grass, about fifty paces from the road, half on one side with himself, and half on the other, with Oxenham and the captain of the Symerons, so much behind, that one company might seize the foremost recoe, and the other the hindmost: for the mules of these recoes, or drivers, being tied together, travel on a line, and are all guided by leading the first.

When they had lain about an hour in this place, they began to hear the bells of the mules on each hand; upon which orders were given, that the droves which came from Venta Cruz should pass unmolested, because they carried nothing of great value, and those only be intercepted which were travelling thither, and that none of them should rise up till the signal should be given. But one Robert Pike, heated with strong liquor, left his company, and prevailed upon one of the Symerons to creep with him to the way-side, that they might signalize them-

selves by seizing the first mule, an hearing the trampling of a horse, as he lay, could not be restrained by the Symeron from rising up to observe who was passing by. This he did so imprudently, that he was discovered by the passenger, for by Drake's order the English had put their shirts on over their coats, that the night and tumult might not hinder them from knowing one another.

The gentleman was immediately observed by Drake to change his trot into a gallop; but the reason of it not appearing, it was imputed to his fear of the robbers that usually infest that road, and the English still continued to expect the treasure.

In a short time one of the recoes, that were passing towards Venta Cruz, came up and was eagerly seized by the English, who expected nothing less than half the revenue of the Indies; nor is it easy to imagine their mortification and perplexity when they found only two mules laden with silver, the rest having no other burden than provisions.

The driver was brought immediately to the captain, and informed him that the horseman, whom he had seen pass by with so much precipitation, had informed the treasurer of what he had observed, and advised him to send back the mules that carried his gold and jewels, and suffer only the rest to proceed, that he might by that cheap experiment discover whether there was any ambush on the way.

That Drake was not less disgusted than his followers at the disappointment cannot be doubted; but there was now no time to be spent in complaints. The whole country was alarmed, and all the force of the Spaniards was summoned to overwhelm him. He had no fortress to retire to, every man was his enemy, and every retreat better known to the Spaniards than to himself.

This was an occasion that demanded all the qualities of a hero, an intrepidity never to be shaken, and a judgment never to be perplexed. He immediately considered all the circumstances of his present situation, and found that it afforded him only the choice of marching back by the same way through which he came, or of forcing his passage to Venta Cruz.

To march back, was to confess the superiority of his enemies, and to animate them to the pursuit; the woods would afford opportunities of ambush, and his followers must often disperse themselves in search of provisions, who would become an easy prey, dispirited by their disappointment, and fatigued by their march. On the way to Venta Cruz he should have nothing to fear but from open attacks, and expected enemies.

Determining therefore to pass forward to Venta Cruz, he asked Pedro, the leader of the Symerons, whether he was resolved to follow him;

and having received from him the strongest assurances that nothing should separate them, commanded his men to refresh themselves and prepare to set forward.

When they came within a mile of the town, they dismissed the mules which they had made use of for their more easy and speedy passage, and continued their march along a road cut through thick woods, in which a company of soldiers, who were quartered in the place to defend it against the Symerons, had posted themselves, together with a convent of friars headed by one of their brethren, whose zeal against the northern heresy had incited him to hazard his person, and assume the province of a general.

Drake, who was advertised by two Symerons, whom he sent before, of the approach of the Spaniards, commanded his followers to receive the first volley without firing.

In a short time he heard himself summoned by the Spanish captain to yield, with a promise of protection and kind treatment; to which he answered with defiance, contempt, and the discharge of his pistol.

Immediately, the Spaniards poured in their shot, by which only one man was killed, and Drake, with some others, slightly wounded; upon which the signal was given by Drake's whistle to fall upon them. The English, after discharging their arrows and shot, pressed furiously forward, and drove the Spaniards before them, which the Symerons, whom the terror of the shot had driven to some distance, observed, and recalling their courage, animated each other with songs in their own language, and rushed forward with such impetuosity, that they overtook them near the town, and, supported by the English, dispersed them with the loss of only one man, who, after he had received his wound had strength and resolution left to kill his assailant.

They pursued the enemy into the town, in which they met with some plunder, which was given to the Symerons, and treated the inhabitants with great clemency, Drake himself going to the Spanish ladies to assure them that no injuries should be offered them; so inseparable is humanity from true courage.

Having thus broken the spirits, and scattered the forces of the Spaniards, he pursued his march to his ship, without any apprehension of danger, yet with great speed, being very solicitous about the state of the crew; so that he allowed his men, harrassed as they were, but little time for sleep or refreshment, but by kind exhortations, gentle authority, and a cheerful participation of all their hardships, prevailed upon them to bear, without murmurs, not only the toil of travelling, but on some days the pain of hunger.

In this march he owed much of his expedition to the assistance of the Symerons, who being

accustomed to the climate, and naturally robust, not only brought him intelligence, and showed the way, but carried necessaries, provided victuals, and built lodgings, and, when any of the English fainted in the way, two of them would carry him between them for two miles together; nor was their valour less than their industry, after they had learned, from their English companions, to despise the fire-arms of the Spaniards.

When they were within five leagues of the ships, they found a town built in their absence by the Symerons, at which Drake consented to halt, sending a Symeron to the ship with his gold tooth-pick as a token, which, though the master knew it, was not sufficient to gain the messenger credit, till upon examination he found that the captain, having ordered him to regard no messenger without his hand-writing, had engraven his name upon it with the point of his knife. He then sent the pinnace up the river, which they met, and afterwards sent to the town for those whose weariness had made them unable to march farther. On February 23, the whole company was re-united; and Drake, whose good or ill success never prevailed over his piety, celebrated their meeting with thanks to God.

Drake, not yet discouraged, now turned his thoughts to new prospects, and without languishing in melancholy reflections upon his past misadventures, employed himself in forming schemes for repairing them. Eager of action, and acquainted with man's nature, he never suffered idleness to infect his followers with cowardice, but kept them from sinking under any disappointment, by diverting their attention to some new enterprize.

Upon consultation with his own men and the Symerons, he found them divided in their opinions: some declaring, that, before they engaged in any new attempt, it was necessary to increase their stores of provisions; and others urging, that the ships in which the treasure was conveyed, should be immediately attacked. The Symerons proposed a third plan, and advised him to undertake another march over land to the house of one Pezoro, near Veragua, whose slaves brought him every day more than two hundred pounds sterling from the mines, which he heaped together in a strong stone house, which might by the help of the English be easily forced.

Drake, being unwilling to fatigue his followers with another journey, determined to comply with both the other opinions; and manning his two pinnaces, the Bear and the Minion, he sent John Oxenham in the Bear towards Tolon, to seize upon provisions; and went himself in the Minion to the Cabezas, to intercept the treasure that was to be transported from Veragua and that coast to the fleet at Nombre de Dios, first

dismissing with presents those Symerons that desired to return to their wives, and ordering those that chose to remain to be entertained in the ship.

Drake took at the Cabezas a frigate of Nicaragua, the pilot of which informed him that there was, in the harbour of Veragua, a ship freighted with more than a million of gold, to which he offered to conduct him (being well acquainted with the soundings) if he might be allowed his share of the prize; so much was his avarice superior to his honesty.

Drake, after some deliberation, complying with the pilot's importunities, sailed towards the harbour, but had no sooner entered the mouth of it than he heard the report of artillery, which was answered by others at a greater distance; upon which the pilot told him that they were discovered, this being the signal appointed by the governor to alarm the coast.

Drake now thought it convenient to return to the ship, that he might inquire the success of the other pinnace, which he found, with a frigate that she had taken, with twenty-eight fat hogs, two hundred hens, and a great store of maize, or Indian corn. The vessel itself was so strong and well built, that he fitted it out for war, determining to attack the fleet at Nombre de Dios.

On March the 21st he set sail with the new frigate and the Bear towards the Cabezas, at which he arrived in about two days, and found there Tetu, a Frenchman, with a ship of war, who, after having received from him a supply of water, and other necessities, entreated that he might join with him in his attempt; which Drake consenting to, admitted him to accompany him with twenty of his men, stipulating to allow them an equal share of whatever booty they should gain. Yet were they not without some suspicions of danger from this new ally, he having eighty men, and they being now reduced to thirty-one.

Then manning the frigate and two pinnaces, they set sail for the Cabezas, where they left the frigate, which was too large for the shallows over which they were to pass, and proceeded to Rio Francisco. Here they landed, and having ordered the pinnaces to return to the same place on the fourth day following, travelled through the woods towards Nombre de Dios, with such silence and regularity as surprised the French, who did not imagine the Symerons so discreet or obedient as they appeared, and were therefore in perpetual anxiety about the fidelity of their guides, and the probability of their return. Nor did the Symerons treat them with that submission and regard which they paid to the English, whose bravery and conduct they had already tried.

At length, after a laborious march of more than seven leagues, they began to hear the ham-

mers of the carpenters in the bay, it being the custom in that hot season to work in the night, and in a short time they perceived the approach of the recoes, or droves of mules from Panama. They now no longer doubted that their labours would be rewarded, and every man imagined himself secure from poverty and labour for the remaining part of his life. They, therefore, when the mules came up, rushed out and seized them, with an alacrity proportioned to their expectations. The three droves consisted of one hundred and nine mules, each of which carried three hundred pounds weight of silver. It was to little purpose that the soldiers ordered to guard the treasure, attempted resistance. After a short combat, in which the French captain, and one of the Symerons, were wounded, it appeared with how much greater ardour men are animated by interest than fidelity.

As it was possible for them to carry away but a small part of this treasure, after having wearied themselves with hiding it in holes and shallow waters, they determined to return by the same way, and, without being pursued, entered the woods, where the French captain, being disabled by his wound, was obliged to stay, two of his company continuing with him.

When they had gone forward about two leagues, the Frenchmen missed another of their company, who upon inquiry was known to be intoxicated with wine, and supposed to have lost himself in the woods, by neglecting to observe the guides.

But common prudence not allowing them to hazard the whole company by too much solicitude for a single life, they travelled on towards Rio Francisco, at which they arrived April the 3d, but, looking out for their pinnaces, were surprized with the sight of seven Spanish shallops, and immediately concluded that some intelligence of their motions had been carried to Nombre de Dios, and that these vessels had been fitted out to pursue them, which might undoubtedly have overpowered the pinnaces and their feeble crew. Nor did their suspicion stop here; but immediately it occurred to them, that their men had been compelled by torture to discover where their frigate and ship were stationed, which being weakly manned, and without the presence of the chief commander, would fall into their hands, almost without resistance, and all possibility of escaping be entirely cut off.

These reflections sunk the whole company into despair; and every one, instead of endeavouring to break through the difficulties that surrounded him, resigned up himself to his ill fortune; when Drake, whose intrepidity was never to be shaken, and whose reason was never to be surprised or embarrassed, represented to them that, though the Spaniards should have made themselves masters of their pinnaces, they might yet be him

dered from discovering the ships. He put them in mind that the pinnaces could not be taken, the men examined, their examinations compared, the resolutions formed, their vessels sent out, and their ships taken in an instant. Some time must necessarily be spent before the last blow could be struck; and, if that time were not negligently lost, it might be possible for some of them to reach the ships before the enemy, and direct them to change their station.

They were animated with this discourse, by which they discovered that their leader was not without hope; but when they came to look more nearly into their situation, they were unable to conceive upon what it was founded. To pass by land was impossible, as the way lay over high mountains, through thick woods and deep rivers; and they had not a single boat in their power, so that a passage by water seemed equally impracticable. But Drake, whose penetration immediately discovered all the circumstances and inconveniences of every scheme, soon determined upon the only means of success which their condition afforded them; and ordering his men to make a raft out of the trees that were then floating on the river, offered himself to put off to sea upon it, and cheerfully asked who would accompany him. John Owen, John Smith, and two Frenchmen, who were willing to share his fortune, embarked with him on the raft, which was fitted out with a sail made of a biscuit-sack, and an oar to direct its course instead of a rudder.

Then having comforted the rest with assurances of his regard for them, and resolution to leave nothing unattempted for their deliverance, he put off, and after having, with much difficulty, sailed three leagues, descried two pinnaces hasting towards him, which upon a nearer approach, he discovered to be his own, and perceiving that they anchored behind a point that jutted out into the sea, he put to shore, and, crossing the land on foot, was received by his company with that satisfaction which is only known to those that have been acquainted with dangers and distresses.

The same night they rowed to Rio Francisco, where they took in the rest, with what treasure they had been able to carry with them through the woods; then sailing back with the utmost expedition, they returned to their frigate, and soon after to their ship, where Drake divided the gold and silver equally between the French and the English.

Here they spent about fourteen days in fitting out their frigate more completely, and then dismissing the Spaniards with their ship, lay a few days among the Cabezas; while twelve English and sixteen Symérons travelled once more into the country, as well to recover the French captain, whom they had left wounded, as to bring away the treasure which they had hid in the

sands. Drake, whom his company would not suffer to hazard his person in another land expedition, went with them to Rio Francisco, where he found one of the Frenchmen who had stayed to attend their captain and was informed by him, upon his inquiries after his fortune, that, half an hour after their separation, the Spaniards came upon them, and easily seized upon the wounded captain; but that his companion might have escaped with him, had he not preferred money to life; for, seeing him throw down a box of jewels that retarded him, he could not forbear taking it up; and with that, and the gold which he had already, was so loaded that he could not escape. With regard to the bars of gold and silver, which they had concealed in the ground, he informed them that two thousand men had been employed in digging for them.

The men, however, either mistrusting the informer's veracity, or confident that what they had hidden could not be found, pursued their journey; but upon their arrival at the place, found the ground turned up for two miles round, and were able to recover no more than thirteen bars of silver, and a small quantity of gold. They discovered afterwards that the Frenchman who was left in the woods, falling afterwards into the hands of the Spaniards, was tortured by them till he confessed where Drake had concealed his plunder. So fatal to Drake's expedition was the drunkenness of his followers.

Then dismissing the French, they passed by Carthagená with their colours flying, and soon after took a frigate laden with provisions and honey, which they valued as a great restorative, and then sailed away to the Cabezas.

Here they stayed about a week to clean their vessels, and fit them for a long voyage, determining to set sail for England; and, that the faithful Symérons might not go away unrewarded, broke up their pinnaces, and gave them the iron, the most valuable present in the world to a nation whose only employments were war and hunting, and amongst whom show and luxury had no place.

Pedro, their captain, being desired by Drake to go through the ship, and to choose what he most desired, fixed his eye upon a scymitar set with diamonds, which the French captain had presented to Drake; and being unwilling to ask for so valuable a present, offered for it four large quoits, or thick plates of gold, which he had hitherto concealed; but Drake, desirous to show him that fidelity is seldom without a recompense, gave it him with the highest professions of satisfaction and esteem. Pedro, receiving it with the utmost gratitude, informed him, that by bestowing it he had conferred greatness and honour upon him; for by presenting it to his king, he doubted not of obtaining the highest

rank amongst the Symérons. He then persisted in his resolution of leaving the gold, which was generously thrown by Drake into the common stock; for he said, that those, at whose expenses he had been sent out, ought to share in all the gain of the expedition, whatever pretence cavil and chicanery might supply for the appropriation of any part of it. Thus was Drake's character consistent with itself; he was equally superior to avarice and fear, and through whatever danger he might go in quest of gold, he thought it not valuable enough to be obtained by artifice or dishonesty.

They now forsook the coast of America, which for many months they had kept in perpetual alarms, having taken more than two hundred ships of all sizes between Carthage and Nombre de Dios, of which they never destroyed any, unless they were fitted out against them, nor ever detained the prisoners longer than was necessary for their own security or concealment, providing for them in the same manner as for themselves, and protecting them from the malice of the Symérons; a behaviour, which humanity dictates, and which, perhaps, even policy cannot disapprove. He must certainly meet with obstinate opposition who makes it equally dangerous to yield as to resist, and who leaves his enemies no hopes but from victory.

What riches they acquired is not particularly related; but it is not to be doubted that the plunder of so many vessels, together with the silver which they seized at Nombre de Dios, must amount to a very large sum, though the part that was allotted to Drake was not sufficient to lull him in effeminaey, or to repress his natural inclination to adventures.

They arrived at Plymouth on the 9th of August, 1573, on Sunday, in the afternoon; and so much were the people delighted with the news of their arrival, that they left the preacher, and ran in crowds to the quay with shouts and congratulations.

Drake having, in his former expedition, had a view of the South Sea, and formed a resolution to sail upon it, did not suffer himself to be diverted from his design by the prospect of any difficulties that might obstruct the attempt, nor any dangers that might attend the execution; obstacles which brave men often find it more easy to overcome, than secret envy and domestic treachery.

Drake's reputation was now sufficiently advanced to incite detraction and opposition; and it is easy to imagine that a man by nature superior to mean artifices, and bred, from his earliest years, to the labour and hardships of a sea life, was very little acquainted with policy and intrigue, very little versed in the methods of application to the powerful and great, and unable

to obviate the practices of those whom his merit had made his enemies.

Nor are such the only opponents of great enterprises: there are some men, of narrow views and grovelling conceptions, who without the investigation of personal malice, treat every new attempt as wild and chimerical, and look upon every endeavour to depart from the beaten track as the rash effort of a warm imagination, or the glittering speculation of an exalted mind, that may please and dazzle for a time, but can produce no real or lasting advantage.

These men value themselves upon a perpetual scepticism, upon believing nothing but their own senses, upon calling for demonstration where it cannot possibly be obtained, and sometimes upon holding out against it when it is laid before them; upon inventing arguments against the success of any new undertaking, and, where arguments cannot be found, upon treating it with contempt and ridicule.

Such have been the most formidable enemies of the great benefactors to mankind, and to these we can hardly doubt but that much of the opposition which Drake met with is to be attributed; for their notions and discourse are so agreeable to the lazy, the envious, and the timorous, that they seldom fail of becoming popular, and directing the opinions of mankind.

Whatsoever were his obstacles, and whatsoever the motives that produced them, it was not till the year 1577, that he was able to assemble a force proportioned to his design, and to obtain a commission from the queen, by which he was constituted captain general of a fleet consisting of five vessels, of which the Pelican, admiral, of a hundred tons, was commanded by himself; the Elizabeth, vice admiral, of eighty tons, by John Winter; the Marigold, of thirty tons, by John Thomas; the Swan, fifty tons, by John Chester; the Christopher, of fifteen tons, by Thomas Moche, the same, as it seems, who was carpenter in the former voyage, and destroyed one of the ships by Drake's direction.

These ships, equipped partly by himself, and partly by other private adventurers, he manned with 164 stout sailors, and furnished with such provisions as he judged necessary for the long voyage in which he was engaged. Nor did he confine his concern to naval stores, or military preparations; but carried with him whatever he thought might contribute to raise in those nations, with which he should have any intercourse, the highest ideas of the politeness and magnificence of his native country. He therefore not only procured a complete service of silver for his own table, and furnished the cockpit with many vessels of the same metal, but engaged several musicians to accompany him; rightly judging that nothing would more excite the admiration of any savage and uncivilized people.

Having been driven back by a tempest in their first attempt, and obliged to return to Plymouth, to repair the damages which they had suffered, they set sail again from thence on the 13th of December, 1577, and on the 25th had sight of Cape Cantire, in Barbary, from whence they coasted on southward to the island of Mogadore, which Drake had appointed for the first place of rendezvous, and on the 27th brought the whole fleet to anchor in a harbour on the main land.

They were soon after their arrival discovered by the Moors that inhabited those coasts, who sent two of the principal men amongst them on board Drake's ship, receiving at the same time two of his company as hostages. These men he not only treated in the most splendid manner, but presented with such things as they appeared most to admire; it being with him an established maxim, to endeavour to secure in every country a kind reception to such Englishmen as might come after him, by treating the inhabitants with kindness and generosity; a conduct at once just and politic, to the neglect of which may be attributed many of the injuries suffered by our sailors in distant countries, which are generally ascribed, rather to the effects of the wickedness and folly of our own commanders, than the barbarity of the natives, who seldom fall upon any unless they have been first plundered or insulted; and, in revenging the ravages of one crew upon another of the same nation, are guilty of nothing but what is countenanced by the example of the Europeans themselves.

But this friendly intercourse was in appearance soon broken; for, on the next day, observing the Moors making signals from the land, they sent out their boat, as before, to fetch them to the ship, and one John Fry leaped ashore, intending to become a hostage as on the former day, when immediately he was seized by the Moors; and the crew observing great numbers to start up from behind the rock with weapons in their hands, found it madness to attempt his rescue, and therefore provided for their own security by returning to the ship.

Fry was immediately carried to the king, who, being then in continual expectation of an invasion from Portugal, suspected that these ships were sent only to observe the coast, and discover a proper harbour for the main fleet; but being informed who they were, and whither they were bound, not only dismissed his captive, but made large offers of friendship and assistance, which Drake, however, did not stay to receive, but being disgusted at this breach of the laws of commerce, and afraid of farther violence, after having spent some days in searching for his man, in which he met with no resistance, left the coast on December 31, some time before Fry's return, who, being obliged by this accident to somewhat a longer residence among the

Moors, was afterwards sent home in a merchant's ship.

On January 16, they arrived at Cape Blanc, having in their passage taken several Spanish vessels. Here, while Drake was employing his men in catching fish, of which this coast affords great plenty, and various kinds, the inhabitants came down to the sea-side with their alisorges, or leather bottles, to traffic for water, which they were willing to purchase with ambergris and other gums. But Drake compassionating the misery of their condition, gave them water whenever they asked for it, and left them their commodities to traffic with, when they should be again reduced to the same distress, without finding the same generosity to relieve them.

Here having discharged some Spanish ships which they had taken, they set sail towards the isles of Cape Verd, and, on January 28, came to anchor before Mayo, hoping to furnish themselves with fresh water; but having landed, they found the town by the water-side entirely deserted, and, marching farther up the country, saw the vallies extremely fruitful, and abounding with ripe figs, cocoas, and plantains, but could by no means prevail upon the inhabitants to converse or traffic with them: however, they were suffered by them to range the country without molestation, but found no water, except at such a distance from the sea that the labour of conveying it to the ships was greater than it was at that time necessary for them to undergo. Salt, had they wanted it, might have been obtained with less trouble, being left by the sea upon the sand, and hardened by the sun during the ebb, in such quantities, that the chief traffic of their island is carried on with it.

January 31, they passed by St. Jago, an island at that time divided between the natives and the Portuguese, who, first entering these islands under the show of traffic, by degrees established themselves, claimed a superiority over the original inhabitants, and harassed them with such cruelty, that they obliged them either to fly to the woods and mountains, and perish with hunger, or to take up arms against their oppressors, and, under the insuperable disadvantages with which they contended, to die almost without a battle in defence of their natural rights and ancient possessions.

Such treatment had the natives of St. Jago received, which had driven them into the rocky parts of the island, from whence they made incursions into the plantations of the Portuguese, sometimes with loss, but generally with that success which desperation naturally procures; so that the Portuguese were in continual alarms, and lived with the natural consequences of guilt, terror, and anxiety. They were wealthy, but not happy, and possessed the island, but not enjoyed it.

They then sailed on within sight of Fogo, an

island so called from a mountain, about the middle of it, continually burning, and, like the rest, inhabited by the Portuguese; two leagues to the south of which lies Brava, which has received its name from its fertility, abounding, though uninhabited, with all kinds of fruits, and watered with great numbers of springs and brooks, which would easily invite the possessors of the adjacent islands to settle on it, but that it affords neither harbour nor anchorage. Drake, after having sent out his boats with plummets, was not able to find any ground about it; and it is reported, that many experiments have been made with the same success; however, he took in water sufficient, and on the 2d of February set sail for the Straits of Magellan.

On February 17, they passed the equator, and continued their voyage, with sometimes calms, and sometimes contrary winds, but without any memorable accident, to March 28, when one of their vessels, with twenty-eight men, and the greatest part of their fresh water, on board, was, to their great discouragement, separated from them; but their perplexity lasted not long, for on the next day they discovered and rejoined their associates.

In their long course, which gave them opportunities of observing several animals, both in the air and water, at that time very little known, nothing entertained or surprised them more than the Flying Fish, which is near of the same size with a herring, and has fins of the length of his whole body, by the help of which, when he is pursued by the bonito, or great mackerel, as soon as he finds himself upon the point of being taken, he springs up into the air, and flies forward as long as his wings continue wet, moisture being, as it seems, necessary to make them pliant and moveable; and when they become dry and stiff, he falls down into the water, unless some bark or ship intercept him, and dips them again for a second flight. This unhappy animal is not only pursued by fishes in his natural element, but attacked in the air, where he hopes for security, by the don, or sparkite, a great bird that preys upon fish; and their species must surely be destroyed, were not their increase so great, that the young fry, in one part of the year, covers the sea.

There is another fish, named the cuttil, of which whole shoals will sometimes rise at once out of the water, and of which a great multitude fell into their ship.

At length, having sailed without sight of land for sixty-three days, they arrived, April 5, at the coast of Brazil, where, on the 7th, the Christopher was separated again from them by a storm; after which they sailed near the land to the southward, and on the 14th anchored under a cape, which they afterwards called Cape Joy, because in two days the vessel which they had lost returned to them.

Having spent a fortnight in the river of Plata, to refresh his men, after their long voyage, and then standing out to sea, he was again surprized by a sudden storm, in which they lost sight of the Swan. This accident determined Drake to contract the number of his fleet, that he might not only avoid the inconvenience of such frequent separations, but ease the labour of his men, by having more hands in each vessel.

For this purpose he sailed along the coast, in quest of a commodious harbour, and, on May 13, discovered a bay, which seemed not improper for their purpose, but which they durst not enter till it was examined; an employment in which Drake never trusted any, whatever might be his confidence in his followers on other occasions. He well knew how fatal one moment's inattention might be, and how easily almost every man suffers himself to be surprized by indolence and security. He knew the same credulity, that might prevail upon him to trust another, might induce another to commit the same office to a third; and it must be, at length, that some of them would be deceived. He therefore, as at other times, ordered the boat to be hoisted out, and, taking the line into his hand, went on sounding the passage till he was three leagues from his ship: when, on a sudden the weather changed, the skies blackened, the winds whistled, and all the usual forerunners of a storm began to threaten them; nothing was now desired but to return to the ship, but the thickness of the fog intercepting it from their sight, made the attempt little other than desperate. By so many unforeseen accidents is prudence itself liable to be embarrassed! So difficult is it sometimes for the quickest sagacity, and most enlightened experience, to judge what measures ought to be taken! To trust another to sound an unknown coast, appeared to Drake folly and presumption; to be absent from his fleet, though but for an hour, proved nothing less than to hazard the success of all their labours, hardships, and dangers.

In this perplexity, which Drake was not more sensible of than those whom he had left in the ships, nothing was to be omitted, however dangerous, that might contribute to extricate them from it, as they could venture nothing of equal value with the life of their general. Captain Thomas, therefore, having the lightest vessel, steered boldly into the bay, and taking the general aboard, dropped anchor, and lay out of danger, while the rest that were in the open sea suffered much from the tempest, and the Mary, a Portuguese prize, was driven away before the wind; the others, as soon as the tempest was over, discovering by the fires which were made on shore where Drake was, repaired to him.

Here going on shore they met with no inhabitants, though there were several houses or huts

standing, in which they found a good quantity of dried fowls, and among them a great number of ostriches, of which the thighs were as large as those of a sheep. These birds are too heavy and unwieldy to rise from the ground, but with the help of their wings run so swiftly, that the English could never come near enough to shoot at them. The Indians, commonly, by holding a large plume of feathers before them, and walking gently forward, drive the ostriches into some narrow neck, or point of land, then spreading a strong net from one side to the other, to hinder them from returning back to the open fields, set their dogs upon them, thus confined between the net and the water, and when they are thrown on their backs, rush in and take them.

Not finding this harbour convenient or well stored with wood and water, they left it on the 15th of May, and on the 18th entered another much safer, and more commodious, which they no sooner arrived at, than Drake, whose restless application never remitted, sent Winter to the southward, in quest of those ships which were absent, and immediately after sailed himself to the northward, and, happily, meeting with the Swan, conducted it to the rest of the fleet; after which, in pursuance of his former resolution, he ordered it to be broken up, reserving the iron work for a future supply. The other vessel which they lost in the late storm could not be discovered.

While they were thus employed upon an island about a mile from the main land, to which, at low water, there was a passage on foot, they were discovered by the natives, who appeared upon a hill at a distance, dancing and holding up their hands as beckoning the English to them; which Drake observing, sent out a boat, with knives, bells, and bugles, and such things as, by their usefulness or novelty, he imagined would be agreeable. As soon as the English landed, they observed two men running towards them, as deputed by the company, who came within a little distance, and then standing still, could not be prevailed upon to come nearer. The English therefore tied their presents to a pole, which they fixed in the ground, and then retiring, saw the Indians advance, who, taking what they found upon the pole, left in return, such feathers as they wear upon their heads, with a small bone about six inches in length, carved round the top, and burnished.

Drake, observing their inclination to friendship and traffic, advanced with some of his company towards the hill, upon sight of whom the Indians ranged themselves in a line from east to west, and one of them running from one end of the rank to the other, backwards and forwards, bowed himself towards the rising and setting of the sun, holding his hands over his head, and frequently stopping in the middle of the rank, leaping up towards the moon, which

then shone directly over their heads; thus calling the sun and moon, the deities they worship, to witness the sincerity of their professions of peace and friendship. While this ceremony was performed, Drake and his company ascended the hill, to the apparent terror of the Indians, whose apprehensions when the English perceived, they peaceably retired; which gave the natives so much encouragement, that they came forward immediately, and exchanged their arrows, feathers, and bones, for such trifles as were offered them.

Thus they traded for some time; but by frequent intercourse finding that no violence was intended, they became familiar, and mingled with the English without the least distrust.

They go quite naked, except a skin of some animal, which they throw over their shoulders when they lie in the open air. They knit up their hair, which is very long, with a roll of ostrich feathers, and usually carry their arrows wrapped up in it, that they may not encumber them, they being made with reeds, headed with flint, and therefore not heavy. Their bows are about an ell long.

Their chief ornament is paint, which they use of several kinds, delineating generally upon their bodies the figures of the sun and moon, in honour of their deities.

It is observable, that most nations, amongst whom the use of clothes is unknown, paint their bodies. Such was the practice of the first inhabitants of our own country. From this custom did our earliest enemies, the Picts, owe their denomination. As it is not probable that caprice or fancy should be uniform, there must be, doubtless, some reason for a practice so general and prevailing in distant parts of the world, which have no communication with each other. The original end of painting their bodies was, probably, to exclude the cold; an end which, if we believe some relations, is so effectually produced by it, that the men thus painted never shiver at the most piercing blasts. But doubtless any people so hardened by continual severities, would, even without paint, be less sensible of the cold than the civilized inhabitants of the same climate. However, this practice may contribute, in some degree, to defend them from the injuries of winter, and, in those climates where little evaporates by the pores, may be used with no great inconvenience; but in hot countries, where perspiration in greater degree is necessary, the natives only use unction to preserve them from the other extreme of weather: so well do either reason or experience supply the place of science in savage countries.

They had no canoes like the other Indians, nor any method of crossing the water, which was probably the reason why the birds in the adjacent islands were so tame, that they might be taken with the hand, having never been be-

fore frightened or molested. The great plenty of fowls and seals, which crowded the shallows in such numbers that they killed at their first arrival two hundred of them in an hour, contributed much to the refreshment of the English, who named the place Seal Bay, from that animal.

These seals seemed to be the chief food of the natives, for the English often found raw pieces of their flesh half eaten, and left as they supposed, after a full meal by the Indians, whom they never knew to make use of fire, or any art, in dressing or preparing their victuals.

Nor were their other customs less wild or uncouth than their way of feeding; one of them having received a cap off the general's head, and being extremely pleased as well with the honour as the gift, to express his gratitude, and confirm the alliance between them, retired to a little distance, and thrusting an arrow into his leg, let the blood run upon the ground, testifying, as it is probable, that he valued Drake's friendship above life.

Having stayed fifteen days among these friendly savages in 47 deg. 30 min. S. Lat., on June 3, they set sail towards the South Sea, and six days afterwards stopped at another little bay to break up the *Christopher*. Then passing on, they cast anchor in another bay, not more than 20 leagues distant from the Straits of Magellan.

It was now time seriously to deliberate in what manner they should act with regard to the Portuguese prize, which, having been separated from them by the storm, had not yet rejoined them. To return in search of it was sufficiently mortifying; to proceed without it, was not only to deprive themselves of a considerable part of their force, but to expose their friends and companions, whom common hardships and dangers had endeared to them, to certain death or captivity. This consideration prevailed; and therefore on the 18th, after prayers to God, with which Drake never forgot to begin an enterprise, he put to sea, and the next day, near Port Julian, discovered their associates, whose ship was now grown leaky, having suffered much, both in the first storm by which they were dispersed, and afterwards in fruitless attempts to regain the fleet.

Drake, therefore, being desirous to relieve their fatigues, entered Port Julian, and, as it was his custom always to attend in person when any important business was in hand, went ashore with some of the chief of his company, to seek for water, where he was immediately accosted by two natives, of whom Magellan left a very terrible account, having described them as a nation of giants and monsters; nor is his narrative entirely without foundation, for they are of the largest size, though not taller than some Englishmen; their strength is proportioned to their bulk, and their voice loud, boisterous, and terri-

ble. What were their manners before the arrival of the Spaniards, it is not possible to discover; but the slaughter made of their countrymen, perhaps without provocation, by these cruel intruders, and the general massacre with which that part of the world had been depopulated, might have raised in them a suspicion of all strangers, and by consequence made them inhospitable, treacherous, and bloody.

The two who associated themselves with the English appeared much pleased with their new guests, received willingly what was given them, and very exactly observed every thing that passed, seeming more particularly delighted with seeing Oliver, the master-gunner, shoot an English arrow. They shot themselves likewise in emulation, but their arrows always fell to the ground far short of his.

Soon after this friendly contest came another, who, observing the familiarity of his countrymen with the strangers, appeared much displeased, and, as the Englishmen perceived, endeavoured to dissuade them from such an intercourse. What effect his arguments had was soon after apparent, for another of Drake's companions, being desirous to show the third Indian a specimen of the English valour and dexterity, attempted likewise to shoot an arrow, but, drawing it with his full force, burst the bow-string; upon which the Indians, who were unacquainted with his other weapons, imagined him disarmed, followed the company, as they were walking negligently down towards their boat, and let fly their arrows, aiming particularly at Winter, who had the bow in his hand. He, finding himself wounded in the shoulder, endeavoured to reft his bow, and turning about, was pierced with a second arrow in the breast. Oliver, the gunner, immediately presented his piece at the insidious assailants, which failing to take fire, gave them time to level another flight of arrows, by which he was killed; nor, perhaps, had any of them escaped, surprized and perplexed as they were, had not Drake, with his usual presence of mind, animated their courage, and directed their motions, ordering them, by perpetually changing their places, to elude as much as they could, the aim of their enemies, and to defend their bodies with their targets; and instructing them, by his own example, to pick up, and break the arrows as they fell; which they did with so much diligence, that the Indians were soon in danger of being disarmed. Then Drake himself taking the gun, which Oliver had so unsuccessfully attempted to make use of, discharged it at the Indian that first began the fray and had killed the gunner, aiming it so happily, that the hail shot with which it was loaded tore open his belly, and forced him to such terrible outcries, that the Indians, though their numbers increased, and many of their countrymen showed themselves from different parts of the adjoining wood,

were too much terrified to renew the assault, and suffered Drake, without molestation to withdraw his wounded friend, who, being hurt in his lungs, languished two days, and then dying, was interred with his companion, with the usual ceremony of a military funeral.

They stayed here two months afterwards, without receiving any other injuries from the natives, who, finding the danger to which they exposed themselves by open hostilities, and not being able any more to surprise the vigilance of Drake, preferred their safety to revenge.

But Drake had other enemies to conquer or escape, far more formidable than these barbarians, and insidious practices to obviate, more artful and dangerous than the ambushes of the Indians; for in this place was laid open a design formed by one of the gentlemen of the fleet, not only to defeat the voyage, but to murder the general.

This transaction is related in so obscure and confused a manner, that it is difficult to form any judgment upon it. The writer, who gives the largest account of it, has suppressed the name of the criminal, which we learn, from a more succinct narrative, published in a collection of travels near that time, to have been Thomas Doughtie. What were his inducements to attempt the destruction of his leader, and the ruin of the expedition, or what were his views if his design had succeeded, what measures he had hitherto taken, whom he had endeavoured to corrupt, with what arts, or what success, we are no where told.

The plot, as the narrative assures us, was laid before their departure from England, and discovered, in its whole extent, to Drake himself, in his garden at Plymouth, who, nevertheless, not only entertained the person so accused as one of his company, but, this writer very particularly relates, treated him with remarkable kindness and regard, setting him always at his own table, and lodging him in the same cabin with himself. Nor did he ever discover the least suspicion of his intentions, till they arrived at this place, but appeared, by the authority with which he invested him, to consider him, as one to whom, in his absence, he could most securely entrust the direction of his affairs. At length, in this remote corner of the world, he found out a design formed against his life, called together all his officers, laid before them the evidence on which he grounded the accusation; and summoned the criminal, who, full of all the horrors of guilt, and confounded at so clear a detection of his whole scheme, immediately confessed his crimes, and acknowledged himself unworthy of longer life: upon which the whole assembly, consisting of thirty persons, after having considered the affair with the attention which it required, and heard all that could be urged in extenuation of his of-

fence, unanimously signed the sentence by which he was condemned to suffer death. Drake, however, unwilling, as it seemed, to proceed to extreme severities, offered him his choice, either of being executed on the island, or set ashore on the main land, or being sent to England to be tried before the council; of which, after a day's consideration, he chose the first, alleging the improbability of persuading any to leave the expedition for the sake of transporting a criminal to England, and the danger of his future state among savages and infidels. His choice, I believe, few will approve: to be set ashore on the main land, was indeed only to be executed in a different manner; for what mercy could be expected from the natives so incensed, but the most cruel and lingering death? But why he should not rather have requested to be sent to England, it is not easy to conceive. In so long a voyage, he might have found a thousand opportunities of escaping, perhaps with the connivance of his keepers, whose resentment must probably in time have given way to compassion, or at least by their negligence, as it is easy to believe they would in times of ease and refreshment have remitted their vigilance: at least he would have gained longer life; and to make death desirable seems not one of the effects of guilt. However, he was, as it is related, obstinately deaf to all persuasions, and, adhering to his first choice after having received the communion, and dined cheerfully with the general, was executed in the afternoon with many proofs of remorse, but none of fear.

How far it is probable that Drake, after having been acquainted with this man's designs, should admit him into his fleet, and afterwards caress, respect, and trust him; or that Doughtie, who is represented as a man of eminent abilities, should engage in so long and hazardous a voyage with no other view than that of defeating it, is left to the determination of the reader. What designs he could have formed with any hope of success, or to what actions worthy of death he could have proceeded without accomplices, for none are mentioned, is equally difficult to imagine. Nor, on the other hand, though the obscurity of the account, and the remote place chosen for the discovery of this wicked project, seem to give some reason for suspicion, does there appear any temptation, from either hope, fear, or interest, that might induce Drake, or any other commander in his state, to put to death an innocent man upon false pretences.

After the execution of this man, the whole company, either convinced of the justice of the proceeding, or awed by the severity, applied themselves without any murmurs, or appearance of discontent, to the prosecution of the voyage; and, having broken up another vessel, and re-

duced the number of their ships to three, they left the port, and on August the 20th entered the Straits of Magellan, in which they struggled with contrary winds, and the various dangers to which the intricacy of that winding passage exposed them, till night, and then entered a more open sea, in which they discovered an island with a burning mountain. On the 24th they fell in with three more islands, to which Drake gave names, and, landing to take possession of them in the name of his Sovereign, found in the largest so prodigious a number of birds, that they killed three thousand of them in one day. This bird, of which they knew not the name, was somewhat less than a wild goose, without feathers, and covered with a kind of down, unable to fly or rise from the ground, but capable of running and swimming with amazing celerity; they feed on the sea, and come to land only to rest at night or lay their eggs, which they deposit in holes like those of conies.

From these islands to the South-sea, the strait becomes very crooked and narrow, so that sometimes, by the interposition of headlands, the passage seems shut up, and the voyage entirely stopped. To double these capes is very difficult, on account of the frequent alterations to be made in the course. There are, indeed, as Magellan observes, many harbours, but in most of them no bottom is to be found.

The land on both sides rises into innumerable mountains: the tops of them are encircled with clouds and vapours, which, being congealed, fall down in snow, and increase their height by hardening into ice, which is never dissolved; but the valleys are, nevertheless, green, fruitful, and pleasant.

Here Drake, finding the strait in appearance shut up, went in his boat to make farther discoveries, and, having found a passage towards the north, was returning to his ships; but curiosity soon prevailed upon him to stop, for the sake of observing a canoe or boat, with several natives of the country in it. He could not at a distance forbear admiring the form of this little vessel, which seemed inclining to a semicircle, the stern and prow standing up, and the body sinking inward: but much greater was his wonder, when, upon a nearer inspection, he found it made only of the barks of trees sewed together with thongs of seal-skin, so artificially that scarcely any water entered the seams. The people were well shaped and painted, like those which have been already described. On the land they had a hut built with poles and covered with skins, in which they had water-vessels and other utensils, made likewise of the barks of trees.

Among these people they had an opportunity of remarking, what is frequently observable in savage countries, how natural sagacity, and unwearied industry may supply the want of such

manufactures, or natural productions, as appear to us absolutely necessary for the support of life. The inhabitants of these islands are wholly strangers to iron and its use, but instead of it make use of the shell of a muscle of prodigious size, found upon their coasts; this they grind upon a stone to an edge, which is so firm and solid, that neither wood nor stone is able to resist it.

September 6, they entered the great South-sea, on which no English vessel had ever been navigated before, and proposed to have directed their course towards the line, that their men, who had suffered by the severity of the climate, might recover their strength in a warmer latitude. But their designs were scarce formed before they were frustrated; for on September 7th, after an eclipse of the moon, a storm arose, so violent, that it left them little hopes of surviving it; nor was its fury so dreadful as its continuance, for it lasted with little intermission till October 28th, fifty-two days, during which time they were tossed incessantly from one part of the ocean to another, without any power of spreading their sails, or lying upon their anchors, amidst shelving shores, scattered rocks, and unknown islands, the tempest continually roaring, and the waves dashing over them.

In this storm, on the 30th of September, the *Marigold*, commanded by Captain Thomas, was separated from them. On the 7th of October, having entered a harbour, where they hoped for some intermission of their fatigues, they were in a few hours forced out to sea by a violent gust, which broke the cable, at which time they lost sight of the *Elizabeth*, the vice-admiral, whose crew, as was afterwards discovered, wearied with labour, and discouraged by the prospect of future dangers, recovered the Straits on the next day, and, returning by the same passage through which they came, sailed along the coast of *Brasil*, and on the 2d of June, in the year following, arrived at England.

From this bay, they were driven southward to fifty-five degrees, where among some islands they stayed two days, to the great refreshment of the crew; but, being again forced into the main sea, they were tossed about with perpetual expectation of perishing, till, soon after, they again came to anchor near the same place, where they found the natives, whom the continuance of the storm had probably reduced to equal distress, rowing from one island to another, and providing the necessities of life.

It is, perhaps, a just observation, that, with regard to outward circumstances, happiness and misery are equally diffused through all states of human life. In civilized countries, where regular policies have secured the necessities of life, ambition, avarice, and luxury, find the mind at leisure for their reception, and soon engage it in new pursuits; pursuits that are to be carried on

by incessant labour, and whether vain or successful, produce anxiety and contention. Among savage nations, imaginary wants find indeed no place; but their strength is exhausted by necessary toils, and their passions agitated not by contests about superiority, affluence, or precedence, but by perpetual care for the present day, and by fear of perishing for want of food.

But for such reflections as these they had no time; for, having spent three days in supplying themselves with wood and water, they were by a new storm driven to the latitude of fifty-six degrees, where they beheld the extremities of the American coast, and the confluence of the Atlantic and Southern ocean.

Here they arrived on the 28th of October, and at last were blessed with the sight of a calm sea, having for almost two months endured such a storm as no traveller has given an account of, and such as in that part of the world, though accustomed to hurricanes, they were before unacquainted with.

On the 30th of October they steered away towards the place appointed for the rendezvous of the fleet, which was in thirty degrees, and on the next day discovered two islands so well stocked with fowls, that they victualled their ships with them, and then sailed forwards along the coast of Peru till they came to thirty-seven degrees, where finding neither of their ships, nor any convenient port, they came to anchor, November the 25th, at Mucho, an island inhabited by such Indians as the cruelty of the Spanish conquerors had driven from the continent, to whom they applied for water and provisions, offering them in return such things as they imagined most likely to please them. The Indians seemed willing to traffic, and having presented them with fruits, and two fat sheep, would have showed them a place whither they should come for water.

The next morning, according to agreement, the English landed with their water-vessels, and sent two men forward towards the place appointed, who, about the middle of the way, were suddenly attacked, by the Indians, and immediately slain. Nor were the rest of the company out of danger; for behind the rocks was lodged an ambush of five hundred men, who, starting up from their retreat, discharged their arrows into the boat with such dexterity, that every one of the crew was wounded by them, the sea being then high, and hindering them from either retreating or making use of their weapons. Drake himself received an arrow under his eye, which pierced him almost to the brain, and another in his head. The danger of these wounds was much increased by the absence of their surgeon, who was in the vice-admiral, so that they had none to assist them but a boy, whose age did not admit of much experience or

skill; yet so much were they favoured by Providence, that they all recovered.

No reason could be assigned for which the Indians should attack them with so furious a spirit of malignity, but that they mistook them for Spaniards, whose cruelties might very reasonably incite them to revenge, whom they had driven by incessant persecution from their country, wasting immense tracts of land by massacre and devastation.

On the afternoon of the same day, they set sail, and on the 30th of November dropped anchor in Philips bay, where their boat having been sent out to discover the country, returned with an Indian in his canoe, whom they had intercepted. He was of a graceful stature, dressed in a white coat or gown, reaching almost to his knees, very mild, humble, and docile, such as perhaps were all the Indians, till the Spaniards taught them revenge, treachery and cruelty.

This Indian, having been kindly treated, was dismissed with presents, and informed, as far as the English could make him understand, what they chiefly wanted, and what they were willing to give in return, Drake ordering his boat to attend him in his canoe, and to set him safe on the land.

When he was ashore, he directed them to wait till his return, and meeting some of his countrymen, gave them such an account of his reception, that, within a few hours, several of them repaired with him to the boat with fowls, eggs, and a hog, and with them one of their captains, who willingly came into the boat, and desired to be conveyed by the English to their ship.

By this man Drake was informed, that no supplies were to be expected here, but that southward, in a place to which he offered to be his pilot, there was great plenty. This proposal was accepted, and on the 5th of December, under the direction of the good-natured Indian, they came to anchor in the harbour called, by the Spaniards, Valperizo, near the town of St. James of Chiuli, where they met not only with sufficient stores of provision, and with storehouses full of the wines of Chili, but with a ship called the Captain of Morial, richly laden, having together with large quantities of the same wines, some of the fine gold of Baldivia, and a great cress of gold set with emeralds.

Having spent three days in storing their ships with all kinds of provision in the utmost plenty, they departed, and landed their Indian pilot where they first received him, after having rewarded him much above his expectations or desires.

They had now little other anxiety than for their friends who had been separated from them, and whom they now determined to seek; but considering that, by entering every creek, and

harbour with their ship, they exposed themselves to unnecessary dangers, and that their boat would not contain such a number as might defend themselves against the Spaniards, they determined to station their ship at some place, where they might commodiously build a pinnace, which, being of light burden, might easily sail where the ship was in danger of being stranded, and at the same time might carry a sufficient force to resist the enemy, and afford better accommodation than could be expected in the boat.

To this end, on the 19th of December, they entered a bay near Cippo, a town inhabited by Spaniards, who, discovering them, immediately issued out to the number of a hundred horsemen, with about two hundred naked Indians running by their sides. The English observing their approach, retired to their boat without any loss, except of one man, whom no persuasions or entreaties could move to retire with the rest, and, who, therefore, was shot by the Spaniards, who, exulting at the victory, commanded the Indians to draw the dead carcass from the rock on which he fell, and in the sight of the English beheaded it, then cut off the right hand, and tore out the heart, which they carried away, having first commanded the Indians to shoot their arrows all over the body. The arrows of the Indians were made of green wood for the immediate service of the day; the Spaniards, with the fear that always harasses oppressors, forbidding them to have any weapons, when they do not want their present assistance.

Leaving this place, they soon found a harbour more secure and convenient, where they built their pinnace, in which Drake went to seek his companions, but, finding the wind contrary, he was obliged to return in two days.

Leaving this place soon after, they sailed along the coast in search of fresh water, and, landing at Turapaca, they found a Spaniard asleep, with silver bars lying by him to the value of three thousand ducats: not all the insults which they had received from his countrymen could provoke them to offer any violence to his person, and therefore they carried away his treasure, without doing him any farther harm.

Landing in another place, they found a Spaniard driving eight Peruvian sheep, which are the beasts of burden in that country, each laden with a hundred pounds weight of silver, which they seized likewise, and drove to their boats.

Further along the coast lay some Indian towns, from which the inhabitants repaired to the ship, on floats made of seal-skins, blown full of wind, two of which they fasten together, and, sitting between them, row with great swiftness, and carry considerable burdens. They very readily traded for glass and such

trifles, with which the old and the young seemed equally delighted.

Arriving at Morihorena on the 26th of January, Drake invited the Spaniards to traffic with him, which they agreed to, and supplied him with necessaries, selling to him, among other provisions, some of those sheep which have been mentioned, whose bulk is equal to that of a cow, and whose strength is such, that one of them can carry three tall men upon his back: their necks are like a camel's, and their heads like those of our sheep. They are the most useful animals of this country, not only affording excellent fleeces and wholesome flesh, but serving as carriages over rocks and mountains where no other beast can travel, for their foot is of a peculiar form, which enables them to tread firm in the most steep and slippery places.

On all this coast, the whole soil is so impregnated with silver, that five ounces may be separated from an hundred pound weight of common earth.

Still coasting, in hopes of meeting their friends, they anchored on the 7th of February before Aria, where they took two barks with about eight hundred pound weight of silver, and pursuing their course, seized another vessel laden with linens.

On the 15th of February, 1578, they arrived at Lima, and entered the harbour without resistance, though thirty ships were stationed there, of which seventeen were equipped for their voyage, and many of them are represented in the narrative as vessels of considerable force; so that their security seems to have consisted, not in their strength, but in their reputation, which had so intimidated the Spaniards, that the sight of their own superiority could not rouse them to opposition. Instances of such panic terrors are to be met with in other relations; but as they are, for the most part, quickly dissipated by reason and reflection, a wise commander will rarely found his hopes of success on them; and, perhaps, on this occasion, the Spaniards scarcely deserve a severer censure for their cowardice, than Drake for his temerity.

In one of these ships they found fifteen hundred bars of silver; in another a chest of money; and very rich lading in many of the rest, of which the Spaniards tamely suffered them to carry the most valuable part away, and would have permitted them no less peaceably to burn their ships; but Drake never made war with a spirit of cruelty or revenge, or carried hostilities further than was necessary for his own advantage or defence.

They set sail the next morning towards Panama, in quest of the Caca Fuego, a very rich ship, which had sailed fourteen days before, bound thither from Lima, which they overtook on the 1st of March, near Cape Franciscó, and,

boarding it, found not only a quantity of jewels, and twelve chests of ryals of plate, but eighty pounds weight of gold, and twenty-six tons of uncoined silver, with pieces of wrought plate to a great value. In unlading this prize they spent six days, and then dismissing the Spaniards, stood off to sea.

Being now sufficiently enriched, and having lost all hopes of finding their associates, and perhaps beginning to be infected with that desire of ease and pleasure which is the natural consequence of wealth obtained by dangers and fatigues, they began to consult about their return home, and, in pursuance of Drake's advice, resolved first to find out some convenient harbour, where they might supply themselves with wood and water, and then endeavour to discover a passage from the South sea into the Atlantic ocean; a discovery which would not only enable them to return home with less danger, and in a shorter time, but would much facilitate the navigation in those parts of the world.

For this purpose they had recourse to a port in the island of Caines, where they met with fish, wood, and fresh water, and in their course took a ship laden with silk and linen, which was the last that they met with on the coast of America.

But being desirous of storing themselves for a long course, they touched, April the 15th, at Guatulco, a Spanish island, where they supplied themselves with provisions, and seized a bushel of ryals of silver.

From Guatulco, which lies in 15 deg. 40 min. they stood out to sea, and, without approaching any land, sailed forward, till on the night following, the 3d of June, being then in the latitude of 38 degrees, they were suddenly benumbed with such cold blasts, that they were scarcely able to handle the ropes. This cold increased upon them, as they proceeded, to such a degree, that the sailors were discouraged from mounting upon the deck nor were the effects of the climate to be imputed to the warmth of the regions to which they had been lately accustomed, for the ropes were stiff with frost, and the meat could scarcely be conveyed warm to the table.

On June 17th they came to anchor in 38 deg. 30 min. when they saw the land naked, and the trees without leaves, and in a short time had opportunities of observing that the natives of that country were not less sensible of the cold than themselves: for the next day there came a man rowing in his canoe towards the ship, and at a distance from it made a long oration, with very extraordinary gesticulations, and great appearance of vehemence, and a little time afterwards made a second visit in the same manner, and then returning a third time, he presented them, after his harangue was finished, with a kind of crown of black feathers, such as their kings wear upon their heads, and a basket of rushes

filled with a particular herb, both which he fastened to a short stick, and threw into the boat; nor could he be prevailed upon to receive any thing in return, though pushed towards him upon a board; only he took up a hat which was flung into the water.

Three days afterwards, their ship, having received some damage at sea, was brought nearer to land, that the lading might be taken out. In order to which, the English, who had now learned not too negligently to commit their lives to the mercy of savage nations, raised a kind of fortification with stones, and built their tents within it. All this was not beheld by the inhabitants without the utmost astonishment, which incited them to come down in crowds to the coast, with no other view, as it appeared, than to worship the new divinities that had condescended to touch upon their country.

Drake was far from countenancing their errors, or taking advantage of their weakness to injure or molest them; and therefore, having directed them to lay aside their bows and arrows, he presented them with linen, and other necessaries, of which he showed them the use. They then returned to their habitations, about three quarters of a mile from the English camp, where they made such loud and violent outcries, that they were heard by the English, who found that they still persisted in their first notions, and were paying them their kind of melancholy adoration.

Two days afterwards they perceived the approach of a far more numerous company, who stopped at the top of a hill which overlooked the English settlement, while one of them made a long oration, at the end of which all the assembly bowed their bodies, and pronounced the syllable *Oh* with a solemn tone, as by way of confirmation of what had been said by the orator. Then the men, laying down their bows, and leaving the women and children on the top of the hill, came down towards the tents, and seemed transported in the highest degree at the kindness of the general, who received their gifts and admitted them to his presence. The women at a distance appeared seized with a kind of frenzy, such as that of old among the Pagans in some of their religious ceremonies, and in honour, as it seemed, of their guests, tore their cheeks and bosoms with their nails, and threw themselves upon the stones with their naked bodies till they were covered with blood.

These cruel rites, and mistaken honours, were by no means agreeable to Drake, whose predominant sentiments were notions of piety, and therefore, not to make that criminal in himself by his concurrence, which, perhaps, ignorance might make guiltless in them, he ordered his whole company to fall upon their knees, and, with their eyes lifted up to heaven, that the savages might observe that their worship was ad-

dressed to a Being residing there, they all joined in praying that this harmless and deluded people might be brought to the knowledge of the true religion, and the doctrines of our blessed Saviour; after which they sung psalms, a performance so pleasing to their wild audience, that in all their visits they generally first accosted them with a request that they would sing. They then returned all the presents which they had received, and retired.

Three days after this, on June 25th, 1579, our general received two ambassadors from the Hioh, or king of the country, who, intending to visit the camp, required that some token might be sent him of friendship and peace; this request was readily complied with, and soon after came the king, attended by a guard of about a hundred tall men, and preceded by an officer of state, who carried a sceptre made of black wood, adorned with chains of a kind of bone or horn, which are marks of the highest honour among them, and having two crowns, made as before, with feathers, fastened to it, with a bag of the same herb which was presented to Drake at his first arrival.

Behind him was the king himself, dressed in a coat of coney-skins, with a cawl woven with feathers upon his head, an ornament so much in estimation there, that none but the domestics of the king are allowed to wear it; his attendants followed him, adorned nearly in the same manner; and after them came the common people, with baskets plaited so artificially that they held water, in which, by way of sacrifice, they brought roots and fish.

Drake, not lulled into security, ranged his men in order of battle, and waited their approach, who coming nearer stood still while the sceptre-bearer made an oration, at the conclusion of which they again came forward to the foot of the hill, and then the sceptre-bearer began a song, which he accompanied with a dance, in both which the men joined, but the women danced without singing.

Drake now, distrusting them no longer, admitted them into his fortification, where they continued their song and dance a short time; and then both the king, and some others of the company, made long harangues, in which it appeared, by the rest of their behaviour, that they entreated him to accept of their country, and to take the government of it into his own hands; for the king, with the apparent concurrence of the rest, placed the crown upon his head, graced him with the chains and other signs of authority, and saluted him by the title of Hioh.

The kingdom thus offered, though of no farther value to him than as it furnished him with present necessities, Drake thought it not prudent to refuse; and therefore took possession of it in the name of Queen Elizabeth, not without ardent wishes that this acquisition might have

been of use to his native country, and that so mild and innocent a people might have been united to the church of Christ.

The kingdom being thus consigned, and the grand affair at an end, the common people left their king and his domestics with Drake, and dispersed themselves over the camp; and when they saw any one that pleased them by his appearance more than the rest, they tore their flesh, and vented their outcries as before, in token of reverence and admiration.

They then proceeded to show them their wounds and diseases, in hopes of a miraculous and instantaneous cure; to which the English, to benefit and undeceive them at the same time, applied such remedies as they used on the like occasions.

They were now grown confident and familiar, and came down to the camp every day repeating their ceremonies and sacrifices, till they were more fully informed how disagreeable they were to those whose favour they were so studious of obtaining; they then visited them without adoration indeed, but with a curiosity so ardent, that it left them no leisure to provide the necessaries of life, with which the English were therefore obliged to supply them.

They had then sufficient opportunity to remark the customs and dispositions of these new allies, whom they found tractable and benevolent, strong of body, far beyond the English, yet unfurnished with weapons, either for assault or defence, their bows being too weak for any thing but sport. Their dexterity in taking fish was such, that, if they saw them so near the shore that they could come to them without swimming, they never missed them.

The same curiosity that had brought them in such crowds to the shore, now induced Drake, and some of his company, to travel up into the country, which they found, at some distance from the coast, very fruitful, filled with large deer, and abounding with a peculiar kind of conies, smaller than ours, with tails like that of a rat, and paws such as those of a mole; they have bags under their chin, in which they carry provisions to their young.

The houses of the inhabitants are round holes dug in the ground, from the brink of which they raise rafters, or piles shelving towards the middle, where they all meet, and are crammed together; they lie upon rushes, with the fire in the midst, and let the smoke fly out at the door.

The men are generally naked; but the women make a kind of petticoat of bulrushes, which they comb like hemp, and throw the skin of a deer over their shoulders. They are very modest, tractable, and obedient to their husbands.

Such is the condition of this people; and not very different is, perhaps, the state of the greatest part of mankind. Whether more enlightened nations ought to look upon them with pity,

as less happy than themselves, some sceptics have made, very unnecessarily, a difficulty of determining. More, they say, is lost by the perplexities than gained by the instruction of science; we enlarge our vices with our knowledge, and multiply our wants with our attainments, and the happiness of life is better secured by the ignorance of vice than by the knowledge of virtue.

The fallacy by which such reasoners have imposed upon themselves, seems to arise from the comparison which they make, not between two men equally inclined to apply the means of happiness in their power to the end for which Providence conferred, them, but furnished in unequal proportions with the means of happiness, which is the true state of savage and polished nations, but between two men, of which he to whom Providence has been most bountiful destroys the blessings by negligence or obstinate misuse; while the other, steady, diligent, and virtuous, employs his abilities and conveniences to their proper end. The question is not, Whether a good Indian or bad Englishman be most happy? but, Which state is most desirable, supposing virtue and reason the same in both?

Nor is this the only mistake which is generally admitted in this controversy, for these reasoners frequently confound innocence with the mere incapacity of guilt. He that never saw, or heard, or thought of strong liquors, cannot be proposed as a pattern of sobriety.

This land was named, by Drake, Albion, from its white cliffs, in which it bore some resemblance to his native country; and the whole history of the resignation of it to the English was engraven on a piece of brass, then nailed on a post, and fixed up before their departure, which being now discovered by the people to be near at hand, they could not forbear perpetual lamentations. When the English on the 23d of July weighed anchor, they saw them climbing to the tops of hills, that they might keep them in sight, and observed fires lighted up in many parts of the country, on which, as they supposed, sacrifices were offered.

Near this harbour they touched at some islands, where they found great numbers of seals; and, despairing now to find any passage through the northern parts, he, after a general consultation, determined to steer away to the Moluccas, and setting sail July 25th, he sailed for sixty-eight days without sight of land; and on September 30th arrived within view of some islands, situate about eight degrees northward from the line, from whence the inhabitants resorted to them in canoes, hollowed out of the solid trunk of a tree, and raised at both ends so high above the water, that they seemed almost a semicircle; they were burnished in such a manner that they shone like ebony, and were

kept steady by a piece of timber, fixed on each side of them, with strong canes, that were fastened at one end to the boat, and at the other to the end of the timber.

The first company that came brought fruits, potatoes, and other things of no great value, with an appearance of traffic, and exchanged their lading for other commodities, with great show of honesty and friendship; but having, as they imagined, laid all suspicion asleep, they soon sent another fleet of canoes, of which the crews behaved with all the insolence of tyrants, and all the rapacity of thieves; for, whatever was suffered to come into their hands, they seemed to consider as their own, and would neither pay for it nor restore it; and at length, finding the English resolved to admit them no longer, they discharged a shower of stones from their boats, which insult Drake prudently and generously returned by ordering a piece of ordnance to be fired without hurting them, at which they were so terrified, that they leaped into the water, and hid themselves under the canoes.

Having for some time but little wind, they did not arrive at the Moluccas till the 3d of November, and then, designing to touch at Tidore, they were visited, as they sailed by a little island belonging to the king of Ternate, by the viceroy of the place, who informed them, that it would be more advantageous for them to have recourse to his master for supplies and assistance than to the king of Tidore who was in some degree dependant on the Portuguese, and that he would himself carry the news of their arrival, and prepare their reception.

Drake was by the arguments of the viceroy prevailed upon to alter his resolution, and, on November 5th, cast anchor before Ternate; and scarce was he arrived, before the viceroy, with others of the chief nobles, came out in three large boats, rowed by forty men on each side, to conduct the ship into a safe harbour, and soon after the king himself, having received a velvet cloak by a messenger from Drake, as a token of peace, came with such a retinue and dignity of appearance as was not expected in those remote parts of the world. He was received with discharges of cannons and every kind of music, with which he was so much delighted, that, desiring the musicians to come down into the boat, he was towed along in it at the stern of the ship.

The king was of a graceful stature, and regal carriage, of a mild aspect, and low voice; his attendants were dressed in white cotton or calico, of whom some, whose age gave them a venerable appearance, seemed his counsellors, and the rest officers or nobles; his guards were not ignorant of fire-arms, but had not many among them, being equipped for the most part with bows and darts.

The king, having spent some time in admiring the multitude of new objects that presented themselves, retired as soon as the ship was brought to anchor, and promised to return on the day following; and in the mean time the inhabitants, having leave to traffic, brought down provisions in great abundance.

At the time when the king was expected, his brother came aboard, to request of Drake that he would come to the castle, proposing to stay himself as a hostage for his return. Drake refused to go, but sent some gentlemen, detaining the king's brother in the mean time.

These gentlemen were received by another of the king's brothers, who conducted them to the council-house near the castle, in which they were directed to walk: there they found three-score old men, privy counsellors to the king, and on each side of the door without stood four old men of foreign countries, who served as interpreters in commerce.

In a short time the king came from the castle, dressed in cloth of gold, with his hair woven into gold rings, a chain of gold upon his neck, and on his hands rings very artificially set with diamonds and jewels of great value; over his head was borne a rich canopy: and by his chair of state, on which he sat down when he had entered the house, stood a page with a fan set with sapphires, to moderate the excess of the heat. Here he received the compliments of the English, and then honourably dismissed them.

The castle, which they had some opportunity of observing, seemed of no great force; it was built by the Portuguese, who, attempting to reduce this kingdom into an absolute subjection, murdered the king, and intended to pursue their scheme by the destruction of all his sons; but the general abhorrence, which cruelty and perfidy naturally excite, armed all the nation against them, and procured their total expulsion from all the dominions of Ternate, which, from that time increasing in power, continued to make new conquests, and to deprive them of other acquisitions.

While they lay before Ternate, a gentleman came on board attended by his interpreter. He was dressed somewhat in the European manner, and soon distinguished himself from the natives of Ternate, or any other country that they had seen, by civility and apprehension. Such a visitant may easily be imagined to excite their curiosity, which he gratified by informing them that he was a native of China, of the family of the king then reigning; and that being accused of a capital crime, of which, though he was innocent, he had not evidence to clear himself, he had petitioned the king that he might not be exposed to a trial, but that his cause might be referred to Divine Providence, and that he might be allowed to leave his country, with a prohibition

against returning, unless Heaven, in attestation of his innocence, should enable him to bring back to the king some intelligence that might be to the honour and advantage of the empire of China. In search of such information he had now spent three years, and had left Tidore for the sake of conversing with the English general, from whom he hoped to receive such accounts as would enable him to return with honour and safety.

Drake willingly recounted all his adventures and observations, to which the Chinese exile listened with the utmost attention and delight, and, having fixed them in his mind, thanked God for the knowledge he had gained. He then proposed to the English general to conduct him to China, recounting, by way of invitation, the wealth, extent, and felicity of that empire; but Drake could not be induced to prolong his voyage.

He therefore set sail on the 9th of November in quest of some convenient harbour, in a desert island, to refit his ship, not being willing, as it seems, to trust the generosity of the king of Ternate. Five days afterwards he found a very commodious harbour in an island overgrown with wood, where he repaired his vessel and refreshed his men without danger or interruption.

Leaving this place the 12th of December, they sailed towards the Celebes; but, having a wind not very favourable, they were detained among a multitude of islands, mingled with dangerous shallows, till January 9th, 1580. When they thought themselves clear, and were sailing forwards with a strong gale, they were at the beginning of the night surprised in their course by a sudden shock, of which the cause was easily discovered, for they were thrown upon a shoal, and by the speed of their course fixed too fast for any hope of escaping. Here even the intrepidity of Drake was shaken, and his dexterity baffled; but his piety, however, remained still the same, and what he could not now promise himself from his own ability, he hoped from the assistance of Providence. The pump was plied, and the ship found free from new leaks.

The next attempt was to discover towards the sea some place where they might fix their boat, and from thence drag the ship into deep water; but upon examination it appeared that the rock, on which they had struck, rose perpendicularly from the water, and that there was no anchorage, nor any bottom to be found a boat's length from the ship. But this discovery, with its consequences, was by Drake wisely concealed from the common sailors, lest they should abandon themselves to despair, for which there was, indeed, cause; there being no prospect left but that they must there sink with the ship, which must undoubtedly be soon dashed to pieces, or perish in attempting to reach the shore in their

boat, or be cut in pieces by barbarians if they should arrive at land.

In the midst of this perplexity and distress, Drake directed that the sacrament should be administered, and his men fortified with all the consolation which religion affords; then persuaded them to lighten the vessel by throwing into the sea part of their lading, which was cheerfully complied with, but without effect. At length, when their hopes had forsaken them, and no new struggles could be made, they were on a sudden relieved by a remission of the wind, which, having hitherto blown strongly against the side of the ship which lay towards the sea, held it upright against the rock; but when the blast slackened (being then low water) the ship lying higher with that part which rested on the rock than with the other, and, being borne up no longer by the wind, reeled into the deep water, to the surprise and joy of Drake and his companions.

This was the greatest and most inextricable distress which they had ever suffered, and made such an impression upon their minds, that for some time afterwards they durst not adventure to spread their sails, but went slowly forward with the utmost circumspection.

They thus continued their course without any observable occurrence, till on the 11th of March they came to an anchor before the island of Java, and, sending to the king a present of cloth and silks, received from him, in return, a large quantity of provisions; and the day following Drake went himself on shore, and entertained the king with his music, and obtained leave to store his ship with provisions.

The island is governed by a great number of petty kings, or *rajas*, subordinate to one chief; of these princes three came on board together a few days after their arrival; and, having upon their return recounted the wonders which they had seen, and the civility with which they had been treated, incited others to satisfy their curiosity in the same manner; and *raja* Donan, the chief king, came himself to view the ship with the warlike armaments and instruments of navigation.

This intercourse of civilities somewhat retarded the business for which they came; but at length they not only victualled their ship, but cleansed the bottom, which, in the long course, was overgrown with a kind of shell-fish that impeded her passage.

Leaving Java on March 26, they sailed homewards by the Cape of Good Hope, which they saw on June the 5th, on the 15th of August passed the Tropic; and on the 26th of September arrived at Plymouth, where they found that, by passing through so many different climates, they had lost a day in their account of time, it being Sunday by their Journal, but Monday by the general computation.

In this hazardous voyage they had spent two years, ten months, and some odd days; but were recompensed for their toils by great riches, and the universal applause of their countrymen. Drake afterwards brought his ship up to Deptford, where Queen Elizabeth visited him on board his ship, and conferred the honour of knighthood upon him; an honour in that illustrious reign not made cheap by prostitution, nor even bestowed without uncommon merit.

It is not necessary to give an account equally particular of the remaining part of his life, as he was no longer a private man, but engaged in public affairs, and associated in his expeditions with other generals, whose attempts, and the success of them, are related in the histories of those times.

In 1585, on the 12th of September, Sir Francis Drake set sail from Plymouth with a fleet of five and twenty ships and pinnaces, of which himself was admiral, Captain Martin Forbisher vice-admiral, and Captain Francis Knollis rear-admiral; they were fitted out to cruise upon the Spaniards; and, having touched at the isle of Bayonne, and plundered Vigo, put to sea again, and on the 16th of November arrived before St. Jago, which they entered without resistance, and rested there fourteen days, visiting in the mean time San Domingo, a town within the land, which they found likewise deserted; and, carrying off what they pleased of the produce of the island, they at their departure destroyed the town and villages, in revenge of the murder of one of their boys, whose body they found mangled in a most inhuman manner.

From this island they pursued their voyage to the West Indies, determining to attack St. Domingo, in Hispaniola, as the richest place in that part of the world: they therefore landed a thousand men, and with small loss entered the town, of which they kept possession for a month without interruption or alarm; during which time a remarkable accident happened, which deserves to be related.

Drake, having some intention of treating with the Spaniards, sent to them a negro-boy with a flag of truce, which one of the Spaniards so little regarded, that he stabbed him through the body with a lance. The boy, notwithstanding his wound, came back to the general, related the treatment which he had found, and died in his sight. Drake was so incensed at this outrage, that he ordered two friars, then his prisoners, to be conveyed with a guard to the place where the crime was committed, and hanged up in the sight of the Spaniards, declaring that two Spanish prisoners should undergo the same death every day till the offender should be delivered up by them: they were too well acquainted with the character of Drake not to bring him on the day following, when, to impress the shame of such actions more effectually upon them, he compelled

them to execute him with their own hands. Of this town, at their departure, they demolished part, and admitted the rest to be ransomed for five and twenty thousand ducats.

From thence they sailed to Carthage, where the enemy having received intelligence of the fate of St. Domingo, had strengthened their fortifications, and prepared to defend themselves with great obstinacy; but the English, landing in the night, came upon them by a way which they did not suspect, and being better armed, partly by surprise, and partly by superiority of order and valour, became masters of the place, where they stayed without fear or danger six weeks, and at their departure received a hundred and ten thousand ducats for the ransom of the town.

They afterwards took St. Augustin, and touching at Virginia, took on board the governor, Mr. Lane, with the English that had been left there the year before by Sir Walter Raleigh, and arrived at Portsmouth on July 28th, 1586, having lost in the voyage seven hundred and fifty men. The gain of this expedition amounted to sixty thousand pounds, of which forty were the share of the adventurers who fitted out the ships, and the rest, distributed among the several

crews, amounted to six pounds each man. So cheaply is life sometimes hazarded.

The transactions against the Armada, 1588, are in themselves far more memorable, but less necessary to be recited in this succinct narrative; only let it be remembered, that the post of vice-admiral of England, to which Sir Francis Drake was then raised, is a sufficient proof, that no obscurity of birth, or meanness of fortune, is unsurmountable to bravery and diligence.

In 1595, Sir Francis Drake and Sir John Hawkins were sent with a fleet to the West Indies, which expedition was only memorable for the destruction of Nombre de Dios, and the death of the two commanders, of whom Sir Francis Drake died January 9, 1597, and was thrown into the sea in a leaden coffin, with all the pomp of naval obsequies. It is reported by some that the ill success of this voyage hastened his death. Upon what this conjecture is grounded does not appear; and we may be allowed to hope, for the honour of so great a man, that it is without foundation; and that he, whom no series of success could ever betray to vanity or negligence, could have supported a change of fortune without impatience or dejection.

## BARRETIER.\*

HAVING not been able to procure materials for a complete life of Mr. Barretier, and being nevertheless willing to gratify the curiosity justly raised in the public by his uncommon attainments, we think the following extracts of letters, written by his father, proper to be inserted in our collection, as they contain many remarkable passages, and exhibit a general view of his genius and learning.

JOHN PHILIP BARRETIER was born at Schwabach, January 19, 1720-21. His father was a Calvinist minister of that place, who took upon himself the care of his education. What arts of instruction he used, or by what method he regulated the studies of his son, we are not able to inform the public; but take this opportunity of intreating those, who have received more complete intelligence, not to deny mankind so

great a benefit as the improvement of education. If Mr. Le Fevre thought the method in which he taught his children worthy to be communicated to the learned world, how justly may Mr. Barretier claim the universal attention of mankind to a scheme of education that has produced such a stupendous progress! The authors, who have endeavoured to teach certain and unfailing rules for obtaining a long life, however they have failed in their attempts, are universally confessed to have, at least, the merit of a great and noble design, and to have deserved gratitude and honour. How much more then is due to Mr. Barretier, who has succeeded in what they have only attempted? for to prolong life, and improve it, are nearly the same. If to have all that riches can purchase, is to be rich; if to do all that can be done in a long time, is to live long; he is equally a benefactor to mankind, who teaches them to protract the duration, or shorten the business of life.

That there are few things more worthy our curiosity than this method, by which the father

\* This account was first published in the Gent. Mag. for 1740, 1741, 1742.

assisted the genius of the son, every man will be convinced, that considers the early proficiency at which it enabled him to arrive; such a proficiency as no one has yet reached at the same age, and to which it is therefore probable that every advantageous circumstance concurred.

*At the age of nine years, he not only was master of five languages,* an attainment in itself almost incredible, but understood, says his father, the holy writers, better in their original tongues than in his own. If he means by this assertion, that he knew the sense of many passages in the original, which were obscure in the translation, the account, however wonderful, may be admitted; but if he intends to tell his correspondent, that his son was better acquainted with the two languages of the Bible than with his own, he must be allowed to speak hyperbolically, or to admit that his son had somewhat neglected the study of his native language; or we must own, that the fondness of a parent has transported him into some natural exaggerations.

Part of this letter I am tempted to suppress, being unwilling to demand the belief of others to that which appears incredible to myself; but as my incredulity may, perhaps, be the product rather of prejudice than reason, as envy may beget a disinclination to admit so immense a superiority, and as an account is not to be immediately censured as false, merely because it is wonderful, I shall proceed to give the rest of his father's relation, from his letter of the 3d of March, 1729-30. He speaks, continues he, German, Latin, and French, equally well. He can, by laying before him a translation, read any of the books of the Old or New Testament in its original language, without hesitation or perplexity. *He is no stranger to biblical criticism* or philosophy, nor unacquainted with ancient and modern geography, and is qualified to support a conversation with learned men, who frequently visit and correspond with him.

In his eleventh year, he not only published a learned letter in Latin, but translated the travels of Rabbi Benjamin from the Hebrew into French, which he illustrated with notes, and accompanied with dissertations; a work in which his father as he himself declares, could give him little assistance, as he did not understand the rabbinical dialect.

The reason for which his father engaged him in this work, was only to prevail upon him to write a fairer hand than he had hitherto accustomed himself to do, by giving him hopes, that, if he should translate some little author, and offer a fair copy of his version to some bookseller, he might in return for it, have other books which he wanted and could not afford to purchase.

Incited by this expectation, he fixed upon the "Travels of Rabbi Benjamin," as most proper

for his purpose, being a book neither bulky nor common, and in one month completed his translation, applying only one or two hours a-day to that particular task. In another month he drew up the principal notes; and, in the third, wrote some dissertations upon particular passages, which seemed to require a larger examination.

These notes contain so many curious remarks and inquiries, out of the common road of learning, and afford so many instances of penetration, judgment, and accuracy, that the reader finds in every page some reason to persuade him that they cannot possibly be the work of a child, but of a man long accustomed to these studies, enlightened by reflection, and dexterous by long practice in the use of books. Yet, that it is the performance of a boy thus young, is not only proved by the testimony of his father, but by the concurrent evidence of Mr. Le Maitre, his associate in the church of Schwabach, who not only asserts his claim to this work, but affirms that he heard him at six years of age explain the Hebrew text as if it had been his native language; so that the fact is not to be doubted without a degree of incredulity, which it will not be very easy to defend.

This copy was, however, far from being written with the neatness which his father desired; nor did the booksellers, to whom it was offered, make proposals very agreeable to the expectations of the young translator; but after having examined the performance in their manner, and determined to print it upon conditions not very advantageous, returned it to Le transcribed, that the printers might not be embarrassed with a copy so difficult to read.

Barretier was now advanced to the latter end of his twelfth year, and had made great advances in his studies, notwithstanding an obstinate tumour in his left hand, which gave him great pain, and obliged him to a tedious and troublesome method of cure; and reading over his performance, was so far from contenting himself with barely transcribing it, that he altered the greatest part of the notes, new-modelled the dissertations, and augmented the book to twice its former bulk.

The few touches which his father bestowed upon the revival of the book, though they are minutely set down by him in the preface, are so inconsiderable that it is not necessary to mention them; and it may be much more agreeable, as well as useful, to exhibit the short account which he there gives of the method by which he enabled his son to show so early how easy an attainment is the knowledge of the languages, a knowledge which some men spend their lives in cultivating, to the neglect of more valuable studies, and which they seem to regard as the highest perfection of human nature.

What applauses are due to an old age, wasted

In a scrupulous attention to particular accents and etymologies, may appear, says his father, by seeing how little time is required to arrive at such an eminence in these studies as many even of these venerable doctors have not attained, for want of rational methods and regular application.

This censure is doubtless just upon those who spend too much of their lives upon useless niceties, or who appear to labour without making any progress; but as the knowledge of language is necessary, and a minute accuracy sometimes requisite, they are by no means to be blamed, who, in compliance with the particular bent of their own minds, make the difficulties of dead languages their chief study, and arrive at excellence proportionate to their application, since it was to the labour of such men that his son was indebted for his own learning.

The first languages which Barretier learned were the French, German, and Latin, which he was taught not in the common way by a multitude of definitions, rules, and exceptions, which fatigue the attention and burden the memory, without any use proportionate to the time which they require, and the disgust which they create. The method by which he was instructed was easy and expeditious, and therefore pleasing. He learned them all in the same manner, and almost at the same time, by conversing in them indifferently with his father.

The other languages, of which he was master, he learned by a method yet more uncommon. The only book which he made use of was the Bible, which his father laid before him in the language that he then proposed to learn, accompanied with a translation, being taught by degrees the inflections of nouns and verbs. This method, says his father, made the Latin more familiar to him in his fourth year than any other language.

When he was near the end of his sixth year, he entered upon the study of the Old Testament in its original language, beginning with the book of Genesis, to which his father confined him for six months; after which he read cursorily over the rest of the historical books, in which he found very little difficulty, and then applied himself to the study of the poetical writers, and the prophets, which he read over so often, with so close an attention and so happy a memory, that he could not only translate them without a moment's hesitation into Latin or French, but turn with the same facility the translations into the original language in his tenth year.

Growing at length weary of being confined to a book which he could almost entirely repeat, he deviated by stealth into other studies, and, as his translation of Benjamin is a sufficient evidence, he read a multitude of writers of various kinds. *In his twelfth year he applied more*

*particularly to the study of the fathers, and councils of the six first centuries, and began to make a regular collection of their canons. He read every author in the original, having discovered so much negligence or ignorance in most translations, that he paid no regard to their authority.*

Thus he continued his studies, neither drawn aside by pleasures nor discouraged by difficulties. The greatest obstacle to his improvement was want of books, with which his narrow fortune could not liberally supply him; so that he was obliged to borrow the greatest part of those which his studies required, and to return them when he had read them, without being able to consult them occasionally, or to recur to them when his memory should fail him.

It is observable, that neither his diligence, unintermitted as it was, nor his want of books, a want of which he was in the highest degree sensible, ever produced in him that asperity, which a long and recluse life, without any circumstance of disquiet frequently creates. He was always gay, lively, and facetious, a temper which contributed much to recommend his learning, and which some students much superior in age would consult their ease, their reputation, and their interest, by copying from him.

In the year 1735, he published *Anti-Artemonius, sive Initium Evangelii S. Joannis, adversus Artemonium vindicatum*, and attained such a degree of reputation, that not only the public, but *princes, who are commonly the last by whom merit is distinguished*, began to interest themselves in his success, for the same year the king of Prussia, who had heard of his early advances in literature, on account of a scheme for discovering the longitude, which had been sent to the Royal Society of Berlin, and which was transmitted afterwards by him to Paris and London, engaged to take care of his fortune, having received further proofs of his abilities at his own court.

Mr. Barretier, being promoted to the cure of the church of Stetin, was obliged to travel with his son thither from Schwabach, through Leipzig and Berlin, a journey very agreeable to his son, as it would furnish him with new opportunities of improving his knowledge, and extending his acquaintance among men of letters. For this purpose they stayed some time at Leipzig, and then travelled to Hall, where young Barretier so distinguished himself in his conversation with the professors of the university, that they offered him his degree of doctor in philosophy, a dignity correspondent to that of master of arts among us. Barretier drew up that night some positions in philosophy, and the mathematics, which he sent immediately to the press, and defended the next day in a crowded auditory, with so much wit, spirit, presence of thought, and strength of reason, that the whole university was delighted and amazed; he was

then admitted to his degree, and attended by the whole concourse to his lodgings, with compliments and acclamations.

His *Theses* or philosophical positions, which he printed in compliance with the practice of that university, ran through several editions in a few weeks, and no testimony of regard was wanting that could contribute to animate him in his progress.

When they arrived at Berlin, the king ordered him to be brought into his presence, and was so much pleased with his conversation, that he sent for him almost every day during his stay at Berlin; and diverted himself with engaging him in conversations upon a multitude of subjects, and in disputes with learned men; on all which occasions he acquitted himself so happily, that the king formed the highest ideas of his capacity, and future eminence. And thinking, perhaps with reason, that active life was the noblest sphere of a great genius, he recommended to him the study of modern history, the customs of nations, and those parts of learning, that are of use in public transactions and civil employments, declaring that such abilities properly cultivated might exalt him, in ten years, to be the greatest minister of state in Europe. Barretier, whether we attribute it to his moderation or inexperience, was not dazzled by the prospect of such high promotion, but answered, that *he was too much pleased with science and quiet*, to leave them for such inextricable studies, or such harassing fatigues. A resolution so displeasing to the king, that his father attributes to it the delay of those favours which they had hopes of receiving, the king having, as he observes, determined to employ him in the ministry.

It is not impossible that paternal affection might suggest to Mr. Barretier some false conceptions of the king's design; for he infers from the introduction of his son to the young princes, and the caresses which he received from them, that the king intended him for their preceptor; a scheme, says he, which some other resolution happily destroyed.

Whatever was originally intended, and by whatever means these intentions were frustrated; Barretier, after having been treated with the highest regard, by the whole royal family, was dismissed with a present of two hundred crowns; and his father, instead of being fixed at Stetin, was made pastor of the French church at Hall; a place more commodious for study, to which they retired; Barretier being first admitted into the Royal Society at Berlin, and recommended by the king to the university at Hall.

*At Hall he continued his studies with his usual application and success, and, either by his own reflections or the persuasions of his father, was prevailed upon to give up his own inclinations to those of the king and direct his inquiries to*

those subjects that had been recommended by him.

He continued to add new acquisitions to his learning, and to increase his reputation by new performances, till, in the beginning of his nineteenth year, his health began to decline, and his indisposition, which, being not alarming or violent, was perhaps not at first sufficiently regarded, increased by slow degrees for eighteen months, during which he spent days among his books, and neither neglected his studies, nor left his gayety, till his distemper, ten days before his death, deprived him of the use of his limbs: he then prepared himself for his end, without fear or emotion, and on the 5th of October, 1740, resigned his soul into the hands of his Saviour, with *confidence and tranquillity*.

*In the Magazine for 1742, appeared the following*  
 ADDITIONAL ACCOUNT of the LIFE OF JOHN  
 PHILIP BARRETIER.\*

"As the nature of our Collections requires that our accounts of remarkable persons and transactions should be early, our readers must necessarily pardon us, if they are often not complete, and allow us to be sufficiently studious of their satisfaction, if we correct our errors, and supply our defects from subsequent intelligence, where the importance of the subject merits an extraordinary attention, or when we have any peculiar opportunities of procuring information. The particulars here inserted we thought proper to annex by way of note to the following passages, quoted from the Magazine for Dec. 1740, and for Feb. 1741."

P. 152. *At the age of nine years he not only was master of five languages.*

French, which was the native language of his mother, was that which he learned first, mixed, by living in Germany, with some words of the language of the country. After some time his father took care to introduce in his conversation with him, some words of Latin, in such a manner that he might discover the meaning of them by the connection of the sentence, or the occasion on which they were used, without discovering that he had any intention of instructing him, or that any new attainment was proposed.

By this method of conversation, in which new words were every day introduced, his ear had been somewhat accustomed to the inflections and variations of the Latin tongue, he began to attempt to speak like his father, and was in a short time drawn on by imperceptible degrees to speak Latin, intermixed with other languages.

---

\* The passages referred to in the preceding pages are printed in Italics.

Thus, when he was but four years old, he spoke every day French to his mother, Latin to his father, and High Dutch to the maid, without any perplexity to himself, or any confusion of one language with another.

P. 152. *He is no stranger to biblical criticism.*

Having now gained such a degree of skill in the Hebrew language as to be able to compose in it both in prose and verse, he was extremely desirous of reading the Rabbins; and having borrowed of the neighbouring clergy, and the Jews of Schwabach, all the books which they could supply him, he prevailed on his father to buy him the great Rabbinical Bible, published at Amsterdam in four tomes, folio, 1728, and read it with that accuracy and attention which appears by the account of it written by him to his favourite, M. Le Maitre, inserted in the beginning of the 26th volume of the *Bibliothèque Germanique*.

These writers were read by him, as other young persons peruse romances or novels, only from a puerile desire of amusement; for he had so little veneration for them, even while he studied them with most eagerness, that he often diverted his parents with recounting their fables and chimeras.

P. 153. *In his twelfth year he applied more particularly to the study of the Fathers.*

His father being somewhat uneasy to observe so much time spent by him on Rabbinical trifles, thought it necessary now to recal him to the study of the Greek language, which he had of late neglected, but to which he returned with so much ardour, that in a short time he was able to read Greek with the same facility as French or Latin.

He then engaged in the perusal of the Greek fathers, and councils of the first three or four centuries: and undertook, at his father's desire, to confute a treatise of Samuel Crellius, in which, under the name of Artemonius, he has endeavoured to substitute, in the beginning of St. John's gospel, a reading different from that which is at present received, and less favourable to the orthodox doctrine of the divinity of our Saviour.

This task was undertaken by Barretier with great ardour, and prosecuted by him with suitable application, for he not only drew up a formal confutation of Artemonius, but made large collections from the earliest writers, relating to the history of heresies which he proposed at first to have published as preliminaries to his book, but, finding the introduction grew at last to a greater bulk than the book itself, he determined to publish it apart.

While he was engrossed by these inquiries, accident threw a pair of globes into his hands in October, 1734, by which his curiosity was so much exalted, that he laid aside his Artemo-

nus, and applied himself to geography and astronomy. In ten days he was able to solve all the problems in the doctrine of the globes, and had attained ideas so clear and strong of all the systems, as well ancient as modern, that he began to think of making new discoveries; and for that purpose, laying aside for a time all searches into antiquity, he employed his utmost interest to procure books of astronomy and of mathematics, and made such a progress in three or four months, that he seemed to have spent his whole life upon that study; for he not only made an astrolabe, and drew up astronomical tables but invented new methods of calculation, or such at least as appeared new to him because they were not mentioned in the books which he had then an opportunity of reading, and it is a sufficient proof both of the rapidity of his progress, and the extent of his views, that in three months after his first sight of a pair of globes, he formed schemes for finding the longitude, which he sent, in Jan. 1735, to the Royal Society at London.

His scheme being recommended to the Society by the Queen, was considered by them with a degree of attention which, perhaps would not have been bestowed upon the attempt of a mathematician so young, had he not been dignified with so illustrious a patronage. But it was soon found, that for want of books he had imagined himself the inventor of methods already in common use, and that he proposed no means of discovering the longitude, but such as had been already tried and found insufficient. Such will be very frequently the fate of those whose fortune either condemns them to study without the necessary assistance from libraries, or who in too much haste publish their discoveries.

This attempt exhibited, however, such a specimen of his capacity for mathematical learning, and such a proof of an early proficiency, that the Royal Society of Berlin admitted him as one of their members, in 1735.

P. 153. *Princes, who are commonly the last.*

Barretier had been distinguished much more early by the Margravine of Anspach, who, in 1726, sent for his father and mother to the court, where their son, whom they carried with them, presented her with a letter in French, and addressed another in Latin to the young prince; who afterwards, in 1734, granted him the privilege of borrowing books from the libraries of Anspach, together with an annual pension of fifty florins, which he enjoyed for four years.

In this place it may not be improper to recount some honours conferred upon him, which, if distinctions are to be rated by the knowledge of those who bestow them, may be considered as more valuable than those which he received from princes.

In June 1731, he was initiated in the university of Altdorf, and at the end of the year 1732, the synod of the reformed churches, held at Christian Erlang, admitted him to be present at their consultations, and to preserve the memory of so extraordinary a transaction, as the reception of a boy of eleven years into an ecclesiastical council, recorded it in a particular article of the acts of the synod.

P. 154. *He was too much pleased with science and quiet.*

Astronomy was always Barretier's favourite study, and so much engrossed his thoughts, that he did not willingly converse on any other subject; nor was he so well pleased with the civilities of the greatest persons, as with the conversation of the mathematicians. An astronomical observation was sufficient to withhold him from court, or to call him away abruptly from the most illustrious assemblies; nor was there any hope of enjoying his company without inviting some professor to keep him in temper, and engage him in discourse; nor was it possible, without this expedient, to prevail upon him to sit for his picture.

P. 154. *At Hall he continued his studies.*

Mr. Barretier returned, on the 28th of April, 1735, to Hall, where he continued the remaining part of his life, of which it may not be improper to give a more particular account.

At his settlement in the university he determined to exert his privileges as master of arts, and to read public lectures to the students; a design from which his father could not dissuade him, though he did not approve it; so certainly do honours or preferments, too soon conferred, infatuate the greatest capacities. He published an invitation to three lectures, one critical on the book of Job, another on astronomy, and a third upon ancient ecclesiastical history. But, of this employment he was soon made weary by the petulance of his auditors, the fatigue which it occasioned, and the interruption of his studies which it produced, and therefore, in a fortnight, he desisted wholly from his lectures, and never afterwards resumed them.

He then applied himself to the study of the law, almost against his own inclination, which, however, he conquered so far as to become a regular attendant on the lectures on that science, but spent all his other time upon different studies.

The first year of his residence at Hall was spent upon natural philosophy and mathematics; and scarcely any author, ancient or modern, that has treated on those parts of learning was neglected by him, nor was he satisfied with the knowledge of what had been discovered by others, but made new observations, and drew up immense calculations for his own use.

He then returned to ecclesiastical history, and

began to retouch his "Account of Heresies," which he had begun at Schwabach: on this occasion he read the primitive writers with great accuracy, and formed a project of regulating the chronology of those ages; which produced a "Chronological Dissertation on the succession of the Bishops of Rome, from St. Peter to Victor," printed in Latin at Utrecht, 1740.

He afterwards was wholly absorbed in application to polite literature, and read not only a multitude of writers in the Greek and Latin, but in the German, Dutch, French, Italian, English, and Arabic languages, and in the last year of his life he was engrossed by the study of inscriptions, medals, and antiquities of all nations.

In 1737, he resumed his design of finding a certain method of discovering the longitude, which he imagined himself to have attained by exact observations of the declination and inclination of the needle, and sent to the Academy of Sciences, and to the Royal Society of London, at the same time, an account of his schemes; to which it was first answered by the Royal Society, that it appeared the same with one which Mr. Whiston had laid before them; and afterwards by the Academy of Sciences, that his method was but very little different from one that had been proposed by M. de la Croix, and which was ingenious but ineffectual.

Mr. Barretier, finding his invention already in the possession of two men eminent for mathematical knowledge, desisted from all inquiries after the longitude, and engaged in an examination of the Egyptian antiquities, which he proposed to free from their present obscurity, by decyphering the hieroglyphics, and explaining their astronomy; but this design was interrupted by his death.

P. 154. *Confidence and tranquillity.*

Thus died Barretier, in the 20th year of his age, having given a proof how much may be performed in so short a time by indefatigable diligence. He was not only master of many languages, but skilled almost in every science, and capable of distinguishing himself in every profession except that of physic, from which he had been discouraged by remarking the diversity of opinions among those who had been consulted concerning his own disorders.

His learning, however vast, had not depressed or overburdened his natural faculties, for his genius always appeared predominant; and when he inquired into the various opinions of the writers of all ages, he reasoned and determined for himself, having a mind at once comprehensive and delicate, active and attentive. He was able to reason with the metaphysicians on the most abstruse questions, or to enliven the most unpleasing subjects by the gayety of his fancy. He wrote with great elegance and dignity of style, and had the peculiar felicity of readiness and

facility in every thing that he undertook, being able without premeditation to translate one language into another. He was no imitator, but struck out new tracts, and formed original systems. He had a quickness of apprehension, and firmness of memory, which enabled him to read with incredible rapidity, and at the same time to retain what he read, so as to be able to recollect and apply it. He turned over volumes in an instant, and selected what was useful for his purpose. He seldom made extracts, except of books which he could not procure when he might want them a second time, being always able to find in any author, with great expedition, what he had once read. He read over, in one winter, twenty vast folios; and the catalogue of books which he had borrowed, comprised forty-one pages in quarto, the writing close, and the titles abridged. He was a constant reader of literary journals.

With regard to common life he had some peculiarities. He could not bear music, and if he was ever engaged at play could not attend to it. He neither loved wine nor entertainments, nor

dancing, nor the sports of the field, nor relieved his studies with any other diversion than that of walking and conversation. He eat little flesh, and lived almost wholly upon milk, tea, bread, fruits, and sweetmeats.

He had great vivacity in his imagination, and ardour in his desires, which the easy method of his education had never repressed; he therefore conversed among those who had gained his confidence with great freedom, but his favourites were not numerous, and to others he was always reserved and silent, without the least inclination to discover his sentiments or display his learning. He never fixed his choice upon any employment, nor confined his views to any profession, being desirous of nothing but knowledge, and entirely untainted with avarice or ambition. He preserved himself always independent, and was never known to be guilty of a lie. His constant application to learning suppressed those passions which betray others of his age to irregularities, and excluded all those temptations to which men are exposed by illeness or common amusements.

---

## MORIN.\*

---

LEWIS MORIN was born at Mans, on the 11th of July, 1635, of parents eminent for their piety. He was the eldest of sixteen children, a family to which their estate bore no proportion, and which, in persons less resigned to Providence, would have caused great uneasiness and anxiety.

His parents omitted nothing in his education, which religion requires, and which their fortune could supply. Botany was the study that appeared to have taken possession of his inclination, as soon as the bent of his genius could be discovered. A countryman, who supplied the apothecaries of the place, was his first master, and was paid by him for his instructions with the little money that he could procure, or that which was given him to buy something to eat after dinner. This abstinence and generosity discovered themselves with his passion for botany, and the gratification of a desire indifferent in itself was procured by the exercise of two virtues.

He was soon master of all his instructor's knowledge, and was obliged to enlarge his acquaintance with plants, by observing them himself in the neighbourhood of Mans. Having finished his grammatical studies, he was sent to learn philosophy at Paris, whither he travelled on foot like a student in botany, and was careful not to lose such an opportunity of improvement.

When his course of philosophy was completed, he was determined, by his love of botany, to the profession of physic, and from that time engaged in a course of life, which was never exceeded either by the ostentation of a philosopher, or the severity of an anchorite; for he confined himself to bread and water, and at most allowed himself no indulgence beyond fruits. By this method, he preserved a constant freedom and serenity of spirits, always equally proper for study; for his soul had no pretences to complain of being overwhelmed with matter.

This regimen, extraordinary as it was, had many advantages; for it preserved his health, an advantage which very few sufficiently regard; it gave him an authority to preach diet and abstinence to his patients; and it made him rich

---

\* Translated from an eulogy by Fontenelle, and first printed in the Gentleman's Magazine for 1741.

without the assistance of fortune; rich, not for himself, but for the poor, who were the only persons benefited by that artificial affluence, which, of all others, is most difficult to acquire. It is easy to imagine, that, while he practised in the midst of Paris the severe temperance of a hermit, Paris differed no otherwise, with regard to him, from a hermitage, than as it supplied him with books and the conversation of learned men.

In 1662, he was admitted doctor of physic. About that time Dr. Fagon, Dr. Longuet, and Dr. Galois, all eminent for their skill in botany, were employed in drawing up a catalogue of the plants in the Royal Garden, which was published in 1665, under the name of Dr. Vallot, then first physician: during the prosecution of this work, Dr. Morin was often consulted, and from these conversations it was that Dr. Fagon conceived a particular esteem of him, which he always continued to retain.

After having practised physic some years, he was admitted Expectant at the Hotel Dieu, where he was regularly to have been made Pensionary physician upon the first vacancy; but mere unassisted merit advances slowly, if, what is not very common, it advances at all. Morin had no acquaintance with the arts necessary to carry on schemes of preferment; the moderation of his desires preserved him from the necessity of studying them, and the privacy of his life debarred him from any opportunity.

At last, however, justice was done him in spite of artifice and partiality; but his advancement added nothing to his condition, except the power of more extensive charity; for all the money which he received as a salary, he put into the chest of the hospital, always, as he imagined, without being observed. Not content with serving the poor for nothing, he paid them for being served.

His reputation rose so high in Paris, that Mademoiselle de Guise was desirous to make him her physician; but it was not without difficulty that he was prevailed upon by his friend, Dr. Dodart, to accept the place. He was by this new advancement laid under the necessity of keeping a chariot, an equipage very unsuitable to his temper; but while he complied with those exterior appearances which the public had a right to demand from him, he remitted nothing of his former austerity in the more private and essential parts of his life, which he had always the power of regulating according to his own disposition.

In two years and a half the Princess fell sick, and was despaired of by Morin, who was a great master of prognostics. At the time when she thought herself in no danger, he pronounced her death inevitable; a declaration to the highest degree disagreeable, but which was made

more easy to him than to any other by his piety and artless simplicity. Nor did his sincerity produce any ill consequences to himself; for the Princess, affected by his zeal, taking a ring from her finger, gave it him as the last pledge of her affection, and rewarded him still more to his satisfaction, by preparing for death with a true christian piety. She left him by will a yearly pension of two thousand livres, which was always regularly paid him.

No sooner was the Princess dead, but he freed himself from the incumbrance of his chariot, and retired to St. Victor without a servant; having, however, augmented his daily allowance with a little rice boiled in water.

Dodart, who had undertaken the charge of being ambitious on his account, procured him, at the restoration of the academy in 1699, to be nominated associate botanist; not knowing, what he would doubtless have been pleased with the knowledge of, that he introduced into that assembly the man that was to succeed him in his place of Pensionary.

Dr. Morin was not one who had upon his hands the labour of adapting himself to the duties of his condition, but always found himself naturally adapted to them. He had, therefore, no difficulty in being constant at the assemblies of the academy, notwithstanding the distance of places, while he had strength enough to support the journey. But his regimen was not equally effectual to produce vigour as to prevent distempers; and being 64 years old at his admission, he could not continue his assiduity more than a year after the death of Dodart, whom he succeeded in 1707.

When Mr. Tournefort went to pursue his botanical inquiries in the Levant, he desired Dr. Morin to supply his place of Demonstrator of the Plants in the Royal Garden, and rewarded him for the trouble, by inscribing to him a new plant which he brought from the east, by the name of *Morina Orientalis*, as he named others the *Dodart*, the *Fagonne*, the *Bignonne*, the *Phelipee*. These are compliments proper to be made by the botanists, not only to those of their own rank, but to the greatest persons; for a plant is a monument of a more durable nature than a medal or an obelisk; and yet, as a proof that even these vehicles are not always sufficient to transmit to futurity the name conjoined with them, the *Nicotiana* is now scarcely known by any other name than that of tobacco.

Dr. Morin, advancing far in age, was now forced to take a servant, and, what was yet a more essential alteration, prevailed upon himself to take an ounce of wine a-day, which he measured with the same exactness as a medicine bordering upon poison. He quitted at the same time all his practice in the city, and confined it to the poor of his neighbourhood, and his visits to the Hotel Dieu; but his weakness increas-

ing, he was forced to increase his quantity of wine, which yet he always continued to adjust by weight.\*

At 78, his legs could carry him no longer, and he scarcely left his bed; but his intellects continued unimpaired, except in the last six months of his life. He expired, or to use a more proper term, went out, on the 1st of March, 1714, at the age of 80 years, without any distemper, and merely for want of strength, having enjoyed by the benefit of his regimen a long and healthy life, and a gentle and easy death.

This extraordinary regimen was but part of the daily regulation of his life, of which all the offices were carried on with a regularity and exactness nearly approaching to that of the planetary motions.

He went to bed at seven, and rose at two, throughout the year. He spent in the morning three hours at his devotions, and went to the Hotel Dieu in the summer between five and six, and in the winter between six and seven, hearing mass for the most part at Notre Dame. After his return he read the holy scripture, dined at eleven, and when it was fair weather walked till two in the royal garden, where he examined the new plants, and gratified his earliest and strongest passion. For the remaining part of the day, if he had no poor to visit, he shut himself up, and read books of literature or physic, but chiefly physic, as the duty of his

profession required. This likewise was the time he received visits, if any were paid him. He often used this expression, "Those that come to see me, do me honour; those that stay away, do me a favour." It is easy to conceive that a man of this temper was not crowded with salutations: there was only now and then an Antony that would pay Paul a visit.

Among his papers was found a Greek and Latin index to Hippocrates, more copious and exact than that of Pini, which he had finished only a year before his death. Such a work required the assiduity and patience of a hermit.\*

There is likewise a journal of the weather, kept without interruption, for more than forty years, in which he has accurately set down the state of the barometer and thermometer, the dryness and moisture of the air, the variations of the wind in the course of the day, the rain, the thunders, and even the sudden storms, in a very commodious and concise method, which exhibits in little room, a great train of different observations. What numbers of such remarks had escaped a man less uniform in his life, and whose attention had been extended to common objects!

All the estate which he left is a collection of medals, another of herbs, and a library rated at two thousand crowns; which make it evident that he spent much more upon his mind than upon his body.

## BURMAN.†

PIETER BURMAN was born at Utrecht, on the 26th day of June, 1668. The family from which he descended has for several generations

produced men of great eminence for piety and learning; and his father, who was professor of divinity in the university, and pastor of the city of Utrecht, was equally celebrated for the strictness of his life, the efficacy and orthodoxy of his sermons, and the learning and perspicuity of his academical lectures.

From the assistance and instruction which such a father would doubtless have been encouraged by the genius of this son not to have

\* The practice of Dr. Morin is forbidden, I believe, by every writer that has left rules for the preservation of health, and is directly opposite to that of Comaro, who by his regimen repaired a broken constitution, and protracted his life, without any painful infirmities, or any decay of his intellectual abilities, to more than a hundred years; it is generally agreed, that as men advance in years, they ought to take lighter sustenance, and in less quantities; and reason seems easily to discover that as the concoctive powers grow weaker, they ought to labour less. *Orig. Edit.*

† First printed in the Gentleman's Magazine for 1742.—N.

\* This is an instance of the disposition generally found in writers of lives, to exalt every common occurrence and action into wonder. Are not indexes daily written by men who neither receive nor expect any loud applauses for their labours? *Orig. Edit.*

omitted, he was unhappily cut off at eleven years of age, being at that time by his father's death thrown entirely under the care of his mother, by whose diligence, piety, and prudence, his education was so regulated, that he had scarcely any reason, but filial tenderness, to regret the loss of his father.

He was about this time sent to the public school of Utrecht to be instructed in the learned languages; and it will convey no common idea of his capacity and industry to relate, that he had passed through the classes, and was admitted into the university in his thirteenth year.

This account of the rapidity of his progress in the first part of his studies is so stupendous, that though it is attested by his friend, Dr. Osterdyke, of whom it cannot be reasonably suspected that he is himself deceived, or that he can desire to deceive others, it must be allowed far to exceed the limits of probability, if it be considered, with regard to the methods of education practised in our country, where it is not uncommon for the highest genius, and most comprehensive capacity, to be entangled for ten years, in those thorny paths of literature, which Burman is represented to have passed in less than two; and we must doubtless confess the most skilful of our masters much excelled by the address of the Dutch teachers, or the abilities of our greatest scholars far surpassed by those of Burman.

But, to reduce this narrative to credibility, it is necessary that admiration should give place to inquiry, and that it be discovered what proficiency in literature is expected from a student, requesting to be admitted into a Dutch university. It is to be observed that in the universities of foreign countries, they have professors of philology, or humanity, whose employment is to instruct the younger classes in grammar, rhetoric, and languages; nor do they engage in the study of philosophy, till they have passed through a course of philological lectures and exercises, to which, in some places, two years are commonly allotted.

The English scheme of education, which with regard to academical studies is more rigorous, and sets literary honours at a higher price than that of any other country, exacts from the youth, who are initiated in our colleges, a degree of philological knowledge sufficient to qualify them for lectures in philosophy, which are read to them in Latin, and to enable them to proceed in other studies without assistance; so that it may be conjectured, that Burman, at his entrance into the university, had no such skill in languages, nor such ability of composition, as are frequently to be met with in the higher classes of an English school; nor was perhaps more than moderately skilled in Latin, and taught the first rudiments of Greek.

In the university he was committed to the care of the learned Grævius, whose regard for

his father inclined him to superintend his studies with more than common attention, which was soon confirmed and increased by his discoveries of the genius of his pupil, and his observation of his diligence.

One of the qualities which contributed eminently to qualify Grævius for an instructor of youth, was the sagacity by which he readily discovered the predominant faculty of each pupil, and the peculiar designation by which nature had allotted him to any species of literature, and by which he was soon able to determine, that Burman was remarkably adapted to classical studies, and predict the great advances that he would make, by industriously pursuing the direction of his genius.

Animated by the encouragement of a tutor so celebrated, he continued the vigour of his application, and, for several years, not only attended the lectures of Grævius, but made use of every other opportunity of improvement, with such diligence as might justly be expected to produce an uncommon proficiency.

Having thus attained a sufficient degree of classical knowledge to qualify him for inquiries into other sciences, he applied himself to the study of the law, and published a dissertation, "*De Vicesimâ Hæreditatum*," which he publicly defended, under the professor Van Muyden, with such learning and eloquence, as procured him great applause.

Imagining, then, that the conversation of other men of learning, might be of use towards his farther improvement, and rightly judging that notions formed in any single seminary are for the greatest part contracted and partial; he went to Leyden, where he studied philosophy for a year, under M. de Volder, whose celebrity was so great, that the schools assigned to the sciences, which it was his province to teach, were not sufficient, though very spacious, to contain the audience that crowded his lectures from all parts of Europe.

Yet he did not suffer himself to be engrossed by philosophical disquisitions, to the neglect of those studies in which he was more early engaged, and to which he was perhaps by nature better adapted; for he attended at the same time Ryckius's explanations of Tacitus, and James Gronovius's lectures on the Greek writers, and has often been heard to acknowledge, at an advanced age, the assistance which he received from them.

Having thus passed a year at Leyden with great advantage, he returned to Utrecht, and once more applied himself to philological studies, by the assistance of Grævius, whose early hopes of his genius were now raised to a full confidence of that excellence, at which he afterwards arrived.

At Utrecht, in March, 1688, in the twentieth year of his age, he was advanced to the degree

of doctor of laws; on which occasion he published a learned dissertation, "*De Transactionibus*," and defended it with his usual eloquence, learning, and success.

The attainment of this honour was far from having upon Burman that effect which has been too often observed to be produced in others, who, having in their own opinion no higher object of ambition, have relapsed into idleness and security, and spent the rest of their lives in a lazy enjoyment of their academical dignities. Burman aspired to farther improvements, and, not satisfied with the opportunities of literary conversation which Utrecht afforded, travelled into Switzerland and Germany, where he gained an increase both of fame and learning.

At his return from this excursion, he engaged in the practice of the law, and pleaded several causes with such reputation, as might be hoped by a man who had joined to his knowledge of the law, the embellishments of polite literature, and the strict ratiocination of true philosophy, and who was able to employ on every occasion the graces of eloquence and the power of argumentation.

While Burman was hastening to high reputation in the courts of justice, and to those riches and honours which always follow it, he was summoned in 1691, by the magistrates of Utrecht, to undertake the charge of collector of the tenths, an office in that place of great honour, and which he accepted therefore as a proof of their confidence and esteem.

While he was engaged in this employment, he married Eve Clotterboke, a young lady of a good family, and uncommon genius and beauty, by whom he had ten children, of which eight died young; and only two sons, Francis and Caspar, lived to console their mother for their father's death.

Neither public business nor domestic cares detained Burman from the prosecution of his literary inquiries; by which he so much endeared himself to Grævius, that he was recommended by him to the regard of the university of Utrecht, and accordingly, in 1696, was chosen professor of eloquence and history, to which was added, after some time, the professorship of the Greek language, and afterwards that of politics; so various did they conceive his abilities, and so extensive his knowledge.

At his entrance upon this new province, he pronounced an oration upon eloquence and poetry.

Having now more frequent opportunities of displaying his learning, he arose, in a short time, to a high reputation, of which the great number of his auditors was a sufficient proof, and which the proficiency of his pupils showed not to be accidental or undeserved.

In 1714 he formed a resolution of visiting Paris, not only for the sake of conferring in person,

upon questions of literature, with the learned men of that place, and of gratifying his curiosity with a more familiar knowledge of those writers whose works he admired, but with a view more important, of visiting the libraries, and making those inquiries which might be of advantage to his darling study.

The vacation of the university allowed him to stay at Paris but six weeks, which he employed with so much dexterity and industry, that he had searched the principal libraries, collated a great number of manuscripts and printed copies, and brought back a great treasure of curious observations.

In this visit to Paris he contracted an acquaintance, among other learned men, with the celebrated Father Montfaucon; with whom he conversed, at his first interview, with no other character but that of a traveller; but their discourse turning upon ancient learning, the stranger soon gave such proofs of his attainments, that Montfaucon declared him a very uncommon traveller, and confessed his curiosity to know his name; which he no sooner heard, than he rose from his seat, and embracing him with the utmost ardour, expressed his satisfaction at having seen the man whose productions of various kinds he had so often praised; and, as a real proof of his regard, offered not only to procure him an immediate admission to all the libraries of Paris, but to those in remoter provinces, which are not generally open to strangers, and undertook to ease the expenses of his journey by procuring him entertainment in all the monasteries of his order.

This favour Burman was hindered from accepting, by the necessity of returning to Utrecht at the usual time of beginning a new course of lectures, to which there was always so great a concourse of students, as much increased the dignity and fame of the university in which he taught.

He had already extended, to distant parts, his reputation for knowledge of ancient history by a treatise "*de Vectigalibus Populi Romani*," on the revenues of the Romans; and for his skill in Greek learning, and in ancient coins, by a tract called "*Jupiter Fulgurator*;" and after his return from Paris, he published "*Phædrus*," first with the notes of various commentators, and afterwards with his own. He printed many poems, made many orations upon different subjects, and procured an impression of the epistles of Gudian and Sanavius.

While he was thus employed, the professorships of history, eloquence, and the Greek language, became vacant at Leyden, by the death of Perizonius, which Burman's reputation incited the curators of the university to offer him upon very generous terms, and which, after some struggles with his fondness for his native place, his friends, and his colleagues, he was prevailed on to accept, finding the solicitations from Ley-

den warm and urgent, and his friends at Utrecht, though unwilling to be deprived of him, yet not zealous enough for the honour and advantage of their university, to endeavour to detain him by great liberality.

At his entrance upon this new professorship, which was conferred upon him in 1715, he pronounced an oration upon the duty and office of a professor of polite literature; "*De publici humanioris Disciplinæ professoris proprio officio et munere*;" and showed, by the usefulness and perspicuity of his lectures, that he was not confined to speculative notions on that subject, having a very happy method of accommodating his instructions to the different abilities and attainments of his pupils.

Nor did he suffer the public duties of this station to hinder him from promoting learning by labours of a different kind; for besides many poems and orations which he recited on different occasions, he wrote several prefaces to the works of others, and published many useful editions of the best Latin writers, with large collections of notes from various commentators.

He was twice rector, or chief governor of the university, and discharged that important office with equal equity and ability, and gained by his conduct in every station so much esteem, that when the professorship of history of the United Provinces became vacant, it was conferred on him, as an addition to his honours and revenues, which he might justly claim; and afterwards, as a proof of the continuance of their regard, and a testimony that his reputation was still increasing, they made him chief librarian, an office which was the more acceptable to him, as it united his business with his pleasure, and gave him an opportunity at the same time of superintending the library, and carrying on his studies.

Such was the course of his life, till, in his old age, leaving off his practice of walking and other exercises, he began to be afflicted with the scurvy, which discovered itself by very tormenting symptoms of various kinds; sometimes disturbing his head with vertigos, sometimes causing faintness in his limbs, and sometimes attacking his legs with anguish so excruciating, that all his vigour was destroyed, and the power of walking entirely taken away, till at length his left foot became motionless. The violence of his pain produced irregular fevers, deprived him of rest, and entirely debilitated his whole frame.

This tormenting disease he bore, though not without some degree of impatience, yet without any unbecoming or irrational despondency, and applied himself in the intermission of his pains to seek for comfort in the duties of religion.

While he lay in this state of misery he received an account of the promotion of two of his

grandsons, and a catalogue of the King of France's library, presented to him by the command of the King himself, and expressed some satisfaction on all these occasions; but soon diverted his thoughts to the more important consideration of his eternal state, into which he passed on the 31st of March, 1741, in the 73d year of his age.

He was a man of moderate stature, of great strength and activity, which he preserved by temperate diet, without medical exactness, and by allotting proportions of his time to relaxation and amusement, not suffering his studies to exhaust his strength, but relieving them by frequent intermissions; a practice consistent with the most exemplary diligence, and which he that omits will find at last, that time may be lost, like money, by unseasonable avarice.

In his hours of relaxation he was gay, and sometimes gave way so far to his temper, naturally satirical, that he drew upon himself the ill-will of those who had been unfortunately the subjects of his mirth; but enemies so provoked he thought it beneath him to regard or to pacify; for he was fiery, but not malicious, disdained dissimulation, and in his gay or serious hours preserved a settled detestation of falsehood. So that he was an open and undisguised friend or enemy, entirely unacquainted with the artifices of flatterers, but so judicious in the choice of friends, and so constant in his affection to them, that those with whom he had contracted familiarity in his youth, had for the greatest part his confidence in his old age.

His abilities, which would probably have enabled him to have excelled in any kind of learning, were chiefly employed, as his station required, on polite literature, in which he arrived at very uncommon knowledge, which, however, appears rather from judicious compilations than original productions. His style is lively and masculine, but not without harshness and constraint, nor perhaps, always polished to that purity which some writers have attained. He was at least instrumental to the instruction of mankind by the publication of many valuable performances, which lay neglected by the greatest part of the learned world; and, if reputation be estimated by usefulness, he may claim a higher degree in the ranks of learning than some others of happier elocution, or more vigorous imagination.

The malice or suspicion of those who either did not know, or did not love him, had given rise to some doubts about his religion, which he took an opportunity of removing on his death-bed by a voluntary declaration of his faith, his hope of everlasting salvation from the revealed promises of God, and his confidence in the merits of our Redeemer, of the sincerity of which declaration his whole behaviour in his long illness was an incontestable proof; and he

concluded his life, which had been illustrious for many virtues, by exhibiting an example of true piety.

Of his works we have not been able to procure a complete catalogue: he published,

"Quintilianus," 2 vols. 4to.  
"Valerius Flaccus,"  
"Ovidius," 3 vols. 4to.  
"Poetæ Latini Minores," 2 v. 4to.  
"Buchanani Opera," 2 vols. 4to.

} Cum notis  
variorum.

## SYDENHAM.\*

THOMAS SYDENHAM was born in the year 1624, at Windford Eagle in Dorsetshire, where his father, William Sydenham, Esq. had a large fortune. Under whose care he was educated, or in what manner he passed his childhood, whether he made any early discoveries of a genius peculiarly adapted to the study of nature, or gave any presages of his future eminence in medicine, no information is to be obtained. We must therefore repress that curiosity which would naturally incline us to watch the first attempts of so vigorous a mind, to pursue it in its childish inquiries, and see it struggling with rustic prejudices, breaking on trifling occasions the shackles of credulity, and giving proofs, in its casual excursions, that it was formed to shake off the yoke of prescription, and dispel the phantoms of hypothesis.

That the strength of Sydenham's understanding, the accuracy of his discernment, and ardour of his curiosity, might have been remarked from his infancy by a diligent observer, there is no reason to doubt. For there is no instance of any man, whose history has been minutely related, that did not in every part of life discover the same proportion of intellectual vigour; but it has been the lot of the greatest part of those who have excelled in science, to be known only by their own writings, and to have left behind them no remembrance of their domestic life, or private transactions, or only such memorials of particular passages as are, on certain occasions, necessarily recorded in public registers.

From these it is discovered, that at the age of eighteen, in 1642, he commenced a commoner of Magdalen-Hall in Oxford, where it is not probable that he continued long; for he informs us

himself, that he was withheld from the university by the commencement of the war; nor is it known in what state of life he engaged, or where he resided during that long series of public commotion. It is indeed reported that he had a commission in the King's army, but no particular account is given of his military conduct; nor are we told what rank he obtained when he entered into the army, or when, or on what occasion, he retired from it.

It is, however, certain, that if ever he took upon him the profession of arms, he spent but few years in the camp; for in 1648 he obtained at Oxford the degree of bachelor of physic, for which, as some medicinal knowledge is necessary, it may be imagined that he spent some time in qualifying himself.

His application to the study of physic was, as he himself relates, produced by an accidental acquaintance with Dr. Cox, a physician eminent at that time in London, who in some sickness prescribed to his brother, and, attending him frequently on that occasion, inquired of him what profession he designed to follow. The young man answering that he was undetermined, the Doctor recommended physic to him, on what account, or with what arguments, it is not related; but his persuasions were so effectual, that Sydenham determined to follow his advice, and retired to Oxford for leisure and opportunity to pursue his studies.

It is evident that this conversation must have happened before his promotion to any degree in physic, because he himself fixes it in the interval of his absence from the university, a circumstance which will enable us to confute many false reports relating to Dr. Sydenham, which have been confidently inculcated, and implicitly believed.

It is the general opinion that he was made a physician by accident and necessity, and Sir Richard Blackmore reports in plain terms [*Pre-*

\* Originally prefixed to the New Translation of Dr. Sydenham's Works, by John Swan, M. D. of Newcastle, in Staffordshire, 1742. H.

face to his *Treatise on the Small Pox*,] that he engaged in practice without any preparatory study, or previous knowledge, of the medicinal sciences; and affirms, that, when he was consulted by him what books he should read to qualify him for the same profession, he recommended *Don Quixote*.

That he recommended *Don Quixote* to Blackmore we are not allowed to doubt; but the relater is hindered by that self-love which dazzles all mankind from discovering that he might intend a satire very different from a general censure of all the ancient and modern writers on medicine, since he might perhaps mean, either seriously or in jest, to insinuate that Blackmore was not adapted by nature to the study of physic, and that, whether he should read *Cervantes* or *Hippocrates*, he would be equally unqualified for practice, and equally unsuccessful in it.

Whatsoever was his meaning, nothing is more evident than that it was a transient sally of an imagination warmed with gayety, or the negligent effusion of a mind intent upon some other employment, and in haste to dismiss a troublesome intruder; for it is certain that Sydenham did not think it impossible to write usefully on medicine, because he has himself written upon it; and it is not probable that he carried his vanity so far, as to imagine that no man had ever acquired the same qualifications besides himself. He could not but know that he rather restored than invented most of his principles, and therefore could not but acknowledge the value of those writers whose doctrines he adopted and enforced.

That he engaged in the practice of physic without any acquaintance with the theory, or knowledge of the opinions or precepts of former writers, is undoubtedly false; for he declares, that after he had, in pursuance of his conversation with Dr. Cox, determined upon the profession of physic, he *applied himself in earnest to it, and spent several years in the university* [aliquot annos in academica palestra,] before he began to practise in London.

Nor was he satisfied with the opportunities of knowledge which Oxford afforded, but travelled to Montpellier, as Desault relates [*Dissertation on Consumptions*,] in quest of farther information; Montpellier being at that time the most celebrated school of physic; so far was Sydenham from any contempt of academical institutions, and so far from thinking it reasonable to learn physic by experiments alone, which must necessarily be made at the hazard of life.

What can be demanded beyond this by the most zealous advocate for regular education? What can be expected from the most cautious and most industrious student, than that he should dedicate *several years* to the rudiments of

his art, and travel for further instructions from one university to another?

It is likewise a common opinion, that Sydenham was thirty years old before he formed his resolution of studying physic, for which I can discover no other foundation than one expression in his dedication to Dr. Mapleton, which seems to have given rise to it by a gross misinterpretation; for he only observes, that from his conversation with Dr. Cox to the publication of that treatise *thirty years* had intervened.

Whatever may have produced this notion, or how long soever it may have prevailed, it is now proved beyond controversy to be false, since it appears that Sydenham, having been for some time absent from the university, returned to it in order to pursue his physical inquiries before he was twenty-four years old; for in 1648 he was admitted to the degree of bachelor of physic.

That such reports should be confidently spread, even among the contemporaries of the author to whom they relate, and obtain in a few years such credit as to require a regular confutation; that it should be imagined that the greatest physician of the age arrived at so high a degree of skill, without any assistance from his predecessors; and that a man eminent for integrity practised medicine by chance, and grew wise only by murder: is not to be considered without astonishment.

But, if it be, on the other part, remembered, how much this opinion favours the laziness of some, and the pride of others; how readily some men confide in natural sagacity, and how willingly most would spare themselves the labour of accurate reading and tedious inquiry; it will be easily discovered how much the interest of multitudes was engaged in the production and continuance of this opinion, and how cheaply those, of whom it was known that they practised physic before they studied it, might satisfy themselves and others with the example of the illustrious Sydenham.

It is therefore in an uncommon degree useful to publish a true account of this memorable man, that pride, temerity, and idleness may be deprived of that patronage which they have enjoyed too long; that life may be secured from the dangerous experiments of the ignorant and presumptuous: and that those who shall hereafter assume the important province of superintending the health of others, may learn from this great master of the art, that the only means of arriving at eminence and success are labour and study.

From these false reports it is probable that another arose, to which, though it cannot be with equal certainty confuted, it does not appear that entire credit ought to be given. The acquisition of a Latin style did not seem con-

sistent with the manner of life imputed to him ; nor was it probable, that he, who had so diligently cultivated the ornamental parts of general literature, would have neglected the essential studies of his own profession. Those therefore who were determined, at whatever price, to retain him in their own party, and represent him equally ignorant and daring with themselves, denied him the credit of writing his own works in the language in which they were published, and asserted, but without proof, that they were composed by him in English, and translated into Latin by Dr. Mapletoft.

Whether Dr. Mapletoft lived and was familiar with him during the whole time in which these several treatises were printed, treatises written on particular occasions, and printed at periods considerably distant from each other, we have had no opportunity of inquiring, and therefore cannot demonstrate the falsehood of this report : but if it be considered how unlikely it is that any man should engage in a work so laborious and so little necessary, only to advance the reputation of another, or that he should have leisure to continue the same office upon all following occasions ; if it be remembered how seldom such literary combinations are formed, and how soon they are for the greatest part dissolved ; there will appear no reason for not allowing Dr. Sydenham the laurel of eloquence as well as physic.\*

It is observable, that his *Processus Integri*, published after his death, discovers alone more skill in the Latin language than is commonly ascribed to him ; and it surely will not be suspected, that the officiousness of his friends was continued after his death, or that he procured the book to be translated only that, by leaving it behind him, he might secure his claim to his other writings.

It is asserted by Sir Hans Sloane, that Dr. Sydenham, with whom he was familiarly acquainted, was particularly versed in the writings of the great Roman orator and philosopher ; and there is evidently such a luxuriance in his style, as may discover the author which gave

him most pleasure, and most engaged his imitation.

About the same time that he became bachelor of physic, he obtained, by the interest of a relation, a fellowship of All Souls college, having submitted by the subscription required to the authority of the visitors appointed by the parliament, upon what principles, or how consistently with his former conduct, it is now impossible to discover.

When he thought himself qualified for practice, he fixed his residence in Westminster, became doctor of physic at Cambridge, received a license from the college of physicians, and lived in the first degree of reputation, and the greatest affluence of practice for many years, without any other enemies than those which he raised by the superior merit of his conduct, the brighter lustre of his abilities, or his improvements of his science, and his contempt of pernicious methods supported only by authority in opposition to sound reason and indubitable experience. These men are indebted to him for concealing their names, when he records their malice, since they have thereby escaped the contempt and detestation of posterity.

It is a melancholy reflection, that they who have obtained the highest reputation, by preserving or restoring the health of others, have often been hurried away before the natural decline of life, or have passed many of their years under the torments of those distempers which they profess to relieve. In this number was Sydenham, whose health began to fail in the 52d year of his age, by the frequent attacks of the gout, to which he was subject for a great part of his life, and which was afterwards accompanied with the stone in the kidneys, and, its natural consequence, bloody-urine.

These were distempers which even the art of Sydenham could only palliate, without hope of a perfect cure, but which, if he has not been able by his precepts to instruct us to remove, he has, at least, by his example, taught us to bear ; for he never betrayed any indecent impatience, or unmanly dejection, under his torments, but supported himself by the reflections of philosophy, and the consolations of religion, and in every interval of ease applied himself to the assistance of others with his usual assiduity.

After a life thus usefully employed, he died at his house in Pall-mall, on the 29th of December, 1689, and was buried in the aisle, near the south door, of the church of St. James, in Westminster.

What was his character, as a physician, appears from the treatises which he has left, which it is not necessary to epitomize or transcribe ; and from them it may likewise be collected, that his skill in physic was not his highest excellence ; that his whole character was amiable ;

\* Since the foregoing was written, we have seen Mr. Ward's Lives of the Professors of Gresham College : who, in the Life of Dr. Mapletoft, says, that in 1676 Dr. Sydenham published his *Observationes medicæ circa morborum acutorum historiam et curationem*, which he dedicated to Dr. Mapletoft, who at the desire of the author had translated them into Latin ; and that the other pieces of that excellent physician were translated into that language by Mr. Gilbert Harers of Trinity College, Cambridge, a student in physic and friend of Dr. Mapletoft. But as Mr. Ward, like others, neglects to bring any proof of his assertion, the question cannot fairly be decided by his authority. *Orig. Edit.*

that his chief view was the benefit of mankind, and the chief motive of his actions the will of God, whom he mentions with reverence, well becoming the most enlightened and most penetrating mind. He was benevolent, candid, and

communicative, sincere, and religious; qualities, which it were happy if they could copy from him, who emulate his knowledge, and imitate his methods.

## CHEYNEL.\*

THERE is always this advantage in contending with illustrious adversaries, that the combatant is equally immortalized by conquest or defeat. He that dies by the sword of a hero will always be mentioned when the acts of his enemy are mentioned. The man, of whose life the following account is offered to the public, was indeed eminent among his own party, and had qualities, which, employed in a good cause, would have given him some claim to distinction; but no one is now so much blinded with bigotry, as to imagine him equal either to Hammond or Chillingworth; nor would his memory, perhaps, have been preserved, had he not, by being conjoined with illustrious names, become the object of public curiosity.

FRANCIS CHEYNEL was born in 1608, at Oxford,† where his father, Dr. John Cheynel, who had been fellow of Corpus Christi College, practised physic with great reputation. He was educated in one of the grammar schools of his native city, and in the beginning of the year 1623, became a member of the university.

It is probable that he lost his father when he was very young; for it appears, that before 1629, his mother had married Dr. Abbot, bishop of Salisbury, whom she had likewise buried. From this marriage he received great advantage; for his mother being now allied to Dr. Brent, then warden of Merton College, exerted her interest so vigorously that he was admitted there a probationer, and afterwards obtained a fellowship.‡

Having taken the degree of master of arts, he was admitted to orders according to the rites of the church of England, and held a curacy near Oxford, together with his fellowship. He continued in his college till he was qualified by his years of residence for the degree of bachelor of

divinity, which he attempted to take in 1641, but was denied his grace,\* for disputing concerning predestination, contrary to the King's injunctions.

This refusal of his degree he mentions in his dedication to his account of Mr. Chillingworth: "Do not conceive that I snatch up my pen in an angry mood, that I might vent my dangerous wit, and ease my overburdened spleen; no, no, I have almost forgotten the visitation of Merton College, and the denial of my grace, the plundering of my house, and little library: I know when, and where, and of whom, to demand satisfaction for all these injuries and indignities. I have learnt *centum plagas Spartana nobilitate conquire*. I have not learnt how to plunder others of goods, or living, and make myself amends by force of arms. I will not take a living which belonged to any civil, studious, learned delinquent; unless it be the much neglected *commendam* of some lordly prelate, condemned by the known laws of the land, and the highest court of the kingdom, for some offence of the first magnitude."

It is observable, that he declares himself to have almost forgot his injuries and indignities, though he recounts them with an appearance of acrimony, which is no proof that the impression is much weakened; and insinuates his design of demanding, at a proper time, satisfaction for them.

These vexations were the consequence, rather, of the abuse of learning, than the want of it; no one that reads his works can doubt that he was turbulent, obstinate, and petulant; and ready to instruct his superiors, when he most needed instruction from them. Whatever he believed (and the warmth of his imagination naturally made him precipitate in forming his opinions) he thought himself obliged to profess;

and what he professed he was ready to defend without that modesty which is always prudent, and generally necessary, and which, though it was not agreeable to Mr. Cheynel's temper, and therefore readily condemned by him, is a very useful associate to truth, and often introduces her by degrees, where she never could have forced her way by argument or declamation.

A temper of this kind is generally inconvenient and offensive in any society, but in a place of education is least to be tolerated; for, as authority is necessary to instruction, whoever endeavours to destroy subordination, by weakening that reverence which is claimed by those to whom the guardianship of youth is committed by their country, defeats at once the institution; and may be justly driven from a society by which he thinks himself too wise to be governed, and in which he is too young to teach, and too opinionative to learn.

This may be readily supposed to have been the case of Cheynel; and I know not how those can be blamed for censuring his conduct, or punishing his disobedience, who had a right to govern him, and who might certainly act, with equal sincerity, and with greater knowledge.

With regard to the visitation of Merton College, the account is equally obscure. Visitors are well known to be generally called to regulate the affairs of colleges, when the members disagree with their head, or with one another; and the temper that Dr. Cheynel discovers will easily incline his readers to suspect that he could not long live in any place without finding some occasion for debate; nor debate any question without carrying opposition to such a length as might make a moderator necessary. Whether this was his conduct at Merton, or whether an appeal to the visitor's authority was made by him, or his adversaries, or any other member of the college, is not to be known; it appears only, that there was a visitation, that he suffered by it, and resented his punishment.

He was afterwards presented to a living of great value, near Banbury, where he had some dispute with Archbishop Laud. Of this dispute I have found no particular account. Calamy only says, he had a ruffle with Bishop Laud, while at his height.

Had Cheynel been equal to his adversary in greatness and learning, it had not been easy to have found either a more proper opposite; for they were both, to the last degree, zealous, active, and pertinacious, and would have afforded mankind a spectacle of resolution and boldness not often to be seen. But the amusement of beholding the struggle would hardly have been without danger, as they were too fiery not to have communicated their heat, though it should have produced a conflagration of their country.

About the year 1641, when the whole nation

was engaged in the controversy about the rights of the church, and necessity of episcopacy, he declared himself a Presbyterian, and an enemy to bishops, liturgies, ceremonies, and was considered as one of the most learned and acute of his party; for, having spent much of his life in a college, it cannot be doubted that he had a considerable knowledge of books, which the vehemence of his temper enabled him often to display, when a more timorous man would have been silent, though in learning not his inferior.

When the war broke out, Mr. Cheynel, in consequence of his principles, declared himself for the Parliament; and as he appears to have held it as a first principle, that all great and noble spirits abhor neutrality, there is no doubt but that he exerted himself to gain proselytes, and to promote the interest of that party which he had thought it his duty to espouse. These endeavours were so much regarded by the Parliament, that, having taken the covenant, he was nominated one of the assembly of divines, who were to meet at Westminster for the settlement of the new discipline.

This distinction drew necessarily upon him the hatred of the cavaliers; and his living being not far distant from the king's head-quarters, he received a visit from some of the troops, who, as he affirms, plundered his house and drove him from it. His living, which was, I suppose, considered as forfeited by his absence, (though he was not suffered to continue upon it,) was given to a clergyman, of whom he says, that he would become a stage better than a pulpit; a censure which I can neither confute nor admit, because I have not discovered who was his successor. He then retired into Sussex, to exercise his ministry among his friends, in a place where, as he observes, there had been little of the power of religion either known or practised. As no reason can be given why the inhabitants of Sussex should have less knowledge or virtue than those of other places, it may be suspected that he means nothing more than a place where the Presbyterian discipline or principles had never been received. We now observe, that the Methodists, where they scatter their opinions, represent themselves as preaching the gospel to unconverted nations; and enthusiasts of all kinds have been inclined to disguise their particular tenets with pompous appellations, and to imagine themselves the great instruments of salvation; yet it must be confessed that all places are not equally enlightened; that in the most civilized nations there are many corners which may be called barbarous, where neither politeness, nor religion, nor the common arts of life, have yet been cultivated; and it is likewise certain, that the inhabitants of Sussex have been sometimes mentioned as remarkable for brutality.

From Sussex he went often to London, where, in 1643, he preached three times before the Parliament; and, returning in November to Colchester, to keep the monthly fast there, as was his custom, he obtained a convoy of sixteen soldiers, whose bravery or good fortune was such, that they faced and put to flight more than two hundred of the king's forces.

In this journey he found Mr. Chillingworth in the hands of the Parliament's troops, of whose sickness and death he gave the account, which has been sufficiently made known to the learned world by Mr. Maizeaux, in his *Life of Chillingworth*.

With regard to this relation, it may be observed, that it is written with an air of fearless veracity, and with the spirit of a man who thinks his cause just, and his behaviour without reproach; nor does there appear any reason for doubting that Cheynel spoke and acted as he relates: for he does not publish an apology, but a challenge, and writes not so much to obviate calumnies, as to gain from others that applause which he seems to have bestowed very liberally upon himself for his behaviour on that occasion.

Since, therefore, this relation is credible, a great part of it being supported by evidence which cannot be refuted, Mr. Maizeaux seems very justly, in his *Life of Mr. Chillingworth*, to oppose the common report, that his life was shortened by the inhumanity of those to whom he was a prisoner; for Cheynel appears to have preserved, amidst all his detestation of the opinions which he imputed to him, a great kindness to his person, and veneration for his capacity; nor does he appear to have been cruel to him, otherwise than by that incessant importunity of disputation, to which he was doubtless incited by a sincere belief of the danger of his soul, if he should die without renouncing some of his opinions.

The same kindness which made him desirous to convert him before his death, would incline him to preserve him from dying before he was converted; and accordingly we find, that when the castle was yielded, he took care to procure him a commodious lodging: when he was to have been unseasonably removed, he attempted to shorten his journey, which he knew would be dangerous; when the physician was disgusted by Chillingworth's distrust, he prevailed upon him, as the symptoms grew more dangerous, to renew his visits; and when death left no other act of kindness to be practised, procured him the rites of burial, which some would have denied him.

Having done thus full justice to the humanity of Cheynel, it is proper to inquire how far he deserves blame. He appears to have extended none of that kindness to the opinions of Chillingworth, which he showed to his person; for he interprets every word in the worst sense, and

seems industrious to discover in every line heresies, which might have escaped for ever any other apprehension: he appears always suspicious of some latent malignity, and ready to persecute what he only suspects, with the same violence as if it had been openly avowed: in all his procedure he shows himself sincere, but without candour.

About this time Cheynel, in pursuance of his natural ardour, attended the army under the command of the Earl of Essex, and added the praise of valour to that of learning; for he distinguished himself so much by his personal bravery, and obtained so much skill in the science of war, that his commands were obeyed by the colonels with as much respect as those of the general. He seems, indeed, to have been born a soldier, for he had an intrepidity which was never to be shaken by any danger, and a spirit of enterprise not to be discouraged by difficulty, which were supported by an unusual degree of bodily strength. His services of all kinds were thought of so much importance by the Parliament, that they bestowed upon him the living of Petworth, in Sussex. This living was of the value of £700 *per annum*, from which they had ejected a man remarkable for his loyalty, and therefore, in their opinion, not worthy of such revenues. And it may be inquired, whether, in accepting this preferment, Cheynel did not violate the protestation which he makes in the passage already recited, and whether he did not suffer his resolutions to be overborne by the temptations of wealth.

In 1646, when Oxford was taken by the forces of the parliament, and the reformation of the University was resolved, Mr. Cheynel was sent, with six others, to prepare the way for a visitation; being authorised by the Parliament to preach in any of the churches, without regard to the right of the members of the University, that their doctrine might prepare their hearers for the changes which were intended.

When they arrived at Oxford, they began to execute their commission, by possessing themselves of the pulpits; but, if the relation of Wood\* is to be regarded, were heard with very little veneration. Those who had been accustomed to the preachers of Oxford, and the liturgy of the church of England, were offended at the emptiness of their discourses, which were noisy and unmeaning; at the unusual gestures, the wild distortions, and the uncouth tone with which they were delivered; at the coldness of their prayers for the king, and the vehemence and exuberance of those which they did not fail to utter for the *blessed councils* and actions of the Parliament and army; and at, what was surely not to be remarked without indignation, their omission of the Lord's Prayer.

\* Vide Wood's *Hist. Antiq. Oxon. Orig. Edit.*

But power easily supplied the want of reverence, and they proceeded in their plan of reformation; and thinking sermons not so efficacious to conversion as private interrogatories and exhortations, they established a weekly meeting for *freeing tender consciences from scruple*, at a house that, from the business to which it was appropriated, was called the *Scruple-shop*.

With this project they were so well pleased, that they sent to the Parliament an account of it, which was afterwards printed, and is ascribed by Wood to Mr. Cheynel. They continued for some weeks to hold their meetings regularly, and to admit great numbers, whom curiosity, or a desire of conviction, or a compliance with the prevailing party, brought thither. But their tranquillity was quickly disturbed by the turbulence of the Independents, whose opinions then prevailed among the soldiers, and were very industriously propagated by the discourses of William Earbury, a preacher of great reputation among them, who, one day, gathering a considerable number of his most zealous followers, went to the house appointed for the resolution of scruples, on a day which was set apart for the disquisition of the dignity and office of a minister, and began to dispute with great vehemence against the Presbyterians, whom he denied to have any true ministers among them, and whose assemblies he affirmed not to be the true church. He was opposed with equal heat by the Presbyterians, and at length they agreed to examine the point another day, in a regular disputation. Accordingly, they appointed the 12th of November for an inquiry, "Whether, in the Christian church, the office of minister is committed to any particular persons?"

On the day fixed the antagonists appeared, each attended by great numbers; but when the question was proposed, they began to wrangle, not about the doctrine which they had engaged to examine, but about the terms of the proposition, which the Independents alleged to be changed since their agreement; and at length the soldiers insisted that the question should be, "Whether those who call themselves ministers have more right or power to preach the gospel than any other man that is a Christian?" This question was debated for some time with great vehemence and confusion, but without any prospect of a conclusion. At length, one of the soldiers, who thought they had an equal right with the rest to engage in the controversy, demanded of the Presbyterians, whence they themselves received their orders, whether from bishops, or any other persons? This unexpected interrogatory put them to great difficulties; for it happened that they were all ordained by the bishops, which they durst not acknowledge, for fear of exposing themselves to a general cen-

sure, and being convicted from their own declarations, in which they had frequently condemned Episcopacy as contrary to Christianity; nor durst they deny it, because they might have been confuted, and must at once have sunk into contempt. The soldiers, seeing their perplexity, insulted them; and went away, boasting of their victory; nor did the Presbyterians, for some time, recover spirit enough to renew their meetings, or to proceed in the work of easing consciences.

Earbury, exulting at the victory, which, not his own abilities, but the subtlety of the soldier had procured him, began to vent his notions of every kind without scruple, and at length asserted, that "the Saints had an equal measure of the divine nature with our Saviour, though not equally manifest." At the same time he took upon him the dignity of a prophet, and began to utter predictions relating to the affairs of England and Ireland.

His prophecies were not much regarded, but his doctrine was censured by the Presbyterians in their pulpits; and Mr. Cheynel challenged him to a disputation, to which he agreed, and at his first appearance in St. Mary's church addressed his audience in the following manner:

"Christian friends, kind fellow-soldiers, and worthy students, I, the humble servant of all mankind, am this day drawn, against my will, out of my cell, into this public assembly, by the double chain of accusation and a challenge from the pulpit. I have been charged with heresy; I have been challenged to come hither in a letter written by Mr. Francis Cheynel. Here then I stand in defence of myself and my doctrine, which I shall introduce with only this declaration, that I claim not the office of a minister on account of any outward call, though I formerly received ordination, nor do I boast of *illumination*; or the knowledge of our Saviour, though I have been held in esteem by others, and formerly by myself. For I now declare, that I know nothing, and am nothing, nor would I be thought of otherwise than as an inquirer and seeker."

He then advanced his former position in stronger terms, and with additions equally detestable, which Cheynel attacked with the vehemence which in so warm a temper, such horrid assertions might naturally excite. The dispute, frequently interrupted by the clamours of the audience, and tumults raised to disconcert Cheynel, who was very unpopular, continued about four hours, and then both the controversialists grew weary, and retired. The Presbyterians afterwards thought they should more speedily put an end to the heresies of Earbury by power than by argument; and, by soliciting General Fairfax, procured his removal.

Mr. Cheynel published an account of this dis-

pute under the title of "Faith triumphing over Error and Heresy in a revelation," &c. ; nor can it be doubted but he had the victory, where his cause gave him so great superiority.

Somewhat before this, his captious and petulant disposition engaged him in a controversy, from which he could not expect to gain equal reputation. Dr. Hammond had not long before published his Practical Catechism, in which Mr. Cheynel, according to his custom, found many errors implied, if not asserted; and therefore, as it was much read, thought it convenient to censure it in the pulpit. Of this Dr. Hammond being informed, desired him in a letter to communicate his objections; to which Mr. Cheynel returned an answer, written with his usual temper, and therefore somewhat perverse. The controversy was drawn out to a considerable length; and the papers on both sides were afterwards made public by Dr. Hammond.

In 1647, it was determined by Parliament, that the reformation of Oxford should be more vigorously carried on; and Mr. Cheynel was nominated one of the visitors. The general process of the visitation, the firmness and fidelity of the students, the address by which the inquiry was delayed, and the steadiness with which it was opposed, which are very particularly related by Wood, and after him by Walker, it is not necessary to mention here, as they relate not more to Dr Cheynel's life than to those of his associates.

There is, indeed, some reason to believe that he was more active and virulent than the rest, because he appears to have been charged in a particular manner with some of their most unjustifiable measures. He was accused of proposing that the members of the University should be denied the assistance of counsel, and was lampooned by name, as a madman, in a satire written on the visitation.

One action, which shows the violence of his temper, and his disregard both of humanity and decency, when they came in competition with his passions, must not be forgotten. The visitors, being offended at the obstinacy of Dr. Fell, Dean of Christ-church, and Vice-chancellor of the University, having first deprived him of his vice-chancellorship, determined afterwards to dispossess him of his deanery; and, in the course of their proceedings, thought it proper to seize upon his chambers in the college. This was an act which most men would willingly have referred to the officers to whom the law assigned it; but Cheynel's fury prompted him to a different conduct. He, and three more of the visitors, went and demanded admission; which being steadily refused them, they obtained by the assistance of a file of soldiers, who forced the doors with pick-axes. Then entering, they saw Mrs. Fell in the lodgings, Dr. Fell being in prison at London, and ordered her to quit them; but

found her not more obsequious than her husband. They repeated their orders with menaces, but were not able to prevail upon her to remove. They then retired, and left her exposed to the brutality of the soldiers, whom they commanded to keep possession, which Mrs. Fell, however, did not leave. About nine days afterwards she received another visit of the same kind from the new chancellor, the Earl of Pembroke; who having, like the others, ordered her to depart without effect, treated her with reproachful language, and at last commanded the soldiers to take her up in her chair, and carry her out of doors. Her daughters, and some other gentlewomen that were with her, were afterwards treated in the same manner; one of whom predicted, without dejection, that she should enter the house again with less difficulty, at some other time: nor was she mistaken in her conjecture, for Dr. Fell lived to be restored to his deanery.

At the reception of the chancellor, Cheynel, as the most accomplished of the visitors, had the province of presenting him with the ensigns of his office, some of which were counterfeited, and addressing him with a proper oration. Of this speech, which Wood has preserved, I shall give some passages, by which a judgment may be made of his oratory.

Of the staves of the beades he observes, that "some are stained with double-guilt, that some are pale with fear, and that others have been made use of as crutches, for the support of bad causes and desperate fortunes;" and he remarks of the book of statutes which he delivers, that "the ignorant may perhaps admire the splendour of the cover, but the learned know that the real treasure is within." Of these two sentences it is easily discovered, that the first is forced and unnatural, and the second trivial and low.

Soon afterwards Mr. Cheynel was admitted to the degree of Bachelor of Divinity, for which his grace had been denied him in 1641, and, as he then suffered for an ill-timed assertion of the Presbyterian doctrines, he obtained that his degree should be dated from the time at which he was refused it; an honour which, however, did not secure him from being soon after publicly reproached as a madman.

But the vigour of Cheynel was thought by his companions to deserve profit as well as honour; and Dr. Bailey, the president of St. John's College, being not more obedient to the authority of the Parliament than the rest, was deprived of his revenues and authority, with which Mr. Cheynel was immediately invested; who, with his usual coolness and modesty, took possession of the lodgings soon after, by breaking open the doors.

This preferment being not thought adequate to the deserts or abilities of Mr. Cheynel, it was

therefore desired, by the committee of Parliament, that the visitors would recommend him to the lectureship of divinity founded by the Lady Margaret. To recommend him, and to choose, was at that time the same; and he had now the pleasure of propagating his darling doctrine of predestination, without interruption, and without danger.

Being thus flushed with power and success, there is little reason for doubting that he gave way to his natural vehemence, and indulged himself in the utmost excesses of raging zeal, by which he was indeed so much distinguished, that, in a satire mentioned by Wood, he is dignified by the title of Arch-visitor; an appellation which he seems to have been industrious to deserve by severity and inflexibility: for, not contented with the commission which he and his colleagues had already received, he procured six or seven of the members of Parliament to meet privately in Mr. Rouse's lodgings, and assume the style and authority of a committee, and from them obtained a more extensive and tyrannical power, by which the visitors were enabled to force the *solemn League and Covenant* and the *negative Oath* upon all the members of the University, and to prosecute those for a contempt who did not appear to a citation, at whatever distance they might be, and whatever reasons they might assign for their absence.

By this method he easily drove great numbers from the University, whose places he supplied with men of his own opinion, whom he was very industrious to draw from other parts, with promises of making a liberal provision for them out of the spoils of heretics and malignants.

Having, in time, almost extirpated those opinions which he found so prevalent at his arrival, or at least obliged those, who would not recant, to an appearance of conformity, he was at leisure for employments which deserve to be recorded with greater commendation. About this time, many Socinian writers began to publish their notions with great boldness, which the Presbyterians, considering as heretical and impious, thought it necessary to confute; and therefore Cheynel, who had now obtained his doctor's degree, was desired, in 1649, to write a vindication of the doctrine of the Trinity, which he performed, and published the next year.

He drew up likewise a confutation of some Socinian tenets advanced by John Fry; a man who spent great part of his life in ranging from one religion to another, and who sat as one of the judges on the king, but was expelled afterwards from the House of Commons, and disabled from sitting in parliament. Dr. Cheynel is said to have shown himself evidently superior to him in the controversy, and was answered

by him only with an opprobrious book against the Presbyterian clergy.

Of the remaining part of his life there is found only an obscure and confused account. He quitted the presidentship of St. John's, and the professorship, in 1650, as Calamy relates, because he would not take the engagement; and gave a proof that he could suffer as well as act in a cause which he believed just. We have, indeed, no reason to question his resolution, whatever occasion might be given to exert it; nor is it probable that he feared affliction more than danger, or that he would not have borne persecution himself for those opinions which inclined him to persecute others.

He did not suffer much upon this occasion; for he retained the living of Petworth, to which he thenceforward confined his labours, and where he was very assiduous, and, as Calamy affirms, very successful in the exercise of his ministry, it being his peculiar character to be warm and zealous in all his undertakings.

This heat of his disposition, increased by the uncommon turbulence of the times in which he lived, and by the opposition to which the unpopular nature of some of his employments exposed him, was at last heightened to distraction, so that he was for some years disordered in his understanding, as both Wood and Calamy relate, but with such difference as might be expected from their opposite principles. Wood appears to think, that a tendency to madness was discoverable in a great part of his life; Calamy, that it was only transient and accidental, though, in his additions to his first narrative, he pleads it as an extenuation of that fury with which his kindest friends confess him to have acted on some occasions. Wood declares, that he died little better than distracted; Calamy, that he was perfectly recovered to a sound mind before the Restoration, at which time he retired to Preston, a small village in Sussex, being turned out of his living at Petworth.

It does not appear that he kept his living till the general ejection of the Nonconformists; and it is not unlikely that the asperity of his carriage, and the known virulence of his temper, might have raised him enemies, who were willing to make him feel the effects of persecution which he had so furiously incited against others; but of this incident of his life there is no particular account.

After his deprivation, he lived (till his death, which happened in 1665,) at a small village near Chichester, upon a paternal estate, not augmented by the large preferments wasted upon him in the triumphs of his party; having been remarkable, throughout his life, for hospitality and contempt of money.

## CAVE.\*

THE curiosity of the public seems to demand the history of every man who has, by whatever means, risen to eminence; and few lives would have more readers than that of the compiler of the "Gentleman's Magazine," if all those who received improvement or entertainment from him should retain so much kindness for their benefactor as to inquire after his conduct and character.

EDWARD CAVE was born at Newton, in Warwickshire, Feb. 29, 1691. His father (Joseph) was the younger son of Mr. Edward Cave, of Cave's-in-the-Hole, a lone house on the Street-road in the same county, which took its name from the occupier; but having concurred with his elder brother in cutting off the entail of a small hereditary estate, by which act it was lost from the family, he was reduced to follow in Rugby the trade of a shoemaker. He was a man of good reputation in his narrow circle, and remarkable for strength and rustic intrepidity. He lived to a great age, and was in his latter years supported by his son.

It was fortunate for Edward Cave, that, having a disposition to literary attainments, he was not cut off by the poverty of his parents from opportunities of cultivating his faculties. The school of Rugby, in which he had, by the rules of its foundation, a right to be instructed, was then in high reputation, under the Rev. Mr. Holyock, to whose care most of the neighbouring families, even of the highest rank, entrusted their sons. He had judgment to discover, and, for some time, generosity to encourage, the genius of young Cave; and was so well pleased with his quick progress in the school, that he declared his resolution to breed him for the university, and recommended him as a servitor to some of his scholars of high rank. But prosperity which depends upon the caprice of others is of short duration. Cave's superiority in literature exalted him to an invidious familiarity with boys who were far above him in rank and expectations; and, as in unequal associations it always happens, whatever unlucky

prank was played was imputed to Cave. When any mischief, great or small, was done, though perhaps others boasted of the stratagem when it was successful, yet upon detection or mis-carriage the fault was sure to fall upon poor Cave.

At last, his mistress by some invisible means lost a favourite cock. Cave was, with little examination, stigmatised as the thief and murderer; not because he was more apparently criminal than others, but because he was more easily reached by vindictive justice. From that time Mr. Holyock withdrew his kindness visibly from him, and treated him with harshness, which the crime, in its utmost aggravation, could scarcely deserve; and which surely he would have forborne, had he considered how hardly the habitual influence of birth and fortune is resisted; and how frequently men, not wholly without sense of virtue, are betrayed to acts more atrocious than the robbery of a hen-roost, by a desire of pleasing their superiors.

Those reflections his master never made, or made without effect; for under pretence that Cave obstructed the discipline of the school, by selling clandestine assistance, and supplying exercises to idlers, he was oppressed with unreasonable tasks, that there might be an opportunity of quarrelling with his failure; and when his diligence had surmounted them, no regard was paid to the performance. Cave bore this persecution a while, and then left the school, and the hope of a literary education, to seek some other means of gaining a livelihood.

He was first placed with a collector of the excise. He used to recount with some pleasure a journey or two which he rode with him as his clerk, and relate the victories that he gained over the excisemen in grammatical disputations. But the insolence of his mistress, who employed him in servile drudgery, quickly disgusted him, and he went up to London in quest of more suitable employment.

He was recommended to a timber-merchant at the Bankside, and, while he was there on liking, is said to have given hopes of great mercantile abilities; but this place he soon left, I know not for what reason, and was bound apprentice to Mr. Collins, a printer of some reputation, and deputy alderman.

This was a trade for which men were for-

\* This life first appeared in the *Gentleman's Magazine* for 1754, and is now printed from a copy revised by the author, at my request, in 1781.—N.

merly qualified by a literary education, and which was pleasing to Cave, because it furnished some employment for his scholastic attainments. Here, therefore, he resolved to settle, though his master and mistress lived in perpetual discord, and their house was therefore no comfortable habitation. From the inconveniences of these domestic tumults he was soon released, having in only two years attained so much skill in his art, and gained so much the confidence of his master, that he was sent without any superintendant to conduct a printing-office at Norwich, and publish a weekly paper. In this undertaking he met with some opposition, which produced a public controversy, and procured young Cave the reputation of a writer.

His master died before his apprenticeship was expired, and he was not able to bear the perverseness of his mistress. He therefore quit- ted her house upon a stipulated allowance, and married a young widow, with whom he lived at Bow. When his apprenticeship was over, he worked as a journeyman at the printing-house of Mr. Barber, a man much distinguished, and employed by the Tories, whose principles had at that time so much prevalence with Cave, that he was for some years a writer in "Mist's Journal;" which, though he afterwards obtained, by his wife's interest, a small place in the Post-office, he for some time continued. But as interest is powerful, and conversation, however mean, in time persuasive, he by degrees inclined to another party; in which, however he was always moderate, though steady and determined.

When he was admitted into the Post-office, he still continued, at his intervals of attendance, to exercise his trade, or to employ himself with some typographical business. He corrected the "Gradus ad Parnassum;" and was liberally rewarded by the Company of Stationers. He wrote an "Account of the Criminals," which had for some time a considerable sale; and published many little pamphlets that accident brought into his hands, of which it would be very difficult to recover the memory. By the correspondence which his place in the Post-office facilitated, he procured country newspapers and sold their intelligence to a Journalist in London, for a guinea a-week.

He was afterwards raised to the office of clerk of the franks, in which he acted with great spirit and firmness; and often stopped franks which were given by members of parliament to their friends, because he thought such extension of a peculiar right illegal. This raised many complaints, and having stopped, among others, a frank given to the old dutchess of Marlborough by Mr. Walter Plummer, he was cited before the House as for a breach of privilege, and accused, I suppose very unjustly, of opening letters to detect them. He was treated with

great harshness and severity, but, declining their questions by pleading his oath of secrecy, was at last dismissed. And it must be recorded to his honour, that, when he was ejected from his office, he did not think himself discharged from his trust, but continued to refuse to his nearest friends any information about the management of the office.

By this constancy of diligence and diversification of employment, he in time collected a sum sufficient for the purchase of a small printing-office, and began the "Gentleman's Magazine," a periodical pamphlet, of which the scheme is known wherever the English language is spoken. To this undertaking he owed the affluence in which he passed the last twenty years of his life, and the fortune which he left behind him, which, though large, had been yet larger, had he not rashly and wantonly impaired it by innumerable projects, of which I know not that ever one succeeded.

"The Gentleman's Magazine," which has now subsisted fifty years, and still continues to enjoy the favour of the world,\* is one of the most successful and lucrative pamphlets which literary history has upon record, and therefore deserves, in this narrative, particular notice.

Mr. Cave, when he formed the project, was far from expecting the success which he found; and others had so little prospect of its consequence, that though he had for several years talked of his plan among printers and booksellers, none of them thought it worth the trial. That they were not restrained by virtue from the execution of another man's design, was sufficiently apparent as soon as that design began to be gainful; for in a few years a multitude of magazines arose and perished; only the London Magazine, supported by a powerful association of booksellers, and circulated with all the art and all the cunning of trade, exempted himself from the general fate of Cave's invaders, and obtained, though not an equal, yet a considerable sale.†

Cave now began to aspire to popularity; and being a greater lover of poetry than any other art, he sometimes offered subjects for poems, and proposed prizes for the best performers. The first prize was £50, for which, being but newly acquainted with wealth, and thinking the influence of £50 extremely great, he expected the first authors of the kingdom to appear as competitors; and offered the allotment of the prize to the universities. But when the time came, no name was seen among the writers that had ever been seen before; the universities and se-

\* This was said in the beginning of the year 1781; and may with truth be now repeated.

† The London Magazine ceased to exist in 1785.

veral private men rejected the province of assigning the prize.\* At all this Mr. Cave wondered for a while; but his natural judgment, and a wider acquaintance with the world, soon cured him of his astonishment as of many other prejudices and errors. Nor have many men been seen raised by accident or industry to sudden riches, that retained less of the meanness of their former state.

He continued to improve his Magazine, and had the satisfaction of seeing its success proportionate to his diligence, till, in 1751, his wife died of an asthma. He seemed not at first much affected by her death, but in a few days lost his sleep and his appetite, which he never recovered; but after having lingered about two years, with many vicissitudes of amendment and relapse, fell, by drinking acid liquors, into a diarrhoea, and afterwards into a kind of lethargic insensibility, in which one of the last acts of reason which he exerted was fondly to press the hand that is now writing this little narrative. He died on the 10th of January, 1754, having just concluded the twenty-third annual collection.†

---

\* The determination was left to Dr. Cromwell Mortimer and Dr. Birch, and by the latter the award was made, which may be seen in the *Gent. Mag.* vol. vi. p. 59. N.

† Mr. Cave was buried in the church of St. James, Clerkenwell, without an epitaph; but the following inscription at Rugby, from the pen of Dr. Hawkesworth, is here transcribed from the "Anecdotes of Mr. Bowyer," p. 88.

Near this place lies  
The body of  
**JOSEPH CAVE,**  
Late of this parish:  
Who departed this Life, Nov. 18th, 1747,  
Aged 79 years.  
He was placed by Providence in an humble station;  
But  
Industry abundantly supplied the wants of Nature,  
And  
Temperance blest him with  
Content and Wealth.  
As he was an affectionate Father,  
He was made happy in the decline of life  
By the deserved eminence of his eldest Son  
**EDWARD CAVE,**  
Who without interest, fortune, or connection,  
By the native force of his own genius,  
Assisted only by a classical education,  
Which he received at the Grammar-school  
Of this Town,  
Planned, executed, and established  
A literary work, called  
**THE**  
**GENTLEMAN'S MAGAZINE,**  
Whereby he acquired an ample fortune,  
The whole of which devolved to his family.  
Here also lies  
The body of **WILLIAM CAVE,**  
Second Son of the said **JOSEPH CAVE,**  
Who died, May 2d, 1757, aged 62 years;

He was a man of a large stature, not only tall but bulky, and was, when young, of remarkable strength and activity. He was generally healthful, and capable of much labour and long application; but in the latter years of his life was afflicted with the gout, which he endeavoured to cure or alleviate by a total abstinence both from strong liquors and animal food. From animal food he abstained about four years, and from strong liquors much longer; but the gout continued unconquered, perhaps unabated.

His resolution and perseverance were very uncommon; in whatever he undertook, neither expense nor fatigue were able to repress him; but his constancy was calm, and to those who did not know him appeared faint and languid; but he always went forward, though he moved slowly.

The same chillness of mind was observable in his conversation: he was watching the minutest accent of those whom he disgusted by seeming inattention; and his visitant was surprised when he came a second time, by preparations to execute the scheme which he supposed never to have been heard.

He was, consistently with his general tranquillity of mind, a tenacious maintainer, though not a clamorous demander of his right. In his youth having summoned his fellow journeymen to concert measures against the oppression of their masters, he mounted a kind of rostrum, and harangued them so efficaciously, that they determined to resist all future invasions; and when the stamp offices demanded to stamp the last half sheet of the Magazines, Mr. Cave alone defeated their claim, to which the proprietors of the rival Magazines would meanly have submitted.

He was a friend rather easy and constant, than zealous and active; yet many instances might be given, where both his money and his diligence were employed liberally for others. His enmity was in like manner cool and deliberate; but though cool, it was not insidious, and though deliberate, not pertinacious.

His mental faculties were slow. He saw little at a time, but that little he saw with great exactness. He was long in finding the right,

And who, having survived his eldest brother  
**EDWARD CAVE,**

Inherited from him a competent estate;  
And, in gratitude to his benefactor,  
Ordered this monument to perpetuate his memory.

He lived a patriarch in his numerous race,  
And showed in charity a Christian's grace:  
Whate'er a friend or parent feels he knew;  
His hand was open, and his heart was true;  
In what he gain'd and gave, he taught mankind,  
A grateful always is a generous mind.  
Here rest his clay! his soul must ever rest,  
Who bless'd when living, dying must be blest.—N.

but seldom failed to find it at last. His affections were not easily gained, and his opinions not quickly discovered. His reserve, as it might hide his faults, concealed his virtues: but such he was, as they who best knew him have most lamented.

## KING OF PRUSSIA.\*

CHARLES FREDERICK the present King of Prussia, whose actions, and designs now keep Europe in attention, is the eldest son of Frederick William by Sophia Dorothea, daughter of George the First, King of England. He was born, January 24, 1711-12. Of his early years nothing remarkable has been transmitted to us. As he advanced towards manhood, he became remarkable by his disagreement with his father.

The late king of Prussia was of a disposition violent and arbitrary, of narrow views, and vehement passions, earnestly engaged in little pursuits, or in schemes terminating in some speedy consequence, without any plan of lasting advantage to himself or his subjects, or any prospect of distant events. He was therefore always busy, though no effects of his activity ever appeared; and always eager, though he had nothing to gain. His behaviour was to the last degree rough and savage. The least provocation, whether designed or accidental, was returned by blows, which he did not always forbear to the Queen and Princesses.

From such a king and such a father it was not any enormous violation of duty in the immediate heir of a kingdom sometimes to differ in opinion, and to maintain that difference with decent pertinacity. A prince of a quick sagacity and comprehensive knowledge must find many practices in the conduct of affairs which he could not approve, and some which he could scarcely forbear to oppose.

The chief pride of the old king was to be master of the tallest regiment in Europe. He therefore brought together from all parts men above the common military standard. To exceed the height of six feet was a certain recommendation to notice, and to approach that of seven a claim to distinction. Men will readily go where they are sure to be caressed; and he had therefore such a collection of giants as perhaps was never seen in the world before.

To review this towering regiment was his daily pleasure, and to perpetuate it was so much his care, that when he met a tall woman he immediately commanded one of his Titianian retinue to marry her, that they might propagate procreancy, and produce heirs to the father's habiliments.

In all this there was apparent folly, but there was no crime. The tall regiment made a fine show at an expense not much greater, when once it was collected, than would have been bestowed upon common men. But the king's military pastimes were sometimes more pernicious. He maintained a numerous army, of which he made no other use than to review and to talk of it; and when he, or perhaps his emissaries, saw a boy, whose form and sprightliness promised a future soldier, he ordered a kind of badge to be put about his neck, by which he was marked out for the service, like the sons of Christian captives in Turkey; and his parents were forbidden to destine him to any other mode of life.

This was sufficiently oppressive, but this was not the utmost of his tyranny. He had learned, though otherwise perhaps no very great politician, that to be rich was to be powerful; but that the riches of a king ought to be seen in the opulence of his subjects, he wanted either ability or benevolence to understand. He therefore raised exorbitant taxes from every kind of commodity and possession, and piled up the money in his treasury, from which it issued no more. How the land which had paid taxes once was to pay them a second time, how imposts could be levied without commerce, or commerce continued without money, it was not his custom to inquire. Eager to snatch at money, and delighted to count it, he felt new joy at every receipt, and thought himself enriched by the impoverishment of his dominions.

By which of these freaks of royalty the prince was offended, or whether, as perhaps more frequently happens, the offences of which he complains were of a domestic and personal kind, it is not easy to discover. But his resentment, whatever was its cause, rose so high, that he resolved not only to leave his father's court, but

\* First printed in the Literary Magazine for 1756. H.

his territories, and to seek a refuge among the neighbouring or kindred princes. It is generally believed that his intention was to come to England, and live under the protection of his uncle, till his father's death, or change of conduct, should give him liberty to return.

His design, whatever it was, he concerted with an officer, in the army, whose name was Kat, a man in whom he placed great confidence, and whom, having chosen him for the companion of his flight, he necessarily trusted with the preparatory measures. A prince cannot leave his country with the speed of a meaner fugitive. Something was to be provided, and something was to be adjusted. And, whether Kat found the agency of others necessary, and therefore was constrained to admit some partners of the secret; whether levity or vanity incited him to disburden himself of a trust that swelled in his bosom, or to show to a friend or mistress his own importance; or whether it be in itself difficult for princes to transact any thing in secret; so it was, that the king was informed of the intended flight, and the prince, and his favourite, a little before the time settled for their departure, were arrested, and confined in different places.

The life of princes is seldom in danger, the hazard of their irregularities falls only on those whom ambition or affection combines with them. The king, after an imprisonment of some time, set his son at liberty; but poor Kat was ordered to be tried for a capital crime. The court examined the cause, and acquitted him; the king remanded him to a second trial, and obliged his judges to condemn him. In consequence of the sentence thus tyrannically extorted, he was publicly beheaded, leaving behind him some papers of reflections made in the prison, which were afterwards printed, and among others an admonition to the prince, for whose sake he suffered, not to foster in himself the opinion of destiny, for that a Providence is discoverable in every thing round us.

This cruel prosecution of a man who had committed no crime, but by compliance with influence not easily to be resisted, was not the only act by which the old king irritated his son. A lady with whom the prince was suspected of intimacy, perhaps more than virtue allowed, was seized, I know not upon what accusation, and, by the king's order, notwithstanding all the reasons of decency and tenderness that operate in other countries, and other judicatures, was publicly whipped in the streets of Berlin.

At last, that the prince might feel the power of a king and a father in its utmost rigour, he was, in 1733, married against his will to the Princess Elizabeth Christina of Brunswick Lunenburg Bevern. He married her indeed at his father's command, but without possessing for her either esteem or affection, and considering the claim of parental authority fully satisfied

by the external ceremony, obstinately and perpetually during the life of his father refrained from her bed. The poor princess lived about seven years in the court of Berlin, in a state which the world has not often seen, a wife without a husband, married so far as to engage her person to a man who did not desire her affection, and of whom it was doubtful whether he thought himself restrained from the power of repudiation by an act performed under evident compulsion.

Thus he lived secluded from public business, in contention with his father, in alienation from his wife. This state of uneasiness he found the only means of softening. He diverted his mind from the scenes about him by studies and liberal amusements. The studies of princes seldom produce great effects, for princes draw with meaner mortals the lot of understanding; and since of many students not more than one can be hoped to advance far towards perfection, it is scarcely to be expected that we should find that one a prince; that the desire of science should overpower in any mind the love of pleasure, when it is always present, or always within call; that laborious meditation should be preferred in the days of youth to amusements and festivity; or that perseverance should press forward in contempt of flattery: and that he, in whom moderate acquisitions would be extolled as prodigies, should exact from himself that excellence of which the whole world conspires to spare him the necessity.

In every great performance, perhaps in every great character, part is the gift of nature, part the contribution of accident, and part, very often not the greatest part, the effect of voluntary election, and regular design. The King of Prussia was undoubtedly born with more than common abilities; but that he has cultivated them with more than common diligence, was probably the effect of his peculiar condition, of that which he then considered as cruelty and misfortune.

In this long interval of unhappiness and obscurity, he acquired skill in the mathematical sciences, such as is said to put him on the level with those who have made them the business of their lives. This is probably to say too much: the acquisitions of kings are always magnified. His skill in poetry and in the French language has been loudly praised by Voltaire, a judge without exception, if his honesty were equal to his knowledge. Music he not only understands, but practises on the German flute in the highest perfection; so that, according to the regal censure of Philip of Macedon, he may be ashamed to play so well.

He may be said to owe to the difficulties of his youth an advantage less frequently obtained by princes than literature and mathematics. The necessity of passing his time without pomp,

and of partaking of the pleasures and labours of a lower station, made him acquainted with the various forms of life, and with the genuine passions, interests, desires, and distresses, of mankind. Kings, without this help, from temporary infelicity, see the world in a mist, which magnifies every thing near them, and bounds their view to a narrow compass, which few are able to extend by the mere force of curiosity. I have always thought that what Cromwell had more than our lawful kings, he owed to the private condition in which he first entered the world, and in which he long continued: in that state he learned his art of secret transaction, and the knowledge by which he was able to oppose zeal to zeal, and make one enthusiast destroy another.

The King of Prussia gained the same arts, and, being born to fairer opportunities of using them, brought to the throne the knowledge of a private man without the guilt of usurpation. Of this general acquaintance with the world there may be found some traces in his whole life. His conversation is like that of other men upon common topics, his letters have an air of familiar elegance, and his whole conduct is that of a man who has to do with men, and who is not ignorant what motives will prevail over friends or enemies.

In 1740, the old king fell sick, and spoke and acted in his illness with his usual turbulence and roughness, reproaching his physicians in the grossest terms with their unskilfulness and impotence, and imputing to their ignorance or wickedness the pain which their prescriptions failed to relieve. These insults they bore with the submission which is commonly paid to despotic monarchs; till at last the celebrated Hoffman was consulted, who failing, like the rest, to give ease to his majesty, was, like the rest, treated with injurious language. Hoffman, conscious of his own merit, replied, that he could not bear reproaches which he did not deserve; that he had tried all the remedies that art could supply, or nature could admit; that he was, indeed a professor by his majesty's bounty; but that, if his abilities or integrity were doubted, he was willing to leave, not only the university, but the kingdom, and that he could not be driven into any place where the name of Hoffman would want respect. The king, however unaccustomed to such returns, was struck with conviction of his own indecency, told Hoffman, that he had spoken well, and requested him to continue his attendance.

The king, finding his distemper gaining upon his strength, grew at last sensible that his end was approaching, and ordering the prince to be called to his bed, laid several injunctions upon him, of which one was to perpetuate the tall regiment by continual recruits, and another to receive his espoused wife. The prince gave him

a respectful answer, but wisely avoided to diminish his own right or power by an absolute promise; and the king died uncertain of the fate of the tall regiment.

The young king began his reign with great expectations, which he has yet surpassed. His father's faults produced many advantages to the first years of his reign. He had an army of seventy thousand men well disciplined, without any imputation of severity to himself; and was master of a vast treasure, without the crime or reproach of raising it. It was publicly said in our House of Commons, that he had eight millions sterling of our money; but I believe he that said it, had not considered how difficultly eight millions would be found in all the Prussian dominions. Men judge of what they do not see by that which they see. We are used to talk in England of millions with great familiarity, and imagine that there is the same affluence of money in other countries, in countries whose manufactures are few, and commerce little.

Every man's first cares are necessarily domestic. The king, being now no longer under influence, or its appearance, determined how to act towards the unhappy lady who had possessed for seven years the empty title of the Princess of Prussia. The papers of those times exhibited the conversation of their first interview; as if the king, who plans campaigns in silence, would not accommodate a difference with his wife, but with writers of news admitted as witnesses. It is certain that he received her as queen, but whether he treats her as a wife is yet in dispute.

In a few days his resolution was known with regard to the tall regiment; for some recruits being offered him, he rejected them; and this body of giants, by continued disregard, mouldered away.

He treated his mother with great respect, ordered that she should bear the title of *Queen-mother*, and that, instead of addressing him as *His Majesty*, she should only call him *Son*.

As he was passing soon after between Berlin and Potsdam, a thousand boys, who had been marked out for military service, surrounded his coach, and cried out, "Merciful king! deliver us from our slavery." He promised them their liberty, and ordered, the next day, that the badge should be taken off.

He still continued that correspondence with learned men which he began when he was prince; and the eyes of all scholars, a race of mortals formed for dependence, were upon him, as a man likely to renew the times of patronage, and to emulate the bounties of Lewis the Fourteenth.

It soon appeared that he was resolved to govern with very little ministerial assistance: he took cognizance of every thing with his own

eyes; declared, that in all contrarieties of interest between him and his subjects, the public good should have the preference; and in one of the first exertions of regal power banished the prime minister and favourite of his father, as one that had *betrayed his master and abused his trust*.

He then declared his resolution to grant a general toleration of religion, and among other liberalities of concession allowed the profession of Free Masonry. It is the great taint of his character, that he has given reason to doubt, whether this toleration is the effect of charity or indifference, whether he means to support good men of every religion, or considers all religions as equally good.

There had subsisted for some time in Prussia an order called the *Order for Favour*, which, according to its denomination, had been conferred with very little distinction. The king instituted the *Order for Merit*, with which he honoured those whom he considered as deserving. There were some who thought their merit not sufficiently recompensed by this new title; but he was not very ready to grant pecuniary rewards. Those who were most in his favour he sometimes presented with snuff-boxes, on which was inscribed, *Amülle augmenté le prix*.

He was, however, charitable, if not liberal, for he ordered the magistrates of the several districts to be very attentive to the relief of the poor; and if the funds established for that use were not sufficient, permitted that the deficiency should be supplied out of the revenues of the town.

One of his first cares was the advancement of learning. Immediately upon his accession, he wrote to Rollin and Voltaire, that he desired the continuance of their friendship; and sent for Mr. Maupertuis, the principal of the French academicians, who passed a winter in Lapland, to verify, by the mensuration of a degree near the Pole, the Newtonian doctrine of the form of the earth. He requested of Maupertuis to come to Berlin, to settle an academy, in terms of great ardour and great condescension.

At the same time, he showed the world that literary amusements were not likely, as has more than once happened to royal students, to withdraw him from the care of the kingdom, or make him forget his interest. He began by reviving a claim to Herstal and Hermal, two districts in the possession of the Bishop of Liege. When he sent his commissary to demand the homage of the inhabitants, they refused him admission, declaring that they acknowledged no sovereign but the bishop. The king then wrote a letter to the bishop, in which he complained of the violation of his right, and the contempt of his authority, charged the prelate with countenancing the late act of disobedience, and required an answer in two days.

In three days the answer was sent, in which the bishop founds his claim to the two lordships upon a grant of Charles the Fifth, guaranteed by France and Spain; alleges that his predecessors had enjoyed this grant above a century, and that he never intended to infringe the rights of Prussia; but, as the House of Brandenburg had always made some pretensions to that territory, he was willing to do what other bishops had offered, to purchase that claim for a hundred thousand crowns.

To every man that knows the state of the feudal countries, the intricacy of their pedigrees, the confusion of their alliances, and the different rules of inheritance that prevail in different places, it will appear evident, that of reviving antiquated claims there can be no end, and that the possession of a century is a better title than can commonly be produced. So long a prescription supposes an acquiescence in the other claimants; and that acquiescence supposes also some reason, perhaps now unknown, for which the claim was forborne. Whether this rule could be considered as valid in the controversy between these sovereigns, may, however, be doubted, for the bishop's answer seems to imply, that the title of the House of Brandenburg had been kept alive by repeated claims, though the seizure of the territory had been hitherto forborne.

The king did not suffer his claim to be subjected to any altercations, but, having published a declaration, in which he charged the bishop with violence and injustice, and remarked that the feudal laws allowed every man, whose possession was withheld from him, to enter it with an armed force, he immediately despatched two thousand soldiers into the controverted countries, where they lived without control, exercising every kind of military tyranny, till the cries of the inhabitants forced the bishop to relinquish them to the quiet government of Prussia.

This was but a petty acquisition; the time was now come when the King of Prussia was to form and execute greater designs. On the 9th of October, 1740, half Europe was thrown into confusion by the death of Charles the Sixth, Emperor of Germany; by whose death all the hereditary dominions of the House of Austria descended, according to the pragmatic sanction, to his eldest daughter, who was married to the Duke of Lorraine, at the time of the emperor's death, Duke of Tuscany.

By how many securities the pragmatic sanction was fortified, and how little it was regarded when those securities became necessary; how many claimants started up at once to the several dominions of the house of Austria; how vehemently their pretensions were enforced, and how many invasions were threatened or attempted; the distresses of the emperor's daughter, known for several years by the title only of

the Queen of Hungary, because Hungary was the only country to which her claim had not been disputed; the firmness with which she struggled with her difficulties, and the good fortune by which she surmounted them; the narrow plan of this essay will not suffer me to relate. Let them be told by some other writer of more leisure and wider intelligence.

Upon the emperor's death, many of the German princes fell upon the Austrian territories as upon a dead carcase, to be dismembered among them without resistance. Among these, with whatever justice, certainly with very little generosity, was the King of Prussia, who, having assembled his troops, as was imagined, to support the pragmatic sanction, on a sudden entered Silesia with thirty thousand men, publishing a declaration, in which he disclaims any design of injuring the rights of the House of Austria, but urges his claim to Silesia, as rising "from ancient conventions of family and confraternity between the House of Brandenburg and the Princes of Silesia, and other honourable titles." He says, the fear of being defeated by other pretenders to the Austrian dominions, obliged him to enter Silesia without any previous expostulation with the queen, and that he shall "strenuously espouse the interests of the House of Austria."

Such a declaration was, I believe, in the opinion of all Europe, nothing less than the aggravation of hostility by insult, and was received by the Austrians with suitable indignation. The king pursued his purpose, marched forward, and in the frontiers of Silesia made a speech to his followers, in which he told them, that he considered them rather "as friends than subjects, that the troops of Brandenburg had been always eminent for their bravery, that they would always fight in his presence, and that he would recompence those who should distinguish themselves in his service, rather as a father than as a king."

The civilities of the great are never thrown away. The soldiers would naturally follow such a leader with alacrity; especially because they expected no opposition: but human expectations are frequently deceived.

Entering thus suddenly into a country which he was supposed rather likely to protect than to invade, he acted for some time with absolute authority: but, supposing that this submission would not always last, he endeavoured to persuade the queen to a cession of Silesia, imagining that she would easily be persuaded to yield what was already lost. He therefore ordered his minister to declare at Vienna, "that he was ready to guarantee all the German dominions of the House of Austria; that he would conclude a treaty with Austria, Russia, and the maritime powers; that he would endeavour that the Duke of Lorraine should be elected emperor,

and believed that he could accomplish it; that he would immediately advance to the queen two millions of florins; that, in recompence for all this, he required Silesia to be yielded to him."

These seem not to be the offers of a prince very much convinced of his own right. He afterwards moderated his claim, and ordered his minister to hint at Vienna, that half of Silesia would content him.

The queen answered, that though the king alleged, as his reason for entering Silesia, the danger of the Austrian territories from other pretenders, and endeavoured to persuade her to give up part of her possessions for the preservation of the rest, it was evident that he was the first and only invader, and that, ~~still~~ he entered in a hostile manner, all her estates were unmo-  
lestled.

To his promises of assistance, she replied, "that she set a high value on the King of Prussia's friendship; but that he was already obliged to assist her against invaders, both by the golden bull, and the pragmatic sanction, of which he was a guarantee, and that, if these ties were of no force, she knew not what to hope from other engagements."

Of his offers of alliances with Russia and the maritime powers, she observed, that it could be never fit to alienate her dominions for the consolidation of an alliance formed only to keep them intire.

With regard to his interest in the election of an emperor, she expressed her gratitude in strong terms; but added, that the election ought to be free, and that it must be necessarily embarrassed by contentions thus raised in the heart of the empire. Of the pecuniary assistance proposed, she remarks, that no prince ever made war to oblige another to take money, and that the contributions already levied in Silesia exceeded the two millions, offered as its purchase.

She concluded that as she values the king's friendship, she was willing to purchase it by any compliance but the diminution of her dominions, and exhorted him to perform his part in support of the pragmatic sanction.

The king, finding negotiation thus ineffectual, pushed forward his inroads, and now began to show how secretly he could take his measures. When he called a council of war, he proposed the question in a few words: all his generals wrote their opinions in his presence upon separate papers, which he carried away, and, examining them in private, formed his resolution, without imparting it otherwise than by his orders.

He began, not without policy, to seize first upon the estates of the clergy, an order every where necessary, and every where envied. He plundered the convents of their stores of provision; and told them, that he never had heard of any magazines erected by the apostles.

This insult was mean, because it was unjust; but those who could not resist were obliged to bear it. He proceeded in his expedition; and a detachment of his troops took Jablunca, one of the strong places of Silesia, which was soon after abandoned, for want of provisions, which the Austrian hussars, who were now in motion, were busy to interrupt.

One of the most remarkable events of the Silesian war, was the conquest of Great Glogaw, which was taken by an assault in the dark, headed by Prince Leopold of Anhalt Dessau. They arrived at the foot of the fortifications about twelve at night, and in two hours were masters of the place. In attempts of this kind, many accidents happen which cannot be heard without surprise. Four Prussian grenadiers who had climbed the ramparts, missing their own company, met an Austrian captain with fifty-two men: they were at first frightened, and were about to retreat; but, gathering courage, commanded the Austrians to lay down their arms, and in the terror of darkness and confusion were unexpectedly obeyed.

At the same time a conspiracy to kill or carry away the King of Prussia was said to be discovered. The Prussians published a memorial, in which the Austrian court was accused of employing emissaries and assassins against the king; and it was alleged, in direct terms, that one of them had confessed himself obliged by oath to destroy him, which oath had been given him in an Aulic council in the presence of the Duke of Lorraine.

To this the Austrians answered, "that the character of the queen and duke was too well known not to destroy the force of such an accusation, that the tale of the confession was an imposture, and that no such attempt was ever made."

Each party was now inflamed, and orders were given to the Austrian general to hazard a battle. The two armies met at Molwitz, and parted without a complete victory on either side. The Austrians quitted the field in good order; and the King of Prussia rode away upon the first disorder of his troops, without waiting for the last event. This attention to his personal safety has not yet been forgotten.

After this, there was no action of much importance. But the King of Prussia, irritated by opposition, transferred his interest in the election to the Duke of Bavaria; and the Queen of Hungary, now attacked by France, Spain, and Bavaria, was obliged to make peace with him at the expense of half Silesia, without procuring those advantages which were once offered her.

To enlarge dominions has been the boast of many princes; to diffuse happiness and security through wide regions has been granted to few. The King of Prussia has aspired to both these

honours, and endeavoured to join the praise of legislator to that of conqueror.

To settle property, to suppress false claims, and to regulate the administration of civil and criminal justice, are attempts so difficult and so useful, that I shall willingly suspend or contract the history of battles and sieges, to give a larger account of this pacific enterprise.

That the King of Prussia has considered the nature and the reasons of laws, with more attention than is common to princes, appears from his dissertation on the "Reasons for enacting and repealing Laws;" a piece which yet deserves notice, rather as a proof of good inclination than of great ability; for there is nothing to be found in it more than the most obvious books may supply, or the weakest intellect discover. Some of his observations are just and useful; but upon such a subject who can think without often thinking right? It is, however, not to be omitted, that he appears always propense towards the side of mercy. "If a poor man," says he, "steals in his want a watch, or a few pieces, from one to whom the loss is inconsiderable, is this a reason for condemning him to death?"

He regrets that the laws against duels have been ineffectual; and is of opinion that they can never attain their end, unless the princes of Europe shall agree not to afford an asylum to duellists, and to punish all who shall insult their equals either by word, deed, or writing. He seems to suspect this scheme of being chimerical. "Yet why," says he, "should not personal quarrels be submitted to judges, as well as questions of possession? and why should not a congress be appointed for the general good of mankind, as well as for so many purposes of less importance?"

He declares himself with great ardour against the use of torture, and by some misinformation charges the English that they still retain it.

It is perhaps impossible to review the laws of any country without discovering many defects any many superfluities. Laws often continue, when their reasons have ceased. Laws made for the first state of the society continue unabridged, when the general form of life is changed. Parts of the judicial procedure, which were at first only accidental, become in time essential; and formalities are accumulated on each other, till the art of litigation requires more study, than the discovery of right.

The King of Prussia, examining the institutions of his own country, thought them such as could only be amended by a general abrogation, and the establishment of a new body of law, to which he gave the name of the "Code Frederique," which is comprised in one volume of no great bulk, and must therefore unavoidably contain general positions to be accommodated to particular cases by the wisdom and integrity of

the courts. To embarrass justice by multiplicity of laws, or to hazard it by confidence in judges, seems to be the opposite rocks on which all civil institutions have been wrecked, and between which legislative wisdom has never yet found an open passage.

Of this new system of laws, contracted as it is, a full account cannot be expected in these memoirs; but, that curiosity may not be dismissed without some gratification, it has been thought proper to epitomise the king's "plan for the reformation of his courts."

"The differences which arise between members of the same society, may be terminated by a voluntary agreement between the parties, by arbitration, or by a judicial process.

"The two first methods produce more frequently a temporary suspension of disputes than a final termination. Courts of justice are therefore necessary, with a settled method of procedure, of which the most simple is to cite the parties, to hear their pleas, and dismiss them with immediate decision.

"This, however, is in many cases impracticable, and in others is so seldom practised, that it is frequent rather to incur loss than to seek for legal reparation, by entering a labyrinth of which there is no end.

"This tediousness of suits keeps the parties in disquiet and perturbation, rouses and perpetuates animosities, exhausts the litigants by expense, retards the progress of their fortune, and discourages strangers from settling.

"These inconveniences, with which the best regulated polities of Europe are embarrassed, must be removed, not by the total prohibition of suits, which is impossible, but by contraction of processes; by opening an easy way for the appearance of truth, and removing all obstructions by which it is concealed.

"The ordonnance of 1667, by which Lewis the Fourteenth established a uniformity of procedure through all his courts, has been considered as one of the greatest benefits of his reign.

"The king of Prussia, observing that each of his provinces had a different method of judicial procedure, proposed to reduce them all to one form; which being tried with success in Pomerania, a province remarkable for contention, he afterwards extended to all his dominions, ordering the judges to inform him of any difficulties which arose from it.

"Some settled method is necessary in judicial procedures. Small and simple causes might be decided upon the oral pleas of the two parties appearing before the judge: but many cases are so entangled and perplexed as to require all the skill and abilities of those who devote their lives to the study of the law.

"Advocates, or men who can understand and explain the question to be discussed, are there-

fore necessary. But these men, instead of endeavouring to promote justice and discover truth, have exerted their wits in the defence of bad causes, by forgeries of facts, and fallacies of argument.

"To remedy this evil, the king has ordered an inquiry into the qualifications of the advocate. All those who practise without a regular admission, or who can be convicted of disingenuous practice, are discarded. And the judges are commanded to examine which of the causes now depending have been protracted by the crimes and ignorance of the advocates, and to dismiss those who shall appear culpable.

"When advocates are too numerous to live by honest practice, they busy themselves in exciting disputes, and disturbing the community: the number of these to be employed in each court is therefore fixed.

"The reward of the advocates is fixed with due regard to the nature of the cause, and the labour required; but not a penny is received by them till the suit is ended, that it may be their interest, as well as that of the clients, to shorten the process.

"No advocate is admitted in petty courts, small towns, or villages; where the poverty of the people, and for the most part the low value of the matter contested, make despatch absolutely necessary. In those places the parties shall appear in person, and the judge make a summary decision.

"There must likewise be allowed a subordination of tribunals, and a power of appeal. No judge is so skilful and attentive as not sometimes to err. Few are so honest as not sometimes to be partial. Petty judges would become insupportably tyrannical if they were not restrained by the fear of a superior judicature; and their decision would be negligent or arbitrary if they were not in danger of seeing them examined and cancelled.

"The right of appeal must be restrained, that causes may not be transferred without end from court to court; and a peremptory decision must at last be made.

"When an appeal is made to a higher court, the appellant is allowed only four weeks to frame his bill, the judge of the lower court being to transmit to the higher all the evidences and informations. If upon the first view of the cause thus opened, it shall appear that the appeal was made without just cause, the first sentence shall be confirmed without citation of the defendant. If any new evidence shall appear, or any doubts arise, both the parties shall be heard.

"In the discussion of causes altercation must be allowed; yet to altercation some limits must be put. There are therefore allowed a bill, an answer, a reply, and a rejoinder, to be delivered in writing.

"No cause is allowed to be heard in more

than three different courts. To further the first decision, every advocate is enjoined, under severe penalties, not to begin a suit till he has collected all the necessary evidence. If the first court has decided in an unsatisfactory manner, an appeal may be made to the second, and from the second to the third. The process in each appeal is limited to six months. The third court may indeed pass an erroneous judgment; and then the injury is without redress. But this objection is without end, and therefore without force. No method can be found of preserving humanity from error; but of contest there must some time be an end; and he, who thinks himself injured for want of an appeal to a fourth court, must consider himself as suffering for the public.

"There is a special advocate appointed for the poor.

"The attorneys, who had formerly the care of collecting evidence, and of adjusting all the preliminaries of a suit, are now totally dismissed; the whole affair is put into the hands of the advocates, and the office of an attorney is annulled for ever.

"If any man is hindered by some lawful impediment from attending his suit, time will be granted him upon the representation of his case."

Such is the order according to which civil justice is administered through the extensive dominions of the king of Prussia; which, if it exhibits nothing very subtle or profound, affords one proof more that the right is easily discovered, and that men do not so often want ability to find, as willingness to practise it.

We now return to the war.

The time at which the Queen of Hungary was willing to purchase peace by the resignation of Silesia, though it came at last, was not come yet. She had all the spirit, though not all the power of her ancestors, and could not bear the thought of losing any part of her patrimonial dominions to the enemies which the opinion of her weakness raised everywhere against her.

In the beginning of the year 1742 the elector of Bavaria was invested with the imperial dignity, supported by the arms of France, master of the kingdom of Bohemia; and confederated with the elector Palatine, and the elector of Saxony, who claimed Moravia; and with the King of Prussia, who was in possession of Silesia.

Such was the state of the Queen of Hungary, pressed on every side, and on every side preparing for resistance: she yet refused all offers of accommodation, for every prince set peace at a price which she was not yet so far humbled as to pay.

The King of Prussia was among the most zealous and forward in the confederacy against her. He promised to secure Bohemia to the emperor, and Moravia to the elector of Saxony;

and, finding no enemy in the field able to resist him, he returned to Berlin, and left Schwerin his general to prosecute the conquest.

The Prussians in the midst of winter took Olmutz, the capital of Moravia, and laid the whole country under contribution. The cold then hindered them from action, and they only blocked up the fortresses of Brinn and Spielberg.

In the spring, the King of Prussia came again into the field, and undertook the siege of Brinn; but upon the approach of Prince Charles of Lorraine retired from before it, and quitted Moravia, leaving only a garrison in the capital.

The condition of the Queen of Hungary was now changed. She was a few months before without money, without troops, incircled with enemies. The Bavarians had entered Austria, Vienna was threatened with a siege, and the queen left it to the fate of war, and retired into Hungary; where she was received with zeal and affection, not unmingled however with that neglect which must always be borne by greatness in distress. She bore the disrespect of her subjects with the same firmness as the outrages of her enemies; and at last persuaded the English not to despair of her preservation, by not despairing herself.

Voltaire in his late history has asserted, that a large sum was raised for her success, by voluntary subscriptions of the English ladies. It is the great failing of a strong imagination to catch greedily at wonders. He was misinformed, and was perhaps unwilling to learn by a second inquiry a truth less splendid and amusing. A contribution was by news-writers, upon their own authority, fruitlessly, and, I think, illegally, proposed. It ended in nothing. The parliament voted a supply, and five hundred thousand pounds were remitted to her.

It has been always the weakness of the Austrian family to spend in the magnificence of empire those revenues which should be kept for its defence. The court is splendid, but the treasury is empty; and at the beginning of every war, advantages are gained against them, before their armies can be assembled and equipped.

The English money was to the Austrians as a shower to a field, where all the vegetative powers are kept unactive by a long continuance of drought. The armies, which had hitherto been hid in mountains and forests, started out of their retreats; and wherever the queen's standard was erected, nations scarcely known by their names, swarmed immediately about it. An army, especially a defensive army, multiplies itself. The contagion of enterprize spreads from one heart to another. Zeal for a native or detestation of a foreign sovereign, hope of sudden greatness or riches, friendship or emulation between particular men, or, what are perhaps more general and powerful, desire of novelty and impatience of inactivity, fill a camp with

adventurers, add rank to rank, and squadron to squadron.

The queen had still enemies on every part, but she now on every part had armies ready to oppose them. Austria was immediately recovered; the plains of Bohemia were filled with her troops, though the fortresses were garrisoned by the French. The Bavarians were recalled to the defence of their own country, now wasted by the incursions of troops that were called Barbarians, greedily enough of plunder, and daring perhaps beyond the rules of war, but otherwise not more cruel than those whom they attacked. Prince Lobkowitz with one army observed the motions of Broglie, the French general, in Bohemia; and Prince Charles with another put a stop to the advances of the King of Prussia.

It was now the turn of the Prussians to retire. They abandoned Olmutz, and left behind them part of their cannon and their magazines. And the king, finding that Broglie could not long oppose Prince Lobkowitz, hastened into Bohemia to his assistance; and having received a reinforcement of twenty-three thousand men, and taken the castle of Glatz, which, being built upon a rock scarcely accessible, would have defied all his power, had the garrison been furnished with provisions, he purposed to join his allies, and prosecute his conquests.

Prince Charles, seeing Moravia thus evacuated by the Prussians, determined to garrison the towns which he had just recovered, and pursue the enemy, who, by the assistance of the French, would have been too powerful for Prince Lobkowitz.

Success had now given confidence to the Austrians, and had proportionably abated the spirit of their enemies. The Saxons, who had co-operated with the King of Prussia in the conquest of Moravia, of which they expected the perpetual possession, seeing all hopes of sudden acquisition defeated, and the province left again to its former masters, grew weary of following a prince, whom they considered as no longer acting the part of their confederate; and when they approached the confines of Bohemia took a different road, and left the Prussians to their own fortune.

The king continued his march, and Charles his pursuit. At Czaslaw the two armies came in sight of one another, and the Austrians resolved on a decisive day. On the 6th of May, about seven in the morning, the Austrians began the attack: their impetuosity was matched by the firmness of the Prussians. The animosity of the two armies was much inflamed: the Austrians were fighting for their country, and the Prussians were in a place where defeat must inevitably end in death or captivity. The fury of the battle continued four hours: the Prussian horse were at length broken, and the

Austrians forced their way to the camp, where the wild troops, who had fought with so much vigour and constancy, at the sight of plunder forgot their obedience, nor had any man the least thought but how to load himself with the richest spoils.

While the right wing of the Austrians was thus employed, the main body was left naked: the Prussians recovered from their confusion, and regained the day. Charles was at last forced to retire, and carried with him the standards of his enemies, the proofs of a victory, which, though so nearly gained, he had not been able to keep.

The victory however was dearly bought; the Prussian army was much weakened, and the cavalry almost totally destroyed. Peace is easily made when it is necessary to both parties; and the King of Prussia had now reason to believe that the Austrians were not his only enemies. When he found Charles advancing, he sent to Broglie for assistance, and was answered that "he must have orders from Versailles." Such a desertion of his most powerful ally disconcerted him, but the battle was unavoidable.

When the Prussians were returned to the camp, he king, hearing that an Austrian officer was brought in mortally wounded, had the condescension to visit him. The officer, struck with this act of humanity, said, after a short conversation, "I should die, Sir, contentedly after this honour, if I might first show my gratitude to your majesty by informing you with what allies you are now united, allies that have no intention but to deceive you." The king appearing to suspect this intelligence; "Sir," said the Austrian, "if you will permit me to send a messenger to Vienna, I believe the queen will not refuse to transmit an intercepted letter now in her hands, which will put my report beyond all doubt."

The messenger was sent, and the letter transmitted, which contained the order sent to Broglie, who was, first, forbidden to mix his troops on any occasion with the Prussians. Secondly, he was ordered to act always at a distance from the king. Thirdly, to keep always a body of twenty thousand men to observe the Prussian army. Fourthly, to observe very closely the motions of the king, for important reasons. Fifthly, to hazard nothing; but to pretend want of reinforcements, or the absence of Belisle.

The king now with great reason considered himself as disengaged from the confederacy, being deserted by the Saxons, and betrayed by the French; he therefore accepted the mediation of King George, and in three weeks after the battle of Czaslaw made peace with the Queen of Hungary, who granted to him the whole province of Silesia, a country of such extent

and opulence that he is said to receive from it one-third part of his revenues. By one of the articles of this treaty it is stipulated, "that neither should assist the enemies of the other."

The Queen of Hungary thus disentangled on one side, and set free from the most formidable of her enemies, soon persuaded the Saxons to peace; took possession of Bavaria; drove the emperor, after all his imaginary conquests, to the shelter of a neutral town, where he was treated as a fugitive; and besieged the French in Prague, in the city which they had taken from her.

Having thus obtained Silesia, the King of Prussia returned to his own capital, where he reformed his laws, forbid the torture of criminals, concluded a defensive alliance with England, and applied himself to the augmentation of his army.

This treaty of peace with the Queen of Hungary was one of the first proofs given by the King of Prussia, of the secrecy of his counsels. Bellisle, the French general, was with him in the camp, as a friend and coadjutor in appearance, but in truth a spy, and a writer of intelligence. Men who have great confidence in their own penetration are often by that confidence deceived; they imagine that they can pierce through all the involutions of intrigue without the diligence necessary to weaker minds, and therefore sit idle and secure; they believe that none can hope to deceive them, and therefore that none will try. Bellisle, with all his reputation of sagacity, though he was in the Prussian camp, gave every day fresh assurances of the king's adherence to his allies; while Broglio, who commanded the army at a distance, discovered sufficient reason to suspect his desertion. Broglio was slighted, and Bellisle believed, till on the 11th of June the treaty was signed, and the king declared his resolution to keep a neutrality.

This is one of the great performances of polity which mankind seem agreed to celebrate and admire; yet to all this nothing was necessary but the determination of a very few men to be silent.

From this time the Queen of Hungary proceeded with an uninterrupted torrent of success. The French, driven from station to station, and deprived of fortress after fortress, were at last enclosed with their two generals, Bellisle and Broglio, in the walls of Prague, which they had stored with all provisions necessary to a town besieged, and where they defended themselves three months before any prospect appeared of relief.

The Austrians, having been engaged chiefly in the field, and in sudden and tumultuary excursions rather than a regular war, had no great degree of skill in attacking or defending towns. They likewise would naturally consider all the

mischiefs done to the city as falling ultimately upon themselves, and therefore were willing to gain it by time rather than by force.

It was apparent that, how long soever Prague might be defended, it must be yielded at last, and therefore all arts were tried to obtain an honourable capitulation. The messengers from the city were sent back sometimes unheard, but always with this answer, "That no terms would be allowed, but that they should yield themselves prisoners of war."

The condition of the garrison was in the eyes of all Europe desperate; but the French, to whom the praise of spirit and activity cannot be denied, resolved to make an effort for the honour of their arms. Maillebois was at that time encamped with his army in Westphalia. Orders were sent him to relieve Prague. The enterprise was considered as romantic. Maillebois was a march of forty days distant from Bohemia, the passes were narrow, and the ways foul; and it was likely that Prague would be taken before he could reach it. The march was, however, begun: the army, being joined by that of Count Saxe, consisted of fifty thousand men, who, notwithstanding all the difficulties which two Austrian armies could put, in their way, at last entered Bohemia. The siege of Prague, though not raised, was remitted, and a communication was now opened to it with the country. But the Austrians, by perpetual intervention, hindered the garrison from joining their friends. The officers of Maillebois incited him to a battle, because the army was hourly lessening by the want of provisions; but, instead of pressing on to Prague, he retired into Bavaria, and completed the ruin of the emperor's territories.

The court of France, disappointed and offended, conferred the chief command upon Broglio, who escaped from the besiegers with very little difficulty, and kept the Austrians employed till Bellisle by a sudden sally quitted Prague, and without any great loss joined the main army. Broglio then retired over the Rhine into the French dominions, wasting in his retreat the country which he had undertaken to protect, and burning towns, and destroying magazines of corn, with such wantonness, as gave reason to believe that he expected commendation from his court for any mischiefs done, by whatever means.

The Austrians pursued their advantages, recovered all their strong places, in some of which French garrisons had been left, and made themselves masters of Bavaria, by taking not only Munich the capital, but Ingolstadt, the strongest fortification in the elector's dominions, where they found a great number of cannon and a quantity of ammunition intended in the dreams of projected greatness for the siege of Vienna, all the archives of the state, the plate and orna-

ments of the electoral palace, and what had been considered as most worthy of preservation. Nothing but the warlike stores were taken away. An oath of allegiance to the queen was required of the Bavarians, but without any explanation whether temporary or perpetual.

The emperor lived at Francfort in the security that was allowed to neutral places, but without much respect from the German princes, except that, upon some objections made by the queen to the validity of his election, the King of Prussia declared himself determined to support him in the imperial dignity with all his power.

This may be considered as a token of no great affection to the Queen of Hungary, but it seems not to have raised much alarm. The German princes were afraid of new broils. To contest the election of an emperor once invested and acknowledged, would be to overthrow the whole Germanic constitution. Perhaps no election by plurality of suffrages was ever made among human beings, to which it might not be objected that voices were procured by illicit influence.

Some suspicions, however, were raised by the king's declaration, which he endeavoured to obviate by ordering his ministers to declare at London and at Vienna, that he was resolved not to violate the treaty of Breslaw. This declaration was sufficiently ambiguous, and could not satisfy those whom it might silence. But this was not a time for nice disquisitions; to distrust the king of Prussia might have provoked him, and it was most convenient to consider him as a friend, till he appeared openly as an enemy.

About the middle of the year 1744, he raised new alarms by collecting his troops and putting them in motion. The earl of Hindford about this time demanded the troops stipulated for the protection of Hanover, not perhaps because they were thought necessary, but that the king's designs might be guessed from his answer, which was, that troops were not granted for the defence of any country till that country was in danger, and that he could not believe the Elector of Hanover to be in much dread of an invasion, since he had withdrawn the native troops, and put them into the pay of England.

He had, undoubtedly, now formed designs which made it necessary that his troops should be kept together, and the time soon came when the scene was to be opened. Prince Charles of Lorraine, having chased the French out of Bavaria, lay for some months encamped on the Rhine, endeavouring to gain a passage into Alsace. His attempts had long been evaded by the skill and vigilance of the French general, till at last, June 21, 1744, he executed his design, and lodged his army in the French dominions, to the surprise and joy of a great part of Europe. It was now expected that the territories of France would in their turn feel the mis-

eries of war: and the nation, which so long kept the world in alarm, be taught at last the value of peace.

The King of Prussia now saw the Austrian troops at a great distance from him, engaged in a foreign country against the most powerful of all their enemies. Now, therefore, was the time to discover that he had lately made a treaty at Francfort with the emperor, by which he had engaged, "that as the court of Vienna and its allies appeared backward to re-establish the tranquillity of the empire, and more cogent methods appeared necessary; he, being animated with a desire of co-operating towards the pacification of Germany, should make an expedition for the conquest of Bohemia, and to put it into the possession of the emperor, his heirs and successors, for ever; in gratitude for which the emperor should resign to him and his successors a certain number of lordships, which are now part of the kingdom of Bohemia. His Imperial Majesty likewise guarantees to the King of Prussia the perpetual possession of Upper Silesia; and the king guarantees to the emperor the perpetual possession of Upper Austria, as soon as he shall have occupied it by conquest."

It is easy to discover that the king began the war upon other motives than zeal for peace; and that, whatever respect he was willing to show to the emperor, he did not purpose to assist him without reward. In prosecution of this treaty he put his troops in motion; and, according to his promise, while the Austrians were invading France, he invaded Bohemia.

Princes have this remaining of humanity, that they think themselves obliged not to make war without a reason. Their reasons are indeed not always very satisfactory. Lewis the Fourteenth seemed to think his own glory a sufficient motive for the invasion of Holland. The Czar attacked Charles of Sweden, because he had not been treated with sufficient respect when he made a journey in disguise. The King of Prussia, having an opportunity of attacking his neighbour, was not long without his reasons. On July 30th, he published his declaration, in which he declares:

That he can no longer stand an idle spectator of the troubles in Germany, but finds himself obliged to make use of force to restore the power of the laws, and the authority of the emperor.

That the Queen of Hungary has treated the emperor's hereditary dominions with inexpressible cruelty.

That Germany has been overrun with foreign troops which have marched through neutral countries without the customary requisitions.

That the emperor's troops have been attacked under neutral fortresses, and obliged to abandon the empire, of which their master is the head.

A a

That the imperial dignity has been treated with indecency by the Hungarian troops.

The queen declaring the election of the emperor void, and the diet of Francfort illegal, had not only violated the imperial dignity, but injured all the princes who have the right of election.

That he had no particular quarrel with the Queen of Hungary; and that he desires nothing for himself, and only enters as an auxiliary into a war for the liberties of Germany.

That the emperor had offered to quit his pretension to the dominions of Austria, on condition that his hereditary countries be restored to him.

That this proposal had been made to the King of England at Hanau, and rejected in such a manner as showed that the King of England had no intention to restore peace, but rather to make his advantage of the troubles.

That the mediation of the Dutch had been desired; but that they declined to interpose, knowing the inflexibility of the English and Austrian courts.

The same terms were again offered at Vienna, and again rejected: that therefore the queen must impute it to her own counsels that her enemies find new allies.

That he is not fighting for any interest of his own, that he demands nothing for himself; but is determined to exert all his powers in defence of the emperor, in vindication of the right of election, and in support of the liberties of Germany, which the Queen of Hungary would enslave.

When this declaration was sent to the Prussian minister in England, it was accompanied with a remonstrance to the king, in which many of the foregoing positions were repeated; the emperor's candour and disinterestedness were magnified; the dangerous designs of the Austrians were displayed; it was imputed to them as the most flagrant violation of the Germanic constitution, that they had driven the emperor's troops out of the empire; the public spirit and generosity of His Prussian Majesty were again heartily declared; and it was said, that this quarrel having no connection with English interests, the English ought not to interpose.

Austria and all her allies were put into amazement by this declaration, which at once dismounted them from the summit of success, and obliged them to fight through the war a second time. What successes, or what promises, Prussia received from France was never publicly known; but it is not to be doubted that a prince so watchful of opportunity sold assistance, when it was so much wanted, at the highest rate; nor can it be supposed that he exposed himself to so much hazard only for the free-

dom of Germany, and a few petty districts in Bohemia.

The French, who, from ravaging the empire at discretion, and wasting whatever they found either among enemies or friends, were now driven into their own dominions, and in their own dominions were insulted and pursued, were on a sudden by this new auxiliary restored to their former superiority, at least were disburdened of their invaders, and delivered from their terrors. And all the enemies of the house of Bourbon saw with indignation and amazement the recovery of that power which they had with so much cost and bloodshed brought low, and which their animosity and elation had disposed them to imagine yet lower than it was.

The Queen of Hungary still retained her firmness. The Prussian declaration was not long without an answer, which was transmitted to the European princes with some observations on the Prussian minister's remonstrance to the court of Vienna, which he was ordered by his master to read to the Austrian council, but not to deliver. The same caution was practised before when the Prussians, after the emperor's death, invaded Silesia. This artifice of political debate may, perhaps, be numbered by the admirers of greatness among the refinements of conduct; but, as it is a method of proceeding not very difficult to be contrived or practised, as it can be of very rare use to honesty or wisdom, and as it has been long known to that class of men whose safety depends upon secrecy, though hitherto applied chiefly in petty cheats and slight transactions; I do not see that it can much advance the reputation of regal understanding, or indeed that it can add more to the safety, than it takes away from the honour of him that shall adopt it.

The queen in her answer, after charging the King of Prussia with breach of the treaty of Breslaw, and observing how much her enemies will exult to see the peace now the third time broken by him, declares:

That she had no intention to injure the rights of the electors, and that she calls in question not the event but the manner of the election.

That she had spared the emperor's troops with great tenderness, and that they were driven out of the empire only because they were in the service of France.

That she is so far from disturbing the peace of the empire, that the only commotions now raised in it are the effect of the armaments of the King of Prussia.

Nothing is more tedious than public records, when they relate to affairs which by distance of time or place lose their power to interest the reader. Every thing grows little as it grows remote; and of things thus diminished, it is

sufficient to survey the aggregate without a minute examination of the parts.

It is easy to perceive, that, if the King of Prussia's reasons be sufficient, ambition or animosity can never want a plea for violence and invasion. What he charges upon the Queen of Hungary, the waste of country, the expulsion of the Bavarians, and the employment of foreign troops, is the unavoidable consequence of a war inflamed on either side to the utmost violence. All these grievances subsisted when he made the peace, and therefore they could very little justify its breach.

It is true, that every prince of the empire is obliged to support the imperial dignity, and assist the emperor when his rights are violated. And every subsequent contract must be understood in a sense consistent with former obligations. Nor had the king power to make a peace on terms contrary to that constitution by which he held a place among the Germanic electors. But he could have easily discovered that not the emperor but the Duke of Bavaria was the queen's enemy, not the administrator of the imperial power, but the claimant of the Austrian dominions. Nor did his allegiance to the emperor, supposing the emperor injured, oblige him to more than a succour of ten thousand men. But ten thousand men could not conquer Bohemia, and without the conquest of Bohemia he could receive no reward for the zeal and fidelity which he so loudly professed.

The success of this enterprise he had taken all possible precaution to secure. He was to invade a country guarded only by the faith of treaties, and therefore left unarmed, and unprovided of all defence. He had engaged the French to attack Prince Charles, before he should repass the Rhine, by which the Austrians would at least have been hindered from a speedy march into Bohemia: they were likewise to yield him such other assistance as he might want.

Relying therefore upon the promises of the French, he resolved to attempt the ruin of the house of Austria, and, in August 1744, broke into Bohemia at the head of a hundred and four thousand men. When he entered the country, he published a proclamation, promising, that his army should observe the strictest discipline, and that those who made no resistance should be suffered to remain in quiet in their habitations. He required that all arms, in the custody of whomsoever they might be placed, should be given up, and put into the hands of public officers. He still declared himself to act only as an auxiliary to the emperor, and with no other design than to establish peace and tranquillity throughout Germany, his dear country.

In this proclamation there is one paragraph of which I do not remember any precedent. He threatens, that if any peasant should be found with arms, he shall be hanged without further

inquiry; and that, if any lord shall connive at his vassals keeping arms in their custody, his village shall be reduced to ashes.

It is hard to find upon what pretence the King of Prussia could treat the Bohemians as criminals, for preparing to defend their native country, or maintaining their allegiance to their lawful sovereign against an invader, whether he appears principal or auxiliary, whether he professes to intend tranquillity or confusion.

His progress was such as gave great hopes to the enemies of Austria: like Cæsar, he conquered as he advanced, and met with no opposition till he reached the walls of Prague. The indignation and resentment of the Queen of Hungary may be easily conceived; the alliance of Francfort was now laid open to all Europe; and the partition of the Austrian dominions was again publicly projected. They were to be shared among the emperor, the King of Prussia, the Elector Palatine, and the Landgrave of Hesse. All the powers of Europe who had dreamed of controlling France, were awakened to their former terrors; all that had been done was now to be done again; and every court, from the Straits of Gibraltar to the Frozen Sea, was filled with exultation or terror, with schemes of conquest or precautions for defence.

The king delighted with his progress, and expecting, like other mortals elated with success, that his prosperity could not be interrupted, continued his march, and began in the latter end of September the siege of Prague. He had gained several of the outer posts, when he was informed that the convoy which attended his artillery was attacked by an unexpected party of the Austrians. The king went immediately to their assistance with the third part of his army, and found his troops put to flight, and the Austrians hasting away with his cannons: such a loss would have disabled him at once. He fell upon the Austrians, whose number would not enable them to withstand him, recovered his artillery, and having also defeated Bathiani, raised his batteries; and there being no artillery to be placed against him, he destroyed a great part of the city. He then ordered four attacks to be made at once, and reduced the besieged to such extremities, that in fourteen days the governor was obliged to yield the place.

At the attack commanded by Schwerin, a grenadier is reported to have mounted the bastion alone, and to have defended himself for some time with his sword, till his followers mounted after him; for this act of bravery, the king made him a lieutenant, and gave him a patent of nobility.

Nothing now remained but that the Austrians should lay aside all thought of invading France, and apply their whole power to their own defence. Prince Charles, at the first news of the Prussian invasion, prepared to repass the Rhine. This the French, according to their contract

with the king of Prussia, should have attempted to hinder; but they knew by experience the Austrians would not be beaten without resistance, and that resistance always incommodes an assailant. As the king of Prussia rejoiced in the distance of the Austrians, whom he considered as entangled in the French territories; the French rejoiced in the necessity of their return, and pleased themselves with the prospect of easy conquests, while powers whom they considered with equal malevolence should be employed in massacring each other.

Prince Charles took the opportunity of bright moonshine to repass the Rhine; and Noailles, who had early intelligence of his motions, gave him very little disturbance, but contented himself with attacking the rear-guard, and when they retired to the main body ceased his pursuit.

The king, upon the reduction of Prague, struck a medal, which had on one side a plan of the town, with this inscription:

“Prague taken by the King of Prussia,  
September 16th, 1744;  
For the third time in three years.”

On the other side were two verses, in which he prayed, “That his Conquests might produce Peace.” He then marched forward with the rapidity which constitutes his military character, took possession of almost all Bohemia, and began to talk of entering Austria and besieging Vienna.

The queen was not yet wholly without resource. The elector of Saxony, whether invited or not, was not comprised in the union of Frankfurt; and as every sovereign is growing less as his next neighbour is growing greater, he could not heartily wish success to a confederacy which was to aggrandise the other powers of Germany. The Prussians gave him likewise a particular and immediate provocation to oppose them; for, when they departed to the conquest of Bohemia, with all the elation of imaginary success, they passed through his dominions with unlicensed and contemptuous disdain of his authority. As the approach of Prince Charles gave a new prospect of events, he was easily persuaded to enter into an alliance with the queen, whom he furnished with a very large body of troops.

The King of Prussia having left a garrison in Prague, which he commanded to put the burghers to death if they left their houses in the night, went forward to take the other towns and fortresses, expecting, perhaps, that Prince Charles would be interrupted in his march; but the French, though they appeared to follow him, either could not or would not overtake him.

In a short time, by marches pressed on with the utmost eagerness, Charles reached Bohemia, leaving the Bavarians to regain the possession

of the wasted plains of their country, which their enemies, who still kept the strong places, might again seize at will. At the approach of the Austrian army, the courage of the King of Prussia seemed to have failed him. He retired from post to post, and evacuated town after town, and fortress after fortress, without resistance, or appearance of resistance, as if he was resigning them to the rightful owners.

It might have been expected that he should have made some effort to rescue Prague; but, after a faint attempt to dispute the passage of the Elbe, he ordered his garrison of eleven thousand men to quit the place. They left behind them their magazines, and heavy artillery, among which were seven pieces of remarkable excellence, called “The Seven Electors.” But they took with them their field cannon and a great number of carriages laden with stores and plunder, which they were forced to leave in their way to the Saxons and Austrians that harassed their march. They at last entered Silesia with the loss of about a third part.

The King of Prussia suffered much in his retreat; for besides the military stores, which he left every where behind him, even to the clothes of his troops, there was a want of provisions in his army, and consequently frequent desertions and many diseases; and a soldier sick or killed was equally lost to a flying army.

At last he re-entered his own territories, and, having stationed his troops in places of security, returned for a time to Berlin, where he forbade all to speak either ill or well of the campaign.

To what end such a prohibition could conduce, it is difficult to discover: there is no country in which men can be forbidden to know what they know, and what is universally known may as well be spoken. It is true, that in popular governments seditious discourses may inflame the vulgar; but in such governments they cannot be restrained, and in absolute monarchies they are of little effect.

When the Prussians invaded Bohemia, and this whole nation was fired with resentment, the King of England gave orders in his palace that none should mention his nephew with disrespect; by this command he maintained the decency necessary between princes, without enforcing, and probably without expecting, obedience but in his own presence.

The King of Prussia's edict regarded only himself, and therefore it is difficult to tell what was his motive, unless he intended to spare himself the mortification of absurd and illiberal flattery, which, to a mind stung with disgrace, must have been in the highest degree painful and disgusting.

Moderation in prosperity is a virtue very difficult to all mortals; forbearance of revenge, when revenge is within reach, is scarcely ever to be found among princes. Now was the time when

the queen of Hungary might perhaps have made peace on her own terms; but keenness of resentment, and arrogance of success, withheld her from the due use of the present opportunity. It is said, that the King of Prussia in his retreat sent letters to Prince Charles, which were supposed to contain ample concessions, but were sent back unopened. The King of England offered likewise to mediate between them; but his propositions were rejected at Vienna, where a resolution was taken not only to revenge the interruption of their success on the Rhine by the recovery of Silesia, but to reward the Saxons for their seasonable help by giving them part of the Prussian dominions.

In the beginning of the year 1745, died the Emperor Charles of Bavaria; the treaty of Francfort was consequently at an end; and the King of Prussia, being no longer able to maintain the character of auxiliary to the emperor, and having avowed no other reason for the war, might have honourably withdrawn his forces, and on his own principles have complied with terms of peace; but no terms were offered him; the queen pursued him with the utmost ardour of hostility, and the French left him to his own conduct and his own destiny.

His Bohemian conquests were already lost; and he was now chased back into Silesia, where, at the beginning of the year, the war continued in an equilibration by alternate losses and advantages. In April, the Elector of Bavaria seeing his dominions overrun by the Austrians, and receiving very little succour from the French, made a peace with the Queen of Hungary upon easy conditions, and the Austrians had more troops to employ against Prussia.

But the revolutions of war will not suffer human presumption to remain long unchecked. The peace with Bavaria was scarcely concluded, when the battle of Fontenoy was lost, and all the allies of Austria called upon her to exert her utmost power for the preservation of the Low Countries; and, a few days after the loss at Fontenoy, the first battle between the Prussians and the combined army of Austrians and Saxons was fought at Niedburgh, in Silesia.

The particulars of this battle were variously reported by the different parties, and published in the journals of that time; to transcribe them would be tedious and useless, because accounts of battles are not easily understood, and because there are no means of determining to which of the relations credit should be given. It is suffi-

cient that they all end in claiming or allowing a complete victory to the King of Prussia, who gained all the Austrian artillery, killed four thousand, took seven thousand prisoners, with the loss, according to the Prussian narrative, of only sixteen hundred men.

He now advanced again into Bohemia, where, however, he made no great progress. The Queen of Hungary, though defeated, was not subdued. She poured in her troops from all parts to the reinforcement of Prince Charles, and determined to continue the struggle with all her power. The king saw that Bohemia was an unpleasing and inconvenient theatre of war, in which he should be ruined by a miscarriage, and should get little by a victory. Saxony was left defenceless, and, if it was conquered, might be plundered.

He therefore published a declaration against the Elector of Saxony, and, without waiting for reply, invaded his dominions. This invasion produced another battle at Standentz, which ended, as the former, to the advantage of the Prussians. The Austrians had some advantage in the beginning; and their irregular troops, who are always daring, and are always ravenous, broke into the Prussian camp, and carried away the military chest. But this was easily repaired by the spoils of Saxony.

The Queen of Hungary was still inflexible, and hoped that fortune would at last change. She recruited once more her army, and prepared to invade the territories of Brandenburg; but the King of Prussia's activity prevented all her designs. One part of his forces seized Leipsic, and the other once more defeated the Saxons; the King of Poland fled from his dominions, Prince Charles retired into Bohemia. The King of Prussia entered Dresden as a conqueror, exacted very severe contributions from the whole country, and the Austrians and Saxons were at last compelled to receive from him such a peace as he would grant. He imposed no severe conditions except the payment of the contributions, made no new claim of dominions, and, with the Elector Palatine, acknowledged the Duke of Tuscany for emperor.

The lives of princes, like the histories of nations, have their periods. We shall here suspend our narrative of the King of Prussia, who was now at the height of human greatness, giving laws to his enemies, and courted by all the powers of Europe.

## B R O W N E.

THOUGH the writer of the followings *ESSAYS*\* seems to have had the fortune, common among men of letters, of raising little curiosity after his private life, and has, therefore, few memorials preserved of his felicities and misfortunes; yet, because an edition of a posthumous work appears imperfect and neglected, without some account of the author, it was thought necessary to attempt the gratification of that curiosity which naturally inquires by what peculiarities of nature or fortune eminent men have been distinguished, how uncommon attainments have been gained, and what influence learning had on its possessors, or virtue on its teachers.

SIR THOMAS BROWNE was born at London, in the parish of St. Michael, in Cheapside, on the 19th of October, 1605.† His father was a merchant, of an ancient family at Upton, in Cheshire. Of the name or family of his mother I find no account.

Of his childhood or youth there is little known, except that he lost his father very early; that he was, according to the common‡ fate of orphans, defrauded by one of his guardians; and that he was placed for his education at the school of Winchester.

His mother, having taken § three thousand pounds as the third part of her husband's property, left her son, by consequence, six thousand, a large fortune for a man destined to learning at that time, when commerce had not yet filled the nation with nominal riches. But it happened to him, as to many others, to be made poor by opulence; for his mother soon married Sir Thomas Dutton, probably by the inducement of her fortune; and he was left to the rapacity of his guardian, deprived now of both his parents, and therefore helpless and unprotected.

He was removed in the beginning of the year 1623, from Winchester to Oxford,|| and entered a gentleman-commoner of Broadgate-Hall,

which was soon afterwards endowed, and took the name of Pembroke-college, from the Earl of Pembroke, then chancellor of the University. He was admitted to the degree of Bachelor of Arts, January 31st, 1626-7; being, as Wood remarks, the first man of eminence graduated from the new college, to which the zeal or gratitude of those that love it most can wish little better than that it may long proceed as it began.

Having afterwards taken his degree of Master of Arts, he turned his studies to physic,\* and practised it for some time in Oxfordshire; but soon afterwards, either induced by curiosity, or invited by promises, he quitted his settlement, and accompanied† his father-in-law, who had some employment in Ireland, in a visitation of the forts and castles, which the state of Ireland then made necessary.

He that has once prevailed on himself to break his connections of acquaintance, and begin a wandering life, very easily continues it. Ireland had, at that time, very little to offer to the observation of a man of letters: he, therefore, passed‡ into France and Italy; made some stay at Montpellier and Padua, which were then the celebrated schools of physic; and returning home through Holland, procured himself to be created doctor of physic at Leyden.

When he began his travels, or when he concluded them, there is no certain account; nor do there remain any observations made by him in his passage through those countries which he visited. To consider, therefore, what pleasure or instruction might have been received from the remarks of a man so curious and diligent, would be voluntarily to indulge a painful reflection, and load the imagination with a wish, which, while it is formed, is known to be vain. It is, however, to be lamented, that those who are most capable of improving mankind, very frequently neglect to communicate their knowledge; either because it is more pleasing to gather ideas than to impart them, or because, to minds naturally great, few things appear of so much importance as to deserve the notice of the public.

About the year 1634,‡ he is supposed to have

returned to London; and the next year to have written his celebrated treatise, called "*Religio Medici*,"—The religion of a physician,\* which he declares himself never to have intended for the Press, having composed it only for his own exercise and entertainment. It, indeed, contains many passages, which, relating merely to his own person, can be of no great importance to the public; but when it was written, it happened to him as to others, he was too much pleased with his performance, not to think that it might please others as much; he, therefore, communicated it to his friends, and receiving, I suppose, that exuberant applause with which every man repays the grant of perusing a manuscript, he was not very diligent to obstruct his own praise by recalling his papers, but suffered them to wander from hand to hand, till at last, without his own consent, they were, in 1642, given to a printer.

This has, perhaps, sometimes befallen others; and this, I am willing to believe, did really happen to Dr. Browne: but there is surely some reason to doubt the truth of the complaints so frequently made of surreptitious editions. A song, or an epigram, may be easily printed without the author's Knowledge; because it may be learned when it is repeated, or may be written out with very little trouble; but a long treatise, however elegant, is not often copied by mere zeal or curiosity, but may be worn out in passing from hand to hand, before it is multiplied by a transcript. It is easy to convey an imperfect book, by a distant hand, to the press, and plead the circulation of a false copy as an excuse for publishing the true, or to correct what is found faulty or offensive, and charge the errors on the transcriber's depravations.

This is a stratagem, by which an author panting for fame, and yet afraid of seeming to challenge it, may at once gratify his vanity, and preserve the appearance of modesty; may enter the lists, and secure a retreat: and this candour might suffer to pass undetected as an innocent fraud, but that indeed no fraud is innocent; for the confidence which makes the happiness of society is in some degree diminished by every man whose practice is at variance with his words.

The "*Religio Medici*" was no sooner published than it excited the attention of the public, by the novelty of paradoxes, the dignity of sentiment, the quick succession of images, the multitude of abstruse allusions, the subtlety of disquisition, and the strength of language.

What is much read will be much criticised. The Earl of Dorset recommended this book to the perusal of Sir Kenelm Digby, who re-

turned his judgment upon it, not in a letter, but a book; in which, though mingled with some positions fabulous and uncertain, there are acute remarks, just censures, and profound speculations; yet its principal claim to admiration is, that\* it was written in twenty-four hours, of which part was spent in procuring Browne's book, and part in reading it.

Of these animadversions, when they were yet not all printed, either officiousness or malice informed Dr. Browne; who wrote to Sir Kenelm with much softness and ceremony, declaring the unworthiness of his work to engage such notice, the intended privacy of the composition, and the corruptions of the impression: and received an answer equally genteel and respectful, containing high commendations of the piece, pompous professions of reverence, meek acknowledgments of inability, and anxious apologies for the hastiness of his remarks.

The reciprocal civility of authors is one of the most risible scenes in the farce of life. Who would not have thought, that these two luminaries of their age had ceased to endeavour to grow bright by the obscurity of each other? yet the animadversions thus weak, thus precipitate, upon a book thus injured in the transcription, quickly passed the press; and "*Religio Medici*" was more accurately published, with an admonition prefixed "to those who have or shall peruse the observations upon a former corrupt copy;" in which there is a severe censure, not upon Digby, who was to be used with ceremony, but upon the observer who had usurped his name; nor was this invective written by Dr. Browne, who was supposed to be satisfied with his opponent's apology; but by some officious friend, zealous for his honour, without his consent.

Browne has, indeed, in his own preface, endeavoured to secure himself from rigorous examination, by alleging, that "many things are delivered rhetorically, many expressions merely tropical, and therefore many things to be taken in a soft and flexible sense, and not to be called unto the rigid test of reason." The first glance upon his book will indeed discover examples of this liberty of thought and expression: "I could be content (says he) to be nothing almost to eternity, if I might enjoy my Saviour at the last." He has little acquaintance with the acuteness of Browne, who suspects him of a serious opinion, that any thing can be "almost eternal," or that any time beginning and ending is not infinitely less than infinite duration.

In this book he speaks much, and, in the opinion of Digby, too much of himself; but with such generality and conciseness as affords very

\* Letter to Sir Kenelm Digby, prefixed to the "*Religio Medici*," fol. edit.

\* Digby's Letter to Browne, prefixed to the "*Religio Medici*," fol. edit.

little light to his biographer : he declares, that, besides the dialects of different provinces, he understood six languages ; that he was no stranger to astronomy ; and that he had seen several countries ; but what most awakens curiosity is, his solemn assertion, that " his life has been a miracle of thirty years ; which to relate were not history, but a piece of poetry, and would sound like a fable."

There is, undoubtedly, a sense in which all life is miraculous ; as it is a union of powers of which we can image no connection, a succession of motions of which the first cause must be supernatural ; but life, thus explained, whatever it may have of miracle, will have nothing of fable ; and, therefore, the author undoubtedly had regard to something, by which he imagined himself distinguished from the rest of mankind.

Of these wonders, however, the view that can be now taken of his life offers no appearance. The course of his education was like that of others, such as put him little in the way of extraordinary casualties. A scholastic and academical life is very uniform ; and has, indeed, more safety than pleasure. A traveller has greater opportunities of adventure ; but Browne traversed no unknown seas, or Arabian deserts ; and, surely, a man may visit France and Italy, reside at Montpellier and Padua, and at last take his degree at Leyden, without any thing miraculous. What it was that would, if it was related, sound so poetical and fabulous, we are left to guess ; I believe without hope of guessing rightly. The wonders probably were transacted in his own mind ; self-love, co-operating with an imagination vigorous and fertile as that of Browne, will find or make objects of astonishment in every man's life ; and, perhaps, there is no human being, however hid in the crowd from the observation of his fellow-mortals, who, if he has leisure and disposition to recollect his own thoughts and actions, will not conclude his life in some sort a miracle, and imagine himself distinguished from all the rest of his species by many discriminations of nature or of fortune.

The success of this performance was such, as might naturally encourage the author to new undertakings. A gentleman of Cambridge,\* whose name was Merryweather, turned it not inelegantly into Latin ; and from his version it was again translated into Italian, German, Dutch, and French ; and at Strasburg the Latin translation was published with large notes, by Levinus Nicolaus Moltkenius. Of the English annotations, which in all the editions from 1644, accompany the book, the author is unknown.

Of Merryweather, to whose zeal Browne was

so much indebted for the sudden extension of his renown, I know nothing, but that he published a small treatise for the instruction of young persons in the attainment of a Latin style. He printed his translation in Holland with some difficulty.\* The first printer to whom he offered it carried it to Salmasius, "who laid it by (says he) in state for three months," and then discouraged its publication : it was afterwards rejected by two other printers, and at last was received by Hackius.

The peculiarities of this book raised the author, as is usual, many admirers and many enemies ; but we know not of more than one professed answer, written under † the title of " *Medicus Medicatus*," by Alexander Röss, which was universally neglected by the world.

At the time when this book was published, Dr. Browne resided at Norwich, where he had settled in 1636, by ‡ the persuasion of Dr. Lushington, his tutor, who was then rector of Barnham West-gate in the neighbourhood. It is recorded by Wood, that his practice was very extensive, and that many patients resorted to him. In 1637 § he was incorporated doctor of physic in Oxford.

He married in 1641 || Mrs. Mileham, of a good family in Norfolk ; "a lady (says Whitefoot) of such symmetrical proportion to her worthy husband, both in the graces of her body and mind, that they seemed to come together by a kind of natural magnetism."

This marriage could not but draw the raillery of contemporary wits ¶ upon a man who had just been wishing in his new book, "that we might procreate like trees, without conjunction," and had \*\* lately declared, that "the whole world was made for man, but only the twelfth part of man for woman ;" and, that "man is the whole world, but woman only the rib or crooked part of man."

Whether the lady had been yet informed of these contemptuous positions, or whether she was pleased with the conquest of so formidable a rebel, and considered it as a double triumph, to attract so much merit, and overcome so powerful prejudices, or whether, like most others, she married upon mingled motives, between convenience and inclination ; she had, however, no reason to repent, for she lived happily with him one-and-forty years, and bore him ten children, of whom one son and three daughters outlived their parents : she survived him two

\* *Life of Sir Thomas Browne*.

years, and passed her widowhood in plenty, if not in opulence.

Browne, having now entered the world as an author, and experienced the delights of praise and molestations of censure, probably found his dread of the public eye diminished; and therefore was not long before he trusted his name to the critics a second time; for in 1646\* he printed "Enquiries into vulgar and common Errors;" a work, which as it arose not from fancy and invention, but from observation and books, and contained not a single discourse of one continued tenor, of which the latter part arose from the former, but an enumeration of many unconnected particulars, must have been the collection of years, and the effect of a design early formed and long pursued, to which his remarks had been continually referred, and which arose gradually to its present bulk by the daily aggregation of new particles of knowledge. It is indeed to be wished that he had longer delayed the publication, and added what the remaining part of his life might have furnished: the thirty-six years which he spent afterwards in study and experience, would doubtless have made large additions to an "Enquiry into vulgar Errors." He published in 1673 the sixth edition, with some improvements; but I think rather with explication of what he had already written, than any new heads of disquisition. But with the work such as the author, whether hindered from continuing it by eagerness of praise, or weariness of labour, thought fit to give, we must be content; and remember, that in all sublunary things there is something to be wished which we must wish in vain.

This book, like his former, was received with great applause, was answered by Alexander Ross, and translated into Dutch and German, and, not many years ago, into French. It might now be proper, had not the favour with which it was at first received filled the kingdom with copies, to reprint it with notes, partly supplemental, and partly emendatory, to subjoin those discoveries which the industry of the last age has made, and correct those mistakes which the author has committed not by idleness or negligence, but for want of Boyle's and Newton's philosophy.

He appears indeed to have been willing to pay labour for truth. Having heard a flying rumour of sympathetic needles, by which, suspended over a circular alphabet, distant friends or lovers might correspond, he procured two such alphabets to be made, touched his needles with the same magnet, and placed them upon proper spindles: the result was, that when he moved one of his needles, the other, instead of taking

by sympathy the same direction, "stood like the pillars of Hercules." That it continued motionless, will be easily believed; and most men would have been content to believe it, without the labour of so hopeless an experiment. Browne might himself have obtained the same conviction by a method less opereuse, if he had thrust his needles through corks, and set them afloat in two basons of water.

Notwithstanding his zeal to detect old errors, he seems not very easy to admit new positions, for he never mentions the motion of the earth but with contempt and ridicule, though the opinion which admits it was then growing popular, and was surely plausible, even before it was confirmed by later observations.

The reputation of Browne encouraged some low writer to publish, under his name a book called "Nature's Cabinet unlocked,"\* translated, according to Wood, from the physics of Magirus; of which Browne took care to clear himself, by modestly advertising, that "if any man had been benefited by it, he was not so ambitious as to challenge the honour thereof, as having no hand in that work."

In 1658, the discovery of some ancient urns in Norfolk gave him occasion to write "*Hydriotaphia*, Urn-burial, or a Discourse of sepulchral Urns," in which he treats, with his usual learning, on the funeral rites of the ancient nations; exhibits their various treatment of the dead; and examines the substances found in his Norfolkian urns. There is, perhaps, none of his works which better exemplifies his reading or memory. It is scarcely to be imagined, how many particulars he has amassed together, in a treatise which seems to have been occasionally written; and for which, therefore, no materials could have been previously collected. It is indeed, like other treatises of antiquity, rather for curiosity than use; for it is of small importance to know which nation buried their dead in the ground, which threw them into the sea, or which gave them to the birds and beasts; when the practice of cremation began, or when it was disused; whether the bones of different persons were mingled in the same urn; what oblations were thrown into the pyre; or how the ashes of the body were distinguished from those of other substances. Of the uselessness of these inquiries Browne seems not to have been ignorant; and therefore concludes them with an observation which can never be too frequently recollected:

"All or most apprehensions rested in opinions of some future being, which, ignorantly or coldly believed, begat those perverted conceptions, ceremonies, sayings, which Christians pity or

\* Life of Sir Thomas Browne.

\* Wood, and Life of Sir Thomas Browne.

† At the end of *Hydriotaphia*.

laugh at. Happy are they, which live not in that disadvantage of time, when men could say little for futurity, but from reason; whereby the noblest mind fell often upon doubtful deaths, and melancholy dissolutions; with these hopes Socrates warmed his doubtful spirits against the cold potion; and Cato, before he durst give the fatal stroke, spent part of the night in reading the immortality of Plato, thereby confirming his wavering hand unto the animosity of that attempt.

"It is the heaviest stone that melancholy can throw at a man, to tell him that he is at the end of his nature; or that there is no further state to come, unto which this seems progressional, and otherwise made in vain: without this accomplishment, the natural expectation and desire of such a state were but a fallacy in nature; unsatisfied considerators would quarrel at the justness of the constitution, and rest content that Adam had fallen lower, whereby, by knowing no other original, and deeper ignorance of themselves, they might have enjoyed the happiness of inferior creatures, who in tranquillity possess their constitutions, as having not the apprehension to deplore their own natures; and being framed below the circumference of these hopes of cognition of better things, the wisdom of God hath necessitated their contentment. But the superior ingredient and obscured part of ourselves, whereto all present felicities afford no resting contentment, will be able at last to tell us we are more than our present selves: and evacuate such hopes in the fruition of their own accomplishments."

To his treatise on "Urn-burial" was added "The Garden of Cyrus, or the quincunxial lozenge, or network plantation of the Ancients, artificially, naturally, mystically, considered." This discourse he begins with the "Sacred Garden," in which the first man was placed; and deduces the practice of horticulture from the earliest accounts of antiquity, to the time of the Persian Cyrus, the first man whom we actually know to have planted a quincunx; which, however, our author is inclined to believe of longer date, and not only discovers it in the description of the hanging gardens of Babylon, but seems willing to believe, and to persuade his reader, that it was practised by the feeders on vegetables before the flood.

Some of the most pleasing performances have been produced by learning and genius exercised upon subjects of little importance. It seems to have been in all ages the pride of wit, to show how it could exalt the low, and amplify the little. To speak not inadequately of things really and naturally great, is a task not only difficult but disagreeable; because the writer is degraded in his own eyes by standing in comparison with his subject, to which he can hope to add nothing from his imagination: but it is a

perpetual triumph of fancy to expand a scanty theme, to raise glittering ideas from obscure properties, and to produce to the world an object of wonder to which nature had contributed little. To this ambition, perhaps we owe the frogs of Homer, the gnat and the bees of Virgil, the butterfly of Spenser, the shadow of Wowerus, and the quincunx of Browne.

In the prosecution of this sport of fancy, he considers every production of art and nature in which he could find any decussation or approaches to the form of a quincunx: and, as a man once resolved upon ideal discoveries seldom searches long in vain, he finds his favourite figure in almost every thing, whether natural or invented, ancient or modern, rude or artificial, sacred or civil; so that a reader, not watchful against the power of his infusions, would imagine that decussation was the great business of the world, and that nature and art had no other purpose than to exemplify and imitate a quincunx.

To show the excellence of this figure he enumerates all its properties; and finds in it almost every thing of use or pleasure: and to show how readily he supplies what we cannot find, one instance may be sufficient: "though therein (says he) we meet not with right angles, yet every rhombus containing four angles equal unto two right, it virtually contains two right in every one."

The fanciful sports of great minds are never without some advantage to knowledge. Browne has interspersed many curious observations on the form of plants, and the laws of vegetation; and appears to have been a very accurate observer of the modes of germination, and to have watched with great nicety the evolution of the parts of plants from their seminal principles.

He is then naturally led to treat of the number Five; and finds, that by this number many things are circumscribed; that there are five kinds of vegetable productions, five sections of a cone, five orders of architecture, and five acts of a play. And observing that five was the ancient conjugal, or wedding number, he proceeds to a speculation which I shall give in his own words; "the ancient numerists made out the conjugal number by two and three, the first parity and imparity, the active and passive digits, the material and formal principles in generative societies."

These are all the tracts which he published. But many papers were found in his closet: "some of them, (says Whitefoot,) designed for the press, were often transcribed and corrected by his own hand, after the fashion of great and curious writers."

Of these, two collections have been published; one by Dr. Tenison, the other in 1722, by a nameless editor. Whether the one or the other selected those pieces which the author would have preferred, cannot be known; but they have

both the merit of giving to mankind what was too valuable to be suppressed; and what might, without their interposition, have perhaps perished among other innumerable labours of learned men, or have been burnt in a scarcity of fuel, like the papers of Peireskian.

The first of these posthumous treatises contains "Observations upon several Plants mentioned in Scripture:" these remarks, though they do not immediately either rectify the faith, or refine the morals of the reader, yet are by no means to be censured as superfluous niceties, or useless speculations; for they often show some propriety of description, or elegance of allusion, utterly undiscoverable to readers not skilled in oriental botany; and are often of more important use, as they remove some difficulty from narratives, or some obscurity from precepts.

The next is, "Of Garlands, or coronary and garland Plants;" a subject merely of learned curiosity, without any other end than the pleasure of reflecting on ancient customs, or on the industry with which studious men have endeavoured to recover them.

The next is a letter, "On the Fishes eaten by our Saviour with his Disciples, after his Resurrection from the Dead:" which contains no determinate resolution of the question, what they were, for indeed it cannot be determined. All the information that diligence or learning could supply consists in an enumeration of the fishes produced in the waters of Judea.

Then follow, "Answers to certain Queries about Fishes, Birds, and Insects;" and "A Letter of Hawks and Falconry ancient and modern;" in the first of which he gives the proper interpretation of some ancient names of animals, commonly mistaken; and in the other has some curious observations on the art of hawking, which he considers as a practice unknown to the ancients. I believe all our sports of the field are of Gothic original; the ancients neither hunted by the scent, nor seemed much to have practised horsemanship as an exercise; and though in their works there is mention of *aucupium* and *piscatio*, they seem no more to have been considered as diversions, than agriculture or any other manual labour.

In two more letters he speaks of the *cymbals of the Hebrews*, but without any satisfactory determination; and of *ropalic* or *gradual verses*, that is, of verses beginning with a word of one syllable, and proceeding by words of which each has a syllable more than the former; as,

"O deus, æternæ stationis conciliator.

AUSONIUS.

And after this manner pursuing the hint, he mentions many other restrained methods of versifying, to which industrious ignorance has sometimes voluntarily subjected itself.

His next attempt is "On Languages, and

particularly the Saxon Tongue." He discourses with great learning, and generally with great justness, of the derivation and changes of languages; but, like other men of multifarious learning, he receives some notions without examination. Thus he observes, according to the popular opinion, that the Spaniards have retained so much Latin as to be able to compose sentences that shall be at once grammatically Latin and Castilian: this will appear very unlikely to a man that considers the Spanish terminations; and Howell, who was eminently skilful in the three provincial languages, declares, that after many essays he never could effect it.\*

The principal design of this letter is to show the affinity between the modern English and the ancient Saxon; and he observes, very rightly, that "though we have borrowed many substantives, adjectives, and some verbs, from the French; yet the great body of numerals, auxiliary verbs, articles, pronouns, adverbs, conjunctions, and prepositions, which are the distinguishing and lasting parts of a language, remain with us from the Saxon."

To prove this position more evidently, he has drawn up a short discourse of six paragraphs, in Saxon and English; of which every word is the same in both languages, excepting the terminations and orthography. The words are indeed Saxon, but the phraseology is English; and, I think, would not have been understood by Bede or Elfric, notwithstanding the confidence of our author. He has, however, sufficiently proved his position, that the English resembles its paternal language more than any modern European dialect.

There remain five tracts of this collection yet unmentioned; one, "Of artificial Hills, Mounts, or Barrows, in England," in reply to an interrogatory letter of E. D. whom the writers of the *Biographia Britannica* suppose to be, if rightly printed, W. D. or Sir William Dugdale, one of Browne's correspondents. These are declared by Browne, in concurrence, I think, with all other antiquaries, to be for the most part funeral monuments. He proves, that both the Danes and Saxons buried their men of eminence under piles of earth, "which admitting

\* Howell, in his *Instructions for Foreign Travel*, asserts directly the reverse of what Johnson here ascribes to him; "I have beaten my brains (he says) to make one sentence good Italian and congruous Latin, but could never do it; but in Spanish it is very feasible, as, for example, in this stanza:

Infauſta Græcia tu parſis gentes  
Lubricas, ſed amicitias dolosas  
Machinando fraudes cauſioſas  
Ruinando animas innocentes

which is good Latin enough; and yet is vulgar Spanish, intelligible by every plebeian."

(says he) neither ornament, epitaph, nor inscription, may, if earthquakes spare them, outlast other monuments: obelisks have their term, and pyramids will tumble; but these mountainous monuments may stand, and are like to have the same period with the earth."

In the next, he answers two geographical questions; one concerning Troas, mentioned in the Acts and Epistles of St. Paul, which he determines to be the city built near the ancient Ilium; and the other concerning the Dead Sea, of which he gives the same account with other writers.

Another letter treats "Of the Answers of the Oracle of Apollo, at Delphos," to Croesus, king of Lydia. In this tract nothing deserves notice, more than that Browne considers the oracles as evidently and indubitably supernatural, and founds all his disquisition upon that postulate. He wonders why the physiologists of old, having such means of instruction, did not inquire into the secrets of nature: but judiciously concludes, that such questions would probably have been vain; "for in matters cognoscible, and formed for our disquisition, our industry must be our oracle, and reason our Apollo."

The pieces that remain are, "A Prophecy concerning the future State of several Nations;" in which Browne plainly discovers his expectation to be the same with that entertained lately with more confidence by Dr. Berkeley, "that America will be the seat of the fifth empire;" and "Museum clausum, sive Bibliotheca abscondita;" in which the author amuses himself with imagining the existence of books and curiosities, either never in being or irrecoverably lost.

These pieces I have recounted as they are ranged in Tenison's collection, because the editor has given no account of the time at which any of them were written. Some of them are of little value, more than as they gratify the mind with the picture of a great scholar, turning his learning into amusement; or show upon how great a variety of inquiries the same mind has been successfully employed.

The other collection of his posthumous pieces, published in octavo, London, 1722, contains "*Repertorium*;" or some Account of the Tombs and Monuments in the Cathedral of Norwich;" where, as Tenison observes, there is not matter proportionate to the skill of the antiquary.

The other pieces are "Answers to Sir William Dugdale's Inquiries about the Fens; a letter concerning Ireland; another relating to Urns newly discovered; some short strictures on different subjects; and a letter to a friend, on the death of his intimate friend," published singly by the author's son in 1690.

There is inserted in the *Biographia Britannica*, "A Letter containing instructions for the

study of Physic;" which, with the essays here offered to the public, completes the works of Dr. Browne.

To the life of this learned man there remains little to be added, but that in 1665, he was chosen honorary fellow of the college of physicians, as a man, "*Virtute et literis ornatissimus*,"—eminently embellished with literature and virtue: and, in 1671, received, at Norwich, the honour of knighthood from Charles II. a prince, who, with many frailties and vices, had yet skill to discover excellence, and virtue to reward it with such honorary distinctions at least as cost him nothing, yet, conferred by a king so judicious and so much beloved, had the power of giving merit new lustre and greater popularity.

Thus he lived in high reputation, till in his seventy-sixth year he was seized with a colic, which, after having tortured him about a week, put an end to his life at Norwich, on his birthday, October 19th, 1682.\* Some of his last words were expressions of submission to the will of God, and fearlessness of death.

He lies buried in the church of St. Peter Mancroft, in Norwich, with this inscription on a mural monument, placed on the south pillar of the altar:

M. S.  
Hic situs est THOMAS BROWNE, M. D.  
Et miles.  
Anno 1605, Londini natus;  
Generosa fami'a apud Upton  
In agro Cestriensi oriundus.  
Schola primum Wintoniensis, postea  
In Coll. Pembr.  
Apud Oxonienses bonis literis  
Haud leviter imbutus;  
In urbe hac Nordovicensi medicinam  
Arte egregia, et felici successu professus;  
Scriptis quibus tituli, RELIGIO MEDICI  
Et PSEUDODOXIA EPIDEMICA, alisque  
Per orbem notissimus.  
Vir prudentissimus, integerrimus, doctissimus;  
Obiit Octob. 19, 1682.  
Pie posuit moestissima conjux  
Da. Dorothe. Br.

Near the foot of this pillar  
Lies Sir Thomas Browne, knt. and doctor in physic,  
Author of *Religio Medici*, and other learned books,  
Who practised physic in this city 46 years,  
And died Oct. 1682, in the 77th year of his age.

In memory of whom,  
Dame Dorothy Browne, who had been his affectionate  
Wife 47 years, caused this monument to be  
Erected.

Besides this lady, who died in 1685, he left a son and three daughters. Of the daughters nothing very remarkable is known: but his son, Edward Browne, requires a particular mention.

\* Browne's Remains. Whitefoot.

He was born about the year 1643; and, after having passed through the classes of the school at Norwich, became bachelor of physic at Cambridge; and afterwards removing to Merton College, in Oxford, was admitted there to the same degree, and afterwards made a doctor. In 1668, he visited part of Germany; and in the year following made a wider excursion into Austria, Hungary, and Thessaly; where the Turkish sultan then kept his court at Larissa. He afterwards passed through Italy. His skill in natural history made him particularly attentive to mines and metallurgy. Upon his return he published an account of the countries through which he had passed; which I have heard commended by a learned traveller, who has visited many places after him, as written with scrupulous and exact veracity, such as is scarcely to be found in any other book of the same kind. But whatever it may contribute to the instruction of a naturalist, I cannot recommend it as likely to give much pleasure to common readers; for whether it be that the world is very uniform, and therefore he who is resolved to adhere to truth will have few novelties to relate; or that Dr. Browne was, by the train of his studies, led to inquire most after those things by which the greatest part of mankind is little affected; a great part of his book seems to contain very unimportant accounts of his passage from one place where he saw little, to another where he saw no more.

Upon his return, he practised physic in London; was made physician first to Charles II., and afterwards, in 1682, to St. Bartholomew's Hospital. About the same time he joined his name to those of many other eminent men, in "a translation of Plutarch's Lives." He was first censor, then elect, and treasurer of the college of physicians; of which, in 1705, he was chosen president, and held his office till in 1703, he died in a degree of estimation suitable to a man so variously accomplished, that King Charles had honoured him with this panegyric, that "he was as learned as any of the college, and as well-bred as any of the court."

Of every great and eminent character, part breaks forth into public view, and part lies hid in domestic privacy. Those qualities, which have been exerted in any known and lasting performances, may, at any distance of time, be traced and estimated; but silent excellencies are soon forgotten; and those minute peculiarities which discriminate every man from all others, if they are not recorded by those whom personal knowledge enables to observe them, are irrecoverably lost. This mutilation of character must have happened, among many others, to Sir Thomas Browne, had it not been delineated by his friend, Mr. Whitefoot, "who esteemed it an especial favour of Providence, to have had a

particular acquaintance with him for two-thirds of his life." Part of his observations I shall therefore copy.

"For a character of his person, his complexion and hair was answerable to his name; his stature was moderate, and a habit of body neither fat nor lean, but *moderatus*.

"In his habit of clothing, he had an aversion to all finery, and affected plainness both in the fashion and ornaments. He ever wore a cloak, or boots, when few others did. He kept himself always very warm, and thought it most safe so to do, though he never loaded himself with such a multitude of garments, as Suetonius reports of Augustus, enough to clothe a good family.

"The horizon of his understanding was much larger than the hemisphere of the world: all that was visible in the heavens he comprehended so well, that few that are under them knew so much: he could tell the number of the visible stars in his horizon, and call them all by their names that had any; and of the earth he had such a minute and exact geographical knowledge, as if he had been by Divine Providence ordained surveyor-general of the whole terrestrial orb, and its products, minerals, plants, and animals. He was so curious a botanist, that, besides the specifical distinctions, he made nice and elaborate observations, equally useful as entertaining.

"His memory, though not so eminent as that of Seneca or Scaliger, was capacious and tenacious, insomuch as he remembered all that was remarkable in any book that he had read; and not only knew all persons again that he had ever seen at any distance of time, but remembered the circumstances of their bodies, and their particular discourses and speeches.

"In the Latin poets he remembered every thing that was acute and pungent; he had read most of the historians, ancient and modern, wherein his observations were singular, not taken notice of by common readers; he was excellent company when he was at leisure, and expressed more light than heat in the temper of his brain.

"He had no despotical power over his affections and passions (that was a privilege of original perfection, forfeited by the neglect of the use of it,) but as large a political power over them, as any Stoic, or man of his time; whereof he gave so great experiment, that he hath very rarely been known to have been overcome with any of them. The strongest that were found in him, both of the irascible and concupiscible, were under the controul of his reason. Of admiration, which is one of them, being the only product either of ignorance or uncommon knowledge, he had more and less than other men, upon the same account of his knowing

more than others; so that though he met with many rarities, he admired them not so much as others do.

"He was never seen to be transported with mirth, or dejected with sadness; always cheerful but rarely merry, at any sensible rate; seldom heard to break a jest; and when he did, he would be apt to blush at the levity of it: his gravity was natural, without affectation.

"His modesty was visible in a natural habitual blush, which was increased upon the least occasion, and oft discovered without any observable cause.

"They that knew no more of him than by the briskness of his writings, found themselves deceived in their expectation, when they came in his company, noting the gravity and sobriety of his aspect and conversation; so free from loquacity or much talkativeness, that he was sometimes difficult to be engaged in any discourse; though when he was so, it was always singular, and never trite or vulgar. Parsimonious in nothing but his time, whereof he made as much improvement, with as little loss as any man in it: when he had any to spare from his drudging practice, he was scarce patient of any diversion from his study; so impatient of sloth and idleness, that he would say he could not do nothing.

"Sir Thomas understood most of the European languages; viz. all that are in Hutter's Bible, which he made use of. The Latin and Greek he understood critically; the Oriental languages, which never were vernacular in this part of the world, he thought the use of them would not answer the time and pains of learning them; yet had so great a veneration for the matrix of them, viz. the Hebrew, consecrated to the oracles of God, that he was not content to be totally ignorant of it; though very little of his science is to be found in any books of that primitive language. And though much is said to be written in the derivative idioms of that tongue, especially the Arabic, yet he was satisfied with the translations, wherein he found nothing admirable.

"In his religion he continued in the same mind which he had declared in his first book, written when he was but thirty years old, his *Religio Medici*, wherein he fully assented to that of the church of England, preferring it before any in the world, as did the learned Grotius. He attended the public service very constantly, when he was not withheld by his practice; never missed the sacrament in his parish, if he were in town; read the best English sermons he could hear of, with liberal applause; and delighted not in controversies. In his last sickness, wherein he continued about a week's time, enduring great pain of the colic, besides a continual fever, with as much patience as hath been seen in any man, without any pretence of Stoical apathy, animosity, or vanity of not being

concerned thereat, or suffering no impeachment of happiness—*Nihil agis, dolor*.

"His patience was founded upon the Christian philosophy, and a sound faith of God's providence, and a meek and holy submission thereunto, which he expressed in few words. I visited him near his end, when he had not strength to hear or speak much; the last words which I heard from him were, besides some expressions of dearness, that he did freely submit to the will of God, being without fear: he had often triumphed over the king of terrors in others, and given many repulses in the defence of patients; but, when his own turn came, he submitted with a meek, rational, and religious courage.

"He might have made good the old saying of *Dat Calvus opes*, had he lived in a place that could have afforded it. But his indulgence and liberality to his children, especially in their travels, two of his sons in divers countries, and two of his daughters in France, spent him more than a little. He was liberal in his house-entertainments and in his charity; he left a comfortable, but no great estate, both to his lady and children, gained by his own industry.

"Such was his sagacity and knowledge of all history, ancient and modern, and his observations thereupon so singular, that it hath been said by them that knew him best, that if his profession, and place of abode, would have suited his ability, he would have made an extraordinary man for the privy council, not much inferior to the famous Padre Paulo, the late oracle of the Venetian state.

"Though he were no prophet, nor son of a prophet, yet in that faculty which comes nearest it he excelled, i. e. the stochastic, wherein he was seldom mistaken as to future events, as well public as private; but not apt to discover any presages or superstition."

It is observable, that he, who in his earlier years had read all the books against religion, was in the latter part of his life averse from controversies. To play with important truths, to disturb the repose of established tenets, to subtilize objections, and elude proof, is too often the sport of youthful vanity, of which maturer experience commonly repents. There is a time when every man is weary of raising difficulties only to task himself with the solution, and desires to enjoy truth without the labour or hazard of contest. There is, perhaps, no better method of encountering these troublesome irruptions of scepticism, with which inquisitive minds are frequently harassed, than that which Browne declares himself to have taken: "If there arise any doubts in my way I do forget them; or at least defer them, till my better settled judgment, and more manly reason be able to resolve them: for I perceive, every man's reason is his best *Œdipus*, and will, upon a reasonable

truce, find a way to loose those bonds, wherewith the subtilties of error have enchain'd our more flexible and tender judgments."

The foregoing character may be confirmed and enlarged by many passages in the "Religio Medici;" in which it appears, from Whitefoot's testimony, that the author, though no very sparing panegyrist of himself, had not exceeded the truth, with respect to his attainments or visible qualities.

There are, indeed, some interior and secret virtues, which a man may sometimes have without the knowledge of others; and may sometimes assume to himself, without sufficient reasons for his opinion. It is charged upon Browne, by Dr. Watts, as an instance of arrogant temerity, that, after a long detail of his attainments, he declares himself to have escaped "the first and father-sin of pride." A perusal of the "Religio Medici" will not much contribute to produce a belief of the author's exemption from this father-sin: pride is a vice, which pride itself inclines every man to find in others, and to overlook in himself.

As easily may we be mistaken in estimating our own courage, as our own humility; and therefore, when Browne shows himself persuaded, that "he could lose an arm without a tear, or with a few groans be quartered to pieces," I am not sure that he felt in himself any uncommon powers of endurance; or, indeed, any thing more than a sudden effervescence of imagination, which, uncertain and involuntary as it is, he mistook for settled resolution.

"That there were not many extant, that in a noble way feared the face of death less than himself;" he might likewise believe at a very easy expense, while death was yet at a distance; but the time will come to every human being, when it must be known how well he can bear to die; and it has appeared that our author's fortitude did not desert him in the great hour of trial.

It was observed by some of the remarkers on the "Religio Medici," that "the author was yet alive, and might grow worse as well as better;" it is therefore happy, that this suspicion can be obviated by a testimony given to the continuance of his virtue, at a time when death had set him free from danger of change, and his panegyrist from temptation to flattery.

But it is not on the praises of others, but on his own writings, that he is to depend for the esteem of posterity; of which he will not easily be deprived while learning shall have any reverence among men; for there is no science in which he does not discover some skill; and scarce any kind of knowledge, profane or sacred, abstruse or elegant, which he does not appear to have cultivated with success.

His exuberance of knowledge, and plenitude

of ideas, sometimes obstruct the tendency of his reasoning and the clearness of his decisions; on whatever subject he employed his mind, there started up immediately so many images before him, that he lost one by grasping another. His memory supplied him with so many illustrations, parallel or dependent notions, that he was always starting into collateral considerations: but the spirit and vigour of his pursuit always gives delight; and the reader follows him, without reluctance, through his mazes, in themselves flowery and pleasing, and ending at the point originally in view.

"To have great excellences and great faults, *magnæ virtutes, nec minora vitia*, is the poesy," says our author, "of the best natures." This poesy may be properly applied to the style of Browne; it is vigorous, but rugged; it is learned, but pedantic; it is deep, but obscure; it strikes, but does not please; it commands, but does not allure: his tropes are harsh, and his combinations uncouth. He fell into an age in which our language began to lose the stability which it had obtained in the time of Elizabeth; and was considered by every writer as a subject on which he might try his plastic skill, by moulding it according to his own fancy. Milton, in consequence of this encroaching license, began to introduce the Latin idiom: and Browne, though he gave less disturbance to our structures in phraseology, yet poured in a multitude of exotic words; many, indeed, useful and significant, which, if rejected, must be supplied by circumlocution, such as *commensality* for the state of many living at the same table; but many superfluous, as a *paralogical* for an unreasonable doubt; and some so obscure, that they conceal his meaning rather than explain it, as *arthritical analogies*, for parts that serve some animals in the place of joints.

His style is, indeed, a tissue of many languages; a mixture of heterogeneous words, brought together from distant regions, with terms originally appropriated to one art, and drawn by violence into the service of another. He must, however, be confessed to have augmented our philosophical diction: and in defence of his uncommon words and expressions, we must consider, that he had uncommon sentiments, and was not content to express in many words that idea for which any language could supply a single term.

But his innovations are sometimes pleasing, and his temerities happy: he has many *verba ardentia*, forcible expressions, which he would never have found but by venturing to the utmost verge of propriety; and flights which would never have been reached, but by one who had very little fear of the shame of falling.

There remains yet an objection against the writings of Browne, more formidable than the animadversions of criticism. There are passages

from which some have taken occasion to rank him among deists, and others among atheists. It would be difficult to guess how any such conclusion should be formed, had not experience shown that there are two sorts of men willing to enlarge the catalogue of infidels.

It has been long observed, that an atheist has no just reason for endeavouring conversions; and yet none harass those minds which they can influence, with more importunity of solicitation to adopt their opinions. In proportion as they doubt the truth of their own doctrines, they are desirous to gain the attestation of another understanding: and industriously labour to win a proselyte, and eagerly catch at the slightest pretence to dignify their sect with a celebrated name.\*

The others become friends to infidelity only by unskilful hostility; men of rigid orthodoxy, cautious conversation, and religious asperity. Among these, it is too frequently the practice, to make in their heat concessions to atheism, or deism, which their most confident advocates had never dared to claim, or to hope. A sally of levity, an idle paradox, an indecent jest, an unreasonable objection, are sufficient, in the opinion of these men, to efface a name from the lists of Christianity, to exclude a soul from everlasting life. Such men are so watchful to censure, that they have seldom much care to look for favourable interpretations of ambiguities, to set the general tenor of life against single failures, or to know how soon any slip of inadvertency has been expiated by sorrow and retraction; but let fly their fulminations, without mercy or prudence, against slight offences or casual temerities, against crimes never committed, or immediately repented.

The infidel knows well what he is doing. He is endeavouring to supply, by authority, the deficiency of his arguments; and to make his cause less invidious, by showing numbers on his side: he will, therefore, not change his conduct, till he reforms his principles. But the zealot should recollect, that he is labouring by this frequency of excommunication, against his own cause, and voluntarily adding strength to the enemies of truth. It must always be the condition of a great part of mankind to reject and embrace tenets upon the authority of those whom they think wiser than themselves; and, therefore, the addition of every name to infidelity in some degree invalidates that argument upon which the religion of multitudes is necessarily founded.

Men may differ from each other in many religious opinions, and yet all may retain the es-

sentials of Christianity; men may sometimes eagerly dispute, and yet not differ much from one another: the rigorous persecutors of error should, therefore, enlighten their zeal with knowledge, and temper their orthodoxy with charity; that charity, without which orthodoxy is vain; charity that "thinketh no evil," but "hopeth all things," and "endureth all things."

Whether Browne has been numbered among the contemners of religion, by the fury of its friends, or the artifice of its enemies, it is no difficult task to replace him among the most zealous professors of Christianity. He may, perhaps, in the ardour of his imagination, have hazarded an expression, which a mind intent upon faults may interpret into heresy, if considered apart from the rest of his discourse; but a phrase is not to be opposed to volumes; there is scarcely a writer to be found, whose profession was not divinity, that has so frequently testified his belief of the sacred writings, has appealed to them with such unlimited submission, or mentioned them with such unvaried reverence.

It is, indeed, somewhat wonderful, that he should be placed without the pale of Christianity, who declares, "that he assumes the honourable style of a Christian," not because it is "the religion of his country," but because "having in his riper years and confirmed judgment seen and examined all, he finds himself obliged, by the principles of grace, and the law of his own reason, to embrace no other name but this:" who to specify his persuasion yet more, tells us, that "he is of the Reformed religion; of the same belief our Saviour taught, the apostles disseminated, the fathers authorised, and the martyrs confirmed;" who, though "paradoxical in philosophy, loves in divinity to keep the beaten road; and pleases himself that he has no taint of heresy, schism, or error:" to whom, "where the Scripture is silent, the Church is a text; where that speaks, 'tis but a comment;" and who uses not "the dictates of his own reason, but where there is a joint silence of both: who blesses himself, that he lived not in the days of miracles, when faith had been thrust upon him; but enjoys that greater blessing, pronounced to all that believe and saw not." He cannot surely be charged with a defect of faith, who "believes that our Saviour was dead, and buried, and rose again, and desires to see him in his glory;" and who affirms that "this is not much to believe;" that "we have reason to owe this faith unto history;" and that "they only had the advantage of a bold and noble faith, who lived before his coming; and upon obscure prophecies, and mystical types, could raise a belief." Nor can contempt of the positive and ritual parts of religion be imputed to him, who doubts, whether a good man would refuse a poisoned eucharist; and "who would violate his own arm, rather than a church."

\* Therefore no heretics desire to spread  
Their wild opinions like these Epicures.  
For so their staggering thoughts are computed,  
And other men's assent their doubt assures.

The opinions of every man must be learned from himself: concerning his practice, it is safest to trust the evidence of others. Where these testimonies concur, no higher degree of historical certainty can be obtained; and they

apparently concur to prove, that Browne was a zealous adherent to the faith of Christ, that he lived in obedience to his laws, and died in confidence of his mercy.

## ASCHAM.\*

It often happens to writers, that they are known only by their works; the incidents of a literary life are seldom observed, and therefore seldom recounted: but Ascham has escaped the common fate by the friendship of Edward Graunt, the learned master of Westminster-school, who devoted an oration to his memory, and has marked the various vicissitudes of his fortune. Graunt either avoided the labour of minute inquiry, or thought domestic occurrences unworthy of his notice; or, preferring the character of an orator to that of an historian, selected only such particulars as he could best express or most happily embellish. His narrative is therefore scanty, and I know not by what materials it can now be amplified.

ROGER ASCHAM was born in the year 1515, at Kirby Wiske, (or Kirby Wicke,) a village near Northallerton, in Yorkshire, of a family above the vulgar. His father, John Ascham, was house-steward in the family of Scroop; and in that age, when the different orders of men were at a greater distance from each other, and the manners of gentlemen were regularly formed by menial services in great houses, lived with a very conspicuous reputation. Margaret Ascham, his wife, is said to have been allied to many considerable families, but her maiden name is not recorded. She had three sons of whom Roger was the youngest, and some daughters; but who can hope, that of any progeny more than one shall deserve to be mentioned? They lived married sixty-seven years, and at last died together almost on the same hour of the same day.

Roger, having passed his first years under the care of his parents, was adopted into the family of Antony Wingfield, who maintained him, and

committed his education, with that of his own sons, to the care of one Bond, a domestic tutor. He very early discovered an unusual fondness for literature by an eager perusal of English books; and having passed happily through the scholastic rudiments, was put in 1530, by his patron Wingfield, to St. John's college in Cambridge.

Ascham entered Cambridge at a time when the last great revolution of the intellectual world was filling every academical mind with ardour or anxiety. The destruction of the Constantinopolitan empire had driven the Greeks with their language into the interior parts of Europe. the art of printing had made the books easily attainable, and the Greek now began to be taught in England. The doctrines of Luther had already filled all the nations of the Romish communion with controversy and dissention. New studies of literature, and new tenets of religion, found employment for all who were desirous of truth, or ambitious of fame. Learning was at that time prosecuted with that eagerness and perseverance which in this age of indifference and dissipation it is not easy to conceive. To teach or to learn, was at once the business and the pleasure of the academical life; and an emulation of study was raised by Cheke and Smith, to which even the present age perhaps owes many advantages, without remembering or knowing its benefactors.

Ascham soon resolved to unite himself to those who were enlarging the bounds of knowledge, and, immediately upon his admission into the college, applied himself to the study of Greek. Those who were zealous for the new learning, were often no great friends to the old religion; and Ascham, as he became a Grecian, became a Protestant. The Reformation was not yet begun, disaffection to Popery was considered as a crime justly punished by exclusion from favour and preferment, and was not yet openly professed, though superstition was gradually losing

\* First printed before his Works, 4to. published by Bennet, 1763.—H.

its hold upon the public. The study of Greek was reputable enough, and Ascham pursued it with diligence and success equally conspicuous. He thought a language might be most easily learned by teaching it; and when he had obtained some proficiency in Greek, read lectures, while he was yet a boy, to other boys, who were desirous of instruction. His industry was much encouraged by Pember, a man of great eminence at that time, though I know not that he has left any monuments behind him, but what the gratitude of his friends and scholars has bestowed. He was one of the great encouragers of Greek learning, and particularly applauded Ascham's lectures, assuring him in a letter, of which Graunt has preserved an extract, that he would gain more knowledge by explaining one of *Æsop's* fables to a boy, than by hearing one of *Homer's* poems explained by another.

Ascham took his bachelor's degree in 1534, February 18, in the eighteenth year of his age: a time of life at which it is more common now to enter the universities than to take degrees, but which, according to the modes of education then in use, had nothing of remarkable prematurity. On the 23d of March following, he was chosen fellow of the college, which election he considered as a second birth. Dr. Metcalf, the master of the college, a man as Ascham tells us, "meanly learned himself, but no mean encourager of learning in others," clandestinely promoted his election, though he openly seemed first to oppose it, and afterwards to censure it, because Ascham was known to favour the new opinions; and the master himself was accused of giving an unjust preference to the Northern men, one of the factions into which this nation was divided, before we could find any more important reason of dissention, than that some were born on the Northern and some on the Southern side of Trent. Any cause is sufficient for a quarrel; and the zealots of the North and South lived long in such animosity, that it was thought necessary at Oxford to keep them quiet by choosing one proctor every year from each.

He seems to have been hitherto supported by the bounty of Wingfield, which his attainment of a fellowship now freed him from the necessity of receiving. Dependence, though in those days it was more common, and less irksome, than in the present state of things, can never have been free from discontent; and therefore he that was released from it must always have rejoiced. The danger is, lest the joy of escaping from the patron may not leave sufficient memory of the benefactor. Of this forgetfulness Ascham cannot be accused; for he is recorded to have preserved the most grateful and affectionate reverence for Wingfield, and to have never grown weary of recounting his benefits.

His reputation still increased, and many resorted to his chamber to hear the Greek writers explained. He was likewise eminent for other accomplishments. By the advice of Pember, he had learned to play on musical instruments, and he was one of the few who excelled in the mechanical art of writing, which then began to be cultivated among us, and in which we now surpass all other nations. He not only wrote his pages with neatness, but embellished them with elegant draughts and illuminations; an art at that time so highly valued, that it contributed much both to his fame and his fortune.

He became master of arts in March, 1537, in his twenty-first year, and then, if not before, commenced tutor, and publicly undertook the education of young men. A tutor of one-and-twenty, however accomplished with learning, however exalted by genius, would now gain little reverence or obedience; but in those days of discipline and regularity, the authority of the statutes easily supplied that of the teacher; all power that was lawful was revered. Besides, young tutors had still younger pupils.

Ascham is said to have courted his scholars to study by every incitement, to have treated them with great kindness, and to have taken care at once to instil learning and piety, to enlighten their minds, and to form their manners. Many of his scholars rose to great eminence; and among them William Grindal was so much distinguished, that, by Cheke's recommendation, he was called to court as a proper master of languages for the Lady Elizabeth.

There was yet no established lecturer of Greek; the university therefore appointed Ascham to read in the open schools, and paid him out of the public purse an honorary stipend, such as was then reckoned sufficiently liberal. A lecture was afterwards founded by King Henry, and he then quitted the schools, but continued to explain Greek authors in his own college.

He was at first an opponent of the new pronunciation introduced, or rather of the ancient restored, about this time by Cheke and Smith, and made some cautious struggles for the common practice, which the credit and dignity of his antagonists did not permit him to defend very publicly, or with much vehemence: nor were they long his antagonists: for either his affection for their merit, or his conviction of the cogency of their arguments, soon changed his opinion and his practice, and he adhered ever after to their method of utterance.

Of this controversy it is not necessary to give a circumstantial account; something of it may be found in *Strype's Life of Smith*, and something in *Baker's Reflections upon Learning*; it is sufficient to remark here, that Cheke's pronunciation was that which now prevails in the schools of England. Disquisitions not only

verbal, but merely literal, are too minute for popular narration.

He was not less eminent as a writer of Latin, than as a teacher of Greek. All the public letters of the university were of his composition; and as little qualifications must often bring great abilities into notice, he was recommended to this honourable employment not less by the neatness of his hand, than the elegance of his style.

However great was his learning, he was not always immured in his chamber; but, being valetudinary, and weak of body, thought it necessary to spend many hours in such exercises as might best relieve him after the fatigue of study. His favourite amusement was archery, in which he spent, or, in the opinion of others, lost so much time, that those whom either his faults or virtues made his enemies, and perhaps some whose kindness wished him always worthily employed, did not scruple to censure his practice, as unsuitable to a man professing learning, and perhaps of bad example in a place of education.

To free himself from this censure was one of the reasons for which he published, in 1544, his "Toxophilus, or the schole or partitions of shooting," in which he joins the praise with the precepts of archery. He designed not only to teach the art of shooting, but to give an example of diction more natural and more truly English than was used by the common writers of that age, whom he censures for mingling exotic terms with their native language, and of whom he complains, that they were made authors, not by skill or education, but by arrogance and temerity.

He has not failed in either of his purposes. He has sufficiently vindicated archery as an innocent, salutary, useful, and liberal diversion; and if his precepts are of no great use, he has only shown, by one example among many, how little the hand can derive from the mind, how little intelligence can conduce to dexterity. In every art, practice is much; in arts manual, practice is almost the whole. Precept can at most but warn against error: it can never bestow excellence.

The bow has been so long disused, that most English readers have forgotten its importance, though it was the weapon by which we gained the battle of Agincourt; a weapon which, when handled by English yeomen, no foreign troops were able to resist. We were not only abler of body than the French, and therefore superior in the use of arms, which are forcible only in proportion to the strength with which they are handled, but the national practice of shooting for pleasure or for prizes, by which every man was inured to archery from his infancy, gave us insuperable advantage, the bow requiring

more practice to skilful use than any other instrument of offence.

Fire-arms were then in their infancy; and though battering-pieces had been some time in use, I know not whether any soldiers were armed with hand-guns when the "Toxophilus" was first published. They were soon after used by the Spanish troops, whom other nations made haste to imitate; but how little they could yet effect, will be understood from the account given by the ingenious author of the "Exercise for the Norfolk Militia."

"The first muskets were very heavy, and could not be fired without a rest; they had match-locks, and barrels of a wide bore, that carried a large ball and charge of powder, and did execution at a greater distance.

"The musketeers on a march carried only their rests and ammunition, and had boys to bear their muskets after them, for which they were allowed great additional pay.

"They were very slow in loading, not only by reason of the unwieldiness of the pieces, and because they carried the powder and balls separate, but from the time it took to prepare and adjust the match; so that their fire was not near so brisk as ours is now. Afterwards a lighter kind of matchlock musket came into use, and they carried their ammunition in bandeliers, which were broad belts that came over the shoulder, to which were hung several little cases of wood covered with leather, each containing a charge of powder; the balls they carried loose in a pouch; and they had also a priming-horn hanging by their side.

"The old English writers call those large muskets calivers: the *harquebuze* was a lighter piece, that could be fired without a rest. The matchlock was fired by a match fixed by a kind of tongs in the serpentine or cock, which, by pulling the trigger, was brought down with great quickness upon the priming in the pan: over which there was a sliding cover, which was drawn back by the hand just at the time of firing. There was a great deal of nicety and care required to fit the match properly to the cock, so as to come down exactly true on the priming, to blow the ashes from the coal, and to guard the pan from the sparks that fell from it. A great deal of time was also lost in taking it out of the cock, and returning it between the fingers of the left hand every time that the piece was fired; and wet weather often rendered the matches useless."

While this was the state of fire-arms, and this state continued among us to the civil war with very little improvement, it is no wonder that the long-bow was preferred by Sir Thomas Smith, who wrote of the choice of weapons in the reign of Queen Elizabeth, when the use of the bow still continued, though the musket was

gradually prevailing. Sir John Hayward, a writer yet later, has, in his History of the Norman kings, endeavoured to evince the superiority of the archer to the musketeer: however, in the long peace of King James, the bow was wholly forgotten. Guns have from that time been the weapons of the English, as of other nations, and as they are now improved, are certainly more efficacious.

Ascham had yet another reason, if not for writing his book, at least for presenting it to King Henry. England was not then what it may be now justly termed, the capital of literature; and therefore those who aspired to superior degrees of excellence, thought it necessary to travel into other countries. The purse of Ascham was not equal to the expense of peregrination; and therefore he hoped to have it augmented by a pension. Nor was he wholly disappointed; for the king rewarded him with a yearly payment of ten pounds.

A pension of ten pounds, granted by a king of England to a man of letters, appears to modern readers so contemptible a benefaction, that it is not unworthy of inquiry what might be its value at that time, and how much Ascham might be enriched by it. Nothing is more uncertain than the estimation of wealth by denominated money; the precious metals never retain long the same proportion to real commodities, and the same names in different ages do not imply the same quantity of metal; so that it is equally difficult to know how much money was contained in any nominal sum, and to find what any supposed quantity of gold or silver would purchase; both which are necessary to the commensuration of money, or the adjustment of proportion between the same sums at different periods of time.

A numeral pound in King Henry's time contained, as now, twenty shillings; and therefore it must be inquired what twenty shillings could perform. Bread-corn is the most certain standard of the necessities of life. Wheat was generally sold at that time for one shilling the bushel; if therefore we take five shillings the bushel for the current price, ten pounds were equivalent to fifty. But here is danger of a fallacy. It may be doubted whether wheat was the general bread-corn of that age; and if rye, barley, or oats, were the common food, and wheat, as I suspect, only a delicacy, the value of wheat will not regulate the price of other things. This doubt, however, is in favour of Ascham; for if we raise the worth of wheat, we raise that of his pension.

But the value of money has another variation, which we are still less able to ascertain: the rules of custom, or the different needs of artificial life, make that revenue little at one time which is great at another. Men are rich and poor, not only in proportion to what they have,

but to what they want. In some ages, not only necessities are cheaper, but fewer things are necessary. In the age of Ascham, most of the elegances and expenses of our present fashions were unknown: commerce had not yet distributed superfluity through the lower classes of the people, and the character of a student implied frugality, and required no splendour to support it. His pension, therefore, reckoning together the wants which he could supply, and the wants from which he was exempt, may be estimated, in my opinion, at more than a hundred pounds a-year; which, added to the income of his fellowship, put him far enough above distress.

This was a year of good fortune to Ascham. He was chosen orator to the university on the removal of Sir John Cheke to court, where he was made tutor to Prince Edward. A man once distinguished soon gains admirers. Ascham was now received to notice by many of the nobility, and by great ladies, among whom it was then the fashion to study the ancient languages. Lee, Archbishop of York, allowed him a yearly pension; how much we are not told. He was probably about this time employed in teaching many illustrious persons to write a fine hand; and among others, Henry and Charles, Dukes of Suffolk, the Princess Elizabeth, and Prince Edward.

Henry VIII. died two years after, and a reformation of religion being now openly prosecuted by King Edward and his council, Ascham, who was known to favour it, had a new grant of his pension, and continued at Cambridge, where he lived in great familiarity with Bucer, who had been called from Germany to the professorship of divinity. But his retirement was soon at an end; for in 1548 his pupil Grindal, the master of the Princess Elizabeth, died, and the princess, who had already some acquaintance with Ascham, called him from his college to direct her studies. He obeyed the summons, as we may easily believe, with readiness, and for two years instructed her with great diligence; but then, being disgusted either at her or her domestics, perhaps eager for another change of life, he left her without her consent, and returned to the university. Of this precipitance he long repented; and, as those who are not accustomed to disrespect cannot easily forgive it, he probably felt the effects of his imprudence to his death.

After having visited Cambridge, he took a journey into Yorkshire, to see his native place, and his old acquaintance, and there received a letter from the court, informing him, that he was appointed secretary to Sir Richard Morisone, who was to be despatched as ambassador into Germany. In his return to London he paid that memorable visit to Lady Jane Gray, in which he found her reading the *Phædo*, in Greek, as he has related in his *School-master*.

In September 1550, he attended Morisine to Germany, and wandered over great part of the country, making observations upon all that appeared worthy of his curiosity, and contracting acquaintance with men of learning. To his correspondent Sturmius he paid a visit, but Sturmius was not at home, and those two illustrious friends never saw each other. During the course of this embassy, Ascham undertook to improve Morisine in Greek, and for four days in the week explained some passages in Herodotus every morning, and more than two hundred verses of Sophocles or Euripides every afternoon. He read with him likewise some of the orations of Demosthenes. On the other days he compiled the letters of business, and in the night filled up his diary, digested his remarks, and wrote private letters to his friends in England, and particularly to those of his college, whom he continually exhorted to perseverance in study. Amidst all the pleasures of novelty which his travels supplied, and in the dignity of his public station, he preferred the tranquillity of private study, and the quiet of academical retirement. The reasonableness of this choice has been always disputed; and in the contrariety of human interests and dispositions, the controversy will not easily be decided.

He made a short excursion into Italy, and mentions in his "Schoolmaster" with great severity the vices of Venice. He was desirous of visiting Trent while the council were sitting; but the scantiness of his purse defeated his curiosity.

In this journey he wrote his "Report and Discourse of the Affairs in Germany," in which he describes the dispositions and interests of the German princes like a man inquisitive and judicious, and recounts many particularities which are lost in the mass of general history, in a style which to the ears of that age was undoubtedly mellifluous, and which is now a very valuable specimen of genuine English.

By the death of King Edward in 1553, the Reformation was stopped, Morisine was recalled, and Ascham's pension and hopes were at an end. He therefore retired to his fellowship in a state of disappointment and despair, which his biographer has endeavoured to express in the deepest strain of plaintive declamation. "He was deprived of all his support," says Graunt, "stripped of his pension, and cut off from the assistance of his friends, who had now lost their influence: so that he had *NEC PRÆMIA NEC PRÆDIA*, neither pension nor estate to support him at Cambridge." There is no credit due to a rhetorician's account either of good or evil. The truth is, that Ascham still had in his fellowship all that in the early part of his life had given him plenty, and might have lived like the other inhabitants of the college, with the advantage of more knowledge and higher repu-

tation. But notwithstanding his love of academical retirement, he had now too long enjoyed the pleasures and festivities of public life, to return with a good will to academical poverty.

He had, however, better fortune than he expected; and, if he lamented his condition like the historian, better than he deserved. He had during his absence in Germany been appointed Latin secretary to King Edward; and by the interest of Gardiner, Bishop of Winchester, he was instated in the same office under Philip and Mary, with a salary of £20 a-year.

Soon after his admission to his new employment, he gave an extraordinary specimen of his abilities and diligence, by composing and transcribing with his usual elegance, in three days, forty-seven letters to princes and personages, of whom cardinals were the lowest.

How Ascham, who was known to be a Protestant, could preserve the favour of Gardiner, and hold a place of honour and profit in Queen Mary's court, it must be very natural to inquire. Cheke, as is well known, was compelled to a recantation; and why Ascham was spared, cannot now be discovered. Graunt, at the time when the transactions of Queen Mary's reign must have been well enough remembered, declares that Ascham always made open profession of the reformed religion, and that Englefield and others often endeavoured to incite Gardiner against him, but found their accusations rejected with contempt: yet he allows, that suspicions, and charges of temporization and compliance had somewhat sullied his reputation. The author of the *Biographia Britannica* conjectures, that he owed his safety to his innocence and usefulness; that it would have been unpopular to attack a man so little liable to censure, and that the loss of his pen could not have been easily supplied. But the truth is, that morality was never suffered in the days of persecution to protect heresy: nor are we sure that Ascham was more clear from common failings than those who suffered more; and whatever might be his abilities, they were not so necessary, but Gardiner could have easily filled his place with another secretary. Nothing is more vain, than at a distant time to examine the motives of discrimination and partiality; for the inquirer, having considered interest and policy, is obliged at last to admit more frequent and more active motives of human conduct, caprice, accident, and private affections.

At that time, if some were punished, many were forborne; and of many why should not Ascham happen to be one? He seems to have been calm and prudent, and content with that peace which he was suffered to enjoy; a mode of behaviour that seldom fails to produce security. He had been abroad in the last years of King Edward, and had at least given no recent offence. He was certainly, according to his

own opinion, not much in danger; for in the next year he resigned his fellowship, which by Gardiner's favour he had continued to hold, though not resident; and married Margaret Howe, a young gentlewoman of a good family.

He was distinguished in this reign by the notice of Cardinal Pole, a man of great candour, learning, and gentleness of manners, and particularly eminent for his skill in Latin, who thought highly of Ascham's style; of which it is no inconsiderable proof, that when Pole was desirous of communicating a speech made by himself as legate, in parliament, to the pope, he employed Ascham to translate it.

He is said to have been not only protected by the officers of state, but favoured and countenanced by the queen herself, so that he had no reason of complaint in that reign of turbulence and persecution; nor was his fortune much mended, when, in 1558, his pupil Elizabeth mounted the throne. He was continued in his former employment, with the same stipend: but, though he was daily admitted to the presence of the queen, assisted her private studies, and partook of her diversions; sometimes read to her in the learned languages, and sometimes played with her at draughts and chess; he added nothing to his twenty pounds a-year but the prebend of Westwang in the church of York, which was given him the year following. His fortune was therefore not proportionate to the rank which his offices and reputation gave him, or to the favour in which he seemed to stand with his mistress. Of this parsimonious allotment it is again a hopeless search to inquire the reason. The queen was not naturally bountiful, and perhaps did not think it necessary to distinguish by any prodigality of kindness a man who had formerly deserted her, and whom she might still suspect of serving rather for interest than affection. Graunt exerts his rhetorical powers in praise of Ascham's disinterestedness and contempt of money; and declares, that though he was often reproached by his friends with neglect of his own interest, he never would ask any thing, and inflexibly refused all presents which his office or imagined interest induced any to offer him. Camden, however, imputes the narrowness of his condition to his love of dice and cock-fights: and Graunt, forgetting himself, allows that Ascham was sometimes thrown into agonies by disappointed expectations. It may be easily discovered from his "Schoolmaster," that he felt his wants, though he might neglect to supply them; and we are left to suspect that he showed his contempt of money only by losing at play. If this was his practice, we may excuse Elizabeth, who knew the domestic character of her servants, if she did not give much to him who was lavish of a little.

However he might fail in his economy, it

were indecent to treat with wanton levity the memory of a man who shared his frailties with all, but whose learning or virtues few can attain, and by whose excellences many may be improved, while himself only suffered by his faults.

In the reign of Elizabeth, nothing remarkable is known to have befallen him, except that, in 1563, he was invited by Sir Edward Sackville to write the "Schoolmaster," a treatise on education, upon an occasion which he relates in the beginning of the book.

This work, though begun with alacrity, in hope of a considerable reward, was interrupted by the death of the patron, and afterwards sorrowfully and slowly finished, in the gloom of disappointment, under the pressure of distress. But of the author's disinclination or dejection there can be found no tokens in the work, which is conceived with great vigour, and finished with great accuracy; and perhaps contains the best advice that was ever given for the study of languages.

This treatise he completed, but did not publish; for that poverty which in our days drives authors so hastily in such numbers to the press, in the time of Ascham, I believe, debarred them from it. The printers gave little for a copy, and, if we may believe the tale of Raleigh's history, were not forward to print what was offered them for nothing. Ascham's book, therefore, lay unseen in his study, and was at last dedicated to Lord Cecil by his widow.

Ascham never had a robust or vigorous body, and his excuse for so many hours of diversion was his inability to endure a long continuance of sedentary thought. In the latter part of his life he found it necessary to forbear any intense application of the mind from dinner to bed-time, and rose to read and write early in the morning. He was for some years hectically feverish; and, though he found some alleviation of his distemper, never obtained a perfect recovery of his health. The immediate cause of his last sickness was too close application to the composition of a poem, which he proposed to present to the queen on the day of her accession. To finish this, he forebore to sleep at his accustomed hours, till in December, 1568, he fell sick of a kind of lingering disease, which Graunt has not named, nor accurately described. The most afflictive symptom was want of sleep, which he endeavoured to obtain by the motion of a cradle. Growing every day weaker, he found it vain to contend with his distemper, and prepared to die with the resignation and piety of a true Christian. He was attended on his death-bed by Gravet, vicar of St. Sepulchre, and Dr. Nowel, the learned dean of St. Paul's, who gave ample testimony to the decency and devotion of his concluding life. He frequently testified his desire of that dissolution which he soon obtained.

His funeral sermon was preached by Dr. Nowel.

Roger Ascham died in the fifty-third year of his age, at a time when, according to the general course of life, much might yet have been expected from him, and when he might have hoped for much from others: but his abilities and his wants were at an end together; and who can determine, whether he was cut off from advantages, or rescued from calamities? He appears to have been not much qualified for the improvement of his fortune. His disposition was kind and social; he delighted in the pleasures of conversation, and was probably not much inclined to business. This may be suspected from the paucity of his writings. He has left little behind him; and of that little, nothing was published by himself but the "*Toxophilus*," and the account of Germany. The "*Schoolmaster*" was printed by his widow; and the epistles were collected by Graunt, who dedicated them to Queen Elizabeth, that he might have an opportunity of recommending his son, Giles Ascham, to her patronage. The dedication was not lost: the young man was made, by the queen's mandate, fellow of a college in Cambridge, where he obtained considerable reputation. What was the effect of his widow's dedication to Cecil, is not known: it may be hoped that Ascham's works obtained for his family, after his decease,

that support which he did not in his life very plentifully procure them.

Whether he was poor by his own fault, or the fault of others, cannot now be decided; but it is certain that many have been rich with less merit. His philological learning would have gained him honour in any country; and among us it may justly call for that reverence which all nations owe to those who first rouse them from ignorance, and kindle among them the light of literature. Of his manners nothing can be said but from his own testimony, and that of his contemporaries. Those who mention him allow him many virtues. His courtesy, benevolence, and liberality, are celebrated; and of his piety we have not only the testimony of his friends, but the evidence of his writings.

That his English works have been so long neglected, is a proof of the uncertainty of literary fame. He was scarcely known as an author in his own language till Mr. Upton published his "*Schoolmaster*" with learned notes. His other poems were read only by those few who delight in obsolete books; but as they are now collected into one volume, with the addition of some letters never printed before, the public has an opportunity of recompensing the injury, and allotting Ascham the reputation due to his knowledge and his eloquence.

# LETTERS.

## LETTER. I.

To MR. JAMES ELPHINSTON.

*Sept. 25th, 1750.*

DEAR SIR,

You have, as I find by every kind of evidence, lost an excellent mother; and I hope you will not think me incapable of partaking of your grief. I have a mother, now eighty-two years of age, whom therefore I must soon lose, unless it please God that she rather should mourn for me. I read the letters in which you relate your mother's death to Mrs. Strahan, and think I do myself honour, when I tell you, that I read them with tears; but tears are neither to you, nor to me, of any farther use, when once the tribute of nature has been paid. The business of life summons us away from useless grief, and calls us to the exercise of those virtues, of which we are lamenting our deprivation.

The greatest benefit which one friend can confer upon another, is to guard, and excite, and elevate his virtues. This your mother will still perform, if you diligently preserve the memory of her life, and of her death: a life, so far as I can learn, useful, wise, and innocent; and a death, resigned, peaceful, and holy. I cannot forbear to mention, that neither reason nor revelation denies you to hope that you may increase her happiness by obeying her precepts; and that she may, in her present state, look with pleasure upon every act of virtue to which her instructions or example have contributed. Whether this be more than a pleasing dream, or a just opinion of separate spirits, is, indeed, of no great importance to us, when we consider ourselves as acting under the eye of God: yet, surely, there is something pleasing in the belief, that our separation from those, whom we love, is merely corporeal; and it may be a great incitement to virtuous friendship, if it can be made probable, that that union, which has re-

ceived the divine approbation, shall continue to eternity.

There is one expedient, by which you may, in some degree, continue her presence. If you write down minutely what you remember of her from your earliest years, you will read it with great pleasure, and receive from it many hints of soothing recollection, when time shall remove her yet farther from you, and your grief shall be matured to veneration. To this, however painful for the present, I cannot but advise you, as to a source of comfort and satisfaction in the time to come; for all comfort and all satisfaction is sincerely wished you by,

Dear Sir,

Your most obliged, most obedient,

And most humble servant,

SAM. JOHNSON.

## LETTER II.—To MRS. THRALE.

*London, Aug. 13th, 1765.*

MADAM,

If you have really so good an opinion of me as you express, it will not be necessary to inform you how unwillingly I miss the opportunity of coming to Brighthelmstone in Mr. Thrale's company; or, since I cannot do what I wish first, how eagerly I shall catch the second degree of pleasure, by coming to you and him, as soon as I can dismiss my work from my hands.

I am afraid to make promises even to myself; but I hope that the week after the next will be the end of my present business. When business is done, what remains but pleasure? and where should pleasure be sought, but under Mrs. Thrale's influence?

Do not blame me for a delay by which I must suffer so much, and by which I suffer alone. If

you cannot think I am good, pray think I am mending, and that in time I may deserve to be, dear Madam, your, &c.

---

LETTER III.—To Mrs. THRALE.

*Litchfield, July 20th, 1767.*

MADAM,

THOUGH I have been away so much longer than I purposed or expected, I have found nothing that withdraws my affections from the friends whom I left behind, or which makes me less desirous of reposing at that place which your kindness and Mr. Thrale's allows me to call my home.

Miss Lucy\* is more kind and civil than I expected, and has raised my esteem by many excellences very noble and resplendent, though a little discoloured by hoary virginity. Every thing else recalls to my remembrance years, in which I proposed what, I am afraid, I have not done, and promised myself pleasure which I have not found. But complaint can be of no use; and why then should I depress your hopes by my lamentations? I suppose it is the condition of humanity to design what never will be done, and to hope what never will be obtained. But among the vain hopes, let me not number the hope which I have, of being long, dear Madam, your, &c.

---

LETTER IV.—To the Same.

*Litchfield, August 14th, 1769.*

MADAM,

I SET out on Thursday morning, and found my companion, to whom I was very much a stranger, more agreeable than I expected. We went cheerfully forward, and passed the night at Coventry. We came in late, and went out early; and therefore I did not send for my cousin Tom; but I design to make him some amends for the omission.

Next day we came early to Lucy, who was, I believe, glad to see us. She had saved her best gooseberries upon the tree for me; and, as Steele says, "I was neither too proud nor too wise" to gather them. I have rambled a very little *inter fontes et flumina nota*, but I am not yet well. They have cut down the trees in George Lane. Evelyn, in his book of Forest Trees, tells us of wicked men that cut down trees, and never prospered afterwards; yet no-

thing has deterred these audacious aldermen from violating the Hamadryads of George Lane. As an impartial traveller, I must however tell, that, in Stow-Street, where I left a draw-well, I have found a pump, but the lading-well in this ill-fated George Lane lies shamefully neglected.

I am going to-day, or to-morrow, to Ashbourne; but I am at a loss how I shall get back in time to London. Here are only chance coaches, so that there is no certainty of a place. If I do not come, let it not hinder your journey. I can be but a few days behind you; and I will follow in the Brightelmstone coach. But I hope to come.

I took care to tell Miss Porter, that I have got another Lucy. I hope she is well. Tell Mrs. Salusbury, that I beg her stay at Streatham, for little Lucy's sake. I am, &c.

---

LETTER V.—To the Same.

*Litchfield, July 11th, 1770.*

MADAM,

SINCE my last letter, nothing extraordinary has happened. Rheumatism, which has been very troublesome, is grown better. I have not yet seen Dr. Taylor, and July runs fast away. I shall not have much time for him, if he delays much longer to come or send. Mr. Green, the apothecary, has found a book, which tells who paid levies in our parish, and how much they paid, above a hundred years ago. Do you not think we study this book hard? Nothing is like going to the bottom of things. Many families that paid the parish-rates are now extinct, like the race of Hercules. *Pulvis et umbra sumus*. What is nearest us touches us most. The passions rise higher at domestic than at imperial tragedies. I am not wholly unaffected by the revolutions of Sadler-Street; nor can forbear to mourn a little when old names vanish away, and new come into their place.

Do not imagine, Madam, that I wrote this letter for the sake of these philosophical meditations; for when I began it, I had neither Mr. Green, nor his book, in my thoughts; but was resolved to write, and did not know what I had to send, but my respects to Mrs. Salusbury, and Mr. Thrale, and Harry, and the Misses. I am, dearest Madam, your, &c.

---

LETTER VI.—To the Same.

*Ashbourne, July 23d, 1770.*

DEAREST MADAM,

THERE had not been so long an interval between my two last letters, but that when I came

---

\* Miss Lucy Porter, daughter to Dr. Johnson's wife by a former husband.

hither I did not at first understand the hours of the post.

I have seen the great bull; and very great he is. I have seen likewise his heir apparent, who promises to inherit all the bulk and all the virtues of his sire. I have seen the man who offered a hundred guineas for the young bull, while he was yet little better than a calf. Matlock, I am afraid, I shall not see, but I purpose to see Dovedale; and, after all this seeing, I hope to see you. I am, &c.

---

LETTER VII.—*To the Same.*

*Ashbourne, July 3d, 1771.*

DEAR MADAM,

LAST Saturday I came to Ashbourne; the dangers or the pleasures of the journey I have at present no disposition to recount; else might I paint the beauties of my native plains; might I tell of the "smiles of nature and the charms of art;" else might I relate how I crossed the Staffordshire canal, one of the great efforts of human labour, and human contrivance; which, from the bridge on which I viewed it, passed away on either side, and loses itself in distant regions, uniting waters that nature had divided, and dividing lands which nature had united. I might tell how these reflections fermented in my mind till the chaise stopped at Ashbourne, at Ashbourne in the Peak. Let not the barren name of the Peak terrify you; I have never wanted strawberries and cream. The great bull has no disease but age. I hope in time to be like the great bull: and hope you will be like him too a hundred years hence. I am, &c.

---

LETTER VIII.—*To the Same.*

*Ashbourne, July 10th, 1771.*

DEAREST MADAM,

I AM obliged to my friend Harry, for his remembrance; but think it a little hard that I hear nothing from Miss.

There has been a man here to-day to take a farm. After some talk he went to see the bull, and said that he had seen a bigger. Do you think he is likely to get the farm?

*Toujours* strawberries and cream.

Dr. Taylor is much better, and my rheumatism is less painful. Let me hear in return as much good of you and Mrs. Salusbury. You despise the Dog and Duck; things that are at hand are always slighted. I remember that Dr. Grevil, of Gloucester, sent for that water when his wife was in the same danger; but he lived near Malvern, and you live near the Dog and

Duck. Thus, in difficult cases, we naturally trust most what we least know.

Why Bornefield, supposing that a lotion can do good, should despise laurel-water in comparison with his own receipt, I do not see; and see still less why he should laugh at that which Wall thinks efficacious. I am afraid philosophy will not warrant much hope in a lotion.

Be pleased to make my compliments from Mrs. Salusbury to Susy. I am, &c.

---

LETTER IX.—*To the Same.*

*October 31st, 1772.*

MADAM,

THOUGH I am just informed, that, by some accidental negligence, the letter which I wrote on Thursday was not given to the post, yet I cannot refuse myself the gratification of writing again to my mistress; not that I have any thing to tell, but that by showing how much I am employed upon you, I hope to keep you from forgetting me.

Doctor Taylor asked me this morning on what I was thinking? and I was thinking on Lucy. I hope Lucy is a good girl: But she cannot yet be so good as Queeney. I have got nothing yet for Queeney's cabinet.

I hope dear Mrs. Salusbury grows no worse. I wish any thing could be found that would make her better. You must remember her admonition, and bustle in the brewhouse. When I come, you may expect to have your hands full with all of us.

Our bulls and cows are all well; but we yet hate the man that had seen a bigger bull. Our deer have died; but many are left. Our water-fall at the garden makes a great roaring this wet weather.

And so no more at present from, Madam, your, &c.

---

LETTER X.—*To the Same.*

*Nov. 23d, 1772.*

DEAR MADAM,

I AM sorry that none of your letters bring better news of the poor dear lady. I hope her pain is not great. To have a disease confessedly incurable and apparently mortal, is a very heavy affliction; and it is still more grievous when pain is added to despair.

Every thing else in your letter pleased me very well, except that when I come I entreat I may not be flattered, as your letters flatter me. You have read of heroes and princes ruined by flattery, and I question if any of them had a

flatter so dangerous as you. Pray keep strictly to your character of governess.

I cannot yet get well; my nights are flatulent and unquiet, but my days are tolerably easy, and Taylor says that I look much better than when I came hither. You will see when I come, and I can take your word.

Our house affords no revolutions. The great bull is well. But I write not merely to think on you, for I do that without writing, but to keep you a little thinking on me. I perceive that I have taken a broken piece of paper, but that is not the greatest fault that you must forgive in, Madam, your, &c.

---

LETTER XI.—To MRS. THRALE.

Nov. 27th, 1772.

DEAR MADAM,

If you are so kind as to write to me on Saturday, the day on which you will receive this, I shall have it before I leave Ashbourne. I am to go to Litchfield on Wednesday, and purpose to find my way to London through Birmingham and Oxford.

I was yesterday at Chatsworth. It is a very fine house. I wish you had been with me to see it; for then, as we are apt to want matter of talk, we should have gained something new to talk on. They complimented me with playing the fountain, and opening the cascade. But I am of my friend's opinion, that when one has seen the ocean, cascades are but little things.

I am in hope of a letter to-day from you or Queeney, but the post has made some blunder, and the packet is not yet distributed. I wish it may bring me a little good of you all. I am, &c.

---

LETTER XII.—To the Same.

Tuesday, Jan. 26th, 1773.

MADAM,

THE inequalities of human life have always employed the meditation of deep thinkers, and I cannot forbear to reflect on the difference between your condition and my own. You live upon mock-turtle, and stewed rumps of beef; I dined yesterday upon crumpets. You sit with parish officers, caressing and caressed, the idol of the table, and the wonder of the day. I pine in the solitude of sickness, not bad enough to be pitied, and not well enough to be endured. You sleep away the night, and laugh or scold away the day. I cough and grumble, and grumble and cough. Last night was very te-

dious, and this day makes no promises of much ease. However, I have this day put on my shoe, and hope that gout is gone. I shall have only the cough to contend with, and I doubt whether I shall get rid of that without change of place. I caught cold in the coach as I went away, and am disordered by very little things. Is it accident or age? I am, dearest Madam, &c.

---

LETTER XIII.—To the Same.

March 17th, 1773.

DEAR MADAM,

To tell you that I am sorry both for the poor lady and for you is useless. I cannot help either of you. The weakness of mind is perhaps only a casual interruption or intermission of the attention, such as we all suffer when some weighty care or urgent calamity has possession of the mind. She will compose herself. She is unwilling to die, and the first conviction of approaching death raised great perturbation. I think she has but very lately thought death close at hand. She will compose herself to do that as well as she can, which must at last be done. May she not want the divine assistance!

You, Madam, will have a great loss; a greater than is common in the loss of a parent. Fill your mind with hope of her happiness, and turn your thoughts first to Him who gives and takes away, in whose presence the living and dead are standing together. Then remember, that when this mournful duty is paid, others yet remain of equal obligation, and, we may hope, of less painful performance. Grief is a species of idleness, and the necessity of attention to the present preserves us, by the merciful disposition of Providence, from being lacerated and devoured by sorrow for the past. You must think on your husband and your children, and do what this dear lady has done for you.

Not to come to town while the great struggle continues is undoubtedly well resolved. But do not harass yourself into danger; you owe the care of your health to all that love you, at least to all whom it is your duty to love. You cannot give such a mother too much, if you do not give her what belongs to another. I am, &c.

---

LETTER XIV.—To the Same.

April 27th, 1773.

DEAR MADAM,

HOPE is more pleasing than fear, but not less fallacious; you know, when you do not try to

deceive yourself, that the disease which at last is to destroy, must be gradually growing worse, and that it is vain to wish for more than that the descent to death may be slow and easy. In this wish I join with you, and hope it will be granted. Dear, dear lady! whenever she is lost she will be missed, and whenever she is remembered she will be lamented. Is it a good or an evil to me that she now loves me? It is surely a good; for you will love me better, and we shall have a new principle of concord; and I shall be happier with honest sorrow, than with sullen indifference: and far happier still than counterfeited sympathy.

I am reasoning upon a principle very far from certain, a confidence of survivance. You or I, or both, may be called into the presence of the Supreme Judge before her. I have lived a life of which I do not like the review. Surely I shall in time live better.

I sat down with an intention to write high compliments; but my thoughts have taken another course, and some other time must now serve to tell you with what other emotions, benevolence, and fidelity, I am, &c.

---

LETTER IX.—*To the Same.*

*May 17th, 1773.*

MADAM,

NEVER imagine that your letters are long; they are always too short for my curiosity. I do not know that I was ever content with a single perusal.

Of dear Mrs. Salusbury I never expect much better news than you send me; *de pis en pis* is the natural and certain course of her dreadful malady. I am content when it leaves her ease enough for the exercise of her mind.

Why should Mr. \* \* \* \* \* suppose that what I took the liberty of suggesting was concerted with you? He does not know how much I revolve his affairs, and now honestly I desire his prosperity. I hope he has let the hint take some hold of his mind.

Your declaration to Miss \* \* \* \* \* is more general than my opinions allow. I think an unlimited promise of acting by the opinion of another so wrong, that nothing, or hardly any thing, can make it right. All unnecessary vows are folly, because they suppose a prescience of the future which has not been given us. They are, I think, a crime, because they resign that life to chance which God has given us to be regulated by reason; and superinduce a kind of fatality, from which it is the great privilege of our nature to be free. Unlimited obedience is due only to the Universal Father of Heaven and Earth. My parents may be mad and foolish; may be

wicked and malicious, may be erroneously religious, or absurdly scrupulous. I am not bound to compliance with mandates either positive or negative, which either religion condemns or reason rejects. There wanders about the world a wild notion, which extends over marriage more than over any other transaction. If Miss \* \* \* \* \* followed a trade, would it be said that she was bound in conscience to give or refuse credit at her father's choice? And is not marriage a thing in which she is more interested, and has therefore more right of choice? When I may suffer for my own crimes, when I may be sued for my own debts, I may judge by parity of reason for my own happiness. The parent's moral right can arise only from his kindness, and his civil right only from his money.

Conscience cannot dictate obedience to the wicked, or compliance with the foolish; and of interest mere prudence is the judge.

If the daughter is bound without a promise, she promises nothing; and if she is not bound, she promises too much.

What is meant by tying up money in trade I do not understand. No money is so little tied as that which is employed in trade. Mr. \* \* \* \* \* perhaps only means, that in consideration of money to be advanced, he will oblige his son to be a trader. This is reasonable enough. Upon ten thousand pounds diligently occupied, they may live in great plenty and splendour, without the mischiefs of idleness.

I can write a long letter as well as my mistress; and shall be glad that my long letters may be as welcome as hers.

My nights are grown again very uneasy and troublesome. I know not that the country will mend them; but I hope your company will mend my days. Though I cannot now expect much attention, and would not wish for more than can be spared from the poor dear lady, yet I shall see you and hear you every now and then; and to see and hear you, is always to hear wit, and to see virtue.

I shall, I hope, see you to-morrow, and a little on the two next days; and with that little I must for the present try to be contented. I am, &c.

---

LETTER XVI.—*To the Same.*

*August 12th, 1773.*

DEAR MADAM,

WE left London on Friday the 6th, not very early, and travelled without any memorable accident through a country which I had seen before. In the evening I was not well, and was forced to stop at Stilton, one stage short of Stamford, where we intended to have lodged.

On the 7th we passed through Stamford and Grantham, and dined at Newark, where I had only time to observe that the market-place was uncommonly spacious and neat. In London we should call it a square, though the sides were neither straight nor parallel. We came, at night, to Doncaster, and went to church in the morning, where Chambers found the monument of Robert of Doncaster, who says on his stone something like this;—What I gave, that I have; what I spent, that I had; what I left, that I lost.—So saith Robert of Doncaster, who reigned in the world sixty-seven years, and all that time lived not one. Here we were invited to dinner, and therefore made no great haste away.

We reached York, however, that night; I was much disordered with old complaints. Next morning we saw the Minster, an edifice of loftiness and elegance equal to the highest hopes of architecture. I remember nothing but the dome of St. Paul's that can be compared with the middle walk. The Chapter-house is a circular building, very stately, but I think excelled by the Chapter-house of Lincoln.

I then went to see the ruins of the Abbey, which are almost vanished, and I remember nothing of them distinct.

The next visit was to the jail, which they call the castle; a fabric built lately, such is terrestrial mutability, out of the materials of the ruined abbey. The under jailor was very officious to show his fetters, in which there was no contrivance. The head jailor came in, and seeing me look, I suppose, fatigued, offered me wine, and when I went away would not suffer his servant to take money. The jail is accounted the best in the kingdom, and you find the jailor deserving of his dignity.

We dined at York, and went on to Northalerton, a place of which I know nothing, but that it afforded us a lodging on Monday night, and about two hundred and seventy years ago gave birth to Roger Ascham.

Next morning we changed our horses at Darlington, where Mr. Cornelius Harrison, a cousin-german of mine, was perpetual curate. He was the only one of my relations who ever rose in fortune above penury, or in character above neglect.

The church is built crosswise, with a fine spire, and might invite a traveller to survey it; but I perhaps wanted vigour, and thought I wanted time.

The next stage brought us to Durham, a place of which Mr. Thrale bade me take particular notice. The bishop's palace has the appearance of an old feudal castle, built upon an eminence, and looking down upon the river, upon which was formerly thrown a draw-bridge, as I suppose, to be raised at night lest the Scots should pass it.

The cathedral has a massiness and solidity

such as I have seen in no other place; it rather awes than pleases, as it strikes with a kind of gigantic dignity, and aspires to no other praise than that of rocky solidity and indeterminate duration. I had none of my friends resident, and therefore saw but little. The library is mean and scanty.

At Durham, beside all expectation, I met an old friend: Miss Fordyce is married there to a physician. We met, I think, with honest kindness on both sides. I thought her much decayed, and having since heard that the banker had involved her husband in his extensive ruin, I cannot forbear to think that I saw in her withered features more impression of sorrow than of time—

Qua terra patet, sera regnat Eriunys.

He that wanders about the world sees new forms of human misery, and if he chances to meet an old friend, meets a face darkened with troubles.

On Tuesday night we came hither; yesterday I took some care of myself, and to-day I am *quite polite*. I have been taking a view of all that could be shown me, and find that all very near to nothing. You have often heard me complain of finding myself disappointed by books of travels; I am afraid travel itself will end likewise in disappointment. One town, one country, is very like another: civilized nations have the same customs, and barbarous nations have the same nature: there are indeed minute discriminations both of places and of manners, which perhaps are not wanting of curiosity, but which a traveller seldom stays long enough to investigate and compare. The dull utterly neglect them; the acute see a little, and supply the rest with fancy and conjecture.

I shall set out again to-morrow; but I shall not, I am afraid, see Alnwick, for Dr. Percy is not there. I hope to lodge to-morrow night at Berwick, and the next at Edinburgh, where I shall direct Mr. Drummond, bookseller, at Ossian's head, to take care of my letters.

I hope the little dears are all well, and that my dear master and mistress may go somewhat better; but wherever you go do not forget, Madam, your most humble servant.

I am pretty well.

August 15th.

Thus far I had written at Newcastle. I forgot to send it. I am now at Edinburgh; and have been this day running about. I run pretty well.

---

LETTER XVII.—To MRS. THRALE.

Edinburgh, Aug. 17th, 1778.

DEAR MADAM,

ON the 13th I left Newcastle, and in the after

noon came to Alnwick, where we were treated with great civility by the Duke: I went through the apartments, walked on the wall, and climbed the towers. That night we lay at Belford, and on the next night came to Edinburgh. On Sunday (15th) I went to the English chapel. After dinner Dr. Robertson came in, and promised to show me the place. On Monday I saw their public buildings: the cathedral, which I told Robertson I wished to see because it had once been a church, the courts of justice, the parliament house, the advocates' library, the repository of records, the college and its library, and the palace, particularly the old tower where the king of Scotland seized David Rizzio in the queen's presence. Most of their buildings are very mean; and the whole town bears some resemblance to the old part of Birmingham.

Boswell has very handsome and spacious rooms; level with the ground on one side of the house, and on the other four stories high.

At dinner on Monday were the Dutchess of Douglas, an old lady, who talks broad Scotch with a paralytic voice, and is scarcely understood by her own countrymen; the Lord Chief Baron, Sir Adolphus Oughton, and many more. At supper there was such a conflux of company that I could scarcely support the tumult. I have never been well in the whole journey, and am very easily disordered.

This morning I saw at breakfast Dr. Blacklock, the blind poet, who does not remember to have seen light, and is read to, by a poor scholar, in Latin, Greek, and French. He was originally a poor scholar himself. I looked on him with reverence. To-morrow our journey begins; I know not when I shall write again. I am but poorly. I am, &c.

---

LETTER XVIII.—To MRS. THRALE.

*Bamff, August 25th, 1773.*

DEAR MADAM,

It has so happened that though I am perpetually thinking on you, I could seldom find opportunity to write; I have in fourteen days sent only one letter; you must consider the fatigues of travel, and the difficulties encountered in a strange country.

August 18th, I passed, with Boswell, the Frith of Forth, and began our journey; in the passage we observed an island, which I persuaded my companions to survey. We found it a rock somewhat troublesome to climb, about a mile long, and half a mile broad; in the middle were the ruins of an old fort, which had on one of the stones—*Maria Re. 1564*. It had been only a blockhouse, one story high. I measured two apartments, of which the walls were entire,

and found them twenty-seven feet long, and twenty-three broad. The rock had some grass and many thistles, both cows and sheep were grazing. There was a spring of water. The name is *Inchkeith*. Look on your maps. This visit took about an hour. We pleased ourselves with being in a country all our own, and then went back to the boat, and landed at Kinghorn, a mean town; and travelling through *Kirkaldie*, a very long town meanly built, and *Cowpar*, which I could not see because it was night, we came late to *St. Andrew's*, the most ancient of the Scotch universities, and once the see of the Primate of Scotland. The inn was full, but lodgings were provided for us at the house of the professor of rhetoric, a man of elegant manners, who showed us, in the morning, the poor remains of a stately cathedral, demolished in Knox's reformation, and now only to be imagined by tracing its foundation, and contemplating the little ruins that are left. Here was once a religious house. Two of the vaults or cellars of the subprior are even yet entire. In one of them lives an old woman, who claims an hereditary residence in it, boasting that her husband was the sixth tenant of this gloomy mansion, in a lineal descent, and claims by her marriage with this lord of the cavern an alliance with the *Bruces*. Mr. Boswell staid a while to interrogate her, because he understood her language; she told him, that she and her cat lived together; that she had two sons somewhere, who might perhaps be dead; that when there were quality in the town notice was taken of her, and that now she was neglected, but did not trouble them. Her habitation contained all that she had; her turf for fire was laid in one place, and her balls of coal-dust in another, but her bed seemed to be clean. Boswell asked her, if she never heard any noises; but she could tell him of nothing supernatural, though she often wandered in the night among the graves and ruins, only she had sometimes notice by dreams of the death of her relations. We then viewed the remains of a castle on the margin of the sea, in which the archbishops resided, and in which Cardinal Beaton was killed.

The professors who happened to be resident in the vacation made a public dinner, and treated us very kindly and respectfully. They showed us their colleges, in one of which there is a library that, for luminousness and elegance, may vie at least with the new edifice at *Streatham*. But learning seems not to prosper among them; one of their colleges has been lately alienated, and one of their churches lately deserted. An experiment was made of planting a shrubbery in the church, but it did not thrive.

Why the place should thus fall to decay, I know not; for education, such as is here to be had, is sufficiently cheap. The term, or, as they

call it, their session, lasts seven months in the year, which the students of the highest rank and greatest expense may pass here for twenty pounds, in which are included, board, lodging, books, and the continual instruction of three professors.

20th. We left St. Andrew's, well satisfied with our reception, and crossing the Frith of Tay, came to Dundee, a dirty, despicable town. We passed afterwards through Aberbrothick, famous once for an abbey, of which there are only a few fragments left; but those fragments testify that the fabric was once of great extent, and of stupendous magnificence. Two of the towers are yet standing, though shattered; into one of them Boswell climbed, but found the stairs broken: the way into the other we did not see, and had not time to search; I believe it might be ascended, but the top, I think, is open.

We lay at Montrose, a neat place, with a spacious area for the market, and an elegant town-house.

21st. We travelled towards Aberdeen, another university, and in the way dined at Lord Monboddos, the Scotch Judge, who has lately written a strange book about the origin of language, in which he traces monkeys up to men, and says that in some countries the human species have tails like other beasts. He inquired for these long-tailed men of Banks, and was not well pleased that they had not been found in all his peregrination. He talked nothing of this to me, and I hope we parted friends; for we agreed pretty well, only we disputed in adjusting the claims of merit between a shopkeeper of London and a savage of the American wildernesses. Our opinions were, I think, maintained on both sides without full conviction: Monboddos declared boldly for the savage, and I, perhaps for that reason, sided with the citizen.

We came late to Aberdeen, where I found my dear mistress's letter, and learned that all our little people were happily recovered of the measles. Every part of your letter was pleasing.

There are two cities of the name of Aberdeen: the old town, built about a mile inland, once the see of a bishop, which contains the King's College, and the remains of the cathedral, and the new town, which stands, for the sake of trade, upon a frith or arm of the sea, so that ships rest against the quay.

The two cities have their separate magistrates, and the two colleges are in effect two universities, which confer degrees independently of each other.

New Aberdeen is a large town, built almost wholly of that granite which is used for the new pavement in London, which, hard as it is, they square with very little difficulty. Here I first

saw the women in plaids. The plaid makes at once a hood and cloak, without cutting or sewing, merely by the manner of drawing the opposite sides over the shoulders. The maids at the inns run over the house barefoot; and children, not dressed in rags, go without shoes or stockings. Shoes are indeed not yet in universal use; they came late into this country. One of the professors told us, as we were mentioning a fort built by Cromwell, that the country owed much of its present industry to Cromwell's soldiers. They taught us, said he, to raise cabbage and make shoes. How they lived without shoes may yet be seen; but in the passage through villages, it seems to him that surveys their gardens, that when they had not cabbage they had nothing.

Education is here of the same price as at St. Andrew's, only the session is but from the 1st of November to the 1st of April. The academical buildings seem rather to advance than decline. They showed their libraries, which were not very splendid, but some manuscripts were so exquisitely penned that I wished my dear mistress to have seen them. I had an unexpected pleasure by finding an old acquaintance now professor of physic in the King's College: we were on both sides glad of the interview, having not seen nor perhaps thought on one another for many years; but we had no emulation, nor had either of us risen to the other's envy, and our old kindness was easily renewed. I hope we shall never try the effect of so long an absence, and that I shall always be, Madam, your, &c.

---

#### LETTER XIX.—To MRS. THRALE.

*Inverness, August 28th, 1773.*

DEAR MADAM,

AUGUST 23d, I had the honour of attending the Lord Provost of Aberdeen, and was presented with the freedom of the city, not in a gold box, but in good Latin. Let me pay Scotland one just praise! there was no officer gaping for a fee; this could have been said of no city on the English side of the Tweed. I wore my patent of freedom *pro more* in my hat, from the new town to the old, about a mile. I then dined with my friend, the professor of physic, at his house, and saw the King's College. Boswell was very angry that the Aberdeen professors would not talk. When I was at the English church in Aberdeen, I happened to be espied by Lady Di. Middleton, whom I had some time seen in London; she told what she had seen to Mr. Boyd, Lord Errol's brother, who wrote us an invitation to Lord Errol's house, called Slane's Castle. We went thither on the next day (24th of

August), and found a house, not old, except but one tower, built upon the margin of the sea upon a rock, scarce accessible from the sea; at one corner a tower makes a perpendicular continuation of the lateral surface of the rock, so that it is impracticable to walk round; the house inclosed a square court, and on all sides within the court is a piazza or gallery two stories high. We came in as we were invited to dinner, and after dinner offered to go; but Lady Errol sent us word by Mr. Boyd, that if we went before Lord Errol came home we must never be forgiven, and ordered out the coach to show us two curiosities. We were first conducted by Mr. Boyd to Dunbuys, or the yellow rock. Dunbuys is a rock consisting of two protuberances, each perhaps one hundred yards round, joined together by a narrow neck, and separated from the land by a very narrow channel or gully. These rocks are the haunts of sea-fowl, whose clang, though this is not their season, we heard at a distance. The eggs and the young are gathered here in great numbers at the time of breeding. There is a bird here called a coote, which, though not much bigger than a duck, lays a larger egg than a goose. We went then to see the Buller or Boullor of Buchan: Buchan is the name of the district, and the Buller is a small creek or gulf into which the sea flows through an arch of the rock. We walked round it, and saw it black at a great depth. It has its name from the violent ebullition of the water, when high winds or high tides drive it up the arch into the basin. Walking a little farther I spied some boats, and told my companions that we would go into the Buller and examine it. There was no danger; all was calm; we went through the arch, and found ourselves in a narrow gulf surrounded by craggy rocks, of height not stupendous, but to a Mediterranean visitor uncommon. On each side was a cave, of which the fishermen knew not the extent, in which smugglers hide their goods, and sometimes parties of pleasure take a dinner. I am, &c.

---

LETTER XX.—To MRS. THRALE.

*Skie, Sept. 6th, 1773.*

DEAREST MADAM,

I AM now looking on the sea from a house of Sir Alexander Macdonald, in the Isle of Skie. Little did I once think of seeing this region of obscurity, and little did you once expect a salutation from this verge of European life. I have now the pleasure of going where nobody goes, and seeing what nobody sees. Our design is to visit several of the smaller islands, and then pass over to the south-west of Scotland.

I returned from the sight of Buller's Buchan

to Lord Errol's, and, having seen his library, had for a time only to look upon the sea, which rolled between us and Norway. Next morning, August 25th, we continued our journey through a country not uncultivated, but so denuded of its woods, that in all this journey I had not travelled a hundred yards between hedges, or seen five trees fit for the carpenter. A few small plantations may be found, but I believe scarcely any thirty years old; at least, they are all posterior to the Union. This day we dined with a country gentleman, who has in his grounds the remains of a Druid's temple, which, when it is complete, is nothing more than a circle or double circle of stones, placed at equal distances, with a flat stone, perhaps an altar, at a certain point, and a stone taller than the rest at the opposite point. The tall stone is erected, I think, at the south. Of these circles there are many in all the unfrequented parts of the island. The inhabitants of these parts respect them as memorials of the sepulture of some illustrious person. Here I saw a few trees. We lay at Bamff.

August 26th. We dined at Elgin, where we saw the ruins of a noble cathedral; the chapter-house is yet standing. A great part of Elgin is built with small piazzas to the lower story. We went on to Foris, over the heath where Macbeth met the witches, but had no adventure; only in the way we saw for the first time some houses with fruit-trees about them. The improvements of the Scotch are for immediate profit; they do not yet think it quite worth their while to plant what will not produce something to be eaten or sold in a very little time. We rested at Foris.

A very great proportion of the people are barefoot; shoes are not yet considered as necessaries of life. It is still the custom to send out the sons of gentlemen without them into the streets and ways. There are more beggars than I have ever seen in England: they beg, if not silently, yet very modestly.

Next day we came to Nairn, a miserable town, but a royal burgh, of which the chief annual magistrate is styled Lord Provost. In the neighbourhood we saw the castle of the old Thane of Cawdor. There is one ancient tower with its battlements and winding stairs yet remaining; the rest of the house is, though not modern, of later erection.

On the 28th we went to Fort George, which is accounted the most regular fortification in the island. The major of artillery walked with us round the walls, and showed us the principles upon which every part was constructed, and the way in which it could be defended. We dined with the governor, Sir Eyre Coote, and his officers. It was a very pleasant and instructive day, but nothing puts my honoured mistress out of my mind.

At night we came to Inverness, the last considerable town in the North, where we staid all the next day, for it was Sunday, and saw the ruins of what is called Macbeth's castle. It never was a large house, but was strongly situated. From Inverness we were to travel on horseback.

August 30th. We set out with four horses. We had two Highlanders to run by us, who were active, officious, civil, and hardy. Our journey was for many miles along a military way made upon the banks of Lough Ness, a water about eighteen miles long, but not, I think, half a mile broad. Our horses were not bad, and the way was very pleasant; the rock out of which the road was cut was covered with birch-trees, fern, and heath. The lake below was beating its bank by a gentle wind, and the rocks beyond the water on the right stood sometimes horrid and wild, and sometimes opened into a kind of bay, in which there was a spot of cultivated ground, yellow with corn. In one part of the way we had trees on both sides for perhaps half a mile.—Such a length of shade perhaps Scotland cannot show in any other place.

You are not to suppose that here are to be any more towns or inns. We came to a cottage which they call the General's Hut, where we alighted to dine, and had eggs and bacon, and mutton, with wine, rum, and whisky. I had water.

At a bridge over the river, which runs into the Ness, the rocks rise on three sides, with a direction almost perpendicular, to a great height; they are in part covered with trees, and exhibit a kind of dreadful magnificence;—standing like the barriers of nature placed to keep different orders of being in perpetual separation. Near this bridge is the Fall of Fiers, a famous cataract, of which, by clambering over the rocks, we obtained a view. The water was low, and therefore we had only the pleasure of knowing that rain would make it at once pleasing and formidable; there will then be a mighty flood, foaming along a rocky channel, frequently obstructed by protuberances, and exasperated by reverberation, at last precipitated with a sudden descent, and lost in the depth of a gloomy chasm.

We came somewhat late to Fort Augustus, where the lieutenant-governor met us beyond the gates, and apologized that at that hour he could not, by the rules of a garrison, admit us otherwise than at a narrow door which only one can enter at a time. We were well entertained and well lodged, and next morning, after having viewed the fort, we pursued our journey.

Our way now lay over the mountains, which are not to be passed by climbing them directly, but by traversing; so that as we went forward we saw our baggage following us below in a di-

rection exactly contrary. There is in these ways much labour but little danger, and perhaps other places, of which very terrific representations are made, are not in themselves more formidable. These roads have all been made by hewing the rock away with pickaxes, or bursting it with gunpowder. The stones so separated are often piled loose as a wall by the way-side. We saw an inscription importing the year in which one of the regiments made two thousand yards of the road eastward.

After tedious travel of some hours we came to what I believe we must call a village, a place where there were three huts built of turf; at one of which we were to have our dinner and our bed, for we could not reach any better place that night. This place is called Enoch in Glenmorris. The house in which we lodged was distinguished by a chimney, the rest had only a hole for the smoke. Here we had eggs, and mutton, and a chicken and a sausage, and rum. In the afternoon tea was made by a very deceu girl in a printed linen: she engaged me so much, that I made her a present of Cocker's arithmetic. I am, &c.

---

#### LETTER XXI.—To Mrs. THRALE.

*Skie, Sept. 14th, 1773.*

DEAREST MADAM,

THE post which comes but once a week into these parts is so soon to go that I have not time to go on where I left off in my last letter. I have been several days in the island of Raarsa, and am now again in the Isle of Skie, but at the other end of it.

Skie is almost equally divided between the two great families of Macdonald and Macleod, other proprietors having only small districts. The two great lords do not know within twenty square miles the contents of their own territories.

— kept up but ill the reputation of Highland hospitality; we are now with Macleod, quite at the other end of the island, where there is a fine young gentleman and fine ladies. The ladies are studying Erse. I have a cold, and am miserably deaf, and am troublesome to Lady Macleod; I force her to speak loud, but she will seldom speak loud enough.

Raarsa is an island about fifteen miles long and two broad, under the dominion of one gentleman, who has three sons and ten daughters; the eldest is the beauty of this part of the world, and has been polished at Edinburgh: they sing and dance, and, without expense, have upon their table most of what sea, air, or earth can afford. I intended to have written about Raarsa, but the post will not wait longer than

while I send my compliments to my dear master and little mistresses. I am, &c.

LETTER XXII.—To MRS. THRALE.

Skie, Sept. 21st, 1773.

DEAREST MADAM,

I AM so vexed at the necessity of sending yesterday so short a letter, that I purpose to get a long letter beforehand by writing something every day, which I may the more easily do, as a cold makes me now too deaf to take the usual pleasure in conversation. Lady Macleod is very good to me; and the place at which we now are is equal, in strength of situation, in the wildness of the adjacent country, and in the plenty and elegance of the domestic entertainment, to a castle in Gothic romances. The sea, with a little island, is before us; cascades play within view. Close to the house is the formidable skeleton of an old castle, probably Danish, and the whole mass of building stands upon a protuberance of rock, inaccessible till of late but by a pair of stairs on the sea-side, and secure in ancient times against any enemy that was likely to invade the kingdom of Skie.

Macleod has offered me an island; if it were not too far off, I should hardly refuse it: my island would be pleasanter than Brighthelm-ton, if you and my master could come to it; I cannot think it pleasant to live quite alone,

*Oblitusque morum, obliviscendus et illis.*

That I should be elated by the dominion of an island to forgetfulness of my friends at Stratham, I cannot believe, and I hope never to deserve that they should be willing to forget me.

It has happened that I have been often recognised in my journey where I did not expect it. At Aberdeen I found one of my acquaintance professor of physic; turning aside to dine with a country gentleman, I was owned at table by one who had seen me at a philosophical lecture; at Macdonald's I was claimed by a naturalist, who wanders about the islands to pick up curiosities; and I had once in London attracted the notice of Lady Macleod. I will now go on with my account.

The Highland girl made tea, and looked and talked not inelegantly; her father was by no means an ignorant or a weak man; there were books in the cottage, among which were some volumes of *Prideaux's Connection*: this man's conversation we were glad of while we staid. He had been *out*, as they call it, in forty-five, and still retained his old opinions. He was going to America, because his rent was raised beyond what he thought himself able to pay.

At night our beds were made, but we had

some difficulty in persuading ourselves to lie down in them, though we had put on our own sheets; at last we ventured, and I slept very soundly in the vale of Glenmorrison, amidst the rocks and mountains. Next morning our landlord liked us so well, that he walked some miles with us for our company, through a country so wild and barren that the proprietor does not, with all his pressure upon his tenants, raise more than four hundred pounds a-year for near one hundred square miles, or sixty thousand acres. He let us know that he had forty head of black cattle, a hundred goats, and a hundred sheep, upon a farm that he remembered let at five pounds a-year, but for which he now paid twenty. He told us some stories of their march into England. At last he left us, and we went forward, winding among mountains, sometimes green and sometimes naked, commonly so steep as not easily to be climbed by the greatest vigour and activity: our way was often crossed by little rivulets, and we were entertained with small streams trickling from the rocks, which after heavy rains must be tremendous torrents.

About noon we came to a small glen, so they call a valley, which, compared with other places, appeared rich and fertile; here our guides desired us to stop, that the horses might graze, for the journey was very laborious, and no more grass would be found. We made no difficulty of compliance, and I sat down to take notes on a green bank, with a small stream running at my feet, in the midst of savage solitude, with mountains before me, and on either hand, covered with heath. I looked around me, and wondered that I was not more affected, but the mind is not at all times equally ready to be put in motion; if my mistress and master and Queeney had been there, we should have produced some reflections among us, either poetical or philosophical, for though *solitude be the nurse of woe*, conversation is often the parent of remarks and discoveries.

In about an hour we remounted, and pursued our journey. The lake by which we had travelled for some time ended in a river, which we passed by a bridge, and came to another glen, with a collection of huts, called *Auknasheads*; the huts were generally built of clods of earth, held together by the intertexture of vegetable fibres, of which earth there are great levels in Scotland, which they call mosses. Moss in Scotland is bog in Ireland, and moss-trooper is bog-trotter; there was, however, one hut built of loose stones, piled up with great thickness into a strong though not solid wall. From this house we obtained some great pails of milk, and having brought bread with us, we were liberally regaled. The inhabitants, a very coarse tribe, ignorant of any language but Erse, gathered so fast about us, that if we had not had

Highlanders with us, they might have caused more alarm than pleasure; they are called the Clan of Macrae.

We had been told that nothing gratified the Highlanders so much as snuff and tobacco, and had accordingly stored ourselves with both at Fort Augustus. Boswell opened his treasure, and gave them each a piece of tobacco roll. We had more bread than we could eat for the present, and were more liberal than provident. Boswell cut it in slices, and gave them an opportunity of tasting wheaten bread for the first time. I then got some halfpence for a shilling, and made up the deficiencies of Boswell's distribution, who had given some money among the children. We then directed that the mistress of the stone-house should be asked what we must pay her: she, who perhaps had never before sold any thing but cattle, knew not, I believe, well what to ask, and referred herself to us: we obliged her to make some demand, and one of the Highlanders settled the account with her at a shilling. One of the men advised her, with the cunning that clowns never can be without, to ask more; but she said that a shilling was enough. We gave her half-a-crown, and she offered part of it again. The Macraes were so well pleased with our behaviour, that they declared it the best day they had seen since the time of the old Laird of Macleod, who, I suppose, like us, stopped in their valley, as he was travelling to Skie.

We were mentioning this view of the Highlander's life at Macdonald's, and mentioning the Macraes with some degree of pity, when a Highland lady informed us that we might spare our tenderness, for she doubted not but the woman who supplied us with milk was mistress of thirteen or fourteen milch cows.

I cannot forbear to interrupt my narrative. Boswell, with some of his troublesome kindness, has informed this family, and reminded me, that the 18th of September is my birth-day. The return of my birth-day, if I remember it, fills me with thoughts which it seems to be the general care of humanity to escape. I can now look back upon three score and four years, in which little has been done, and little has been enjoyed; a life diversified by misery, spent part in the sluggishness of penury, and part under the violence of pain, in gloomy discontent or importunate distress. But perhaps I am better than I should have been if I had been less afflicted. With this I will try to be content.

In proportion as there is less pleasure in retrospective considerations, the mind is more disposed to wander forward into futurity; but at sixty-four what promises, however liberal, of imaginary good can futurity venture to make? yet something will be always promised, and some promises will be always credited. I am hoping and I am praying that I may live better

in the time to come whether long or short, than I have yet lived, and in the solace of that hope endeavour to repose. Dear Queeney's day is next: I hope she at sixty-four will have less to regret.

I will now complain no more, but tell my mistress of my travels.

After we left the Macraes, we travelled on through a country like that which we passed in the morning. The Highlands are very uniform, for there is little variety in universal barrenness; the rocks, however, are not all naked, for some have grass on their sides, and birches and alders on their tops, and in the valleys are often broad and clear streams, which have little depth, and commonly run very quick; the channels are made by the violence of the wintry floods; the quickness of the stream is in proportion to the declivity of the descent, and the breadth of the channel makes the water shallow in a dry season.

There are red deer and roebucks in the mountains, but we found only goats in the road, and had very little entertainment as we travelled either for the eye or ear. There are, I fancy, no singing birds in the Highlands.

Towards night we came to a very formidable hill, called Rattiken, which we climbed with more difficulty than we had yet experienced, and at last came to Glanelg, a place on the sea-side opposite to Skie. We were by this time weary and disgusted, nor was our humour much mended by our inn, which, though it was built of lime and slate, the Highlander's description of a house which he thinks magnificent, had neither wine, bread, eggs, nor any thing that we could eat or drink. When we were taken up stairs, a dirty fellow bounced out of the bed where one of us was to lie. Boswell blustered, but nothing could be got. At last a gentleman in the neighbourhood, who heard of our arrival, sent us rum and white sugar. Boswell was now provided for in part, and the landlord prepared some mutton chops, which we could not eat, and killed two hens, of which Boswell made his servant broil a limb, with what effect I know not. We had a lemon and a piece of bread, which supplied me with my supper.

When the repast was ended, we began to deliberate upon bed; Mrs. Boswell had warned us that we should catch something, and had given us sheets for our security, for — and —, she said, came back from Skie, so scratching themselves. I thought sheets a slender defence against the confederacy with which we were threatened, and by this time our Highlanders had found a place where they could get some hay: I ordered hay to be laid thick upon the bed, and slept upon it in my great coat: Boswell laid sheets upon his bed, and reposed in linen like a gentleman. The horses were turned out to grass, with a man to watch them.

The hill Rattiken and the inn at Glanelg were the only things of which we, or travellers yet more delicate, could find any pretensions to complain.

Sept. 2d. I rose rustling from the hay, and went to tea, which I forget whether we found or brought. We saw the isle of Skie before us, darkening the horizon with its rocky coast. A boat was procured, and we launched into one of the straits of the Atlantic ocean. We had a passage of about twelve miles to the point where——resided, having come from his seat in the middle of the island, to a small house on the shore, as we believe, that he might with less reproach entertain us meanly. If he aspired to meanness, his retrograde ambition was completely gratified, but he did not succeed equally in escaping reproach. He had no cook, nor I suppose much provision, nor had the lady the common decencies of her tea-table; we picked up our sugar with our fingers. Boswell was very angry, and reproached him with his improper parsimony; I did not much reflect upon the conduct of a man with whom I was not likely to converse as long at any other time.

You will now expect that I should give you some account of the isle of Skie, of which, though I have been twelve days upon it, I have little to say. It is an island perhaps fifty miles long, so much indented by inlets of the sea, that there is no part of it removed from the water more than six miles. No part that I have seen is plain; you are always climbing or descending, and every step is upon rock or mire. A walk upon ploughed ground in England is a dance upon carpets compared to the toilsome drudgery of wandering in Skie. There is neither town nor village in the island, nor have I seen any house but Macleod's, that is not much below your habitation at Brighthelmstone. In the mountains there are stags and roebucks, but no hares, and few rabbits; nor have I seen any thing that interested me as a zoologist, except an otter, bigger than I thought an otter could have been.

You are perhaps imagining that I am withdrawing from the gay and the busy world into regions of peace and pastoral felicity, and am enjoying the reliques of the golden age; that I am surveying nature's magnificence from a mountain, or remarking her minuter beauties on the flowery bank of a winding rivulet; that I am invigorating myself in the sunshine, or delighting my imagination with being hidden from the invasion of human evils and human passions, in the darkness of a thicket; that I am busy in gathering shells and pebbles on the shore, or contemplative on a rock, from which I look upon the water, and consider how many waves are rolling between me and Streatham.

The use of travelling is to regulate imagination by reality, and instead of thinking how

things may be, to see them as they are. Here are mountains which I should once have climbed; but to climb steepes is now very laborious, and to descend them dangerous; and I am now content with knowing, that by scrambling up a rock, I shall only see other rocks, and a wider circuit of barren desolation. Of streams, we have here a sufficient number; but they murmur not upon pebbles, but upon rocks. Of flowers, if Chloris herself were here, I could present her only with the bloom of heath. Of lawns and thickets, he must read that would know them, for here is little sun and no shade. On the sea I look from my window, but am not much tempted to the shore; for since I came to this island, almost every breath of air has been a storm, and what is worse, a storm with all its severity, but without its magnificence, for the sea is here so broken into channels that there is not a sufficient volume of water either for lofty surges or a loud roar.

On Sept. 6th, we left——to visit Raarsa, the island which I have already mentioned. We were to cross part of Skie on horseback; a mode of travelling very uncomfortable, for the road is so narrow, where any road can be found, that only one can go, and so craggy, that the attention can never be remitted; it allows, therefore, neither the gayety of conversation, nor the laxity of solitude: nor has it in itself the amusement of much variety, as it affords only all the possible transpositions of bog, rock, and rivulet. Twelve miles, by computation, make a reasonable journey for a day.

At night we came to a tenant's house, of the first rank of tenants, where we were entertained better than at the landlord's. There were books both English and Latin. Company gathered about us, and we heard some talk of the second sight, and some talk of the events of forty-five; a year which will not soon be forgotten among the islanders. The next day we were confined by a storm. The company, I think, increased, and our entertainment was not only hospitable but elegant. At night a minister's sister, in very fine brocade, sung Erse songs; I wished to know the meaning: but the Highlanders are not much used to scholastic questions, and no translations could be obtained.

Next day, Sept. 8th, the weather allowed us to depart; a good boat was provided us, and we went to Raarsa under the conduct of Mr. Malcolm Macleod, a gentleman who conducted Prince Charles through the mountains in his distresses. The Prince, he says, was more active than himself; they were, at least, one night without any shelter.

The wind blew enough to give the boat a kind of dancing agitation, and in about three or four hours we arrived at Raarsa, where we were met by the laird and his friends upon the shore.

Raarsa, for such is his title, is master of two islands: upon the smaller of which, called Rona, he has only flocks and herds. Rona gives title to his eldest son. The money which he raises annually by rent from all his dominions, which contain at least fifty thousand acres, is not believed to exceed two hundred and fifty pounds: but as he keeps a large farm in his own hands, he sells every year great numbers of cattle, which adds to his revenue, and his table is furnished from the farm and from the sea with very little expense, except for those things this country does not produce, and of those he is very liberal. The wine circulates vigorously; and the tea, chocolate, and coffee, however they are got, are always at hand. I am, &c.

We are this morning trying to get out of Skie.

#### LETTER XXIII.—To Mrs. THRALE.

*Skie, Sept. 24th, 1773.*

DEAR MADAM,

I AM still in Skie. Do you remember the song?

Every island is a prison,  
Strongly guarded by the sea.

We have at one time no boat, and at another may have too much wind; but of our reception here we have no reason to complain. We are now with Colonel Macleod, in a more pleasant place than I thought Skie could afford. Now to the narrative.

We were received at Raarsa on the sea-side, and after clambering with some difficulty over the rocks, a labour which the traveller, wherever he reposes himself on land, must in these islands be contented to endure; we were introduced into the house, which one of the company called the Court of Raarsa, with politeness which not the court of Versailles could have thought defective. The house is not large, though we were told in our passage that it had eleven fine rooms, nor magnificently furnished, but our utensils were most commonly silver. We went up into a dining room, about as large as your blue room, where we had something given us to eat, and tea and coffee.

Raarsa himself is a man of no inelegant appearance, and of manners uncommonly refined. Lady Raarsa makes no very sublime appearance for a sovereign, but is a good housewife, and a very prudent and diligent conductress of her family. Miss Flora Macleod is a celebrated beauty; has been admired at Edinburgh; dresses her head very high; and has manners so lady-like, that I wish her head-dress was lower. The rest of the nine girls are all pretty; the youngest is between Queeney and Lucy. The youngest boy, of four years old, runs barefoot,

and wandered with us over the rocks to see a mill: I believe he would walk on that rough ground, without shoes, ten miles in a day.

The Laird of Raarsa has sometimes disputed the chieftainry of the clan with Macleod of Skie, but being much inferior in extent of possessions, has, I suppose, been forced to desist. Raarsa and its provinces have descended to its present possessor through a succession of four hundred years, without any increase or diminution. It was indeed lately in danger of forfeiture, but the old laird joined some prudence with his zeal, and, when Prince Charles landed in Scotland, made over his estate to his son, the present laird, and led one hundred men of Raarsa into the field, with officers of his own family. Eighty-six only came back after the last battle. The prince was hidden, in his distress, two nights at Raarsa, and the king's troops burnt the whole country, and killed some of the cattle.

You may guess at the opinions that prevail in this country; they are, however, content with fighting for their king; they do not drink for him. We had no foolish healths. At night, unexpectedly to us who were strangers, the carpet was taken up; the fidler of the family came up, and a very vigorous and general dance was begun. As I told you, we were two-and-thirty at supper; there were full as many dancers; for, though all who supped did not dance, some danced of the young people who did not sup. Raarsa himself danced with his children, and old Malcolm, in his phillibeg, was as nimble as when he led the Prince over the mountains. When they had danced themselves weary, two tables were spread, and I suppose at least twenty dishes were upon them. In this country some preparations of milk are always served up at supper, and sometimes in the place of tarts at dinner. The table was not coarsely heaped, but at once plentiful and elegant. They do not pretend to make a loaf; there are only cakes, commonly of oats or barley, but they made me very nice cakes of wheat flower. I always sat at the left hand of Lady Raarsa; and young Macleod of Skie, the chieftain of the clan, sat on the right.

After supper a young lady, who was visiting, sung Erse songs, in which Lady Raarsa joined prettily enough, but not gracefully; the young ladies sustained the chorus better. They are very little used to be asked questions, and not well prepared with answers. When one of the songs was over, I asked the princess that sat next to me, *What is that about?* I question if she conceived that I did not understand it. For the entertainment of the company, said she. But, Madam, what is the meaning of it? It is a love song. This was all the intelligence that I could obtain; nor have I been able to procure the translation of a single line of Erse.

At twelve it was bed-time. I had a chamber

to myself, which, in eleven rooms to forty people, was more than my share. How the company and the family were distributed is not easy to tell. Macleod the chieftain, and Boswell, and I, had all single chambers on the first floor. There remained eight rooms only for at least seven and thirty lodgers. I suppose they put up temporary beds in the dining-room, where they stowed all the young ladies. There was a room above stairs with six beds, in which they put ten men. The rest in my next.

LETTER XXIV.—To MRS. THRALE.

*Ostich in Skie, Sept. 30th, 1773.*

DEAREST MADAM,

I AM still confined in Skie. We were unskilful travellers, and imagined that the sea was an open road, which we could pass at pleasure; but we have now learned, with some pain, that we may still wait for a long time the caprices of the equinoctial winds, and sit reading or writing, as I now do, while the tempest is rolling the sea, or roaring in the mountains. I am now no longer pleased with the delay; you can hear from me but seldom, and I cannot at all hear from you. It comes into my mind that some evil may happen, or that I might be of use while I am away. But these thoughts are vain; the wind is violent and adverse, and our boat cannot yet come. I must content myself with writing to you, and hoping that you will some time receive my letter. Now to my narrative.

Sept. 9th. Having passed the night as is usual, I rose, and found the dining-room full of company; we feasted and talked, and when the evening came it brought music and dancing. Young Macleod, the great proprietor of Skie and head of his clan, was very distinguishable; a young man of nineteen; bred awhile at St. Andrew's, and afterwards at Oxford, a pupil of G. Strahan. He is a young man of a mind as much advanced as I have ever known; very elegant of manners, and very graceful in his person. He has the full spirit of a feudal chief; and I was very ready to accept his invitation to Dunvegan. All Raarsa's children are beautiful. The ladies all, except the eldest, are in the morning dressed in their hair. The true Highlander never wears more than a ribband on her head till she is married.

On the third day, Boswell went out with old Malcolm to see a ruined castle, which he found less entire than was promised, but he saw the country. I did not go, for the castle was perhaps ten miles off, and there is no riding at Raarsa, the whole island being rock or mountain, from which the cattle often fall and are

destroyed. It is very barren, and maintains, as near as I could collect, about seven hundred inhabitants, perhaps ten to a square mile. In these countries you are not to suppose that you shall find villages or inclosures. The traveller wanders through a naked desert, gratified sometimes, but rarely, with the sight of cows, and now and then finds a heap of loose stones and turf in a cavity between rocks, where a being born with all those powers which education expands, and all those sensations which culture refines, is condemned to shelter itself from the wind and rain. Philosophers there are, who try to make themselves believe that this life is happy, but they believe it only while they are saying it, and never yet produced conviction in a single mind; he, whom want of words or images sunk into silence, still thought, as he thought before, that privation of pleasure can never please, and that content is not to be much envied, when it has no other principle than ignorance of good.

This gloomy tranquillity, which some may call fortitude, and others wisdom, was, I believe, for a long time to be very frequently found in these dens of poverty: every man was content to live like his neighbours, and never wandering from home, saw no mode of life preferable to his own, except at the house of the laird, or the laird's nearest relations, whom he considered as a superior order of beings, to whose luxuries or honours he had no pretensions. But the end of this reverence and submission seems now approaching; the Highlanders have learned that there are countries less bleak and barren than their own, where, instead of working for the laird, every man will till his own ground, and eat the produce of his own labour. Great numbers have been induced by this discovery to go every year, for some time past, to America. Macdonald and Macleod of Skie have lost many tenants and many labourers, but Raarsa has not yet been forsaken by a single inhabitant.

Rona is yet more rocky and barren than Raarsa, and though it contains perhaps four thousand acres, is possessed only by a herd of cattle and the keepers.

I find myself not very able to walk upon the mountains, but one day I went out to see the walls yet standing of an ancient chapel. In almost every island the superstitious votaries of the Romish church erected places of worship, in which the drones of convents or cathedrals performed the holy offices; but by the active zeal of Protestant devotion, almost all of them have sunk into ruin. The chapel at Raarsa is now only considered as the burying-place of the family, and I suppose of the whole island.

We would now have gone away and left room for others to enjoy the pleasures of this little court; but the wind detained us till the 12th, when, though it was Sunday, we thought it

proper to snatch the opportunity of a calm day. Raarsa accompanied us in a six-oared boat, which he said was his coach and six. It is indeed the vehicle in which the ladies take the air and pay their visits, but they have taken very little care for accommodations. There is no way in or out of the boat for a woman, but by being carried; and in the boat thus dignified with a pompous name, there is no seat but an occasional bundle of straw. Thus we left Raarsa; the seat of plenty, civility, and cheerfulness.

We dined at a public house at Port Re; so called because one of the Scottish kings landed there in a progress through the Western isles. Raarsa paid the reckoning privately. We then got on horseback, and by a short but very tedious journey came to Kingsburgh, at which the same king lodged after he landed. Here I had the honour of saluting the far-famed Miss Flora Macdonald, who conducted the Prince dressed as her maid, through the English forces from the island of Lewes; and, when she came to Skie, dined with the English officers, and left her maid below. She must then have been a very young lady; she is now not old: of a pleasing person and elegant behaviour. She told me that she thought herself honoured by my visit; and I am sure that whatever regard she bestowed on me was liberally repaid. "If thou likest her opinions, thou wilt praise her virtue." She was carried to London, but dismissed without a trial, and came down with Malcolm Macleod, against whom sufficient evidence could not be procured. She and her husband are poor, and are going to try their fortune in America.

*Sic rerum volvitur orbis.*

At Kingsburgh we were very liberally feasted, and I slept in the bed in which the Prince reposed in his distress; the sheets which he used were never put to any meaner offices, but were wrapped up by the lady of the house, and at last, according to her desire, were laid round her in her grave. These are not Whigs.

On the 13th, travelling partly on horseback where we could not row, and partly on foot where we could not ride, we came to Dunvegan, which I have described already. Here, though poor Macleod had been left by his grandfather overwhelmed with debts, we had another exhibition of feudal hospitality. There were two stags in the house, and venison came to the table every day in its various forms. Macleod, besides his estate in Skie, larger I suppose than some English counties, is proprietor of nine inhabited isles: and of his islands uninhabited I doubt if he very exactly knows the number. I told him that he was a mighty monarch. Such dominions fill an Englishman with envious wonder; but when he surveys the naked

mountains, and treads the quaking moor, and wanders over the wild regions of gloomy barrenness, his wonder may continue, but his envy ceases. The unprofitableness of these vast domains can be conceived only by the means of positive instances. The heir of Col, an island not far distant, has lately told me how wealthy he should be if he could let *Rum*, another of his islands, for two-pence halfpenny an acre; and Macleod has an estate, which the surveyor reports to contain eighty thousand acres, rented at six hundred pounds a-year.

While we were at Dunvegan, the wind was high, and the rain violent, so that we were not able to put forth a boat to fish in the sea, or to visit the adjacent islands, which may be seen from the house; but we filled up the time as we could, sometimes by talk, sometimes by reading. I have never wanted books in the Isle of Skie.

We were invited one day by the Laird and Lady of Muck, one of the Western islands, two miles long and three quarters of a mile high. He has half his island in his own culture, and upon the other half live one hundred and fifty dependants, who not only live upon the product, but export corn sufficient for the payment of their rent.

Lady Macleod has a son and four daughters; they have lived long in England, and have the language and manners of English ladies. We lived with them very easily. The hospitality of this remote region is like that of the golden age. We have found ourselves treated at every house as if we came to confer a benefit.

We were eight days at Dunvegan, but we took the first opportunity which the weather afforded, after the first days, of going away, and, on the 21st, went to Ulinish, where we were well entertained, and wandered a little after curiosities. In the afternoon an interval of calm sunshine courted us out to see a cave on the shore famous for its echo. When we went into the boat, one of our companions was asked in Erse, by the boatmen, who they were that came with him? He gave us characters, I suppose, to our advantage, and was asked, in the spirit of the Highlands, whether I could recite a long series of ancestors? The boatmen said, as I perceived afterwards, that they heard the cry of an English ghost. This, Boswell says, disturbed him. We came to the cave, and clambering up the rocks, came to an arch, open at one end, one hundred and eighty feet long, thirty broad in the broadest part, and about thirty high. There was no echo: such is the fidelity of report; but I saw what I never saw before, muscles and whilks in their natural state. There was another arch in the rock open at both ends.

Sept. 23d. We removed to Talisker, a house occupied by Mr. Macleod a lieutenant-colonel

in the Dutch service. Talisker has been long in the possession of gentlemen, and therefore has a garden well cultivated: and, what is here very rare, is shaded by trees: a place where the imagination is more amused cannot easily be found. The mountains about it are of great height, with waterfalls succeeding one another so fast, that as one ceases to be heard another begins. Between the mountains there is a small valley extending to the sea, which is not far off, beating upon a coast very difficult of access.

Two nights before our arrival two boats were driven upon this coast by the tempest, one of them had a pilot that knew the passage, the second followed but a third missed the true course, and was driven forward with great danger of being forced into the vast ocean, but however gained at last some other island. The crews crept to Talisker, almost lifeless with wet, cold, fatigue, and terror, but the lady took care of them. She is a woman of more than common qualifications; having travelled with her husband, she speaks four languages.

You find that all the islanders, even in these recesses of life, are not barbarous. One of the ministers who has adhered to us almost all the time is an excellent scholar. We have now with us the young laird of Col, who is heir, perhaps, to two hundred square miles of land. He has first studied at Aberdeen, and afterwards gone to Hertfordshire to learn agriculture, being much impressed with desire of improvement: he likewise has the notions of a chief, and keeps a piper. At Macleod's the bagpipe always played while we were dining.

Col has undertaken, by permission of the waves and wind, to carry us about several of the islands, with which he is acquainted enough to show us whatever curious is given by nature or left by antiquity; but we grew afraid of deviating from our way home, lest we should be shut up for months upon some little protuberance of rock, that just appears above the sea, and perhaps is scarcely marked upon a map.

You remember the Doge of Genoa, who being asked what struck him most at the French court? answered, "Myself." I cannot think many things here more likely to affect the fancy than to see Johnson ending his sixty-fourth year in the wilderness of the Hebrides. But now I am here, it will gratify me very little to return without seeing, or doing my best to see what those places afford. I have a desire to instruct myself in the whole system of pastoral life; but I know not whether I shall be able to perfect the idea. However, I have many pictures in my mind, which I could not have had without this journey, and should have passed it with great pleasure had you, and Master, and Queeney, been in the party. We should have excited the attention and enlarged the observation of each

other, and obtained many pleasing topics of future conversation. As it is, I travel with my mind too much at home, and perhaps miss many things worthy of observation, or pass them with transient notice; so that the images, for want of that re-impression which discussion and comparison produce, easily fade away; but I keep a book of remarks, and Boswell writes a regular journal of our travels, which, I think, contains as much of what I say and do, as of all other occurrences together; "for such a faithful chronicler as Griffith."

I hope, dearest Madam, you are equally careful to reposit proper memorials of all that happens to you and your family, and then when we meet we shall tell our stories. I wish you had gone this summer in your usual splendour to Brighthelmstone.

Mr. Thrale probably wonders how I live all this time without sending to him for money. Travelling in Scotland is dear enough, dearer in proportion to what the country affords than in England, but residence in the isles is unexpensive. Company is, I think, considered as a supply of pleasure, and a relief of that tediousness of life which is felt in every place, elegant or rude. Of wine and punch they are very liberal, for they get them cheap; but as there is no custom-house on the island, they can hardly be considered as smugglers. Their punch is made without lemons or any substitute.

Their tables are very plentiful; but a very nice man would not be pampered. As they have no meat but as they kill it, they are obliged to live while it lasts upon the same flesh. They kill a sheep, and set mutton boiled and roast on the table together. They have fish both of the sea and of the brooks: but they can hardly conceive that it requires any sauce. To sauce in general they are strangers: now and then butter is melted, but I dare not always take lest I should offend by disliking it. Barley-broth is a constant dish, and is made well in every house. A stranger, if he is prudent, will secure his share, for it is not certain that he will be able to eat any thing else.

Their meat, being often newly killed, is very tough, and, as nothing is sufficiently subdued by the fire, is not easily to be eaten. Carving is here a very laborious employment, for the knives are never whetted. Table-knives are not of long subsistence in the Highlands; every man, while arms were a regular part of dress, had his knife and fork appendant to his dirk. Knives they now lay upon the table, but the handles are apt to show that they have been in other hands, and the blades have neither brightness nor edge.

Of silver there is no want, and it will last long, for it is never cleaned. They are a nation just rising from barbarity: long contented with necessities, now somewhat studious of conveni-

ence, but not yet arrived at delicate discriminations. Their linen is, however, both clean and fine. Bread, such as we mean by that name, I have never seen in the Isle of Skie. They have ovens, for they bake their pies; but they never ferment their meal, nor mould a loaf. Cakes of oats and barley are brought to the table, but I believe wheat is reserved for strangers. They are commonly too hard for me, and therefore I take potatoes to my meat, and am sure to find them on almost every table.

They retain so much of the pastoral life, that some preparation of milk is commonly one of the dishes both at dinner and supper. Tea is always drank at the usual times; but in the morning the table is polluted with a plate of slices of strong cheese. This is peculiar to the Highlands; at Edinburgh there are always honey and sweet-meats on the morning table.

Strong liquors they seem to love. Every man, perhaps woman, begins the day with a dram; and the punch is made both at dinner and supper.

They have neither wood nor coal for fuel, but burn peat or turf in their chimneys. It is dug out of the moors or messes, and makes a strong and lasting fire, not always very sweet, and somewhat apt to smoke the pot.

The houses of inferior gentlemen are very small, and every room serves many purposes. In the bed-rooms, perhaps, are laid up stores of different kinds; and the parlour of the day is a bed-room at night. In the room which I inhabited last, about fourteen feet square, there were three chests of drawers, a long chest for larger clothes, two closet cupboards, and the bed. Their rooms are commonly dirty, of which they seem to have little sensibility, and if they had more, clean floors would be difficultly kept, where the first step from the door is into the dirt. They are very much inclined to carpets, and seldom fail to lay down something under their feet, better or worse, as they happen to be furnished.

The Highland dress, being forbidden by law, is very little used; sometimes it may be seen, but the English traveller is struck with nothing so much as the *nudité des pieds* of the common people.

Skie is the greatest island, or the greatest but one, among the Hebrides. Of the soil I have already given some account: it is generally barren, but some spots are not wholly unfruitful. The gardens have apples and pears, cherries, strawberries, raspberries, currants, and gooseberries, but all the fruit that I have seen is small. They attempt to sow nothing but oats and barley. Oats constitute the bread corn of the place. Their harvest is about the beginning of October; and being so late, is very much subject to disappointments from the rains that

follow the equinox. This year has been particularly disastrous. Their rainy season lasts from Autumn to Spring. They have seldom very hard frosts; nor was it ever known that a lake was covered with ice strong enough to bear a skater. The sea round them is always open. The snow falls but soon melts; only in 1771, they had a cold spring, in which the island was so long covered with it, that many beasts, both wild and domestic, perished, and the whole country was reduced to distress, from which I know not if it is even yet recovered.

The animals here are not remarkably small; perhaps they recruit their breed from the main land. The cows are sometimes without horns. The horned and unhorned cattle are not accidental variations, but different species: they will, however, breed together.

October 3d. The wind is now changed, and if we snatch the moment of opportunity, an escape from this island is become practicable; I have no reason to complain of my reception, yet I long to be again at home.

You and my master may perhaps expect, after this description of Skie, some account of myself. My eye is, I am afraid, not fully recovered; my ears are not mended; my nerves seem to grow weaker, and I have been otherwise not as well as I sometimes am, but think myself lately better. This climate, perhaps, is not within my degree of healthy latitude.

Thus I have given my most honoured mistress the story of me and my little ramble. We are now going to some other isle, to what we know not; the wind will tell us. I am, &c.

#### LETTER XXV.—To MRS. THRALE.

Mull, Oct. 15th, 1778.

DEAR MADAM,

THOUGH I have written to Mr. Thrale, yet having a little more time than was promised me, I would not suffer the messenger to go without some token of my duty to my mistress, who, I suppose, expects the usual tribute of intelligence, a tribute which I am not now very able to pay.

October 3d. After having been detained by storms many days in Skie, we left it, as we thought, with a fair wind; but a violent gust, which Bos. had a great mind to call a tempest, forced us into Col, an obscure island; on which

— nulla campis  
Arbor æstiva recreatur aura.

There is literally no tree upon the island, part of it is a sandy waste, over which it would be really dangerous to travel in dry weather and with a high wind. It seems to be little more than one continued rock, covered from space to

space with a thin layer of earth. It is, however, according to the Highland notion, very populous, and life is improved beyond the manners of Skie; for the huts are collected into little villages, and every one has a small garden of roots and cabbage. The laird has a new house built by his uncle, and an old castle inhabited by his ancestors. The young laird entertained us very liberally; he is heir, perhaps, to three hundred square miles of land, which at ten shillings an acre, would bring him ninety-six thousand pounds a year. He is desirous of improving the agriculture of his country; and in imitation of the Czar, travelled for improvement, and worked with his own hands upon a farm in Hertfordshire, in the neighbourhood of your uncle Sir Thomas Salusbury. He talks of doing useful things, and has introduced turnips for winter fodder. He has made a small essay towards a road.

Col is but a barren place. Description has here few opportunities of spreading her colours. The difference of day and night is the only vicissitude. The succession of sunshine to rain, or of calms to tempests, we have not known; wind and rain have been our only weather.

At last, after about nine days, we hired a sloop; and having lain in it all night, with such accommodations as these miserable vessels can afford, were landed yesterday on the Isle of Mull; from which we expect an easy passage into Scotland. I am sick in a ship, but recover by lying down.

I have not good health; I do not find that travelling much helps me. My nights are fitful, though not in the utmost degree, and I have a weakness in my knees, which makes me very unable to walk.

Pray, dear Madam, let me have a long letter. I am, &c.

---

LETTER XXVI.—To MRS. THRALE.

*Inverary, Oct. 24th, 1773.*

HONOURED MISTRESS,

My last letters to you and my dear master were written from Mull, the third island of the Hebrides in extent. There is no post, and I took the opportunity of a gentleman's passage to the main land.

In Mull we were confined two days by the weather; on the third we got on horseback, and after a journey difficult and tedious, over rocks naked and valleys untracked, through a country of barrenness and solitude, we came, almost in the dark, to the seaside, weary and dejected, having met with nothing but water falling from the mountains that could raise any image of delight. Our company was the young Laird of

Col and his servant. Col made every Maclean open his house where he came, and supply us with horses when we departed; but the horses of this country are small, and I was not mounted to my wish.

At the sea-side we found the ferry-boat departed; if it had been where it was expected, the wind was against us, and the hour was late, nor was it very desirable to cross the sea in darkness with a small boat. The captain of a sloop that had been driven thither by the storm, saw our distress, and as we were hesitating and deliberating, sent his boat, which, by Col's order, transported us to the Isle of Ulva. We were introduced to Mr. Macquarry, the head of a small clan, whose ancestors have reigned in Ulva beyond memory, but who has reduced himself by his negligence and folly, to the necessity of selling this venerable patrimony.

On the next morning we passed the strait to Inch Kenneth, an island about a mile in length, and less than half a mile broad; in which Kenneth, a Scottish saint, established a small clerical college, of which the chapel walls are still standing. At this place I beheld a scene which I wish you and my master and Queeney had partaken.

The only family on the island is that of Sir Allan, the chief of the ancient and numerous clan of Maclean; the clan which claims the second place, yielding only to Macdonald in the line of battle. Sir Allan, a chieftain, a baronet, and a soldier, inhabits in this insulated desert a thatched hut with no chambers. Young Col, who owns him as his chief, and whose cousin was his lady, had, I believe, given him some notice of our visit; he received us with the soldier's frankness and the gentleman's elegance, and introduced us to his daughters, two young ladies who have not wanted education suitable to their birth, and who, in their cottage, neither forgot their dignity, nor affected to remember it. Do not you wish to have been with us?

Sir Allan's affairs are in disorder by the fault of his ancestors: and while he forms some scheme for retrieving them, he has retreated hither.

When our salutations were over, he showed us the island. We walked uncovered into the chapel, and saw in the reverend ruin the effects of precipitate reformation. The floor is covered with ancient grave-stones of which the inscriptions are not now legible; and without, some of the chief families still continue the right of sepulture. The altar is not yet quite demolished; beside it, on the right side, is a bas-relief of the Virgin with her child, and an angel hovering over her. On the other side still stands a hand-bell, which, though it has no clapper, neither Presbyterian bigotry, nor barbarian wantonness has yet taken away. The chapel is thirty-eight feet long, and eighteen

broad. Boswell, who is very pious, went into it at night, to perform his devotions, but came back in haste, for fear of spectres. Near the chapel is a fountain, to which the water, remarkably pure, is conveyed from a distant hill, through pipes laid by the Romish clergy, which still perform the office of conveyance, though they have never been repaired since Popery was suppressed.

We soon after went in to dinner, and wanted neither the comforts nor the elegancies of life. There were several dishes, and variety of liquors. The servants live in another cottage; in which, I suppose, the meat is dressed.

Towards evening, Sir Allan told us, that Sunday never passed over him like another day. One of the ladies read, and read very well, the evening service;—and Paradise was opened in the wild.

Next day, 18th, we went and wandered among the rocks on the shore, while the boat was busy in catching oysters, of which there is a great bed. Oysters lie upon the sand, one, I think, sticking to another, and cockles are found a few inches under the sand.

We then went in the boat to Sondiland, a little island very near. We found it a wild rock, of about ten acres; part naked, part covered with sand, out of which we picked shells; and part clothed with a thin layer of mould, on the grass of which a few sheep are sometimes fed. We then came back and dined. I passed part of the afternoon in reading, and in the evening one of the ladies played on her harpsichord, and Boswell and Col danced a reel with the other.

On the 19th, we persuaded Sir Allan to launch his boat again, and go with us to Icolmkill, where the first great preacher of Christianity to the Scots built a church and settled a monastery. In our way we stopped to examine a very uncommon cave on the coast of Mull. We had some difficulty to make our way over the vast masses of broken rocks that lie before the entrance, and at the mouth were embarrassed with stones, which the sea had accumulated, as at Brighthelmstone; but as we advanced, we reached a floor of soft sand, and as we left the light behind us, walked along a very spacious cavity, vaulted over head with an arch almost regular, by which a mountain was sustained, at least a very lofty rock. From this magnificent cavern went a narrow passage to the right hand, which we entered with a candle, and though it was obstructed with great stones, clambered over them to a second expansion of the cave, in which there lies a great square stone, which might serve as a table. The air here was very warm, but not oppressive, and the flame of the candle continued pyramidal. The cave goes onward to an unknown extent, but we were now one hundred and sixty yards under ground; we had but one candle, and had never heard of any

that went farther and came back; we therefore thought it prudent to return.

Going forward in our boat, we came to a cluster of rocks, black and horrid, which Sir Allan chose for the place where he would eat his dinner. We climbed till we got seats. The stores were opened, and the repast taken.

We then entered the boat again; the night came upon us; the wind rose; the sea swelled; and Boswell desired to be set on dry ground: we, however, pursued our navigation, and passed by several little islands in the silent solemnity of faint moon-shine, seeing little, and hearing only the wind and the water. At last we reached the island, the venerable seat of ancient sanctity; where secret piety reposed, and where fallen greatness was repositied. The island has no house of entertainment, and we manfully made our bed in a farmer's barn. The description I hope to give you another time. I am, &c.

---

#### LETTER XXVII.—To Mrs. THRALE.

*Edinburgh, Nov. 12th, 1773.*

DEAREST MADAM,

AMONG the possibilities of evil which my imagination suggested at this distance, I missed that which has really happened. I never had much hope of a will in your favour, but was willing to believe that no will would have been made. The event is now irrevocable: it remains only to bear it. Not to wish it had been different is impossible; but as the wish is painful without use, it is not prudent, perhaps not lawful, to indulge it. As life, and vigour of mind, and sprightliness of imagination, and flexibility of attention, are given us for valuable and useful purposes, we must not think ourselves at liberty to squander life, to enervate intellectual strength, to cloud our thoughts, or fix our attention, when by all this expense we know that no good can be produced. Be alone as little as you can; when you are alone, do not suffer your thoughts to dwell on what you might have done to prevent this disappointment. You perhaps could not have done what you imagine, or might have done it without effect. But even so think in the most reasonable manner, is for the present not so useful as not to think. Remit yourself solemnly into the hands of God, and then turn your mind upon the business and amusements which lie before you. "All is best," says Chene, "as it has been, excepting the errors of our own free will." Burton concludes his long book upon Melancholy with this important precept: "Be not solitary; be not idle." Remember Chene's position, and observe Burton's precept.

We came hither on the 9th of this month. I

long to come under your care, but for some days cannot decently get away. They congratulate our return as if we had been with Phipps or Banks; I am ashamed of their salutations.

I have been able to collect very little for Queeney's cabinet; but she will not want toys now, she is so well employed. I wish her success; and am not without some thought of becoming her school-fellow. I have got an Italian Rasselas.

Surely my dear Lucy will recover; I wish I could do her good. I love her very much; and should love another godchild, if I might have the honour of standing to the next baby. I am, &c.

---

LETTER XXVIII.—To MRS. THRALE.

*Edinb. Nov. 18th, 1773.*

MY DEAREST MISTRESS,

THIS is the last letter that I shall write; while you are reading it, I shall be coming home.

I congratulate you upon your boy; but you must not think that I will love him all at once as well as I love Harry, for Harry you know is so rational. I shall love him by degrees.

Poor, pretty, dear Lucy! Can nothing do her good? I am sorry to lose her. But if she must be taken from us, let us resign her with confidence into the hands of Him who knows, and who only knows, what is best both for us and her.

Do not suffer yourself to be dejected. Resolution and diligence will supply all that is wanting, and all that is lost. But if your health should be impaired, I know not where to find a substitute. I shall have no mistress; Mr. Thrale will have no wife; and the little flock will have no mother.

I long to be home, and have taken a place in the coach for Monday; I hope, therefore, to be in London on Friday the 26th, in the evening. Please to let Mrs. Williams know. I am, &c.

---

LETTER XXIX.—To the Same.

*Lichfield, June 23d, 1775.*

DEAR MADAM,

NOW I hope you are thinking, shall I have a letter to-day from Lichfield? Something of a letter you will have; how else can I expect that you should write? and the morning on which I should miss a letter would be a morning of uneasiness, notwithstanding all that would be said or done by the sisters of Stowhill, who do and

say whatever good they can. They give me good words, and cherries, and strawberries. Lady \* \* \* and her mother and sister were visiting there yesterday, and Lady \* \* \* took her tea before her mother.

Mrs. Cobb is to come to Miss Porter's this afternoon. Miss A—— comes little near me. Mr. Langley, of Ashbourne, was here to-day, in his way to Birmingham, and every body talks of you.

The ladies of the Amicable Society are to walk in a few days, from the town-hall to the cathedral in procession, to hear a sermon. They walk in linen gowns, and each has a stick with an acorn, but for the acorn they could give no reason, till I told them of the civic crown.

I have just had your sweet letter, and am glad that you are to be at the Regatta. You know how little I love to have you left out of any shining part of life. You have every right to distinction, and should therefore be distinguished. You will see a show with philosophic superiority, and therefore may see it safely. It is easy to talk of sitting at home contented when others are seeing or making shows. But not to have been where it is supposed, and seldom supposed falsely, that all would go if they could; to be able to say nothing when every one is talking; to have no opinion when every one is judging; to hear exclamations of rapture, without power to depress; to listen to falsehoods without right to contradict, is, after all, a state of temporary inferiority, in which the mind is rather hardened by stubbornness, than supported by fortitude. If the world be worth winning, let us enjoy it; if it is to be despised, let us despise it by conviction. But the world is not to be despised, but as it is compared with something better. Company is in itself better than solitude, and pleasure better than indolence. *Ex nihilo nihil fit*, says the moral as well as the natural philosopher. By doing nothing, and by knowing nothing, no power of doing good can be obtained. He must mingle with the world that desires to be useful. Every new scene impresses new ideas, enriches the imagination, and enlarges the power of reason, by new topics of comparison. You that have seen the Regatta will have images which we who miss it must want, and no intellectual images are without use. But when you are in this scene of splendour and gayety, do not let one of your fits of negligence steal upon you. *Hoc age*, is the great rule, whether you are serious or merry: whether you are stating the expenses of your family, learning science or duty from a folio, or floating on the Thames in a fancied dress. Of the whole entertainment let me not hear so copious nor so true an account from any body as from you. I am, dearest Madam, your, &c.

## LETTER XXX.—To Mrs. THRALE.

*Ashbourne.*

DEAREST MADAM,

I AM sure I write and write, and every letter that comes from you charges me with not writing. Since I wrote to Queeney I have written twice to you, on the 6th and the 9th: be pleased to let me know whether you have them or have them not. That of the 6th you should regularly have had on the 8th, yet your letter of the 9th seems not to mention it; all this puzzles me.

Poor dear \* \* \* \*! He only grows dull because he is sickly; age has not yet begun to impair him; nor is he such a chameleon as to take immediately the colour of his company. When you see him again, you will find him re-animated. Most men have their bright and their cloudy days; at least they have days when they put their powers into action, and days when they suffer them to repose.

Fourteen thousand pounds make a sum sufficient for the establishment of a family, and which, in whatever flow of riches or confidence of prosperity, deserves to be very seriously considered. I hope a great part of it has paid debts, and no small part bought land. As for graveling and walling and digging, though I am not much delighted with them, yet something, indeed much, must be allowed to every man's taste. He that is growing rich has a right to enjoy part of the growth his own way. I hope to range in the walk, and row upon the water, and devour fruit from the wall.

Dr. Taylor wants to be gardening. He means to buy a piece of ground in the neighbourhood, and surround it with a wall, and build a gardener's house upon it, and have fruit, and be happy. Much happiness it will not bring him; but what can he do better? If I had money enough, what would I do? Perhaps, if you and master did not hold me, I might go to Cairo, and down the Red Sea to Bengal, and take a ramble in India. Would this be better than building and planting? It would surely give more variety to the eye, and more amplitude to the mind. Half fourteen thousand would send me out to see other forms of existence, and bring me back to describe them.

I answer this the day on which I had yours of the 9th, that is on the 11th. Let me know when it comes. I am, &c.

## LETTER XXXI.—To the Same.

*Lichfield, August 2d, 1775.*

MADAM,

I DINED to-day at Stowhill, and am come away to write my letter. Never surely was I such a

writer before. Do you keep my letters? I am not of your opinion that I shall not like to read them hereafter; for though there is in them not much history of mind, or any thing else, they will, I hope, always be in some degree the records of a pure and blameless friendship, and, in some hours of languor and sadness, may revive the memory of more cheerful times.

Why you should suppose yourself not desirous hereafter to read the history of your own mind, I do not see. Twelve years, on which you now look as on a vast expanse of life, will probably be passed over uniformly and smoothly, with very little perception of your progress, and with very few remarks upon the way. The accumulation of knowledge which you promise to yourself, by which the future is to look back upon the present, with the superiority of manhood to infancy, will perhaps never be attempted, or never will be made; and you will find, as millions have found before you, that forty-five has made little sensible addition to thirty-three.

As the body after a certain time gains no increase of height, and little of strength, there is likewise a period, though more variable by external causes, when the mind commonly attains its stationary point, and very little advances its powers of reflection, judgment, and ratiocination. The body may acquire new modes of motion, or new dexterities of mechanic operations, but its original strength receives not improvement: the mind may be stored with new languages, or new sciences, but its power of thinking remains nearly the same, and unless it attains new subjects of meditation, it commonly produces thoughts of the same force and the same extent, at very distant intervals of life; as the tree, unless a foreign fruit be ingrafted, gives year after year productions of the same form and the same flavour.

By intellectual force or strength of thought is meant the degree of power which the mind possesses of surveying the subject of meditation, with its circuit of concomitants, and its train of dependence.

Of this power, which all observe to be very different in different minds, part seems the gift of nature, and part the acquisition of experience. When the powers of nature have attained their intended energy, they can be no more advanced. The shrub can never become a tree. And it is not unreasonable to suppose that they are before the middle of life in their full vigour.

Nothing then remains but practice and experience; and perhaps why they do so little, may be worth inquiry.

But I have just now looked, and find it so late, that I will inquire against the next post night. I am, &c.

## LETTER XXXII.—To Mrs. THRALE.

*Lichfield, August 5th, 1775.*

DEAR MADAM,

INSTEAD of forty reasons for my return, one is sufficient,—that you wish for my company. I purpose to write no more till you see me. The ladies at Stowhill and Greenhill are unanimously of opinion, that it will be best to take a postchaise, and not to be troubled with the vexations of a common carriage. I will venture to suppose the ladies at Streatham to be of the same mind.

You will now expect to be told why you will not be so much wiser as you expect, when you have lived twelve years longer.

It is said, and said truly, that experience is the best teacher; and it is supposed, that as life is lengthened experience is increased. But a closer inspection of human life will discover that time often passes without any incident which can much enlarge knowledge or ratify judgment. When we are young we learn much, because we are universally ignorant; we observe every thing, because every thing is new. But after some years, the occurrences of daily life are exhausted; one day passes like another, in the same scene of appearances, in the same course of transactions; we have to do what we have often done, and what we do not try, because we do not wish to do much better; we are told what we already know, and therefore what repetition cannot make us know with greater certainty.

He that has early learned much perhaps seldom makes, with regard to life and manners, much addition to his knowledge: not only because as more is known there is less to learn, but because a mind stored with images and principles turns inwards for its own entertainment, and is employed in settling those ideas which run into confusion, and in recollecting those which are stealing away; practices by which wisdom may be kept, but not gained. The merchant who was at first busy in acquiring money, ceases to grow richer, from the time when he makes it his business only to count it.

Those who have families or employments are engaged in business of little difficulty, but of great importance, requiring rather assiduity of practice than subtilty of speculation, occupying the attention with images too bulky for refinement, and too obvious for research. The right is already known: what remains is only to follow it. Daily business adds no more to wisdom, than daily lesson to the learning of the teacher. But of how few lives does not stated duty claim the greater part?

Far the greater part of human minds never endeavour their own improvement. Opinions

once received from instruction, or settled by whatever accident, are seldom recalled to examination; having been once supposed to be right, they are never discovered to be erroneous, for no application is made of any thing that time may present, either to shake or to confirm them. From this acquiescence in preconceptions none are wholly free; between fear of uncertainty, and dislike of labour, every one rests while he might yet go forward; and they that were wise at thirty-three, are very little wiser at forty-five.

Of this speculation you are perhaps tired, and would rather hear of Sophy. I hope before this comes, that her head will be easier, and your head less filled with fears and troubles, which you know are to be indulged only to prevent evil, not to increase it.

Your uneasiness about Sophy is probably unnecessary, and at worst your own children are healthful, and your affairs prosperous. Unmingled good cannot be expected; but as we may lawfully gather all the good within our reach, we may be allowed to lament after that which we lose. I hope your losses are at an end, and that as far as the condition of our present existence permits, your remaining life will be happy. I am, &c.

## LETTER XXXIII.—To the Same.

*Lichfield, March 25th, 1776.*

DEAR MADAM,

THIS letter will not, I hope, reach you many days before me; in a distress which can be so little relieved, nothing remains for a friend but to come and partake it.

Poor dear sweet little boy! When I read the letter this day to Mrs. Aston, she said, "Such a death is the next to translation." Yet however I may convince myself of this, the tears are in my eyes, and yet I could not love him as you loved him, nor reckon upon him for a future comfort as you and his father reckoned upon him.

He is gone, and we are going! We could not have enjoyed him long, and shall not long be separated from him. He has probably escaped many such pangs as you are now feeling.

Nothing remains, but that with humble confidence we resign ourselves to Almighty Goodness, and fall down, without irreverent murmurs, before the Sovereign Distributor of good and evil, with hope that though sorrow endureth for a night, yet joy may come in the morning.

I have known you, Madam, too long to think that you want any arguments for submission to the Supreme Will; nor can my consolation have any effect but that of showing that I wish

G g

to comfort you. What can be done you must do for yourself. Remember first, that your child is happy; and then, that he is safe, not only from the ills of this world, but from those more formidable dangers which extend their mischief to eternity. You have brought into the world a rational being; have seen him happy during the little life that has been granted him; and can have no doubt but that his happiness is now permanent and immutable.

When you have obtained by prayer such tranquillity as nature will admit, force your attention, as you can, upon your accustomed duties and accustomed entertainments. You can do no more for our dear boy, but you must not therefore think less on those whom your attention may make fitter for the place to which he is gone. I am, dearest, dearest Madam, your most affectionate humble servant.

---

LETTER XXXIV.—To Mrs. THRALE.

Sept. 6th, 1777.

DEAREST LADY,

It is true that I have loitered, and what is worse, loitered with very little pleasure. The time has run away, as most time runs, without account, without use, and without memorial. But to say this of a few weeks, though not pleasing, might be borne, but what ought to be the regret of him who, in a few days, will have so nearly the same to say of sixty-eight years? But complaint is vain.

If you have nothing to say from the neighbourhood of the metropolis, what can occur to me in little cities and petty towns; in places which we have both seen, and of which no description is wanted? I have left part of the company with which you dined here, to come and write this letter; in which I have nothing to tell, but that my nights are very tedious. I cannot persuade myself to forbear trying something.

As you have now little to do, I suppose you are pretty diligent at the Thraliana; and a very curious collection posterity will find it. Do not remit the practice of writing down occurrences as they arise, of whatever kind, and be very punctual in annexing the dates. Chronology, you know, is the eye of history; and every man's life is of importance to himself. Do not omit painful casualties, or unpleasing passages; they make the variegation of existence; and there are many transactions, of which I will not promise with *Æneas, et hæc olim meminisse juvabit*. Yet that remembrance which is not pleasant may be useful. There is however an intemperate attention to slight circumstances which is to be avoided, lest a great part of life

be spent in writing the history of the rest. Every day perhaps has something to be noted, but in a settled and uniform course few days can have much.

Why do I write all this, which I had no thought of when I began? The Thraliana drove it all into my head. It deserves however an hour's reflection, to consider how, with the least loss of time, the loss of what we wish to retain may be prevented.

Do not neglect to write to me, for when a post comes empty, I am really disappointed.

Boswell, I believe, will meet me here. I am, dearest lady, your, &c.

---

LETTER XXXV.—To the Same.

Lichfield, Oct. 3, 1777.

DEAR MADAM,

THIS is the last time that I shall write, in this excursion, from this place. To-morrow I shall be, I hope, at Birmingham; from which place I shall do my best to find the nearest way home. I come home, I think, worse than I went; and do not like the state of my health. But, *vive hodie*, make the most of life. I hope to get better, and—sweep the cobwebs. But I have sad nights. Mrs. Aston has sent me to Mr. Greene to be cured.

Did you see Foote at Brighthelmstone?—Did you think he would so soon be gone?—Life, says Falstaff, is a shuttle. He was a fine fellow in his way; and the world is really impoverished by his sinking glories. Murphy ought to write his life, at least to give the world a Footeana. Now, will any of his contemporaries bewail him? Will genius change *his sex* to weep? I would really have his life written with diligence.

It will be proper for me to work pretty diligently now for some time. I hope to get through, though so many weeks have passed. Little lives and little criticisms may serve.

Having been in the country so long, with very little to detain me, I am rather glad to look homewards. I am, &c.

---

LETTER XXXVI.—To the Same.

October 13th, 1777.

DEAR MADAM,

YET I do love to hear from you. Such pretty kind letters as you send. But it gives me great delight to find that my master misses me. I begin to wish myself with you more than I should do, if I were wanted less. It is a good thing to

stay away till one's company is desired, but not so good to stay after it is desired.

You know I have some work to do. I did not set to it very soon; and if I should go up to London with nothing done, what would be said, but that I was — who can tell what? I therefore stay till I can bring up something to stop their mouths, and then —

Though I am still at Ashbourne, I receive your dear letters that come to Lichfield, and you may continue that direction, for I think to get thither as soon as I can.

One of the does died yesterday, and I am afraid her fawn will be starved; I wish Miss Thrale had it to nurse; but the doctor is now all for cattle, and minds very little either does or hens.

How did you and your aunt part? Did you turn her out of doors to begin your journey? or did she leave you by her usual shortness of visits. I love to know how you go on.

I cannot but think on your kindness and my master's. Life has, upon the whole, fallen short, very short, of my early expectation; but the acquisition of such a friendship, at an age when new friendships are seldom required, is something better than the general course of things gives man a right to expect. I think on it with great delight; I am not very apt to be delighted. I am, &c.

#### LETTER XXXVII.—To MRS. THRALE.

*Lichfield, Oct. 27th, 1777.*

DEAR MADAM,

You talk of writing and writing, as if you had all the writing to yourself. If our correspondence were printed, I am sure posterity, for posterity is always the author's favourite, would say that I am a good writer too.—*Anche' io sono pittore.* To sit down so often with nothing to say; to say something so often, almost without consciousness of saying, and without any remembrance of having said, is a power of which I will not violate my modesty by boasting, but I do not believe that every body has it.

Some, when they write to their friends, are all affection; some are wise and sententious; some strain their powers for efforts of gayety; some write news, and some write secrets; but to make a letter without affection, without wisdom, without gayety, without news, and without a secret, is, doubtless, the great epistolical art.

In a man's letters, you know, Madam, his soul lies naked, his letters are only the mirror of his breast; whatever passes within him is shown undisguised in its natural process; nothing is inverted, nothing distorted: you see

systems in their elements; you discover actions in their motives.

Of this great truth, sounded by the knowing to the ignorant, and so echoed by the ignorant to the knowing, what evidence have you now before you? Is not my soul laid open in these veracious pages? Do not you see me reduced to my first principles? This is the pleasure of corresponding with a friend, where doubt and distrust have no place, and every thing is said as it is thought. The original idea is laid down in its simple purity, and all the supervenient conceptions are spread over it, *stratum super stratum*, as they happen to be formed. These are the letters by which souls are united, and by which minds naturally in unison move each other as they are moved themselves. I know, dearest lady, that in the perusal of this, such is the consanguinity of our intellects, you will be touched as I am touched. I have indeed concealed nothing from you, nor do I expect ever to repent of having thus opened my heart. I am, &c.

#### LETTER XXXVIII.—To the Same.

*November 10th, 1777.*

DEAR MADAM,

AND so, supposing that I might come to town and neglect to give you notice, or thinking some other strange thought, but certainly thinking wrong, you fall to writing about me to Tom Davies, as if he could tell you any thing that I would not have you know. As soon as I came hither, I let you know of my arrival; and the consequence is, that I am summoned to Bright-helmstone through storms, and cold, and dirt, and all the hardships of wintry journeys. You know my natural dread of all those evils; yet to show my master an example of compliance, and to let you know how much I long to see you, and to boast how little I give way to disease, my purpose is to be with you on Friday.

I am sorry for poor Nezzy, and hope she will in time be better; I hope the same for myself. The juvenescency of Mr. Scrase gives us both reason to hope, and therefore both of us rejoice in his recovery. I wish him well besides as a friend to my master.

I am just come home from not seeing my Lord Mayor's show, but I might have seen at least part of it. But I saw Miss Wesley and her brothers; she sends her compliments. Mrs. Williams is come home I think a very little better.

Every body was an enemy to that wig.—We will burn it, and get drunk; for what is joy without drink? Wagers are laid in the city

about our success, which is yet, as the French call it, problematical. Well, but seriously, I think I shall be glad to see you in your own hair; but do not take too much time in combing, and twisting, and papering, and unpapering, and curling, and frizzing, and powdering, and getting out the powder, with all the other operations required in the cultivation of a head of hair; yet let it be combed at least once in three months, on the quarter-day—I could wish it might be combed once at least in six weeks; if I were to indulge my wishes, but what are wishes without hopes, I should fancy the operation performed—one knows not when one has enough—perhaps every morning. I am, dearest lady, your, &c.

---

LETTER XXXIX.—To Mrs. THRALLE.

*Ashbourne, June 14th, 1779.*

DEAR MADAM,

YOUR account of Mr. Thrale's illness is very terrible; but when I remember that he seems to have it peculiar to his constitution, that whatever distemper he has, he always has his head affected, I am less frightened. The seizure was, I think, not apoplectical, but hysterical, and therefore not dangerous to life. I would have you however consult such physicians as you think you can best trust. Bromfield seems to have done well, and by his practice appears not to suspect any apoplexy. This is a solid and fundamental comfort. I remember Dr. Marsigli, an Italian physician, whose seizure was more violent than Mr. Thrale's, for he fell down helpless, but his case was not considered as of much danger, and he went safe home, and is now a professor at Padua. His fit was considered as only hysterical.

I hope Sir Philip, who franked your letter, comforts you as well as Mr. Seward. If I can comfort you, I will come to you; but I hope you are now no longer in want of any help to be happy. I am, &c.

The Doctor sends his compliments; he is one of the people that are growing old.

---

LETTER XL.—To the Same.

*Ashbourne, June 14th, 1779.*

DEAR MADAM,

How near we are all to extreme danger. We are merry or sad, or busy or idle, and forget that death is hovering over us. You are a dear lady for writing again. The case, as you now describe it, is worse than I conceived it when I

read your first letter. It is still however not apoplectic, but seems to have something worse than hysterical, a tendency to a palsy, which I hope however is now over. I am glad that you have Heberden, and hope we are all safer. I am the more alarmed by this violent seizure, as I can impute it to no wrong practices, or intemperance of any kind, and therefore know not how any defence or preservative can be obtained. Mr. Thrale has certainly less exercise than when he followed the foxes; but he is very far from unwilldiness or inactivity, and further still from any vicious or dangerous excess. I fancy, however, he will do well to ride more.

Do, dear Madam, let me know every post how he goes on. Such sudden violence is very dreadful; we know not by what it is let loose upon us, nor by what its effects are limited.

If my coming can either assist or divert, or be useful to any purpose, let me but know. I will soon be with you.

Mrs. Kennedy, Queeney's Baucis, ended last week a long life of disease and poverty. She had been married about fifty years.

Dr. Taylor is not much amiss, but always complaining. I am, &c.

---

LETTER XLI.—To MR. THRALLE.

*Lichfield, June 23d, 1779.*

DEAR SIR,

To show you how well I think of your health, I have sent you a hundred pounds to keep for me. It will come within one day of quarter-day, and that day you must give me. I came by it in a very uncommon manner, and would not confound it with the rest.

My wicked mistress talks as if she thought it possible for me to be indifferent or negligent about your health or hers. If I could have done any good, I had not delayed an hour to come to you; and I will come very soon to try if my advice can be of any use, or my company of any entertainment.

What can be done you must do for yourself; do not let any uneasy thought settle in your mind. Cheerfulness and exercise are your great remedies. Nothing is for the present worth your anxiety. *Vivite leti* is one of the great rules of health. I believe it will be good to ride often, but never to weariness, for weariness is itself a temporary resolution of the nerves, and is therefore to be avoided. Labour is exercise continued to fatigue—exercise is labour used only while it produces pleasure.

Above all, keep your mind quiet: do not think with earnestness even of your health; but think on such things as may please without too much agitation; among which I hope is, dear Sir, your, &c.

## LETTER XLII.—To Mrs. Thrale.

DEAR MADAM,

ON Sunday I dined with poor Lawrence, who is deaf than ever. When he was told that Dr. Moisy visited Mr. Thrale, he inquired for what? and said there was nothing to be done, which Nature would not do for herself. On Sunday evening I was at Mrs. Vesey's, and there was inquiry about my master, but I told them all good. There was Dr. Bernard of Eton, and we made a noise all the evening; and there was Pepys, and Wralax till I drove him away. And I have no loss of my mistress, who laughs, and frisks, and frolics it all the long day, and never thinks of poor Colin.

If Mr. Thrale will but continue to mend, we shall, I hope, come together again, and do as good things as ever we did; but perhaps you will be made too proud to heed me, and yet as I have often told you, it will not be easy for you to find such another.

Queeney has been a good girl, and wrote me a letter; if Burney said she would write, she told you a fib. She writes nothing to me. She can write home fast enough. I have a good mind not to let her know that Dr. Bernard, to whom I had recommended her novel, speaks of it with great commendation, and that the copy which she lent me, has been read by Dr. Lawrence three times over. And yet what a gypsey it is. She no more minds me than if I were a Brangton. Pray speak to Queeney to write again.

I have had a cold and a cough, and taken opium, and think I am better. We have had very cold weather; bad riding weather for my master, but he will surmount it all. Did Mrs. Browne make any reply to your comparison of business with solitude, or did you quite down her? I am much pleased to think that Mrs. Cotton thinks me worth a frame, and a place upon her wall; her kindness was hardly within my hope, but time does wonderful things. All my fear is, that if I should come again, my print would be taken down. I fear I shall never hold it.

Who dines with you? Do you seek Dr. Woodward or Dr. Harrington? Do you go to the house where they write for the myrtle? You are at all places of high resort, and bring home hearts by dozens; while I am seeking for something to say about men of whom I know nothing but their verses, and sometimes very little of them. Now I have begun, however, I do not despair of making an end. Mr. Nichols holds that Addison is the most *taking* of all that I have done. I doubt they will not be done before you come away.

Now you think yourself the first writer in the world for a letter about nothing. Can you write such a letter as this? So miscellaneous,

with such noble disdain of regularity, like Shakspeare's works; such graceful negligence of transition, like the ancient enthusiasts? The pure voice of nature and of friendship. Now of whom shall I proceed to speak? Of whom but Mrs. Montague? Having mentioned Shakspeare and Nature, does not the name of Montague force itself upon me? Such were the transitions of the ancients, which now seem abrupt, because the intermediate idea is lost to modern understandings. I wish her name had connected itself with friendship; but, ah Colin, thy hopes are in vain! One thing however is left me, I have still to complain; but I hope I shall not complain much while you have any kindness for me. I am, dearest and dearest Madam, your, &c.

London, April 11th, 1780.

## LETTER XLIII.—To the Same.

DEAREST MADAM,

Mr. Thrale never will live abstintently, till he can persuade himself to abstain by rule. I lived on potatoes on Friday, and on spinach to-day; but I have had, I am afraid, too many dinners of late. I took physic too both days, and hope to fast to-morrow. When he comes home, we will shame him, and Jebb shall scold him into regularity. I am glad, however, that he is always one of the company, and that my dear Queeney is again another. Encourage, as you can, the musical girl.

Nothing is more common than mutual dislike where mutual approbation is particularly expected. There is often on both sides a vigilance, not over benevolent; and as attention is strongly excited, so that nothing drops unheeded, any difference in taste or opinion, and some difference where there is no restraint will commonly appear, immediately generates dislike.

Never let criticisms operate upon your face or your mind; it is very rarely that an author is hurt by his critics. The blaze of reputation cannot be blown out, but it often dies in the socket; a very few names may be considered as perpetual lamps that shine unconsumed. From the author of Fitzosborne's Letters I cannot think myself in much danger. I met him only once about thirty years ago, and in some small dispute reduced him to whistle; having not seen him since, that is the last impression. Poor Moore the Fabulist was one of the company.

Mrs. Montague's long stay against her own inclination, is very convenient. You would, by your own confession, want a companion; and she is *par pluribus*, conversing with her you may find variety in one.

At Mrs. Ord's I met one Mrs. B——, a

travelled lady, of great spirit, and some consciousness of her own abilities. We had a contest of gallantry, an hour long, so much to the diversion of the company, that at Ramsay's last night, in a crowded room, they would have pitted us again. There were Smelt, and the Bishop of St. Asaph, who comes to every place; and Lord Monboddo, and Sir Joshua, and ladies out of tale.

The Exhibition, how will you do either to see or not to see! The Exhibition is eminently splendid. There is contour, and keeping, and grace, and expression, and all the varieties of artificial excellence. The apartments were truly very noble. The pictures, for the sake of a sky-light, are at the top of the house; there we dined, and I sat over-against the Archbishop of York. See how I live when I am not under petticoat government. I am, &c.

London, May 1, 1780.

---

LETTER XLIV.—To MRS. THRALE.

London, June 9, 1780.

DEAR MADAM,

To the question, Who was impressed with consternation? it may with great truth be answered that every body was impressed, for nobody was sure of his safety.

On Friday the good Protestants met in St. George's Fields, at the summons of Lord George Gordon, and marching to Westminster, insulted the Lords and Commons, who all bore it with great tameness. At night the outrages began by the demolition of the mass-house by Lincoln's Inn.

An exact journal of a week's defiance of government I cannot give you. On Monday, Mr. Strahan, who had been insulted, spoke to Lord Mansfield, who had, I think, been insulted, too, of the licentiousness of the populace; and his Lordship treated it as a very slight irregularity. On Tuesday night they pulled down Fielding's house, and burnt his goods in the street. They had gutted on Monday Sir George Savile's house, but the building was saved. On Tuesday evening, leaving Fielding's ruins, they went to Newgate to demand their companions who had been seized demolishing the chapel. The keeper could not release them but by the Mayor's permission, which he went to ask; at his return he found all the prisoners released, and Newgate in a blaze. They then went to Bloomsbury, and fastened upon Lord Mansfield's house, which they pulled down; and as for his goods, they totally burnt them. They have since gone to Cane-wood, but a guard was there before them. They plunder-

ed some Papists, I think, and burnt a mass-house in Moorfields the same night.

On Wednesday I walked with Dr. Scott to look at Newgate, and found it in ruins, with the fire yet glowing. As I went by, the Protestants were plundering the Sessions-house at the Old Bailey. There were not, I believe, a hundred; but they did their work at leisure, in full security, without sentinels, without trepidation, as men lawfully employed, in full day. Such is the cowardice of a commercial place. On Wednesday they broke open the Fleet, and the King's Bench, and the Marshalsea, and Wood-street Counter, and Clerkenwell Bridewell, and released all the prisoners.

At night they set fire to the Fleet and to the King's Bench, and I know not how many other places; and one might see the glare of conflagration fill the sky from many parts. The sight was dreadful. Some people were threatened; Mr. Strahan advised me to take care of myself. Such a time of terror you have been happy in not seeing.

The King said in council, that the magistrates had not done their duty, but that he would do his own; and a proclamation was published, directing us to keep our servants within doors, as the peace was now to be preserved by force. The soldiers were sent out to different parts, and the town is now at quiet.

What has happened at your house you will know, the harm is only a few butts of beer; and I think you may be sure that the danger is over. There is a body of soldiers at St. Margaret's Hill.

Of Mr. Tyson I know nothing, nor can guess to what he can allude; but I know that a young fellow, of little more than seventy, is naturally an unresisted conqueror of hearts.

Pray tell Mr. Thrale that I live here and have no fruit, and, if he does not interpose, am not likely to have much; but I think he might as well give me a little as give all to the gardener.

Pray make my compliments to Queeney and Burney. I am, &c.

---

LETTER XLV.—To the Same.

June 10th, 1780.

DEAR MADAM,

You have ere now heard and read enough to convince you that we have had something to suffer, and something to fear, and therefore I think it necessary to quiet the solicitude which you undoubtedly feel, by telling you that our calamities and terrors are now at an end. The soldiers are stationed so as to be every where within call; there is no longer any body of

rioters, and the individuals are hunted to their holes, and led to prison; the streets are safe and quiet: Lord George was last night sent to the Tower. Mr. John Wilkes was this day with a party of soldiers in my neighbourhood, to seize the publisher of a seditious paper. Every body walks, and eats, and sleeps in security. But the history of the last week would fill you with amazement: it is without any modern example.

Several chapels have been destroyed, and several inoffensive Papists have been plundered, but the high sport was to burn the jails. This was a good rabble trick. The debtors and the criminals were all set at liberty; but of the criminals, as has always happened, many are already retaken, and two pirates have surrendered themselves, and it is expected that they will be pardoned.

Government now acts again with its proper force; and we are all again under the protection of the king and the law. I thought that it would be agreeable to you and my master to have my testimony to the public security; and that you would sleep more quietly when I told you that you are safe. I am, dearest lady, your, &c.

---

LETTER XLVI.—To Mrs. THRALE.

*London, April 5th, 1781.*

DEAREST MADAM,

OF your injunctions, to pray for you, and write to you, I hope to leave neither unobserved; and I hope to find you willing in a short time to alleviate your trouble by some other exercise of the mind. I am not without my part of the calamity. No death since that of my wife has ever oppressed me like this. But let us remember, that we are in the hands of Him who knows when to give and when to take away; who will look upon us with mercy through all our variations of existence, and who invites us to call on him in the day of trouble. Call upon him in this great revolution of life, and call with confidence. You will then find comfort for the past, and support for the future. He that has given you happiness in marriage, to a degree of which, without personal knowledge, I should have thought the description fabulous, can give you another mode of happiness as a mother; and at last the happiness of losing all temporal cares in the thoughts of an eternity in Heaven.

I do not exhort you to reason yourself into tranquillity. We must first pray, and then labour; first implore the blessing of God, and use those means which he puts into our hands. Cultivated ground has few weeds; a mind occupied by lawful business, has little room for useless regret.

We read the will to-day; but I will not fill my first letter with any other account than that, with all my zeal for your advantage, I am satisfied; that the other executors, more used to consider property than I, commended it for wisdom and equity. Yet why should I not tell you that you have five hundred pounds for your immediate expenses, and two thousand pounds a-year, with both the houses, and all the goods.

Let us pray for one another, that the time, whether long or short, that shall yet be granted us, may be well spent; and that when this life, which at the longest is very short, shall come to an end, a better may begin which shall never end. I am, dearest Madam, your, &c.

---

LETTER XLVII.—To the Same.

*April 7th, 1781.*

DEAR MADAM,

I HOPE you begin to find your mind grow clearer. My part of the loss hangs upon me. I have lost a friend of boundless kindness, at an age when it is very unlikely that I should find another.

If you think change of place likely to relieve you, there is no reason why you should not go to Bath; the distances are unequal, but with regard to practice and business they are the same. It is a day's journey from either place; and the post is more expeditious and certain to Bath. Consult only your inclination, for there is really no other principle of choice. God direct and bless you.

Mr. C—— has offered Mr. P—— money, but it was not wanted. I hope we shall all do all we can to make you less unhappy, and you must do all you can for yourself. What we, or what you can do, will for a time be but little; yet certainly that calamity, which may be considered as doomed to fall inevitably on half mankind, is not finally without alleviation.

It is something for me, that, as I have not the decrepitude, I have not the callousness of old age. I hope in time to be less afflicted. I am, &c.

---

LETTER XLVIII.—To the Same.

*London, April 9th, 1781.*

DEAR MADAM,

THAT you are gradually recovering your tranquillity is the effect to be humbly expected from trust in God. Do not represent life as darker than it is. Your loss has been very great, but

you retain more than almost any other can hope to possess. You are high in the opinion of mankind; you have children from whom much pleasure may be expected; and that you will find many friends, you have no reason to doubt. Of my friendship, be it worth more or less, I hope you think yourself certain, without much art or care. It will not be easy for me to repay the benefits that I have received; but I hope to be always ready at your call. Our sorrow has different effects; you are withdrawn into solitude, and I am driven into company. I am afraid of thinking what I have lost. I never had such a friend before. Let me have your prayers and those of my dear Queeney.

The prudence and resolution of your design to return so soon to your business and your duty deserves great praise; I shall communicate it on Wednesday to the other executors. Be pleased to let me know whether you would have me come to Streatham to receive you, or stay here till the next day. I am, &c.

#### LETTER XLIX.—To MRS. THRALE.

*Bolt-court, Fleet-street, June 19th, 1783.*

DEAR MADAM,

I AM sitting down in no cheerful solitude to write a narrative which would once have affected you with tenderness and sorrow, but which you will perhaps pass over now with a careless glance of frigid indifference. For this diminution of regard, however, I know not whether I ought to blame you, who may have reasons which I cannot know; and I do not blame myself, who have for a great part of human life done you what good I could, and have never done you evil.

I have been disordered in the usual way, and had been relieved by the usual methods, by opium and cathartics, but had rather lessened my dose of opium.

On Monday the 16th I sat for my picture, and walked a considerable way with little inconvenience. In the afternoon and evening I felt myself light and easy, and began to plan schemes of life. Thus I went to bed, and in a short time waked and sat up, as has been long my custom, when I felt a confusion and indistinctness in my head, which lasted I suppose about half a minute; I was alarmed, and prayed God, that however he might afflict my body, he would spare my understanding. This prayer, that I might try the integrity of my faculties, I made in Latin verse. The lines were not very good, but I knew them not to be very good: I made them easily, and concluded myself to be unimpaired in my faculties.

Soon after I perceived that I had suffered a

paralytic stroke, and that my speech was taken from me. I had no pain, and so little dejection in this dreadful state, that I wondered at my own apathy, and considered that perhaps death itself, when it should come, would excite less horror than seems now to attend it.

In order to rouse the vocal organs, I took two drams. Wine has been celebrated for the production of eloquence. I put myself into violent motion, and I think repeated it; but all was vain. I then went to bed, and, strange as it may seem, I think, slept. When I saw light, it was time to contrive what I should do. Though God stopped my speech, he left me my hand: I enjoyed a mercy which was not granted to my dear friend Lawrence, who now perhaps overlooks me as I am writing, and rejoices that I have what he wanted. My first note was necessarily to my servant, who came in talking, and could not immediately comprehend why he should read what I put into his hands.

I then wrote a card to Mr. Allen, that I might have a discreet friend at hand to act as occasion should require. In penning this note I had some difficulty; my hand, I knew not how nor why, made wrong letters. I then wrote to Dr. Taylor to come to me, and bring Dr. Heberden, and I sent to Dr. Brocklesby, who is my neighbour. My physicians are very friendly and very disinterested, and give me great hopes, but you may imagine my situation. I have so far recovered my vocal powers, as to repeat the Lord's prayer with no very imperfect articulation. My memory, I hope, yet remains as it was; but such an attack produces solicitude for the safety of every faculty.

How this will be received by you I know not. I hope you will sympathise with me; but perhaps

My mistress, gracious, mild, and good,  
Cries, Is he dumb? 'Tis time he should.

But can this be possible? I hope it cannot. I hope that what, when I could speak, I spoke of you, and to you, will be in a sober and serious hour remembered by you; and surely it cannot be remembered but with some degree of kindness. I have loved you with virtuous affection; I have honoured you with sincere esteem. Let not all our endearments be forgotten, but let me have in this great distress your pity and your prayers. You see I yet turn to you with my complaints, as a settled and unalienable friend; do not, do not drive me from you, for I have not deserved either neglect or hatred.

To the girls, who do not write often, for Susy has written only once, and Miss Thrale owes me a letter, I earnestly recommend, as their guardian and friend, that they remember their Creator in the days of their youth.

I suppose you may wish to know how my

disease is treated by the physicians. They put a blister upon my back, and two from my ear to my throat, one on a side. The blister on the back has done little, and those on the throat have not risen. I bullied and bounced, (it sticks to our last sand,) and compelled the apothecary to make his salve according to the Edinburgh Dispensatory, that it might adhere better. I have two on now of my own prescription. They likewise give me salt of hartshorn, which I take with no great confidence, but I am satisfied that what can be done is done for me.

O God! give me comfort and confidence in Thee; forgive my sins; and if it be thy good pleasure, relieve my diseases for Jesus Christ's sake. Amen.

I am almost ashamed of this querulous letter; but now it is written, let it go. I am, &c.

---

LETTER L.—To Mrs. THRALE.

DEAR MADAM,

AMONG those that have inquired after me, Sir Philip is one; and Dr. Burney was one of those who came to see me. I have had no reason to complain of indifference or neglect. Dick Burney is come home five inches taller.

Yesterday, in the evening, I went to church, and have been to-day to see the great burning-glass, which does more than was ever done before by the transmission of the rays, but is not equal in power to those which reflect them. It wastes a diamond placed in the focus, but causes no diminution of pure gold. Of the rubies exposed to its action, one was made more vivid, the other paler. To see the glass, I climbed up stairs to the garret, and then up a ladder to the leads, and talked to the artist rather too long; for my voice, though clear and distinct for a little while, soon tires and falters. The organs of speech are yet very feeble, but will, I hope, be by the mercy of God finally restored: at present, like any other weak limb, they can endure but little labour at once. Would you not have been very sorry for me when I could scarcely speak?

Fresh cantharides were this morning applied to my head, and are to be continued some time longer. If they play me no treacherous tricks, they give me very little pain.

Let me have your kindness and your prayers; and think on me as on a man, who, for a very great portion of your life, has done you all the good he could, and desires still to be considered, Madam, your, &c.

LETTER LI.—To the Same.

London, July 1, 1783.

DEAREST MADAM,

THIS morning I took the air by a ride to Hampstead, and this afternoon I dined with the club. But fresh cantharides were this day applied to my head.

Mr. Cator called on me to-day, and told me that he had invited you back to Streatham. I showed the unfitness of your return thither, till the neighbourhood should have lost its habits of depredation, and he seemed to be satisfied. He invited me very kindly and cordially to try the air of Beckenham, and pleased me very much by his affectionate attention to Miss Vezy. There is much good in his character, and much usefulness in his knowledge.

Queency seems now to have forgotten me. Of the different appearance of the hills and valleys an account may perhaps be given, without the supposition of any prodigy. If she had been out and the evening was breezy, the exhalations would rise from the low grounds very copiously; and the wind that swept and cleared the hills, would only by its cold condense the vapours of the sheltered valleys.

Murphy is just gone from me; he visits me very kindly, and I have no unkindness to complain of.

I am sorry that Sir Philip's request was not treated with more respect, nor can I imagine what has put them so much out of humour; I hope their business is prosperous.

I hope that I recover by degrees, but my nights are restless; and you will suppose the nervous system to be somewhat enfeebled. I am, Madam, your, &c.

---

LETTER LII.—To the Same.

London, Oct. 9, 1783.

Two nights ago Mr. Burke sat with me a long time; he seems much pleased with his journey. We had both seen Stonehenge this summer for the first time. I told him that the view had enabled me to confute two opinions which have been advanced about it. One that the materials are not natural stones, but an artificial composition hardened by time. This notion is as old as Camden's time; and has this strong argument to support it, that stone of that species is no where to be found. The other opinion, advanced by Dr. Charlton, is, that it was erected by the Danes.

Mr. Bowles made me observe, that the transverse stones were fixed on the perpendicular supporters by a knob formed on the top of the upright stone, which entered into a hollow cut in the crossing stone. This is a proof that the

H h

enormous edifice was raised by a people who had not yet the knowledge of mortar; which cannot be supposed of the Danes, who came hither in ships, and were not ignorant certainly of the arts of life. This proves likewise the stones not to be factitious; for they that could mould such durable masses could do much more than make mortar, and could have continued the transverse from the upright part with the same paste.

You have doubtless seen Stonehenge; and if you have not, I should think it a hard task to make an adequate description.

It is, in my opinion, to be referred to the earliest habitation of the island, as a druidical monument of at least two thousand years; probably the most ancient work of man upon the island. Salisbury cathedral and its neighbour Stonehenge, are two eminent monuments of art and rudeness, and may show the first essay, and the last perfection in architecture.

I have not yet settled my thoughts about the generation of light air, which I indeed once saw produced, but I was at the height of my great complaint. I have made inquiry, and shall soon be able to tell you how to fill a balloon. I am, Madam, your, &c.

LETTER LIII.—To Mrs. THRALE.

London, Dec. 27th, 1783.

DEAR MADAM,

THE wearisome solitude of the long evenings did indeed suggest to me the convenience of a club in my neighbourhood, but I have been hindered from attending it by want of breath. If I can complete the scheme, you shall have the names and the regulations.

The time of the year, for I hope the fault is rather in the weather than in me, has been very hard upon me. The muscles of my breast are much convulsed. Dr. Heberden recommends opiates, of which I have such horror that I do not think of them but *in extremis*. I was, however, driven to them last night for refuge, and having taken the usual quantity, durst not go to bed, for fear of that uneasiness to which a supine posture exposes me, but rested all night in a chair with much relief, and have been to-day more warm, active, and cheerful.

You have more than once wondered at my complaint of solitude when you hear that I am crowded with visits. *Inopem me copia fecit*. Visitors are no proper companions in the chamber of sickness. They come when I could sleep or read, they stay till I am weary, they force me to attend when my mind calls for relaxation, and to speak when my powers will hardly actu-

ate my tongue. The amusements and consolations of languor and depression are conferred by familiar and domestic companions, which can be visited or called at will, and can occasionally be quieted or dismissed, who do not obstruct accommodation by ceremony, or destroy indolence by awakening effort.

Such society I had with Levet and Williams; such I had where—I am never likely to have it more.

I wish, dear lady, to you and my dear girls, many a cheerful and pious Christmas. I am, your, &c.

LETTER LIV.—To Mrs. Piozzi.

London, July 8th, 1784.

DEAR MADAM,

WHAT you have done, however I may lament it, I have no pretence to resent, as it has not been injurious to me; I therefore breathe out one sigh more of tenderness, perhaps useless, but at least sincere.

I wish that God may grant you every blessing, that you may be happy in this world for its short continuance, and eternally happy in a better state; and whatever I can contribute to your happiness I am very ready to repay, for that kindness which soothed twenty years of a life radically wretched.

Do not think slightly of the advice which I now presume to offer. Prevail upon Mr. Piozzi to settle in England: you may live here with more dignity than in Italy, and with more security; your rank will be higher, and your fortune more under your own eye. I desire not to detail all my reasons; but every argument of prudence and interest is for England, and only some phantoms of imagination seduce you to Italy.

I am afraid, however, that my counsel is vain, yet I have eased my heart by giving it.

When Queen Mary took the resolution of sheltering herself in England, the Archbishop of St. Andrews, attempting to dissuade her, attended on her journey; and when they came to the irretrievable stream that separated the two kingdoms, walked by her side into the water, in the middle of which he seized her bridle, and with earnestness proportioned to her danger and his own affection pressed her to return. The queen went forward.—If the parallel reaches thus far, may it go no farther.—The tears stand in my eyes.

I am going into Derbyshire, and hope to be followed by your good wishes, for I am, with great affection, your, &c.

**PRAYERS**

AND

**MEDITATIONS,**

COMPOSED BY

**SAMUEL JOHNSON, LL. D.**

AND

PUBLISHED FROM HIS MSS.

By **GEORGE STRAHAN, D. D.**

PREBENDARY OF ROCHESTER, AND VICAR OF ISLINGTON, IN MIDDLESEX.

## PREFACE

TO THE

FIRST EDITION IN 1785.

THESE Posthumous Devotions of Dr. Johnson will be, no doubt, welcomed by the public, with a distinction similar to that which has been already paid to his other Works.

During many years of his life, he stately observed certain days \* with a religious solemnity; on which, and other occasions, it was his custom to compose suitable Prayers and Meditations; committing them to writing for his own use, and, as he assured me, without any view to their publication. But being last summer on a visit at Oxford to the Reverend Dr. Adams,† and that gentleman urging him repeatedly to engage in some work of this kind, he then first conceived a design to revise these pious effusions, and bequeathed them, with enlargements, to the use and benefit of others.

Infirmities, however, now growing fast upon him, he at length changed this design and determined to give the manuscripts, without revision, in charge to me, as I had long shared his intimacy, and was at this time his daily attendant. Accordingly, one morning, on my visiting him by desire at an early hour, he put these papers into my hands, with instructions for committing them to the press, and with a promise to prepare a sketch of his own life to accompany them. But the performance of this promise also was prevented, partly by his hasty destruction of some private memoirs, which he after-

wards lamented, and partly by that incurable sickness, which soon ended in his dissolution.

As a biographer, he is allowed to have excelled without a rival; and we may justly regret that he who had so advantageously transmitted to posterity the memories of other eminent men, should have been thus prevented doing equal honour to his own. But the particulars of this venerable man's personal history may still, in great measure, be preserved; and the public are authorized to expect them from some of his many friends, who are zealous to augment the monument of his fame by the detail of his private virtues.\*

That the authenticity of this work may never be called in question, the original manuscript will be deposited in the library of Pembroke College, in Oxford. Dr. Bray's associates are to receive the profits of the first edition, by the author's appointment; and any further advantages that accrue, will be distributed among his relations.†

---

\* Since this Preface was written the following publications have appeared, viz.

Anecdotes of the late Dr. Johnson, during the last Twenty Years of his life, by Hester Lynch Piozzi. 3d edit. 1786, small 8vo.

The Life of Samuel Johnson, LL. D., published with his Works, by Sir John Hawkins, 8vo. 1787.

The life of Samuel Johnson, LL. D., by James Boswell, Esq. first published in 2 vols. 4to. afterwards (1793) in 3, and finally in 4 vols. 8vo.

An Essay on the Life and Genius of Samuel Johnson, LL. D. published with the 2d edition of his Works, by Arthur Murphy, Esq. 8vo. 1792.

† The profits of the first edition were accordingly paid to Dr. Bray's associates; and those of the se-

---

\* Viz. New-Year's Day; March 23, the day on which his wife, Mrs. Elizabeth Johnson, died; Good-Friday; Easter-Day; and September the 18th, his own birth-day.

† Master of Pembroke College, at which Dr. Johnson received part of his education.

I have now discharged the trust reposed in me by that friend, whose labours entitle him to lasting gratitude and veneration from the literary, and still more from the Christian world. His *Lives of the English Poets* "are written," as he justly hopes, "in such a manner as may tend to the promotion of piety." This merit may be ascribed, with equal truth, to most of his other works; and doubtless to his *Sermons*, none of which indeed have yet been made public, nor is it known where they are extant; though it be certain, from his own acknowledgment, both in conversation and writing, that he composed many. As he seems to have turned his thoughts with peculiar earnestness to the study of religious subjects, we may presume these remains would deserve to be numbered among his happiest productions. It is therefore hoped they have fallen into the hands of those, who will not withhold them in obscurity, but consider them as deposits, the seclusion of which, from general use, would be an injurious diminution of their author's fame, and retrenchment from the common stock of serious instruction.\*

But the integrity of his mind was not only speculatively shadowed in his writings, but substantially exemplified in his life. His prayers and his alms, like those of the good Cornelius, went up for an incessant memorial; and always, from a heart deeply impressed with piety, never insensible to the calls of friendship or compassion, and prone to melt in effusions of tenderness on the slightest incitement.

When, among other articles in his Dictionary, Lichfield presents itself to his notice, he salutes that place of his nativity in these words of Virgil, *Salve, magna parens*. Nor was the salutation adopted without reason; for well might he denominate his parent city great, who, by the celebrity of his name, hath for ever made it so—

Salve, magna parens frugum, *Staffordia* tellus  
Magna virum.

VIRG. Georg. lib. ii. 173.

cond have been distributed among Dr. Johnson's poor relations and connections, all of whom are since dead, except Humphrey Hely, who married — Ford, sister to the Rev. Cornelius Ford, and first cousin to our author. This poor man, who has seen better days, is now a tenant of Whicher's Almshouses, Chapel-street, Westminster.

\* In 1788, appeared one volume, and in 1789, a second, of *Sermons* on different subjects, left for publication by John Taylor, LL. D., late Prebendary of Westminster, &c. published by the Rev. Samuel Hayes, A. M., Usher of Westminster School. To the second volume is added a *Sermon* avowedly written by Dr. Johnson, for the funeral of his wife: and from internal and other evidence, the whole contents of both volumes are now generally ascribed to the same author.

More decisive testimonies of his affectionate sensibility are exhibited in the following work, where he bewails the successive depredations of death on his relations and friends; whose virtues, thus mournfully suggested to his recollection, he seldom omits to recite, with ardent wishes for their acquittal at the throne of mercy. In praying, however, with restriction,\* for these regretted tenants of the grave, he indeed conformed to a practice, which though it has been retained by other learned members of our church, her Liturgy no longer admits, and many, who adhere to her communion, avowedly disapprove. That such prayers are, or may be, efficacious, they who sincerely offer them must believe. But may not a belief in their efficacy, so far as it prevails, be attended with danger to those who entertain it? May it not incline them to carelessness; and promote a neglect of repentance, by inducing a persuasion, that without it, pardon may be obtained through these vicarious intercessions? Indeed the doctrine (I speak with deference to the great names that have espoused it) seems inconsistent with some principles generally allowed among us. If, *where the tree falleth, there it shall be*; if, as Protestants maintain, our state at the close of life is to be the measure of our final sentence; then prayers for the dead, being visibly fruitless, can be regarded only as the vain oblations of superstition. But of all superstitions, this perhaps is one of the least unamiable, and most incident to a good mind. If our sensations of kindness be intense, those whom we have revered and loved during life, death, which removes them from sight, cannot wholly exclude from our concern. The fondness, kindled by intercourse, will still glow from memory, and prompt us to wish, perhaps to pray, that the valued dead, to whose felicity our friendship can no longer minister, may find acceptance with Him, *who giveth us, and them, richly all things to enjoy*. It is true, for the reason just mentioned, such evidences of our surviving affection may be thought

\* Our author informs us that his prayers for deceased friends were offered up, on several occasions, *as far as might be lawful for him*; and once *with Preface of Permission*: whence it should seem that he had some doubt concerning the lawfulness of such prayers, though it does not appear that he ever discontinued the use of them. It is also observable, that in his reflections on the death of his Wife and again of Mr. Thrale, he wishes that the Almighty *not may have, but may have had* mercy on them; evidently supposing their sentence to have been already passed in the Divine Mind. This supposition, indeed, may seem not very consistent with his recommending them to the Divine Mercy afterwards. It proves, however, that he had no belief in a state of Purgatory, and consequently no reason for praying for the dead, that could impeach the sincerity of his profession as a Protestant.

ill-judged; but surely they are generous; and some natural tenderness is due even to a superstition, which thus originates in piety and benevolence.

We see our author, in one place, purposing with seriousness to remember his brother's dream; in another, owning his embarrassment from needless stipulations; and, on many occasions, noting, with a circumstantial minuteness, the process of his religious fasts. But these peculiarities, if they betray some tincture of the propensity already observed, prove, for the most part, the pious tenor of his thoughts. They indicate a mind ardently zealous to please God, and anxious to evince its alacrity in his service, by a scrupulous observance of more than enjoined duties.

But however the soundness of his principles might, in general, be apparent, he seems to have lived with a perpetual conviction that his conduct was defective; lamenting past neglects, forming purposes of future diligence, and constantly acknowledging their failure in the event. It was natural for him, who possessed such powers of usefulness, to consider the waste of his time as a peculiar delinquency; with which, however, he appears to have been far less frequently, and less culpably chargeable, than his own tender sense of duty disposed him to apprehend. That he meritoriously redeemed many days and years from indolence, is evinced by

the number and excellence of his works; nor can we doubt that his literary exertions would have been still more frequent, had not *morbid melancholy*, which, as he informs us, was the infirmity of his life, repressed them. To the prevalence of this infirmity, we may certainly ascribe that anxious fear, which seized him on the approach of his dissolution, and which his friends, who knew his integrity, observed with equal astonishment and concern. But the strength of religion at length prevailed against the frailty of nature; and his foreboding dread of the Divine Justice by degrees subsided into a pious trust and humble hope in the Divine Mercy.

He is now gone to await his eternal sentence; and as his life exhibited an illustrious example, so his death suggests an interesting admonition. It concerns us to reflect, that however many may find it impossible to rival his intellectual excellence, yet to imitate his virtues is both possible and necessary to all; that the current of time now hastens to plunge us in that gulf of Death, where we have so lately seen him absorbed, where there is no more place of repentance, and whence, according to our innocence or guilt, we shall rise to an immortality of bliss or torment.

GEORGE STRAHAN.

Islington, August 6th 1785.

TO

### THE FOURTH EDITION.

---

To this Edition is added [at p. 253] a Prayer now in my possession in Dr. Johnson's own hand-writing, in which he expressly supposes that Providence may permit him to enjoy the good effects of his Wife's attention and ministration by appearance, impulses, or dreams. It is well known that he admitted the credibility of apparitions: and in his *Rasselas*,\* he maintains it, in the person of Imlac, by the following acute train of reasoning:

"That the dead are seen no more, said Imlac, I will not undertake to maintain, against the concurrent and unvaried testimony of all ages and of all nations. There is no people, rude or learned, among whom apparitions of the dead are not related and believed. This opinion, which perhaps prevails as far as human nature is diffused, could become universal only by its truth; those that never heard of one another, would not have agreed in a tale which nothing but experience can make credible. That it is doubted by single cavillers, can very little weaken the general evidence; and some who deny it with their tongues confess it by their fears."

Cavillers have indeed doubted the credibility of this tale, rejecting it in every instance as the dream of delusion, or the fiction of imposture.

That many tales of apparitions have originated in delusion, and many in imposture, cannot be denied; and the whole question to be considered in this case is, how far we have authority for believing that any are founded in truth or probability.

Some have thought all such reported appearances liable to suspicion, because in general they seem called forth by no exigency, and calculated to administer to no end or purpose. This cir-

cumstance, so far as it may be observed, will authorise a presumption that they are not the fabrications of imposture; which has always some end, commonly a discoverable end, to promote by its illusions. At any rate, our ignorance of the purpose or end can be no disproof of the fact: and the purposes of Providence, in the events most obvious to our notice, observably often elude our scrutiny.

Still the acknowledged millions of the dead that *are seen no more* induce a reluctance to believe in the re-appearance of any, however attested. Common incidents, though often not less inexplicable than those which are unusual, become familiar to our observation, and soon cease to excite our wonder. But rare and preternatural occurrences astonish and shock belief by their novelty; and apparitions are by many accounted things so improbable in themselves, as not to be rendered credible by any external testimony. The same charge of insuperable incredibility has been urged against miracles; and in both cases proceeds upon a supposition, evidently erroneous, that the improbable nature of any alleged event is a stronger evidence of its falsity, than the best approved testimony can be of its truth.

It is confessed that extraordinary events, when rumoured, are, till proved, less probable than those that are common; because their occurrence having been less frequent, their existence has been verified in fewer instances by experience. And, upon the same principle, the more remote any reported phenomenon appears to be from what we ordinarily observe in nature, the greater, antecedently to its authentication by evidence, is its improbability.

But improbability arising from rarity of occurrence, or singularity of nature, amounts to no disproof; it is a presumptive reason of doubt,

---

\* Chap. xxxi.

too feeble to withstand the conviction induced by positive and credible testimony; such as that which has been borne to shadowy re-appearances of the dead. These, as our author intimates, have been uniformly attested in every age and country by persons, who had no communication or knowledge of each other, and whose concurrence of testimony in this case can be accounted for only by a supposition of its truth. It is evidently a far greater improbability, that witnesses so numerous, so dispersed, and unconnected, should concur in forging so extraordinary a relation, than that such a relation, extraordinary as it is, should be true. For though the several objects we meet in the world be in general formed according to observably stated laws; yet anomalies in nature may occur, and their occurrence has been occasionally asserted and believed on less accumulated attestation. We now at length have ceased to question the supernatural stature of the Patagonians; why, then, are we so unwilling to admit the more amply witnessed existence of apparitions? Because the degree of prodigiousness implied in the supposition of a visible spirit strikes the imagination as too stupendous for belief. This is the effect of measuring the credibility of the attested achievements of nature by our own narrow experience, not by the power of Him, who is the author of nature, and to whom *all things*, even the investing spirits with visibility, *are possible*. We have constant assurance of other natural processes not less difficult to account for than this, which we contemplate with such indignant mistrust. Nor can it on reflection appear more surprising or incomprehensible, that a spirit should assume a visible shape, than that it should animate and move a material body. The wonders we see may soften our incredulity to patience of those which we have not seen, but which all tradition attests. Nothing possible in itself, and proved by sufficient evidence, can be too prodigious for rational belief.

But even the evidence of our own senses is disputed by some reasoners, who pronounce every believed view of these unsubstantial forms to be a mere illusion of the fancy, engendered by disease, indigestion, and other bodily affections. Bodily affections, it is certain, have been known to bewilder the views of the Mind; and instances enough may be produced of men not generally supposed insane, who have been deluded and possessed with the most extravagant conceptions, by the vapours of distempered health. But by what token do these philosophers discover, that the witnesses of the fact in question, whom they never saw, and of whose mental or bodily state they can have no knowledge, were so enfeebled and distracted in their powers of perception? Can it be proved, that apparitions of the dead, however astonishing,

are impossible? Or, if not, upon what principle is it maintained invariably, that they who think they see such phantoms see them only in imagination? According to this tenor of reasoning, all truth, not obvious to common experience, might be sacrificed to prejudice, and every rare fact, which we were unwilling to admit, might be exploded, by the short method of supposing, that the witnesses of it at the time must have been bereft of their senses. Writers, who thus get rid of evidence by presuming it the effect of fascination, betray some share of the infirmity they impute, and judge with a reason palpably overpowered and distorted by the influence of opinion.

Others, perceiving that few, if any, apparitions have been authenticated in the present day, are thence induced to infer too hastily that none were ever seen. These visible departed shades are extraordinary exhibitions in nature, reported to have been observed in all nations occasionally, but at no stated times. During some periods they may occur with more frequency, in others with less: and the proof of their former occurrence, once established, is not to be weakened, much less done away, by the protracted delay or discontinuance of their renewal.

Nor can it generally reflect discredit on averred appearances of the dead, that they are observed to abound most in ignorant and dark ages. At such junctures, a fabulous increase of these, and other strange casualties, we may expect, will be supplied by the reveries of superstition, or the interested impositions of craft upon credulity. But because in times of ignorance, prodigies of this sort will seem to multiply by the more than usual obtrusion of such as are false; is it reasonable to conclude, that none we hear of, either in those times, or at any other, are true? Does the utmost abundance of counterfeits, in this or in any case, disprove the existence of genuine originals? On the contrary, without the supposition of some such originals, might it not be difficult to conjecture, how even the counterfeits of occurrences so strange should become so universal? And does not their experienced universality hence strongly tend to prove, that at least the earliest of them were imitations of some real models; shadows devised after substances; forgeries of fancy or fraud, which derived their origin, and received their form, from the suggestion and example of fact?

Possibly it may yet be objected that the belief in the existence of the soul in a separate state, which has always obtained extensively, might lead to the belief, without the experimental witness, of its appearance.

It were easy to show, that disembodied souls have been believed, not only to exist, but to be constantly present, where they were not imagined to be visible; and consequently that the

supposition mentioned, which can be proved true in no case, is ascertained to be groundless in some cases, and upon the balance of its evidence not probable in any.

But it is needless to contend against a supposition so manifestly visionary. All men, in all times, must have perceived, that the soul, however it might continue to exist after its separation from the body, did not ordinarily appear on earth; and, till it had appeared, they could have no reason for supposing, in opposition to their past experience, that it ever would. The departed spirit, for aught they could foresee, might always survive invisibly; and their belief, if they afterwards entertained any, could be induced only by their sensible perception of its appearance.

Accordingly, tradition informs us, that sensible evidence has not been wanting in this case. In every age and country the posthumous appearance of the soul has been believed, not on the authority of conjecture, but on the attestations of persons who severally declared themselves eye-witnesses of it in distinct instances. If it be said, that these attestations might all be founded, as many of them confessedly were, in delusion or imposture; still it will be difficult, if not impossible, to account for so general a consent in so strange a fiction. One true report that a spirit has been seen, may give occasion and birth to many false reports of similar incidents. But universal and unconcerted testimony to a supernatural casualty cannot always be untrue; nor is it conceivable, that they who lived in distant ages and nations, who *never heard of one another*, should agree, either in a delusion or imposture so remote from common conception, and so unlike any thing observable in the ordinary course of events. An appearing spirit is a prodigy too singular in its nature to become a subject of general invention. That

this prodigy has been every where counterfeited, proves only that it has every where in reality occurred to view. The fable bears witness to the fact of its existence; and, to a mind not influenced by popular prejudice, it will be scarce possible to believe, that apparitions of the dead could have been vouched in all countries, had they never been seen in any.

The opinion we have been considering, whether true or false, may at last be thought of too trivial moment to require or justify a discussion in this place. But to show the credibility of this opinion, chiefly by our author's own arguments, to which nothing of equal weight can be added, seemed not only due to him on the present occasion, but requisite in another important view. Appearances of departed spirits are occasionally recorded in Scripture;\* and as all indiscriminate objections against the reality of such appearances hence evidently impeach the testimony of Scripture, the above notice of the fallacy of some currently urged objections of this sort was not unseasonable, and may not, it is hoped, be altogether useless. It was the superstition of the dark ages to believe in many false miracles and apparitions; whence it seems often the insinuated wisdom of our enlightened times, to accept none, however authenticated in any age, for true: as if the folly of baseless unbelief were less than that of credulity; and it were not the province of instructed judgment to decide in no case capriciously or blindly, resist prejudice, and be determined by evidence.

1738.

*On my Birth-Day.*

September 18th.

O God, the Creator and Preserver of all mankind, Father of all mercies, I, thine unworthy servant, do give Thee most humble thanks, for all thy goodness and loving-kindness to me. I bless Thee for my creation, preservation, and redemption, for the knowledge of thy Son Jesus Christ, for the means of grace and the hope of glory. In the days of childhood and youth, in the midst of weakness, blindness, and danger, Thou hast protected me; amidst afflictions of mind, body, and estate, Thou hast supported me; and amidst vanity and wickedness Thou hast spared me. Grant, O merciful Father, that I may have a lively sense of thy mercies. Create in me a contrite heart, that I may worthily lament my sins and acknowledge my wickedness, and obtain remission and forgiveness, through the satisfaction of Jesus Christ. And, O Lord, enable me, by thy grace, to redeem the time which I have spent in sloth, vanity, and wickedness; to make use of thy gifts to the honour of thy name; to lead a new life in thy faith, fear, and love; and finally to obtain everlasting life. Grant this, Almighty Lord, for the merits and through the mediation of our most holy and blessed Saviour, Jesus Christ; to whom, with Thee and the Holy Ghost, Three Persons and One God, be all honour and glory, world without end. Amen.

Transcribed, June 26th, 1768.

This is the first solemn prayer, of which I have a copy. Whether I composed any before this, I question.

1744-5.

January 1st.

ALMIGHTY and everlasting God, in whose hands are life and death, by whose will all things were created, and by whose providence they are sustained, I return Thee thanks that Thou hast given me life, and that Thou hast continued it to this time; that Thou hast hitherto forborne to snatch me away in the midst of sin and folly, and hast permitted me still to enjoy the means of grace, and vouchsafed to call me yet again to repentance. Grant, O merciful Lord, that thy call may not be vain; that my life may not be continued to increase my guilt, and that thy gracious forbearance may not harden my heart in wickedness. Let me remember, O my God, that as days and years pass over me, I approach nearer to the grave, where there is no repentance; and grant, that by the assistance of thy Holy Spirit, I may so pass through this life, that I may obtain life everlasting, for the sake of our Lord Jesus Christ. Amen.

---

1747-8.

January 1st.

ALMIGHTY and most merciful Father, who hast not yet suffered me to fall into the grave; grant that I may so remember my past life, as to repent of the days and years which I have spent in forgetfulness of thy mercy, and neglect of my own salvation; and so use the time which Thou shalt yet allow me, as that I may become every day more diligent in the duties which in thy

providence shall be assigned me; and that, when at last I shall be called to judgment, I may be received as a good and faithful servant into everlasting happiness, for the sake of Jesus Christ our Lord. Amen.

---

### 1749-50.

January 1st, after 3 in the morning.

ALMIGHTY God, by whose will I was created, and by whose providence I have been sustained, by whose mercy I have been called to the knowledge of my Redeemer, and by whose grace whatever I have thought or acted acceptable to Thee has been inspired and directed; grant, O Lord, that in reviewing my past life, I may recollect thy mercies to my preservation, in whatever state Thou preparest for me: that in affliction I may remember how often I have been succoured; and in prosperity may know and confess from whose hand the blessing is received. Let me, O Lord, so remember my sins, that I may abolish them by true repentance, and so improve the year to which Thou hast graciously extended my life, and all the years which Thou shalt yet allow me, that I may hourly become purer in thy sight; so that I may live in thy fear, and die in thy favour, and find mercy at the last day, for the sake of Jesus Christ. Amen.

---

### *Prayer on the RAMBLER.*

ALMIGHTY God, the giver of all good things, without whose help all labour is ineffectual, and without whose grace all wisdom is folly; grant, I beseech Thee, that in this my undertaking, thy Holy Spirit may not be withheld from me, but that I may promote thy glory, and the salvation both of myself and others; grant this, O Lord, for the sake of Jesus Christ. Amen.

---

### 1752.

PRAYERS \* composed by me on the Death of my Wife, and repositied among her Memorials, May 8th, 1752.

*Deus exaudi.*—Heu!

April 24th, 1752.

ALMIGHTY and most merciful Father, who lovest those whom thou punishest, and turnest

away thy anger from the penitent, look down with pity upon my sorrows, and grant that the affliction which it has pleased Thee to bring upon me, may awaken my conscience, enforce my resolutions of a better life, and impress upon me such conviction of thy power and goodness, that I may place in Thee my only felicity, and endeavour to please Thee in all my thoughts, words, and actions. Grant, O Lord, that I may not languish in fruitless and unavailing sorrow, but that I may consider from whose hand all good and evil is received, and may remember that I am punished for my sins, and hope for comfort only by repentance. Grant, O merciful God, that by the assistance of thy Holy Spirit I may repent and be comforted, obtain that peace which the world cannot give, pass the residue of my life in humble resignation and cheerful obedience; and when it shall please Thee to call me from this mortal state, resign myself into thy hands with faith and confidence, and finally obtain mercy and everlasting happiness, for the sake of Jesus Christ our Lord. Amen.

April 25th, 1752.

O LORD, our heavenly Father, almighty and most merciful God, in whose hands are life and death, who givest and takest away, castest down and raisest up, look with mercy on the affliction of thy unworthy servant, turn away thine anger from me, and speak peace to my troubled soul. Grant me the assistance and comfort of thy Holy Spirit, that I may remember with thankfulness the blessings so long enjoyed by me in the society of my departed wife; make me so to think on her precepts and example, that I may imitate whatever was in her life acceptable in thy sight, and avoid all by which she offended Thee. Forgive me, O merciful Lord, all my sins, and enable me to begin and perfect that reformation which I promised her, and to persevere in that resolution, which she implored Thee to continue, in the purposes which I recorded in thy sight, when she lay dead before me, in obedience to thy laws, and faith in thy word. And now, O Lord, release me from my sorrow, fill me with just hopes, true faith, and holy consolations, and enable me to do my duty in that state of life to which Thou hast been pleased to call me, without disturbance from fruitless grief, or tumultuous imaginations; that in all my thoughts, words, and actions, I may glorify thy Holy Name, and finally obtain, what I hope Thou hast granted to thy departed servant, everlasting joy and felicity, through our Lord Jesus Christ. Amen.

May 6th, 1752.

O LORD, our heavenly Father, without whom all purposes are frustrate, all efforts are vain, grant me the assistance of thy Holy Spirit, that

---

\* [Viz. The four following prayers.]

I may not sorrow as one without hope, but may now return to the duties of my present state with humble confidence in thy protection, and so govern my thoughts and actions, that neither business may withdraw my mind from Thee, nor idleness lay me open to vain imaginations; that neither praise may fill me with pride, nor censure with discontent; but that in the changes of this life, I may fix my heart upon the reward which Thou hast promised to them that serve Thee, and that whatever things are true, whatever things are honest, whatever things are just, whatever are pure, whatever are lovely, whatever are of good report, wherein their is virtue, wherein there is praise, I may think upon and do, and obtain mercy and everlasting happiness. Grant this, O Lord, for the sake of Jesus Christ. Amen.

Our Father, &c.—The grace, &c.

May 6th. I used this service, written April 24th, 25th.

May 6th, as preparatory to my return to life to-morrow.

*Μακάριος ο νεκρός ος ἐν Κυρίῳ ἀποδύνησεντες ἀνάγει.*  
Apoc. xiv. 13.

April 26th, 1752, being after 12 at night of the 25th.

O LORD, Governor of Heaven and Earth, in whose hands are embodied and departed spirits, if Thou hast ordained the souls of the dead to minister to the living, and appointed my departed wife to have care of me, grant that I may enjoy the good effects of her attention and ministration, whether exercised by appearance, impulses, dreams, or in any other manner agreeable to thy government; forgive my presumption, enlighten my ignorance, and however meaner agents are employed, grant me the blessed influences of thy Holy Spirit, through Jesus Christ our Lord. Amen.

*Before any new Study.*

November.

ALMIGHTY God, in whose hands are all the powers of man; who givest understanding, and takest it away; who, as it seemeth good unto Thee, enlightenest the thoughts of the simple, and darkenest the meditations of the wise, be present with me in my studies and inquiries.

Grant, O Lord, that I may not lavish away the life which Thou hast given me on useless trifles, nor waste it in vain searches after things which Thou hast hidden from me.

Enable me, by thy Holy Spirit, so to shun

sloth and negligence, that every day may discharge part of the task which Thou hast allotted me; and so further with thy help that labour which, without thy help, must be ineffectual, that I may obtain, in all my undertakings, such success as will most promote thy glory, and the salvation of my own soul, for the sake of Jesus Christ. Amen.

*After Time negligently and unprofitably spent.*

November 19th.

O LORD, in whose hands are life and death, by whose power I am sustained, and by whose mercy I am spared, look down upon me with pity. Forgive me, that I have this day neglected the duty which Thou hast assigned to it, and suffered the hours, of which I must give account, to pass away without any endeavour to accomplish thy will, or to promote my own salvation. Make me to remember, O God, that every day is thy gift, and ought to be used according to thy command. Grant me, therefore, so to repent of my negligence, that I may obtain mercy from Thee, and pass the time which Thou shalt yet allow me in diligent performance of thy commands, through Jesus Christ. Amen.

1753.

*On Easter Day.*

April 22d.

O LORD, who givest the grace of repentance, and hearest the prayers of the penitent, grant, that, by true contrition, I may obtain forgiveness of all the sins committed, and of all duties neglected, in my union with the wife whom Thou hast taken from me; for the neglect of joint devotion, patient exhortation, and mild instruction. And, O Lord, who canst change evil to good, grant that the loss of my wife may so mortify all inordinate affections in me, that I may henceforth please Thee by holiness of life.

And, O Lord, so far as it may be lawful for me, I commend to thy fatherly goodness the soul of my departed wife; beseeching Thee to grant her whatever is best in her present state, and finally to receive her to eternal happiness. All this I beg for Jesus Christ's sake, whose death I am now about to commemorate. To whom, &c. Amen.

This I repeated sometimes at church.

1754.

*Fl. Lacr. [Flentibus lacrymis.]*

March 28th, in the morning.

O God, who on this day wert pleased to take from me my dear wife, sanctify to me my sorrows and reflections. Grant, that I may renew and practise the resolutions which I made when thy afflicting hand was upon me. Let the remembrance of thy judgments, by which my wife is taken away, awaken me to repentance; and the sense of thy mercy, by which I am spared, strengthen my hope and confidence in Thee, that by the assistance and comfort of thy Holy Spirit, I may so pass through things temporal, as finally to gain everlasting happiness, and to pass, by a holy and happy death, into the joy which Thou hast prepared for those that love Thee. Grant this, O Lord, for the sake of Jesus Christ. Amen.

The melancholy of this day hung long upon me.

Of the resolutions made this day, I in some measure kept that of breaking from indolence.

March 28th, 1754.

ALMIGHTY God, vouchsafe to sanctify unto me the reflections and resolutions of this day; let not my sorrow be unprofitable: let not my resolutions be vain. Grant that my grief may produce true repentance, so that I may live to please Thee; and when the time shall come that I must die like her whom Thou hast taken from me, grant me eternal happiness in thy presence, through Jesus Christ our Lord. Amen.

1755.

*On the Study of Philosophy, as an Instrument of Living.*

July.

O LORD, who hast ordained labour to be the lot of man, and seest the necessities of all thy creatures, bless my studies and endeavours; feed me with food convenient for me; and if it shall be thy good pleasure to intrust me with plenty, give me a compassionate heart, that I may be ready to relieve the wants of others; let neither poverty nor riches estrange my heart from Thee, but assist me with thy grace so to live as that I may die in thy favour, for the sake of Jesus Christ. Amen.

This study was not pursued.

Transcribed June 26th, 1768.

1756.

January 1st, afternoon.

ALMIGHTY and everlasting God, in whom we live and move, and have our being; glory be to Thee for my recovery from sickness, and the continuance of my life. Grant, O my God, that I may improve the year which I am now beginning, and all the days which Thou shalt add to my life, by serious repentance and diligent obedience; that by the help of thy Holy Spirit, I may use the means of grace to my own salvation, and at last enjoy thy presence in eternal happiness, for Jesus Christ's sake. Amen.

HILL BOOTHBY'S Death.

Jan. 1756.

O LORD GOD, almighty disposer of all things, in whose hands are life and death, who givest comforts and takest them away, I return Thee thanks for the good example of Hill Boothby, whom Thou hast now taken away, and implore thy grace, that I may improve the opportunity of instruction which Thou hast afforded me, by the knowledge of her life, and by the sense of her death; that I may consider the uncertainty of my present state, and apply myself earnestly to the duties which Thou hast set before me, that, living in thy fear, I may die in thy favour, through Jesus Christ our Lord. Amen.

I commend, &c. W. and H. B.

Transcribed June 26th, 1768.

*When my Eye was restored to its Use.*

February 15th, 1756.

ALMIGHTY GOD, who hast restored light to my eye, and enabled me to pursue again the studies which Thou hast set before me; teach me, by the diminution of my sight, to remember that whatever I possess is thy gift, and by its recovery, to hope for thy mercy: and, O Lord, take not thy Holy Spirit from me; but grant that I may use thy bounties according to thy will, through Jesus Christ our Lord. Amen.

*Introductory Prayer.*

March 25th, 1756.

O GOD, who desirest not the death of a sinner, look down with mercy upon me, now daring to call upon Thee. Let thy Holy Spirit so purify my affections, and exalt my desires, that

my prayer may be acceptable in thy sight, through Jesus Christ. Amen.

---

March 28th, about 2 in the morning.

ALMIGHTY God, our heavenly Father, whose judgments terminate in mercy, grant I beseech Thee that the remembrance of my wife, whom Thou hast taken from me, may not load my soul with unprofitable sorrow, but may excite in me true repentance of my sins and negligences; and, by the co-operation of thy grace, may produce in me a new life, pleasing to Thee. Grant, that the loss of my wife may teach me the true use of the blessings which are yet left me; and that, however bereft of worldly comforts, I may find peace and refuge in thy service, through Jesus Christ our Lord. Amen.

---

1757.

Jan. 1st, at 2 in the morning.

ALMIGHTY God, who hast brought me to the beginning of another year, and by prolonging my life invitest to repentance, forgive me that I have mispent the time past; enable me, from this instant, to amend my life according to thy holy word; grant me thy Holy Spirit, that I may so pass through things temporal, as not finally to lose the things eternal. O God, hear my prayer for the sake of Jesus Christ. Amen.

---

*Easter Eve.*

ALMIGHTY God, heavenly Father, who desirest not the death of a sinner, look down with mercy upon me, depraved with vain imaginations, and entangled in long habits of sin. Grant me that grace, without which I can neither will nor do what is acceptable to Thee. Pardon my sins; remove the impediments that hinder my obedience; enable me to shake off sloth, and to redeem the time mispent in idleness and sin, by a diligent application of the days yet remaining, to the duties which thy providence shall allot me. O God, grant me thy Holy Spirit, that I may repent and amend my life; grant me contrition, grant me resolution, for the sake of Jesus Christ, to whose covenant I now implore admission, of the benefits of whose death I implore participation. For his sake have mercy on me, O God; for his sake, O God, pardon and receive me. Amen.

Sept. 18th, 1737.

ALMIGHTY and most merciful Father, by whose providence my life has been prolonged, and who hast granted me now to begin another year of probation, vouchsafe me such assistance of thy Holy Spirit, that the continuance of my life may not add to the measure of my guilt; but that I may so repent of the days and years passed in neglect of the duties which Thou hast set before me, in vain thoughts, in sloth, and in folly, that I may apply my heart to true wisdom, by diligence redeem the time lost, and by repentance obtain pardon, for the sake of Jesus Christ. Amen.

---

1758.

*Easter Day.*

March 26th.

ALMIGHTY and most merciful Father, who hast created me to love and to serve Thee, enable me so to partake of the Sacrament in which the death of Jesus Christ is commemorated, that I may henceforward lead a new life in thy faith and fear. Thou, who knowest my frailties and infirmities, strengthen and support me; grant me thy Holy Spirit, that, after all my lapses, I may now continue steadfast in obedience, that, after long habits of negligence and sin, I may, at last, work out my salvation with diligence and constancy; purify my thoughts from pollutions, and fix my affections on things eternal. Much of my time past has been lost in sloth; let not what remains, O Lord, be given me in vain; but let me, from this time, lead a better life, and serve thee with a quiet mind, through Jesus Christ our Lord. Amen.

---

March 28th, 1738.

ALMIGHTY and eternal God, who givest life and takest it away, grant that while thou shalt prolong my continuance on earth, I may live with a due sense of thy mercy and forbearance, and let the remembrance of her, whom thy hand has separated from me, teach me to consider the shortness and uncertainty of life, and to use all diligence to obtain eternal happiness in thy presence. O God, enable me to avoid sloth, and to attend heedfully and constantly to thy word and worship. Whatever was good in the example of my departed wife, teach me to follow; and whatever was amiss give me grace to shun, that my affliction may be sanctified, and that, remembering how much every day brings me nearer to the grave, I may every day purify my mind, and amend my life, by the assistance of

thy Holy Spirit, till at last I shall be accepted by Thee, for Jesus Christ's sake. Amen.

Sept. 18, horâ primâ matuticâ.

ALMIGHTY and most merciful Father, who yet sparest and yet supportest me, who supportest me in my weakness, and sparest me in my sins, and hast now granted to me to begin another year, enable me to improve the time which is yet before me, to thy glory, and my own salvation. Impress upon my soul such repentance of the days mispent in idleness and folly, that I may henceforward diligently attend to the business of my station in this world, and to all the duties which thou hast commanded. Let thy Holy Spirit comfort and guide me, that in my passage through the pains or pleasures of the present state, I may never be tempted to forgetfulness of Thee. Let my life be useful, and my death be happy; let me live according to thy laws, and die with just confidence in thy mercy, for the sake of Jesus Christ our Lord. Amen.

This year I hope to learn diligence.

1759.

Jan. 23d.

The day on which my dear mother was buried. Repeated on my fast, with the addition.

ALMIGHTY God, merciful Father, in whose hands are life and death, sanctify unto me the sorrow which I now feel. Forgive me whatever I have done unkindly to my mother, and whatever I have omitted to do kindly. Make me to remember her good precepts and good example, and to reform my life according to thy holy word, that I may lose no more opportunities of good. I am sorrowful, O Lord; let not my sorrow be without fruit. Let it be followed by holy resolutions, and lasting amendment, that when I shall die like my mother I may be received to everlasting life.

I commend, O Lord, so far as it may be lawful, into thy hands, the soul of my departed mother, beseeching Thee to grant her whatever is most beneficial to her in her present state.

O Lord, grant me thy Holy Spirit, and have mercy upon me for Jesus Christ's sake. Amen.

And, O Lord, grant unto me, that am now about to return to the common comforts and business of the world, such moderation in all enjoyments, such diligence in honest labour, and such purity of mind, that, amidst the changes, miseries, or pleasures of life, I may keep my

mind fixed upon Thee, and improve every day in grace, till I shall be received into thy kingdom of eternal happiness.

I returned thanks for my mother's good example, and implored pardon for neglecting it.

I returned thanks for the alleviation of my sorrow.

The dream of my brother I shall remember.

Jej.

March 24, 1759,  
rather 25, after 12 at night.

ALMIGHTY God, heavenly Father, who hast graciously prolonged my life to this time, and by the change of outward things which I am now to make, callest me to a change of inward affections, and to a reformation of my thoughts, words, and practices; vouchsafe, merciful Lord, that this call may not be vain. Forgive me whatever has been amiss in the state which I am now leaving, idleness, and neglect of thy word and worship. Grant me the grace of thy Holy Spirit, that the course which I am now beginning may proceed according to thy laws, and end in the enjoyment of thy favour. Give me, O Lord, pardon and peace, that I may serve Thee with humble confidence, and, after this life, enjoy thy presence in eternal happiness.

And, O Lord, so far as it may be lawful for me, I commend to thy Fatherly goodness, my father, my brother, my wife, my mother. I beseech Thee to look mercifully upon them, and grant them whatever may most promote their present and eternal joy.

O Lord, hear my prayers for Jesus Christ's sake, to whom, with Thee and the Holy Ghost, three persons and one God, be all honour and glory, world without end. Amen.

O Lord, let the change which I am now making in outward things, produce in me such a change of manners, as may fit me for the great change through which my wife has passed.

1760.

Sept. 18th.

RESOLVED, D[eo] j[u]vante;

To combat notions of obligation.

To apply to study.

To reclaim imaginations.

To consult the resolves on Tetty's coffin.

To rise early.

To study religion.

To go to church.

To drink less strong liquors.

To keep a journal.

To oppose laziness, by doing what is to be done to-morrow.

Rise as early as I can.

Send for books for Hist. of War.

Put books in order.

Scheme of Life.

O Almighty God, Merciful Father, who hast continued my life to another year, grant that I may spend the time which Thou shalt yet give me in such obedience to thy word and will, that, finally, I may obtain everlasting life. Grant that I may repent and forsake my sins before the miseries of age fall upon me; and that, while my strength yet remains, I may use it to thy glory and my own salvation, by the assistance of thy Holy Spirit, for Jesus Christ's sake. Amen.

---

1761.

*Easter Eve.*

SINCE the communion of last Easter, I have led a life so dissipated and useless, and my terrors and perplexities have so much increased, that I am under great depression and discouragement; yet I purpose to present myself before God to-morrow, with humble hope that he will not break the bruised reed.

Come unto me all ye that travail.

I have resolved, I hope not presumptuously, till I am afraid to resolve again. Yet, hoping in God, I steadfastly purpose to lead a new life. O God, enable me, for Jesus Christ's sake.

My purpose is,

To avoid idleness.

To regulate my sleep as to length and choice of hours.

To set down every day what shall be done the day following.

To keep a journal.

To worship God more diligently.

To go to church every Sunday.

To study the Scriptures.

To read a certain portion every week.

---

*Easter Eve.*

ALMIGHTY and most merciful Father, look down upon my misery with pity; strengthen me that I may overcome all sinful habits; grant that I may, with effectual faith, commemorate the death of thy Son Jesus Christ, so that all corrupt desires may be extinguished, and all

vain thoughts may be dispelled. Enlighten me with true knowledge, animate me with reasonable hope, comfort me with a just sense of thy love, and assist me to the performance of all holy purposes, that, after the sins, errors, and miseries of this world, I may obtain everlasting happiness for Jesus Christ's sake. To whom, &c. Amen.

I hope to attend on God in his ordinances to-morrow.

Trust in God, O my soul. O God, let me trust in Thee.

---

1762.

March 28th.

God grant that I may, from this day,

Return to my studies.

Labour diligently.

Rise early.

Live temperately.

Read the Bible.

Go to church.

---

O God, giver and preserver of all life, by whose power I was created, and by whose providence I am sustained, look down upon me with tenderness and mercy; grant that I may not have been created to be finally destroyed; that I may not be preserved to add wickedness to wickedness; but may so repent me of my sins, and so order my life to come, that when I shall be called hence, like the wife whom Thou hast taken from me; I may die in peace, and in thy favour, and be received into thine everlasting kingdom, through the merits and mediation of Jesus Christ thine only Son our Lord and Saviour. Amen.

---

1764.

ALMIGHTY and most merciful Father, who by thy Son Jesus Christ hast redeemed us from sin and death, grant that the commemoration of his passion may quicken my repentance, increase my hope, and strengthen my faith; that I may lament and forsake my sins; and, for the time which Thou shalt yet grant me, may avoid idleness, and neglect of thy word and worship. Grant me strength to be diligent in the lawful employments which shall be set before me; grant me purity of thoughts, words, and actions. Grant me to love and study thy word, and to frequent thy worship with pure affection. Deliver and preserve me from vain terrors, and

K k

grant that by the grace of the Holy Spirit I may so live, that after this life ended, I may be received to everlasting happiness, for the sake of Jesus Christ our Lord. Amen.

---

*Good Friday.*

April 20th, 1764.

I HAVE made no reformation; I have lived totally useless, more sensual in thought, and more addicted to wine and meat. Grant me, O God, to amend my life, for the sake of Jesus Christ. Amen.

I hope  
To put my rooms in order.\*  
I fasted all day.

---

April 21st, 1764, 3 in the morning.

My indolence, since my last reception of the Sacrament, has sunk into grosser sluggishness, and my dissipation spread into wilder negligence. My thoughts have been clouded with sensuality; and, except that from the beginning of this year I have in some measure forborne excess of strong drink, my appetites have predominated over my reason. A kind of strange oblivion has overspread me, so that I know not what has become of the last year; and perceive that incidents and intelligence pass over me without leaving any impression.

This is not the life to which heaven is promised.

I purpose to approach the altar again to-morrow. Grant, O Lord, that I may receive the Sacrament with such resolutions of a better life as may by thy grace be effectual, for the sake of Jesus Christ. Amen.

---

April 21. I read the whole Gospel of St. JOHN.

Then sat up till the 22d.

My purpose is from this time,  
To reject or expel sensual images, and idle thoughts.

To provide some useful amusement for leisure time.

To avoid idleness.

To rise early.

To study a proper portion of every day.

To worship God diligently.

To read the Scriptures

To let no week pass without reading some part.

---

\* Disorder I have found one great cause of idleness.

To write down my observations.

I will renew my resolutions made at Tetty's death.

I perceive an insensibility and heaviness upon me. I am less than commonly oppressed with the sense of sin, and less affected with the shame of idleness. Yet I will not despair. I will pray to God for resolution, and will endeavour to strengthen my faith in Christ by commemorating his death.

I prayed for Tetty.

---

*Easter Day.*

April 22, 1764.

HAVING, before I went to bed, composed the foregoing meditation, and the following prayer; I tried to compose myself, but slept unquietly. I rose, took tea, and prayed for resolution and perseverance. Thought on Tetty, dear poor Tetty, with my eyes full.

I went to church; came in at the first of the Psalms, and endeavoured to attend the service, which I went through without perturbation. After sermon, I recommended Tetty in a prayer by herself; and my father, mother, brother, and Bathurst, in another. I did it only once, so far as it might be lawful for me.

I then prayed for resolution and perseverance to amend my life. I received soon, the communicants were many. At the altar, it occurred to me that I ought to form some resolutions. I resolved, in the presence of God, but without a vow, to repel sinful thoughts, to study eight hours daily, and, I think, to go to church every Sunday, and read the Scriptures. I gave a shilling; and, seeing a poor girl at the Sacrament in a bedgown, gave her privately a crown, though I saw Hart's Hymns in her hand. I prayed earnestly for amendment, and repeated my prayer at home. Dined with Miss W., went to prayers at church; went to ———, spent the evening not pleasantly. Avoided wine, and tempered a very few glasses with sherbet. Came home and prayed.

I saw at the Sacrament a man meanly dressed, whom I have always seen there at Easter.

---

*Easter Day.*

*Against loose Thoughts and Idleness.*

April 22d. 1764, at 3 morning.

ALMIGHTY and most merciful Father, who hast created and preserved me, have pity on my

weakness and corruption. Deliver me from habitual wickedness and idleness; enable me to purify my thoughts, to use the faculties which Thou hast given me with honest diligence, and to regulate my life by thy holy word.

Grant me, O Lord, good purposes and steady resolution, that I may repent my sins, and amend my life. Deliver me from the distresses of vain terror, and enable me, by thy grace, to will and to do what may please Thee; that when I shall be called away from this present state, I may obtain everlasting happiness, through Jesus Christ our Lord. Amen.

Sept. 18th, 1764, about 6 evening.

This is my fifty-sixth birth-day, the day on which I have concluded fifty-five years.

I have outlived many friends. I have felt many sorrows. I have made few improvements. Since my resolution formed last Easter, I have made no advancement in knowledge or in goodness; nor do I recollect that I have endeavoured it. I am dejected, but not hopeless.

O God, for Jesus Christ's sake, have mercy upon me.

7 in the evening.

I went to church, prayed *to be loosed from the chain of my sins*.

I have now spent fifty-five years in resolving; having from the earliest time almost that I can remember, been forming schemes of a better life. I have done nothing; the need of doing therefore is pressing, since the time of doing is short. O God, grant me to resolve aright, and to keep my resolutions, for Jesus Christ's sake. Amen.

*Hæc limina vita.*

STAT.

I resolve,

To study the Scriptures; I hope, in the original languages. Six hundred and forty verses every Sunday, will nearly comprise the scriptures in a year.

To read good books; to study theology.

To treasure in my mind passages for recollection.

To rise early; not later than six, if I can; I hope sooner, but as soon as I can.

To keep a journal, both of employment and of expenses. To keep accounts.

To take care of my health, by such means as I have designed.

To set down at night some plan for the morrow.

Last year I prayed on my birth-day, by accommodating the Morning Collect for grace, putting year for day. This I did this day.

September 18th, 1764.

O God, heavenly Father, who desirest not the death of a sinner, grant that I may turn from my wickedness and live. Enable me to shake off all impediments of lawful action, and so to order my life, that increase of days may produce increase of grace, of tranquillity of thought, and vigour in duty. Grant that my resolves may be effectual to a holy life, and a happy death, for Jesus Christ's sake. Amen.

To-morrow I purpose to regulate my room.

1765.

*Easter-Day.*

April 7th, about 3 in the morning.

I PURPOSE again to partake of the blessed Sacrament; yet when I consider how vainly I have hitherto resolved, at this annual commemoration of my Saviour's death, to regulate my life by his laws, I am almost afraid to renew my resolutions. Since the last Easter I have reformed no evil habit, my time has been unprofitably spent, and seems as a dream that has left nothing behind. My memory grows confused, and I know not how the days pass over me.

Good Lord deliver me.

I will call upon God to-morrow for repentance and amendment. O heavenly Father, let not my call be vain, but grant me to desire what may please Thee; and fulfil those desires for Jesus Christ's sake. Amen.

My resolutions, which God perfect, are,

1. To avoid loose thoughts.
2. To rise at eight every morning.

I hope to extend these purposes to other duties; but it is necessary to combat evil habits singly. I purpose to rise at eight, because, though I shall not yet rise early, it will be much earlier than I now rise, for I often lie till two, and will gain me much time, and tend to a conquest over idleness, and give time for other duties. I hope to rise yet earlier.

ALMIGHTY and most merciful Father, who hatest nothing that Thou has made, nor desirest the death of a sinner, look down with mercy upon me, and grant that I may turn from my wickedness and live. Forgive the days and years which I have passed in folly, idleness, and sin. Fill me with such sorrow for the time mispent, that I may amend my life according to thy holy word; strengthen me against habitual idleness, and enable me to direct my

thoughts to the performance of every duty; that while I live I may serve Thee in the state to which Thou shalt call me, and at last by a holy and happy death be delivered from the struggles and sorrows of this life, and obtain eternal happiness by thy mercy, for the sake of Jesus Christ our Lord. Amen.

O God, have mercy on me.

At church I purpose,  
Before I leave the pew, to pray the occasional  
prayer, and read my resolutions.

To pray for Tetty and the rest.

The like after communion.

At intervals to use the Collects of Fourth after  
Trinity, and First and Fourth after Epipha-  
ny, and to meditate.

This was done, as I purposed, but with some  
distraction. I came in at the Psalms, and  
could not well hear. I renewed my resolu-  
tions at the altar. God perfect them! Then  
I came home. I prayed, and have hope;  
grant, O Lord, for the sake of Jesus Christ,  
that my hope may not be vain.

I invited home with me the man whose pious  
behaviour I had for several years observed on  
this day, and found him a kind of Methodist,  
full of texts, but ill-instructed. I talked to  
him with temper, and offered him twice wine,  
which he refused. I suffered him to go with-  
out the dinner which I had purposed to give  
him. I thought this day that there was  
something irregular and particular in his look  
and gesture; but having intended to invite  
him to acquaintance, and having a fit oppor-  
tunity by finding him near my own seat after  
I had missed him, I did what I at first de-  
signed, and am sorry to have been so much  
disappointed. Let me not be prejudiced  
hereafter against the appearance of piety in  
mean persons, who, with indeterminate no-  
tions, and perverse or inelegant conversation,  
perhaps are doing all they can.

At night I used the occasional prayer, with  
proper Collects.

#### *Before the Study of Law.*

September 26th, 1765°.

ALMIGHTY God, the giver of wisdom, with-  
out whose help resolutions are vain, without  
whose blessing study is ineffectual, enable me,  
if it be thy will, to attain such knowledge as  
may qualify me to direct the doubtful, and in-  
struct the ignorant, to prevent wrongs, and ter-  
minate contentions; and grant that I may use

that knowledge which I shall attain, to thy  
glory and my own salvation, for Jesus Christ's  
sake. Amen.

#### *Engaging in Politics with H——n.*

November, 1765.

ALMIGHTY God, who art the giver of all  
wisdom, enlighten my understanding with  
knowledge of right, and govern my will by thy  
laws, that no deceit may mislead me, nor tem-  
ptation corrupt me; that I may always endeav-  
our to do good, and to hinder evil. Amidst all  
the hopes and fears of this world, take not thy  
Holy Spirit from me; but grant that my  
thoughts may be fixed on Thee, and that I may  
finally attain everlasting happiness, for Jesus  
Christ's sake. Amen.

1766.

Jan: 1st, after 2 in the morning.

ALMIGHTY and most merciful Father, I again  
appear in thy presence the wretched mispend-  
er of another year, which thy mercy has allowed  
me. O Lord, let me not sink into total deprav-  
ity, look down upon me, and rescue me at last  
from the captivity of sin. Impart to me good  
resolutions, and give me strength and persever-  
ance to perform them. Take not from me thy  
Holy Spirit, but grant that I may redeem the  
time lost, and that by temperance and diligence,  
by sincere repentance and faithful obedience, I  
may finally obtain everlasting happiness, for the  
sake of Jesus Christ our Lord. Amen.

#### STUDY.

#### *Entering Novum Museum.*

March 7th.

ALMIGHTY and most merciful Father, who  
hast graciously supplied me with new conveni-  
ences for study, grant that I may use thy gifts  
to thy glory. Forgive me the time mispent,  
relieve my perplexities, strengthen my resolu-  
tion, and enable me to do my duty with vigour  
and constancy; and when the fears and hopes,  
the pains and pleasures of this life shall have an  
end, receive me to everlasting happiness, for the  
sake of Jesus Christ our Lord. Amen.

Transcribed, June 26th, —68.

Sept. 18th, 1766. at Streatham.

I have this day completed my fifty-seventh year.  
O Lord, for Jesus Christ's sake, have mercy upon me.

ALMIGHTY and most merciful Father, who hast granted me to prolong my life to another year, look down upon me with pity. Let not my manifold sins and negligences avert from me thy fatherly regard. Enlighten my mind that I may know my duty; that I may perform it, strengthen my resolution. Let not another year be lost in vain deliberations; let me remember, that of the short life of man, a great part is already past in sinfulness and sloth. Deliver me, gracious Lord, from the bondage of evil customs, and take not from me thy Holy Spirit; but enable me so to spend my remaining days, that, by performing thy will, I may promote thy glory; and grant that after the troubles and disappointments of this mortal state, I may obtain everlasting happiness, for the sake of Jesus Christ our Lord. Amen.

Added,

The Fourteenth S. after Tr.  
The Morning Collect.  
The beginning of this (day) year.

Purposes,

To keep a journal. To begin this day.  
To spend four hours every day in study, and as much more as I can.  
To read a portion of the Scriptures in Greek, every Sunday.  
To rise at eight.  
Oct. 3d, —66. Of all this I have done nothing.  
I returned from Streatham, Oct. 1st, —66, having lived there more than three months.

1767.

Jan. 1st, *Ima mane scripsi.*

ALMIGHTY and most merciful Father, in whose hand are life and death, as thou hast suffered me to see the beginning of another year, grant, I beseech Thee, that another year may not be lost in idleness, or squandered in unprofitable employment. Let not sin prevail on the remaining part of life, and take not from me thy Holy Spirit; but as every day brings me nearer to my end, let every day contribute to make my end holy and happy. Enable me, O Lord, to use all enjoyments with due temperance, preserve me from unseasonable and immoderate sleep, and enable me to run with diligence the race that is set before me, that, after the troubles of this life, I may obtain everlasting happiness, through Jesus Christ our Lord. Amen.

August 2d, 1767.

I have been disturbed and unsettled for a long time, and have been without resolution to apply to study or to business, being hindered by sudden snatches.  
I have for some days forborne wine and suppers. Abstinence is not easily practised in another's house; but I think it fit to try.  
I was extremely perturbed in the night, but have had this day more ease than I expected.  
D. gr. Perhaps this may be such a sudden relief as I once had by a good night's rest in Fetter-lane.

The shortness of the time which the common order of nature allows me to expect, is very frequently upon my mind. God grant that it may profit me.

August 17th, 1767.

From that time, by abstinence, I have had more ease. I have read five books of Homer, and hope to end the sixth to-night. I have given Mrs. — a guinea.

By abstinence from wine and suppers, I obtained sudden and great relief, and had freedom of mind restored to me; which I have wanted for all this year, without being able to find any means of obtaining it.

I am now about to receive, with my old friend Kitty Chambers, the sacrament, preparatory to her death. Grant, O God, that it may fit me. I purpose temperance for my resolution. O God, enable me to keep my purpose to thy glory.

5. 32. P. M.

I have communicated with Kitty, and kissed her. I was for some time distracted, but at last more composed. I commended my friends and Kitty. Lucy and I were much affected. Kitty is, I think, going to heaven.

August 17th, 1767.

O God, grant that I may practise such temperance in meat, drink, and sleep, and all bodily enjoyments, as may fit me for the duties to which Thou shalt call me, and by thy blessing procure me freedom of thought and quietness of mind, that I may so serve Thee in this short and frail life, that I may be received by Thee at my death to everlasting happiness. Take not, O Lord, thy Holy Spirit from me; deliver me not up to vain fears; but have mercy on me for the sake of Jesus Christ our Lord. Amen.

O God, who desirest not the death, &c.

O Lord, grant us increase—

thoughts to the performance of every duty; that while I live I may serve Thee in the state to which Thou shalt call me, and at last by a holy and happy death be delivered from the struggles and sorrows of this life, and obtain eternal happiness by thy mercy, for the sake of Jesus Christ our Lord. Amen.

O God, have mercy on me.

At church I purpose,  
Before I leave the pew, to pray the occasional  
prayer, and read my resolutions.  
To pray for Tetty and the rest.  
The like after communion.

At intervals to use the Collects of Fourth after  
Trinity, and First and Fourth after Epipha-  
ny, and to meditate.

This was done, as I purposed, but with some  
distraction. I came in at the Psalms, and  
could not well hear. I renewed my resolu-  
tions at the altar. God perfect them! Then  
I came home. I prayed, and have hope;  
grant, O Lord, for the sake of Jesus Christ,  
that my hope may not be vain.

I invited home with me the man whose pious  
behaviour I had for several years observed on  
this day, and found him a kind of Methodist,  
full of texts, but ill-instructed. I talked to  
him with temper, and offered him twice wine,  
which he refused. I suffered him to go with-  
out the dinner which I had purposed to give  
him. I thought this day that there was  
something irregular and particular in his look  
and gesture; but having intended to invite  
him to acquaintance, and having a fit oppor-  
tunity by finding him near my own seat after  
I had missed him, I did what I at first de-  
signed, and am sorry to have been so much  
disappointed. Let me not be prejudiced  
hereafter against the appearance of piety in  
mean persons, who, with indeterminate no-  
tions, and perverse or inelegant conversation,  
perhaps are doing all they can.

At night I used the occasional prayer, with  
proper Collects.

O God, grant that I may practise such temperance in meat, drink, and sleep, and all bodily enjoyments, as may fit me for the duties to which Thou shalt call me, and by thy blessing procure me freedom of thought and quietness of mind, that I may so serve Thee in this short and frail life, that I may be received by Thee at my death to everlasting happiness. Take not, O Lord, thy Holy Spirit from me; deliver me not up to vain fears; but have mercy on me for the sake of Jesus Christ our Lord. Amen.

O God, who desirest not the death, &c.

O Lord, grant us increase—

O God—pardon and peace—  
 O God, who knowest our necessities—  
 Our Father—

Sunday Oct. 18th, 1767.

YESTERDAY, Oct. 17th, at about ten in the morning, I took my leave for ever of my dear old friend Catherine Chambers, who came to live with my mother about 1724, and has been but little parted from us since. She buried my father, my brother, and my mother. She is now fifty-eight years old.

I desired all to withdraw, then told her that we were to part for ever; that as Christians, we should part with prayer; and that I would, if she was willing, say a short prayer beside her. She expressed great desire to hear me; and held up her poor hands, as she lay in bed, with great fervour, while I prayed kneeling by her, nearly in the following words:

ALMIGHTY and most merciful Father, whose loving-kindness is over all thy works, behold, visit, and relieve this thy servant, who is grieved with sickness. Grant that the sense of her weakness may add strength to her faith, and seriousness to her repentance. And grant that by the help of thy Holy Spirit, after the pains and labours of this short life, we may all obtain everlasting happiness, through Jesus Christ our Lord: for whose sake hear our prayers. Amen. Our Father, &c.

I then kissed her. She told me that to part was the greatest pain that she had ever felt, and that she hoped we should meet again in a better place. I expressed, with swelled eyes, and great emotion of tenderness, the same hopes. We kissed, and parted. I humbly hope to meet again, and to part no more.

1768.

*Bed-Time.*

Lent 2.

ALMIGHTY God, who seest that I have no power of myself to help myself; keep me both outwardly in my body, and inwardly in my soul, that I may be defended from all adversities that may happen to the body, and from all evil thoughts which may assault and hurt the soul, through Jesus Christ our Lord. Amen.

This Prayer may be said before or after the entrance into bed, as a preparative for sleep.

When I transcribed this Prayer, it was my purpose to have made this book \* a Collection.

*Study of Tongues.*

ALMIGHTY God, giver of all knowledge, enable me so to pursue the study of tongues, that I may promote thy glory and my own salvation.

Bless my endeavours as shall seem best unto Thee; and if it shall please Thee to grant me the attainment of my purpose, preserve me from sinful pride; take not thy Holy Spirit from me, but give me a pure heart and humble mind, through Jesus Christ. Amen.

Of this Prayer there is no date, nor can I tell when it was written; but I think it was in Gough-square, after the Dictionary was ended. I did not study what I then intended.

Transcribed June 26, 1768.

Townsmalling, in Kent,  
 Sept. 18th, 1768, at night.

I HAVE now begun the sixtieth year of my life.

How the last year has past, I am unwilling to terrify myself with thinking. This day has been past in great perturbation; I was distracted at church in an uncommon degree, and my distress has had very little intermission. I have found myself somewhat relieved by reading, which I therefore intend to practise when I am able.

This day it came into my mind to write the history of my melancholy. On this I purpose to deliberate; I know not whether it may not too much disturb me.

I this day read a great part of Pascal's life.

O Lord, who hast safely brought me, &c.

ALMIGHTY and most merciful Father, Creator and Preserver of mankind, look down with pity upon my troubles and maladies. Heal my body, strengthen my mind, compose my distraction, calm my inquietude, and relieve my terrors; that if it please Thee, I may run the race that is set before me with peace, patience, constancy, and confidence. Grant this, O Lord, and take not from me thy Holy Spirit, but pardon and bless me, for the sake of Jesus Christ our Lord.

\* A parchment-book, containing such of these Prayers as are marked transcribed.

1769.

January 1st.

I AM now about to begin another year: how the last has past, it would be, in my state of weakness, perhaps not prudent too solicitously to recollect. God will, I hope, turn my sufferings to my benefit, forgive me whatever I have done amiss, and having vouchsafed me great relief, will by degrees heal and restore both my mind and body; and permit me, when the last year of my life shall come, to leave the world in holiness and tranquillity.

I am not yet in a state to form many resolutions; I purpose, and hope to rise early in the morning, at eight, and by degrees at six; eight being the latest hour to which bed-time can be properly extended; and six the earliest that the present system of life requires.

ALMIGHTY and most merciful Father, who hast continued my life from year to year, grant that by longer life I may become less desirous of sinful pleasures, and more careful of eternal happiness. As age comes upon me, let my mind be more withdrawn from vanity and folly, more enlightened with the knowledge of thy will, and more invigorated with resolution to obey it. O Lord, calm my thoughts, direct my desires, and fortify my purposes. If it shall please Thee, give quiet to my latter days, and so support me with thy grace, that I may die in thy favour, for the sake of Jesus Christ our Lord. Amen.

Safely brought us to the beginning of this year, &c.

September 18th, 1769.

This day completes the sixtieth year of my age.

What I have done, and what I have left undone, the unsettled state of my mind makes all endeavours to think improper. I hope to survey my life with more tranquillity, in some part of the time which God shall grant me.

The last year has been wholly spent in a slow progress of recovery. My days are easier, but the perturbation of my nights is very distressful. I think to try a lower diet. I have grown fat too fast. My lungs seem encumbered, and my breath fails me, if my strength is in any unusual degree exerted, or my motion accelerated. I seem to myself to bear exercise with more difficulty than in the last winter. But though I feel all those decays

of body, I have made no preparation for the grave. What shall I do to be saved?

ALMIGHTY and most merciful Father, I now appear in thy presence, laden with the sins, and accountable for the mercies of another year. Glory be to Thee, O God, for the mitigation of my troubles, and for the hope of health both of mind and body, which Thou hast vouchsafed me. Most merciful Lord, if it seem good unto Thee, compose my mind, and relieve my diseases; enable me to perform the duties of my station, and so to serve Thee, as that, when my hour of departure from this painful life shall be delayed no longer, I may be received to everlasting happiness, for the sake of Jesus Christ our Lord. Amen.

O Lord, without whose help all the purposes of man are vain, enable me to use such temperance as may heal my body, and strengthen my mind, and enable me to serve Thee. Grant this, O Lord, for the sake of Jesus Christ our Saviour. Amen.

Who hast safely brought me, &c.

September 19th, 1769.

YESTERDAY, having risen from a disturbed and wearisome night, I was not much at rest the whole day. I prayed with the collect "to the beginning," in the night and in the morning. At night I composed my prayer, and wrote my reflection. Reviewing them, I found them both weakly conceived and imperfectly expressed, and corrected the prayer this morning. I am glad that I have not omitted my annual practice. I hope that by rigid temperance, and moderate exercise, I may yet recover. I used the prayer again at night, and am now to begin, by the permission of God, my sixty-first year.

November 5th, 1769.

ALMIGHTY God, merciful Father, whose providence is over all thy works, look down with pity upon the diseases of my body, and the perturbations of my mind. Give thy blessing, O Lord, to the means which I shall use for my relief, and restore ease to my body, and quiet to my thoughts. Let not my remaining life be made useless by infirmities; neither let health,

April 14th, 1770.

If Thou shalt grant it, be employed by me in disobedience to thy laws - but give me such a sense of my pains as may humble me before Thee; and such remembrance of thy mercy as may produce honest industry, and holy confidence. And, O Lord, whether Thou ordainest my days to be past in ease or anguish, take not from me thy Holy Spirit; but grant that I may attain everlasting life, for the sake of Jesus Christ our Lord. Amen.

This I found January 11th, 1772; and believe it written when I began to live on milk. I grew worse with forbearance of solid food.

## 1770.

January 1st, *primâ mane*.

ALMIGHTY God, by whose mercy I am permitted to behold the beginning of another year, succour with thy help, and bless with thy favour, the creature whom Thou vouchsafest to preserve. Mitigate, if it shall seem best unto Thee, the diseases of my body, and compose the disorders of my mind. Dispel my terrors; and grant, that the time which Thou shalt yet allow me, may not pass unprofitably away. Let not pleasure seduce me, idleness lull me, or misery depress me. Let me perform to thy glory, and the good of my fellow-creatures, the work which Thou shalt yet appoint me; and grant, that as I draw nearer to my dissolution, I may, by the help of thy Holy Spirit, feel my knowledge of Thee increased, my hope exalted, and my faith strengthened; that, when the hour which is coming shall come, I may pass by a holy death to everlasting happiness, for the sake of Jesus Christ our Lord. Amen.

Wednesday, March 28th, 1770.

THIS is the day on which, in 1752, I was deprived of poor dear Tetty. Having left off the practice of thinking on her with some particular combinations, I have recalled her to my mind of late less frequently; but when I recollect the time in which we lived together, my grief for her departure is not abated; and I have less pleasure in any good that befalls me, because she does not partake it. On many occasions, I think what she would have said or done. When I saw the sea at Bright-helmstone, I wished for her to have seen it with me. But with respect to her, no rational wish is now left, but that we may meet at last where the mercy of God shall make us happy, and perhaps make us instrumental to the happiness of each other. It is now eighteen years.

THIS week is Passion Week.

I have for some weeks past been much afflicted with the lumbago, or rheumatism in the loins, which often passes to the muscles of the belly, where it causes equal, if not greater pain. In the day the sunshine mitigates it; and in cold or cloudy weather, such as has for some time past remarkably prevailed, the heat of a strong fire suspends it. In the night it is so troublesome, as not very easily to be borne. I lie wrapped in flannel, with a very great fire near my bed; but whether it be that a recumbent posture increases the pain, or that expansion by moderate warmth excites what a great heat dissipates, I can seldom remain in bed two hours at a time without the necessity of rising to heat the parts affected at the fire.

One night, between the pain and the spasms in my stomach, I was insupportably distressed. On the next night, I think, I laid a blister to my back, and took opium; my night was tolerable, and, from that time, the spasms in my stomach, which disturbed me for many years, and for two past harassed me almost to distraction, have nearly ceased; I suppose the breast is relaxed by the opium.

Having passed Thursday in Passion Week at Mr. Thrale's, I came home on Friday morning, that I might pass the day unobserved; I had nothing but water, once in the morning, and once at bed-time. I refused tea, after some deliberation, in the afternoon. They did not press it. I came home late, and was unwilling to carry my rheumatism to the cold church in the morning, unless that were rather an excuse made to myself. In the afternoon I went to church, but came late, I think at the Creed. I read Clarke's Sermon on the death of Christ, and the Second Epistle to Timothy in Greek, but rather hastily. I then went to Thrale's, and had a very tedious and painful night. But the spasms in my throat are gone; and, if either the pain, or the opiate which the pain enforced, has stopped them, the relief is very cheaply purchased. The pain harasses me much; yet many have the disease, perhaps, in a much higher degree, with want of food, fire, and covering, which I find thus grievous, with all the succours that riches and kindness can buy and give.

On Saturday I was not hungry, and did not eat much breakfast. There was a dinner and company, at which I was persuaded and tempted to stay. At night I came home, sat up, and composed the Prayer; and having ordered the maid to make the fire in my chamber, at eight went to rest, and had a tolerable night.

*Easter Day.*

April 15th, 1770, in the morning.

ALMIGHTY and everlasting God, who hast preserved me, by thy fatherly care, through all the years of my past life, and now permittest me again to commemorate the sufferings and merits of our Lord and Saviour Jesus Christ; grant me so to partake of this Holy Rite, that the disquiet of my mind may be appeased, that my faith may be increased, my hope strengthened, and my life regulated by thy will. Make me truly thankful for that portion of health which thy mercy has restored, and enable me to use the remains of life to thy glory and my own salvation. Take not from me, O Lord, thy Holy Spirit; extinguish in my mind all sinful and inordinate desires; let me resolve to do that which is right; and let me, by thy help, keep my resolutions. Let me, if it be best for me, at last know peace and comfort; but whatever state of life Thou shalt appoint me, let me end it by a happy death, and enjoy eternal happiness in thy presence, for the sake of Jesus Christ our Lord. Amen.

*Easter Day.*

1 in the afternoon.

I AM just returned from the communion, having been very little interrupted in my duty by bodily pain.

I was very early at church, and used this Prayer, I think, before service, with proper Collects. I was composed during the service. I went to the table to hear the prefatory part of the office, then returned to my pew, and tried to settle some resolutions.

I resolved to form, this day, some plan for reading the Scriptures.

To rise by eight, or earlier.

To form a plan for the regulation of my daily life.

To excite in myself such a fervent desire of pleasing God, as should suppress all other passions.

I prayed through all the collects of meditation, with some extemporary prayers; recommended my friends, living and dead. When I returned to the table, I staid till most had communicated, and in the mean time tried to settle my mind; prayed against bad and troublesome thoughts; resolved to oppose sudden incursions of them; and, I think, had ——— thrown into my mind at the general confession. When I first went to the table, the particular series of my thoughts I cannot recollect.

When I came home I returned thanks, by ac-

commodating the General Thanksgiving; and used this Prayer again, with the Collects, after receiving. I hope God has heard me. Shall I ever receive the Sacrament with tranquillity? Surely the time will come. Some vain thoughts stole upon me while I stood near the table; I hope I ejected them effectually, so as not to be hurt by them. I went to prayers at seven, having fasted; read the two Morning Lessons in Greek. At night I read Clarke's Sermon of the Humiliation of our Saviour.

## 1st Sunday after Easter.

I HAVE been recovering from my rheumatism slowly, yet sensibly; but the last week has produced little good. Uneasy nights have tempted me to lie long in the morning. But when I wake in the night, the release which still continues from the spasms in my throat, gives me great comfort.

The plan which I formed for reading the Scriptures, was to read 600 verses in the Old Testament, and 200 in the New, every week.

The Old Testament in any language, the New in Greek.

This day I began to read the Septuagint, but read only 230 verses, the nine first chapters of Genesis.

On this evening I repeated the Prayer for Easter Day, changing the future tense to the past.

## June 1st, 1770.

EVERY man naturally persuades himself that he can keep his resolutions, nor is he convinced of his imbecility but by length of time and frequency of experiment. This opinion of our own constancy is so prevalent, that we always despise him who suffers his general and settled purpose to be overpowered by an occasional desire. They, therefore, whom frequent failures have made desperate, cease to form resolutions; and they who are becoming cunning, do not tell them. Those who do not make them are very few, but of their effect little is perceived; for scarcely any man persists in a course of life planned by choice, but as he is restrained from deviation by some external power. He who may live as he will, seldom lives long in the observation of his own rules. I never yet saw a regular family, unless it were that of Mrs. Harriot's, nor a regular man, except Mr. ———, whose exactness I know only by his own re-

port, and Psalmanazar, whose life was, I think, uniform.

---

1771.

*Easter Day.*

March 31st.

ALMIGHTY and most merciful Father, I am now about to commemorate once more, in thy presence, the redemption of the world by our Lord and Saviour thy Son Jesus Christ. Grant, O most merciful God, that the benefit of his sufferings may be extended to me. Grant me faith, grant me repentance. Illuminate me with thy Holy Spirit, enable me to form good purposes, and to bring these purposes to good effect. Let me so dispose my time, that I may discharge the duties to which Thou shalt vouchsafe to call me; and let that degree of health, to which thy mercy has restored me, be employed to thy glory. O God, invigorate my understanding, compose my perturbations, recall my wanderings, and calm my thoughts; that having lived while Thou shalt grant me life, to do good and to praise Thee, I may, when thy call shall summon me to another state, receive mercy from Thee, for Jesus Christ's sake. Amen.

---

September 18th, 1771, 9 at night.

I AM now come to my sixty-third year. For the last year I have been slowly recovering both from the violence of my last illness, and, I think, from the general disease of my life. My breath is less obstructed, and I am more capable of motion and exercise. My mind is less encumbered, and I am less interrupted in mental employment. Some advances, I hope, have been made towards regularity. I have missed church since Easter only two Sundays, both which, I hope, I have endeavoured to supply by attendance on divine worship in the following week. Since Easter, my evening devotions have been lengthened. But indolence and indifference have been neither conquered nor opposed. No plan of study has been pursued or formed, except that I have commonly read every week, if not on Sunday, a stated portion of the New Testament in Greek. But what is most to be considered, I have neither attempted nor formed any scheme of life by which I may do good, and please God.

One great hinderance is want of rest; my nocturnal complaints grow less troublesome to-

wards morning; and I am tempted to repair the deficiencies of the night. I think, however, to try to rise every day by eight, and to combat indolence as I shall obtain strength. Perhaps Providence has yet some use for the remnant of my life.

---

ALMIGHTY and everlasting God, whose mercy is over all thy works, and who hast no pleasure in the death of a sinner, look with pity upon me, succour and preserve me; enable me to conquer evil habits, and surmount temptations. Give me grace so to use the degree of health which Thou hast restored to my mind and body, that I may perform the task Thou shalt yet appoint me. Look down, O gracious Lord, upon my remaining part of life; grant, if it please Thee, that the days few or many which Thou shalt yet allow me, may pass in reasonable confidence, and holy tranquillity. Withhold not thy Holy Spirit from me, but strengthen all good purposes, till they shall produce a life pleasing to Thee. And when Thou shalt call me to another state, forgive me my sins, and receive me to happiness, for the sake of Jesus Christ our Lord. Amen.

Safely brought us, &c.

---

September 23d, 1771.

ON the 18th, in the morning, before I went to bed, I used the general prayer ["beginning of this year"] and when I rose. I came home from Mr. Thrale's, that I might be more master of my hours. I went to church in the morning, but came in to the Litany. I have gone voluntarily to church on the week day but few times in my life. I think to mend.

At night I composed and used the prayer, which I have used since in my devotions one morning. Having been somewhat disturbed, I have not yet settled in any plan, except that yesterday I began to learn some verses in the Greek Testament for a Sunday's recital. I hope, by trust in God, to amend my life.

---

1772.

Jan. 1st, 2 in the morning.

ALMIGHTY God, who hast permitted me to see the beginning of another year, enable me so to receive thy mercy, as that it may raise in me stronger desires of pleasing Thee by purity of

mind and holiness of life. Strengthen me, O Lord, in good purposes, and reasonable meditations. Look with pity upon all my disorders of mind, and infirmities of body. Grant that the residue of my life may enjoy such degrees of health as may permit me to be useful, and that I may live to thy glory; and, O merciful Lord, when it shall please Thee to call me from the present state, enable me to die in confidence of thy mercy, and receive me to everlasting happiness, for the sake of Jesus Christ our Lord. Amen.

To rise in the morning.

---

*Easter Eve.*

April 18th, 1772.

I AM now again preparing, by divine mercy, to commemorate the death of my gracious Redeemer, and to form, as God shall enable me, resolutions and purposes of a better life.

When I review the last year, I am able to recollect so little done, that shame and sorrow, though perhaps too weakly, come upon me; yet I have been generally free from local pain, and my strength has seemed gradually to increase. But my sleep has generally been unquiet, and I have not been able to rise early. My mind is unsettled, and my memory confused. I have of late turned my thoughts, with a very useless earnestness, upon past incidents. I have yet got no command over my thoughts; an unpleasing incident is almost certain to hinder my rest; this is the remainder of my last illness. By sleepless or unquiet nights, and short days, made short by late rising, the time passes away uncounted and unheeded. Life so spent is useless.

I hope to cast my time into some stated method. To let no hour pass unemployed.

To rise by degrees more early in the morning. To keep a journal.

I have, I think, been less guilty of neglecting public worship than formerly. I have commonly on Sunday gone once to church, and if I have missed, have reproached myself.

I have exerted rather more activity of body. These dispositions I desire to improve.

I resolved, last Easter, to read within the year, the whole Bible, a very great part of which I had never looked upon. I read the Greek Testament without construing, and this day concluded the Apocalypse. I think that no part was missed.

My purpose of reading the rest of the Bible was forgotten, till I took by chance the resolutions of last Easter in my hand.

I began it the first day of Lent; and, for a time,

read with some regularity. I was then disturbed or seduced, but finished the Old Testament last Thursday.

I hope to read the whole Bible once a-year, as long as I live.

Yesterday I fasted, as I have always or commonly done since the death of Tetty. The fast was more painful than it has formerly been, which I imputed to some medicinal evacuations in the beginning of the week, and to a meal of cakes on the foregoing day. I cannot now fast as formerly.

I devoted this week to the perusal of the Bible, and have done little secular business. I am this night easier than is customary on this anniversary, but am not sensibly enlightened.

---

*Easter Day.*

After 12 at night.

THE day is now begun, on which I hope to begin a new course *ἡμεῖς ἀφ' ὧν ἀρχομεν*.

My hopes are from this time,

To rise early.

To waste less time.

To appropriate something to charity.

---

*Easter.*

ALMIGHTY God, merciful Father, who hatest nothing that Thou hast made, look down with pity upon my sinfulness and weakness. Strengthen, O Lord, my mind; deliver me from needless terrors; enable me to correct all inordinate desires, to eject all evil thoughts, to reform all sinful habits, and so to amend my life, that when at the end of my days Thou shalt call me hence, I may depart in peace, and be received into everlasting happiness, for the sake of Jesus Christ our Lord. Amen.

---

9 in the morning.

GLORY be to Thee, O Lord God, for the deliverance which thou hast granted me from diseases of mind and body. Grant, O gracious God, that I may employ the powers which Thou vouchsafest me to thy glory, and the salvation of my soul, for the sake of Jesus Christ. Amen.

April 26th, 1772.

I WAS some way hindered from continuing this contemplation in the usual manner, and therefore try, at the distance of a week, to review the last Sunday. I went to church

early, having first, I think, used my prayer. When I was there, I had very little perturbation of mind. During the usual time of meditation, I considered the Christian duties under the three principles of soberness, righteousness, and godliness; and purposed to forward godliness by the *annual perusal of the Bible*; righteousness by *settling something for charity*, and soberness by *early hours*. I commenced as usual, with preface of permission, and, I think, mentioned Bathurst. I came home, and found Paoli and Boswell waiting for me. What devotions I used after my return home, I do not distinctly remember. I went to prayers in the evening; and, I think, entered late.

I have this week endeavoured every day but one to rise early, and have tried to be diligent; but have not performed what I required from myself.

On Good Friday, I paid Peyton without requiring work.

Since Easter 1771, I have added a Collect to my evening devotion.

I have been less indulgent to corporeal inactivity. But have done little with my mind.

It is a comfort to me, that at last, in my sixty-third year, I have attained to know, even thus hastily, confusedly, and imperfectly, what my Bible contains.

May the good God increase and sanctify my knowledge.

I have never yet read the Apocrypha. When I was a boy, I have read or heard Bel and the Dragon, Susanna, some of Tobit, perhaps all; some at least of Judith, and some of Ecclesiasticus; and, I suppose, the Benedicite. I have some time looked into the Maccabees, and read a chapter containing the question, *Which is the strongest?* \* I think in Esdras.

In the afternoon of Easter Day, I read Pockocke's Commentary.

I have this last week scarcely tried to read, nor have I read any thing this day.

I have had my mind weak and disturbed for some weeks past.

Having missed church in the morning, I went this evening, and afterwards sat with Southwell.

Having not used the prayer, except on the day of communion; I will offer it this night, and hope to find mercy. On this day little has been done, and this is now the last hour. In life little has been done, and life is very far advanced. Lord have mercy upon me.

1773.

January 1, mane 1h, 33m.

ALMIGHTY God, by whose mercy my life has

been yet prolonged to another year, grant that thy mercy may not be vain. Let not my years be multiplied to increase my guilt; but as age advances, let me become more pure in my thoughts, more regular in my desires, and more obedient to thy laws. Let not the cares of the world distract me, nor the evils of age overwhelm me. But continue and increase thy loving kindness towards me; and when Thou shalt call me hence, receive me to everlasting happiness, for the sake of Jesus Christ our Lord. Amen.

Good Friday.

April 9th.

On this day I went twice to church, and Boswell was with me. I had forborne to attend divine service for some time in the winter, having a cough which would have interrupted both my own attention and that of others; and when the cough grew less troublesome I did not regain the habit of going to church, though I did not wholly omit it. I found the service not burdensome nor tedious, though I could not hear the lessons. I hope in time to take pleasure in public worship.

On this whole day I took nothing of nourishment but one cup of tea without milk; but the fast was very inconvenient. Towards night I grew fretful and impatient, unable to fix my mind, or govern my thoughts; and felt a very uneasy sensation both in my stomach and head, compounded, as it seemed, of laxity and pains.

From this uneasiness, of which when I was not asleep I was sensible all night, I was relieved in the morning by drinking tea, and eating the soft part of a penny loaf.

This I have set down for future observation.

Saturday, April 10th, I dined on cakes, and found myself filled and satisfied.

Saturday, 10th. Having offered my prayers to God, I will now review the last year.

Of the spring and summer, I remember that I was able in those seasons to examine and improve my Dictionary, and was seldom withheld from the work but by my own unwillingness. Of my nights I have no distinct remembrance, but believe that, as in many foregoing years, they were painful and restless.

O God, grant that I may not mispend or lose the time which Thou shalt yet allow me. For Jesus Christ's sake, have mercy upon me.

My purpose is to attain, in the remaining part of the year, as much knowledge as can easily be had of the Gospels and Pentateuch. Concerning the Hebrew I am in doubt. I hope

\* 1 Esdras, chap. iii. ver. 10. &c.

likewise to enlarge my knowledge of divinity, by reading, at least once a week, some sermon, or small theological tract, or some portion of a larger work.

To this important and extensive study, my purpose is to appropriate (liberè) part of every Sunday, holyday, Wednesday, and Friday, and to begin with the Gospels. Perhaps I may not be able to study the Pentateuch before next year.

My general resolution, to which I humbly implore the help of God, is to methodise my life, to resist sloth. I hope from this time to keep a journal.

N. B. On Friday I read the first of Mark, and Clarke's Sermon on Faith.

On Saturday I read little, but wrote the foregoing account, and the following Prayer.

April 10th, near midnight.

ALMIGHTY God, by whose mercy I am now about to commemorate the death of my Redeemer, grant that from this time I may so live, as that his death may be efficacious to my eternal happiness; enable me to conquer all evil customs; deliver me from evil and vexatious thoughts; grant me light to discover my duty, and grace to perform it. As my life advances, let me become more pure, and more holy. Take not from me thy Holy Spirit, but grant that I may serve Thee with diligence and confidence; and when Thou shalt call me hence, receive me to everlasting happiness, for the sake of Jesus Christ our Lord. Amen.

*Easter Sunday.*

April 11th, 1773.

I HAD more disturbance in the night than has been customary for some weeks past. I rose before nine in the morning, and prayed and drank tea. I came, I think, to church in the beginning of the prayers. I did not distinctly hear the Psalms, and found that I had been reading the Psalms for Good Friday. I went through the Litany, after a short disturbance, with tolerable attention.

After sermon, I perused my Prayer in the pew, then went nearer the altar, and being introduced into another pew, used my Prayer again, and recommended my relations, with Bathurst and Boothby, then my wife again by herself. Then I went nearer the altar, and read the Collects chosen for meditation. I prayed for Salisbury, and, I think, the Thrales. I then communicated with calm-

ness, used the Collect for Easter Day, and returning to the first pew, prayed my Prayer the third time. I came home; again used my Prayer and the Easter Collect. Then went into the study to Boswell, and read the Greek Testament. Then dined, and when Boswell went away, ended the four first chapters of St. Matthew, and the Beatitudes of the fifth.

I then went to Evening Prayers, and was composed.

I gave the pew-keepers each five shillings and threepence.

April 12th, near one in the morning. I used my Prayer, with my ordinary devotions, and hope to lead henceforward a better life.

Friday, June 18th, 1773.

THIS day, after dinner, died Mrs. Salisbury; she had for some days almost lost the power of speaking. Yesterday, as I touched her hand, and kissed it, she pressed my hand between her two hands, which she probably intended as the parting caress. At night her speech returned a little; and she said, among other things, to her daughter, I have had much time, and, I hope, I have used it. This morning being called about nine to feel her pulse, I said at parting, God bless you, for Jesus Christ's sake. She smiled, as pleased. She had her senses perhaps to the dying moment.

July 22d: —73.

THIS day I found this book, \* with the resolutions; some of which I had forgotten, but remembered my design of reading the Pentateuch and Gospels, though I have not pursued it.

Of the time past since these resolutions were made, I can give no very laudable account. Between Easter and Whitsuntide, having always considered that time as propitious to study, I attempted to learn the Low Dutch language; my application was very slight, and my memory very fallacious, though whether more than in my earlier years, I am not very certain. My progress was interrupted by a fever, which, by the imprudent use of a small print, left an inflammation in my useful eye, which was not removed but by two copious bleedings, and the daily use of

\* A Book, in which this, and the preceding Meditations on Good Friday and Easter Sunday are written.

catharticks for a long time. The effect yet remains.

My memory has been for a long time very much confused. Names, and persons, and events, slide away strangely from me. But I grow easier.

The other day looking over old papers, I perceived a resolution to rise early always occurring. I think I was ashamed, or grieved, to find how long and how often I had resolved, what yet, except for about one half year, I have never done. My nights are now such as give me no quiet rest; whether I have not lived resolving till the possibility of performance is past, I know not. God help me, I will yet try.

---

Talisker in Skie,  
September 24th, 1773.

On last Saturday was my sixty-fourth birthday. I might perhaps have forgotten it, had not Boswell told me of it; and, what pleased me less, told the family at Dunvegan.

The last year is added to those of which little use has been made. I tried in the summer to learn Dutch, and was interrupted by an inflammation in my eye. I set out in August on this journey to Skie. I find my memory uncertain, but hope it is only by a life immethodical and scattered. Of my body, I do not perceive that exercise, or change of air, has yet either increased the strength or activity. My nights are still disturbed by flatulencies.

My hope is, for resolution I dare no longer call it, to divide my time regularly, and to keep such a journal of my time, as may give me comfort in reviewing it. But, when I consider my age, and the broken state of my body, I have great reason to fear lest death should lay hold upon me, while I am yet only designing to live. But I have yet hope.

---

ALMIGHTY God, most merciful Father, look down upon me with pity. Thou hast protected me in childhood and youth; support me, Lord, in my declining years. Preserve me from the dangers of sinful presumption. Give me, if it be best for me, stability of purposes, and tranquillity of mind. Let the year which I have now begun be spent to thy glory, and to the furtherance of my salvation. Take not from me thy Holy Spirit, but, as death approaches, prepare me to appear joyfully in thy presence, for the sake of Jesus Christ our Lord. Amen.

1774.

January 1st, near 2 in the morning.

ALMIGHTY God, merciful Father, who hatest nothing that Thou hast made, but wouldest that all should be saved, have mercy upon me. As Thou hast extended my life, increase my strength, direct my purposes and confirm my resolution, that I may truly serve Thee, and perform the duties which Thou shalt allot me.

Relieve, O gracious Lord, according to thy mercy, the pains and distempers of my body, and appease the tumults of my mind. Let my faith and obedience increase as my life advances; and let the approach of death incite my desire to please Thee, and invigorate my diligence in good works, till at last, when Thou shalt call me to another state, I shall lie down in humble hope, supported by thy Holy Spirit, and be received to everlasting happiness, through Jesus Christ our Lord. Amen.

The beginning, &c.

I hope,

To read the Gospels before Easter.

To rise at eight.

To be temperate in food.

---

This year has passed with so little improvement, that I doubt whether I have not rather impaired than increased my learning. To this omission, some external causes have contributed. In the winter I was distressed by a cough; in the summer an inflammation fell upon my useful eye, from which it has not yet, I fear, recovered; in the autumn I took a journey to the Hebrides, but my mind was not free from perturbation; yet the chief cause of my deficiency has been a life immethodical and unsettled, which breaks all purposes, confounds and suppresses memory, and perhaps leaves too much leisure to imagination. O Lord, have mercy upon me.

January 9th, 1774

1775.

Maunday Thursday, April 13th.

Of the use of time, or of my commendation of myself, I thought no more; but lost life in restless nights and broken days, till this week awakened my attention.

This year has passed with very little improvement, perhaps with diminution of knowledge. Much time I have not left; infirmities oppress me. But much remains to be done. I hope to rise at eight or sooner in the morning.

Good Friday, April 14th, 1775.

BOSWELL came in before I was up. We breakfasted; I only drank tea, without milk or bread. We went to church, saw Dr. Wetherell in the pew, and, by his desire, took him home with us. He did not go very soon, and Boswell staid. Boswell and I went to church, but came very late. We then took tea, by Boswell's desire; and I eat one bun, I think, that I might not seem to fast ostentatiously. Boswell sat with me till night; we had some serious talk. When he went, I gave Francis some directions for preparation to communicate. Thus has passed, hitherto, this awful day.

10<sup>o</sup>. 30<sup>o</sup>. P. M.

WHEN I look back upon resolutions of improvement and amendment, which have year after year been made and broken, either by negligence, forgetfulness, vicious idleness, casual interruption, or morbid infirmity; when I find that so much of my life has stolen unprofitably away, and that I can deservy by retrospection scarcely a few single days properly and vigorously employed; why do I yet try to resolve again? I try because reformation is necessary, and despair is criminal; I try, in humble hope of the help of God.

As my life has, from my earliest years, been wasted in a morning bed, my purpose is from Easter-day to rise early, not later than eight.

11<sup>o</sup>. 15<sup>o</sup>. P. M. D. j.  
Easter Eve, April 15th, 1775.

I rose more early than in common, after a night disturbed by flatulencies, though I had taken so little. I prayed, but my mind was unsettled, and I did not fix upon the book. After the bread and tea I trifled, and about three ordered coffee and buns for my dinner. I find more faintness and uneasiness in fasting than I did formerly.

While coffee was preparing, Collier came in, a man whom I had not seen for more than twenty years, but whom I consulted about Macky's books. We talked of old friends and past occurrences, and eat and drank together.

I then read a little in the Testament, and tried Fiddes's Body of Divinity, but did not settle.

I then went to Evening Prayer, and was tolerably composed. At my return I sat a while, then retired, but found reading uneasy.

11. P. M.

These two days in which I fasted, I have not been sleepy, though I rested ill.

*Easter Day.*

April 16th, 1775.

ALMIGHTY God, heavenly Father, whose mercy is over all thy works, look with pity on my miseries and sins. Suffer me to commemorate, in thy presence, my redemption by thy Son Jesus Christ. Enable me so to repent of my mispent time, that I may pass the residue of my life in thy fear, and to thy glory. Relieve, O Lord, as seemeth best unto Thee, the infirmities of my body, and the perturbation of my mind. Fill my thoughts with awful love of thy goodness, with just fear of thine anger, and with humble confidence in thy mercy. Let me study thy laws, and labour in the duties which Thou shalt set before me. Take not from me thy Holy Spirit, but incite in me such good desires, as may produce diligent endeavours after thy glory and my own salvation; and when, after hopes and fears, and joys and sorrows, Thou shalt call me hence, receive me to eternal happiness, for the sake of Jesus Christ our Lord. Amen.

Collier is dead. April 7th, 1776.

Transcribed from a former book, with a slight emendation or two. With that book I parted, perhaps unnecessarily, by a catch.

September 18th, 1775.

O God, by whom all things were created and are sustained, who givest and takest away, in whose hands are life and death, accept my imperfect thanks for the length of days which Thou hast vouchsafed to grant me; impress upon my mind such repentance of the time mispent in sinfulness and negligence, that I may obtain forgiveness of all my offences; and so calm my mind, and strengthen my resolutions, that I may live the remaining part of my life in thy fear, and with thy favour. Take not thy Holy Spirit from me; but let me so love thy laws, and so obey them, that I may finally be received to eternal happiness, through Jesus Christ our Lord. Amen.

Composed at Calais, in a sleepless night, and used before the morn at Notre Dame. Written at St. Omer's.

1776.

January 1st.

ALMIGHTY God, merciful Father, who hast

permitted me to see the beginning of another year, grant that the time which Thou shalt yet afford me, may be spent to thy glory, and the salvation of my own soul. Strengthen all good resolutions, and take not from me thy Holy Spirit, but have mercy upon me, and shed thy blessing both on my soul and body, for the sake of Jesus Christ our Lord. Amen.

---

*Easter Day.*

April 7th.

THE time is again at which, since the death of my poor dear Totty, on whom God have mercy, I have annually commemorated the mystery of Redemption, and annually purposed to amend my life. My reigning sin, to which perhaps many others are appendant, is waste of time, and general sluggishness, to which I was always inclined, and, in part of my life, have been almost compelled by morbid melancholy and disturbance of mind. Melancholy has had in me its paroxysms and remissions, but I have not improved the intervals, nor sufficiently resisted my natural inclination, or sickly habits. I will resolve, henceforth, to rise at eight in the morning, so far as resolution is proper, and will pray that God will strengthen me. I have begun this morning.

Though for the past week I have had an anxious design of communicating to-day, I performed no particular act of devotion, till on Friday I went to church. My design was to pass part of the day in exercises of piety, but Mr. Boswell interrupted me; of him, however, I could have rid myself, but poor Thræle, *orbis et ævispes*, came for comfort, and sat till seven, when we all went to church.

In the morning I had at church some radiations of comfort.

I fasted, though less rigorously than at other times. I, by negligence, poured milk into the tea, and, in the afternoon, drank one dish of coffee with Thræle; yet at night, after a fit of drowsiness, I felt myself very much disordered by emptiness, and called for tea, with peevish and impatient eagerness. My distress was very great.

Yesterday, I do not recollect that to go to church came into my thoughts; but I sat in my chamber, preparing for preparation: interrupted, I know not how. I was near two hours at dinner.

I go now with hope,

To rise in the morning at eight.

To use my remaining time with diligence.

To study more accurately the Christian Religion.

ALMIGHTY and most merciful Father, who hast preserved me, by thy tender forbearance, once more to commemorate thy love in the redemption of the world; grant that I may so live the residue of my days, as to obtain thy mercy when Thou shalt call me from the present state. Illuminate my thoughts with knowledge, and inflame my heart with holy desires. Grant me to resolve well, and keep my resolutions; take not from me thy Holy Spirit, but in life and in death have mercy on me, for Jesus Christ's sake. Amen.

Acts of Forgiveness.

P. M. In the pew I read my Prayer, and commended my friends, and those that died this year. At the altar I was generally attentive; some thoughts of vanity came into my mind while others were communicating; but I found, when I considered them, that they did not tend to irreverence of God. At the altar I renewed my resolutions. When I received, some tender images struck me. I was so mollified by the concluding address to our Saviour, that I could not utter it. The communicants were mostly women. At intervals I read collects, and recollected, as I could, my Prayer. Since my return, I have said it. 2 P. M.

May 21st, 1776.

These resolutions I have not practised nor recollected. O God, grant me to begin now, for Jesus Christ's sake. Amen.

---

July 25th, 1776.

O God, who has ordained that whatever is to be desired, should be sought by labour, and who, by thy blessing, bringest honest labour to good effect; look with mercy upon my studies and endeavours. Grant me, O Lord, to design only what is lawful and right; and afford me calmness of mind, and steadiness of purpose, that I may so do thy will in this short life, as to obtain happiness in the world to come, for the sake of Jesus Christ our Lord. Amen. When I purposed to apply vigorously to study, particularly of the Greek and Italian tongues.

---

1777.

Jan. 1st, 2 P. M.

ALMIGHTY LORD, merciful Father, vouchsafe to accept the thanks which I now presume to offer Thee, for the prolongation of my life. Grant, O Lord, that as my days are multiplied, my good resolutions may be strengthened, my power of resisting temptations increased, and

my struggles with snares and obstructions invigorated. Relieve the infirmities both of my mind and body. Grant me such strength as my duties may require, and such diligence as may improve those opportunities of good that shall be offered me. Deliver me from the intrusion of evil thoughts. Grant me true repentance of my past life: and as I draw nearer and nearer to the grave, strengthen my faith, enliven my hope, extend my charity, and purify my desires; and so help me by thy Holy Spirit, that when it shall be thy pleasure to call me hence, I may be received to everlasting happiness, for the sake of thy Son Jesus Christ our Lord. Amen.

Our Father—

March 28th.

THIS day is Good Friday. It is likewise the day on which my poor Tetty was taken from me.

My thoughts were disturbed in bed. I remembered that it was my wife's dying day, and begged pardon for all our sins, and commended her; but resolved to mix little of my own sorrows or cares with the great solemnity. Having taken only tea, without milk, I went to church; had time, before service, to commend my wife, and wished to join quietly in the service, but I did not hear well, and my mind grew unsettled and perplexed. Having rested ill in the night, I slumbered at the sermon, which, I think, I could not, as I sat, perfectly hear.

I returned home, but could not settle my mind. At last I read a chapter. Then went down, about six or seven, and eat two cross buns, and drank tea. Fasting for some time has been uneasy, and I have taken but little.

At night I had some ease. L. D. I had prayed for pardon and peace.

I slept in the afternoon.

29th, Easter Eve.

I ROSE, and again prayed, with reference to my departed wife. I neither read nor went to church, yet can scarcely tell how I have been hindered. I treated with booksellers on a bargain, but the time was not long.

30th, Easter Day, Imā mane.

THE day is now come again, in which, by a custom which since the death of my wife I have by the divine assistance always observed, I

am to renew the great covenant with my Maker and my Judge. I humbly hope to perform it better. I hope for more efficacy of resolution, and more diligence of endeavour. When I survey my past life, I discover nothing but a barren waste of time, with some disorders of body, and disturbances of the mind very near to madness, which I hope He that made me, will suffer to extenuate many faults, and excuse many deficiencies. Yet much remains to be repented and reformed. I hope that I refer more to God than in former times, and consider more what submission is due to his dispensations. But I have very little reformed my practical life; and the time in which I can struggle with habits cannot be now expected to be long. Grant, O God, that I may no longer resolve in vain, or dream away the life which thy indulgence gives me, in vacancy and uselessness.

9nā mane.

I WENT to bed about two, had a disturbed night, though not so distressful as at some other times.

ALMIGHTY and most merciful Father, who seest all our miseries, and knowest all our necessities, look down upon me, and pity me. Defend me from the violent incursions of evil thoughts, and enable me to form and keep such resolutions as may conduce to the discharge of the duties which thy providence shall appoint me; and so help me by thy Holy Spirit, that my heart may surely there be fixed where true joys are to be found, and that I may serve Thee with pure affection and a cheerful mind. Have mercy upon me, O God, have mercy upon me; years and infirmities oppress me, terror and anxiety beset me. Have mercy upon me, my Creator and my Judge. In all dangers protect me, in all perplexities relieve and free me, and so help me by thy Holy Spirit, that I may now so commemorate the death of thy Son our Saviour Jesus Christ, as that when this short and painful life shall have an end, I may, for his sake, be received to everlasting happiness. Amen.

April 6th, 1777.

By one strange hinderance or another, I have been withheld from the continuation of my thoughts to this day, the Sunday following Easter-day.

On Easter-day I was at church early, and there prayed over my Prayer, and commended Tetty and my other friends. I was for some

M m

time much distressed, but at last obtained, I hope, from the God of Peace, more quiet than I have enjoyed for a long time. I had made no resolution, but, as my heart grew lighter, my hopes revived, and my courage increased; and I wrote with my pencil in my Common Prayer Book,

Vita ordinanda.

Biblia legenda.

Theologiæ opera danda.

Serviendum et lætandum.

I then went to the altar, having, I believe, again read my prayer. I then went to the table and communicated, praying for some time afterwards; but the particular matter of my prayer I do not remember.

I dined, by an appointment, with Mrs. Gardiner, and passed the afternoon with such calm gladness of mind as it is very long since I felt before. I came home, and began to read the Bible. I passed the night in such sweet uninterrupted sleep, as I have not known since I slept at Fort Augustus.

On Monday I dined with Sheward, on Tuesday with Paradise. The mornings have been devoured by company, and one intrusion has, through the whole week, succeeded to another.

At the beginning of the year I proposed to myself a scheme of life, and a plan of study; but neither life has been rectified, nor study followed. Days and months pass in a dream; and I am afraid that my memory grows less tenacious, and my observation less attentive. If I am decaying it is time to make haste. My nights are restless and tedious, and my days drowsy. The flatulence which torments me, has sometimes so obstructed my breath, that the act of respiration became not only voluntary but laborious in a decumbent posture. By copious bleeding I was relieved, but not cured.

I have this year omitted church on most Sundays, intending to supply the deficiency in the week. So that I owe twelve attendances on worship. I will make no more such superstitious stipulations, which entangle the mind with unbidden obligations.

My purpose once more, O Thou merciful Creator, that governest all our hearts and actions, *Висшѣе свѣта нѣтъ*, let not my purpose be vain:

My purpose once more is,

To rise at eight.

To keep a journal.

To read the whole Bible, in some language, before Easter.

To gather the arguments for Christianity.

To worship God more frequently in public.

Ashbourn, Sept. 18th, 1777.

ALMIGHTY and most merciful Father, who

hast brought me to the beginning of another year, grant me so to remember thy gifts, and so to acknowledge thy goodness, as that every year and day which Thou shalt yet grant me, may be employed to the amendment of my life, and in the diligent discharge of such duties as thy providence shall allot me. Grant me, by thy grace, to know and to do what Thou requirest. Give me good desires, and remove those impediments which may hinder them from effect. Forgive me my sins, negligences, and ignorances; and when at last Thou shalt call me to another life, receive me to everlasting happiness, for the sake of Jesus Christ our Lord. Amen.

1778

Good Friday.

April 17th.

It has happened this week, as it never happened in Passion Week before, that I have never dined at home, and I have therefore neither practised abstinence nor peculiar devotion.

This morning before I went to bed I enlarged my prayers, by adding some Collects with reference to the day. I rested moderately, and rose about nine, which is more early than is usual. I think I added something to my morning Prayers. Boswell came in to go to church; we had tea, but I did not eat. Talk lost our time, and we came to church late, at the Second Lesson. My mind has been for some time feeble and impressible, and some trouble it gave me in the morning; but I went with some confidence and calmness through the prayers.

In my return from church, I was accosted by Edwards, an old fellow-collegian, who had not seen me since 1729. He knew me, and asked if I remembered one Edwards; I did not at first recollect the name, but gradually, as we walked along, recovered it, and told him a conversation that had passed at an alchouse between us. My purpose is to continue our acquaintance.

We sat till the time of worship in the afternoon, and then came again late, at the Psalms. Not easily, I think, hearing the sermon, or not being attentive, I fell asleep. When we came home we had tea, and I eat two buns, being somewhat uneasy with fasting, and not being alone. If I had not been observed, I should probably have fasted.

Easter Day.

April 19th, after 12 at night.

O LORD, have mercy upon me.

Yesterday (18th) I rose late, having not slept ill. Having promised a dedication, I thought it necessary to write: but for some time neither wrote nor read. Langton came in and talked.

After dinner I wrote. At tea Boswell came in. He staid till near twelve.

I purposed to have gone in the evening to church, but missed the hour.

Edwards observed how many we have outlived.

I hope, yet hope, that my future life shall be better than my past.

From the year 1752, the year in which my poor dear Tetty died, upon whose soul may God have had mercy for the sake of Jesus Christ, I have received the sacrament every year at Easter. My purpose is to receive it now. O Lord God, for the sake of Jesus Christ, make it effectual to my salvation.

My purposes are,

To study divinity, particularly the evidences of Christianity.

To read the New Testament over in the year, with more use than hitherto of commentators.

To be diligent in my undertakings.

To serve and trust God, and be cheerful.

ALMIGHTY and most merciful Father, suffer me once more to commemorate the death of thy Son Jesus Christ, my Saviour and Redeemer, and make the memorial of his death profitable to my salvation, by strengthening my faith in his merits, and quickening my obedience to his laws. Remove from me, O God, all inordinate desires, all corrupt passions, and all vain terrors, and fill me with zeal for thy glory, and with confidence in thy mercy. Make me to love all men, and enable me to use thy gifts, whatever Thou shalt bestow, to the benefit of my fellow-creatures. So lighten the weight of years, and so mitigate the afflictions of disease, that I may continue fit for thy service, and useful in my station. And so let me pass through this life, by the guidance of thy Holy Spirit, that at last I may enter into eternal joy, through Jesus Christ our Lord. Amen.

HAVING gone to bed about two, I rose about nine, and, having prayed, went to church. I came early, and used this prayer. After sermon I again used my prayer; the Collect for the day I repeated several times, at least the petitions. I recommended my friends. At the altar I prayed earnestly, and when I came home, prayed for pardon and peace; repeated my own prayer, and added the petitions of the Collect.

O God, have mercy upon me, for the sake of Jesus Christ. Amen.

At my return home, I returned thanks for the opportunity of communion.

I was called down to Mrs. Nollkens. Boswell came in; then dinner. After dinner, which I believe was late, I read the First Epistle to Thess.; then went to Evening Prayers; then came to tea, and afterwards tried *Vossius de Baptismo*. I was sleepy.

Monday, April 20th, 1778.

AFTER a good night, as I am forced to reckon, I rose seasonably, and prayed, using the Collect for yesterday.

In reviewing my time from Easter 1777, I found a very melancholy and shameful blank. So little has been done, that days and months are without any trace. My health has, indeed been very much interrupted. My nights have been commonly, not only restless, but painful and fatiguing. My respiration was once so difficult, that an asthma was suspected. I could not walk, but with great difficulty, from Stowhill to Greenhill. Some relaxation of my breast has been procured, I think, by opium, which, though it never gives me sleep, frees my breast from spasms.

I have written a little of the Lives of the Poets. I think with all my usual vigour. I have made sermons, perhaps as readily as formerly. My memory is less faithful in retaining names, and I am afraid in retaining occurrences. Of this vacillation and vagrancy of mind, I impute a great part to a fortuitous and unsettled life, and therefore purpose to spend my time with more method.

This year, the 28th of March, passed away without memorial. Poor Tetty, whatever were our faults and failings, we loved each other. I did not forget thee yesterday. Couldst thou have lived!

I am now, with the help of God, to begin a new life.

1779.

January 1st, before 1 in the morning.

ALMIGHTY God, merciful Father, who hast granted to me the beginning of another year, grant that I may employ thy gifts to thy glory, and my own salvation. Excite me to amend my life; give me good resolutions, and enable me to perform them. As I approach the grave, let my faith be invigorated, my hope exalted, and my charity enlarged. Take not from me thy Holy Spirit; but in the course of my life protect me, in the hour of death sustain me, and finally receive me to everlasting happiness, for the sake of Jesus Christ. Amen.

*Good Friday.*

April 2d.

AFTER a night restless and oppressive, I rose this morning somewhat earlier than is usual; and having taken tea, which was very necessary to compose the disorder in my breast, having eaten nothing, I went to church with Boswell. We came late; I was able to attend the Litany with little perturbation. When we came home I began the First to the Thess., having prayed by the Collect for the right use of the Scriptures. I gave Boswell *Les Pensees de Pascal*, that he might not interrupt me. I did not, I believe, read very diligently; and before I had read far, we went to church again; I was again attentive. At home I read again, then drank tea, with a bun and a half, thinking myself less able to fast than at former times; and then concluded the Epistle. Being much oppressed with drowsiness, I slept about an hour by the fire.

11 P. M.

I AM now to review the last year, and find little but dismal vacuity, neither business nor pleasure; much intended, and little done. My health is much broken; my nights afford me little rest. I have tried opium, but its help is counterbalanced with great disturbance; it prevents the spasms, but it hinders sleep. O God, have mercy on me.

Last week I published [the first part of] the *Lives of the Poets*, written, I hope, in such a manner as may tend to the promotion of piety.

In this last year I have made little acquisition; I have scarcely read any thing. I maintain Mrs. — and her daughter. Other good of myself I know not where to find, except a little charity.

But I am now in my seventieth year; what can be done, ought not to be delayed.

*Easter Eve.*

April 3d, 1779, 11 P. M.

THIS is the time of my annual review, and annual resolution. The review is comfortless, little done. Part of the life of Dryden and the Life of Milton have been written; but my mind has neither been improved nor enlarged. I have read little, almost nothing. And I am not conscious that I have gained any good, or quitted any evil habits.

Of resolutions I have made so many, with so little effect, that I am almost weary, but by the help of God, am not yet hopeless. Good resolutions must be made and kept. I am

almost seventy years old, and have no time to lose. The distressful restlessness of my nights, makes it difficult to settle the course of my days. Something, however, let me do.

*Easter Day.*

April 4th, 1779.

I ROSE about half an hour after nine, transcribed the prayer written last night; and by neglecting to count time sat too long at breakfast, so that I came to church at the first Lesson. I attended the Litany pretty well; but in the pew could not hear the communion service, and missed the prayer for the church militant. Before I went to the altar, I prayed the occasional prayer. At the altar I commended my  $\Theta$   $\&$ , and again prayed the prayer; I then prayed the Collects, and again my own prayer by memory. I left out a clause. I then received, I hope with earnestness; and while others received sat down; but thinking that posture, though usual, improper, I rose and stood. I prayed again, in the pew, but with what prayer I have forgotten.

When I used the occasional prayer at the altar, I added a general purpose,

To avoid idleness.

I gave two shillings to the plate.

Before I went I used, I think, my prayer, and endeavoured to calm my mind. After my return I used it again, and the Collect for the day. Lord have mercy upon me.

I have for some nights called Francis to prayers, and last night discoursed with him on the sacrament.

*Easter Day.*

April 4th, 1779.

Purposes,

To rise at eight or as soon as I can.

To read the Scriptures.

To study religion.

ALMIGHTY GOD, by thy merciful continuance of my life, I come once more to commemorate the sufferings and death of thy Son Jesus Christ, and to implore that mercy which, for his sake, Thou showest to sinners. Forgive me my sins, O Lord, and enable me to forsake them. Ease, if it shall please Thee, the anxieties of my mind, and relieve the infirmities of my body. Let me not be disturbed by unnecessary terrors, and let not the weakness of age make me unable to amend my life. O Lord, take not from me thy

Holy Spirit, but receive my petitions, succour and comfort me, and let me so pass the remainder of my days, that when Thou shalt call me hence, I may enter into eternal happiness, through Jesus Christ our Lord. Amen.

---

Sept. 18th, 1779, H. P. M. 12m.

ALMIGHTY God, Creator of all things, in whose hands are life and death, glory be to Thee for all thy mercies, and for the prolongation of my life to the common age of man. Pardon me, O gracious God, all the offences which in the course of seventy years I have committed against thy Holy Laws, and all negligences of those duties which Thou hast required. Look with pity upon me, take not from me thy Holy Spirit, but enable me to pass the days which Thou shalt yet vouchsafe to grant me, in thy fear, and to thy glory: and accept, O Lord, the remains of a mispent life, that when thou shalt call me to another state, I may be received to everlasting happiness, for the sake of Jesus Christ our Lord. Amen.

---

Epsom.

My purpose is to communicate at least thrice a-year  
To study the Scriptures.  
To be diligent.

---

1780.

January 1st, H. 1, A. M.

ALMIGHTY God, my Creator and Preserver, by whose mercy my life has been continued to the beginning of another year, grant me with increase of days increase of holiness; that as I live longer, I may be better prepared to appear before Thee, when Thou shalt call me from my present state.

Make me, O Lord, truly thankful for the mercy which thou hast vouchsafed to show me through my whole life; make me thankful for the health which Thou hast restored in the last year, and let the remains of my strength and life be employed to thy glory and my own salvation.

Take not, O Lord, thy Holy Spirit from me; enable me to avoid or overcome all that may hinder my advancement in godliness; let me be no longer idle, no longer sinful; but give me rectitude of thought and constancy of action, and bring me at last to everlasting happiness, for the sake of Jesus Christ our Lord and Saviour. Amen.

Sunday, June 18th.

In the morning of this day last year, I perceived the remission of those convulsions in my breast, which had distressed me for more than twenty years. I returned thanks at church for the mercy granted me, which has now continued a year.

---

Thanksgiving.

ALMIGHTY God, our Creator and Preserver, from whom proceedeth all good, enable me to receive with humble acknowledgment of thy unbounded benignity, and with due consciousness of my own unworthiness, that recovery and continuance of health which Thou hast granted me, and vouchsafe to accept the thanks which I now offer. Glory be to Thee, O Lord, for this and all thy mercies. Grant, I beseech Thee, that the health and life which Thou shalt yet allow me, may conduce to my eternal happiness. Take not from me thy Holy Spirit; but so help and bless me, that when Thou shalt call me hence, I may obtain pardon and salvation, for the sake of Jesus Christ our Lord. Amen.

---

September 18th, 1780.

I AM now beginning the seventy-second year of my life, with more strength of body and greater vigour of mind than I think is common at that age. But though the convulsions in my breast are relieved, my sleep is seldom long. My nights are wakeful, and therefore I am sometimes sleepy in the day. I have been attentive to my diet, and have diminished the bulk of my body. I have not at all studied, nor written diligently. I have Swift and Pope yet to write; Swift is just begun.

I have forgotten or neglected my resolutions or purposes, which I now humbly and timorously renew. Surely I shall not spend my whole life with my own total disapprobation. Perhaps God may grant me now to begin a wiser and a better life.

---

ALMIGHTY God, my Creator and Preserver, who hast permitted me to begin another year, look with mercy upon my wretchedness and frailty. Rectify my thoughts, relieve my perplexities, strengthen my purposes, and reform my doings. Let increase of years bring increase of faith, hope, and charity. Grant me

diligence in whatever work thy providence shall appoint me. Take not from me thy Holy Spirit, but let me pass the remainder of the days which Thou shalt yet allow me, in thy fear and to thy glory; and when it shall be thy good pleasure to call me hence, grant me, O Lord, forgiveness of my sins, and receive me to everlasting happiness, for the sake of Jesus Christ our Lord. Amen.

---

1781.

January 2d.

I was yesterday hindered by my old disease of mind, and therefore begin to-day.

---

January 1st.

HAVING sat in my chamber till the year began, I used my accommodation of the Morning Prayer to the *beginning of this year*, and slept remarkably well, though I had supped liberally. In the morning I went to church. Then I wrote letters for Mrs. Desmoulins; then went to Streatham, and had many stops. At night I took wine, and did not sleep well.

---

January 2d, 1781.

I rose according to my resolution, and am now to begin another year; I hope with amendment of life. I will not despair. Help me, help me, O my God.

My hope is,

To rise at eight or sooner.

To read the Bible through this year, in some language.

To keep a journal.

To study religion.

To avoid idleness.

---

ALMIGHTY God, merciful Father, who hast granted me such continuance of life, that I now see the beginning of another year, look with mercy upon me; as Thou grantest increase of years, grant increase of grace. Let me live to repent what I have done amiss, and by thy help so to regulate my future life, that I may obtain mercy when I appear before Thee, through the merits of Jesus Christ. Enable me, O Lord, to do my duty with a quiet mind; and take not from me thy Holy Spirit, but protect and bless me, for the sake of Jesus Christ. Amen.

Good Friday.

April 13th, 1781.

I forgot my prayer and resolutions, till two days ago I found this paper.

Some time in March I finished the *Lives of the Poets*, which I wrote in my usual way, dilatorily and hastily, unwilling to work, and working with vigour and haste.

On Wednesday 11th, was buried my dear friend Thrale, who died on Wednesday 4th; and with him were buried many of my hopes and pleasures. About five, I think, on Wednesday morning he expired; I felt almost the last flutter of his pulse, and looked for the last time upon the face that for fifteen years had never been turned upon me but with respect or benignity. Farewell. May God, that delighteth in mercy, have had mercy on thee.

I had constantly prayed for him some time before his death.

The decease of him, from whose friendship I had obtained many opportunities of amusement, and to whom I turned my thoughts as to a refuge from misfortunes, has left me heavy. But my business is with myself.

---

September 18th.

My first knowledge of Thrale was in 1765. I enjoyed his favour for almost a fourth part of my life.

---

Easter Eve.

April 14th, 1781.

ON Good Friday I took, in the afternoon, some coffee and buttered cake; and to-day, I had a little bread at breakfast, and potatoes and apples in the afternoon, the tea with a little toast; but I find myself feeble and unsustained, and suspect that I cannot bear to fast so long as formerly.

This day I read some of Clarke's Sermons. I hope that since my last communion I have advanced, by pious reflections, in my submission to God and my benevolence to man; but I have corrected no external habits, nor have kept any of the resolutions made in the beginning of the year; yet I hope still to be reformed, and not to lose my whole life in idle purposes. Many years are already gone irrevocably past, in useless misery; that what remains may be spent better, grant, O God.

By this awful festival is particularly recommended newness of life: and a new life I will

now endeavour to begin, by more diligent application to useful employment, and more frequent attendance on public worship.

I again, with hope of help from the God of mercy, resolve,  
To avoid idleness.  
To read the Bible.  
To study religion.

ALMIGHTY God, merciful Father, by whose protection I have been preserved, and by whose clemency I have been spared, grant that the life which Thou hast so long continued, may be no longer wasted in idleness or corrupted by wickedness. Let my future purposes be good, and let not my good purposes be vain. Free me, O Lord, from vain terrors, and strengthen me in diligent obedience to thy laws. Take not from me thy Holy Spirit, but enable me so to commemorate the death of my Saviour Jesus Christ, that I may be made partaker of his merits; and may finally, for his sake, obtain everlasting happiness. Amen.

*Easter Sunday.*

1781.

I rose after eight, and breakfasted; then went early to church, and before service read the prayer for the Church Militant. I commended my friends, as I have formerly done. I was one of the last that communicated. When I came home I was hindered by visitants, but found time to pray before dinner. God, send thy blessing upon me.

Monday, April 16th.

At night I had some mental vellications, or revulsions. I prayed in my chamber with Frank, and read the first Sunday in the Duty of Man, in which I had, till then, only looked by compulsion or by chance.

This day I repeated my prayer, and hope to be heard.

I have, I thank God, received the Sacrament every year at Easter since the death of my poor dear Tetty. I once felt some temptation to omit it, but I was preserved from compliance. This was the thirtieth Easter.

June 22d, 1781.

ALMIGHTY God, who art the giver of all good, enable me to remember with due thankfulness the comforts and advantages which I have enjoyed by the friendship of Henry Thrale, for whom, so far as is lawful, I humbly implore thy mercy in his present state. O Lord, since Thou hast been pleased to call him from this world, look with mercy on those whom he has left; continue to succour me by such means as are best for me, and repay to his relations the kindness which I have received from him; protect them in this world from temptations and calamities, and grant them happiness in the world to come, for Jesus Christ's sake. Amen.

September, 2d, 1781.

WHEN Thrale's health was broken, for many months I think before his death, which happened April 4th, I constantly mentioned him in my prayers; and after his death, have made particular supplication for his surviving family to this day.

September 18th.

THIS is my seventy-third birth-day, an awful day. I said a preparatory prayer last night, and waking early, made use in the dark, as I sat up in bed, of the prayer [beginning of this year.] I rose, breakfasted, and gave thanks at church for my creation, preservation, and redemption. As I came home, I thought I had never begun any period of life so placidly. I read the Second Epistle to the Thessalonians, and looked into Hammond's Notes. I have always been accustomed to let this day pass unnoticed, but it came this time into my mind that some little festivity was not improper. I had a dinner, and invited Allen and Levett.

What has passed in my thoughts on this anniversary, is in stitched book K.\*

My purposes are the same as on the first day of this year, to which I add hope of

More frequent attendance on public worship.  
Participation of the Sacrament at least three times a-year.

September 18th, Vesp. 10° 40', circ.

ALMIGHTY and most merciful Father, who hast added another year to my life, and yet per-

\* Sic MS. [My deceased friends]

\* This book is not in the Editor's possession.

mittest me to call upon Thee, grant that the remaining days which Thou shalt yet allow me, may be past in thy fear and to thy glory. Grant me good resolutions and steady perseverance. Relieve the diseases of my body, and compose the disquiet of my mind. Let me at last repent and amend my life; and, O Lord, take not from me thy Holy Spirit, but assist my amendment, and accept my repentance, for the sake of Jesus Christ. Amen.

Sunday, October 14th, 1781,  
(Properly Monday morning.)

I am this day about to go by Oxford and Birmingham to Lichfield and Ashbourne. The motives of my journey I hardly know. I omitted it last year, and am not willing to miss it again. Mrs. Aston will be glad, I think, to see me. We are both old, and if I put off my visit I may see her no more; perhaps she wishes for another interview. She is a very good woman.

Hector is likewise an old friend, the only companion of my childhood that passed through the school with me. We have always loved one another. Perhaps we may be made better by some serious conversation, of which however I have no distinct hope.

At Lichfield, my native place, I hope to show a good example, by frequent attendance on public worship.

At Ashbourne, I hope to talk seriously with —

1782.

March 18th.

HAVING been, from the middle of January, distressed by a cold, which made my respiration very laborious, and from which I was but little relieved by being blooded three times; having tried to ease the oppression of my breast by frequent opiates, which kept me waking in the night and drowsy the next day, and subjected me to the tyranny of vain imaginations; having to all this added frequent cathartics, sometimes with mercury, I at last persuaded Dr. Laurence, on Thursday, March 14th, to let me bleed more copiously. Sixteen ounces were taken away, and from that time my breath has been free, and my breast easy. On that day I took little food, and no flesh. On Thursday night I slept with great tranquillity. On the next night (15th) I took diacodium, and had a most restless night. Of the next day I remember nothing, but that I

rose in the afternoon, and saw Mrs. Lennox and Sheward.

Sunday 17th. I lay late, and had only Palfrey to dinner. I read part of Waller's Directory, a pious rational book; but in any except a very regular life difficult to practise.

It occurred to me, that though my time might pass unemployed, no more should pass uncounted, and this has been written to-day, in consequence of that thought. I read a Greek chapter, prayed with Francis, which I now do commonly, and explained to him the Lord's Prayer, in which I find connection not observed, I think, by the expositors. I made punch for myself and my servants, by which, in the night, I thought both my breast and imagination disordered.

March 18th. I rose late, looked a little into books. Saw Miss Reynolds, and Miss Thrale, and Nicolaïda; afterwards Dr. Hunter came for his catalogue. I then dined on tea, &c.; then read over part of Dr. Laurence's book, "De Temperamentis," which seems to have been written with a troubled mind.

My mind has been for some time much disturbed. The peace of God be with me.

I hope to-morrow to finish Laurence, and to write to Mrs. Aston and to Lucy.

19th. I rose late. I was visited by Mrs. Thrale, Mr. Cotton, and Mr. Crofts. I took Laurence's paper in my hand, but was chill; having fasted yesterday, I was hungry, and dined freely, then slept a little, and drank tea; then took candles, and wrote to Aston and Lucy, then went on with Laurence, of which little remains. I prayed with Francis.

Mens sedatior, laus Deo.

To-morrow Shaw comes. I think to finish Laurence, and write to Langton.

Poor Laurence has almost lost the sense of hearing; and I have lost the conversation of a learned, intelligent, and communicative companion, and a friend whom long familiarity has much endeared. Laurence is one of the best men whom I have known.

Nostrum omnium miserere Deus.

20th. Shaw came; I finished reading Laurence. I dined liberally. Wrote a long letter to Langton, and designed to read, but was hindered by Strahan. The ministry is dissolved. I prayed with Francis, and gave thanks.

To-morrow—To Mrs. Thrale—To write to Hector—To Dr. Taylor.

21st. I went to Mrs. Thrale. Mr. Cox and Paradise met me at the door, and went with me in the coach. Paradise's Loss. In the evening wrote to Hector. At night there

were eleven visitants. Conversation with Mr. Cox. When I walked I saw the pent-houses covered with snow.

22d. I spent the time idly. Mens turbata. In the afternoon it snowed. At night I wrote to Taylor about the pot, and to Hamilton about the Fœdera.

23d. I came home, and found that Desmoulins had, while I was away, been in bed. Letters from Langton and Boswell. I promised L— six guineas.

24th, Sunday. I rose not early. Visitors, Allen, Davis, Windham, Dr. Horsley. Dinner at Strahan's. Came home and chatted with Williams, and read Romans ix. in Greek.

To-morrow begin again to read the Bible; put rooms in order; copy L—'s letter. At night I read 11 p. and something more, of the Bible, in fifty-five minutes.

26th, Tu. I copied L—'s letter, then wrote to Mrs. Thrale. Cox visited me. I sent home Dr. Laurence's papers, with notes. I gave D— a guinea, and found her a gown.

27th, W.—At Harley-street. Bad nights—in the evening Dr. Bromfield and his family—Merlin's steelyard given me.

28th, Th. I came home. Sold Rymer for Davies; wrote to Boswell. Visitors, Dr. Percy, Mr. Crofts. I have, in ten days, written to Aston, Lucy, Hector, Langton, Boswell; perhaps to all by whom my letters are desired.

The weather, which now begins to be warm, gives me great help. I have hardly been at church this year; certainly not since the 15th of January. My cough and difficulty of breath would not permit it.

This is the day on which, in 1752, dear Tetty died. I have now uttered a prayer of repentance and contrition; perhaps Tetty knows that I prayed for her. Perhaps Tetty is now praying for me. God help me. Thou, God, art merciful, hear my prayers, and enable me to trust in Thee.

We were married almost seventeen years, and have now been parted thirty.

I then read 11 p. from Ex. 36 to Lev. 7. I prayed with Fr. and used the prayer for Good Friday.

29th, Good Friday. After a night of great disturbance and solicitude, such as I do not remember, I rose, drank tea, but without eating, and went to church. I was very composed, and coming home, read Hammond on one of the Psalms for the day. I then read Leviticus. Scott came in. A kind letter from Gastrel. I read on, then went to evening prayers, and afterwards drank tea, with buns; then read till I finished Leviticus 24 pages et sup.

To write to Gastrel to-morrow.

To look again into Hammond.

30th, Sat. Visitors, Paradise, and I think Hors-

ley. Read 11 pages of the Bible. I was faint; dined on herrings and potatoes. At prayers, I think, in the evening. I wrote to Gastrel, and received a kind letter from Hector. At night Lowe. Pr. with Francis. 31st, Easter day. Read 15 pages of the Bible. Cætera alibi.

*At the Table.*

ALMIGHTY God, by whose mercy I am now permitted to commemorate my Redemption by our Lord Jesus Christ; grant that this awful remembrance may strengthen my faith, enliven my hope, and increase my charity; that I may trust in Thee with my whole heart, and do good according to my power. Grant me the help of thy Holy Spirit, that I may do thy will with diligence, and suffer it with humble patience; so that when Thou shalt call me to judgment, I may obtain forgiveness and acceptance, for the sake of Jesus our Lord and Saviour. Amen.

*At Departure, or at Home.*

GRANT, I beseech Thee, merciful Lord, that the designs of a new and better life, which by thy grace I have now formed, may not pass away without effect. Incite and enable me, by thy Holy Spirit, to improve the time which Thou shalt grant me; to avoid all evil thoughts, words, and actions; and to do all the duties which Thou shalt set before me. Hear my prayer, O Lord, for the sake of Jesus Christ. Amen.

These prayers I wrote for Mrs. Lucy Porter, \* in the latter end of the year 1782, and transcribed them October 9th, 1784.

*On leaving Mr. Thrale's Family.*

October 6th, 1782.

ALMIGHTY God, Father of all mercy, help me, by thy grace, that I may with humble and sincere thankfulness remember the comforts and conveniences which I have enjoyed at this place, and that I may resign them with holy submission, equally trusting in thy protection when

\* Daughter-in-law to Dr. Johnson; she died at Lichfield in 1786.

Thou givest and when Thou takest away.  
Have mercy upon me, O Lord, have mercy upon me.

To thy fatherly protection, O Lord, I commend this family. Bless, guide, and defend them, that they may so pass through this world, as finally to enjoy in thy presence everlasting happiness, for Jesus Christ's sake. Amen.

O Lord, so far as, &c.—Thrale.

October 7th.

I was called early. I packed up my bundles, and used the foregoing prayer, with my morning devotions somewhat, I think, enlarged. Being earlier than the family, I read St. Paul's farewell in the Acts, and then read fortuitously in the Gospels, which was my parting use of the library.

1776.

September 6th.

*I had just heard of Williams's Death.*

ALMIGHTY and most merciful Father, who art the Lord of life and death, who givest and who takest away, teach me to adore thy providence, whatever thou shalt allot me; make me to remember, with due thankfulness, the comforts which I have received from my friendship with Anna Williams.\* Look upon her, O Lord, with mercy, and prepare me, by thy grace, to die with hope, and to pass by death to eternal happiness, through Jesus Christ our Lord. Amen.

1784.

*Easter Day.*

April 11th.

ALMIGHTY God, my Creator and my Judge, who givest life and takest it away, enable me to return sincere and humble thanks for my late deliverance from imminent death; so govern my future life by thy Holy Spirit, that every day which Thou shalt permit to pass over me, may be spent in thy service, and leave me less tainted with wickedness, and more submissive to thy will.

Enable me, O Lord, to glorify Thee for that knowledge of my corruption, and that sense of

thy wrath, which my disease and weakness and danger awakened in my mind. Give me such sorrow as may purify my heart, such indignation as may quench all confidence in myself, and such repentance as may, by the intercession of my Redeemer, obtain pardon. Let the commemoration of the sufferings and death of thy Son, which I am now by thy favour once more permitted to make, fill me with faith, hope, and charity. Let my purposes be good, and my resolutions unshaken; and let me not be hindered or distracted by vain and useless fears, but, through the time which yet remains, guide me by thy Holy Spirit, and finally receive me to everlasting life, for the sake of Jesus Christ our Lord and Saviour. Amen.

*Against inquisitive and perplexing thoughts.*

August 12th, 1784.

O Lord, my Maker and Protector, who hast graciously sent me into this world to work out my salvation, enable me to drive from me all such unquiet and perplexing thoughts as may mislead or hinder me in the practice of those duties which Thou hast required. When I behold the works of thy hands, and consider the course of thy providence, give me grace always to remember that thy thoughts are not my thoughts, nor thy ways my ways. And while it shall please thee to continue me in this world, where much is to be done, and little to be known, teach me by thy Holy Spirit, to withdraw my mind from unprofitable and dangerous inquiries, from difficulties vainly curious, and doubts impossible to be solved. Let me rejoice in the light which Thou hast imparted, let me serve Thee with active zeal and humble confidence, and wait with patient expectation for the time in which the soul which Thou receivest shall be satisfied with knowledge. Grant this, O Lord, for Jesus Christ's sake. Amen.

Ashbourne, August 28th, 1784.

ALMIGHTY and most merciful Father, who afflictest not willingly the children of men, and by whose holy will — now languishes in sickness and pain, make, I beseech Thee, this punishment effectual to those gracious purposes for which Thou sendest it; let it, if I may presume to ask, end not in death, but in repentance; let him live to promote thy kingdom on earth, by the useful example of a better life; but if thy will be to call him hence, let his thoughts be so purified by his sufferings, that he may be admitted to eternal happiness. And, O Lord, by praying for him, let me be admon-

\* This lady, who was afflicted with blindness, lived many years with Dr. Johnson, and died in his house. She wrote several Poems, which were published in one volume 4to. 1766.

ished to consider my own sins, and my own danger, to remember the shortness of life, and to use the time which thy mercy grants me to thy glory and my own salvation, for the sake of Jesus Christ our Lord. Amen.

[The following Prayer was composed and used by Doctor Johnson previous to his receiving the Sacrament of the Lord's Supper, on Sunday, December 5th, 1784.]

ALMIGHTY and most merciful Father, I am now, as to human eyes it seems, about to commemorate, for the last time,\* the death of thy Son Jesus Christ our Saviour and Redeemer. Grant, O Lord, that my whole hope and confidence may be in his merits, and thy mercy; enforce and accept my imperfect repentance; make this commemoration available to the confirmation of my faith, the establishment of my hope, and the enlargement of my charity; and make the death of thy Son Jesus Christ effectual to my redemption. Have mercy upon me, and pardon the multitude of my offences. Bless my friends; have mercy upon all men. Support me by thy Holy Spirit, in the days of weakness, and at the hour of death; and receive me, at my death, to everlasting happiness, for the sake of Jesus Christ. Amen.

[The following Meditations and Prayers have no dates in the MS.]

I DID not, this week, labour my preparation so much as I have sometimes done. My mind was not very quiet; and an anxious preparation makes the duty of the day formidable and burdensome. Different methods suit different states of mind, body, and affairs. I rose this day, and prayed, then went to tea, and afterwards composed the Prayer, which I formed with great fluency. I went to church; came in at the Psalm; could not hear the reader in the lessons, but attended the prayers with tranquillity.

To read the New Testament once a-year in Greek.

#### Receiving the Sacrament,

I profess my faith in Jesus.  
I declare my resolution to obey him.

\* He died the 13th following.

I implore, in the highest act of worship, grace to keep these resolutions.

I hope to rise to a new life this day.

On the 17th, Mr. Chamier took me away with him from Streatham. I left the servants a guinea for my health, and was content enough to escape into a house where my birth-day, not being known, could not be mentioned. I sat up till midnight was past, and the day, of a new year, a very awful day, began. I prayed to God, who had safely brought me to the beginning of another year, but could not perfectly recollect the prayer, and supplied it. Such desertions of memory I have always had.

When I rose on the 18th, I think I prayed again, then walked with my friend into his grounds. When I came back, after some time passed in the library, finding myself oppressed by sleepiness, I retired to my chamber, where, by lying down, and a short imperfect slumber, I was refreshed, and prayed as the night before.

I then dined, and trifled in the parlour and library, and was freed from a scruple about Horace. At last I went to bed, having first composed a prayer.

19th, Sunday. I went to church, and attended the service. I found at church a time to use my prayer, O Lord, have mercy—

July 30th.

ALMIGHTY God, Creator and Governor of the world, who sendest sickness and restorest health, enable me to consider, with a just sense of thy mercy, the deliverance which Thou hast lately granted me, and assist by thy blessing, as is best for me, the means which I shall use for the cure of the disease with which I am now afflicted. Increase my patience, teach me submission to thy will, and so rule my thoughts and direct my actions, that I may be finally received to everlasting happiness, through Jesus Christ our Lord. Amen.

#### On the Study of Religion.

ALMIGHTY God, our heavenly Father, without whose help labour is useless, without whose light search is vain, invigorate my studies, and direct my inquiries, that I may, by due diligence and right discernment, establish myself and others in thy Holy Faith. Take not, O

Lord, thy Holy Spirit from me; let not evil thoughts have dominion in my mind. Let me not linger in ignorance, but enlighten and support me, for the sake of Jesus Christ our Lord. Amen.

---

O LORD GOD, in whose hand are the wills and affections of men, kindle in my mind holy desires, and repress sinful and corrupt imaginations; enable me to love thy commandments, and to desire thy promises; let me, by thy protection and influence, so pass through things temporal, as finally not to lose the things eternal; and among the hopes and fears, the pleasures and sorrows, the dangers and deliverances, and all the changes of this life, let my heart be surely fixed, by the help of thy Holy Spirit, on the everlasting fruition of thy presence, where true joys are to be found. Grant, O Lord, these petitions. Forgive, O merciful Lord, whatever I have done contrary to thy laws. Give me such a sense of my wickedness as may produce true contrition and effectual repentance, so that when I shall be called into another state, I may be received among the sinners to whom sorrow and reformation have obtained pardon, for Jesus Christ's sake. Amen.

---

ALMIGHTY and most merciful Father, whose clemency I now presume to implore, after a long life of carelessness and wickedness, have mercy

upon me. I have committed many trespasses; I have neglected many duties. I have done what Thou hast forbidden, and left undone what Thou hast commanded. Forgive, merciful Lord, my sins, negligences, and ignorances, and enable me, by thy Holy Spirit, to amend my life, according to thy Holy Word, for Jesus Christ's sake. Amen.

---

O MERCIFUL GOD, full of compassion, long-suffering, and of great pity, who sparest when we deserve punishment, and in thy wrath thinkest upon mercy; make me earnestly to repent, and heartily to be sorry for all my misdoings; make the remembrance so burdensome and painful, that I may flee to Thee with a troubled spirit and a contrite heart; and, O merciful Lord, visit, comfort, and relieve me; cast me not out from thy presence, and take not thy Holy Spirit from me, but excite in me true repentance; give me in this world knowledge of thy truth, and confidence in thy mercy, and in the world to come, life everlasting, for the sake of our Lord and Saviour, thy Son Jesus Christ. Amen.

---

*Ejaculation.*

*Imploring Diligence.*

O God, make me to remember that *the night cometh when no man can work.*

# THE PLAN

OF AN

## ENGLISH DICTIONARY.

---

*To the Right Honourable PHILIP DORMER, Earl of CHESTERFIELD, one of His Majesty's Principal Secretaries of State.*

MY LORD,

WHEN first I undertook to write an ENGLISH DICTIONARY, I had no expectation of any higher patronage than that of the proprietors of the copy, nor prospect of any other advantage than the price of my labour. I knew that the work in which I engaged is generally considered as drudgery for the blind, as the proper toil of artless industry; a task that requires neither the light of learning, nor the activity of genius, but may be successfully performed without any higher quality than that of bearing burdens with dull patience, and beating the tract of the alphabet with sluggish resolution.

Whether this opinion, so long transmitted, and so widely propagated, had its beginning from truth and nature, or from accident and prejudice; whether it be decreed by the authority of reason, or the tyranny of ignorance, that of all the candidates for literary praise, the unhappy lexicographer holds the lowest place, neither vanity nor interest incited me to inquire. It appeared that the province allotted me was, of all the regions of learning, generally confessed to be the least delightful, that it was believed to produce neither fruits nor flowers; and that after a long and laborious cultivation, not even the barren laurel\* had been found upon it.

Yet on this province, my Lord, I entered, with the pleasing hope, that, as it was low, it

likewise would be safe. I was drawn forward with the prospect of employment, which, though not splendid, would be useful; and which, though it could not make my life envied, would keep it innocent; which would awaken no passion, engage me in no contention, nor throw in my way any temptation to disturb the quiet of others by censure, or my own by flattery.

I had read indeed of times, in which princes and statesmen thought it part of their honour to promote the improvement of their native tongues; and in which dictionaries were written under the protection of greatness. To the patrons of such undertakings I willingly paid the homage of believing that they, who were thus solicitous for the perpetuity of their language, had reason to expect that their actions would be celebrated by posterity, and that the eloquence which they promoted would be employed in their praise. But I consider such acts of beneficence as prodigies, recorded rather to raise wonder than expectation; and content with the terms that I had stipulated, had not suffered my imagination to flatter me with any other encouragement, when I found that my design had been thought by your Lordship of importance sufficient to attract your favour.

How far this unexpected distinction can be rated among the happy incidents of life, I am not yet able to determine. Its first effect has been to make me anxious, lest it should fix the attention of the public too much upon me, and, as it once happened to an epic poet of France, by raising the reputation of the attempt, obstruct

O o

---

\* This is noticed by Lord Orrery, as one of the few inaccuracies in this address, the laurel not being barren, but bearing fruits and flowers. Boswell's Life, vol. i.

the reception of the work. I imagine what the world will expect from a scheme, prosecuted under your Lordship's influence; and I know that expectation, when her wings are once expanded, easily reaches heights which performance never will attain; and when she has mounted the summit of perfection, derides her follower, who dies in the pursuit.

Not therefore to raise expectation, but to repress it, I here lay before your Lordship the Plan of my undertaking, that more may not be demanded than I intend; and that, before it is too far advanced to be thrown into a new method, I may be advertised of its defects or superfluities. Such informations I may justly hope, from the emulation with which those, who desire the praise of elegance or discernment, must contend in the promotion of a design that you, my Lord, have not thought unworthy to share your attention with treaties and with wars.

In the first attempt to methodise my ideas I found a difficulty, which extended itself to the whole work. It was not easy to determine by what rule of distinction the words of this Dictionary were to be chosen. The chief intent of it is to preserve the purity, and ascertain the meaning, of our English idiom; and this seems to require nothing more than that our language be considered, so far as it is our own; that the words and phrases used in the general intercourse of life, or found in the works of those whom we commonly style polite writers, be selected, without including the terms of particular professions; since, with the arts to which they relate, they are generally derived from other nations, and are very often the same in all the languages of this part of the world. This is, perhaps, the exact and pure idea of a grammatical dictionary; but in lexicography, as in other arts, naked science is too delicate for the purposes of life. The value of a work must be estimated by its use; it is not enough that a dictionary delights the critic, unless, at the same time, it instructs the learner; as it is to little purpose that an engine amuses the philosopher by the subtlety of its mechanism, if it requires so much knowledge in its application as to be of no advantage to the common workman.

The title which I prefix to my work has long conveyed a very miscellaneous idea, and they that take a dictionary into their hands have been accustomed to expect from it a solution of almost every difficulty. If foreign words therefore were rejected, it could be little regarded, except by critics, or those who aspire to criticism; and however it might enlighten those that write, would be all darkness to them that only read. The unlearned much oftener consult their dictionaries for the meaning of words, than for their structures or formations; and the words that most want explanation, are general-

ly terms of art; which, therefore, experience has taught my predecessors to spread with a kind of pompous luxuriance over their productions.

The academicians of France, indeed, rejected terms of science in their first essay, but found afterwards a necessity of relaxing the rigour of their determination; and, though they would not naturalize them at once by a single act, permitted them by degrees to settle themselves among the natives, with little opposition; and it would surely be no proof of judgment to imitate them in an error which they have now retracted, and deprive the book of its chief use, by scrupulous distinctions.

Of such words, however, all are not equally to be considered as parts of our language; for some of them are naturalized and incorporated, but others still continue aliens, and are rather auxiliaries than subjects. This naturalization is produced either by an admission into common speech, in some metaphorical signification, which is the acquisition of a kind of property among us; as we say, the *zenith* of advancement, the *meridian* of life, the *cynosure*\* of neighbouring eyes; or it is the consequence of long intermixture and frequent use, by which the ear is accustomed to the sound of words, till their original is forgotten, as in *equator*, *satellites*; or of the change of a foreign into an English termination, and a conformity to the laws of the speech into which they are adopted; as in *category*, *cachery*, *peripneumony*.

Of those which still continue in the state of aliens, and have made no approaches towards assimilation, some seem necessary to be retained: because the purchasers of the Dictionary will expect to find them. Such are many words in the common law, as *capias*, *habeas corpus*, *præmunire*, *nisi prius*: such are some terms of controversial divinity, as *hypostasis*; and of physic, as the names of diseases; and in general, all terms which can be found in books not written professedly upon particular arts, or can be supposed necessary to those who do not regularly study them. Thus, when a reader not skilled in physic, happens in Milton upon this line,

———pinning atrophy,  
Marasmus, and wide-wasting pestilence,

he will, with equal expectation, look into his dictionary for the word *marasmus*, as for *atrophy*, or *pestilence*; and will have reason to complain if he does not find it.

It seems necessary to the completion of a dictionary designed not merely for critics, but for popular use, that it should comprise, in some degree, the peculiar words of every profession; that the terms of war and navigation should be

\* Milton.

inserted, so far as they can be required by readers of travels and of history; and those of law, merchandise, and mechanical trades, so far as they can be supposed useful in the occurrences of common life.

But there ought, however, to be some distinction made between the different classes of words; and therefore it will be proper to print those which are incorporated into the language in the usual character, and those which are still to be considered as foreign, in the *italic* letter.

Another question may arise with regard to appellatives, or the names of species. It seems of no great use to set down the words *horse, dog, cat, willow, alder, daisy, rose*, and a thousand others, of which it will be hard to give an explanation, not more obscure than the word itself, yet it is to be considered, that, if the names of animals be inserted, we must admit those which are more known, as well as those with which we are, by accident, less acquainted; and if they are all rejected, how will the reader be relieved from difficulties produced by allusions to the crocodile, the chameleon, the ichneumon, and the hyena? If no plants are to be mentioned, the most pleasing part of nature will be excluded, and many beautiful epithets be unexplained. If only those which are less known are to be mentioned, who shall fix the limits of the reader's learning? The importance of such explications appears from the mistakes which the want of them has occasioned. Had Shakspeare had a dictionary of this kind, he had not made the *woodbine* entwine the *honeysuckle*; nor would Milton with such assistance, have disposed so improperly of his *elops* and his *scorpion*.

Besides, as such words, like others, require that their accents should be settled, their sounds ascertained, and their etymologies deduced, they cannot be properly omitted in the dictionary. And though the explanations of some may be censured as trivial, because they are almost universally understood; and those of others as unnecessary, because they will seldom occur; yet it seems not proper to omit them, since it is rather to be wished that many readers should find more than they expect, than that one should miss what he might hope to find.

When all the words are selected and arranged, the first part of the work to be considered is the orthography, which was long vague and uncertain; which at last when its fluctuation ceased, was in many cases settled but by accident; and in which, according to your lordship's observation, there is still great uncertainty among the best critics; nor is it easy to state a rule by which we may decide between custom and reason, or between the equiponderant authorities of writers alike eminent for judgment and accuracy.

The great orthographical contest has long subsisted between etymology and pronunciation. It has been demanded, on one hand, that men should write as they speak; but as it has been shown that this conformity never was attained in any language, and that it is not more easy to persuade men to agree exactly in speaking than in writing, it may be asked with equal propriety, why men do not rather speak as they write. In France, where this controversy was at its greatest height, neither party, however ardent, durst adhere steadily to their own rule; the etymologist was often forced to spell with the people; and the advocate for the authority of pronunciation found it sometimes deviating so capriciously from the received use of writing, that he was constrained to comply with the rule of his adversaries, lest he should lose the end by the means, and be left alone by following the crowd.

When a question of orthography is dubious, that practice has, in my opinion, a claim to preference which preserves the greatest number of radical letters, or seems most to comply with the general custom of our language. But the chief rule which I propose to follow is, to make no innovation, without a reason sufficient to balance the inconvenience of change; and such reasons I do not expect often to find. All change is of itself an evil, which ought not to be hazarded but for evident advantage; and as inconstancy is in every case a mark of weakness, it will add nothing to the reputation of our tongue. There are, indeed, some who despise the inconveniences of confusion, who seem to take pleasure in departing from custom, and to think alteration desirable for its own sake; and the reformation of our orthography, which these writers have attempted, should not pass without its due honours, but that I suppose they hold a singularity its own reward, or may dread the fascination of lavish praise.

The present usage of spelling, where the present usage can be distinguished, will, therefore, in this work be generally followed; yet there will be often occasion to observe, that it is in itself inaccurate, and tolerated rather than chosen; particularly when, by a change of one letter, or more, the meaning of a word is obscured; as in *farrier*, or *ferrier*, as it was formerly written, from *ferrum*, or *fer*; in *gibberish* for *gebrish*, the jargon of *Geber*, and his chemical followers, understood by none but their own tribe. It will be likewise sometimes proper to trace back the orthography of different ages, and show by what gradations the word departed from its original.

Closely connected with orthography is pronunciation, the stability of which is of great importance to the duration of a language, because the first change will naturally begin by corruptions in the living speech. The want of

certain rules for the pronunciation of former ages, has made us wholly ignorant of the metrical art of our ancient poets; and since those who study their sentiments regret the loss of their numbers, it is surely time to provide that the harmony of the moderns may be more permanent.

A new pronunciation will make almost a new speech; and therefore, since one great end of this undertaking is to fix the English language, care will be taken to determine the accentuation of all polysyllables by proper authorities, as it is one of those capricious phenomena which cannot be easily reduced to rules. Thus there is no antecedent reason for difference of accent in the words *dolorous* and *sonorous*; yet of the one Milton gives the sound in this line:

He pass'd o'er many a region dolorous;

and that of the other in this,

Sonorous metal blowing martial sounds.

It may likewise be proper to remark metrical licenses, such as contractions, *generous*, *gen'rous*; *reverend*, *rev'rend*; and coalitions, as *region*, *question*.

But it is still more necessary to fix the pronunciation of monosyllables, by placing with them words of correspondent sound, that one may guard the other against the danger of that variation, which, to some of the most common, has already happened; so that the words *wind* and *wind*, as they are now frequently pronounced, will not rhyme to *sound* and *mind*. It is to be remarked, that many words written alike are differently pronounced, as *flow* and *brow*: which may be thus registered, *flow*, *woe*; *brow*, *now*; or of which the exemplification may be generally given by a distich: thus the words *tear*, or lacerate, and *tear*, the water of the eye, have the same letters, but may be distinguished thus, *tear*, *dare*; *tear*, *peer*.

Some words have two sounds which may be equally admitted, as being equally defensible by authority. Thus *great* is differently used.

For *Swift* and him despised the farce of state,  
The sober follies of the wise and great. POPE.

As if misfortune made the throne her seat,  
And none could be unhappy but the great. ROWE.

The care of such minute particulars may be censured as trifling; but these particulars have not been thought unworthy of attention in more polished languages.

The accuracy of the French, in stating the sounds of their letters, is well known; and, among the Italians, Crescembeni has not thought it unnecessary to inform his countrymen of the words which, in compliance with different rhymes, are allowed to be differently spelt, and

of which the number is now so fixed, that no modern poet is suffered to increase it.

When the orthography and pronunciation are adjusted, the etymology or derivation is next to be considered, and the words are to be distinguished according to the different classes, whether simple, as *day*, *light*; or compound, as *day-light*; whether primitive, as, to *act*, or derivative, as *action*, *actionable*, *active*, *activity*. This will much facilitate the attainment of our language, which now stands in our dictionaries a confused heap of words without dependence, and without relation.

When this part of the work is performed, it will be necessary to inquire how our primitives are to be deduced from foreign languages, which may be often very successfully performed by the assistance of our own etymologists. This search will give occasion to many curious disquisitions, and sometimes perhaps to conjectures, which to readers unacquainted with this kind of study, cannot but appear improbable and capricious. But it may be reasonably imagined, that what is so much in the power of men as language, will very often be capriciously conducted. Nor are these disquisitions and conjectures to be considered altogether as wanton sports of wit, or vain shows of learning; our language is well-known not to be primitive or self-originated, but to have adopted words of every generation, and, either for the supply of its necessities, or the increase of its copiousness, to have received additions from very distant regions; so that in search of the progenitors of our speech, we may wander from the tropic to the frozen zone, and find some in the valleys of Palestine, and some upon the rocks of Norway.

Beside the derivation of particular words, there is likewise an etymology of phrases. Expressions are often taken from other languages; some apparently, as to *run a riske*, *courir un risque*; and some even when we do not seem to borrow their words; thus, to *bring about* or accomplish, appears an English phrase, but in reality our native word *about* has no such import, and is only a French expression, of which we have an example in the common phrase *venir à bout d'une affaire*.

In exhibiting the descent of our language, our etymologists seem to have been too lavish of their learning, having traced almost every word through various tongues, only to show what was shown sufficiently by the first derivation. This practice is of great use in synoptical lexicons, where mutilated and doubtful languages are explained by their affinity to others more certain and extensive, but is generally superfluous in English etymologies. When the word is easily deduced from a Saxon original, I shall not often inquire further, since we know not the parent of the Saxon dialect; but when it is borrowed from the French, I shall show

whence the French is apparently derived. Where a Saxon root cannot be found, the defect may be supplied from kindred languages, which will be generally furnished with much liberality by the writers of our glossaries; writers who deserve often the highest praise, both of judgment and industry, and may expect at least to be mentioned with honour by me, whom they have freed from the greatest part of a very laborious work, and on whom they have imposed, at worst, only the easy task of rejecting superfluities.

By tracing in this manner every word to its original, and not admitting, but with great caution, any of which no original can be found, we shall secure our language from being overrun with cant, from being crowded with low terms, the spawn of folly or affectation, which arise from no just principles of speech, and of which therefore no legitimate derivation can be shown.

When the etymology is thus adjusted, the analogy of our language is next to be considered; when we have discovered whence our words are derived, we are to examine by what rules they are governed, and how they are inflected through their various terminations. The terminations of the English are few, but those few have hitherto remained unregarded by the writers of our dictionaries. Our substantives are declined only by the plural termination, our adjectives admit no variation but in the degrees of comparison, and our verbs are conjugated by auxiliary words, and are only changed in the preter tense.

To our language may be with great justness applied the observation of Quintilian, that speech was not formed by an analogy sent from heaven. It did not descend to us in a state of uniformity and perfection, but was produced by necessity, and enlarged by accident, and is therefore composed of dissimilar parts, thrown together by negligence, by affectation, by learning, or by ignorance.

Our inflections therefore are by no means constant, but admit of numberless irregularities, which in this Dictionary will be diligently noted. Thus *fox* makes in the plural *foxes*, but *ox*, makes *oxen*. *Sheep* is the same in both numbers. Adjectives are sometimes compared by changing the last syllable, as *proud*, *prouder*, *proudest*: and sometimes by particles prefixed, as *ambitious*, *more ambitious*, *most ambitious*. The forms of our verbs are subject to great variety; some end their preter tense in *ed*, as *I love*, *I loved*, *I have loved*: which may be called the regular form, and is followed by most of our verbs of southern original. But many depart from this rule without agreeing in any other; as *I shake*, *I shook*, *I have shaken*, or *shook*, as it is sometimes written in poetry; *I make*, *I made*, *I have made*; *I bring*, *I brought*; *I wring*, *I wrung*; and many others, which, as

they cannot be reduced to rules, must be learned from the dictionary rather than the grammar.

The verbs are likewise to be distinguished according to their qualities, as actives from neuters; the neglect of which has already introduced some barbarities in our conversation, which if not obviated by just animadversions, may in time creep into our writings.

Thus, my Lord, will our language be laid down, distinct in its minutest subdivisions, and resolved into its elemental principles. And who upon this survey can forbear to wish, that these fundamental atoms of our speech might obtain the firmness and immutability of the primogenial and constituent particles of matter, that they might retain their substance, while they alter their appearance, and be varied and compounded, yet not destroyed.

But this is a privilege which words are scarcely to expect: for, like their author, when they are not gaining strength, they are generally losing it. Though art may sometimes prolong their duration, it will rarely give them perpetuity; and their changes will be almost always informing us, that language is the work of man, of a being from whom permanence and stability cannot be derived.

Words having been hitherto considered as separate and unconnected, are now to be likewise examined as they are ranged in their various relations to others by the rules of syntax or construction, to which I do not know that any regard has been yet shown in English dictionaries, and in which the grammarians can give little assistance. The syntax of this language is too inconsistent to be reduced to rules, and can be only learned by the distinct consideration of particular words, as they are used by the best authors. Thus, we say, according to the present modes of speech, The soldier died *of* his wounds, and the sailor perished *with* hunger: and every man acquainted with our language would be offended by a change of these particles, which yet seem originally assigned by chance, there being no reason to be drawn from grammar why a man may not, with equal propriety, be said to die *with* a wound, or perish *of* hunger.

Our syntax therefore is not to be taught by general rules, but by special precedents; and in examining whether Addison has been with justice accused of a solecism in this passage,

The poor inhabitant——

Starves in the midst of nature's bounty curst  
And in the loaded vineyard dies for thirst,

it is not in our power to have recourse to any established laws of speech; but we must remark how the writers of former ages have used the same word, and consider whether he can be acquitted of impropriety, upon the testi-

mony of Davies, given in his favour by a similar passage.

She loathes the watery glass wherein she gazed,  
And shuns it still, although for *thirst* she dyes.

When the construction of a word is explained, it is necessary to pursue it through its train of phraseology, through those forms where it is used in a manner peculiar to our language, or in senses not to be comprised in the general explanations; as from the verb *make* arise these phrases, to *make love*, to *make an end*, to *make way*; as, he *made way* for his followers, the ship *made way* before the wind; to *make a bed*, to *make merry*, to *make a mock*, to *make presents*, to *make a doubt*, to *make out an assertion*, to *make good a breach*, to *make good a cause*, to *make nothing* of an attempt, to *make lamentation*, to *make a merit*, and many others which will occur in reading with that view, and which only their frequency hinders from being generally remarked.

The great labour is yet to come, the labour of interpreting these words and phrases with brevity, fulness, and perspicuity; a task of which the extent and intricacy is sufficiently shown by the miscarriage of those who have generally attempted it. This difficulty is increased by the necessity of explaining the words in the same language, for there is often only one word for one idea; and though it be easy to translate the words *bright*, *sweet*, *salt*, *bitter*, into another language, it is not easy to explain them.

With regard to the interpretation, many other questions have required consideration. It was some time doubted whether it be necessary to explain the things implied by particular words; as under the term *baronet*, whether, instead of this explanation, *a title of honour next in degree to that of baron*, it would be better to mention more particularly the creation, privileges, and rank of baronets; and whether, under the word *barometer*, instead of being satisfied with observing that it is *an instrument to discover the weight of the air*, it would be fit to spend a few lines upon its invention, construction, and principles. It is not to be expected, that with the explanation of the one the herald should be satisfied, or the philosopher with that of the other; but since it will be required by common readers, that the explanations should be sufficient for common use; and since, without some attention to such demands, the Dictionary cannot become generally valuable, I have determined to consult the best writers for explanations real as well as verbal; and perhaps I may at last have reason to say, after one of the augmenters of Furetier, that my book is more learned than its author.

In explaining the general and popular language, it seems necessary to sort the several

senses of each word, and to exhibit first its natural and primitive signification; as,

To *arrive*, to reach the shore in a voyage: he *arrived* at a safe harbour.

Then to give its consequential meaning, to *arrive*, to reach any place, whether by land or sea; as, he *arrived* at his country seat.

Then its metaphorical sense, to obtain any thing desired; as, he *arrived* at a peerage.

Then to mention any observation that arises from the comparison of one meaning with another; as it may be remarked of the word *arrive*, that, in consequence of its original and etymological sense, it cannot be properly applied but to words signifying something desirable: thus we say, a man *arrived* at happiness; but cannot say, without a mixture of irony, he *arrived* at misery.

*Ground*, the earth, generally as opposed to the air or water. He swam till he reached *ground*. The bird fell to the *ground*.

Then follows the accidental or consequential signification in which *ground* implies any thing that lies under another; as, he laid colours upon a rough *ground*. The silk had blue flowers on a red *ground*.

Then the remoter or metaphorical signification; as, the *ground* of his opinion was a false computation. The *ground* of his work was his father's manuscript.

After having gone through the natural and figurative senses, it will be proper to subjoin the poetical sense of each word, where it differs from that which is in common use; as *wanton*, applied to any thing of which the motion is irregular without terror; as,

In *wanton* ringlets curl'd her hair.

To the poetical sense may succeed the familiar; as of *toast*, used to imply the person whose health is drank; as,

The wise man's passion and the vain man's *toast*.  
POPE.

The familiar may be followed by the burlesque; as of *mellow*, applied to good fellowship.

In all thy humours, whether grave or *mellow*.  
ADDISON.

Or of *bite*, used for *cheat*:

—More a dupe than wit,  
Sappho can tell you how this man was *bite*. POPE.

And lastly, may be produced the peculiar sense, in which a word is found in any great author; as *faculties*, in Shakspeare, signifies the powers of authority:

—This Duncan  
Has born his *faculties* so meek, has been  
So clear in his great office, that, &c.

The signification of adjectives may be often ascertained by uniting them to substantives; as, *simple swain*, *simple sheep*. Sometimes the sense of a substantive may be elucidated by the epithets annexed to it in good authors: as, the *boundless ocean*, the *open lawns*: and where such advantage can be gained by a short quotation, it is not to be omitted.

The difference of signification in words generally accounted synonymous, ought to be carefully observed; as in *pride*, *haughtiness*, *arrogance*: and the strict and critical meaning ought to be distinguished from that which is loose and popular; as in the word *perfection*, which, though in its philosophical and exact sense it can be of little use among human beings, is often so much degraded from its original signification, that the academicians have inserted in their work, the *perfection* of a language, and, with a little more licentiousness, might have prevailed on themselves to have added the *perfection* of a dictionary.

There are many other characters of words which it will be of use to mention. Some have both an active and passive signification; as *fearful*, that which gives or which feels terror; a *fearful prodigy*, a *fearful hare*. Some have a personal, some a real meaning; as in opposition to *old*, we use the adjective *young*, of animated beings, and *new* of other things. Some are restrained to the sense of praise, and others to that of disapprobation; so commonly, though not always, we *exhort* to good actions, we *instigate* to ill; we *animate*, *incite*, and *encourage* indifferently to good or bad. So we usually *ascribe* good but *impute* evil; yet neither the use of these words, nor, perhaps, of any other in our licentious language, is so established as not to be often reversed by the correctest writers. I shall therefore, since the rules of style, like those of law, arise from precedents often repeated, collect the testimonies on both sides, and endeavour to discover and promulgate the decrees of custom, who has so long possessed, whether by right or by usurpation, the sovereignty of words.

It is necessary likewise to explain many words by their opposition to others; for contraries are best seen when they stand together. Thus the verb *stand* has one sense, as opposed to *fall*, and another as opposed to *fly*; for want of attending to which distinction, obvious as it is, the learned Dr. Bentley has squandered his criticism to no purpose, on these lines of *Paradise Lost*:

— In heaps

Chariot and charioteer lay overturn'd,  
And fiery foaming steeds. What *stood*, *recoild*,  
O'erwearied, through the faint satanic host,  
Defensive scarce, or with pale fear surprised,  
*Fled* ignominious —

"Here," says the critic, "as the sentence is now read, we find that what *stood*, *fled*:" and therefore he proposes an alteration, which he might have spared if he had consulted a dictionary, and found that nothing more was affirmed than that those *fled* who did not *fall*.

In explaining such meanings as seem accidental and adventitious, I shall endeavour to give an account of the means by which they were introduced. Thus, to *eke out* any thing, signifies to lengthen it beyond its just dimensions, by some low artifice; because the word *eke* was the usual refuge of our old writers, when they wanted a syllable. And *buwom*, which means only *obedient*, is now made, in familiar phrases, to stand for *wanton*; because in an ancient form of marriage, before the Reformation, the bride promised complaisance and obedience, in these terms; "I will be *bonair* and *buwom* in bed and at board."

I know well, my Lord, how trifling many of these remarks will appear separately considered, and how easily they may give occasion to the contemptuous merriment of sportive illeness, and the gloomy censures of arrogant stupidity; but dulness it is easy to despise, and laughter it is easy to repay. I shall not be solicitous what is thought of my work by such as know not the difficulty or importance of philological studies; nor shall think those that have done nothing, qualified to condemn me for doing little. It may not, however, be improper to remind them, that no terrestrial greatness is more than an aggregate of little things; and to inculcate, after the Arabian proverb, that drops, added to drops, constitute the ocean.

There remains yet to be considered the distribution of words into their proper classes, or that part of lexicography which is strictly critical.

The popular part of the language, which includes all words not appropriated to particular sciences, admits of many distinctions and subdivisions; as, into words of general use, words employed chiefly in poetry, words obsolete, words which are admitted only by particular writers, yet not in themselves improper; words used only in burlesque writing; and words impure and barbarous.

Words of general use will be known by having no sign of particularity, and their various senses will be supported by authorities of all ages.

The words appropriated to poetry will be distinguished by some mark prefixed, or will be known by having no authorities but those of poets.

Of antiquated or obsolete words, none will be inserted but such as are to be found in authors who wrote since the accession of Elizabeth, from which we date the golden age of our language; and of these many might be omitted, but that

the reader may require, with an appearance of reason, that no difficulty should be left unresolved in books which he finds himself invited to read, as confessed and established models of style. These will be likewise pointed out by some note of exclusion, but not of disgrace.

The words which are found only in particular books, will be known by the single name of him that has used them; but such will be omitted, unless either their propriety, elegance, or force, or the reputation of their authors, affords some extraordinary reason for their reception.

Words used in burlesque and familiar compositions, will be likewise mentioned with their proper authorities; such as *dudgeon*, from Butler, and *lesing*, from Prior; and will be diligently characterised by marks of distinction.

Barbarous, or impure words and expressions may be branded with some note of infamy, as they are carefully to be eradicated wherever they are found; and they occur too frequently even in the best writers; as in Pope,

— in endless error hurl'd.

'Tis these that early taint the female soul.

In Addison:

Attend to what a *lesser* muse incites.

And in Dryden,

A dreadful quiet felt, and *worser* far  
Than arms ———

If this part of the Work can be well performed, it will be equivalent to the proposal made by Boileau to the academicians, that they should review all their polite writers, and correct such impurities as might be found in them, that their authority might not contribute at any distant time, to the depravation of the language.

With regard to questions of purity or propriety, I was once in doubt whether I should not attribute too much to myself, in attempting to decide them, and whether my province was to extend beyond the proposition of the question, and the display of the suffrages on each side; but I have been since determined, by your Lordship's opinion, to interpose my own judgment, and shall therefore endeavour to support what appears to me most consonant to grammar and reason. Ausonius thought that modesty forbade him to plead inability for a task to which Cæsar had judged him equal.

*Cur me posse negem, posse quod ille putat?*

And I may hope, my Lord, that since you, whose authority in our language is so generally acknowledged, have commissioned me to declare my own opinion, I shall be considered as exercising a kind of vicarious jurisdiction, and that the power which might have been denied to my

own claim, will be readily allowed me as the delegate of your Lordship.

In citing authorities, on which the credit of every part of this Work must depend, it will be proper to observe some obvious rules: such as of preferring writers of the first reputation to those of an inferior rank; of noting the quotations with accuracy; and of selecting, when it can be conveniently done, such sentences, as, besides their immediate use, may give pleasure or instruction, by conveying some elegance of language, or some precept of prudence, or piety.

It has been asked, on some occasions, who shall judge the judges? And since, with regard to this design, a question may arise by what authority the authorities are selected, it is necessary to obviate it, by declaring that many of the writers whose testimonies will be alleged, were selected by Mr. Pope; of whom I may be justified in affirming, that were he still alive, solicitous as he was for the success of this work, he would not be displeased that I have undertaken it.

It will be proper that the quotations be ranged according to the ages of their authors; and it will afford an agreeable amusement, if to the words and phrases which are not of our own growth, the name of the writer who first introduced them can be affixed; and if to words which are now antiquated, the authority be subjoined of him who last admitted them. Thus, for *scathe* and *buxom*, now obsolete, Milton may be cited,

—— The mountain oak  
Stands *scathed* to heaven ———  
—— He with broad sails  
Winnow'd the *buxom* air ———

By this method every word will have its history, and the reader will be informed of the gradual changes of the language, and have before his eyes the rise of some words, and the fall of others. But observations so minute and accurate are to be desired, rather than expected; and if use be carefully supplied, curiosity must sometimes bear its disappointments.

This, my Lord, is my idea of an English Dictionary; a dictionary by which the pronunciation of our language may be fixed, and its attainment facilitated; by which its purity may be preserved, its use ascertained, and its duration lengthened. And though, perhaps, to correct the language of nations by books of grammar, and amend their manners by discourses of morality, may be tasks equally difficult; yet, as it is unavoidable to wish, it is natural likewise to hope that your Lordship's patronage may not be wholly lost; that it may contribute to the preservation of ancient, and the improvement of modern writers; that it may promote the reformation of those translators, who, for want of

understanding the characteristic difference of tongues, have formed a chaotic dialect of heterogeneous phrases; and awoken to the care of purer diction some men of genius, whose attention to argument makes them negligent of style, or whose rapid imagination, like the Peruvian torrents, when it brings down gold mingles it with sand.

When I survey the Plan which I have laid before you, I cannot, my Lord, but confess, that I am frightened at its extent, and, like the soldiers of Cæsar, look on Britain as a new world, which it is almost madness to invade. But I hope, that though I should not complete the conquest, I shall at least discover the coast, civilize part of the inhabitants, and make it easy for some other adventurer to proceed farther, to reduce them wholly to subjection, and settle them under laws.

We are taught by the great Roman orator, that every man should propose to himself the highest degree of excellence, but that he may stop with honour at the second or third: though therefore my performance should fall below the excellence of other dictionaries, I may obtain, at least, the praise of having endeavoured well; nor shall I think it any reproach to my diligence, that I have retired without a triumph,

from a contest with united academies, and long successions of learned compilers. I cannot hope, in the warmest moments, to preserve so much caution through so long a work, as not often to sink into negligence, or to obtain so much knowledge of all its parts as not frequently to fail by ignorance. I expect that sometimes the desire of accuracy will urge me to superfluities, and sometimes the fear of prolixity betray me to omissions: that in the extent of such variety, I shall be often bewildered; and in the mazes of such intricacy, be frequently entangled; that in one part refinement will be subtilized beyond exactness, and evidence dilated in another beyond perspicuity. Yet I do not despair of approbation from those who, knowing the uncertainty of conjecture, the scantiness of knowledge, the fallibility of memory, and the unsteadiness of attention, can compare the causes of error with the means of avoiding it, and the extent of art with the capacity of man; and whatever be the event of my endeavours, I shall not easily regret an attempt which has procured me the honour of appearing thus publicly,

My Lord,

Your Lordship's most obedient

and most humble servant,

SAM. JOHNSON

## PREFACE

TO THE

## ENGLISH DICTIONARY.

It is the fate of those who toil at the lower employments of life, to be rather driven by the fear of evil, than attracted by the prospect of good; to be exposed to censure, without hope of praise; to be disgraced by miscarriage, or punished for neglect, where success would have been without applause, and diligence without reward.

Among these unhappy mortals is the writer of dictionaries; whom mankind have considered, not as the pupil, but the slave of science, the pioneer of literature, doomed only to remove rubbish and clear obstructions from the paths through which Learning and Genius press forward to conquest and glory, without bestowing a smile on the humble drudge that facilitates

their progress. Every other author may aspire to praise; the lexicographer can only hope to escape reproach, and even this negative recompense has been yet granted to very few.

I have, notwithstanding this discouragement, attempted a Dictionary of the English Language, which, while it was employed in the cultivation of every species of literature, has itself been hitherto neglected; suffered to spread under the direction of chance, into wild exuberance; resigned to the tyranny of time and fashion; and exposed to the corruptions of ignorance and caprices of innovation.

When I took the first survey of my undertaking, I found our speech copious without order, and energetic without rule; wherever I

turned my view, there was perplexity to be disentangled and confusion to be regulated; choice was to be made out of boundless variety, without any established principle of selection; adulterations were to be detected, without a settled test of purity; and modes of expression to be rejected or received, without the suffrages of any writers of classical reputation or acknowledged authority.

Having therefore no assistance but from general grammar, I applied myself to the perusal of our writers; and noting whatever might be of use to ascertain or illustrate any word or phrase, accumulated in time the materials of a dictionary, which, by degrees, I reduced to method, establishing to myself, in the progress of the work, such rules as experience and analogy suggested to me; experience, which practice and observation were continually increasing; and analogy, which, though in some words obscure, was evident in others.

In adjusting the *Orthography*, which has been to this time unsettled and fortuitous, I found it necessary to distinguish those irregularities that are inherent in our tongue, and perhaps coeval with it, from others which the ignorance or negligence of later writers has produced. Every language has its anomalies, which though inconvenient, and in themselves once unnecessary, must be tolerated among the imperfections of human things, and which require only to be registered, that they may not be increased, and ascertained that they may not be confounded; but every language has likewise its improprieties and absurdities, which it is the duty of the lexicographer to correct or proscribe.

As language was at its beginning merely oral, all words of necessary or common use were spoken before they were written; and while they were unfixed by any visible signs, must have been spoken with great diversity, as we now observe those who cannot read to catch sounds imperfectly, and utter them negligently. When this wild and barbarous jargon was first reduced to an alphabet, every penman endeavoured to express, as he could, the sounds which he was accustomed to pronounce or to receive, and vitiated in writing such words as were already vitiated in speech. The powers of the letters, when they were applied to a new language, must have been vague and unsettled, and therefore different hands would exhibit the same sound by different combinations.

From this uncertain pronunciation arise in a great part the various dialects of the same country, which will always be observed to grow fewer, and less different, as books are multiplied; and from this arbitrary representation of sounds by letters proceeds that diversity of spelling, observable in the Saxon remains, and I suppose in the first books of every nation, which perplexes or destroys analogy, and produces

anomalous formations, which, being once incorporated, can never be afterwards dismissed or reformed.

Of this kind are the derivatives *length* from *long*, *strength* from *strong*, *darling* from *dear*, *breadth* from *broad*, from *dry*, *drought*, and from *high*, *height*, which Milton, in zeal for analogy, writes *highth*: *Quid te exempta juvat spinis de pluribus una*? to change all would be too much, and to change one is nothing.

This uncertainty is most frequent in the vowels, which are so capriciously pronounced, and so differently modified, by accident or affection, not only in every province, but in every mouth, that to them, as is well known to etymologists, little regard is to be shown in the deduction of one language from another.

Such defects are not errors in orthography, but spots of barbarity impressed so deep in the English language, that criticism can never wash them away; these, therefore, must be permitted to remain untouched; but many words have likewise been altered by accident, or depraved by ignorance, as the pronunciation of the vulgar has been weakly followed; and some still continue to be variously written, as authors differ in their care or skill: of these it was proper to inquire the true orthography, which I have always considered as depending on their derivation, and have therefore referred them to their original languages; thus I write *enchant*, *enchantment*, *enchanter*, after the French, and *incantation* after the Latin: thus *entire* is chosen rather than *intire*, because it passed to us not from the Latin *integer*, but from the French *entier*.

Of many words it is difficult to say whether they were immediately received from the Latin or the French, since at the time when we had dominions in France, we had Latin service in our churches. It is, however, my opinion, that the French generally supplied us; for we have few Latin words, among the terms of domestic use, which are not French; but many French, which are very remote from Latin.

Even in words of which the derivation is apparent, I have been often obliged to sacrifice uniformity to custom; thus I write, in compliance with a numberless majority, *convey* and *inweigh*, *deceit* and *receipt*, *fancy* and *phantom*; sometimes the derivative varies from the primitive, as *explain* and *explanation*, *repeat* and *repetition*.

Some combinations of letters having the same power, are used indifferently without any discoverable reason of choice, as in *choak*, *choke*, *soap*, *sope*; *fewel*, *fuel*, and many others; which I have sometimes inserted twice, that those who search for them under either form, may not search in vain.

In examining the orthography of any doubtful word, the mode of spelling by which it is

inserted in the series of the dictionary, is to be considered as that to which I give, perhaps not often rashly, the preference. I have left, in the examples, to every author his own practice unmolested, that the reader may balance suffrages, and judge between us; but this question is not always to be determined by reputed or by real learning; some men, intent upon greater things, have thought little on sounds and derivations; some, knowing in the ancient tongues, have neglected those in which our words are commonly to be sought. Thus Hammond writes *feasibleness* for *feasibleness*, because I suppose he imagined it derived immediately from the Latin; and some words, such as *dependant*, *dependent*; *dependance*, *dependence*, vary their final syllable, as one or other language is present to the writer.

In this part of the work, where caprice has long wanted without control, and vanity sought praise by petty reformation, I have endeavoured to proceed with a scholar's reverence for antiquity, and a grammarian's regard to the genius of our tongue. I have attempted few alterations, and among those few, perhaps the greater part is from the modern to the ancient practice; and I hope I may be allowed to recommend to those, whose thoughts have been perhaps employed too anxiously on verbal singularities, not to disturb, upon narrow views, or for minute propriety, the orthography of their fathers. It has been asserted, that for the law to be *known*, is of more importance than to be *right*. "Change," says Hooker, "is not made without inconvenience, even from worse to better." There is in constancy and stability a general and lasting advantage, which will always overbalance the slow improvements of gradual correction. Much less ought our written language to comply with the corruptions of oral utterance, or copy that which every variation of time or place makes different from itself, and imitate those changes, which will again be changed, while imitation is employed in observing them.

This recommendation of steadiness and uniformity does not proceed from an opinion that particular combinations of letters have much influence on human happiness; or that truth may not be successfully taught by modes of spelling fanciful and erroneous; I am not yet so lost in lexicography as to forget that *words are the daughters of earth, and that things are the sons of heaven*. Language is only the instrument of science, and words are but the signs of ideas; I wish, however, that the instrument might be less apt to decay, and that signs might be permanent, like the things which they denote.

In settling the orthography, I have not wholly neglected the pronunciation, which I have directed, by printing an accent upon the acute or elevated syllable. It will sometimes be found

that the accent is placed by the author quoted, on a different syllable from that marked in the alphabetical series; it is then to be understood, that custom has varied, or that the author has, in my opinion, pronounced wrong. Short directions are sometimes given where the sound of letters is irregular; and if they are sometimes omitted, defect in such minute observations will be more easily excused, than superfluity.

In the investigation both of the orthography and signification of words, their *Etymology* was necessarily to be considered, and they were therefore to be divided into primitives and derivatives. A primitive word, is that which can be traced no further to any English root; thus *circumspect*, *circumvent*, *circumstance*, *delude*, *concave*, and *complicate*, though compounds in the Latin, are to us primitives. Derivatives, are all those that can be referred to any word in English of greater simplicity.

The derivatives I have referred to their primitives, with an accuracy sometimes needless; for who does not see that *remoteness* comes from *remote*, *lovely* from *love*, *concavity* from *concave*, and *demonstrative* from *demonstrate*? But this grammatical exuberance the scheme of my work did not allow me to repress. It is of great importance, in examining the general fabric of a language, to trace one word from another, by noting the usual modes of derivation and inflection; and uniformity must be preserved in systematical works; though sometimes at the expense of particular propriety.

Among other derivatives I have been careful to insert and elucidate the anomalous plurals of nouns and preterites of verbs, which in the Teutonic dialects are very frequent, and, though familiar to those who have always used them, interrupt and embarrass the learners of our language.

The two languages from which our primitives have been derived are the Roman and Teutonic: under the Roman I comprehend the French and provincial tongues; and under the Teutonic range the Saxon, German, and all their kindred dialects. Most of our polysyllables are Roman, and our words of one syllable are very often Teutonic.

In assigning the Roman original, it has perhaps sometimes happened that I have mentioned only the Latin, when the word was borrowed from the French; and considering myself as employed only in the illustration of my own language, I have not been very careful to observe whether the Latin word be pure or barbarous, or the French elegant or obsolete.

For the Teutonic etymologies, I am commonly indebted to Junius and Skinner, the only names which I have forborne to quote when I copied their books; not that I might appropriate their labours or usurp their honours; but that I might spare a perpetual repetition by one gene-

ral acknowledgment. Of these, whom I ought not to mention but with the reverence due to instructors and benefactors, Junius appears to have excelled in extent of learning, and Skinner in rectitude of understanding. Junius was accurately skilled in all the northern languages, Skinner probably examined the ancient and remoter dialects only by occasional inspection into dictionaries; but the learning of Junius is often of no other use than to show him a track by which he may deviate from his purpose, to which Skinner always presses forward by the shortest way. Skinner is often ignorant, but never ridiculous: Junius is always full of knowledge; but his variety distracts his judgment, and his learning is very frequently disgraced by his absurdities.

The votaries of the northern muses will not perhaps easily restrain their indignation, when they find the name of Junius thus degraded by a disadvantageous comparison; but whatever reverence is due to his diligence, or his attainments, it can be no criminal degree of censoriousness to charge that etymologist with want of judgment, who can seriously derive *dream* from *drama*, because *life is a drama*, and *a drama is a dream*; and who declares with a tone of defiance, that no man can fail to derive *moan* from *monos*, *single* or *solitary*, who considers, that grief naturally loves to be alone.\*

\* That I may not appear to have spoken too irreverently of *Junius*, I have here subjoined a few specimens of his etymological extravagance.

BANISH, *reigare, ex banno vel territorio exigere, in exilium agere*. G. bannir. It. *bandire, bandeggiare*. H. *bandir*. B. bannen. Ævi medi scriptores bannire dicebant. V. Spelm. in Bannum et in Banleuga. Quoniam verò regionem urbium; limites arduis plerumq; montibus, altis fluminibus, longis deniq; flexuosisq; angustissimarum viarum amfractibus includebantur, fieri potest id genus limites *bann* dici ab eo quod *Bannātes* et *Bannartes* Tarentinis olim, sicuti tradit Hesychius, vocabantur *αἱ λαοὶ καὶ μὴ ἰδρυμένοι ὁδοί*, "oblique ac minime in rectum tendentes viæ." Ac fortasse quoque huc facit quod *Banades*, eodem Hesychio teste, dicebant *ἐν στεγασμένῳ*, montes arduos.

EMTIG, *emtic, vacuus, inanis*. A. S. Æmtig. Nescio an sint ab *ἐμῶν* vel *ἐμῶν*. Vomo, evomo, vomit evacuo. Videtur interim etymologiam hanc non obscurè firmare codex Rush. Mat. xii. 44. ubi antiquè scriptum invenimus, A. S. gemoeted lit emetig. "Invenit eam vacantem."

HILL, *mons, collis*. A. S. hyll. Quod videri potest abscissum ex *κόλλην* vel *κόλλης*. Collis, tumulus, locus in plano editior. Hom. U. β. v. 811. *ὄρεα δὲ πρὸς ἀπὸ τοῦ πλάτους αἰπῶνα κόλλην*. Ubi auctori brevium scholiorum *κόλλην* exp. *τόπος εἰς ὃν οὐκ ἐπὶ ὁρῶν γένηται ἰσχυρὰ*.

NAP, *to take a nap. Dormire, condormiscere*. Cym, heppian. A. S. huxppan. Quod postremum videri potest desumptum ex *πνίφας*, obscuritas, tenebræ: nihil enim æque solet conciliare somnum, quàm caliginosa profunde noctis obscuritas.

Our knowledge of the northern literature is so scanty, that of words undoubtedly Teutonic, the original is not always to be found in any ancient language; and I have therefore inserted Dutch or German substitutes, which I consider not as radical, but parallel, not as the parents, but sisters of the English.

The words which are represented as thus related by descent or cognation, do not always agree in sense; for it is incident to words, as to their authors, to degenerate from their ancestors, and to change their manners when they change their country. It is sufficient, in etymological inquiries, if the senses of kindred words be found such as may easily pass into each other, or such as may both be referred to one general idea.

The etymology, so far as it is yet known, was easily found in the volumes, where it is particularly and professedly delivered; and, by proper attention to the rules of derivation, the orthography was soon adjusted. But to collect the Words of our language, was a task of greater difficulty: the deficiency of dictionaries, was immediately apparent; and when they were exhausted, what was yet wanting must be sought by fortuitous and unguided excursions into books, and gleaned as industry should find, or chance should offer it, in the boundless chaos of a living speech. My search, however, has been either skilful or lucky; for I have much augmented the vocabulary.

As my design was a dictionary, common or appellative, I have omitted all words which have relation to proper names; such as *Arian*, *Socinian*, *Calvinist*, *Benedictine*, *Mahometan*; but have retained those of a more general nature, as *Heathen*, *Pagan*.

Of the terms of art I have received such as could be found either in books of science or technical dictionaries; and have often inserted, from philosophical writers, words which are supported perhaps only by a single authority, and which being not admitted into general use, stand yet as candidates or probationers, and must depend for their adoption on the suffrage of futurity.

The words which our authors have introduced by their knowledge of foreign languages, or ignorance of their own, by vanity or wantonness, by compliance with fashion or lust of innovation, I have registered as they occurred, though commonly only to censure them, and warn others against the folly of naturalizing useless foreigners to the injury of the natives.

STAMMERER, balbus, blæsus. Goth. STAMMS. A. S. stamer stamur. D. stam. B. stameler. Su. stamma. Isl. stamm. Sunt a *στανμῶν* vel *στανμῶν*, nimis loquacitate alios offendere; quod impedit loquentes libentissimè garrere soleant; vel quod aliis nimis semper videantur, etiam parçissimè loquentes.

I have not rejected any by design, merely because they were unnecessary or exuberant; but have received those which by different writers have been differently formed, as *viscid*, and *viscidily*, *viscous*, and *viscosity*.

Compounded or double words I have seldom noted, except when they obtain a signification different from that which the components have in their simple state. Thus *highwayman*, *woodman*, and *horsecourser*, require an explanation; but of *thieflike*, or *coachdriver*, no notice was needed, because the primitives contain the meaning of the compounds.

Words arbitrarily formed by a constant and settled analogy, like diminutive adjectives in *ish*, as *greenish*, *bluish*; adverbs in *ly*, as *dully*, *openly*; substantives in *ness*, as *vileness*, *faultiness*; were less diligently sought, and many sometimes have been omitted, when I had no authority that invited me to insert them; not that they are not genuine and regular offsprings of English roots, but because their relation to the primitive being always the same, their signification cannot be mistaken.

The verbal nouns in *ing*, such as the *keeping* of the *castle*, the *leading* of the *army*, are always neglected, or placed only to illustrate the sense of the verb, except when they signify things as well as actions, and have therefore a plural number, as *dwelling*, *living*; or have an absolute and abstract signification, as *colouring*, *painting*, *learning*.

The participles are likewise omitted, unless, by signifying rather habit or quality than action, they take the nature of adjectives, as a *thinking* man, a man of prudence; a *pacing* horse, a horse that can pace: these I have ventured to call *participial adjectives*. But neither are these always inserted, because they are commonly to be understood without any danger of mistake, by consulting the verb.

Obsolete words are admitted when they are found in authors not obsolete, or when they have any force or beauty that may deserve revival.

As composition is one of the chief characteristics of a language, I have endeavoured to make some reparation for the universal negligence of my predecessors, by inserting great numbers of compounded words, as may be found under *after*, *fore*, *new*, *night*, *fair*, and many more. These, numerous as they are, might be multiplied, but that use and curiosity are here satisfied, and the frame of our language and modes of our combination amply discovered.

Of some forms of composition, such as that by which *re* is prefixed to note repetition, and *un* to signify *contrariety* or *privation*, all the examples cannot be accumulated, because the use of these particles, if not wholly arbitrary, is so little limited, that they are hourly affixed to new

words as occasion requires, or is imagined to require them.

There is another kind of composition more frequent in our language than perhaps in any other, from which arises to foreigners the greatest difficulty. We modify the signification of many verbs by a particle subjoined; as to *come off*, to escape by a fetch; to *fall on*, to attack; to *fall off*, to apostatize; to *break off*, to stop abruptly; to *bear out*, to justify; to *fall in*, to comply; to *give over*, to cease; to *set off*, to embellish; to *set in*, to begin a continual tenour; to *set out*, to begin a course or journey; to *take off*, to copy; with innumerable expressions of the same kind, of which some appear wildly irregular, being so far distant from the sense of the simple words, that no sagacity will be able to trace the steps by which they arrived at the present use. These I have noted with great care; and though I cannot flatter myself that the collection is complete, I believe I have so far assisted the students of our language that this kind of phraseology will be no longer insuperable; and the combinations of verbs and particles, by chance omitted, will be easily explained by comparison with those that may be found.

Many words yet stand supported only by the name of Bailey, Ainsworth, Philips, or the contracted *Dict.* for Dictionaries, subjoined; of these I am not always certain that they are read in any book but the works of lexicographers. Of such I have omitted many, because I had never read them; and many I have inserted, because they may perhaps exist, though they have escaped my notice: they are, however, to be yet considered as resting only upon the credit of former dictionaries. Others, which I considered as useful, or know to be proper, though I could not at present support them by authorities, I have suffered to stand upon my own attestation, claiming the same privilege with my predecessors, of being sometimes credited without proof.

The words, thus selected and disposed, are grammatically considered; they are referred to the different parts of speech; traced when they are irregularly inflected, through their various terminations; and illustrated by observations, not indeed of great or striking importance, separately considered, but necessary to the elucidation of our language, and hitherto neglected or forgotten by English grammarians.

That part of my work, on which I expect malignity most frequently to fasten, is the *explanation*; in which I cannot hope to satisfy those, who are perhaps not inclined to be pleased, since I have not always been able to satisfy myself. To interpret a language by itself, is very difficult; many words cannot be explained by synonyms, because the idea signified by them has

not more than one appellation; nor by paraphrase, because simple ideas cannot be described. When the nature of things is unknown, or the notion unsettled and indefinite, and various in various minds, the words by which such notions are conveyed, or such things denoted, will be ambiguous and perplexed. And such is the fate of hapless lexicography, that not only darkness, but light, impedes and distresses it; things may be not only too little, but too much known, to be happily illustrated. To explain, requires the use of terms less abstruse than that which is to be explained, and such terms cannot always be found; for as nothing can be proved but by supposing something intuitively known, and evident without proof, so nothing can be defined but by the use of words too plain to admit a definition.

Other words there are, of which the sense is too subtle and evanescent to be fixed in a paraphrase; such are all those which are by the grammarians termed expletives, and in dead languages are suffered to pass for empty sounds, of no other use than to fill a verse, or to modulate a period, but which are easily perceived in living tongues to have power and emphasis, though it be sometimes such as no other form of expression can convey.

My labour has likewise been much increased by a class of verbs too frequent in the English language, of which the signification is so loose and general, the use so vague and indeterminate, and the senses detorted so widely from the first idea, that it is hard to trace them through the maze of variation, to catch them on the brink of utter inanity, to circumscribe them by any limitations, or interpret them by any words of distinct and settled meaning; such are *bear, break, come, cast, full, get, give, do, put, set, go, run, make, take, turn, throw*. If of these the whole power is not accurately delivered, it must be remembered, that while our language is yet living, and variable by the caprice of every one that speaks it, these words are hourly shifting their relations, and can no more be ascertained in a dictionary, than a grove, in the agitation of a storm, can be accurately delineated from its picture in the water.

The particles are among all nations applied with so great latitude, that they are not easily reducible under any regular scheme of explanation; this difficulty is not less, nor perhaps greater in English, than in other languages. I have laboured them with diligence, I hope with success; such at least as can be expected in a task, which no man, however learned or sagacious, has yet been able to perform.

Some words there are which I cannot explain, because I do not understand them; these might have been omitted very often with little inconvenience, but I would not so far indulge my vanity as to decline this confession; for

when Tully owns himself ignorant whether *lessus*, in the twelve tables, means a *funeral song* or *mourning garment*; and Aristotle doubts whether *obesus* in the Iliad signifies a *mule* or *muleteer*, I may surely, without shame, leave some obscurities to happier industry, or future information.

The rigour of interpretative lexicography requires that the explanation and the word explained should be always reciprocal; this I have always endeavoured, but could not always attain. Words are seldom exactly synonymous; a new term was not introduced, but because the former was thought inadequate; names, therefore, have often many ideas, but few ideas have many names. It was then necessary to use the proximate word, for the deficiency of single terms can very seldom be supplied by circumlocution; nor is the inconvenience great of such mutilated interpretations, because the sense may easily be collected entire from the examples.

In every word of extensive use, it was requisite to mark the progress of its meaning, and show by what gradations of intermediate sense it has passed from its primitive to its remote and accidental signification; so that every foregoing explanation should tend to that which follows, and the series be regularly concatenated from the first notion to the last.

This is specious, but not always practicable; kindred senses may be so interwoven, that the perplexity cannot be disentangled, nor any reason be assigned why one should be ranged before the other. When the radical idea branches out into parallel ramifications, how can a consecutive series be formed of senses in their nature collateral? The shades of meaning sometimes pass imperceptibly into each other, so that though on one side they apparently differ, yet it is impossible to mark the point of contact. Ideas of the same race, though not exactly alike, are sometimes so little different, that no words can express the dissimilitude, though the mind easily perceives it when they are exhibited together; and sometimes there is such a confusion of acceptations, that discernment is wearied, and distinction puzzled, and perseverance herself hurries to an end, by crowding together what she cannot separate.

These complaints of difficulty will, by those that have never considered words beyond their popular use, be thought only the jargon of a man willing to magnify his labours, and procure veneration to his studies by involution and obscurity. But every art is obscure to those that have not learned it; this uncertainty of terms, and commixture of ideas, is well known to those who have joined philosophy with grammar; and if I have not expressed them very clearly, it must be remembered that I am speaking of that which words are insufficient to explain.

The original sense of words is often driven out of use by their metaphorical acceptations, yet must be inserted for the sake of a regular origination. Thus I know not whether *ardour* is used for *material heat*, or whether, *flagrant*, in English, ever signifies the same with *burning*; yet such are the primitive ideas of these words, which are therefore set first, though without examples, that the figurative senses may be commodiously deduced.

Such is the exuberance of signification which many words have obtained, that it was scarcely possible to collect all their senses; sometimes the meaning of derivatives must be sought in the mother term, and sometimes deficient explanations of the primitive may be supplied in the train of derivation. In any case of doubt or difficulty, it will be always proper to examine all the words of the same race; for some words are slightly passed over to avoid repetition, some admitted easier and clearer explanation than others, and all will be better understood, as they are considered in greater variety of structures and relations.

All the interpretations of words are not written with the same skill, or the same happiness: things equally easy in themselves, are not all equally easy to any single mind. Every writer of a long work commits errors, where there appears neither ambiguity to mislead, nor obscurity to confound him; and in a search like this, many felicities of expression will be casually overlooked, many convenient parallels will be forgotten, and many particulars will admit improvement from a mind utterly unequal to the whole performance.

But many seeming faults are to be imputed rather to the nature of the undertaking than the negligence of the performer. Thus some explanations are unavoidably reciprocal or circular, as *hind*, the female of the stag; *stag*, the male of the hind: sometimes easier words are changed into harder, as, *burial* into *sepulchre* or *interment*, *drier* into *desiccative*, *dryness* into *siccity* or *aridity*, *fit* into *paroxysm*; for the easiest word, whatever it be, can never be translated into one more easy. But easiness and difficulty are merely relative; and if the present prevalence of our language should invite foreigners to this Dictionary, many will be assisted by those words which now seem only to increase or produce obscurity. For this reason I have endeavoured frequently to join a Teutonic and Roman interpretation, as to *cheer*, to *gladden*, or *exhilarate*, that every learner of English may be assisted by his own tongue.

The solution of all difficulties, and the supply of all defects, must be sought in the examples, subjoined to the various senses of each word, and ranged according to the time of their authors.

When I first collected these authorities, I was

desirous that every quotation should be useful to some other end than the illustration of a word; I therefore extracted from philosophers, principles of science; from historians, remarkable facts; from chemists, complete processes; from divines, striking exhortations; and from poets, beautiful descriptions. Such is design, while it is yet at a distance from execution. When the time called upon me to range this accumulation of elegance and wisdom into an alphabetical series, I soon discovered that the bulk of my volumes would fright away the student, and was forced to depart from my scheme of including all that was pleasing or useful in English literature, and reduce my transcripts very often to clusters of words, in which scarcely any meaning is retained; thus to the weariness of copying, I was condemned to add the vexation of expunging. Some passages I have yet spared, which may relieve the labour of verbal searches, and intersperse with verdure and flowers the dusty deserts of barren philology.

The examples, thus mutilated, are no longer to be considered as conveying the sentiments or doctrine of their authors; the word for the sake of which they are inserted, with all its appendant clauses, has been carefully preserved; but it may sometimes happen, by hasty detraction, that the general tendency of the sentence may be changed; the divine may desert his tenets, or the philosopher his system.

Some of the examples have been taken from writers who were never mentioned as masters of elegance, or models of style; but words must be sought where they are used; and in what pages, eminent for purity, can terms of manufacture or agriculture be found? Many quotations serve no other purpose than that of proving the bare existence of words, and are therefore selected with less scrupulousness than those which are to teach their structures and relations.

My purpose was to admit no testimony of living authors, that I might not be misled by partiality, and that none of my contemporaries might have reason to complain; nor have I departed from this resolution, but when some performance of uncommon excellence excited my veneration, when my memory supplied me, from late books, with an example that was wanting, or when my heart, in the tenderness of friendship, solicited admission for a favourite name.

So far have I been from any care to grace my pages with modern decorations, that I have studiously endeavoured to collect examples and authorities from the writers before the Restoration, whose works I regard as "the wells of English undefiled," as the pure sources of genuine diction. Our language, for almost a century, has, by the concurrence of many causes, been gradually departing from its original Teu-

tonic character, and deviating towards a Gallic structure and phraseology, from which it ought to be our endeavour to recal it, by making our ancient volumes the ground-work of style, admitting among the additions of later times, only such as may supply real deficiencies, such as are readily adopted by the genius of our tongue, and incorporate easily with our native idioms.

But as every language has a time of rudeness antecedent to perfection, as well as of false refinement and declension, I have been cautious lest my zeal for antiquity might drive me into times too remote, and crowd my book with words now no longer understood. I have fixed Sidney's work for the boundary, beyond which I make few excursions. From the authors which rose in the time of Elizabeth, a speech might be formed adequate to all the purposes of use and elegance. If the language of theology were extracted from Hooker and the translation of the Bible; the terms of natural knowledge from Bacon; the phrases of policy, war, and navigation from Raleigh; the dialect of poetry and fiction from Spenser and Sidney; and the diction of common life from Shakspeare, few ideas would be lost to mankind, for want of English words, in which they might be expressed.

It is not sufficient that a word is found, unless it be so combined as that its meaning is apparently determined by the tract and tenour of the sentence; such passages I have therefore chosen; and when it happened that any author gave a definition of a term, or such an explanation as is equivalent to a definition, I have placed his authority as a supplement to my own, without regard to the chronological order that is otherwise observed.

Some words, indeed, stand unsupported by any authority, but they are commonly derivative nouns or adverbs, formed from their primitives by regular and constant analogy, or names of things seldom occurring in books, or words of which I have reason to doubt the existence.

There is more danger of censure from the multiplicity than paucity of examples; authorities will sometimes seem to have been accumulated without necessity or use, and perhaps some will be found, which might, without loss, have been omitted. But a work of this kind is not hastily to be charged with superfluities; those quotations, which to careless or unskilful perusers appear only to repeat the same sense, will often exhibit, to a more accurate examiner, diversities of signification, or, at least, afford different shades of the same meaning: one will show the word applied to persons, another to things; one will express an ill, another a good, and a third a neutral sense; one will prove the expression genuine from an ancient author; another will show it elegant from a mo-

dern: a doubtful authority is corroborated by another of more credit; an ambiguous sentence is ascertained by a passage clear and determinate; the word, how often soever repeated, appears with new associates and in different combinations, and every quotation contributes something to the stability or enlargement of the language.

When words are used equivocally, I receive them in either sense; when they are metaphorical, I adopt them in their primitive acceptation.

I have sometimes, though rarely, yielded to the temptation of exhibiting a genealogy of sentiments, by showing how one author copied the thoughts and diction of another; such quotations are indeed little more than repetitions, which might justly be censured, did they not gratify the mind, by affording a kind of intellectual history.

The various syntactical structures occurring in the examples have been carefully noted; the license or negligence with which many words have been hitherto used, has made our style capricious and indeterminate; when the different combinations of the same word are exhibited together, the preference is readily given to propriety, and I have often endeavoured to direct the choice.

Thus have I laboured by settling the orthography, displaying the analogy, regulating the structures, and ascertaining the signification of English words, to perform all the parts of a faithful lexicographer; but I have not always executed my own scheme, or satisfied my own expectations. The work, whatever proofs of diligence and attention it may exhibit, is yet capable of many improvements: the orthography which I recommend is still controvertible; the etymology which I adopt is uncertain, and perhaps frequently erroneous; the explanations are sometimes too much contracted, and sometimes too much diffused, the significations are distinguished rather with subtilty than skill, and the attention is harassed with unnecessary minuteness.

The examples are too often injudiciously truncated, and perhaps sometimes, I hope very rarely, alleged in a mistaken sense; for in making this collection I trusted more to memory, than, in a state of disquiet and embarrassment, memory can contain, and purposed to supply at the review what was left incomplete in the first transcription.

Many terms appropriated to particular occupations, though necessary and significant, are undoubtedly omitted; and of the words most studiously considered and exemplified, many senses have escaped observation.

Yet these failures, however frequent, may admit extenuation and apology. To have attempted much is always laudable, even when the

enterprises above the strength that undertakes it: To rest below his own aim, is incident to every one whose fancy is active, and whose views are comprehensive; nor is any man satisfied with himself because he has done much, but because he can conceive little. When first I engaged in this work, I resolved to leave neither words nor things unexamined, and pleased myself with a prospect of the hours which I should revel away in the feasts of literature, the obscure recesses of northern learning which I should enter and ransack, the treasures with which I expected every search into those neglected mines to reward my labour, and the triumph with which I should display my acquisitions to mankind. When I had thus inquired into the original of words, I resolved to show likewise my attention to things; to pierce deep into every science, to inquire the nature of every substance of which I inserted the name, to limit every idea by a definition strictly logical, and exhibit every production of art or nature in an accurate description, that my book might be in place of all other dictionaries, whether appellative or technical. But these were the dreams of a poet doomed at last to wake a lexicographer. I soon found that it is too late to look for instruments, when the work calls for execution, and that whatever abilities I had brought to my task, with those I must finally perform it. To deliberate whenever I doubted, to inquire whenever I was ignorant, would have protracted the undertaking without end, and, perhaps, without much improvement; for I did not find by my first experiments, that what I had not of my own was easily to be obtained; I saw that one inquiry only gave occasion to another, that book referred to book, that to search was not always to find, and to find was not always to be informed; and that thus to pursue perfection, was, like the first inhabitants of Arcadia, to chase the sun, which, when they had reached the hill where he seemed to rest, was still beheld at the same distance from them.

I then contracted my design, determining to confide in myself, and no longer to solicit auxiliaries, which produced more incumbrance than assistance; by this I obtained at least one advantage, that I set limits to my work, which would in time be ended, though not completed.

Despondency has never so far prevailed as to depress me to negligence; some faults will at last appear to be the effects of anxious diligence and persevering activity. The nice and subtle ramifications of meaning were not easily avoided by a mind intent upon accuracy, and convinced of the necessity of disentangling combinations, and separating similitudes. Many of the distinctions which to common readers appear useless and idle, will be found real and important by men versed in the school of phi-

losophy, without which no dictionary can ever be accurately compiled, or skilfully examined.

Some senses however there are, which, though not the same, are yet so nearly allied, that they are often confounded. Most men think indistinctly, and therefore cannot speak with exactness; and consequently some examples might be indifferently put to either signification: this uncertainty is not to be imputed to me, who do not form, but register the language; who do not teach men how they should think, but relate how they have hitherto expressed their thoughts.

The imperfect sense of some examples I lamented, but could not remedy, and hope they will be compensated by innumerable passages selected with propriety, and preserved with exactness; some shiuing with sparks of imagination, and some replete with treasures of wisdom.

The orthography and etymology, though imperfect, are not imperfect for want of care, but because care will not always be successful, and recollection or information come too late for use.

That many terms of art and manufacture are omitted, must be frankly acknowledged; but for this defect I may boldly allege that it was unavoidable; I could not visit caverns to learn the miner's language, nor take a voyage to perfect my skill in the dialect of navigation, nor visit the warehouses of merchants, and shops of artificers, to gain the names of wares, tools and operations, of which no mention is found in books; what favourable accident or easy inquiry brought within my reach, has not been neglected; but it had been a hopeless labour to glean up words, by courting living information, and contesting with the sullenness of one, and the roughness of another.

To furnish the Academicians *della Crusca* with words of this kind, a series of comedies called *La Fiera*, or the Fair, was professedly written by Buonaroti; but I had no such assistant, and therefore was content to want what they must have wanted likewise, had they not luckily been so supplied.

Nor are all words which are not found in the vocabulary, to be lamented as omissions. Of the laborious and mercantile part of the people, the diction is in a great measure casual and mutable; many of their terms are formed for some temporary or local convenience, and though current at certain times and places, are in others utterly unknown. This fugitive cant, which is always in a state of increase or decay, cannot be regarded as any part of the durable materials of a language, and therefore must be suffered to perish with other things unworthy of preservation.

Care will sometimes betray to the appearance

of negligence. He that is catching opportunities which seldom occur, will suffer those to pass by unregarded, which he expects hourly to return; he that is searching for rare and remote things, will neglect those that are obvious and familiar: thus many of the most common and cursory words have been inserted with little illustration, because in gathering the authorities, I forebore to copy those which I thought likely to occur whenever they were wanted. It is remarkable that, in reviewing my collection, I found the word *sea* unexemplified.

Thus it happens, that in things difficult there is danger from ignorance, and in things easy, from confidence; the mind, afraid of greatness, and disdainful of littleness, hastily withdraws herself from painful searches, and passes with scornful rapidity over tasks not adequate to her powers, sometimes too secure for caution, and again too anxious for vigorous effort; sometimes idle in a plain path, and sometimes distracted in labyrinths, and dissipated by different intentions.

A large work is difficult because it is large, even though all its parts might singly be performed with facility; where there are many things to be done, each must be allowed its share of time and labour, in the proportion only which it bears to the whole; nor can it be expected, that the stones which form the dome of a temple, should be squared and polished like the diamond of a ring.

Of the event of this work, for which, having laboured it with so much application, I cannot but have some degree of parental fondness, it is natural to form conjectures. Those who have been persuaded to think well of my design, will require that it should fix our language, and put a stop to those alterations which time and chance have hitherto been suffered to make in it without opposition. With this consequence I will confess that I flattered myself for awhile; but now begin to fear that I have indulged expectation which neither reason nor experience can justify. When we see men grow old and die at a certain time one after another, from century to century, we laugh at the elixir that promises to prolong life to a thousand years; and with equal justice may the lexicographer be derided, who being able to produce no example of a nation that has preserved their words and phrases from mutability, shall imagine that his dictionary can embalm his language, and secure it from corruption and decay, that it is in his power to change sublunary nature, and clear the world at once from folly, vanity, and affectation.

With this hope, however, academies have been instituted, to guard the avenues of their languages, to retain fugitives, and repulse intruders; but their vigilance and activity have hitherto been vain; sounds are too volatile and subtle for legal restraints; to enchain syllables

and to lash the wind, are equally the undertakings of pride, unwilling to measure its desires by its strength. The French language has visibly changed under the inspection of the Academy; the style of Amelot's translation of Father Paul, is observed by Le Courayer to be *un peu passe*; and no Italian will maintain, that the diction of any modern writer is not perceptibly different from that of Boccace, Machiavel, or Caro.

Total and sudden transformations of a language seldom happen; conquests and migrations are now very rare; but there are other causes of change, which, though slow in their operation, and invisible in their progress, are perhaps as much superior to human resistance, as the revolutions of the sky, or intumescence of the tide. Commerce, however necessary, however lucrative, as it depraves the manners, corrupts the language; they that have frequent intercourse with strangers, to whom they endeavour to accommodate themselves, must in time learn a mingled dialect, like the jargon which serves the traffickers on the Mediterranean and Indian coasts. This will not always be confined to the exchange, the warehouse, or the port, but will be communicated by degrees to other ranks of the people, and be at last incorporated with the current speech.

There are likewise internal causes equally forcible. The language most likely to continue long without alteration, would be that of a nation raised a little, and but a little, above barbarity, secluded from strangers, and totally employed in procuring the conveniences of life; either without books, or, like some of the Mahometan countries, with very few: men thus busied and unlearned, having only such words as common use requires, would perhaps long continue to express the same notions by the same signs. But no such constancy can be expected in a people polished by arts, and classed by subordination, where one part of the community is sustained and accommodated by the labour of the other. Those who have much leisure to think, will always be enlarging the stock of ideas; and every increase of knowledge, whether real or fancied, will produce new words, or combination of words. When the mind is unchanged from necessity, it will range after convenience; when it is left at large in the fields of speculation, it will shift opinions; as any custom is disused, the words that expressed it must perish with it; as any opinion grows popular, it will innovate speech in the same proportion as it alters practice.

As by the cultivation of various sciences, a language is amplified, it will be more furnished with words deflected from their original sense; the geometrician will talk of a courtier's zenith, or the eccentric virtue of a wild hero, and the physician of sanguine expectations and phlegmatic delays. Copiousness of speech will give op-

portunities to capricious choice, by which some words will be preferred, and others degraded; vicissitudes of fashion will enforce the use of new, or extend the signification of known terms. The tropes of poetry will make hourly encroachments, and the metaphorical will become the current sense: pronunciation will be varied by levity or ignorance, and the pen must at length comply with the tongue; illiterate writers will, at one time or other, by public infatuation, rise into renown, who not knowing the original import of words, will use them with colloquial licentiousness, confound distinction, and forget propriety. As politeness increases, some expressions will be considered as too gross and vulgar for the delicate, others as too formal and ceremonious for the gay and airy; new phrases are therefore adopted, which must, for the same reasons, be in time dismissed. Swift, in his petty treatise on the English language, allows that new words must sometimes be introduced, but proposes that none should be suffered to become obsolete. But what makes a word obsolete, more than general agreement to forbear it? and how shall it be continued, when it conveys an offensive idea, or recalled again into the mouths of mankind, when it has once become unfamiliar by disuse, and displeasing by unfamiliarity?

There is another cause of alteration more prevalent than any other, which yet in the present state of the world cannot be obviated. A mixture of two languages will produce a third distinct from both, and they will always be mixed, where the chief parts of education, and the most conspicuous accomplishment, is skill in ancient or in foreign tongues. He that has long cultivated another language, will find its words and combinations crowd upon his memory; and haste and negligence, refinement and affectation, will obtrude borrowed terms and exotic expressions.

The great pest of speech is frequency of translation. No book was ever turned from one language into another, without imparting something of its native idiom; this is the most mischievous and comprehensive innovation; single words may enter by thousands, and the fabric of the tongue continue the same; but new phraseology changes much at once; it alters not the single stones of the building, but the order of the columns. If an academy should be established for the cultivation of our style; which I, who can never wish to see dependence multiplied, hope the spirit of English liberty will hinder or destroy, let them, instead of compiling grammars and dictionaries, endeavour, with all their influence, to stop the license of translators, whose idleness and ignorance, if it be suffered to proceed, will reduce us to babble the dialect of France.

If the changes that we fear be thus irresistible,

what remains but to acquiesce with silence, as in the other insurmountable distresses of humanity? It remains that we retard what we cannot repel, that we palliate what we cannot cure. Life may be lengthened by care, though death cannot be ultimately defeated: tongues, like governments, have a natural tendency to degeneration; we have long preserved our constitution, let us make some struggles for our language.

In hope of giving longevity to that which its own nature forbids to be immortal, I have devoted this book, the labour of years, to the honour of my country, that we may no longer yield the palm of philology, without a contest, to the nations of the continent. The chief glory of every people arises from its authors: whether I shall add any thing by my own writings to the reputation of English literature, must be left to time: much of my life has been lost under the pressures of disease; much has been trifled away; and much has always been spent in provision for the day that was passing over me; but I shall not think my employment useless or ignoble, if by my assistance foreign nations and distant ages gain access to the propagators of knowledge, and understand the teachers of truth; if my labours afford light to the repositories of science, and add celebrity to Bacon, to Hooker, to Milton, and to Boyle.

When I am animated by this wish, I look with pleasure on my book, however defective, and deliver it to the world with the spirit of a man that has endeavoured well. That it will immediately become popular, I have not promised to myself: a few wild blunders, and risible absurdities, from which no work of such multiplicity was ever free, may for a time furnish folly with laughter, and harden ignorance into contempt; but useful diligence will at last prevail, and there never can be wanting some who distinguish desert; who will consider that no dictionary of a living tongue ever can be perfect, since, while it is hastening to publication, some words are budding, and some falling away; that a whole life cannot be spent upon syntax and etymology, and that even a whole life would not be sufficient: that he, whose design includes whatever language can express, must often speak of what he does not understand; that a writer will sometimes be hurried by eagerness to the end, and sometimes faint with weariness under a task, which Scaliger compares to the labours of the anvil and the mine; that what is obvious is not always known, and what is known is not always present; that sudden fits of inadvertency will surprise vigilance, slight avocations will seduce attention, and casual eclipses of the mind will darken learning; and that the writer shall often in vain trace his memory at the moment of need, for that which yesterday he knew with intui-

tive readiness, and which will come uncalled into his thoughts-to-morrow.

In this work, when it shall be found that much is omitted, let it not be forgotten that much likewise is performed; and though no book was ever spared out of tenderness to the author, and the world is little solicitous to know whence proceed the faults of that which it condemns; yet it may gratify curiosity to inform it, that the "English Dictionary" was written with little assistance of the learned, and without any patronage of the great; not in the soft obscurities of retirement, or under the shelter of academic bowers, but amidst inconvenience and distraction, in sickness and in sorrow. It may repress the triumph of malignant criticism to observe, that if our language is not here fully displayed, I have only failed in an attempt which no human powers have hitherto completed. If the lexicons of ancient tongues, now immutably fixed, and comprized in a few volumes, be yet, after the toil of successive ages, inadequate and delusive; if the aggregated knowledge and co-operating diligence of the Italian academicians, did not secure them from the censure of Beni; if the embodied critics of France, when fifty years had been spent upon their work, were obliged to change its economy, and give their second edition another form, I may surely be contented without the praise of perfection, which, if I could obtain, in this gloom of solitude, what would it avail me? I have protracted my work till most of those whom I wished to please have sunk into the grave, and success and miscarriage are empty sounds: I therefore dismiss it with frigid tranquillity, having little to fear or hope from censure or from praise.

MANY are the works of human industry, which to begin and finish are hardly granted to the same man. He that undertakes to compile a dictionary, undertakes that, which, if it comprehends the full extent of his design, he knows himself unable to perform. Yet his labours, though deficient, may be useful, and with the hope of this inferior praise, he must incite his activity, and solace his weariness.

Perfection is unattainable, but nearer and

nearer approaches may be made; and finding my dictionary about to be reprinted, I have endeavoured, by a revision, to make it less reprehensible. I will not deny that I found many parts requiring emendation, and many more capable of improvement. Many faults I have corrected, some superfluities I have taken away, and some deficiencies I have supplied. I have methodised some parts that were disordered, and illuminated some that were obscure. Yet the changes or additions bear a very small proportion to the whole. The critic will now have less to object, but the student who has bought any of the former copies needs not repent; he will not, without nice collation, perceive how they differ; and usefulness seldom depends upon little things.

For negligence or deficiency, I have perhaps not need of more apology than the nature of the work will furnish: I have left that inaccurate which never was made exact, and that imperfect which never was completed.

#### PREFACE

#### TO THE OCTAVO EDITION

OF THE

#### ENGLISH DICTIONARY.

---

HAVING been long employed in the study and cultivation of the English language, I lately published a Dictionary like those compiled by the academies of Italy and France, for the use of such as aspire to exactness of criticism, or elegance of style.

But it has been since considered that works of that kind are by no means necessary to the greater number of readers, who, seldom intending to write or presuming to judge, turn over books only to amuse their leisure, and to gain degrees of knowledge suitable to lower characters, or necessary to the common business of life: these know not any other use of a dictionary than that of adjusting orthography, and explaining terms of science, or words of infrequent occurrence, or remote derivation.

For these purposes many dictionaries have been written by different authors, and with different degrees of skill; but none of them have yet fallen into my hands by which even the lowest expectations could be satisfied. Some of their authors wanted industry, and others literature: some knew not their own defects, and others were too idle to supply them.

For this reason a small dictionary appeared yet to be wanting to common readers; and, as I may without arrogance claim to myself a longer acquaintance with the lexicography of our language than any other writer has had, I shall hope to be considered as having more experience at least than most of my predecessors, and as more likely to accommodate the nation with a vocabulary of daily use. I therefore offer to the public an Abstract or Epitome of my former Work.

In comparing this with other dictionaries of the same kind, it will be found to have several advantages.

I. It contains many words not to be found in any other.

II. Many barbarous terms and phrases by which other dictionaries may vitiate the style, are rejected from this.

III. The words are more correctly spelled, partly by attention to their etymology, and partly by observation of the practice of the best authors.

IV. The etymologies and derivations, whether from foreign languages or from native roots, are more diligently traced, and more distinctly noted.

V. The senses of each word are more copiously enumerated, and more clearly explained.

VI. Many words occurring in the elder authors, such as Spenser, Shakspeare, and Milton, which had been hitherto omitted, are here carefully inserted; so that this book may serve as a glossary or expository index to the poetical writers.

VII. To the words, and to the different senses of each word, are subjoined from the large dictionary the names of those writers by whom they have been used; so that the reader who knows the different periods of the language, and the time of its authors, may judge of the elegance or prevalence of any word, or meaning of a word; and without recurring to other books, may know what are antiquated, what are unusual, and what are recommended by the best authority.

The words of this Dictionary, as opposed to others, are more diligently collected, more accurately spelled, more faithfully explained, and more authentically ascertained. Of an Abstract it is not necessary to say more; and I hope it will not be found that truth requires me to say less.

## MISCELLANEOUS OBSERVATIONS

ON THE

## TRAGEDY OF MACBETH:

WITH REMARKS ON SIR T. HANMER'S EDITION OF SHAKSPEARE.

FIRST PRINTED IN THE YEAR 1745.

### NOTE I.

ACT I. SCENE I.—*Enter three Witches.*

In order to make a true estimate of the abilities and merit of a writer, it is always necessary to examine the genius of his age, and the opinions of his contemporaries. A poet who should now make the whole action of his tragedy depend upon enchantment, and produce the chief events by the assistance of supernatural agents, would be censured as transgressing the bounds of probability, he would be banished from the theatre to the nursery, and condemned to write Fairy Tales instead of Tragedies; but a survey of the notions that prevailed at the time when this

play was written, will prove that Shakspeare was in no danger of such censures, since he only turned the system that was then universally admitted to his advantage, and was far from overburthening the credulity of his audience.

The reality of witchcraft or enchantment, which though not strictly the same, are confounded in this play, has in all ages and countries been credited by the common people, and in most by the learned themselves. These phantoms have indeed appeared more frequently, in proportion as the darkness of ignorance has been more gross; but it cannot be shown, that the brightest gleams of knowledge have at any time been sufficient to drive them out of the world. The time in which this kind of credu-

lity was at its height, seems to have been that of the holy war, in which the Christians imputed all their defeats to enchantment or diabolical opposition, as they ascribe their success to the assistance of their military saints; and the learned Mr. Warburton appears to believe ("Sup. to the Introduction to Don Quixote") that the first accounts of enchantments were brought into this part of the world by those who returned from their eastern expeditions. But there is always some distance between the birth and maturity of folly as of wickedness: this opinion had long existed, though perhaps the application of it had in no foregoing age been so frequent, nor the reception so general. Olympiodorus, in Photius's Extracts, tells us of one Libanius, who practised this kind of military magic, and having promised *χάρις ὁπλιτῶν κατὰ βαρβάρων ἐνεργεῖν, to perform great things against the Barbarians, without soldiers*, was, at the instance of the Empress Placidia, put to death, when he was about to have given proofs of his abilities. The empress showed some kindness in her anger by cutting him off at a time so convenient for his reputation.

But a more remarkable proof of the antiquity of this notion may be found in St. Chrysostom's book *de Sacerdotio*, which exhibits a scene of enchantments not exceeded by any romance of the middle age; he supposes a spectator, overlooking a field of battle, attended by one that points out all the various objects of horror, the engines of destruction, and the arts of slaughter. *Διμύνητο δὲ ἐντὶ παρὰ τοῖς ἰσχυρίοις καὶ πεπομπμένοις ἵπποις διὰ τινος μαγικῆς, καὶ ὁπλίταις δ' αἰεὶς φερεμένοις, καὶ πάσῃ γενναίᾳ δυνάμει καὶ ἰδίᾳ.* *Let him then proceed to show him in the opposite armies horses flying by enchantment, armed men transported through the air, and every power and form of magic.* Whether St. Chrysostom believed that such performances were really to be seen in a day of battle, or only endeavoured to enliven his description, by adopting the notions of the vulgar, it is equally certain, that such notions were in his time received, and that therefore they were not imported from the Saracens in a later age; the wars with the Saracens, however, gave occasion to their propagation, not only as bigotry naturally discovers prodigies, but as the scene of action was removed to a greater distance, and distance either of time or place is sufficient to reconcile weak minds to wonderful relations.

The reformation did not immediately arrive at its meridian, and though day was gradually encreasing upon us, the goblins of witchcraft still continued to hover in the twilight. In the time of Queen Elizabeth was the remarkable trial of the witches of Warbois, whose conviction is still commemorated in an annual sermon at Huntingdon. But in the reign of King James, in which this tragedy was written, many cir-

cumstances concurred to propagate and confirm this opinion. The king, who was much celebrated for his knowledge, had, before his arrival in England, not only examined in person a woman accused of witchcraft, but had given a very formal account of the practices and illusions of evil spirits, the compacts of witches, the ceremonies used by them, the manner of detecting them, and the justice of punishing them, in his dialogues of *Dæmonologie*, written in the Scottish dialect, and published at Edinburgh. This book was, soon after his accession, reprinted at London; and as the ready way to gain King James's favour was to flatter his speculations, the system of *Dæmonologie* was immediately adopted by all who desired either to gain preferment or not to lose it. Thus the doctrine of witchcraft was very powerfully inculcated; and as the greatest part of mankind have no other reason for their opinions than that they are in fashion, it cannot be doubted but this persuasion made a rapid progress, since vanity and credulity co-operated in its favour, and it had a tendency to free cowardice from reproach. The infection soon reached the parliament, who, in the first year of King James, made a law, by which it was enacted, ch. xii. That, "if any person shall use any invocation or conjuration of any evil or wicked spirit; 2. Or shall consult, covenant with, entertain, employ, feed, or reward any evil or cursed spirit to or for any intent or purpose; 3. Or take up any dead man, woman, or child out of the grave,—or the skin, bone, or any part of the dead person, to be employed or used in any manner of witchcraft, sorcery, charm, or enchantment; 4. Or shall use, practise, or exercise any sort of witchcraft, sorcery, charm, or enchantment; 5. Whereby any person shall be destroyed, killed, wasted, consumed, pined, or lamed in any part of the body; 6. That every such person, being convicted, shall suffer death."

Thus, in the time of Shakspeare, was the doctrine of witchcraft at once established by law and by the fashion, and it became not only unpolite, but criminal, to doubt it; and as prodigies are always seen in proportion as they are expected, witches were every day discovered, and multiplied so fast in some places, that Bishop Hall mentions a village in Lancashire, where their number was greater than that of the houses. The Jesuits and Sectaries took advantage of this universal error, and endeavoured to promote the interest of their parties by pretended cures of persons afflicted by evil spirits, but they were detected and exposed by the clergy of the established church.

Upon this general infatuation Shakspeare might be easily allowed to found a play, especially since he has followed with great exactness such histories as were then thought true; nor can it be doubted that the scenes of enchant-

ment, however they may now be ridiculed, were both by himself and his audience thought awful and affecting.

## NOTE II.—SCENE II.

—The merciless Macdonel,—from the Western Isles  
Of Kerns and Gallow-glasses was supply'd;  
And fortune on his damn'd quarry smiling,  
Show'd like a rebel's whore.

Kerns are light-armed, and Gallow-glasses heavy-armed soldiers. The word *quarry* has no sense that is properly applicable in this place, and therefore it is necessary to read,

And fortune on his damned *quarrel* smiling.

*Quarrel* was formerly used for *cause*, or for the occasion of a *quarrel*, and is to be found in that sense in Hollingshead's account of the story of Macbeth, who, upon the creation of the Prince of Cumberland, thought, says the historian, that he had a *just quarrel* to endeavour after the crown. The sense therefore is, *fortune smiling in his execrable cause*, &c.

## NOTE III.

If I say sooth, I must report they were  
As cannons overcharged with double cracks,  
So they redoubled strokes upon the foe.

Mr. Theobald has endeavoured to improve the sense of this passage by altering the punctuation thus:—

—They were  
As cannons overcharged, with double cracks  
So they redoubled strokes—

He declares with some degree of exultation, that he has no idea of a *cannon charged with double cracks*; but surely the great author will not gain much by an alteration which makes him say of a hero, that he *redoubles strokes with double cracks*, an expression not more loudly to be applauded, or more easily pardoned, than that which is rejected in its favour. That a *cannon is charged with thunder* or *with double thunders*, may be written not only without nonsense, but with elegance; and nothing else is here meant by *cracks*, which in the time of this writer was a word of such emphasis and dignity, that in this play he terms the general dissolution of nature the *crack of doom*.

There are among Mr. Theobald's alterations others which I do not approve, though I do not always censure them; for some of his amendments are so excellent, that, even when he has failed, he ought to be treated with indulgence and respect.

## NOTE IV.

King. But who comes here?

Mal. The worthy Thane of Rosse.

Lenox. What haste looks through his eyes?

So should he look that *seems* to speak things strange.

The meaning of this passage as it now stands is, *so should he look, that looks as if he told things strange*. But Rosse neither yet told strange things, nor could look as if he told them; Lenox only conjectured from his air that he had strange things to tell, and therefore undoubtedly said,

—What haste looks through his eyes?

So should he look, that *seems* to speak things strange.

*He looks like one that is big with something of importance*, a metaphor so natural, that it is every day used in common discourse.

## NOTE V.—SCENE III.

Thunder. Enter the three Witches.

1st Witch. Where hast thou been, sister?

2d Witch. Killing swine.

3d Witch. Sister, where thou?

1st Witch. A sailor's wife had chesnuts in her lap,  
And mouncht, and mouncht, and mouncht. Give me, quoth I.

(1) Aroint thee, witch, the rump-fed ronyon cries.  
Her husband's to Aleppo gone, master o' th' Tiger;

But in a sieve I'll thither sail,  
And like a rat without a tail,  
I'll do—I'll do—and I'll do.

2d Witch. I'll give thee wind.

1st Witch. Thou art kind.

3d Witch. And I another.

1st Witch. I myself have all the other,  
And the (2) very points they blow,  
All the quarters that they know,  
I' th' Ship-man's card—

I will drain him dry as hay  
Sleep shall neither night nor day  
Hang upon his pent-house lid;  
He shall live a man (3) forbid;  
Weary seven-nights nine times nine,  
Shall he dwindle, peak, and pine;  
Though his bark cannot be lost,  
Yet it shall be tempest-tost,  
Look what I have.

2d Witch. Show me, Show me.

(1) Aroint thee, witch,—

In one of the folio editions the reading is *aroint thee*, in a sense very consistent with the common accounts of witches, who are related to perform many supernatural acts by the means of unguents, and particularly to fly through the air to the place where they meet at their hellish festivals. In this sense *aroint thee, witch*, will mean, *away, witch, to your infernal assembly*. This reading I was inclined to favour, because I had met with the word *aroint* in no other place; till looking into Hearne's Collections, I found it in a very old drawing that he has published, in which St. Patrick is represented visit-

ing hell, and putting the devils into great confusion by his presence, of whom one that is driving the damned before him with a prong, has a label issuing out from his mouth with these words, out out aronyt, of which the last is evidently the same with *aroint*, and used in the same sense as in this passage.

(2) And the very points they blow.

As the word *very* is here of no other use than to fill up the verse, it is likely that Shakspeare wrote *various*, which might be easily mistaken for *very*, being either negligently read, hastily pronounced, or imperfectly heard.

(3) He shall live a man *forbid*.

Mr. Theobald has very justly explained *forbid* by *accursed*, but without giving any reason of his interpretation. To *bid*, is originally to *pray*, as in this Saxon fragment:

He is wis thaet bit & bote, &c.

He is wise that prays and improves.

As to *forbid* therefore implies to *prohibit*, in opposition to the word *bid* in its present sense, it signifies by the same kind of opposition to *curse*, when it is derived from the same word in its primitive meaning.

#### NOTE VI.—SCENE V.

The incongruity of all the passages in which the *Thane of Cawdor* is mentioned, is very remarkable; in the second scene the Thanes of Rosse and Angus bring the king an account of the battle, and inform him that Norway,

Assisted by that most disloyal traitor  
The *Thane of Cawdor*, 'gan a dismal conflict.

It appears that Cawdor was taken prisoner, for the king says in the same scene,

—Go, pronounce his death,  
And with his former title greet Macbeth.

Yet though Cawdor was thus taken by Macbeth, in arms against his king, when Macbeth is saluted, in the fourth scene, Thane of Cawdor, by the Weird Sisters, he asks,

How of Cawdor? the *Thane of Cawdor* lives,  
A prosperous gentleman.—

And in the next line considers the promises, that he should be Cawdor and King, as equally unlikely to be accomplished. How can Macbeth be ignorant of the state of the Thane of Cawdor, whom he has just defeated and taken prisoner, or call him a *prosperous gentleman*, who has forfeited his title and life by open rebellion? Or why should he wonder that the title of the

rebel whom he has overthrown should be conferred upon him? He cannot be supposed to dissemble his knowledge of the condition of Cawdor, because he inquires with all the ardour of curiosity, and the vehemence of sudden astonishment; and because nobody is present but Banquo, who had an equal part in the battle, and was equally acquainted with Cawdor's treason. However, in the next scene, his ignorance still continues; and when Rosse and Angus present him from the king with his new title, he cries out,

—The *Thane of Cawdor* lives.

Why do you dress me in his borrowed robes?

Rosse and Angus, who were the messengers that in the second scene informed the king of the assistance given by Cawdor to the invader, having lost, as well as Macbeth, all memory of what they had so lately seen and related, make this answer,

—Whether he was

Combined with Norway, or did line the rebels  
With hidden help and vantage, or with both  
He labour'd in his country's wreck, I know not.

Neither Rosse knew what he had just reported, nor Macbeth what he had just done. This seems not to be one of the faults that are to be imputed to the transcribers, since, though the inconsistency of Rosse and Angus might be removed, by supposing that their names are erroneously inserted, and that only Rosse brought the account of the battle, and only Angus was sent to compliment Macbeth, yet the forgetfulness of Macbeth cannot be palliated, since what he says could not have been spoken by any other.

#### NOTE VII.

The thought, whose murder yet is but fantastical,  
Shakes so my single state of man,—

The *single state of man* seems to be used by Shakspeare for an *individual*, in opposition to a *commonwealth*, or *conjunct body* of men.

#### NOTE VIII.

*Macbeth*.—Come what come may,  
*Time and the hour* runs thro' the roughest day.

I suppose every reader is disgusted at the tautology in this passage, *time and the hour*, and will therefore willingly believe that Shakspeare wrote it thus,

—Come what come may,  
*Time ! on !*—the hour runs thro' the roughest day.

Macbeth is deliberating upon the events

which are to befall him; but finding no satisfaction from his own thoughts, he grows impatient of reflection, and resolves to wait the close without harassing himself with conjectures,

—Come what come may.

But to shorten the pain of suspense, he calls upon time in the usual style of ardent desire, to quicken his motion,

Time! on!—

He then comforts himself with the reflection that all his perplexity must have an end,

—The hour runs thro' the roughest day.

This conjecture is supported by the passage in the letter to his lady, in which he says, *They referred me to the coming on of time, with Hail King that shall be.*

#### NOTE IX.—SCENE VI.

*Malcolm.*—Nothing in his life  
Became him like the leaving it. He died,  
As one that had been studied in his death,  
To throw away the dearest thing he *ow'd*,  
As 'twere a careless trifle.

As the word *ow'd* affords here no sense but such as is forced and unnatural, it cannot be doubted that it was originally written, *The dearest thing he own'd*; a reading which needs neither defence nor explanation.

#### NOTE X.

*King.*—There's no art,  
To find the mind's construction in the face.

The *construction of the mind* is, I believe, a phrase peculiar to Shakspeare; it implies the *frame or disposition* of the mind, by which it is determined to good or ill.

#### NOTE XI.

*Macbeth.* The service, and the loyalty I owe,  
In doing it, pays itself. Your highness' part  
Is to receive our duties, and our duties  
Are to your throne and state, children and servants,  
Which do but what they should, in doing *every thing*  
*Save towards your love and honour.*

Of the last line of this speech, which is certainly, as it is now read, unintelligible, an emendation has been attempted, which Mr. Warburton and Mr. Theobald have admitted as the true reading.

—Our duties  
Are to your throne and state, children and servants,  
Which do but what they should, in doing every thing  
*Fiefs* to your love and honour.

My esteem of these critics inclines me to believe, that they cannot be much pleased with the expressions *Fiefs to love*, or *Fiefs to honour*; and that they have proposed this alteration rather because no other occurred to them, than because they approved it. I shall therefore propose a bolder change, perhaps with no better success, but *sua cuique placent*. I read thus,

Our duties  
Are to your throne and state, children and servants,  
Which do but what they should, in doing *nothing*  
*Save towards your love and honour.*

We do but perform our duty when we contract all our views to your service, when we act with no other principle than regard to *your love and honour*.

It is probable that this passage was first corrupted by writing *safe* for *save*, and the lines then stood thus,

—Doing nothing  
Safe towards your love and honour.

Which the next transcriber observing to be wrong, and yet not being able to discover the real fault, altered to the present reading.

#### NOTE XII.—SCENE VII.

—Thou'dst have, great Glamis,  
That which cries, "thus thou must do if thou have *it*,  
And that," &c.

As the object of Macbeth's desire is here introduced speaking of itself, it is necessary to read,

—Thou'dst have, great Glamis,  
That which cries, "thus thou must do if thou have *me*."

#### NOTE XIII.

—Hie thee hither,  
That I may pour my spirits in thine ear,  
And chastise with the valour of my tongue  
All that impedes thee from the golden round,  
That fate and metaphysical aid do *seem*  
To have thee crown'd withal.

For *seem*, the sense evidently directs us to read *seek*. The crown to which fate destines thee, and which preternatural agents *endeavour* to bestow upon thee. The *golden round* is the *diadem*.

#### NOTE XIV.

*Lady Macbeth.*—Come all you spirits  
That tend on mortal thoughts, unsex me here,  
And fill me from the crown to th' toe, top-full  
Of direst cruelty; make thick my blood,  
Stop up th' access and passage to remorse  
That no compunctious visitings of nature  
Shake my full purpose, nor keep peace between  
Th' effect and it.

Mortal thoughts.

This expression signifies not the thoughts of mortals, but *murtherous, deadly, or destructive designs*. So in Act 5th.

Hold fast the *mortal* sword.

And in another place,

With twenty *mortal* murthers.

—Nor keep pace between

Th' effect and it.

The intent of Lady Macbeth, evidently is to wish that no womanish tenderness, or conscientious remorse, may hinder her purpose from proceeding to effect; but neither this, nor indeed any other sense, is expressed by the present reading, and therefore it cannot be doubted that Shakespeare wrote differently, perhaps thus:

That no compunctious visitings of nature  
Shake my fell purpose, nor *keep pace* between  
Th' effect and it.

To *keep pace between*, may signify to *pass between*, to *intervene*. *Pace* is on many occasions a favourite of Shakespeare. This phrase is indeed not usual in this sense, but was it not its novelty that gave occasion to the present corruption?

#### NOTE XV.—SCENE VIII.

*King*. This castle hath a pleasant *seat*; the air,  
Nimbly and sweetly recommends itself  
Unto our gentle senses.

*Banquo*. This guest of summer,  
The temple-haunting Martlet, does approve,  
By his lov'd mansionary, that heaven's breath  
Smells woefully here. No jutting frieze,  
Buttrice, nor coigne of vantage, but this bird  
Hath made his pendent bed, and procreant cradle:  
Where they most breed and haunt, I have observ'd  
The air is delicate.

In this short scene, I propose a slight alteration to be made, by substituting *sic* for *seat*, as, the ancient word for *situation*; and *sense* for *senses*, as more agreeable to the measure; for which reason likewise I have endeavoured to adjust this passage,

—Heaven's breath

Smells woefully here. No jutting frieze,

By changing the punctuation, and adding a syllable—thus:

—Heaven's breath

Smells woefully. Here is no jutting frieze.

Those who have perused books printed at the time of the first editions of Shakespeare, know that greater alterations than these are necessary almost in every page, even where it is not to be doubted that the copy was correct.

#### NOTE XVI.—SCENE X.

The arguments by which Lady Macbeth persuades her husband to commit the murder, afford a proof of Shakespeare's knowledge of human nature. She urges the excellence and dignity of courage, a glittering idea which has dazzled mankind from age to age, and animated sometimes the housebreaker, and sometimes the conqueror: but this sophism Macbeth has for ever destroyed by distinguishing true from false fortitude, in a line and a half; of which it may almost be said, that they ought to bestow immortality on the author, though all his other productions had been lost.

I dare do all that may become a man,  
Who dares do more is none.

This topic, which has been always employed with too much success, is used in this scene with peculiar propriety, to a soldier by a woman. Courage is the distinguishing virtue of a soldier, and the reproach of cowardice cannot be borne by any man from a woman, without great impatience.

She then urges the oaths by which he had bound himself to murder Duncan, another art of sophistry by which men have sometimes deluded their consciences, and persuaded themselves that what would be criminal in others, is virtuous in them; this argument Shakespeare, whose plan obliged him to make Macbeth yield, has not confuted, though he might easily have shown that a former obligation could not be vacated by a latter.

#### NOTE XVII.

Letting I dare not, wait upon I would,  
Like the poor cat i' th' adage.

The adage alluded to is, *The cat loves fish, but dares not wet her foot*,

*Catus amat pisces, sed non vult tingere plantas.*

#### NOTE XVIII.

Will I with wine and wassel so convince

To convince, is in Shakespeare to *over-power* or *subdue*, as in this play,

— Their malady convinces

The great assay of art.

#### NOTE XIX.

— Who shall bear the guilt  
( I our great quell.

*Quell* is murder, *manquellers* being in the old language the term for which *murderers* is now used.

## NOTE XX.—ACT II SCENE II.

— Now o'er one half the world

(1) *Nature seems dead, and wicked dreams abuse  
The curtain'd sleep; now witchcraft celebrates  
Pale Hecate's offerings: and wither'd murder,  
(Alarum'd by his sentinel, the wolf,  
Whose howl's his watch) thus with his stealthy pace,  
With (2) Tarquin's ravishing sides tow'rd his design  
Moves like a ghost—Thou sound and firm-set earth,  
Hear not my steps which way they walk, for fear  
Thy very stones prate of my where-about,  
And (3) take the present horror from the time,  
That now suits with it ———*

(1) — Now o'er one half the world  
Nature seems dead.

That is, *over our hemisphere all action and motion seem to have ceased.* This image, which is, perhaps, the most striking that poetry can produce, has been adopted by Dryden in his "Conquest of Mexico."

All things are hush'd as nature's self lay dead,  
The mountains seem to nod their drowsy head:  
The little birds in dreams their songs repeat,  
And sleeping flowers beneath the night-dews sweat.  
Even lust and envy sleep!

These lines, though so well known, I have transcribed, that the contrast between them and this passage of Shakspeare may be more accurately observed.

Night is described by two great poets, but one describes a night of quiet, the other of perturbation. In the night of Dryden, all the disturbers of the world are laid asleep; in that of Shakspeare, nothing but sorcery, lust, and murder is awake. He that reads Dryden, finds himself lulled with serenity, and disposed to solitude and contemplation. He that peruses Shakspeare, looks round alarmed, and starts to find himself alone. One is the night of a lover, the other that of a murderer.

(2) ———— *Wither'd murder,*

— *Thus with his stealthy pace,*

*With Tarquin's ravishing sides tow'rd his design,  
Moves like a ghost. ———*

This was the reading of this passage in all the editions before that of Mr. Pope, who for *sides*, inserted in the text *strides*, which Mr. Theobald has tacitly copied from him, though a more proper alteration might perhaps have been made. A *ravishing stride* is an action of violence, impetuosity, and tumult, like that of a savage rushing on his prey; whereas the poet is here attempting to exhibit an image of secrecy and caution, of anxious circumspection and guilty timidity, the *stealthy pace* of a *ravisher* creeping into the chamber of a virgin, and of an assassin approaching the bed of him whom he proposes to murder, without awaking him; these he describes as *moving like ghosts*, whose progression is

so different from *strides*, that it has been in all ages represented to be, as Milton expresses it,

Smooth sliding without step

This hemistic will afford the true reading of this place, which is, I think, to be corrected thus:

— And wither'd murder

— Thus with his stealthy pace,

With Tarquin ravishing, slides tow'rd his design,  
Moves like a ghost.

Tarquin is in this place the general name of a ravisher, and the sense is, Now is the time in which every one is asleep, but those who are employed in wickedness, the witch who is sacrificing to Hecate, and the ravisher and the murderer, who, like me, are stealing upon their prey.

When the reading is thus adjusted, he wishes with great propriety, in the following lines, that the earth may not *hear his steps*.

(3) And take the present horror from the time  
That now suits with it.

I believe every one that has attentively read this dreadful soliloquy is disappointed at the conclusion, which, if not wholly unintelligible, is at least obscure, nor can be explained into any sense worthy of the author. I shall therefore propose a slight alteration.

— Thou sound and firm-set earth,  
Hear not my steps, which way they walk, for fear  
Thy very stones prate of my where-about,  
And *talk*—the present horror of the time! —  
That now suits with it ———

Macbeth has, in the foregoing lines, disturbed his imagination by enumerating all the terrors of the night; at length he is wrought up to a degree of frenzy, that makes him afraid of some supernatural discovery of his design, and calls out to the stones not to betray him, not to declare where he walks, nor to *talk*.—As he is going to say of what, he discovers the absurdity of his suspicion, and pauses, but is again overwhelmed by his guilt, and concludes that such are the horrors of the present night, that the stones may be expected to cry out against him.

That now suits with it.

He observes in a subsequent passage, that on such occasions *stones have been known to move*. It is now a very just and strong picture of a man about to commit a deliberate murder, under the strongest convictions of the wickedness of his design.

## NOTE XXI.—SCENE IV.

*Lenox.* The night has been unruly; where we lay  
Our chimnies were blown down. And, as they say,

Lamentings heard i' th' air, strange screams of death,  
And prophesying with accents terrible  
Of dire combustions, and confused events,  
*New-hatch'd to the woful time.*  
The obscure bird clamour'd the live-long night,  
Some say the earth was fev'rous and did shake.

These lines I think should be rather regulated thus:

—Prophesying with accents terrible,  
Of dire combustions and confused events,  
New-hatch'd to the woful time, the obscure bird  
Clamour'd the live-long night. Some say the earth  
Was fev'rous and did shake.

A prophecy of an event *new-hatch'd*, seems to be a prophecy of an event past. The term *new-hatch'd* is properly applicable to a bird, and that birds of ill omen should be *new-hatch'd to the woful time*, is very consistent with the rest of the prodigies here mentioned, and with the universal disorder into which nature is described as thrown by the perpetration of this horrid murder.

## NOTE XXII.

—Up! up! and see  
The great doom's image, Malcolm, Banquo,  
As from your graves rise up.—

The second line might have been so easily completed, that it cannot be supposed to have been left imperfect by the author, who probably wrote,

—Malcolm! Banquo! rise!  
As from your graves rise up.—

Many other emendations of the same kind might be made, without any greater deviation from the printed copies, than is found in each of them from the rest.

## NOTE XXIII.

*Macbeth.*—Here lay Duncan,  
His silver skin laced with his golden blood,  
And his gash'd stabs look'd like a breach in nature,  
For ruin's wasteful entrance: there the murderers  
Steep'd in the colours of their trade, their daggers  
*Unmannerly breach'd with gore.*—

An *unmannerly dagger*, and a *dagger breach'd*, or as in some editions, *breach'd with gore*, are expressions not easily to be understood, nor can it be imagined that Shakspeare would reproach the murderer of his king only with want of manners. There are undoubtedly two faults in this passage, which I have endeavoured to take away by reading

—Daggers  
*Unmanly drench'd with gore.*—

*I saw drench'd with the king's blood the fatal daggers, not only instruments of murder, but evidences of cowardice.*

Each of these words might easily be confounded with that which I have substituted for it by a hand not exact, a casual blot, or a negligent inspection.

Mr. Pope has endeavoured to improve one of these lines by substituting *goary blood* for *golden blood*, but it may easily be admitted, that he who could on such an occasion talk of *lacing the silver skin*, would *lace* it with *golden blood*. No amendment can be made to this line, of which every word is equally faulty, but by a general blot.

It is not improbable, that Shakspeare put these forced and unnatural metaphors into the mouth of Macbeth, as a mark of artifice and dissimulation, to show the difference between the studied language of hypocrisy, and the natural outcries of sudden passion. This whole speech, considered in this light, is a remarkable instance of judgment, as it consists entirely of antitheses and metaphors.

## NOTE XXIV.—ACT III. SCENE II.

*Macbeth.*—Our fears in Banquo  
Stick deep, and in his royalty of nature  
Reigns that which would be fear'd. 'Tis much he  
dares,

And to that dauntless temper of his mind,  
He hath a wisdom that doth guide his valour  
To act in safety. There is none but he,  
Whose being I do fear; and under him,  
My genius is rebuked; (1) *as it is said,*  
*Anthony's was by Caesar.* He chid the sisters,  
When first they put the name of king upon me,  
And bade them speak to him; then prophet-like,  
They hail'd him father to a line of kings  
Upon my head they placed a fruitless crown,  
And put a barren sceptre in my gripe,  
Thence to be wrench'd with an unfeeling hand,  
No son of mine succeeding. 'If 'tis so,  
For Banquo's issue have I filed my mind,  
For them the gracious Duncan have I murder'd,  
Put rancours in the vessel of my peace  
Only for them, and mine eternal jewel  
Given to the (2) common enemy of man,  
To make them kings,—the seed of Banquo kings.  
Rather than so, come fate into the list,  
(3) And champion me to th' utterance—

(1)—As it is said,  
*Anthony's was by Caesar.*

Though I would not often assume the critic's privilege, of being confident where certainty cannot be obtained, nor indulge myself too far in departing from the established reading; yet I cannot but propose the rejection of this passage, which I believe was an insertion of some player, that, having so much learning as to discover to what Shakspeare alluded, was not willing that his audience should be less knowing than himself, and has therefore weakened the author's sense by the intrusion of a remote and useless image into a speech bursting from a man wholly possessed with his own present condition,

and therefore not at leisure to explain his own allusions to himself. If these words are taken away, by which not only the thought but the numbers are injured, the lines of Shakspeare close together without any traces of a breach.

My genius is rebuked. He chid the sisters.

(2)—The common enemy of man.

It is always an entertainment to an inquisitive reader, to trace a sentiment to its original source, and therefore, though the term *enemy of man* applied to the devil is in itself natural and obvious, yet some may be pleased with being informed, that Shakspeare probably borrowed it from the first lines of the "Destruction of Troy," a book which he is known to have read.

That this remark may not appear too trivial, I shall take occasion from it to point out a beautiful passage of Milton, evidently copied from a book of no greater authority: in describing the gates of hell, book ii. v. 879, he says,

—On a sudden open fly  
With impetuous recoil and jarring sound,  
Th' infernal doors, and on their hinges grate  
Harsh thunder.

In the history of "Don Bellianis," when one of the knights approaches, as I remember, the castle of Brandezar, the gates are said to open *grating harsh thunder upon their brazen hinges*.

(3) Come fate into the list,  
And champion me to th' utterance.

This passage will be best explained by translating it into the language from whence the only word of difficulty in it is borrowed. *Que la destinée se rende en lice, et qu'elle me donne un défi à l'outrance*. A challenge or a combat à l'outrance, to extremity, was a fixed term in the law of arms, used when the combatants engaged with an odium internecinum, an intention to destroy each other, in opposition to trials of skill at festivals, or on other occasions, where the contest was only for reputation or a prize. The sense therefore is, *Let fate that has fore-doomed the exaltation of the sons of Banquo, enter the lists against me, with the utmost animosity, in defence of its own decrees, which I will endeavour to invalidate, whatever be the danger*.

#### NOTE XXV.

*Macbeth*. Ay, in the catalogue, ye go for men, As hounds and grey-hounds, mongrels, spaniels, curs, Shoughs, water-ruggs, and demi-wolves are clept All by the name of dogs.

Though this is not the most sparkling passage in the play, and though the name of a dog is of no great importance, yet it may not be improper to remark, that there is no such species of dogs

as *shoughs* mentioned by Caius de Canibus Britannicis, or any other writer that has fallen into my hands, nor is the word to be found in any dictionary which I have examined. I therefore imagined that it is falsely printed for *sloughs*, a kind of slow hound bred in the southern parts of England, but was informed by a lady, that it is more probably used, either by mistake, or according to the orthography of that time, for *shocks*.

#### NOTE XXVI.

*Macbeth*.—In this hour at most,  
I will advise you where to plant yourselves,  
Acquaint you with the perfect spy o' th' time,  
The moment on't, for 't must be done to-night,  
And something from the palace:—

What is meant by *the spy of the time*, it will be found difficult to explain; and therefore sense will be cheaply gained by a slight alteration.—*Macbeth* is assuring the assassins that they shall not want directions to find Banquo, and therefore says,

I will ———  
Acquaint you with a perfect spy o' th' time.

Accordingly a third murderer joins them afterwards at the place of action.

*Perfect* is well instructed, or well informed, as in this play.

Though in your state of honour I am *perfect*.

Though I am well acquainted with your quality and rank.

#### NOTE XXVII.—SCENE IV.

2d Murderer. He needs not to mistrust, since he delivers  
Our offices and what we have to do,  
To the direction just.

Mr. Theobald has endeavoured unsuccessfully to amend this passage, in which nothing is faulty but the punctuation. The meaning of this abrupt dialogue is this: The *perfect spy*, mentioned by *Macbeth* in the foregoing scene, has, before they enter upon the stage, given them the directions which were promised at the time of their agreement; and therefore one of the murderers observes, that since he has given them such exact information, he needs not doubt of their performance. Then, by way of exhortation to his associates, he cries out,

——— To the direction just.

Now nothing remains but that we conform exactly to *Macbeth's* directions.

#### NOTE XXVIII.—SCENE V.

*Macbeth*. You know your own degrees, sit down: At first and last the hearty welcome.

As this passage stands, not only the numbers are very imperfect, but the sense, if any can be found, weak and contemptible. The numbers will be improved by reading.

— Sit down at first,  
And last a hearty welcome.

But for *last*, should then be written *next*. I believe the true reading is,

You know your own degrees, sit down—To first  
And last the hearty welcome.

*All of whatever degree, from the highest to the lowest, may be assured that their visit is well received.*

#### NOTE XXIX.

*Macbeth.*—There's blood upon thy face.

[*To the murderer aside at the door.*]

*Murderer.* 'Tis Banquo's then.

*Macbeth.* 'Tis better thee without, than he within.

The sense apparently requires that this passage should be read thus :

'Tis better thee without, than *him* within.

That is, *I am more pleased that the blood of Banquo should be on thy face, than in his body.*

#### NOTE XXX.

*Lady Macbeth.* Proper stuff!  
This is the very painting of your fear:

[*Aside to Macbeth.*]

This is the air-drawn dagger which you said  
Led you to Duncan. Oh, these flaws and starts  
*Impostures to true fear*, would well become  
A woman's story at a winter's fire,  
Authorised by her grandam. Shame itself!  
Why do you make such fares? When all's done  
You look but on a stool.

As *starts* can neither with propriety nor sense be called *impostures to true fear*, something else was undoubtedly intended by the author, who perhaps wrote,

—These flaws and starts,  
*Impostures true to fear*, would well become  
A woman's story—

These symptoms of terror and amazement might better become *impostures true only to fear*, might become a coward at the recital of such falsehoods as no man could credit, whose understanding was not weakened by his terrors: tales, told by a woman over a fire on the authority of her grandam.

#### NOTE XXXI.

*Macbeth.*—Love and health to all!  
Then I'll sit down: give me some wine, fill full—

I drink to the general joy of the whole table,  
And to our dear friend Banquo whom we miss,  
Would he were here! to all, and him, we thirst  
And all to all.—

Though this passage is, as it now stands, capable of more meanings than one, none of them are very satisfactory; and therefore I am inclined to read it thus :

—To all, and him, we thirst,  
And hail to all.

Macbeth, being about to salute his company with a bumper, declares that he includes Banquo, though absent, in this act of kindness, and wishes health to all. *Hail or hail for health* was in such continual use among the good-fellows of ancient times, that a drinker was called a *was-heiler*, or a *wisher of health*, and the liquor was termed *was-heil*, because *health* was so often wished over it. Thus in the lines of Hanvil the Monk,

*Jamque vagante scypho, discincto gutture* was-heil  
*Ingeminaut was-heil; labor est plus perdere vini*  
*Quam sitis.*—

These words were afterwards corrupted into *wassail* and *wassailer*.

#### NOTE XXXII.

*Macbeth.*—Can such things be,  
And overcome us like a summer's cloud  
Without our special wonder? You make me strange  
Even to the disposition that I owe,  
When now I think you can behold such sights,  
And keep the natural ruby of your cheek,  
When mine is blanched with fear.

This passage, as it now stands, is unintelligible, but may be restored to sense by a very slight alteration.

—You make me strange  
Even to the disposition that I know.

*Though I had before seen many instances of your courage, yet it now appears in a degree altogether new. So that my long acquaintance with your disposition does not hinder me from that astonishment which novelty produces.*

#### NOTE XXXIII.

It will have blood, they say blood will have blood, Stones have been known to move, and trees to speak, Augurs, that understood relations, have Bymagpies, and by choughs, and rooks brought forth The secret'st man of blood.—

In this passage the first line loses much of its force by the present punctuation. Macbeth having considered the prodigy which has just appeared, infers justly from it, that the death of Duncan cannot pass unpunished,

*It will have blood.*—

Then after a short pause, declares it as the general observation of mankind, that raurderers cannot escape.

—Thej say, blood will have blood.

Murderers, when they have practised all human means of security, are detected by supernatural directions.

Augurs, that understand relations, &c.

By the word *relation*, is understood the connection of effects with causes; to *understand relations* as an *augur*, is to know how those things relate to each other which have no visible combination or dependence.

#### NOTE XXXIV.—SCENE VII.

*Enter Lenox and another Lord.*

As this tragedy, like the rest of Shakspeare's, is perhaps overstocked with personages, it is not easy to assign a reason why a nameless character should be introduced here, since nothing is said that might not with equal propriety have been put into the mouth of any other disaffected man. I believe, therefore, that in the original copy, it was written with a very common form of contraction, *Lenox and An.* for which the transcriber, instead of *Lenox and Angus*, set down *Lenox and another Lord*. The author had indeed been more indebted to the transcriber's fidelity and diligence, had he committed no errors of greater importance.

#### NOTE XXXV.—ACT IV. SCENE I.

As this is the chief scene of enchantment in the play, it is proper in this place to observe, with how much judgment Shakspeare has selected all the circumstances of his infernal ceremonies, and how exactly he has conformed to common opinions and traditions.

Thrice the brinded cat hath mew'd.

The usual form in which familiar spirits are reported to converse with witches, is that of a cat. A witch who was tried about half a century before the time of Shakspeare, had a cat named *Rutterkin*, as the spirit of one of those witches was *Grimalkin*; and when any mischief was to be done, she used to bid *Rutterkin go and fly*; but once when she would have sent *Rutterkin* to torment a daughter of the Countess of Rutland, instead of *going* or *flying*, he only cried *mew*, from which she discovered that the lady was out of his power, the power of witches being not universal, but limited, as Shakspeare has taken care to inculcate.

Though his bark cannot be lost,  
Yet it shall be tempest tost.

The common afflictions which the malice of witches produced were melancholy, fits, and loss of flesh, which are threatened by one of Shakspeare's witches.

Weary sev'n nights nine times nine  
Shall he dwindle, peak, and pine.

It was likewise their practice to destroy the cattle of their neighbours, and the farmers have to this day many ceremonies to secure their cows and other cattle from witchcraft; but they seem to have been most suspected of malice against swine. Shakspeare has accordingly made one of his witches declare that she has been *killing swine*; and Dr. Harsenet observes, that about that time "a sow could not be ill of the measles, nor a girl of the sullen, but some old woman was charged with witchcraft."

Toad, that under the cold stone  
Days and nights has forty-one  
Swelter'd venom sleeping got,  
Boil thou first i' the charmed pot.

Toads have likewise long lain under the reproach of being by some means necessary to witchcraft, for which reason Shakspeare, in the first scene of this play, calls one of the spirits *padocke* or *toad*, and now takes care to put a toad first into the pot. When Vaninus was seized at Thoulouse, there was found at his lodgings *ingens byfo vitro inclusus, a great toad shut in a vial*, upon which those that prosecuted him *veneficium exprobrabant, charged him*, I suppose, *with witchcraft*.

Fillet of a fenny snake  
In the cauldron boil and bake;  
Eye of newt, and toe of frog;—  
For a charm, &c.

The propriety of these ingredients may be known by consulting the books *de Viribus Animalium* and *de Mirabilibus Mundi*, ascribed to Albertus Magnus, in which the reader, who has time and credulity, may discover very wonderful secrets.

Finger of birth strangled babe,  
Ditch-deliver'd by a drab;—

It has been already mentioned in the law against witches, that they are supposed to take up dead bodies to use in enchantments, which was confessed by the woman whom King James examined, and who had of a dead body, that was divided in one of their assemblies, two fingers for her share. It is observable, that Shakspeare, on this great occasion, which involves the fate of a king, multiplies all the circumstances of horror. The babe whose finger

is used, must be strangled in its birth; the grease must not only be human, but must have dropped from a gibbet, the gibbet of a murderer: and even the sow whose blood is used, must have offended nature by devouring her own farrow. These are touches of judgment and genius.

And now about the cauldron sing —

Blue spirits and white,  
Black spirits and grey,  
Mingle, mingle, mingle,  
You that mingle may.

And in a former part,

Weird sisters hand in hand —  
Thus do go about, about,  
Thrice to mine, and thrice to thine,  
And thrice again to make up nine.

These two passages I have brought together, because they both seem subject to the objection of too much levity for the solemnity of enchantment, and may both be shown, by one quotation from Camden's account of Ireland, to be founded upon a practice really observed by the uncivilized natives of that country. "When any one gets a fall," says the informer of Camden, "he starts up, and turning three times to the right, digs a hole in the earth; for they imagine that there is a spirit in the ground; and if he falls sick in two or three days, they send one of their women that is skilled in that way to the place, where she says, I call thee from the east, west, north, and south, from the groves, the woods, the rivers, and the fens, from the *fairies*, red, black, white." There was likewise a book written before the time of Shakspeare, describing, amongst other properties, the *colours* of spirits.

Many other circumstances might be particularized, in which Shakspeare has shown his judgment and his knowledge.

#### NOTE XXXVI.—SCENE II.

*Macbeth*. Thou art too like the spirit of Banquo,  
down,  
Thy crown does (1) sear my eye-balls, and thy (2)  
*hair*,  
Thou other gold-bound brow, is like the first,  
A third is like the former. —

(1) The expression of *Macbeth*, that the crown sears his eye-balls, is taken from the method formerly practised of destroying the sight of captives or competitors, by holding a burning bason before the eye, which dried up its humidity.

(2) As *Macbeth* expected to see a train of kings, and was only inquiring from what race they would proceed, he could not be surprised that the *hair* of the second was bound with gold

like that of the first; he was offended only that the second resembled the first, as the first resembled Banquo, and therefore said,

—And thy *air*,  
The other gold-bound brow, is like the first.

#### NOTE XXXVII.

I will—give to the edge o' th' sword  
His wife, his babes, and all unfortunate souls  
That trace him in his line—no boasting like a fool,  
This deed I'll do before my purpose cool.

Both the sense and measure of the third line, which as it rhymes, ought, according to the practice of this author, to be regular, are at present injured by two superfluous syllables, which may easily be removed by reading,

—souls  
That trace his line—no boasting like a fool.

#### NOTE XXXVIII.

*Rosse*. Dearest cousin,  
I pray you school yourself; but for your husband,  
He's noble, wise, judicious, and best knows  
The fits o' th' time, I dare not speak much farther,  
But cruel are the times when we are traitors,  
And do not know't ourselves: when we (1) *hold ru-*  
*mour*

*From what we fear*, yet know not what we fear,  
But float upon a wild and violent sea  
Each way, and (2) *move*. I'll take my leave of you;  
Shall not be long but I'll be here again:  
Things at the worst will cease, or else climb upwards  
To what they were before: my pretty cousin,  
Blessing upon you.

(1) —When we hold rumour  
From what we fear, yet know not what we fear.

The present reading seems to afford no sense; and therefore some critical experiments may be properly tried upon it, though, the verses being without any connection, there is room for suspicion, that some intermediate lines are lost, and that the passage is therefore irretrievable. If it be supposed that the fault arises only from the corruption of some words, and that the traces of the true reading are still to be found, the passage may be changed thus:

—When we *bode ruin*  
From what we fear, yet know not what we fear.

Or in a sense very applicable to the occasion of the conference,

—When the *bold running*  
From what they fear, yet know not what they fear.

(2) But float upon a wild and violent sea  
Each way, and move.

That he who floats upon a rough sea must move, is evident, too evident for Shakspeare so emphatically to assert. The line therefore is to be written thus:

Each way, and move—I'll take my leave of you.

Rosse is about to proceed, but finding himself overpowered by his tenderness, breaks off abruptly, for which he makes a short apology and retires.

## NOTE XXXIX.—SCENE IV.

*Malcolm.* Let us seek out some desolate shade, and there

Weep our sad bosoms empty.

*Macduff.* Let us rather

Hold fast the mortal sword: and like good men, Bstride our downfal birth-doom: each new morn, New widows howl, new orphans cry, new sorrows Strike heaven on the face, that it resounds As if it felt with Scotland, and yell'd out Like syllables of dolour.

He who can discover what is meant by him that earnestly exhorts him to *bestride his downfal birthdom*, is at liberty to adhere to the present text; but those who are willing to confess that such counsel would to them be unintelligible, must endeavour to discover some reading less obscure. It is probable that Shakspeare wrote,

—— Like good men

Bstride our downfaln birthdom.——

The allusion is to a man from whom something valuable is about to be taken by violence, and who, that he may defend it without encumbrance, lays it on the ground and stands over it with his weapon in his hand. Our birthdom, or birthright, says he, lies on the ground, let us, like men who are to fight for what is dearest to them, not abandon it, but stand over it and defend it. This is a strong picture of obstinate resolution.

*Birthdom* for *birthright*, is formed by the same analogy with *masterdom* in this play, signifying the *privileges* or *rights* of a *master*.

Perhaps it might be *birth-dame* for *mother*; let us stand over our mother that lies bleeding on the ground.

## NOTE XL.

*Malcolm.* Now we'll together, and the *chance of goodness*

Be like our warranted quarrel.

The *chance of goodness*, as it is commonly read, conveys no sense. If there be not some more important error in the passage, it should at least be pointed thus:

—— And the chance, of goodness,  
Be like our warranted quarrel.

That is, May the event be, of the goodness of

heaven [*pro justitia divina*], answerable to the cause.

But I am inclined to believe that Shakspeare wrote,

—— And the chance, O goodness,  
Be like our warranted quarrel.

This some of his transcribers wrote with a small *o*, which another imagined to mean *of*. If we adopt this reading, the sense will be, and *O thou sovereign goodness to whom we now appeal, may our fortune answer to our cause.*

## NOTE XLI.—ACT V. SCENE III.

*Macbeth.* Bring me no more reports, let them fly all, Till Birnam wood remove to Dunsinane, I cannot taint with fear. What's the boy Malcolm? Was he not born of woman?

—— Fly false Thanes,  
And mingle with the English epicures.

In the first line of this speech, the proper pauses are not observed in the present editions.

Bring me no more reports—let them fly all—

*Tell me not any more of desertions—Let all my subjects leave me—I am safe till, &c.*

The reproach of epicurism, on which Mr. Theobald has bestowed a note, is nothing more than a natural invective uttered by an inhabitant of a barren country, against those who have more opportunities of luxury.

## NOTE XLII.

*Macbeth.* I have lived long enough: my way of life Is fallen into the sear, the yellow leaf.

As there is no relation between the *way of life*, and *fallen into the sear*, I am inclined to think, that the *W* is only an *M* inverted, and that it was originally written, *My May of life*.

*I am now passed from the spring to the autumn of my days, but I am without those comforts that should succeed the sprightliness of bloom, and support me in this melancholy season.*

## NOTE XLIII.—SCENE IV.

*Malcolm.* 'Tis his main hope:

For where there is *advantage to be given*, Both more or less have given him the revolt And none serve with him but constrained things, Whose hearts are absent too.

The impropriety of the expression *advantage to be given*, instead of *advantage given*, and the disagreeable repetition of the word *given* in the next line incline me to read,

—— Where there is a *vantage* to be gone,  
Both more and less have given him the revolt.  
S a

*Advantage or vantage* in the time of Shakspeare, signified opportunity.

*More and less* is the same with *greater and less*. So in the interpolated Mandeville, a book of that age, there is a chapter of *India the more and the less*.

#### NOTE XLIV.—SCENE V.

*Macbeth*.—Wherefore was that cry?

*Seyton*. The queen is dead.

*Macbeth*. She should (1) have died hereafter; There would have been a time for such a word. To-morrow, and to-morrow, and to-morrow, Creeps in this petty pace from day to day, To the last syllable of (2) recorded time; And all our yesterdays have lighted fools The way to dusty death. Out, out, brief candle! Life's but a walking shadow.—

(1) She should have died hereafter,  
There would have been a time for such a word.

This passage has very justly been suspected of being corrupt. It is not apparent for what word there would have been a time; and that there would or would not be a time for any word, seems not a consideration of importance sufficient to transport Macbeth into the following exclamation. I read therefore,

She should have died hereafter,  
There would have been a time for—such a word!—  
To-morrow, &c.

It is a broken speech, in which only part of the thought is expressed, and may be paraphrased thus: *The queen is dead. Macbeth. Her death should have been deferred to some more peaceful hour; had she lived longer, there would at length have been a time for the honours due to her as a queen, and that respect which I owe her for her fidelity and love. Such is the world—such is the condition of human life, that we always think to-morrow will be happier than to-day; but to-morrow and to-morrow steals over us unenjoyed and unregarded, and we still linger in the same expectation to the moment appointed for our end. All these days, which have thus passed away, have sent multitudes of fools to the grave who were engrossed by the same dream of future felicity, and, when life was departing from them, were like me reckoning on to-morrow.*

(2) To the last syllable of recorded time.

*Recorded time* seems to signify the time fixed in the decrees of heaven for the period of life. The records of futurity is indeed no accurate expression, but as we only know transactions past or present, the language of men affords no term for the volumes of prescience, in which future events may be supposed to be written.

#### NOTE XLV.

*Macbeth*. If thou speak'st false,  
Upon the next tree shalt thou hang alive.  
Till famine cling thee: if thy speech be sooth,  
I care not if thou dost for me as much—  
I pull in resolution, and begin  
To doubt th' equivocation of the fiend,  
That lies like truth. "Fear not till Birnam wood  
Do come to Dunsinane," and now a wood  
Comes toward Dunsinane.

I pull in resolution—

Though this is the reading of all the editions, yet as it is a phrase without either example, elegance, or propriety, it is surely better to read,

I pull in resolution—

*I languish in my constancy, my confidence begins to forsake me.* It is scarcely necessary to observe how easily *pull* might be changed into *pull* by a negligent writer, or mistaken for it by an unskilful printer.

#### NOTE XLVI.—SCENE VIII.

*Seyward*. Had I as many sons as I have hairs,  
I would not wish them to a fairer death:  
And so his knell is knoll'd.

This incident is thus related from Henry of Huntingdon by Camden in his "Remains," from which our author probably copied it.

When Seyward, the martial Earl of Northumberland, understood that his son, whom he had sent in service against the Scotchmen, was slain, he demanded whether his wound were in the fore part or hinder part of his body. When it was answered in the fore part, he replied, "I am right glad; neither wish I any other death to me or mine."

AFTER the foregoing pages were printed, the late edition of Shakspeare, ascribed to Sir Thomas Hanmer, fell into my hands; and it was therefore convenient for me to delay the publication of my remarks till I had examined whether they were not anticipated by similar observations, or precluded by better. I therefore read over this tragedy, but found that the editor's apprehension is of a cast so different from mine, that he appears to find no difficulty in most of those passages which I have represented as unintelligible, and has therefore passed smoothly over them, without any attempt to alter or explain them.

Some of the lines with which I had been perplexed, have been indeed so fortunate as to attract his regard; and it is not without all the satisfaction which it is usual to express on such

occasions, that I find an entire agreement between us in substituting [see Note II.] *quarrel* for *quarry*, and in explaining the adage of the cat [Note XVII.]. But this pleasure is, like most others, known only to be regretted; for I have the unhappiness to find no such conformity with regard to any other passage.

The line which I have endeavoured to amend, Note XI., is likewise attempted by the new editor, and is perhaps the only passage in the play in which he has not submissively admitted the emendations of foregoing critics. Instead of the common reading,

— Doing every thing  
Safe towards your love and honour,

he has published,

— Doing every thing  
Shaped towards your love and honour.

This alteration, which, like all the rest attempted by him, the reader is expected to admit, without any reason alleged in its defence, is, in my opinion, more plausible than that of Mr. Theobald: whether it is right, I am not to determine.

In the passage which I have altered in Note XL., an emendation is likewise attempted in the late edition, where, for

— And the chance of goodness  
Be like our warranted quarrel,

is substituted—And the chance in goodness—whether with more or less elegance, dignity, and propriety, than the reading which I have offered, I must again decline the province of deciding.

Most of the other emendations which he has endeavoured, whether with good or bad fortune, are too trivial to deserve mention. For surely the weapons of criticism ought not to be blunted against an editor, who can imagine that he is

restoring poetry, while he is amusing himself with alterations like these:

For—*This is the serjeant,  
Who like a good and hardy soldier fought;*

— This is the serjeant, who  
Like a *right* good and hardy soldier fought.

For—Dismay'd not this  
Our captains Macbeth and Banquo? Yes.

— Dismay'd not this  
Our captains *brave* Macbeth and Banquo?—Yes.

Such harmless industry may, surely, be forgiven, if it cannot be praised: may he therefore never want a monosyllable, who can use it with such wonderful dexterity.

*Rumpatur quisquis rumpitur invidia!*

The rest of this edition I have not read, but, from the little that I have seen, think it not dangerous to declare that, in my opinion, its pomp recommends it more than its accuracy. There is no distinction made between the ancient reading, and the innovations of the editor; there is no reason given for any of the alterations which are made; the emendations of former critics are adopted without any acknowledgment, and few of the difficulties are removed which have hitherto embarrassed the readers of Shakspeare.

I would not however be thought to insult the editor, nor to censure him with too much petulance, for having failed in little things, of whom I have been told, that he excels in greater. But I may without indecency observe, that no man should attempt to teach others what he has never learned himself; and that those who, like Themistocles, have studied the arts of policy, and can teach a small state how to grow great, should, like him, disdain to labour in trifles, and consider petty accomplishments as below their ambition.

## PROPOSALS

FOR

PRINTING THE DRAMATIC WORKS OF

WILLIAM SHAKSPEARE.

PRINTED IN THE YEAR 1756.

WHEN the works of Shakspeare are, after so many editions, again offered to the public, it will doubtless be inquired, why Shakspeare stands in more need of critical assistance than

any other of the English writers, and what are the deficiencies of the late attempts, which another editor may hope to supply?

The business of him that republishes an ancient book is to correct what is corrupt, and to explain what is obscure. To have a text corrupt in many places, and in many doubtful, is, among the authors that have written since the use of types, almost peculiar to Shakspeare. Most writers, by publishing their own works, prevent all various readings, and preclude all conjectural criticism. Books indeed are sometimes published after the death of him who produced them; but they are better secured from corruption than these unfortunate compositions. They subsist in a single copy written or revised by the author; and the faults of the printed volume can be only faults of one descent.

But of the works of Shakspeare the condition has been far different: he sold them, not to be printed, but to be played. They were immediately copied for the actors, and multiplied by transcript after transcript, vitiated by the blunders of the penman, or changed by the affectation of the player; perhaps enlarged to introduce a jest, or mutilated to shorten the representation; and printed at last without the concurrence of the author, without the consent of the proprietor, from compilations made by chance or by stealth out of the separate parts written for the theatre; and thus thrust into the world surreptitiously and hastily, they suffered another deprivation from the ignorance and negligence of the printers, as every man who knows the state of the press in that age will readily conceive.

It is not easy for invention to bring together so many causes concurring to vitiate the text. No other author ever gave up his works to fortune and time with so little care; no books could be left in hands so likely to injure them, as plays frequently acted, yet continued in manuscript: no other transcribers were likely to be so little qualified for their task as those who copied for the stage, at a time when the lower ranks of the people were universally illiterate: no other editions were made from fragments so minutely broken, and so fortuitously re-united; and in no other age was the art of printing in such unskilful hands.

With the causes of corruption that make the revival of Shakspeare's dramatic pieces necessary, may be enumerated the causes of obscurity, which may be partly imputed to his age, and partly to himself.

When a writer outlives his contemporaries, and remains almost the only unforgotten name of a distant time, he is necessarily obscure. Every age has its modes of speech, and its cast of thought; which, though easily explained when there are many books to be compared with each other, become sometimes unintelligible, and always difficult, when there are no parallel pas-

sages that may conduce to their illustration. Shakspeare is the first considerable author of sublime or familiar dialogue in our language. Of the books which he read, and from which he formed his style, some perhaps have perished, and the rest are neglected. His imitations are therefore unnoted, his allusions are undiscovered, and many beauties, both of pleasantry and greatness, are lost with the objects to which they were united, as the figures vanish when the canvass has decayed.

It is the great excellence of Shakspeare, that he drew his scenes from nature, and from life. He copied the manners of the world then passing before him, and has more allusions than other poets to the traditions and superstition of the vulgar; which must therefore be traced before he can be understood.

He wrote at a time when our poetical language was yet unformed, when the meaning of our phrases was yet in fluctuation, when words were adopted at pleasure from the neighbouring languages, and while the Saxon was still visibly mingled in our diction. The reader is therefore embarrassed at once with dead and with foreign languages, with obsolescence and innovation. In that age, as in all others, fashion produced phraseology, which succeeding fashion swept away before its meaning was generally known, or sufficiently authorized: and in that age, above all others, experiments were made upon our language, which distorted its combinations, and disturbed its uniformity.

If Shakspeare has difficulties above other writers, it is to be imputed to the nature of his work, which required the use of the common colloquial language, and consequently admitted many phrases allusive, elliptical, and proverbial, such as we speak and hear every hour without observing them: and of which, being now familiar, we do not suspect that they can ever grow uncouth, or that, being now obvious, they can ever seem remote.

These are the principal causes of the obscurity of Shakspeare; to which might be added the fulness of idea, which might sometimes load his words with more sentiment than they could conveniently convey, and that rapidity of imagination which might hurry him to a second thought before he had fully explained the first. But my opinion is, that very few of his lines were difficult to his audience, and that he used such expressions as were then common, though the paucity of contemporary writers makes them now seem peculiar.

Authors are often praised for improvement, or blamed for innovation, with very little justice, by those who read few other books of the same age. Addison himself has been so unsuccessful in enumerating the words with which Milton has enriched our language, as perhaps not to have named one of which Milton was the

author; and Bentley has yet more unhappily praised him as the introducer of those elisions into English poetry, which had been used from the first essays of versification among us, and which Milton was indeed the last that practised.

Another impediment, not the least vexatious to the commentator, is the exactness with which Shakspeare followed his authors. Instead of dilating his thoughts into generalities, and expressing incidents with poetical latitude, he often combines circumstances unnecessary to his main design, only because he happened to find them together. Such passages can be illustrated only by him who has read the same story in the very book which Shakspeare consulted.

He that undertakes an edition of Shakspeare, has all these difficulties to encounter, and all these obstructions to remove.

The corruptions of the text will be corrected by a careful collation of the oldest copies, by which it is hoped that many restorations may yet be made: at least it will be necessary to collect and note the variation as materials for future critics; for it very often happens that a wrong reading has affinity to the right.

In this part all the present editions are apparently and intentionally defective. The critics did not so much as wish to facilitate the labour of those that followed them. The same books are still to be compared; the work that has been done, is to be done again; and no single edition will supply the reader with a text on which he can rely as the best copy of the works of Shakspeare.

The edition now proposed will at least have this advantage over others. It will exhibit all the observable varieties of all the copies that can be found; that if the reader is not satisfied with the editor's determination, he may have the means of choosing better for himself.

Where all the books are evidently vitiated, and collation can give no assistance, then begins the task of critical sagacity: and some changes may well be admitted in a text never settled by the author, and so long exposed to caprice and ignorance. But nothing shall be imposed, as in the Oxford edition, without notice of the alteration; nor shall conjecture be wantonly or unnecessarily indulged.

It has been long found, that very specious emendations do not equally strike all minds with conviction, nor even the same mind at different times; and therefore, though perhaps many alterations may be proposed as eligible, very few will be obtruded as certain. In a language so ungrammatical as the English, and so licentious as that of Shakspeare, emendatory criticism is always hazardous; nor can it be allowed to any man who is not particularly versed in the writings of that age, and particularly studious of his author's diction. There is danger lest peculiarities should be mistaken for cor-

ruptions, and passages rejected as unintelligible, which a narrow mind happens not to understand.

All the former critics have been so much employed on the correction of the text, that they have not sufficiently attended to the elucidation of passages obscured by accident or time. The editor will endeavour to read the books which the author read, to trace his knowledge to its source, and compare his copies with their originals. If in this part of his design he hopes to attain any degree of superiority to his predecessors, it must be considered that he has the advantage of their labours; that part of the work being already done, more care is naturally bestowed on the other part; and that, to declare the truth, Mr. Rowe and Mr. Pope were very ignorant of the ancient English literature; Dr. Warburton was detained by more important studies; and Mr. Theobald, if fame be just to his memory, considered learning only as an instrument of gain, and made no farther inquiry after his author's meaning, when once he had notes sufficient to embellish his page with the expected decorations.

With regard to obsolete or peculiar diction, the editor may perhaps claim some degree of confidence, having had more motives to consider the whole extent of our language than any other man from its first formation. He hopes that, by comparing the works of Shakspeare with those of writers who lived at the same time, immediately preceded, or immediately followed him, he shall be able to ascertain his ambiguities, disentangle his intricacies, and recover the meaning of words now lost in the darkness of antiquity.

When therefore any obscurity arises from an allusion to some other book, the passage will be quoted. When the diction is entangled, it will be cleared by a paraphrase or interpretation. When the sense is broken by the suppression of part of the sentiment in pleasantry or passion, the connection will be supplied. When any forgotten custom is hinted, care will be taken to retrieve and explain it. The meaning assigned to doubtful words will be supported by the authorities of other writers, or by parallel passages of Shakspeare himself.

The observation of faults and beauties is one of the duties of an annotator, which some of Shakspeare's editors have attempted, and some have neglected. For this part of his task, and for this only, was Mr. Pope eminently and indisputably qualified; nor has Dr. Warburton followed him with less diligence or less success. But I have never observed that mankind was much delighted or improved by their asterisks, commas, or double commas; of which the only effect is, that they preclude the pleasure of judging for ourselves, teach the young and ignorant to decide without principles; defeat

curiosity and discernment, by leaving them less to discover; and at last show the opinion of the critic, without the reasons on which it was founded, and without affording any light by which it may be examined.

The editor, though he may less delight his own vanity, will probably please his reader more, by supposing him equally able with himself to judge of beauties and faults, which require no previous acquisition of remote knowledge. A description of the obvious scenes of nature, a representation of general life, a sentiment of reflection or experience, a deduction of conclusive arguments, a forcible eruption of effervescent passion, are to be considered as proportionate to common apprehension, unassisted by critical officiousness; since to convince them, nothing more is requisite than acquaintance with the general state of the world, and those faculties which he must almost bring with him who would read Shakspeare.

But when the beauty arises from some adaptation of the sentiment to customs worn out of

use, to opinions not universally prevalent, or to any accidental or minute particularity, which cannot be supplied by common understanding, or common observation, it is the duty of a commentator to lend his assistance.

The notice of beauties and faults thus limited, will make no distinct part of the design, being reducible to the explanation of obscure passages.

The editor does not however intend to preclude himself from the comparison of Shakspeare's sentiments or expression with those of ancient or modern authors, or from the display of any beauty not obvious to the students of poetry; for as he hopes to leave his author better understood, he wishes likewise to procure him more rational approbation.

The former editors have affected to slight their predecessors: but in this edition all that is valuable will be adopted from every commentator, that posterity may consider it as including all the rest, and exhibiting whatever is hitherto known of the great father of the English drama.

## PREFACE TO SHAKSPEARE.

PUBLISHED IN THE YEAR 1768.

THAT praises are without reason lavished on the dead, and that the honours due only to excellence are paid to antiquity, is a complaint likely to be always continued by those, who, being able to add nothing to truth, hope for eminence from the heresies of paradox; or those, who, being forced by disappointment upon consolatory expedients, are willing to hope from posterity what the present age refuses, and flatter themselves that the regard, which is yet denied by envy, will be at last bestowed by time.

Antiquity, like every other quality that attracts the notice of mankind, has undoubtedly votaries that reverence it, not from reason, but from prejudice. Some seem to admire indiscriminately, whatever has been long preserved, without considering that time has sometimes co-operated with chance; all perhaps are more willing to honour past than present excellence; and the mind contemplates genius through the shades of age, as the eye surveys the sun through artificial opacity. The great contention of criticism is to find the faults of the moderns, and

the beauties of the ancients. While an author is yet living we estimate his powers by his worst performance, and when he is dead, we rate them by his best.

To works, however, of which the excellence is not absolute and definite, but gradual and comparative; to works not raised upon principles demonstrative and scientific, but appealing wholly to observation and experience, no other test can be applied than length of duration and continuance of esteem. What mankind have long possessed, they have often examined and compared; and if they persist to value the possession, it is because frequent comparisons have confirmed opinion in its favour. As among the works of nature no man can properly call a river deep, or a mountain high, without the knowledge of many mountains, and many rivers; so, in the productions of genius, nothing can be styled excellent till it has been compared with other works of the same kind. Demonstration immediately displays its power, and has nothing to hope or fear from the flux of years; but

works tentative and experimental must be estimated by their proportion to the general and collective ability of man, as it is discovered in a long succession of endeavours. Of the first building that was raised, it might be with certainty determined that it was round or square; but whether it was spacious or lofty must have been referred to time. The Pythagorean scale of numbers was at once discovered to be perfect; but the poems of Homer we yet know not to transcend the common limits of human intelligence, but by remarking that nation after nation, and century after century, has been able to do little more than transpose his incidents, new-name his characters, and paraphrase his sentiments.

The reverence due to writings that have long subsisted, arises therefore not from any credulous confidence in the superior wisdom of past ages, or gloomy persuasion of the degeneracy of mankind, but is the consequence of acknowledged and indubitable positions, that what has been longest known has been most considered, and what is most considered is best understood.

The poet, of whose works I have undertaken the revision, may now begin to assume the dignity of an ancient, and claim the privilege of establishing fame and prescriptive veneration. He has long outlived his century, the term commonly fixed as the test of literary merit. Whatever advantages he might once derive from personal allusions, local customs, or temporary opinions, have for many years been lost; and every topic of merriment, or motive of sorrow, which the modes of artificial life afforded him, now only obscure the scenes which they once illuminated. The effects of favour and competition are at an end; the tradition of his friendships and his enmities has perished; his works support no opinion with arguments, nor supply any faction with invectives; they can neither indulge vanity, nor gratify malignity; but are read without any other reason than the desire of pleasure, and are therefore praised only as pleasure is obtained; yet, thus unassisted by interest or passion, they have passed through variations of taste, and changes of manners, and, as they devolved from one generation to another, have received new honours at every transmission.

But because human judgment, though it be gradually gaining upon certainty, never becomes infallible; and approbation, though long continued, may yet be only the approbation of prejudice or fashion; it is proper to inquire, by what peculiarities of excellence Shakspeare has gained and kept the favour of his countrymen.

Nothing can please many, and please long, but just representations of general nature. Particular manners can be known to few, and therefore few only can judge how nearly they

are copied. The irregular combinations of fanciful invention may delight awhile, by that novelty of which the common satiety of life sends us all in quest; but the pleasures of sudden wonder are soon exhausted, and the mind can only repose on the stability of truth.

Shakspeare is, above all writers, at least above all modern writers, the poet of nature; the poet that holds up to his readers a faithful mirror of manners and of life. His characters are not modified by the customs of particular places, unpractised by the rest of the world; by the peculiarities of studies or professions, which can operate but upon small numbers; or by the accidents of transient fashions or temporary opinions: they are the genuine progeny of common humanity, such as the world will always supply, and observation will always find. His persons act and speak by the influence of those general passions and principles by which all minds are agitated, and the whole system of life is continued in motion. In the writings of other poets a character is too often an individual: in those of Shakspeare it is commonly a species.

It is from this wide extension of design that so much instruction is derived. It is this which fills the plays of Shakspeare with practical axioms and domestic wisdom. It was said of Euripides, that every verse was a precept; and it may be said of Shakspeare, that from his works may be collected a system of civil and economical prudence. Yet his real power is not shown in the splendour of particular passages, but by the progress of his fable, and the tenor of his dialogue; and he that tries to recommend him by select quotations, will succeed like the pedant in Hierocles, who, when he offered his house to sale, carried a brick in his pocket as a specimen.

It will not easily be imagined how much Shakspeare excels in accommodating his sentiments to real life, but by comparing him with other authors. It was observed of the ancient schools of declamation, that the more diligently they were frequented, the more was the student disqualified for the world, because he found nothing there which he should ever meet in any other place. The same remark may be applied to every stage but that of Shakspeare. The theatre, when it is under any other direction, is peopled by such characters as were never seen, conversing in a language which was never heard, upon topics which will never arise in the commerce of mankind. But the dialogue of this author is often so evidently determined by the incident which produces it, and is pursued with so much ease and simplicity, that it seems scarcely to claim the merit of fiction, but to have been gleaned by diligent selection out of common conversation, and common occurrences.

Upon every other stage the universal agent is

love, by whose power all good and evil is distributed, and every action quickened or retarded. To bring a lover, a lady, and a rival into the fable; to entangle them in contradictory obligations, perplex them with oppositions of interest, and harass them with violence of desires inconsistent with each other; to make them meet in rapture, and part in agony; to fill their mouths with hyperbolical joy and outrageous sorrow; to distress them as nothing human ever was distressed; to deliver them as nothing human ever was delivered; is the business of a modern dramatist. For this, probability is violated, life is misrepresented, and language is depraved. But love is only one of many passions; and as it has no great influence upon the sum of life, it has little operation in the dramas of a poet, who caught his ideas from the living world, and exhibited only what he saw before him. He knew that any other passion, as it was regular or exorbitant, was a cause of happiness or calamity.

Characters thus ample and general were not easily discriminated and preserved, yet perhaps no poet ever kept his personages more distinct from each other. I will not say with Pope, that every speech may be assigned to the proper speaker, because many speeches there are which have nothing characteristic; but, perhaps, though some may be equally adapted to every person, it will be difficult to find that any can be properly transferred from the present possessor to another claimant. The choice is right, when there is reason for choice.

Other dramatists can only gain attention by hyperbolical or aggravated characters, by fabulous and unexampled excellence or depravity, as the writers of barbarous romances invigorated the reader by a giant and a dwarf; and he that should form his expectations of human affairs from the play or from the tale, would be equally deceived. Shakspeare has no heroes; his scenes are occupied only by men, who act and speak as the reader thinks that he should himself have spoken or acted on the same occasion; even where the agency is supernatural, the dialogue is level with life. Other writers disguise the most natural passions and most frequent incidents; so that he who contemplates them in the book, will not know them in the world; Shakspeare approximates the remote, and familiarizes the wonderful: the event which he represents will not happen, but, if it were possible, its effects would probably be such as he has assigned\*; and it may be said, that he has not only shown human nature as it acts in real exi-

gences, but as it would be found in trials to which it cannot be exposed.

This therefore is the praise of Shakspeare, that his drama is the mirror of life; that he who has mazed his imagination, in following the phantoms which other writers raise up before him, may here be cured of his delirious ecstasies, by reading human sentiments in human language, by scenes from which a hermit may estimate the transactions of the world, and a confessor predict the progress of the passions.

His adherence to general nature has exposed him to the censure of critics, who form their judgments upon narrower principles. Dennis and Rymer think his *Romans* not sufficiently *Roman*: and Voltaire censures his kings as not completely royal. Dennis is offended, that Menenius, a senator of Rome, should play the buffoon; and Voltaire perhaps thinks decency violated when the Danish usurper is represented as a drunkard. But Shakspeare always makes nature predominate over accident; and, if he preserves the essential character, is not very careful of distinctions superinduced and adventitious. His story requires Romans or kings, but he thinks only on men. He knew that Rome, like every other city, had men of all dispositions; and wanting a buffoon, he went into the senate-house for that which the senate-house would certainly have afforded him. He was inclined to show an usurper and a murderer not only odious, but despicable; he therefore added drunkenness to his other qualities, knowing that kings love wine like other men, and that wine exerts its natural power upon kings. These are the petty cavils of petty minds; a poet overlooks the casual distinction of country and condition, as a painter, satisfied with the figure, neglects the drapery.

The censure which he has incurred by mixing comic and tragic scenes, as it extends to all his works, deserves more consideration. Let the fact be first stated, and then examined.

Shakspeare's plays are not in the rigorous and critical sense either tragedies or comedies, but compositions of a distinct kind; exhibiting the real state of sublunary nature, which partakes of good and evil, joy and sorrow, mingled with endless variety of proportion and innumerable modes of combination; and expressing the course of the world, in which the loss of one is the gain of another; in which, at the same time, the reveller is hasting to his wine, and the mourner burying his friend; in which the malignity of one is sometimes defeated by the frolic of another; and many mischiefs and many benefits are done and hindered without design.

Out of this chaos of mingled purposes and casualties the ancient poets, according to the laws which custom had prescribed, selected some the crimes of men, and some their absurdities; some the momentous vicissitudes of life,

\* "Querit quod nusquam est gentium, reperit tamen,  
Facit illud verisimile quod mendacium est."

Plauti Pseudolus, Act. I. Sc. iv. STEEVENS.

and some the lighter occurrences; some the terrors of distress, and some the gayeties of prosperity. Thus rose the two modes of imitation, known by the names of *tragedy* and *comedy*, compositions intended to promote different ends by contrary means, and considered as so little allied, that I do not recollect among the Greeks or Romans a single writer who attempted both.

Shakspeare has united the powers of exciting laughter and sorrow not only in one mind, but in one composition. Almost all his plays are divided between serious and ludicrous characters, and, in the successive evolutions of the design, sometimes produce seriousness and sorrow, and sometimes levity and laughter.

That this is a practice contrary to the rules of criticism will be readily allowed; but there is always an appeal open from criticism to nature. The end of writing is to instruct; the end of poetry is to instruct by pleasing. That the mingled drama may convey all the instruction of tragedy or comedy cannot be denied, because it includes both in its alternations of exhibition, and approaches nearer than either to the appearance of life, by showing how great machinations and slender designs may promote or obviate one another, and the high and the low co-operate in the general system by unavoidable concatenation.

It is objected, that by this change of scenes the passions are interrupted in their progression, and that the principal event, being not advanced by a due gradation of preparatory incidents, wants at last the power to move, which constitutes the perfection of dramatic poetry. This reasoning is so specious, that it is received as true even by those who in daily experience feel it to be false. The interchanges of mingled scenes seldom fail to produce the intended vicissitudes of passion. Fiction cannot move so much, but that the attention may be easily transferred; and though it must be allowed that pleasing melancholy be sometimes interrupted by unwelcome levity, yet let it be considered likewise, that melancholy is often not pleasing, and that the disturbance of one man may be the relief of another; that different auditors have different habits; and that, upon the whole, all pleasure consists in variety.

The players, who in their edition divided our author's works into comedies, histories, and tragedies, seem not to have distinguished the three kinds by any very exact or definite ideas.

An action which ended happily to the principal persons, however serious or distressful through its intermediate incidents, in their opinion, constituted a comedy. This idea of a comedy continued long amongst us; and plays were written, which, by changing the catastrophe, were tragedies to-day and comedies to-morrow.

Tragedy was not in those times a poem of

more general dignity or elevation than comedy; it required only a calamitous conclusion, with which the common criticism of that age was satisfied, whatever light pleasure it afforded in its progress.

History was a series of actions, with no other than chronological succession, independent on each other, and without any tendency to introduce or regulate the conclusion. It is not always very nicely distinguished from tragedy. There is not much nearer approach to unity of action in the tragedy of "Antony and Cleopatra," than in the history of "Richard the Second." But a history might be continued through many plays; as it had no plan, it had no limits.

Through all these denominations of the drama, Shakspeare's mode of composition is the same; an interchange of seriousness and merriment, by which the mind is softened at one time, and exhilarated at another. But whatever be his purpose, whether to gladden or depress, or to conduct the story, without vehemence or emotion, through tracts of easy and familiar dialogue, he never fails to attain his purpose; as he commands us, we laugh or mourn, or sit silent with quiet expectation, in tranquillity without indifference.

When Shakspeare's plan is understood, most of the criticisms of Rhymer and Voltaire vanish away. The play of "Hamlet" is opened, without impropriety, by two sentinels; Iago bellows at Brabantio's window, without injury to the scheme of the play, though in terms which a modern audience would not easily endure; the character of Polonius is seasonable and useful; and the grave-diggers themselves may be heard with applause.

Shakspeare engaged in dramatic poetry with the world open before him; the rules of the ancients were yet known to few; the public judgment was unformed; he had no example of such fame as might force him upon imitation, nor critics of such authority as might restrain his extravagance; he therefore indulged his natural disposition; and his disposition, as Rhymer has remarked, led him to comedy. In tragedy he often writes, with great appearance of toil and study, what is written at last with little felicity; but, in his comic scenes, he seems to produce, without labour, what no labour can improve. In tragedy he is always struggling after some occasion to be comic; but in comedy he seems to repose, or to luxuriate, as in a mode of thinking congenial to his nature. In his tragic scenes there is always something wanting, but his comedy often surpasses expectation or desire. His comedy pleases by the thoughts and the language, and his tragedy for the greater part by incident and action. His tragedy seems to be skill, his comedy to be instinct.

The force of his comic scenes has suffered

little diminution from the changes made by a century and a half, in manners or in words. As his personages act upon principles arising from genuine passion, very little modified by particular forms, their pleasures and vexations are communicable to all times and to all places; they are natural, and therefore durable: the adventitious peculiarities of personal habits are only superficial dyes, bright and pleasing for a little while, yet soon fading to a dim tinct, without any remains of former lustre; but the discriminations of true passion are the colours of nature: they pervade the whole mass, and can only perish with the body that exhibits them. The accidental compositions of heterogeneous modes are dissolved by the chance which combined them; but the uniform simplicity of primitive qualities neither admits increase, nor suffers decay. The sand heaped by one flood is scattered by another, but the rock always continues in its place. The stream of time, which is continually washing the dissoluble fabrics of other poets, passes without injury by the adamant of Shakspeare.

If there be, what I believe there is, in every nation, a style which never becomes obsolete, a certain mode of phraseology so consonant and congenial to the analogy and principles of its respective language, as to remain settled and unaltered; this style is probably to be sought in the common intercourse of life, among those who speak only to be understood, without ambition of elegance. The polite are always catching modish innovations, and the learned depart from established forms of speech, in hope of finding or making better; those who wish for distinction forsake the vulgar, when the vulgar is right; but there is a conversation above grossness, and below refinement, where propriety resides, and where this poet seems to have gathered his comic dialogue. He is therefore more agreeable to the ears of the present age than any other author equally remote, and among his other excellences deserves to be studied as one of the original masters of our language.

These observations are to be considered not as unexceptionably constant, but as containing general and predominant truth. Shakspeare's familiar dialogue is affirmed to be smooth and clear, yet not wholly without ruggedness or difficulty; as a country may be eminently fruitful, though it has spots unfit for cultivation: his characters are praised as natural, though their sentiments are sometimes forced, and their actions improbable; as the earth upon the whole is spherical, though its surface is varied with protuberances and cavities.

Shakspeare with his excellences has likewise faults, and faults sufficient to obscure and overwhelm any other merit. I shall show them in the proportion in which they appear to me,

without envious malignity or superstitious veneration. No question can be more innocently discussed than a dead poet's pretensions to renown; and little regard is due to that bigotry which sets candour higher than truth.

His first defect is that to which may be imputed most of the evil in books or in men. He sacrifices virtue to convenience, and is so much more careful to please than instruct, that he seems to write without any moral purpose. From his writings indeed a system of social duty may be selected, for he that thinks reasonably must think morally; but his precepts and axioms drop casually from him; he makes no just distribution of good or evil, nor is always careful to show in the virtuous a disapprobation of the wicked; he carries his persons indifferently through right and wrong, and at the close dismisses them without further care, and leaves their examples to operate by chance. This fault the barbarity of his age cannot extenuate; for it is always a writer's duty to make the world better, and justice is a virtue independent on time or place.

The plots are often so loosely formed, that a very slight consideration may improve them, and so carelessly pursued, that he seems not always fully to comprehend his own design. He omits opportunities of instructing or delighting, which the train of his story seems to force upon him, and apparently rejects those exhibitions which would be more affecting, for the sake of those which are more easy.

It may be observed, that in many of his plays the latter part is evidently neglected. When he found himself near the end of his work, and in view of his reward, he shortened the labour to snatch the profit. He therefore remits his efforts where he should most vigorously exert them, and his catastrophe is improbably produced or imperfectly represented.

He had no regard to distinction of time or place, but gives to one age or nation, without scruple, the customs, institutions, and opinions of another, at the expense not only of likelihood, but of possibility. These faults Pope has endeavoured, with more zeal than judgment, to transfer to his imagined interpolators. We need not wonder to find Hector quoting Aristotle, when we see the loves of Theseus and Hippolyta combined with the gothic mythology of fairies. Shakspeare, indeed, was not the only violator of chronology, for in the same age Sidney, who wanted not the advantages of learning, has, in his "Arcadia," confounded the pastoral with the feudal times, the days of innocence, quiet, and security, with those of turbulence, violence, and adventure.

In his comic scenes he is seldom very successful, when he engages his characters in reciprocations of smartness and contests of sarcasm: their jests are commonly gross, and their

pleasantry licentious; neither his gentlemen nor his ladies have much delicacy, nor are sufficiently distinguished from his clowns by any appearance of refined manners. Whether he represented the real conversation of his time is not easy to determine: the reign of Elizabeth is commonly supposed to have been a time of stateliness, formality, and reserve; yet perhaps the relaxations of that severity were not very elegant. There must, however, have been always some modes of gayety preferable to others, and a writer ought to choose the best.

In tragedy his performance seems constantly to be worse as his labour is more. The effusions of passion, which exigence forces out, are for the most part striking and energetic; but whenever he solicits his invention, or strains his faculties, the offspring of his throes is tumour, meanness, tediousness, and obscurity.

In narration he affects a disproportionate pomp of diction, and a wearisome train of circumlocution, and tells the incident imperfectly in many words, which might have been more plainly delivered in few. Narration in dramatic poetry is naturally tedious, as it is unanimated and inactive, and obstructs the progress of the action; it should therefore always be rapid, and enlivened by frequent interruption. Shakspeare found it an incumbrance, and instead of lightening it by brevity, endeavoured to recommend it by dignity and splendour.

His declamations or set speeches are commonly cold and weak, for his power was the power of nature; when he endeavoured, like other tragic writers, to catch opportunities of amplification, and instead of inquiring what the occasion demanded, to show how much his stores of knowledge could supply, he seldom escapes without the pity or resentment of his reader.

It is incident to him to be now and then entangled with an unwieldy sentiment, which he cannot well express, and will not reject; he struggles with it awhile, and, if it continues stubborn, comprises it in words such as occur, and leaves it to be disentangled and evolved by those who have more leisure to bestow upon it.

Not that always where the language is intricate the thought is subtle, or the image always great where the line is bulky; the equality of words to things is very often neglected, and trivial sentiments and vulgar ideas disappoint the attention, to which they are recommended by sonorous epithets and swelling figures.

But the admirers of this great poet have most reason to complain when he approaches nearest to his highest excellence, and seems fully resolved to sink them in dejection, and mollify them with tender emotions, by the fall of greatness, the danger of innocence or the crosses of love. What he does best, he soon ceases to do.

He is not soft and pathetic without some idle conceit, or contemptible equivocation. He no sooner begins to move, than he counteracts himself; and terror and pity, as they are rising in the mind, are checked and blasted by sudden frigidity.

A quibble is to Shakspeare, what luminous vapours are to the traveller; he follows it at all adventures: it is sure to lead him out of his way, and sure to engulf him in the mire. It has some malignant power over his mind, and its fascinations are irresistible. Whatever be the dignity or profundity of his disquisition, whether he be enlarging knowledge or exalting affection, whether he be amusing attention with incidents, or enchaining it in suspense, let but a quibble spring up before him, and he leaves his work unfinished. A quibble is the golden apple for which he will always turn aside from his career, or stoop from his elevation. A quibble, poor and barren as it is, gave him such delight, that he was content to purchase it, by the sacrifice of reason, propriety, and truth. A quibble was to him the fatal *Cleopatra* for which he lost the world, and was content to lose it.

It will be thought strange; that, in enumerating the defects of this writer, I have not yet mentioned his neglect of the unities; his violation of those laws which have been instituted and established by the joint authority of poets and critics.

For his other deviations from the art of writing, I resign him to critical justice, without making any other demand in his favour, than that which must be indulged to all human excellence: that his virtues be rated with his failings; but from the censure which this irregularity may bring upon him, I shall, with due reverence to that learning which I must oppose, adventure to try how I can defend him.

His histories, being neither tragedies nor comedies, are not subject to any of their laws; nothing more is necessary to all the praise which they expect, than that the changes of action be so prepared as to be understood; that the incidents be various and affecting, and the characters consistent, natural, and distinct. No other unity is intended, and therefore none is to be sought.

In his other works he has well enough preserved the unity of action. He has not, indeed, an intrigue regularly perplexed and regularly unravelled: he does not endeavour to hide his design only to discover it, for this is seldom the order of real events, and Shakspeare is the poet of nature; but his plan has commonly, what Aristotle requires, a beginning, a middle, and an end; one event is concatenated with another, and the conclusion follows by easy consequence. There are perhaps some incidents that might be spared, as in other poets there is much talk that only fills up time upon the

stage; but the general system makes gradual advances, and the end of the play is the end of expectation.

To the unities of time and place he has shown no regard; and perhaps a nearer view of the principles on which they stand will diminish their value, and withdraw from them the veneration which, from the time of Corneille, they have very generally received, by discovering that they have given more trouble to the poet, than pleasure to the auditor.

The necessity of observing the unities of time and place arises from the supposed necessity of making the drama creditable. The critics hold it impossible that an action of months or years can be possibly believed to pass in three hours; or that the spectator can suppose himself to sit in the theatre, while ambassadors go and return between distant kings, while armies are levied and towns besieged, while an exile wanders and returns, or till he whom they saw courting his mistress, shall lament the untimely fall of his son. The mind revolts from evident falsehood, and fiction loses its force when it departs from the resemblance of reality.

From the narrow limitation of time, necessarily arises the contraction of place. The spectator, who knows that he saw the first act at Alexandria, cannot suppose that he sees the next at Rome, at a distance to which not the dragons of Medea could, in so short a time, have transported him; he knows with certainty that he has not changed his place; and he knows that place cannot change itself; that what was a house cannot become a plain; that what was Thebes can never be Persepolis.

Such is the triumphant language with which a critic exults over the misery of an irregular poet, and exults commonly without resistance or reply. It is time, therefore, to tell him by the authority of Shakspeare, that he assumes, as an unquestionable principle, a position, which, while his breath is forming it into words, his understanding pronounces to be false. It is false, that any representation is mistaken for reality; that any dramatic fable in its materiality was ever credible, or, for a single moment, was ever credited.

The objection arising from the impossibility of passing the first hour at Alexandria, and the next at Rome, supposes, that when the play opens, the spectator really imagines himself at Alexandria, and believes that his walk to the theatre has been a voyage to Egypt, and that he lives in the days of Antony and Cleopatra. Surely he that imagines this, may imagine more. He that can take the stage at one time for the palace of the Ptolemies, may take it in half an hour for the promontory of Actium. Delusion, if delusion be admitted, has no certain limitation; if the spectator can be once persuaded, that his old acquaintance are Alexander and

Cæsar, that a room illuminated with candles is the plain of Pharsalia, or the bank of Granicus, he is in a state of elevation above the reach of reason, or of truth, and from the heights of empyrean poetry, may despise the circumscriptions of terrestrial nature. There is no reason why a mind thus wandering in ecstasy, should count the clock, or why an hour should not be a century in that calculture of the brain that can make the stage a field.

The truth is, that the spectators are always in their senses, and know, from the first act to the last, that the stage is only a stage, and that the players are only players. They came to hear a certain number of lines recited with just gesture and elegant modulation. The lines relate to some action, and an action must be in some place; but the different actions that complete a story may be in places very remote from each other; and where is the absurdity of allowing that space to represent first Athens, and then Sicily, which was always known to be neither Sicily nor Athens, but a modern theatre?

By supposition, as place is introduced, time may be extended; the time required by the fable elapses for the most part between the acts; for, of so much of the action as is represented, the real and poetical duration is the same. If, in the first act, preparations for war against Mithridates are represented to be made in Rome, the event of the war may, without absurdity, be represented, in the catastrophe, as happening in Pontus; we know that there is neither war, nor preparation for war; we know that we are neither in Rome nor Pontus; that neither Mithridates nor Lucullus are before us. The drama exhibits successive imitations of successive actions; and why may not the second imitation represent an action that happened years after the first, if it be so connected with it, that nothing but time can be supposed to intervene? Time is, of all modes of existence, most obsequious to the imagination; a lapse of years is as easily conceived as a passage of hours. In contemplation we easily contract the time of real actions, and therefore willingly permit it to be contracted when we only see their imitation.

It will be asked, how the drama moves, if it is not credited. It is credited with all the credit due to a drama. It is credited whenever it moves, as a just picture of a real original; as representing to the auditor what he would himself feel, if he were to do or suffer what is there feigned to be suffered or to be done. The reflection that strikes the heart is not, that the evils before us are real evils, but that they are evils to which we ourselves may be exposed. If there be any fallacy, it is not that we fancy the players, but that we fancy ourselves unhappy for a moment; but we rather lament the possibility

than suppose the presence of misery, as a mother weeps over her babe, when she remembers that death may take it from her. The delight of tragedy proceeds from our consciousness of fiction; if we thought murders and treasons real, they would please no more.

Imitations produce pain or pleasure, not because they are mistaken for realities, but because they bring realities to mind. When the imagination is recreated by a painted landscape, the trees are not supposed capable to give us shade, or the fountains coolness; but we consider how we should be pleased with such fountains playing beside us, and such woods waving over us. We are agitated in reading the history of Henry the Fifth, yet no man takes his book for the field of Agincourt. A dramatic exhibition is a book recited with concomitants that increase or diminish its effect. Familiar comedy is often more powerful on the theatre than in the page; imperial tragedy is always less. The humour of Petruchio may be heightened by grimace; but what voice or what gesture can hope to add dignity or force to the soliloquy of Cato?

A play read affects the mind like a play acted. It is therefore evident, that the action is not supposed to be real; and it follows, that between the acts a longer or shorter time may be allowed to pass, and that no more account of space or duration is to be taken by the auditor of a drama, than by the reader of a narrative, before whom may pass in an hour the life of a hero, or the revolutions of an empire.

Whether Shakspeare knew the unities, and rejected them by design, or deviated from them by happy ignorance, it is, I think, impossible to decide, and useless to inquire. We may reasonably suppose, that, when he rose to notice, he did not want the counsels and admonitions of scholars and critics, and that he at last deliberately persisted in a practice, which he might have begun by chance. As nothing is essential to the fable but unity of action, and as the unities of time and place arise evidently from false assumptions, and, by circumscribing the extent of the drama, lessen its variety, I cannot think it much to be lamented, that they were not known by him, or not observed: nor if such another poet could arise, should I very vehemently reproach him, that his first act passed at Venice, and his next in Cyprus. Such violations of rules merely positive, become the comprehensive genius of Shakspeare, and such censures are suitable to the minute and slender criticisms of Voltaire.

*Non usque adeo permiscuit imis  
Longus summa dies, ut non, si voce Metelli  
Sorventur leges, malint à Cesare tolli.*

Yet when I speak thus slightly of dramatic rules, I cannot but recollect how much wit and

learning may be produced against me; before such authorities I am afraid to stand, not that I think the present question one of those that are to be decided by mere authority, but because it is to be suspected, that these precepts have not been so easily received, but for better reasons than I have yet been able to find. The result of my inquiries, in which it would be ludicrous to boast of impartiality, is, that the unities of time and place are not essential to a just drama; that though they may sometimes conduce to pleasure, they are always to be sacrificed to the nobler beauties of variety and instruction; and that a play written with nice observation of critical rules, is to be contemplated as an elaborate curiosity, as the product of superfluous and ostentatious art, by which is shown, rather what it possible, than what is necessary.

He that, without diminution of any other excellence, shall preserve all the unities unbroken, deserves the like applause, with the architect, who shall display all the orders of architecture in a citadel, without any deduction from its strength: but the principal beauty of a citadel is to exclude the enemy; and the greatest graces of a play are to copy nature, and instruct life.

Perhaps, what I have here not dogmatically but deliberately written, may recall the principles of the drama to a new examination. I am almost frightened at my own temerity; and when I estimate the fame and the strength of those that maintain the contrary opinion, am ready to sink down in reverential silence; as Æneas withdrew from the defence of Troy, when he saw Neptune shaking the wall, and Juno heading the besiegers.

Those whom my arguments cannot persuade to give their approbation to the judgment of Shakspeare, will easily, if they consider the condition of his life, make some allowance for his ignorance.

Every man's performances, to be rightly estimated, must be compared with the state of the age in which he lived, and with his own particular opportunities; and though to the reader a book be not worse or better for the circumstances of the author, yet as there is always a silent reference of human works to human abilities, and as the inquiry how far man may extend his designs, or how high he may rate his native force, is of far greater dignity than in what rank we shall place any particular performance, curiosity is always busy to discover the instruments, as well as to survey the workmanship, to know how much is to be ascribed to original powers, and how much to casual and adventitious help. The palaces of Peru or Mexico were certainly mean and incommensurable habitations, if compared to the houses of European monarchs; yet who could forbear to view

them with astonishment, who remembered that they were built without the use of iron?

The English nation in the time of Shakspeare, was yet struggling to emerge from barbarity. The philology of Italy had been transplanted hither in the reign of Henry the Eighth; and the learned languages had been successfully cultivated by Lilly, Linacre, and More; by Pole, Cheke, and Gardiner; and afterwards by Smith, Clerk, Haddon, and Ascham. Greek was now taught to boys in the principal schools; and those who united elegance with learning, read, with great diligence, the Italian and Spanish poets. But literature was yet confined to professed scholars, or to men and women of high rank. The public was gross and dark; and to be able to read and write, was an accomplishment still valued for its rarity.

Nations, like individuals, have their infancy. A people newly awakened to literary curiosity, being yet unacquainted with the true state of things, knows not how to judge of that which is proposed as its resemblance. Whatever is remote from common appearances, is always welcome to vulgar, as to childish credulity; and of a country unenlightened by learning, the whole people is the vulgar. The study of those who then aspired to plebeian learning was laid out upon adventures, giants, dragons, and enchantments. "The Death of Arthur" was the favourite volume.

The mind which has feasted on the luxurious wonders of fiction, has no taste of the insipidity of truth. A play which imitated only the common occurrences of the world, would upon the admirers of "Palmerin" and "Guy of Warwick" have made little impression; he that wrote for such an audience, was under the necessity of looking round for strange events and fabulous transactions; and that incredulity, by which maturer knowledge is offended, was the chief recommendation of writings, to unskilful curiosity.

Our author's plots are generally borrowed from novels; and it is reasonable to suppose, that he chose the most popular, such as were read by many, and related by more; for his audience could not have followed him through the intricacies of the drama, had they not held the thread of the story in their hands.

The stories which we now find only in remoter authors, were in his time accessible and familiar. The fable of "As you like it," which is supposed to be copied from Chaucer's "Gamelyn," was a little pamphlet of those times; and old Mr. Cibber remembered the tale of "Hamlet" in plain English prose, which the critics have now to seek in Saxo Grammaticus.

His English histories he took from English chronicles and English ballads; and as the ancient writers were made known to his countrymen by versions, they supplied him with new

subjects; he dilated some of Plutarch's lives into plays, when they had been translated by North.

His plots, whether historical or fabulous, are always crowded with incidents, by which the attention of a rude people was more easily caught than by sentiment or argumentation; and such is the power of the marvellous, even over those who despise it, that every man finds his mind more strongly seized by the tragedies of Shakspeare than of any other writer: others please us by particular speeches; but he always makes us anxious for the event, and has perhaps excelled all but Homer in securing the first purpose of a writer, by exciting restless and unquenchable curiosity, and compelling him that reads his work to read it through.

The shows and bustle with which his plays abound have the same original. As knowledge advances, pleasure passes from the eye to the ear, but returns as it declines, from the ear to the eye. Those to whom our author's labours were exhibited, had more skill in pomps or processions than in poetical language, and perhaps wanted some visible and discriminated events, as comments on the dialogue. He knew how he should most please; and whether his practice is more agreeable to nature, or whether his example has prejudiced the nation, we still find that on our stage something must be done as well as said, and inactive declamation is very coldly heard, however musical or elegant, passionate or sublime.

Voltaire expressed his wonder, that our author's extravagances are endured by a nation which has seen the tragedy of "Cato." Let him be answered, that Addison speaks the language of poets; and Shakspeare of men. We find in "Cato" innumerable beauties which enamour us of its author, but we see nothing that acquaints us with human sentiments or human actions; we place it with the fairest and the noblest progeny which judgment propagates by conjunction with learning; but "Othello" is the vigorous and vivacious offspring of observation impregnated by genius. "Cato" affords a splendid exhibition of artificial and fictitious manners, and delivers just and noble sentiments, in diction easy, elevated, and harmonious, but its hopes and fears communicate no vibration to the heart; the composition refers us only to the writer; we pronounce the name of Cato, but we think on Addison.

The work of a correct and regular writer is a garden accurately formed and diligently planted, varied with shades, and scented with flowers; the composition of Shakspeare is a forest, in which oaks extend their branches, and pines tower in the air, interspersed sometimes with weeds and brambles, and sometimes giving shelter to myrtles and to roses; filling the eye with awful pomp, and gratifying the mind with

endless diversity. Other poets display cabinets of precious rarities, minutely finished, wrought into shape, and polished into brightness. Shakspeare opens a mine which contains gold and diamonds in unexhaustible plenty, though clouded by incrustations, debased by impurities, and mingled with a mass of meaner minerals.

It has been much disputed, whether Shakspeare owed his excellence to his own native force, or whether he had the common helps of scholastic education, the precepts of critical science, and the examples of ancient authors.

There has always prevailed a tradition, that Shakspeare wanted learning, that he had no regular education, nor much skill in the dead languages. Jonson, his friend, affirms, that "he had small Latin, and less Greek;" who, besides that he had no imaginable temptation to falsehood, wrote at a time when the character and acquisitions of Shakspeare were known to multitudes. His evidence ought therefore to decide the controversy, unless some testimony of equal force could be opposed.

Some have imagined, that they have discovered deep learning in many imitations of old writers; but the examples which I have known urged were drawn from books translated in his time; or were such easy coincidences of thought, as will happen to all who consider the same subjects; or such remarks on life or axioms of morality as float in conversation, and are transmitted through the world in proverbial sentences.

I have found it remarked, that in this important sentence, *Go before, I'll follow*, we read a translation of *I præ, sequar*. I have been told, that when Caliban, after a pleasing dream, says, *I cry'd to sleep again*, the author imitates Anacreon, who had, like every other man, the same wish on the same occasion.

There are a few passages which may pass for imitations, but so few that the exception only confirms the rule; he obtained them from accidental quotations, or by oral communication, and as he used what he had, would have used more if he had obtained it.

The "Comedy of Errors" is confessedly taken from the *Menæchmi* of Plautus; from the only play of Plautus which was then in English. What can be more probable, than that he who copied that, would have copied more; but that those which were not translated were inaccessible?

Whether he knew the modern languages, is uncertain. That his plays have some French scenes, proves but little; he might easily procure them to be written, and probably, even though he had known the language in the common degree, he could not have written it without assistance. In the story of "Romeo and Juliet," he is observed to have followed the English translation, where it deviates from

the Italian: but this on the other part proves nothing against his knowledge of the original. He was to copy, not what he knew himself, but what was known to his audience.

It is most likely that he had learned Latin sufficiently to make him acquainted with construction, but that he never advanced to an easy perusal of the Roman authors. Concerning his skill in modern languages, I can find no sufficient ground of determination: but as no imitations of French or Italian authors have been discovered, though the Italian poetry was then high in esteem, I am inclined to believe, that he read little more than English, and chose for his fables only such tales as he found translated.

That much knowledge is scattered over his works, is very justly observed by Pope; but it is often such knowledge as books did not supply. He that will understand Shakspeare, must not be content to study him in the closet; he must look for his meaning sometimes among the sports of the field, and sometimes among the manufactures of the shop.

There is, however, proof enough that he was a very diligent reader; nor was our language then so indigent of books, but that he might very liberally indulge his curiosity without excursion into foreign literature. Many of the Roman authors were translated, and some of the Greek; the Reformation had filled the kingdom with theological learning; most of the topics of human disquisition had found English writers; and poetry had been cultivated, not only with diligence, but success. This was a stock of knowledge sufficient for a mind so capable of appropriating and improving it.

But the greater part of his excellence was the product of his own genius. He found the English stage in a state of the utmost rudeness; no essays, either in tragedy or comedy, had appeared, from which it could be discovered to what degree of delight either one or the other might be carried. Neither character nor dialogue were yet understood. Shakspeare may be truly said to have introduced them both amongst us, and in some of his happier scenes to have carried them both to the utmost height.

By what gradations of improvement he proceeded is not easily known; for the chronology of his works is yet unsettled. Rowe is of opinion, that "perhaps we are not to look for his beginning, like those of other writers, in his least perfect works; art had so little, and nature so large, a share in what he did, that for aught I know," says he, "the performances of his youth, as they were the most vigorous, were the best." But the power of nature is only the power of using to any certain purpose the materials which diligence procures, or opportunity supplies. Nature gives no man knowledge, and when images are collected by study and experi-

ence, can only assist in combining or applying them. Shakspeare, however favoured by nature, could impart only what he had learned; and as he must increase his ideas, like other mortals, by gradual acquisition, he, like them, grew wiser as he grew older, could display life better as he knew it more, and instruct with more efficacy as he was himself more amply instructed.

There is a vigilance of observation and accuracy of distinction which books and precepts cannot confer; from this almost all original and native excellence proceeds. Shakspeare must have looked upon mankind with perspicacity, in the highest degree curious and attentive. Other writers borrow their characters from preceding writers, and diversify them only by the accidental appendages of present manners; the dress is a little varied, but the body is the same. Our author has both matter and form to provide; for, except the characters of Chaucer, to whom I think he is not much indebted, there were no writers in English, and perhaps not many in other modern languages, which showed life in its native colours.

The contest about the original benevolence or malignity of man had not yet commenced. Speculation had not yet attempted to analyze the mind, to trace the passions to their sources, to unfold the seminal principles of vice and virtue, or sound the depths of the heart for the motives of action. All those inquiries, which from that time that human nature became the fashionable study, have been made sometimes with nice discernment, but often with idle subtilty, were yet unattempted. The tales, with which the infancy of learning was satisfied, exhibited only the superficial appearances of action, related the events, but omitted the causes, and were formed for such as delighted in wonders rather than in truth. Mankind was not then to be studied in the closet; he that would know the world, was under the necessity of gleaning his own remarks, by mingling as he could in its business and amusements.

Boyle congratulated himself upon his high birth, because it favoured his curiosity, by facilitating his access. Shakspeare had no such advantage; he came to London a needy adventurer, and lived for a time by very mean employments. Many works of genius and learning have been performed in states of life that appear very little favourable to thought or to inquiry; so many, that he who considers them, is inclined to think that he sees enterprize and perseverance predominating over all external agency, and bidding help and hindrance vanish before them. The genius of Shakspeare was not to be depressed by the weight of poverty, nor limited by the narrow conversation to which men in want are inevitably condemned; the incumbrances of his fortune were shaken from his mind, *as dew drops from a lion's mane*.

Though he had so many difficulties to encounter, and so little assistance to surmount them, he has been able to obtain an exact knowledge of many modes of life, and many casts of native dispositions; to vary them with great multiplicity; to mark them by nice distinctions; and to show them in full view by proper combinations. In this part of his performances he had none to imitate, but has been himself imitated by all succeeding writers; and it may be doubted, whether from all his successors more maxims of theoretical knowledge, or more rules of practical prudence, can be collected, than he alone has given to his country.

Nor was his attention confined to the actions of men; he was an exact surveyor of the inanimate world; his descriptions have always some peculiarities, gathered by contemplating things as they really exist. It may be observed that the oldest poets of many nations preserve their reputation, and that the following generations of wit, after a short celebrity, sink into oblivion. The first, whoever they be, must take their sentiments and descriptions immediately from knowledge; the resemblance is therefore just, their descriptions are verified by every eye, and their sentiments acknowledged by every breast. Those whom their fame invites to the same studies, copy partly them, and partly nature, till the books of one age gain such authority, as to stand in the place of nature to another, and imitation, always deviating a little, becomes at last capricious and casual. Shakspeare, whether life or nature be his subject, shows plainly that he has seen with his own eyes; he gives the image which he receives, not weakened or distorted by the intervention of any other mind; the ignorant feel his representations to be just, and the learned see that they are complete.

Perhaps it would not be easy to find any author, except Homer, who invented so much as Shakspeare, who so much advanced the studies which he cultivated, or effused so much novelty upon his age or country. The form, the characters, the language, and the shows of the English drama, are his. "He seems," says Dennis, "to have been the very original of our English tragical harmony, that is, the harmony of blank verse, diversified often by dissyllable and trissyllable terminations. For the diversity distinguishes it from heroic harmony, and by bringing it nearer to common use makes it more proper to gain attention, and more fit for action and dialogue. Such verse we make when we are writing prose; we make such verse in common conversation."

I know not whether this praise is rigorously just. The dissyllable termination, which the critic rightly appropriates to the drama, is to be found, though, I think, not in "Gorboduc," which is confessedly before our author; yet in

"Hieronymo."\* of which the date is not certain, but which there is reason to believe at least as old as his earliest plays. This however is certain, that he is the first who taught either tragedy or comedy to please, there being no theatrical piece of any older writer, of which the name is known, except to antiquaries and collectors of books, which are sought because they are scarce, and would not have been scarce, had they been much esteemed.

To him we must ascribe the praise, unless Spenser may divide it with him, of having first discovered to how much smoothness and harmony the English language could be softened. He has speeches, perhaps sometimes scenes, which have all the delicacy of Rowe, without his effeminacy. He endeavours indeed commonly to strike by the force and vigour of his dialogue, but he never executes his purpose better, than when he tries to soothe by softness.

Yet it must be at last confessed, that as we owe every thing to him, he owes something to us; that, if much of his praise is paid by perception and judgment, much is likewise given by custom and veneration. We fix our eyes upon his graces, and turn them from his deformities, and endure in him what we should in another loathe or despise. If we endured without praising, respect for the father of our drama might excuse us; but I have seen, in the book of some modern critic, a collection of anomalies, which show that he has corrupted language by every mode of depravation, but which his admirer has accumulated as a monument of honour.

He has scenes of undoubted and perpetual excellence; but perhaps not one play, which, if it were now exhibited as the work of a contemporary writer, would be heard to the conclusion. I am indeed far from thinking, that his works were wrought to his own ideas of perfection; when they were such as would satisfy the audience, they satisfied the writer. It is seldom that authors, though more studious of fame than Shakspeare, rise much above the standard of their own age; to add a little to what is best, will always be sufficient for present praise, and those who find themselves exalted into fame, are willing to credit their enemies, and to spare the labour of contending with themselves.

It does not appear that Shakspeare thought his works worthy of posterity, that he levied any ideal tribute upon future times, or had any further prospect, than of present popularity and profit. When his plays had been acted, his hope was at an end; he solicited no addition of honour from the reader. He therefore made no scruple to repeat the same jests in many dia-

logues, or to entangle different plots by the same knot of perplexity; which may be at least forgiven him, by those who recollect, that of Congreve's four comedies, two are concluded by a marriage in a mask, by a deception, which perhaps never happened, and which, whether likely or not, he did not invent.

So careless was this great poet of future fame, that, though he retired to ease and plenty, while he was yet little *declined into the vale of years*, before he could be disgusted with fatigue, or disabled by infirmity, he made no collection of his works, nor desired to rescue those that had been already published from the depravations that obscured them, or secure to the rest a better destiny, by giving them to the world in their genuine state.

Of the plays which bear the name of Shakspeare in the late editions, the greater part were not published till about seven years after his death; and the few which appeared in his life are apparently thrust into the world without the care of the author, and therefore probably without his knowledge.

Of all the publishers, clandestine or professed, the negligence and unskilfulness has by the late revisers been sufficiently shown. The faults of all are indeed numerous and gross, and have not only corrupted many passages perhaps beyond recovery, but have brought others into suspicion which are only obscured by obsolete phraseology, or by the writer's unskilfulness and affectation. To alter is more easy than to explain, and temerity is a more common quality than diligence. Those who saw that they must employ conjecture to a certain degree, were willing to indulge it a little further. Had the author published his own works, we should have sat quietly down to disentangle his intricacies, and clear his obscurities; but now we tear what we cannot loose, and eject what we happen not to understand.

The faults are more than could have happened without the concurrence of many causes. The style of Shakspeare was in itself ungrammatical, perplexed, and obscure; his works were transcribed for the players by those who may be supposed to have seldom understood them; they were transmitted by copiers equally unskilful, who still multiplied errors; they were perhaps sometimes mutilated by the actors, for the sake of shortening the speeches; and were at last printed without correction of the press.

In this state they remained, not as Dr. Warburton supposes, because they were unregarded, but because the editor's art was not yet applied to modern languages, and our ancestors were accustomed to so much negligence of English printers, that they could very patiently endure it. At last an edition was undertaken by Rowe; not because a poet was to be published by a poet, for Rowe seems to have thought very little

U u

\* It appears, from the induction of Ben Jonson's "Bartholomew Fair," to have been acted before the year 1596.—STEEVENS.

on correction or explanation; but that our author's works might appear like those of his fraternity, with the appendages of a life and commendatory preface. Rowe has been clamorously blamed for not performing what he did not undertake; and it is time that justice be done him, by confessing that though he seems to have had no thought of corruption beyond the printer's errors, yet he has made many emendations, if they were not made before, which his successors have received without acknowledgment, and which, if they had produced them, would have filled pages and pages with censures of the stupidity by which the faults were committed, with displays of the absurdities which they involved, with ostentatious exposition of the new reading, and self-congratulations on the happiness of discovering.

As of the other editors I have preserved the prefaces, I have likewise borrowed the author's life from Rowe, though not written with much elegance or spirit; it relates, however, what is now to be known, and therefore deserves to pass through all succeeding publications.

The nation had been for many years content enough with Mr. Rowe's performance, when Mr. Pope made them acquainted with the true state of Shakspeare's text, showed that it was extremely corrupt, and gave reason to hope that there were means of reforming it. He collated the old copies, which none had thought to examine before, and restored many lines to their integrity; but, by a very compendious criticism, he rejected whatever he disliked, and thought more of amputation than of cure.

I know not why he is commended by Dr. Warburton for distinguishing the genuine from the spurious plays. In this choice he exerted no judgment of his own; the plays which he received, were given by Hemings and Condell, the first editors; and those which he rejected, though, according to the licentiousness of the press in those times, they were printed during Shakspeare's life, with his name, had been omitted by his friends, and were never added to his works before the edition of 1664, from which they were copied by the later printers.

This is a work which Pope seems to have thought unworthy of his abilities, being not able to suppress his contempt of *the dull duty of an editor*. He understood but half his undertaking. The duty of a collator is indeed dull, yet, like other tedious tasks, is very necessary; but an emendatory critic would ill discharge his duty, without qualities very different from dullness. In perusing a corrupted piece, he must have before him all possibilities of meaning, with all possibilities of expression. Such must be his comprehension of thought, and such his copiousness of language. Out of many readings possible, he must be able to select that which best suits with the state, opinions, and modes of lan-

guage prevailing in every age, and with his author's particular cast of thought, and turn of expression. Such must be his knowledge, and such his taste. Conjectural criticism demands more than humanity possesses, and he that exercises it with most praise, has very frequent need of indulgence. Let us now be told no more of the dull duty of an editor.

Confidence is the common consequence of success. They whose excellence of any kind has been loudly celebrated, are ready to conclude, that their powers are universal. Pope's edition fell below his own expectations, and he was so much offended when he was found to have left any thing for others to do, that he passed the latter part of his life in a state of hostility with verbal criticism.

I have retained all his notes, that no fragment of so great a writer may be lost; his preface, valuable alike for elegance of composition and justness of remark, and containing a general criticism on his author, so extensive that little can be added, and so exact that little can be disputed, every editor has an interest to suppress, but that every reader would demand its insertion.

Pope was succeeded by Theobald, a man of narrow comprehension, and small acquisitions, with no native and intrinsic splendour of genius, with little of the artificial light of learning, but zealous for minute accuracy, and not negligent in pursuing it. He collated the ancient copies, and rectified many errors. A man so anxiously scrupulous might have been expected to do more, but what little he did was commonly right.

In his reports of copies and editions he is not to be trusted without examination. He speaks sometimes indefinitely of copies, when he has only one. In his enumeration of editions, he mentions the two first folios as of high, and the third folio as of middle authority; but the truth is, that the first is equivalent to all others, and that the rest only deviate from it by the printer's negligence. Whoever has any of the folios, has all, excepting those diversities which mere reiteration of editions will produce. I collated them all at the beginning, but afterwards used only the first.

Of his notes I have generally retained those which he retained himself in his second edition, except when they were confuted by subsequent annotators, or were too minute to merit preservation. I have sometimes adapted his restoration of a comma, without inserting the panegyric in which he celebrated himself for his achievement. The exuberant exorcism of his diction I have often lopped, his triumphant exultations over Pope and Rowe I have sometimes suppressed, and his contemptible ostentation I have frequently concealed; but I have in some places shown him, as he would have shown himself, for the reader's diversion, that the in-

flated emptiness of some notes may justify or excuse the contraction of the rest.

Theobald, thus weak and ignorant, thus mean and faithless, thus petulant and ostentatious, by the good luck of having Pope for his enemy, has escaped, and escaped alone, with reputation, from this undertaking. So willingly does the world support those who solicit favour, against those who command reverence; and so easily is he praised whom no man can envy.

Our author fell then into the hands of Sir Thomas Hanmer, the Oxford editor, a man, in my opinion, eminently qualified by nature for such studies. He had, what is the first requisite to emendatory criticism, that intuition by which the poet's intention is immediately discovered, and that dexterity of intellect which despatches its work by the easiest means. He had undoubtedly read much; his acquaintance with customs, opinions, and traditions, seems to have been large; and he is often learned without show. He seldom passes what he does not understand, without an attempt to find or to make a meaning, and sometimes hastily makes what a little more attention would have found. He is solicitous to reduce to grammar what he could not be sure that his author intended to be grammatical. Shakspeare regarded more the series of ideas, than of words; and his language, not being designed for the reader's desk, was all that he desired it to be, if it conveyed his meaning to the audience.

Hanmer's care of the metre has been too violently censured. He found the measure reformed in so many passages by the silent labours of some editors, with the silent acquiescence of the rest, that he thought himself allowed to extend a little further the licence, which had already been carried so far without reprehension; and of his corrections in general, it must be confessed, that they are often just, and made commonly with the least possible violation of the text.

But, by inserting his emendations, whether invented or borrowed, into the page, without any notice of varying copies, he has appropriated the labour of his predecessors, and made his own edition of little authority. His confidence indeed, both in himself and others, was too great; he supposes all to be right that was done by Pope and Theobald; he seems not to suspect a critic of fallibility; and it was but reasonable that he should claim what he so liberally granted.

As he never writes without careful inquiry, and diligent consideration, I have received all his notes, and believe that every reader will wish for more.

Of the last editor it is more difficult to speak. Respect is due to high place, tenderness to living reputation, and veneration to genius and learning; but he cannot be justly offended at that liberty of which he has himself so frequent-

ly given an example, nor very solicitous what is thought of notes, which he ought never to have considered as part of his serious employments, and which, I suppose, since the ardour of composition is remitted, he no longer numbers among his happy effusions.

The original and predominant error of his commentary, is acquiescence in his first thoughts; that precipitation which is produced by consciousness of quick discernment; and that confidence which presumes to do, by surveying the surface, what labour only can perform, by penetrating the bottom. His notes exhibit sometimes perverse interpretations, and sometimes improbable conjectures; he at one time gives the author more profundity of meaning than the sentence admits, and at another discovers absurdities, where the sense is plain to every other reader. But his emendations are likewise often happy and just; and his interpretation of obscure passages learned and sagacious.

Of his notes, I have commonly rejected those against which the general voice of the public has exclaimed, or which their own incongruity immediately condemns, and which, I suppose, the author himself would desire to be forgotten. Of the rest, to part I have given the highest approbation, by inserting the offered reading in the text; part I have left to the judgment of the reader, as doubtful, though specious; and part I have censured without reserve, but I am sure without bitterness of malice, and, I hope, without wantonness of insult.

It is no pleasure to me, in revising my volumes, to observe how much paper is wasted in confutation. Whoever considers the revolutions of learning, and the various questions of greater or less importance, upon which wit and reason have exercised their powers, must lament the unsuccessfulness of inquiry, and the slow advances of truth, when he reflects that great part of the labour of every writer is only the destruction of those that went before him. The first care of the builder of a new system, is to demolish the fabrics which are standing. The chief desire of him that comments an author is to show how much other commentators have corrupted and obscured him. The opinions prevalent in one age, as truths above the reach of controversy, are confuted and rejected in another, and rise again to reception in remoter times. Thus the human mind is kept in motion without progress. Thus sometimes truth and error, and sometimes contrarieties of error, take each other's place by reciprocal invasion. The tide of seeming knowledge, which is poured over one generation, retires and leaves another naked and barren; the sudden meteors of intelligence, which for a while appear to shoot their beams into the regions of obscurity, on a sudden withdraw their lustre, and leave mortals again to grope their way.

These elevations and depressions of renown, and the contradictions to which all improvers of knowledge must for ever be exposed, since they are not escaped by the highest and brightest of mankind, may surely be endured with patience by critics and annotators, who can rank themselves but as the satellites of their authors. How canst thou beg for life, says Homer's hero to his captive, when thou knowest that thou art now to suffer only what must another day be suffered by Achilles?

Dr. Warburton had a name sufficient to confer celebrity to those who could exalt themselves into antagonists, and his notes have raised a clamour too loud to be distinct. His chief assailants are the authors of "The Canons of Criticism," and of "The Revisal of Shakspeare's text;" of whom one ridicules his errors with airy petulance, suitable enough to the levity of the controversy; the other attacks them with gloomy malignity, as if he were dragging to justice an assassin or incendiary. The one stings like a fly, sucks a little blood, takes a gay flutter, and returns for more; the other bites like a viper, and would be glad to leave inflammations and gangrene behind him. When I think on one, with his confederates, I remember the danger of Coriolanus, who was afraid that *girls with spits, and boys with stones, should slay him in puny battle*; when the other crosses my imagination, I remember the prodigy in Macbeth:

A falcon towering in his pride of place,  
Was by a mousing owl hawk'd at and kill'd.

Let me however do them justice. One is a wit, and one a scholar.\* They have both shown acuteness sufficient in the discovery of faults, and have both advanced some probable interpretations of obscure passages; but when they aspire to conjecture and emendation, it appears how falsely we all estimate our own abilities, and the little which they have been able to perform might have taught them more candour to the endeavours of others.

Before Dr. Warburton's edition, "Critical Observations on Shakspeare" had been published by Mr. Upton,† a man skilled in languages, and acquainted with books, but who seems to have had no great vigour of genius, or

nicety of taste. Many of his explanations are curious and useful, but he likewise, though he professed to oppose the licentious confidence of editors, and adhere to the old copies, is unable to restrain the rage of emendation, though his ardour is ill seconded by his skill. Every cold empiric, when his heart is expanded by a successful experiment, swells into a theorist, and the laborious collator at some unlucky moment frolics in conjecture.

"Critical, historical, and explanatory Notes" have been likewise published upon Shakspeare by Dr. Grey, whose diligent perusal of the old English writers has enabled him to make some useful observations. What he undertook he has well enough performed; but as he neither attempts judicial or emendatory criticism, he employs rather his memory than his sagacity. It were to be wished that all would endeavour to imitate his modesty, who have not been able to surpass his knowledge.

I can say with great sincerity of all my predecessors, what I hope will hereafter be said of me, that not one has left Shakspeare without improvement; nor is there one to whom I have not been indebted for assistance and information. Whatever I have taken from them, it was my intention to refer to its original author, and it is certain, that what I have not given to another, I believed when I wrote it to be my own. In some perhaps I have been anticipated; but if I am ever found to encroach upon the remarks of any other commentator, I am willing that the honour, be it more or less, should be transferred to the first claimant, for his right, and his alone, stands above dispute; the second can prove his pretensions only to himself, nor can himself always distinguish invention, with sufficient certainty, from recollection.

They have all been treated by me with candour, which they have not been careful of observing to one another. It is not easy to discover from what cause the acrimony of a scholiast can naturally proceed. The subjects to be discussed by him are of very small importance; they involve neither property nor liberty; nor favour the interest of sect or party. The various readings of copies, and different interpretations of a passage, seem to be questions that might exercise the wit, without engaging the passions. But whether it be that *small things make mean men proud*, and vanity catches small occasions; or that all contrariety of opinion, even in those that can defend it no longer, makes proud men angry; there is often found in commentators a spontaneous strain of invective and contempt, more eager and venomous than is vented by the most furious controvertist in politics against those whom he is hired to defame.

Perhaps the lightness of the matter may conduce to the vehemence of the agency; when the truth to be investigated is so near to inexistence,

\* It is extraordinary that this gentleman should attempt so voluminous a work as the Revisal of Shakspeare's text, when he tells us in his preface, "he was not so fortunate as to be furnished with either of the folio editions, much less any of the ancient quartos: and even Sir Thomas Hanmer's performance was known to him only by Dr. Warburton's representation."

FARMER.

† Republished by him in 1748, after Dr. Warburton's edition, with alterations, &c. STREVS

as to escape attention, its bulk is to be enlarged by rage and exclamation: that to which all would be indifferent in its original state, may attract notice when the fate of a name is appended to it. A commentator has indeed great temptations to supply by turbulence what he wants of dignity, to beat his little gold to a spacious surface, to work that to foam which no art or diligence can exalt to spirit.

The notes which I have borrowed or written are either illustrative, by which difficulties are explained; or judicial, by which faults and beauties are remarked; or emendatory, by which deprivations are corrected.

The explanations transcribed from others, if I do not subjoin any other interpretation, I suppose commonly to be right, at least I intend by acquiescence to confess, that I have nothing better to propose.

After the labours of all the editors, I found many passages which appeared to me likely to obstruct the greater number of readers, and thought it my duty to facilitate their passage. It is impossible for an expositor not to write too little for some, and too much for others. He can only judge what is necessary by his own experience; and how long soever he may deliberate, will at last explain many lines which the learned will think impossible to be mistaken, and omit many for which the ignorant will want his help. These are censures merely relative, and must be quietly endured. I have endeavoured to be neither superfluously copious, nor scrupulously reserved, and hope that I have made my author's meaning accessible to many, who before were frightened from perusing him, and contributed something to the public, by diffusing innocent and rational pleasure.

The complete explanation of an author not systematic and consequential, but desultory and vagrant, abounding in casual allusions and light hints, is not to be expected from any single scholiast. All personal reflections, when names are suppressed, must be in a few years irrecoverably obliterated; and customs, too minute to attract the notice of law, such as modes of dress, formalities of conversation, rules of visits, disposition of furniture, and practices of ceremony, which naturally find places in familiar dialogue, are so fugitive and unsubstantial, that they are not easily retained or recovered. What can be known will be collected by chance, from the recesses of obscure and obsolete papers, perused commonly with some other view. Of this knowledge every man has some, and none has much; but when an author has engaged the public attention, those who can add any thing to his illustration, communicate their discoveries, and time produces what had eluded diligence.

To time I have been obliged to resign many passages, which, though I did not understand

them, will perhaps hereafter be explained: having, I hope, illustrated some, which others have neglected or mistaken, sometimes by short remarks, or marginal directions such as every editor has added at his will, and often by comments more laborious than the matter will seem to deserve; but that which is most difficult, is not always most important, and to an editor nothing is a trifle by which his author is obscured.

The poetical beauties or defects I have not been very diligent to observe. Some plays have more, and some fewer judicial observations, not in proportion to their difference of merit, but because I gave this part of my design to chance and to caprice. The reader, I believe, is seldom pleased to find his opinion anticipated; it is natural to delight more in what we find or make, than in what we receive. Judgment, like other faculties, is improved by practice, and its advancement is hindered by submission to dictatorial decisions, as the memory grows torpid by the use of a table-book. Some imitation is however necessary; of all skill, part is infused by precept, and part is obtained by habit; I have therefore shown so much as may enable the candidate for criticism to discover the rest.

To the end of most plays I have added short strictures, containing a general censure of faults, or praise of excellence; in which I know not how much I have concurred with the current opinion; but I have not, by any affectation of singularity, deviated from it. Nothing is minutely and particularly examined, and therefore it is to be supposed, that in the plays which are condemned there is much to be praised, and in those which are praised much to be condemned.

The part of criticism in which the whole succession of editors has laboured with the greatest diligence, which has occasioned the most arrogant ostentation, and excited the keenest acrimony, is the emendation of corrupted passages, to which the public attention having been first drawn by the violence of the contention between Pope and Theobald, has been continued by the persecution, which, with a kind of conspiracy, has been since raised against all the publishers of Shakspeare.

That many passages have passed in a state of depravation through all the editions, is indubitably certain; of these the restoration is only to be attempted by collation of copies, or sagacity of conjecture. The collator's province is safe and easy, the conjecturer's perilous and difficult. Yet as the greater part of the plays are extant only in one copy, the peril must not be avoided, nor the difficulty refused.

Of the readings which this emulation of amendment has hitherto produced, some from the labours of every publisher I have advanced

into the text; those are to be considered as in my opinion sufficiently supported; some I have rejected without mention, as evidently erroneous; some I have left in the notes without censure or approbation, as resting in equipoise between objection and defence; and some, which seemed specious but not right, I have inserted with a subsequent animadversion.

Having classed the observations of others, I was at last to try what I could substitute for their mistakes, and how I could supply their omissions. I collated such copies as I could procure, and wished for more, but have not found the collectors of these rarities very communicative. Of the editions which chance or kindness put into my hands I have given an enumeration, that I may not be blamed for neglecting what I had not the power to do.

By examining the old copies, I soon found that the later publishers, with all their boasts of diligence, suffered many passages to stand unauthorised, and contented themselves with Rowe's regulation of the text, even where they knew it to be arbitrary, and with a little consideration might have found it to be wrong. Some of these alterations are only the ejections of a word for one that appeared to him more elegant or more intelligible. These corruptions I have often silently rectified; for the history of our language, and the true force of our words, can only be preserved, by keeping the text of authors free from adulteration. Others, and those very frequent, smoothed the cadence, or regulated the measure; on these I have not exercised the same rigour; if only a word was transposed, or a particle inserted or omitted, I have sometimes suffered the line to stand; for the inconstancy of the copies is such, as that some liberties may be easily permitted. But this practice I have not suffered to proceed far, having restored the primitive diction wherever it could for any reason be preferred.

The emendations, which comparison of copies supplied, I have inserted in the text; sometimes where the improvement was light, without notice, and sometimes with an account of the reasons of the change.

Conjecture, though it be sometimes unavoidable, I have not wantonly or licentiously indulged. It has been my settled principle, that the reading of the ancient books is probably true, and therefore is not to be disturbed for the sake of elegance, perspicuity, or mere improvement of the sense, for though much credit is not due to the fidelity, nor any to the judgment of the first publishers, yet they who had the copy before their eyes were more likely to read it right, than we who read it only by imagination. But it is evident that they have often made strange mistakes by ignorance or negligence, and that therefore something may be properly

attempted by criticism, keeping the middle way between presumption and timidity.

Such criticism I have attempted to practise, and where any passage appeared inextricably perplexed, have endeavoured to discover how it may be recalled to sense, with least violence. But my first labour is, always to turn the old text on every side, and try if there be any interstice, through which the light can find its way; nor would Huetius himself condemn me, as refusing the trouble of research, for the ambition of alteration. In this modest industry I have not been unsuccessful. I have rescued many lines from the violations of temerity, and secured many scenes from the inroads of correction. I have adopted the Roman sentiment, that it is more honourable to save a citizen, than to kill an enemy, and have been more careful to protect than to attack.

I have preserved the common distribution of the plays into acts, though I believe it to be in almost all the plays void of authority. Some of those which are divided in the later editions have no division in the first folio, and some that are divided in the folio have no division in the preceding copies. The settled mode of the theatre requires four intervals in the play; but few, if any, of our author's compositions can be properly distributed in that manner. An act is so much of the drama as passes without intervention of time, or change of place. A pause makes a new act. In every real, and therefore in every imitative, action, the intervals may be more or fewer, the restriction of five acts being accidental and arbitrary. This Shakspeare knew, and this he practised; his plays were written, and at first printed in one unbroken continuity, and ought now to be exhibited with short pauses interposed as often as the scene is changed, or any considerable time is required to pass. This method would at once quell a thousand absurdities.

In restoring the author's works to their integrity, I have considered the punctuation as wholly in my power; for what could be their care of colons and commas, who corrupted words and sentences? Whatever could be done by adjusting points, is therefore silently performed, in some plays with much diligence, in others with less; it is hard to keep a busy eye steadily fixed upon evanescent atoms, or a discursive mind upon evanescent truth.

The same liberty has been taken with a few particles, or other words of slight effect. I have sometimes inserted or omitted them without notice. I have done that sometimes, which the other editors have done always, and which indeed the state of the text may sufficiently justify.

The greater part of readers, instead of blaming us for passing trifles, will wonder that on mere trifles so much labour is expended, with such

Importance of debate, and such solemnity of diction. To these I answer with confidence, that they are judging of an art which they do not understand; yet cannot much reproach them with their ignorance, nor promise that they would become in general, by learning criticism, more useful, happier, or wiser.

As I practised conjecture more, I learned to trust it less; and after I had printed a few plays, resolved to insert none of my own readings in the text. Upon this caution I now congratulate myself, for every day increases my doubt of my emendations.

Since I have confined my imagination to the margin, it must not be considered as very reprehensible, if I have suffered it to play some freaks in its own dominion. There is no danger in conjecture, if it be proposed as conjecture; and while the text remains uninjured, those changes may be safely offered, which are not considered even by him that offers them as necessary or safe.

If my readings are of little value they have not been ostentatiously displayed or importunately obtruded. I could have written longer notes, for the art of writing notes is not of difficult attainment. The work is performed, first by railing at the stupidity, negligence, ignorance, and asinine tastelessness of the former editors, and showing, from all that goes before and all that follows, the inelegance and absurdity of the old reading; then by proposing something, which to superficial readers would seem specious, but which the editor rejects with indignation; then by producing the true reading, with a long paraphrase, and concluding with loud acclamations on the discovery, and a sober wish for the advancement and prosperity of genuine criticism.

All this may be done, and perhaps done sometimes without impropriety. But I have always suspected that the reading is right, which requires many words to prove it wrong; and the emendation wrong, that cannot without so much labour appear to be right. The justness of a happy restoration strikes at once, and the moral precept may be well applied to criticism, *quod dubitas ne feceris*.

To dread the shore which he sees spread with wrecks, is natural to the sailor. I had before my eye so many critical adventures ended in miscarriage, that caution was forced upon me. I encountered in every page wit struggling with its own sophistry, and learning confused by the multiplicity of its views. I was forced to censure those whom I admired, and could not but reflect, while I was dispossessing their emendations, how soon the same fate might happen to my own, and how many of the readings which I have corrected may be by some other editor defended and established.

Critics I saw, that others' names efface,  
And fix their own, with labour, in the place;  
Their own, like others, soon their place resigned,  
Or disappear'd, and left the first behind. *Pope.*

That a conjectural critic should often be mistaken, cannot be wonderful, either to others or himself, if it be considered, that in his art there is no system, no principal and axiomatical truth, that regulates subordinate positions. His chance of error is renewed at every attempt; an oblique view of the passage, a slight misapprehension of a phrase, a casual inattention to the parts connected, is sufficient to make him not only fail, but fail ridiculously; and when he succeeds best, he produces perhaps but one reading of many probable, and he that suggests another will always be able to dispute his claims.

It is an unhappy state, in which danger is hid under pleasure. The allurements of emendation are scarcely resistible. Conjecture has all the joy and all the pride of invention, and he that has once started a happy change, is too much delighted to consider what objections may rise against it.

Yet conjectural criticism has been of great use in the learned world; nor is it my intention to deprecate a study, that has exercised so many mighty minds, from the revival of learning to our own age, from the bishop of Aleria to English Bentley. The critics of ancient authors have, in the exercise of their sagacity, many assistances, which the editor of Shakspeare is condemned to want. They are employed upon grammatical and settled languages, whose construction contributes so much to perspicuity, that Homer has fewer passages unintelligible than Chaucer. The words have not only a known regimen, but invariable quantities, which direct and confine the choice. There are commonly more manuscripts than one; and they do not often conspire in the same mistakes. Yet Scaliger could confess to Salmasius how little satisfaction his emendations gave him. *Illudunt nobis conjectura nostra, quarum nos pudet, posteaquam in meliores codices incidimus*. And Lipsius could complain, that critics were making faults by trying to remove them, *Ut olim vitis, ita nunc remediis laboratur*. And, indeed, where mere conjecture is to be used, the emendations of Scaliger and Lipsius, notwithstanding their wonderful sagacity and erudition, are often vague and disputable, like mine or Theobald's.

Perhaps I may not be more censured for doing wrong, than for doing little; for raising in the public, expectations which at last I have not answered. The expectation of ignorance is indefinite, and that of knowledge is often tyrannical. It is hard to satisfy those who knew not what to demand, or those who demand by de-

sign, what they think impossible to be done. I have indeed disappointed no opinion more than my own; yet I have endeavoured to perform my task with no slight solicitude. Not a single passage in the whole work has appeared to me corrupt, which I have not attempted to restore; or obscure, which I have not endeavoured to illustrate. In many I have failed, like others; and from many, after all my efforts, I have retreated, and confessed the repulse. I have not passed over with affected superiority, what is equally difficult to the reader and to myself, but, where I could not instruct him, have owned my ignorance. I might easily have accumulated a mass of seeming learning upon easy scenes; but it ought not to be imputed to negligence, that, where nothing was necessary, nothing has been done, or that, where others have said enough, I have said no more.

Notes are often necessary, but they are necessary evils. Let him that is yet unacquainted with the powers of Shakspeare, and who desires to feel the highest pleasure that the drama can give, read every play, from the first scene to the last, with utter negligence of all his commentators. When his fancy is once on the wing, let it not stoop at correction or explanation. When his attention is strongly engaged, let it disdain alike to turn aside to the name of Theobald and of Pope. Let him read on through brightness and obscurity, through integrity and corruption; let him preserve his comprehension of the dialogue and his interest in the fable. And when the pleasures of novelty have ceased, let him attempt exactness, and read the commentators.

Particular passages are cleared by notes, but the general effect of the work is weakened. The mind is refrigerated by interruption; the thoughts are diverted from the principal subject; the reader is weary, he suspects not why; and at last throws away the book which he has too diligently studied.

Parts are not to be examined till the whole has been surveyed; there is a kind of intellectual remoteness necessary for the comprehension of any great work in its full design and in its true proportions; a close approach shows the smaller niceties, but the beauty of the whole is discerned no longer.

It is not very grateful to consider how little the succession of editors has added to this au-

thor's power of pleasing. He was read, admired, studied, and imitated, while he was yet deformed with all the improprieties which ignorance and neglect could accumulate upon him; while the reading was yet not rectified, nor his allusions understood; yet then did Dryden pronounce, that Shakspeare was the "man, who, of all modern, and perhaps ancient, poets, had the largest and most comprehensive soul. All the images of nature were still present to him, and he drew them not laboriously, but luckily; when he describes any thing, you more than see it, you feel it too. Those, who accuse him to have wanted learning, give him the greater commendation: he was naturally learned: he needed not the spectacles of books to read nature: he looked inwards, and found her there. I cannot say he is every where alike; were he so, I should do him injury to compare him with the greatest of mankind. He is many times flat and insipid; his comic wit degenerating into clenches, his serious swelling into bombast. But he is always great when some great occasion is presented to him: no man can say, he ever had a fit subject for his wit, and did not then raise himself as high above the rest of poets,

*Quantam lenta solent inter viburna cupressi.'*"

It is to be lamented, that such a writer should want a commentary; that his language should become obsolete, or his sentiments obscure. But it is vain to carry wishes beyond the condition of human things; that which must happen to all, has happened to Shakspeare, by accident and time; and more than has been suffered by any other writer since the use of types, has been suffered by him, through his own negligence of fame, or perhaps by that superiority of mind, which despised its own performances, when it compared them with its powers, and judged those works unworthy to be preserved, which the critics of following ages were to contend for the fame of restoring and explaining.

Among these candidates of inferior fame, I am now to stand the judgment of the public; and wish that I could confidently produce my commentary as equal to the encouragement which I have had the honour of receiving. Every work of this kind is by its nature deficient, and I should feel little solicitude about the sentence, were it to be pronounced only by the skilful and the learned.

## GENERAL OBSERVATIONS

ON THE

## PLAYS OF SHAKSPEARE.

### TEMPEST.

It is observed of "The Tempest," that its plan is regular; this the author of "The Revisor"\* thinks, what I think too, an accidental effect of the story, not intended or regarded by our author. But whatever might be Shakspeare's intention in forming or adopting the plot, he has made it instrumental to the production of many characters diversified with boundless invention, and preserved with profound skill in nature, extensive knowledge of opinions, and accurate observation of life. In a single drama are here exhibited princes, courtiers, and sailors, all speaking in their real characters. There is the agency of airy spirits, and of an earthly goblin; the operations of magic, the tumults of a storm, the adventures of a desert island, the native effusion of untaught affection, the punishment of guilt, and the final happiness of the pair for whom our passions and reason are equally interested.

### TWO GENTLEMEN OF VERONA.

In this play there is a strange mixture of knowledge and ignorance, of care and negligence. The versification is often excellent, the allusions are learned and just; but the author conveys his heroes by sea from one inland town to another in the same country; he places the emperor at Milan, and sends his young men to attend him, but never mentions him more; he makes Protheus, after an interview with Silvia, say he has only seen her picture; and, if we may credit the old copies, he has, by mistaking places, left his scenery inextricable. The reason of all this confusion seems to be, that he took his story from a novel, which he sometimes followed, and sometimes forsook, sometimes remembered, and sometimes forgot.

That this play is rightly attributed to Shakspeare, I have little doubt. If it be taken from him, to whom shall it be given? This question

may be asked of all the disputed plays, except "Titus Andronicus;" and it will be found more credible, that Shakspeare might sometimes sink below his highest flights, than that any other should rise up to his lowest.

### MERRY WIVES OF WINDSOR.

Of this play there is a tradition preserved by Mr. Rowe, that it was written at the command of queen Elizabeth, who was so delighted with the character of Falstaff, that she wished it to be diffused through more plays; but suspecting that it might pall by continued uniformity, directed the poet to diversify his manner by showing him in love. No task is harder than that of writing to the ideas of another. Shakspeare knew what the queen, if the story be true, seems not to have known, that by any real passion of tenderness, the selfish craft, the careless jollity, and the lazy luxury of Falstaff must have suffered so much abatement, that little of his former cast would have remained. Falstaff could not love, but by ceasing to be Falstaff. He could only counterfeit love, and his profession could be prompted, not by the hope of pleasure, but of money. Thus the poet approached as near as he could to the work enjoined him; yet having perhaps in the former plays completed his own idea, seems not to have been able to give Falstaff all his former power of entertainment.

This comedy is remarkable for the variety and number of the personages, who exhibit more characters appropriated and discriminated, than perhaps can be found in any other play.

Whether Shakspeare was the first that produced upon the English stage the effect of language distorted and depraved by provincial or foreign pronunciation, I cannot certainly decide. This mode of forming ridiculous characters can confer praise only on him, who originally discovered it, for it requires not much of either wit or judgment; its success must be derived almost wholly from the player, but its power in a skilful mouth, even he that despises it, is unable to resist.

\* Mr. Heath, who wrote a Revisal of Shakspeare's text, published in 8vo. circa 1769.

The conduct of this drama is deficient: the action begins and ends often before the conclusion, and the different parts might change places without inconvenience; but its general power, that power by which all works of genius shall finally be tried, is such, that perhaps it never yet had reader or spectator, who did not think it too soon at an end.

#### MEASURE FOR MEASURE.

THERE is perhaps not one of Shakspeare's plays more darkened than this, by the peculiarities of its author, and the unskilfulness of its editors, by distortions of praise, or negligence of transcription.

The novel of "Giraldi Cynthio," from which Shakspeare is supposed to have borrowed this fable, may be read in "Shakspeare illustrated," elegantly translated, with remarks, which will assist the inquirer to discover how much absurdity Shakspeare has admitted or avoided.

I cannot but suspect that some other had new-modelled this novel of Cynthio, or written a story which in some particulars resembled it, and that Cynthio was not the author whom Shakspeare immediately followed. The emperor, in Cynthio, is named Maximine; the duke, in Shakspeare's enumeration of the persons of the drama, is called Vincentio. This appears a very slight remark; but since the duke has no name in the play, nor is ever mentioned but by his title, why should he be called Vincentio among the *persons*, but because the name was copied from the story, and placed superfluously at the head of the list by the mere habit of transcription? It is therefore likely, that there was then a story of Vincentio, duke of Vienna, different from that of Maximine, emperor of the Romans.

Of this play, the light or comic part is very natural and pleasing, but the grave scenes, if a few passages be excepted, have more labour than elegance. The plot is rather intricate than artful. The time of the action is indefinite; some time, we know not how much, must have elapsed between the recess of the duke, and the imprisonment of Claudio; for he must have learned the story of Mariana in his disguise, or he delegated his power to a man already known to be corrupted. The unities of action and place are sufficiently preserved.

#### LOVE'S LABOUR'S LOST.

IN this play, which all the editors have concurred to censure, and some have rejected as unworthy of our poet, it must be confessed that there are many passages mean, childish, and vulgar; and some which ought not to have been exhibited, as we are told they were, to a maiden queen. But there are scattered through the

whole many sparks of genius; nor is there any play that has more evident marks of the hand of Shakspeare.

#### MIDSUMMER NIGHT'S DREAM.

WILD and fantastical as this play is, all the parts in their various modes are well written, and give the kind of pleasure which the author designed. Fairies in his time were much in fashion; common tradition had made them familiar, and Spenser's poem had made them great.

#### MERCHANT OF VENICE.

IT has been lately discovered, that this fable is taken from a story in the "Pecorone" of Giovanni Fiorentino, a novelist, who wrote in 1378. The story has been published in English, and I have epitomized the translation. The translator is of opinion, that the choice of the caskets is borrowed from a tale of Boccace, which I have likewise abridged, though I believe that Shakspeare must have had some other novel in view.

Of "The Merchant of Venice," the style is even and easy, with few peculiarities of diction, or anomalies of construction. The comic part raises laughter, and the serious fixes expectation. The probability of either one or the other story cannot be maintained. The union of two actions in one event is in this drama eminently happy. Dryden was much pleased with his own address in connecting the two plots of his "Spanish Friar," which yet, I believe, the critic will find excelled by this play.

#### AS YOU LIKE IT.

OF this play the fable is wild and pleasing. I know not how the ladies will approve the facility with which both Rosalind and Celia give away their hearts. To Celia much may be forgiven for the heroism of her friendship. The character of Jacques is natural and well preserved. The comic dialogue is very sprightly, with less mixture of low buffoonery than in some other plays: and the graver part is elegant and harmonious. By hastening to the end of his work, Shakspeare suppressed the dialogue between the usurper and the hermit, and lost an opportunity of exhibiting a moral lesson in which he might have found matter worthy of his highest powers.

#### TAMING OF THE SHREW.

OF this play the two plots are so well united, that they can hardly be called two without injury to the art with which they are interwoven. The attention is entertained with all the variety

of a double plot, yet is not distracted by unconnected incidents.

The part between Katharine and Petruchio is eminently sprightly and diverting. At the marriage of Bianca, the arrival of the real father, perhaps, produces more perplexity than pleasure. The whole play is very popular and diverting.

#### ALL'S WELL THAT ENDS WELL.

This play has many delightful scenes, though not sufficiently probable, and some happy characters, though not new, nor produced by any deep knowledge of human nature. Parolles is a boaster and a coward, such as has always been the sport of the stage, but perhaps never raised more laughter or contempt than in the hands of Shakspeare.

I cannot reconcile my heart to Bertram; a man noble without generosity, and young without truth; who marries Helen as a coward, and leaves her as a prodigate: when she is dead by his unkindness, sneaks home to a second marriage, is accused by a woman whom he has wronged, defends himself by falsehood, and is dismissed to happiness.

The story of Bertram and Diana had been told before of Mariana and Angelo, and, to confess the truth, scarcely merited to be heard a second time.

#### TWELFTH-NIGHT.

This play is in the graver part elegant and easy, and in some of the lighter scenes exquisitely humorous. Ague-cheek is drawn with great propriety, but his character is, in a great measure, that of natural fatuity, and is therefore not the proper prey of a satirist. The soliloquy of Malvolio is truly comic; he is betrayed to ridicule merely by his pride. The marriage of Olivia, and the succeeding perplexity, though well enough contrived to divert on the stage, wants credibility, and fails to produce the proper instruction required in the drama, as it exhibits no just picture of life.

#### WINTER'S TALE.

THE story of this play is taken from "The pleasant History of Dorastus and Fawnia," written by Robert Greene.

This play, as Dr. Warburton justly observes, is, with all its absurdities, very entertaining. The character of Autolycus is very naturally conceived, and strongly represented.

#### MACBETH.

This play is deservedly celebrated for the propriety of its fictions, and solemnity, gran-

deur, and variety of its action, but it has no nice discriminations of character; the events are too great to admit the influence of particular dispositions, and the course of the action necessarily determines the conduct of the agents.

The danger of ambition is well described; and I know not whether it may not be said, in defence of some parts which now seem improbable, that in Shakspeare's time it was necessary to warn credulity against vain and illusive predictions.

The passions are directed to their true end. Lady Macbeth is merely detested; and though the courage of Macbeth preserves some esteem, yet every reader rejoices at his fall.

#### KING JOHN.

THE tragedy of "King John," though not written with the utmost power of Shakspeare, is varied with a very pleasing interchange of incidents and characters. The lady's grief is very affecting; and the character of the bastard contains that mixture of greatness and levity which this author delighted to exhibit.

#### KING RICHARD II.

This play is extracted from the Chronicle of Hollinshed, in which many passages may be found which Shakspeare has, with very little alteration, transplanted into his scenes; particularly a speech of the bishop of Carlisle in defence of King Richard's unalienable right, and immunity from human jurisdiction.

Jonson, who, in his "Catiline and Sejanus," has inserted many speeches from the Roman historians, was perhaps induced to that practice by the example of Shakspeare, who had condescended sometimes to copy more ignoble writers. But Shakspeare had more of his own than Jonson, and if he sometimes was willing to spare his labour, showed by what he performed at other times, that his extracts were made by choice or idleness rather than necessity.

This play is one of those which Shakspeare has apparently revised; but as success in works of invention is not always proportionate to labour, it is not finished at last with the happy force of some other of his tragedies, nor can he said much to affect the passions, or enlarge the understanding.

#### KING HENRY IV. PART II.

I FANCY every reader, when he ends this play, cries out with Desdemona, "O most lame and impotent conclusion!" As this play was not, to our knowledge, divided into acts by the author, I could be content to conclude it with the death of Henry the Fourth.

In that Jerusalem shall Harry die.

These scenes, which now make the fifth act of "Henry the Fourth," might then be the first of "Henry the Fifth;" but the truth is, that they do unite very commodiously to either play. When these plays were represented, I believe they ended as they are now ended in the books; but Shakspeare seems to have designed that the whole series of action, from the beginning of "Richard the Second," to the end of "Henry the Fifth," should be considered by the reader as one work, upon one plan, only broken into parts by the necessity of exhibition.

None of Shakspeare's plays are more read than the "First and Second Parts of Henry the Fourth." Perhaps no author has ever in two plays afforded so much delight. The great events are interesting, for the fate of kingdoms depend upon them; the slighter occurrences are diverting, and, except one or two, sufficiently probable; the incidents are multiplied with wonderful fertility of invention, and the characters diversified with the utmost nicety of discernment, and the profoundest skill in the nature of man.

The prince, who is the hero both of the comic and tragic part, is a young man of great abilities and violent passions, whose sentiments are right, though his actions are wrong; whose virtues are obscured by negligence, and whose understanding is dissipated by levity. In his idle hours he is rather loose than wicked; and when the occasion forces out his latent qualities, he is great without effort, and brave without tumult. The trifier is roused into a hero, and the hero again reposes in the trifier. This character is great, original, and just.

Percy is a rugged soldier, choleric and quarrelsome, and has only the soldier's virtues, generosity and courage.

But Falstaff, unimitated, unimitable Falstaff, how shall I describe thee? Thou compound of sense and vice: of sense which may be admired, but not esteemed; of vice which may be despised, but hardly detested. Falstaff is a character loaded with faults, and with those faults which naturally produce contempt. He is a thief and a glutton, a coward and a boaster, always ready to cheat the weak, and prey upon the poor; to terrify the timorous, and insult the defenceless. At once obsequious and malignant, he satirizes in their absence those whom he lives by flattering. He is familiar with the prince only as an agent of vice, but of this familiarity he is so proud, as not only to be supercilious and haughty with common men, but to think his interest of importance to the duke of Lancaster. Yet the man thus corrupt, thus despicable, makes himself necessary to the prince that despises him, by the most pleasing of all qualities, perpetual gayety, by an unfailling power of exciting laugh-

ter, which is the more freely indulged, as his wit is not of the splendid or ambitious kind, but consists in easy scapes and sallies of levity, which make sport, but raise no envy. It must be observed, that he is stained with no enormous or sanguinary crimes, so that his licentiousness is not so offensive but that it may be borne for his mirth.

The moral to be drawn from this representation is, that no man is more dangerous than he that, with a will to corrupt, hath the power to please; and that neither wit nor honesty ought to think themselves safe with such a companion, when they see Henry seduced by Falstaff.

#### KING HENRY V.

This play has many scenes of high dignity, and many of easy merriment. The character of the king is well supported, except in his courtship, where he has neither the vivacity of Hal, nor the grandeur of Henry. The humour of Pistol is very happily continued: his character has perhaps been the model of all the bullies that have yet appeared on the English stage.

The lines given to the chorus have many admirers; but the truth is, that in them a little may be praised, and much must be forgiven: nor can it be easily discovered why the intelligence given by the chorus is more necessary in this play, than in many others where it is omitted. The great defect of this play is the emptiness and narrowness of the last act, which a very little diligence might have easily avoided.

#### KING HENRY VI. PART I.

Of this play there is no copy earlier than that of the folio in 1623, though the two succeeding parts are extant in two editions in quarto. That the second and third parts were published without the first, may be admitted as no weak proof that the copies were surreptitiously obtained, and that the printers of that time gave the public those plays, not such as the author designed, but such as they could get them. That this play was written before the two others, is undoubtedly collected from the series of events; that it was written and played before Henry the Fifth, is apparent, because in the epilogue there is mention made of this play, and not of the other parts:

Henry the Sixth in swaddling bands crown'd king,  
Whose state so many had the managing  
That they lost France, and made his England bleed,  
Which oft our stage hath shown.

France is lost in this play. The two following contain, as the old title imports, the contention of the houses of York and Lancaster.

The second and third parts of "Henry VI."

were printed in 1600. When "Henry V." was written, we know not, but it was printed likewise in 1600, and therefore before the publication of the first part: the first part of "Henry VI." had been often shown on the stage, and would certainly have appeared in its place had the author been the publisher.

### KING HENRY VI. PART III.

THE three parts of "Henry VI." are suspected, by Mr. Theobald, of being supposititious, and are declared, by Dr. Warburton, to be certainly not Shakspeare's. Mr. Theobald's suspicion arises from some obsolete words; but the phraseology is like the rest of our author's style, and single words, of which however I do not observe more than two, can conclude little.

Dr. Warburton gives no reason, but I suppose him to judge upon deeper principles and more comprehensive views, and to draw his opinion from the general effect and spirit of the composition, which he thinks inferior to the other historical plays.

From mere inferiority nothing can be inferred; in the productions of wit there will be inequality. Sometimes judgment will err, and sometimes the matter itself will defeat the artist. Of every author's works one will be the best and one will be the worst. The colours are not equally pleasing, nor the attitudes equally graceful, in all the pictures of Titian or Reynolds.

Dissimilitude of style, and heterogeneousness of sentiment, may sufficiently show that a work does not really belong to the reputed author. But in these plays no such marks of spuriousness are found. The diction, the versification, and the figures, are Shakspeare's. These plays, considered, without regard to characters and incidents, merely as narratives in verse, are more happily conceived, and more accurately finished, than those of "King John," "Richard II." or the tragic scenes of "Henry IV. and V." If we take these plays from Shakspeare, to whom shall they be given? What author of that age had the same easiness of expression and fluency of numbers?

Having considered the evidence given by the plays themselves, and found it in their favour, let us now inquire what corroboration can be gained from other testimony. They are ascribed to Shakspeare by the first editors, whose attestation may be received in questions of fact, however unskillfully they superintended their edition. They seem to be declared genuine by the voice of Shakspeare himself, who refers to the second play in his epilogue to "Henry V.," and apparently connects the first act of "Richard III." with the last of the third part of "Henry VI." If it be objected that the plays were popular, and that therefore he alluded to them as well known; it may be answered, with

equal probability, that the natural passions of a poet would have disposed him to separate his own works from those of an inferior hand. And, indeed, if an author's own testimony is to be overthrown by speculative criticism, no man can be any longer secure of literary reputation.

Of these three plays I think the second the best. The truth is, that they have not sufficient variety of action, for the incidents are too often of the same kind; yet many of the characters are well discriminated. King Henry and his queen, king Edward, the duke of Gloucester, and the earl of Warwick, are very strongly and distinctly painted.

The old copies of the two latter parts of "Henry VI." and of "Henry V.," are so apparently imperfect and mutilated, that there is no reason for supposing them the first draughts of Shakspeare. I am inclined to believe them copies taken by some auditor who wrote down, during the representation, what the time would permit, then perhaps filled up some of his omissions at a second or third hearing, and when he had by this method formed something like a play, sent it to the printer.

### KING RICHARD III.

THIS is one of the most celebrated of our author's performances; yet I know not whether it has not happened to him, as to others, to be praised most, when praise is not most deserved. That this play has scenes noble in themselves, and very well contrived to strike in the exhibition, cannot be denied. But some parts are trifling, others shocking, and some improbable.

I have nothing to add to the observations of the learned critics, but that some traces of this antiquated exhibition are still retained in the rustic puppet-plays, in which I have seen the Devil very lustily belaboured by Punch, whom I hold to be the legitimate successor of the old Vice.

### KING HENRY VIII.

THE play of "Henry the Eighth" is one of those which still keep possession of the stage by the splendour of its pageantry. The coronation, about forty years ago, drew the people together in multitudes for a great part of the winter. Yet pomp is not the only merit of this play. The meek sorrows and virtuous distress of Katharine have furnished some scenes, which may be justly numbered among the greatest efforts of tragedy. But the genius of Shakspeare comes in and goes out with Katharine. Every other part may be easily conceived, and easily written.

The historical dramas are now concluded, of

which the two parts of "Henry the Fourth," and "Henry the Fifth," are among the happiest of our author's compositions; and "King John," "Richard the Third," and "Henry the Eighth," deservedly stand in the second class. Those whose curiosity would refer the historical scenes to their original, may consult *Wyllinshed*, and sometimes *Hall*: from *Hollinshed*, Shakspeare has often inserted whole speeches with no more alteration than was necessary to the numbers of his verse. To transcribe them into the margin was unnecessary, because the original is easily examined, and they are seldom less perspicuous in the poet than in the historian.

To play histories, or to exhibit a succession of events by action and dialogue, was a common entertainment among our rude ancestors, upon great festivities. The parish clerks once performed at Clerkenwell a play which lasted three days, containing "The History of the World."

#### CORIOLANUS.

THE tragedy of "Coriolanus" is one of the most amusing of our author's performances. The old man's merriment in *Menenius*; the lofty lady's dignity in *Volumnia*; the bridal modesty in *Virgilia*; the patrician and military haughtiness in *Coriolanus*; the plebeian malignity, and tribunitian insolence, in *Brutus* and *Sicinius*, make a very pleasing and interesting variety: and the various revolutions of the hero's fortune fill the mind with anxious curiosity. There is, perhaps, too much bustle in the first act, and too little in the last.

#### JULIUS CÆSAR.

OF this tragedy many particular passages deserve regard, and the contention and reconciliation of *Brutus* and *Cassius* is universally celebrated; but I have never been strongly agitated in perusing it, and think it somewhat cold and unaffecting, compared with some other of Shakspeare's plays; his adherence to the real story, and to Roman manners, seems to have impeded the natural vigour of his genius.

#### ANTONY AND CLEOPATRA.

THIS play keeps curiosity always busy, and the passions always interested. The continual hurry of the action, the variety of incidents, and the quick succession of one personage to another, call the mind forward without intermission from the first act to the last. But the power of delighting is derived principally from the frequent changes of the scene; for except the feminine arts, some of which are too low, which distinguish *Cleopatra*, no character is very

strongly discriminated. *Upton*, who did not easily miss what he desired to find, has discovered that the language of *Antony* is, with great skill and learning, made pompous and superb, according to his real practice. But I think his diction not distinguishable from that of others: the most tumid speech in the play is that which *Cæsar* makes to *Octavio*.

The events, of which the principal are described according to history, are produced without any art of connection or care of disposition.

#### TIMON OF ATHENS.

THE play of "Timon" is a domestic tragedy, and therefore strongly fastens on the attention of the reader. In the plan there is not much art, but the incidents are natural, and the characters various and exact. The catastrophe affords a very powerful warning against that ostentatious liberality, which scatters bounty, but confers no benefits, and buys flattery, but not friendship.

In this tragedy are many passages perplexed, obscure, and probably corrupt, which I have endeavoured to rectify, or explain, with due diligence; but having only one copy, cannot promise myself that my endeavours shall be much applauded.

#### TITUS ANDRONICUS.

ALL the editors and critics agree with Mr. Theobald in supposing this play spurious. I see no reason for differing from them; for the colour of the style is wholly different from that of the other plays, and there is an attempt at regular versification, and artificial closes, not always inelegant, yet seldom pleasing. The barbarity of the spectacles, and the general massacre, which are here exhibited, can scarcely be conceived tolerable to any audience; yet we are told by *Jonson*, that they were not only borne, but praised. That Shakspeare wrote any part, though *Theobald* declares it incontestible, I see no reason for believing.

The testimony produced at the beginning of this play, by which it is ascribed to Shakspeare, is by no means equal to the argument against its authenticity, arising from the total difference of conduct, language, and sentiments, by which it stands apart from all the rest. Meres had probably no other evidence, than that of a title-page, which, though in our time it be sufficient, was then of no great authority; for all the plays which were rejected by the first collectors of Shakspeare's works, and admitted in later editions, and again rejected by the critical editors, had Shakspeare's name on the title, as we may suppose, by the fraudulence of the printers, who, while there were yet no gazettes, nor advertisements, nor any means of circulating lit-

vary intelligence, could usurp at pleasure any celebrated name. Nor had Shakspeare any interest in detecting the imposture, as none of his fame or profit was produced by the press.

The chronology of this play does not prove it not to be Shakspeare's. If it had been written twenty-five years in 1614, it might have been written when Shakspeare was twenty-five years old. When he left Warwickshire I know not; but at the age of twenty-five it was rather too late to fly for deer-stealing.

Ravenscroft, who in the reign of Charles II. revised this play, and restored it to the stage, tells us, in his preface, from a theatrical tradition, I suppose, which in his time might be of sufficient authority, that this play was touched in different parts by Shakspeare, but written by some other poet. I do not find Shakspeare's touches very discernible.

### TROILUS AND CRESSIDA.

This play is more correctly written than most of Shakspeare's compositions, but it is not one of those in which either the extent of his views or elevation of his fancy is fully displayed. As the story abounded with materials, he has exerted little invention; but he has diversified his characters with great variety, and preserved them with great exactness. His vicious characters sometimes disgust, but cannot corrupt, for both Cressida and Pandarus are detested and condemned. The comic characters seem to have been the favourites of the writer; they are of the superficial kind, and exhibit more of manners than nature; but they are copiously filled, and powerfully impressed.

Shakspeare has in his story followed for the greater part the old book of Caxton, which was then very popular: but the character of Therites, of which it makes no mention, is a proof that this play was written after Chapman had published his version of Homer.

### CYMBELINE.

This play has many just sentiments, some natural dialogues, and some pleasing scenes, but they are obtained at the expense of much incongruity. To remark the folly of the fiction, the absurdity of the conduct, the confusion of the names, and manners of different times, and the impossibility of the events in any system of life, were to waste criticism upon unresisting imbecility, upon faults too evident for detection, and too gross for aggravation.

### KING LEAR.

The tragedy of "Lear" is deservedly celebrated among the dramas of Shakspeare. There

is perhaps no play which keeps the attention so strongly fixed; which so much agitates our passions and interests our curiosity. The artful involutions of distinct interests, the striking opposition of contrary characters, the sudden changes of fortune, and the quick succession of events, fill the mind with a perpetual tumult of indignation, pity, and hope. There is no scene which does not contribute to the aggravation of the distress or conduct of the action, and scarce a line which does not conduce to the progress of the scene. So powerful is the current of the poet's imagination, that the mind which once ventures within it, is hurried irresistibly along.

On the seeming improbability of Lear's conduct, it may be observed, that he is represented according to histories at that time vulgarly received as true. And, perhaps, if we turn our thoughts upon the barbarity and ignorance of the age to which this story is referred, it will appear not so unlikely as while we estimate Lear's manners by our own. Such preference of one daughter to another, or resignation of dominion on such conditions, would be yet credible, if told of a petty prince of Guinea or Madagascar. Shakspeare, indeed, by the mention of his earls and dukes, has given us the idea of times more civilized, and of life regulated by softer manners; and the truth is, that though he so nicely discriminates, and so minutely describes, the characters of men, he commonly neglects and confounds the characters of ages, by mingling customs, ancient and modern, English and foreign.

My learned friend Mr. Warton, who has in "The Adventurer" very minutely criticised this play, remarks, that the instances of cruelty are too savage and shocking, and the intervention of Edmund destroys the simplicity of the story. These objections may, I think, be answered, by repeating, that the cruelty of the daughters is an historical fact, to which the poet has added little, having only drawn it into a series by dialogue and action. But I am not able to apologize with equal plausibility for the extrusion of Gloster's eyes, which seems an act too horrid to be endured in dramatic exhibition, and such as must always compel the mind to relieve its distress by incredulity. Yet let it be remembered, that our author well knew what would please the audience for which he wrote.

The injury done by Edmund to the simplicity of the action, is abundantly recompensed by the addition of variety, by the art with which he is made to co-operate with the chief design, and the opportunity which he gives the poet of combining perfidy with perfidy, and connecting the wicked son with the wicked daughters, to impress this important moral, that villany is never at a stop, that crimes lead to crimes, and at last terminate in ruin.

But though this moral be incidentally en-

forced, Shakspeare has suffered the virtue of Cordelia to perish in a just cause, contrary to the natural ideas of justice, to the hope of the reader, and, what is yet more strange, to the faith of chronicles. Yet this conduct is justified by "The Spectator," who blames Tate for giving Cordelia success and happiness in his alteration, and declares, that in his opinion *the tragedy has lost half its beauty*. Dennis has remarked, whether justly or not, that, to secure the favourable reception of "Cato," *the town was poisoned with much false and abominable criticism*, and that endeavours had been used to discredit and decry poetical justice. A play in which the wicked prosper, and the virtuous miscarry, may doubtless be good, because it is a just representation of the common events of human life: but since all reasonable beings naturally love justice, I cannot easily be persuaded, that the observation of justice makes a play worse; or that, if other excellences are equal, the audience will not always rise better pleased from the final triumph of persecuted virtue.

In the present case the public has decided. Cordelia, from the time of Tate, has always retired with victory and felicity. And, if my sensations could add anything to the general suffrage, I might relate, I was many years ago so shocked by Cordelia's death, that I know not whether I ever endured to read again the last scenes of the play till I undertook to revise them as an editor.

There is another controversy among the critics concerning this play. It is disputed whether the predominant image in Lear's disordered mind be the loss of his kingdom or the cruelty of his daughters. Mr. Murphy, a very judicious critic, has evinced by induction of particular passages, that the cruelty of his daughters is the primary source of his distress, and that the loss of royalty affects him only as a secondary and subordinate evil. He observes, with great justness, that Lear would move our compassion but little, did we not rather consider the injured father than the degraded king.

The story of this play, except the episode of Edmund, which is derived, I think, from Sidney, is taken originally from Geoffrey of Monmouth, whom Hollinshed generally copied: but perhaps immediately from an old historical ballad. My reason for believing that the play was posterior to the ballad, rather than the ballad to the play, is that the ballad has nothing of Shakspeare's nocturnal tempest, which is too striking to have been omitted, and that it follows the chronicle; it has the rudiments of the play, but none of its amplifications: it first hinted Lear's madness, but did not array it in circumstances. The writer of the ballad added something to the history, which is a proof that he would have added more, if more had occurred to his mind,

and more must have occurred if he had seen Shakspeare.

## ROMEO AND JULIET.

THIS play is one of the most pleasing of our author's performances. The scenes are busy and various, the incidents numerous and important, the catastrophe irresistibly affecting, and the process of the action carried on with such probability, at least with such congruity to popular opinions, as tragedy requires.

Here is one of the few attempts of Shakspeare to exhibit the conversation of gentlemen, to represent the airy sprightliness of juvenile elegance. Mr. Dryden mentions a tradition, which might easily reach his time, of a declaration made by Shakspeare, that "he was obliged to kill Mercutio in the third act, lest he should have been killed by him." Yet he thinks him "no such formidable person but that he might have lived through the play, and died in his bed," without danger to the poet. Dryden well knew, had he been in quest of truth, that in a pointed sentence, more regard is commonly had to the words than the thought, and that it is very seldom to be rigorously understood. Mercutio's wit, gayety, and courage, will always procure him friends that wish him a longer life; but his death is not precipitated, he has lived out the time allotted him in the construction of the play; nor do I doubt the ability of Shakspeare to have continued his existence, though some of his sallies are perhaps out of the reach of Dryden; whose genius was not very fertile of merriment, nor ductile to humour, but acute, argumentative, comprehensive, and sublime.

The nurse is one of the characters in which the author delighted; he has with great subtilty of distinction, drawn her at once loquacious and secret, obsequious and insolent, trusty and dishonest.

His comic scenes are happily wrought, but his pathetic strains are always polluted with some unexpected deprivations. His persons, however distressed, *have a conceit left them in their misery, a miserable conceit*.

## HAMLET.

If the dramas of Shakspeare were to be characterised, each by the particular excellence which distinguishes it from the rest, we must allow to the tragedy of "Hamlet" the praise of variety. The incidents are so numerous, that the argument of the play would make a long tale. The scenes are interchangeably diversified with merriment and solemnity; with merriment, that includes judicious and instructive observations; and solemnity, not strained by poetical violence above the natural sentiments

of man. New characters appear from time to time in continual succession, exhibiting various forms of life and particular modes of conversation. The pretended madness of Hamlet causes much mirth, the mournful distraction of Ophelia fills the heart with tenderness, and every personage produces the effect intended, from the apparition that in the first act chills the blood with horror, to the fop in the last that exposes affectation to just contempt.

The conduct is perhaps not wholly secure against objections. The action is indeed for the most part in continual progression, but there are some scenes which neither forward nor retard it. Of the feigned madness of Hamlet there appears no adequate cause, for he does nothing which he might not have done with the reputation of sanity. He plays the mad man most, when he treats Ophelia with so much rudeness, which seems to be useless and wanton cruelty.

Hamlet is, through the whole piece, rather an instrument than an agent. After he has, by the stratagem of the play, convicted the king, he makes no attempt to punish him; and his death is at last effected by an incident which Hamlet had no part in producing.

The catastrophe is not very happily produced; the exchange of weapons is rather an expedient of necessity, than a stroke of art. A scheme might easily have been formed to kill Hamlet with the dagger, and Laertes with the bowl.

The poet is accused of having shown little regard to poetical justice, and may be charged with equal neglect of poetical probability. The apparition left the regions of the dead to little purpose; the revenge which he demands is not obtained, but by the death of him that was required to take it; and the gratification, which would arise from the destruction of an usurper and a murderer, is abated, by the untimely death of Ophelia, the young, the beautiful, the harmless, and the pious.

#### OTHELLO.

The beauties of this play impress themselves so strongly upon the attention of the reader, that they can draw no aid from critical illustra-

tion. The fiery openness of Othello, magnanimous, artless, and credulous, boundless in his confidence, ardent in his affection, inflexible in his resolution, and obdurate in his revenge: the cool malignity of Iago, silent in his resentment, subtle in his designs, and studious at once of his interest and his vengeance; the soft simplicity of Desdemona, confident of merit, and conscious of innocence, her artless perseverance in her suit, and her slowness to suspect that she can be suspected, are such proofs of Shakspeare's skill in human nature, as, I suppose, it is vain to seek in any modern writer. The gradual progress which Iago makes in the Moor's conviction, and the circumstances which he employs to inflame him, are so artfully natural, that, though it will perhaps not be said of him as he says of himself, that he is *a man not easily jealous*, yet we cannot but pity him, when at last we find him *perplexed in the extreme*.

There is always danger, lest wickedness, conjoined with abilities, should steal upon esteem, though it misses of approbation; but the character of Iago is so conducted, that he is from the first scene to the last hated and despised.

Even the inferior characters of this play would be very conspicuous in any other piece, not only for their justness, but their strength. Cassio is brave, benevolent, and honest, ruined only by his want of stubbornness to resist an insidious invitation. Roderigo's suspicious credulity, and impatient submission to the cheats which he sees practised upon him, and which by persuasion he suffers to be repeated, exhibit a strong picture of a weak mind betrayed by unlawful desires to a false friend; and the virtue of Emilia is such as we often find worn loosely, but not cast off, easy to commit small crimes, but quickened and alarmed at atrocious villanies.

The scenes from the beginning to the end are busy, varied by happy interchanges, and regularly promoting the progression of the story; and the narrative in the end, though it tells but what is known already, yet is necessary to produce the death of Othello.

Had the scene opened in Cyprus, and the preceding incidents been occasionally related, there had been little wanting to a drama of the most exact and scrupulous regularity.

---

### AN ACCOUNT OF THE HARLEIAN LIBRARY.

---

To solicit a subscription for a Catalogue of Books exposed to sale, is an attempt for which some apology cannot but be necessary; for few would willingly contribute to the expense of volumes,

by which neither instruction nor entertainment could be afforded, from which only the bookseller could expect advantage, and of which the only use must cease, at the dispersion of the library.

Nor could the reasonableness of a universal rejection of our proposal be denied, if this catalogue were to be compiled with no other view, than that of promoting the sale of the books which it enumerates, and drawn up with that inaccuracy and confusion which may be found in those that are daily published.

But our design, like our proposal, is uncommon, and to be prosecuted at a very uncommon expense; it being intended, that the books shall be distributed into their distinct classes, and every class ranged with some regard to the age of the writers; that every book shall be accurately described; that the peculiarities of editions shall be remarked, and observations from the authors of literary history occasionally interspersed; that, by this catalogue, we may inform posterity of the excellence and value of this great collection, and promote the knowledge of scarce books, and elegant editions. For this purpose men of letters are engaged, who cannot even be supplied with amanuenses, but at an expense above that of a common catalogue.

To show that this collection deserves a particular degree of regard from the learned and the studios, that it excels any library that was ever yet offered to public sale in the value as well as number of the volumes which it contains; and that therefore this catalogue will not be of less use to men of letters, than those of the Thuanian, Heinsian, or Barberinian libraries, it may not be improper to exhibit a general account of the different classes, as they are naturally divided by the several sciences.

By this method we can indeed exhibit only a general idea, at once magnificent and confused; an idea of the writings of many nations, collected from distant parts of the world, discovered sometimes by chance, and sometimes by curiosity, amidst the rubbish of forsaken monasteries, and the repositories of ancient families, and brought hither from every part, as to the universal receptacle of learning.

It will be no unpleasant effect of this account, if those that shall happen to peruse it, should be inclined by it to reflect on the character of the late proprietors, and to pay some tribute of veneration to their ardour for literature, to that generous and exalted curiosity which they gratified with incessant searches and immense expense, and to which they dedicated that time, and that superfluity of fortune, which many others of their rank employ in the pursuit of contemptible amusements, or the gratification of guilty passions. And, surely, every man, who considers learning as ornamental and advantageous to the community, must allow them

the honour of public benefactors, who have introduced amongst us authors not hitherto well known, and added to the literary treasures of their native country.

That our catalogue will excite any other man to emulate the collectors of this library, to prefer books and manuscripts to equipage and luxury, and to forsake noise and diversion for the conversation of the learned, and the satisfaction of extensive knowledge, we are very far from presuming to hope; but shall make no scruple to assert, that, if any man should happen to be seized with such laudable ambition, he may find in this catalogue hints and informations, which are not easily to be met with; he will discover, that the boasted Bodleian library is very far from a perfect model, and that even the learned Fabricius cannot completely instruct him in the early editions of the classic writers.

But the collectors of libraries cannot be numerous; and, therefore, catalogues cannot very properly be recommended to the public, if they had not a more general and frequent use, a use which every student has experienced, or neglected to his loss. By the means of catalogues only can it be known, what has been written on every part of learning, and the hazard avoided of encountering difficulties which have already been cleared, discussing questions which have already been decided, and digging in mines of literature which former ages have exhausted.

How often this has been the fate of students, every man of letters can declare; and, perhaps, there are very few who have not sometimes valued as new discoveries, made by themselves, those observations which have long since been published, and of which the world therefore will refuse them the praise; nor can the refusal be censured as any enormous violation of justice; for, why should they not forfeit by their ignorance, what they might claim by their sagacity?

To illustrate this remark, by the mention of obscure names, would not much confirm it; and to villify for this purpose the memory of men truly great, would be to deny them the reverence which they may justly claim from those whom their writings have instructed. May the shade, at least, of one great English critic rest without disturbance; and may no man presume to insult his memory, who wants his learning, his reason, or his wit.

From the vexatious disappointment of meeting reproach, where praise is expected, every man will certainly desire to be secured; and therefore that book will have some claim to his regard, from which he may receive informations of the labours of his predecessors, such as a catalogue of the Harleian library will copiously afford him.

Nor is the use of catalogues of less importance to those whom curiosity has engaged in the study of literary history, and who think the in-

teleetual revolutions of the world more worthy of their attention than the ravages of tyrants, the desolation of kingdoms, the rout of armies, and the fall of empires. Those who are pleased with observing the first birth of new opinions, their struggles against opposition, their silent progress under persecution, their general reception, and their gradual decline, or sudden extinction; those that amuse themselves with remarking the different periods of human knowledge, and observe how darkness and light succeed each other; by what accident the most gloomy nights of ignorance have given way to the dawn of science, and how learning has languished and decayed, for want of patronage and regard, or been overborne by the prevalence of fashionable ignorance, or lost amidst the tumults of invasion and the storms of violence. All those, who desire any knowledge of the literary transactions of past ages, may find in catalogues, like this at least, such an account as is given by annalists and chronologers of civil history.

How the knowledge of the sacred writings has been diffused, will be observed from the catalogue of the various editions of the Bible, from the first impression by Fust, in 1462, to the present time; in which will be contained the polyglot editions of Spain, France, and England, those of the original Hebrew, the Greek Septuagint, and the Latin Vulgate: with the versions which are now used in the remotest parts of Europe, in the country of the Grisons, in Lithuania, Bohemia, Finland, and Iceland.

With regard to the attempts of the same kind made in our country, there are few whose expectations will not be exceeded by the number of English bibles, of which not one is forgotten, whether valuable for the pomp and beauty of the impression, or for the notes with which the text is accompanied, or for any controversy or persecution that it produced, or for the peculiarity of any single passage. With the same care have the various editions of the book of common-prayer been selected, from which all the alterations which have been made in it may be easily remarked.

Amongst a great number of Roman missals and breviaries, remarkable for the beauty of their cuts and illuminations, will be found the Mosarabic missal and breviary, that raised such commotions in the kingdom of Spain.

The controversial treaties written in England, about the time of the Reformation, have been diligently collected, with a multitude of remarkable tracts, single sermons, and small treatises; which, however worthy to be preserved, are, perhaps, to be found in no other place.

The regard which was always paid by the collectors of this library, to that remarkable period of time in which the art of printing was invented, determined them to accumulate the

ancient impressions of the fathers of the church; to which the later editions are added, lest antiquity should have seemed more worthy of esteem than accuracy.

History has been considered with the regard due to that study by which the manners are most easily formed, and from which the most efficacious instruction is received; nor will the most extensive curiosity fail of gratification in this library; from which no writers have been excluded, that relate either to the religious or civil affairs of any nation.

Not only those authors of ecclesiastical history have been procured, that treat of the state of religion in general, or deliver accounts of sects or nations, but those likewise who have confined themselves to particular orders of men in every church; who have related the original, and the rules of every society, or recounted the lives of its founder and its members; those who have deduced in every country the succession of bishops, and those who have employed their abilities in celebrating the piety of particular saints, or martyrs, or monks, or nuns.

The civil history of all nations has been amassed together; nor is it easy to determine which has been thought most worthy of curiosity.

Of France, not only the general histories and ancient chronicles, the accounts of celebrated reigns, and narratives of remarkable events, but even the memorials of single families, the lives of private men, the antiquities of particular cities, churches, and monasteries, the topography of provinces, and the accounts of laws, customs, and prescriptions, are here to be found.

The several states of Italy have, in this treasury, their particular historians, whose accounts are, perhaps, generally more exact, by being less extensive; and more interesting, by being more particular.

Nor has less regard been paid to the different nations of the Germanic empire, of which neither the Bohemians, nor Hungarians, nor Austrians, nor Bavarians have been neglected; nor have their antiquities, however generally disregarded, been less studiously searched than their present state.

The northern nations have supplied this collection, not only with history, but poetry, with Gothic antiquities and Runic inscriptions; which at least have this claim to veneration above the remains of the Roman magnificence, that they are the works of those heroes by whom the Roman empire was destroyed; and which may plead, at least in this nation, that they ought not to be neglected by those that owe to the men whose memories they preserve, their constitution, their properties, and their liberties.

The curiosity of these collectors extends equally to all parts of the world; nor did they

forget to add to the northern the southern writers, or to adorn their collection with chronicles of Spain, and the conquest of Mexico.

Even of those nations with which we have less intercourse, whose customs are less accurately known, and whose history is less distinctly recounted, there are in this library reposit such accounts as the Europeans have been hitherto able to obtain; nor are the Mogul, the Tartar, the Turk, and the Saracen, without their historians.

That persons so inquisitive with regard to the transactions of other nations, should inquire yet more ardently after the history of their own, may be naturally expected; and indeed, this part of the library is no common instance of diligence and accuracy. Here are to be found, with the ancient chronicles, and larger histories of Britain, the narratives of single reigns, and the accounts of remarkable revolutions, the topographical histories of counties, the pedigrees of families, the antiquities of churches and cities, the proceedings of parliaments, the records of monasteries, and the lives of particular men, whether eminent in the church or in the state, or remarkable in private life; whether exemplary for their virtues, or detestable for their crimes; whether persecuted for religion or executed for rebellion.

That memorable period of the English history, which begins with the reign of king Charles the First, and ends with the Restoration, will almost furnish a library alone, such is the number of volumes, pamphlets, and papers which were published by either party; and such is the care with which they have been preserved.

Nor is history without the necessary preparatives and attendants, geography and chronology: of geography, the best writers and delineators have been procured, and pomp and accuracy have both been regarded: the student of chronology may here find likewise those authors who searched the records of time, and fixed the periods of history.

With the historians and geographers may be ranked the writers of voyages and travels, which may be read here in the Latin, English, Dutch, German, French, Italian, and Spanish languages.

The laws of different countries, as they are in themselves equally worthy of curiosity with their history, have, in this collection, been justly regarded; and the rules by which the various communities of the world are governed, may be here examined and compared. Here are the ancient editions of the papal decretals, and the commentators on the civil law, the edicts of Spain and the statutes of Venice.

But with particular industry have the various writers on the laws of our own country been collected, from the most ancient to the present time, from the bodies of the statutes to the mi-

nutest treatise; not only the reports, precedents, and readings of our own courts, but even the laws of our West-Indian colonies, will be exhibited in our catalogue.

But neither history nor law have been so far able to engross this library, as to exclude physics, philosophy, or criticism. Those have been thought, with justice, worthy of a place, who have examined the different species of animals, delineated their forms, or described their properties and instincts; or who have penetrated the bowels of the earth, treated on its different strata, and analyzed its metals; or who have amused themselves with less laborious speculations, and planted trees, or cultivated flowers.

Those that have exalted their thoughts above the minuter parts of the creation, who have observed the motions of the heavenly bodies, and attempted systems of the universe, have not been denied the honour which they deserved by so great an attempt, whatever has been their success. Nor have those mathematicians been rejected, who have applied their science to the common purposes of life; or those that have deviated into the kindred arts of tactics, architecture, and fortification.

Even arts of far less importance have found their authors, nor have these authors been despised by the boundless curiosity of the proprietors of the Harleian library. The writers on horsemanship and fencing are more numerous, and more bulky, than could be expected by those who reflect how seldom those excel in either, whom their education has qualified to compose books.

The admirer of Greek and Roman literature will meet, in this collection, with editions little known to the most inquisitive critics, and which have escaped the observation of those whose great employment has been the collation of copies; nor will he find only the most ancient editions of Faustus, Jenson, Spira, Sweynheim and Pannartz, but the most accurate likewise and beautiful of Colinaeus, the Juntae, Plantin, Aldus, the Stephens, and Elzevir, with the commentaries and observations of the most learned editors.

Nor are they accompanied only with the illustrations of those who have confined their attempts to particular writers, but of those likewise who have treated on any part of the Greek or Roman antiquities, their laws, their customs, their dress, their buildings, their wars, their revenues, or the rites and ceremonies of their worship, and those that have endeavoured to explain any of their authors from their statutes or their coins.

Next to the ancients, those writers deserve to be mentioned, who, at the restoration of literature, imitated their language and their style with so great success, or who laboured with so much industry to make them understood: such

were Philæphus and Politian, Scaliger and Buchanan, and the poets of the age of Leo the Tenth; these are likewise to be found in this library, together with the *Deliciae*, or collections of all nations.

Painting is so nearly allied to poetry, that it cannot be wondered that those who have so much esteemed the one, have paid an equal regard to the other; and therefore it may be easily imagined, that the collection of prints is numerous in an uncommon degree; but, surely, the expectation of every man will be exceeded, when he is informed that there are more than forty thousand engraven from Raphael, Titian, Guido, the Carraches, and a thousand others, by Nanteuil, Hollar, Collet, Edelinck, and Dorigny, and other engravers of equal reputation.

There is also a great collection of original drawings, of which three seem to deserve a particular mention: the first exhibits a representation of the inside of St. Peter's church at Rome; the second, of that of St. John Lateran; and the third, of the high altar of St. Ignatius: all painted with the utmost accuracy, in their proper colours.

As the value of this great collection may be conceived from this account, however imperfect, as the variety of subjects must engage the curiosity of men of different studies, inclinations, and employments, it may be thought of very little use to mention any slighter advantages, or to dwell on the decorations and embellishments which the generosity of the proprietors has bestowed upon it; yet, since the compiler of the Thuanian catalogue thought not even that species of elegance below his observation, it may not be improper to observe, that the Harleian library, perhaps, excels all others, not more in the number and excellence, than in the splendour, of its volumes.

We may now surely be allowed to hope, that our catalogue will not be thought unworthy of the public curiosity; that it will be purchased as a record of this great collection, and preserved as one of the memorials of learning.

The patrons of literature will forgive the purchaser of this library, if he presumes to assert some claim to their protection and encouragement, as he may have been instrumental in continuing to this nation the advantage of it. The sale of Vossius's collection into a foreign country, is, to this day, regretted by men of letters; and if this effort for the prevention of another loss of the same kind should be disadvantageous to him, no man will hereafter willingly risk his fortune in the cause of learning.

## PREFACE

TO THE CATALOGUE OF THE HARLEIAN LIBRARY,

VOL. III.

HAVING prefixed to the former volumes of my Catalogue an account of the prodigious collection accumulated in the Harleian library, there would have been no necessity of any introduction to the subsequent volumes, had not some censures which this great undertaking has drawn upon me, made it proper to offer to the public an apology for my conduct.

The price which I have set upon my catalogue, has been represented by the booksellers as an avaricious innovation; and, in a paper published in the *Champion*, they, or their mercenary, have reasoned so justly, as to allege, that, if I could afford a very large price for the library, I might therefore afford to give away the Catalogue.

I should have imagined that accusations, concerted by such heads as these, would have vanished of themselves, without any answer; but, since I have the mortification to find that they have been in some degree regarded by men of more knowledge than themselves, I shall explain the motives of my procedure.

My original design was, as I have already explained, to publish a methodical and exact Catalogue of this library, upon the plan which has been laid down, as I am informed, by several men of the first rank among the learned. It was intended by those who undertook the work, to make a very exact disposition of all the subjects, and to give an account of the remarkable differences of the editions, and other peculiarities, which make any book eminently valuable: and it was imagined, that some improvements might, by pursuing this scheme, be made in literary history.

With this view was the Catalogue begun, when the price was fixed upon it in public advertisements; and it cannot be denied, that such a Catalogue would have been willingly purchased by those who understood its use. But, when a few sheets had been printed, it was discovered that the scheme was impracticable, without more hands than could be procured, or more time than the necessity of a speedy sale would allow: the Catalogue was therefore continued without notes, at least in the greatest part; and, though it was still performed better than those which are daily offered to the public, fell much below the original design.

It was then no longer proper to insist upon a price; and therefore, though money was demanded upon delivery of the Catalogue, it was only taken as a pledge that the Catalogue was not, as is very frequent, wantonly called for, by those who never intended to peruse it, and I

therefore promised that it should be taken again in exchange for any book rated at the same value.

It may be still said, that other booksellers give away their catalogues without any such precaution, and that I ought not to make any new or extraordinary demands. But, I hope, it will be considered, at how much greater expense my Catalogue was drawn up: and be remembered, that when other booksellers give their catalogues, they give only what will be of no use when their books are sold, and what, if it remained in their hands, they must throw away: whereas I hope that this Catalogue will retain its use, and, consequently, its value, and be sold with the catalogues of the Barberinian and Marckian libraries.

However, to comply with the utmost expectations of the world, I have now published the second part of my Catalogue, upon conditions still more commodious for the purchaser, as I intend, that all those who are pleased to receive them at the same price of five shillings a volume, shall be allowed at any time, within three months after the day of sale, either to return them in exchange for books, or to send them back, and receive their money.

Since, therefore, I have absolutely debarred myself from receiving any advantage from the sale of the Catalogue, it will be reasonable to impute it rather to necessity than choice, that I shall continue it to two volumes more, which the number of the single tracts which have been discovered, make indispensably requisite. I need not tell those who are acquainted with affairs of this kind, how much pamphlets swell a catalogue, since the title of the least book may be as long as that of the greatest.

Pamphlets have been for many years, in this nation, the canals of controversy, politics, and sacred history, and therefore will, doubtless, furnish occasion to a very great number of curious remarks. And I take this opportunity of proposing to those who are delighted with this kind of study, that, if they will encourage me, by a reasonable subscription, to employ men qualified to make the observations for which this part of the catalogue will furnish occasion, I will procure the whole fifth and sixth volumes to be executed in the same manner with the most laboured part of this, and interspersed with notes of the same kind.

If any excuse was necessary for the addition of these volumes, I have already urged in my defence the strongest plea, no less than absolute necessity, it being impossible to comprise in four volumes, however large, or however closely printed, the titles which yet remain to be mentioned.

But, I suppose, none will blame the multiplication of volumes, to whatever number they may be continued, which every one may use

without buying them, and which are therefore published at no expense but my own.

There is one accusation still remaining, by which I am more sensibly affected, and which I am therefore desirous to obviate, before it has too long prevailed. I hear that I am accused of rating my books at too high a price, at a price which no other person would demand. To answer this accusation, it is necessary to inquire what those who urge it mean by a high price. The price of things valuable for their rarity is entirely arbitrary, and depends upon the variable taste of mankind, and the casual fluctuation of the fashion, and can never be ascertained like that of things only estimable according to their use.

If, therefore, I have set a high value upon books: if I have vainly imagined literature to be more fashionable than it really is, or idly hoped to revive a taste well nigh extinguished, I know not why I should be persecuted with clamour and invective, since I only shall suffer by my mistake, and be obliged to keep those books which I was in hopes of selling.

If those who charge me with asking a *high price*, will explain their meaning, it may be possible to give them an answer less general. If they measure the price at which the books are now offered, by that at which they were bought by the late possessor, they will find it diminished at least three parts in four: If they would compare it with the demands of other booksellers, they must find the same books in their hands, and they will be, perhaps, at last reduced to confess, that they mean, by a high price, only a price higher than they are inclined to give.

I have, at least, a right to hope, that no gentleman will receive an account of the price from the booksellers, of whom it may easily be imagined that they will be willing, since they cannot depreciate the books, to exaggerate the price: and I will boldly promise those who have been influenced by malevolent reports, that, if they will be pleased, at the day of sale, to examine the prices with their own eyes, they will find them lower than they have been represented.

---

## AN ESSAY

ON THE

### ORIGIN AND IMPORTANCE OF SMALL TRACTS AND FUGITIVE PIECES.

WRITTEN FOR THE INTRODUCTION TO THE  
HARLEIAN MISCELLANY.

THOUGH the scheme of the following Miscellany

is so obvious, that the title alone is sufficient to explain it; and though several collections have been formerly attempted upon plans, as to the method very little, but, as to the capacity and execution, very different from ours; we being possessed of the greatest variety for such a work, hope for a more general reception than those confined schemes had the fortune to meet with; and, therefore, think it not wholly unnecessary to explain our intentions, to display the treasure of materials out of which this Miscellany is to be compiled, and to exhibit a general idea of the pieces which we intend to insert in it.

There is, perhaps, no nation in which it is so necessary, as in our own, to assemble from time to time, the small tracts and fugitive pieces which are occasionally published; for, besides the general subjects of inquiry, which are cultivated by us, in common with every other learned nation, our constitution in church and state naturally gives birth to a multitude of performances which would either not have been written, or could not have been made public in any other place.

The form of our government which gives every man, that has leisure, or curiosity, or vanity, the right of inquiring into the propriety of public measures, and by consequence, obliges those who are intrusted with the administration of national affairs, to give an account of their conduct to almost every man who demands it, may be reasonably imagined to have occasioned innumerable pamphlets, which would never have appeared under arbitrary governments, where every man lulls himself in indolence under calamities, of which he cannot promote the redress, or thinks it prudent to conceal the uneasiness, of which he cannot complain without danger.

The multiplicity of religious sects tolerated among us, of which every one has found opponents and vindicators, is another source of unexhaustible publication, almost peculiar to ourselves; for controversies cannot be long continued, nor frequently revived, where an inquisitor has a right to shut up the disputants in dungeons; or where silence can be imposed on either party by the refusal of a license.

Not that it should be inferred from hence, that political or religious controversies are the only products of the liberty of the British press; the mind once let loose to inquiry, and suffered to operate without restraint, necessarily deviates into peculiar opinions, and wanders in new tracts, where she is indeed sometimes lost in a labyrinth, from which though she cannot return, and scarce knows how to proceed; yet, sometimes makes useful discoveries, or finds out nearer paths to knowledge.

The boundless liberty with which every man may write his own thoughts, and the opportunity of conveying new sentiments to the public,

without danger of suffering either ridicule or censure, which every man may enjoy, whose vanity does not incite him too hastily to own his performances, naturally invites those who employ themselves in speculation, to try how their notions will be received by a nation, which exempts caution from fear, and modesty from shame; and it is no wonder, that where reputation may be gained, but needs not be lost, multitudes are willing to try their fortune, and thrust their opinions into the light; sometimes with unsuccessful haste, and sometimes with happy temerity.

It is observed, that, among the natives of England, is to be found a greater variety of humour, than in any other country; and doubtless, where every man has a full liberty to propagate his conceptions, variety of humour must produce variety of writers; and, where the number of authors is so great, there cannot but be some worthy of distinction.

All these, and many other causes, too tedious to be enumerated, have contributed to make pamphlets and small tracts a very important part of an English library; nor are there any pieces, upon which those, who aspire to the reputation of judicious collectors of books, bestow more attention, or greater expense; because many advantages may be expected from the perusal of these small productions, which are scarcely to be found in that of larger works.

If we regard history, it is well known that most political treatises have for a long time appeared in this form, and that the first relations of transactions, while they are yet the subject of conversation, divide the opinions, and employ the conjectures of mankind, are delivered by these petty writers, who have opportunities of collecting the different sentiments of disputants, of inquiring the truth from living witnesses, and of copying their representations from the life; and, therefore, they preserve a multitude of particular incidents, which are forgotten in a short time, or omitted in formal relations, and which are yet to be considered as sparks of truth, which, when united, may afford light in some of the darkest scenes of state, as, we doubt not, will be sufficiently proved in the course of this Miscellany; and which it is, therefore, the interest of the public to preserve unextinguished.

The same observation may be extended to subjects of yet more importance. In controversies that relate to the truths of religion, the first essays of reformation are generally timorous; and those who have opinions to offer, which they expect to be opposed, produce their sentiments by degrees, and, for the most part, in small tracts: by degrees, that they may not shock their readers with too many novelties at once; and in small tracts, that they may be easily dispersed, or privately printed; almost every controversy, therefore, has been, for a

time, carried on in pamphlets, nor has swelled into larger volumes, till the first ardour of the disputants has subsided, and they have recollected their notions with coolness enough to digest them into order, consolidate them into systems, and fortify them with authorities.

From pamphlets, consequently, are to be learned the progress of every debate; the various state to which the questions have been changed; the artifices and fallacies which have been used, and the subterfuges by which reason has been eluded; in such writings may be seen how the mind has been opened by degrees, how one truth has led to another, how error has been disentangled, and hints improved to demonstration, which pleasure, and many others, are lost by him that only reads the larger writers, by whom these scattered sentiments are collected, who will see none of the changes of fortune which every opinion has passed through, will have no opportunity of remarking the transient advantages which error may sometimes obtain, by the artifices of its patron, or the successful rallies by which truth regains the day, after a repulse; but will be to him, who traces the dispute through into particular gradations, as he that hears of a victory, to him that sees the battle.

Since the advantages of preserving these small tracts are so numerous, our attempt to unite them in volumes cannot be thought either useless or unseasonable; for there is no other method of securing them from accidents; and they have already been so long neglected that this design cannot be delayed, without hazarding the loss of many pieces, which deserve to be transmitted to another age.

The practice of publishing pamphlets on the most important subjects, has now prevailed more than two centuries among us; and therefore it cannot be doubted, but that, as no large collections have been yet made, many curious tracts must have perished; but it is too late to lament that loss; nor ought we to reflect upon it, with any other view, than that of quickening our endeavours for the preservation of those that yet remain; of which we have now a greater number than was perhaps ever amassed by any one person.

The first appearance of pamphlets among us, is generally thought to be at the new opposition raised against the errors and corruptions of the Church of Rome. Those who were first convinced of the reasonableness of the new learning, as it was then called, propagated their opinions in small pieces, which were cheaply printed; and, what was then of great importance, easily concealed. These treatises were generally printed in foreign countries, and are not, therefore, always very correct. There was not then that opportunity of printing in private; for the number of printers were small, and the

presses were easily overlooked by the clergy, who spared no labour or vigilance for the suppression of heresy. There is, however, reason to suspect, that some attempts were made to carry on the propagation of truth by a secret press; for one of the first treatises in favour of the reformation, is said, at the end, to be printed at *Greenwich*, by the permission of the Lord of *Hosers*.

In the time of king Edward the Sixth, the presses were employed in favour of the reformed religion, and small tracts were dispersed over the nation, to reconcile them to the new forms of worship. In this reign, likewise, political pamphlets may be said to have begun, by the addresses of the rebels of Devonshire; all which means of propagating the sentiments of the people so disturbed the court, that no sooner was queen Mary resolved to reduce her subjects to the Romish superstition, but she artfully, by a charter\* granted to certain freemen of London, in whose fidelity, no doubt, she confided, entirely prohibited *all* presses, but what should be licensed by them; which charter is that by which the corporation of Stationers in London is at this time incorporated.

Under the reign of queen Elizabeth, when liberty again began to flourish, the practice of writing pamphlets became more general, presses were multiplied, and books were dispersed; and, I believe, it may properly be said, that the trade of writing began at that time, and that it has ever since gradually increased in the number, though, perhaps, not in the style of those that followed it.

In this reign was erected the first secret press against the church as now established, of which I have found any certain account. It was employed by the Puritans, and conveyed from one part of the nation to another, by them, as they found themselves in danger of discovery. From this press issued most of the pamphlets against Whitgift and his associates in the ecclesiastical government, and, when it was at last seized at Manchester, it was employed upon a pamphlet called *More Work for a Cooper*.

In the peaceable reign of King James, those minds which might, perhaps, with less disturbance of the world have been engrossed by war, were employed in controversy; and writings of all kinds were multiplied among us. The press, however, was not wholly engaged in polemical performances, for more innocent subjects were sometimes treated; and it deserves to be remarked, because it is not generally known, that

---

\* Which begins thus: "Know ye, that We, considering and manifestly perceiving, that several seditious and heretical books or tracts—against the faith and sound catholic doctrine of holy mother, the church," &c.

the treatises of Husbandry and Agriculture, which were published about that time, are so numerous, that it can scarcely be imagined by whom they were written, or to whom they were sold.

The next reign is too well known to have been a time of confusion, and disturbance, and disputes of every kind; and the writings which were produced, bear a natural proportion to the number of questions that were discussed at that time; each party had its authors and its presses, and no endeavours were omitted to gain proselytes to every opinion. I know not whether this may not properly be called *The Age of Pamphlets*; for, though they, perhaps, may not arise to such multitudes as Mr. Rawlinson imagined, they were, undoubtedly, more numerous than can be conceived by any who have not had an opportunity of examining them.

After the Restoration, the same differences, in religious opinions, are well known to have subsisted, and the same political struggles to have been frequently renewed; and, therefore, a great number of pens were employed, on different occasions, till at length, all other disputes were absorbed in the popish controversy.

From the pamphlets which these different periods of time produced, it is proposed, that this Miscellany shall be compiled; for which it cannot be supposed that materials will be wanting; and, therefore, the only difficulty will be in what manner to dispose them.

Those who have gone before us, in undertakings of this kind, have ranged the pamphlets, which chance threw into their hands, without any regard either to the subject on which they treated, or the time in which they were written; a practice in no wise to be imitated by us, who want for no materials; of which we shall choose those we think best for the particular circumstances of times and things, and most instructing and entertaining to the reader.

Of the different methods which present themselves upon the first view of the great heaps of pamphlets which the Harleian library exhibits, the two which merit most attention are, to distribute the treatises according to their subjects, or their dates; but neither of these ways can be conveniently followed. By ranging our collection in order of time, we must necessarily publish those pieces first, which least engage the curiosity of the bulk of mankind; and our design must fall to the ground, for want of encouragement, before it can be so far advanced as to obtain general regard; by confining ourselves for any long time to any single subject, we shall reduce our readers to one class; and, as we shall lose all the grace of variety, shall disgust all those who read chiefly to be diverted. There is likewise one objection of equal force, against both these methods, that we shall preclude ourselves from the advantage of any future discoveries; and we cannot hope to assemble at once all the pamphlets which have been written in any age or on any subject.

It may be added, in vindication of our intended practice, that it is the same with that of Photius, whose collections are no less miscellaneous than ours; and who declares, that he leaves it to his reader to reduce his extracts under their proper heads.

Most of the pieces which shall be offered in this collection to the public, will be introduced by short prefaces, in which will be given some account of the reasons for which they are inserted; notes will be sometimes adjoined, for the explanation of obscure passages, or obsolete expressions; and care will be taken to mingle use and pleasure through the whole collection. Notwithstanding every subject may not be relished by every reader, yet the buyer may be assured that each number will repay his generous subscription.

## A VIEW OF THE CONTROVERSY

BETWEEN

MONS. CROUSAZ AND MR. WARBURTON,

ON THE SUBJECT OF

MR. POPE'S ESSAY ON MAN,

IN A LETTER TO THE EDITOR OF THE GENTLEMAN'S MAGAZINE, VOL. XIII.

MR. URBAN,—It would not be found useless as in oral disputations, a moderator could be in the learned world, if in written controversies, selected, who might in some degree superintend

the debate, restrain all needless excursions, repress all personal reflections, and at last recapitulate the arguments on each side; and who, though he should not assume the province of deciding the question, might at least exhibit it in its true state.

This reflection arose in my mind upon the consideration of Mr. Crousaz's Commentary on the Essay on Man, and Mr. Warburton's Answer to it. The importance of the subject, the reputation and abilities of the controvertists, and perhaps the ardour with which each has endeavoured to support his cause, have made an attempt of this kind necessary for the information of the greatest number of Mr. Pope's readers.

Among the duties of a moderator, I have mentioned that of recalling the disputants to the subject, and cutting off the excrescences of a debate, which Mr. Crousaz will not suffer to be long unemployed, and the repression of personal invectives which have not been very carefully avoided on either part; and are less excusable, because it has not been proved, that either the poet, or his commentator, wrote with any other design than that of promoting happiness by cultivating reason and piety.

Mr. Warburton has indeed so much depressed the character of his adversary, that before I consider the controversy between them, I think it necessary to exhibit some specimens of Mr. Crousaz's sentiments, by which it will probably be shown, that he is far from deserving either indignation or contempt; that his notions are just, though they are sometimes introduced without necessity; and defended when they are not opposed; and that his abilities and parts are such as may entitle him to reverence from those who think his criticisms superfluous.

In page 35th of the English translation, he exhibits an observation which every writer ought to impress upon his mind, and which may afford a sufficient apology for his commentary.

On the notion of a ruling passion he offers this remark: "Nothing so much hinders men from obtaining a complete victory over their ruling passions, as that all the advantages gained in their days of retreat, by just and sober reflections, whether struck out by their own minds, or borrowed from good books, or from the conversation of men of merit, are destroyed in a few moments by a free intercourse and acquaintance with libertines; and thus the work is always to be begun anew. A gamester resolves to leave off play, by which he finds his health impaired, his family ruined, and his passions inflamed; in this resolution he persists a few days, but soon yields to an invitation, which will give his prevailing inclination an opportunity of reviving in all its force. The case is the same with other men: but is reason to be charged with these calamities and follies, or rather the

man who refuses to listen to its voice in opposition to impertinent solicitations?"

On the means recommended for the attainment of happiness, he observes, that "the abilities which our Maker has given us, and the internal and external advantages with which he has invested us, are of two very different kinds; those of one kind are bestowed in common upon us and the brute creation, but the other exalts us far above other animals. To disregard any of these gifts, would be ingratitude; but to neglect those of greater excellence, to go no farther than the gross satisfactions of sense, and the functions of mere animal life, would be a far greater crime. We are formed by our Creator capable of acquiring knowledge, and regulating our conduct by reasonable rules; it is therefore our duty to cultivate our understandings, and exalt our virtues. We need but make the experiment to find, that the greatest pleasures will arise from such endeavours.

"It is trilling to allege, in opposition to this truth, that knowledge cannot be acquired, nor virtue pursued, without toil and efforts, and that all efforts produce fatigue. God requires nothing disproportioned to the powers he has given, and in the exercise of those powers consists the highest satisfaction.

"Toil and weariness are the effects of vanity: when a man has formed a design of excelling others in merit, he is disquieted by their advances, and leaves nothing unattempted, that he may step before them: this occasions a thousand unreasonable emotions, which justly bring their punishment along with them.

"But let a man study and labour to cultivate and improve his abilities in the eye of his Maker, and with the prospect of his approbation; let him attentively reflect on the infinite value of that approbation, and the highest encomiums that men can bestow will vanish into nothing at the comparison. When we live in this manner, we find that we live for a great and glorious end.

"When this is our frame of mind, we find it no longer difficult to restrain ourselves in the gratifications of eating and drinking, the most gross enjoyments of sense. We take what is necessary to preserve health and vigour, but are not to give ourselves up to pleasures that weaken the attention, and dull the understanding."

And the true sense of Mr. Pope's assertion, that *Whatever is, is right*, and I believe the sense in which it was written, is thus explained: "A sacred and adorable order is established in the government of mankind. These are certain and unvaried truths: he that seeks God, and makes it his happiness to live in obedience to him, shall obtain what he endeavours after, in a degree far above his present comprehension. He that turns his back upon his Creator, ne-

gleats to obey him, and perseveres in his disobedience, shall obtain no other happiness than he can receive from enjoyments of his own procuring; void of satisfaction, weary of life, wasted by empty cares, and remorses equally harassing and just, he will experience the certain consequences of his own choice. Thus will justice and goodness resume their empire, and that order be restored which men have broken."

I am afraid of wearying you or your readers with more quotations, but if you shall inform me that a continuation of my correspondence will be well received, I shall descend to particular passages, show how Mr. Pope gave sometimes occasion to mistakes; and how Mr. Crousaz was misled by his suspicion of the system of fatality. I am, Sir, yours, &c.

## PRELIMINARY DISCOURSE

TO

## THE LONDON CHRONICLE,

JANUARY 1, 1757.

It has always been lamented, that of the little time allotted to man, much must be spent upon superfluities. Every prospect has its obstructions, which we must break to enlarge our view; every step of our progress finds impediments, which, however eager to go forward, we must stop to remove. Even those who profess to teach the way to happiness, have multiplied our encumbrances, and the author of almost every book retards his instructions by a preface.

The writers of the Chronicle hope to be easily forgiven, though they should not be free from an infection that has seized the whole fraternity, and instead of falling immediately to their subjects, should detain the reader for a time with an account of the importance of their design, the extent of their plan, and the accuracy of the method which they intend to prosecute. Such premonitions, though not always necessary when the reader has the book complete in his hand, and may find by his own eyes whatever can be found in it, yet may be more easily allowed to works published gradually in successive parts, of which the scheme can only be so far known as the author shall think fit to discover it.

The Paper which we now invite the public to add to the papers with which it is already rather wearied than satisfied, consists of many parts; some of which it has in common with other periodical sheets, and some peculiar to itself.

The first demand made by the reader of a journal is, that he should find an accurate account of foreign transactions and domestic in-

cidents. This is always expected, but this is very rarely performed. Of those writers who have taken upon themselves the task of intelligence, some have given and others have sold their abilities, whether small or great, to one or other of the parties that divide us; and without a wish for truth or thought of decency, without care of any other reputation than that of a stubborn adherence to their abettors, carry on the same tenor of representation through all the vicissitudes of right and wrong, neither depressed by detection, nor abashed by confutation, proud of the hourly increase of infamy, and ready to boast of all the contumelies that falsehood and slander may bring upon them, as new proofs of their zeal and fidelity.

With these heroes we have no ambition to be numbered; we leave to the confessors of faction the merit of their sufferings, and are desirous to shelter ourselves under the protection of truth. That all our facts will be authentic, or all our remarks just, we dare not venture to promise: we can relate but what we hear, we can point out but what we see. Of remote transactions, the first accounts are always confused, and commonly exaggerated: and in domestic affairs, if the power to conceal is less, the interest to misrepresent is often greater; and, what is sufficiently vexatious, truth seems to fly from curiosity, and as many inquirers produce many narratives, whatever engages the public attention is immediately disguised by the embellishments of fiction. We pretend to no peculiar power of disentangling contradiction or denuding forgery, we have no settled correspondence with the

Antipodes, nor maintain any spies in the cabinets of princes. But as we shall always be conscious that our mistakes are involuntary, we shall watch the gradual discoveries of time, and retract whatever we have hastily and erroneously advanced.

In the narratives of the daily writers every reader perceives somewhat of neatness and purity wanting, which at the first view it seems easy to supply: but it must be considered, that those passages must be written in haste, and that there is often no other choice, but that they must want either novelty or accuracy; and that as life is very uniform, the affairs of one week are so like those of another, that by any attempt after variety of expression, invention would soon be wearied, and language exhausted. Some improvements however we hope to make; and for the rest, we think that when we commit only common faults, we shall not be excluded from common indulgence.

The accounts of prices of corn and stocks are to most of our readers of more importance than narratives of greater sound: and as exactness is here within the reach of diligence, our readers may justly require it from us.

Memorials of a private and personal kind, which relate deaths, marriages, and preferments, must always be imperfect by omission, and often erroneous by misinformation; but even in these there shall not be wanted care to avoid mistakes, or to rectify them whenever they shall be found.

That part of our work, by which it is distinguished from all others, is the literary journal, or account of the labours and productions of the learned. This was for a long time among the deficiencies of English literature; but as the caprice of man is always starting from too

little to too much, we have now, amongst other disturbers of human quiet, a numerous body of reviewers and remarkers.

Every art is improved by the emulation of competitors; those who make no advances towards excellence, may stand as warnings against faults. We shall endeavour to avoid that petulance which treats with contempt whatever has hitherto been reputed sacred. We shall repress that elation of malignity, which wantons in the cruelties of criticism, and not only murders reputation, but murders it by torture. Whenever we feel ourselves ignorant, we shall at least be modest. Our intention is not to pre-occupy judgment by praise or censure, but to gratify curiosity by early intelligence, and to tell rather what our authors have attempted, than what they have performed. The titles of books are necessarily short, and therefore disclose but imperfectly the contents; they are sometimes fraudulent, and intended to raise false expectations. In our account this brevity will be extended, and these frauds, whenever they are detected, will be exposed; for though we write without intention to injure, we shall not suffer ourselves to be made parties to deceit.

If any author shall transmit a summary of his work, we shall willingly receive it; if any literary anecdote, or curious observation, shall be communicated to us, we will carefully insert it. Many facts are known and forgotten; many observations are made and suppressed; and entertainment and instruction are frequently lost, for want of a repository in which they may be conveniently preserved.

No man can modestly promise what he cannot ascertain: we hope for the praise of knowledge and discernment, but we claim only that of diligence and candour.

---

## INTRODUCTION

TO

## THE WORLD DISPLAYED.

NAVIGATION, like other arts, has been perfected by degrees. It is not easy to conceive that any age or nation was without some vessel, in which rivers might be passed by travellers, or lakes frequented by fishermen; but we have no knowledge of any ship that could endure the violence of the ocean before the ark of Noah.

As the tradition of the deluge has been transmitted to almost all the nations of the earth, it

must be supposed that the memory of the means by which Noah and his family were preserved would be continued long among their descendants, and that the possibility of passing the seas could never be doubted.

What men know to be practicable, a thousand motives will incite them to try; and there is reason to believe, that from the time that the generations of the post-diluvian race spread to

the sea-shores, there were always navigators that ventured upon the sea, though, perhaps, not willingly beyond the sight of land.

Of the ancient voyages little certain is known, and it is not necessary to lay before the reader such conjectures as learned men have offered to the world. The Romans, by conquering Carthage, put a stop to great part of the trade of distant nations with one another, and because they thought only on war and conquest, as their empire increased, commerce was discouraged; till under the latter emperors, ships seem to have been of little other use than to transport soldiers.

Navigation could not be carried to any great degree of certainty without the compass, which was unknown to the ancients. The wonderful quality by which a needle or small bar of steel, touched with a loadstone or magnet, and turning freely by equilibration on a point, always preserves the meridian, and directs its two ends north and south, was discovered, according to the common opinion, in 1299, by John Gola of Amalfi, a town in Italy.

From this time it is reasonable to suppose that navigation made continual, though slow, improvements, which the confusion and barbarity of the times, and the want of communication between orders of men so distant as sailors and monks, hindered from being distinctly and successively recorded.

It seems, however, that the sailors still wanted either knowledge or courage, for they continued for two centuries to creep along the coast, and considered every headland as unpassable, which ran far into the sea, and against which the waves broke with uncommon agitation.

The first who is known to have formed the design of new discoveries, or the first who had power to execute his purposes, was Don Henry the Fifth, son of John, the first king of Portugal, and Philippina, sister of Henry the Fourth of England. Don Henry having attended his father to the conquest of Ceuta, obtained by conversation with the inhabitants of the continent, some accounts of the interior kingdoms and southern coast of Africa; which, though rude and indistinct, were sufficient to raise his curiosity, and convince him, that there were countries yet unknown and worthy of discovery.

He therefore equipped some small vessels, and commanded that they should pass as far as they could along the coast of Africa which looked upon the great Atlantic ocean, the immensity of which struck the gross and unskilful navigators of these times with terror and amazement. He was not able to communicate his own ardour to his seamen, who proceeded very slowly in the new attempt; each was afraid to venture much farther than he that went before him, and ten years were spent before they had advanced beyond Cape Bajador, so called from its progression into the ocean, and the circuit by

which it must be doubled. The opposition of this promontory to the course of the sea, produced a violent current and high waves, into which they durst not venture, and which they had not yet knowledge enough to avoid by standing off from the land into the open sea.

The prince was desirous to know something of the countries that lay beyond this formidable cape, and sent two commanders, named John Gonzales Zarco, and Tristan Vaz, in 1418, to pass beyond Bajador, and survey the coast behind it. They were caught by a tempest, which drove them out into the unknown ocean, where they expected to perish by the violence of the wind, or perhaps to wander for ever in the boundless deep. At last, in the midst of their despair they found a small island, where they sheltered themselves, and which the sense of their deliverance disposed them to call *Puerto Santo*, or the Holy Haven.

When they returned with an account of this new island, Henry performed a public act of thanksgiving, and sent them again with seeds and cattle; and we are told by the Spanish historian, that they set two rabbits on shore, which increased so much in a few years, that they drove away the inhabitants, by destroying their corn and plants, and were suffered to enjoy the island without opposition.

In the second or third voyage to *Puerto Santo* (for authors do not agree which), a third captain, called Perello, was joined to the two former. As they looked round the island upon the ocean, they saw at a distance something which they took for a cloud, till they perceived that it did not change its place. They directed their course towards it, and, in 1419, discovered another island covered with trees, which they therefore called *Madera*, or the Isle of Wood.

Madera was given to Vaz or Zarco, who set fire to the woods, which are reported by Souza to have burnt for seven years together, and to have been wasted, till want of wood was the greatest inconveniency of the place. But green wood is not very apt to burn, and the heavy rains which fall in these countries must surely have extinguished the conflagration, were it ever so violent.

There was yet little progress made upon the southern coast, and Henry's project was treated as chimerical by many of his countrymen. At last Gillianes, in 1433, passed the dreadful cape, to which he gave the name of Bajador, and came back, to the wonder of the nation.

In two voyages more, made in the two following years, they passed forty-two leagues farther, and in the latter, two men with horses being set on shore, wandered over the country, and found nineteen men, whom, according to the savage manners of that age, they attacked; the natives having javelins, wounded one of the Portuguese, and received some wounds from them. At the

mouth of a river, they found sea wolves in great numbers, and brought home many of their skins which were much esteemed.

Antonio Gonzales, who had been one of the associates of Gilianes, was sent again, in 1440, to bring back a cargo of the skins of sea wolves. He was followed in another ship by Nunno Tristam. They were now of strength sufficient to venture upon violence; they therefore landed, and without either right or provocation, made all whom they seized their prisoners, and brought them to Portugal, with great commendations both from the prince and the nation.

Henry now began to please himself with the success of his projects, and as one of his purposes was the conversion of infidels, he thought it necessary to impart his undertaking to the pope, and to obtain the sanction of ecclesiastical authority. To this end Fernando Lopez d'Azevedo was despatched to Rome, who related to the pope and cardinals the great designs of Henry, and magnified his zeal for the propagation of religion. The pope was pleased with the narrative, and by a formal bull, conferred upon the crown of Portugal all the countries which should be discovered as far as India, together with India itself, and granted several privileges and indulgences to the churches which Henry had built in his new regions, and to the men engaged in the navigation for discovery. By this bull, all other princes were forbidden to encroach upon the conquests of the Portuguese, on pain of the censures incurred by the crime of usurpation.

The approbation of the pope, the sight of men whose manners and appearance were so different from those of Europeans, and the hope of gain from golden regions, which has been always the great incentive to hazard and discovery, now began to operate with full force. The desire of riches and of dominion, which yet is more pleasing to the fancy, filled the courts of the Portuguese prince with innumerable adventurers from very distant parts of Europe. Some wanted to be employed in the search after new countries, and some to be settled in those which had been already found.

Communities now began to be animated by the spirit of enterprise, and many associations were formed for the equipment of ships, and the acquisition of the riches of distant regions, which perhaps were always supposed to be more wealthy, as more remote. These undertakers agreed to pay the prince a fifth part of the profit, sometimes a greater share, and sent out the armament at their own expense.

The city of Lagos was the first that carried on this design by contribution. The inhabitants fitted out six vessels, under the command of Lucarot, one of the prince's household, and soon after fourteen more were furnished for the same purpose, under the same commander; to those were added many belonging to private men, so

that in a short time twenty-six ships put to sea in quest of whatever fortune should present.

The ships of Lagos were soon separated by foul weather, and the rest, taking each its own course, stopped at different parts of the African coast, from Cape Blanco to Cape Verd. Some of them, in 1444, anchored at Gomera, one of the Canaries, where they were kindly treated by the inhabitants, who took them into their service against the people of the isle of Palma, with whom they were at war; but the Portuguese at their return to Gomera, not being made so rich as they expected, fell upon their friends, in contempt of all the laws of hospitality and stipulations of alliance, and making several of them prisoners and slaves, set sail for Lisbon.

The Canaries are supposed to have been known, however imperfectly, to the ancients; but in the confusion of the subsequent ages they were lost and forgotten, till about the year 1340, the Biscayners found Lucarot, and invading it (for to find a new country and invade it has always been the same), brought away seventy captives, and some commodities of the place. Louis de la Cerda, count of Clermont, of the blood royal both of France and Spain, nephew of John de la Cerda, who called himself the Prince of Fortune, had once a mind to settle in those islands, and applying himself first to the king of Arragon, and then to Clement VI., was by the pope crowned at Avignon, king of the Canaries, on condition that he should reduce them to the true religion; but the prince altered his mind, and went into France to serve against the English. The kings both of Castile and Portugal, though they did not oppose the papal grant, yet complained of it, as made without their knowledge, and in contravention of their rights.

The first settlement in the Canaries was made by John de Betancour, a French gentleman, for whom his kinsman, Robin de Braquemont, admiral of France, begged them, with the title of king from Henry the magnificent of Castile, to whom he had done eminent services. John made himself master of some of the isles, but could never conquer the grand Canary; and having spent all that he had, went back to Europe, leaving his nephew, Massiot de Betancour, to take care of his new dominion. Massiot had a quarrel with the vicar-general, and was likewise disgusted by the long absence of his uncle, whom the French king detained in his service, and being able to keep his ground no longer, he transferred his rights to Don Henry, in exchange for some districts in the Madera, when he settled his family.

Don Henry, when he had purchased those islands, sent thither, in 1424, two thousand five hundred foot, and a hundred and twenty horse; but the army was too numerous to be maintained by the country. The king of Castile afterwards claimed them, as conquered by his sub-

jects under Betancour, and held under the crown of Castile by fealty and homage; his claim was allowed, and the Canaries were resigned.

It was the constant practice of Henry's navigators, when they stopped at a desert island, to land cattle upon it, and leave them to breed, where, neither wanting room nor food, they multiplied very fast, and furnished a very commodious supply to those who came afterwards to the same place. This was imitated in some degree by Anson, at the isle of Juan Fernandez. The islands of Madera he not only filled with inhabitants, assisted by artificers of every kind, but procured such plants as seemed likely to flourish in that climate, and introduced sugar-canes and vines, which afterwards produced a very large revenue.

The trade of Africa now began to be profitable, but a great part of the gain arose from the sale of slaves, who were annually brought into Portugal, by hundreds, as Lafitau relates, and relates without any appearance of indignation or compassion: they likewise imported gold dust in such quantities, that Alphonsus V. coined it into a new species of money called Crusades, which is still continued in Portugal.

In time they made their way along the south coast of Africa, eastward to the country of the negroes, whom they found living in tents, without any political institutions, supporting life, with very little labour, by the milk of their kine, and millet, to which those who inhabited the coast added fish dried in the sun. Having never seen the natives, or heard of the arts of Europe, they gazed with astonishment on the ships when they approached their coasts, sometimes thinking them birds, and sometimes fishes, according as their sails were spread or lowered; and sometimes conceiving them to be only phantoms, which played to and fro in the ocean. Such is the account given by the historian, perhaps with too much prejudice against a negro's understanding; who though he might well wonder at the bulk and swiftness of the first ship, would scarcely conceive it to be either a bird or a fish; but having seen many bodies floating in the water, would think it what it really is, a large boat; and if he had no knowledge of any means by which separate pieces of timber may be joined together, would form very wild notions concerning its construction, or perhaps suppose it to be a hollow trunk of a tree, from some country where trees grow to a much greater height and thickness than in his own.

When the Portuguese came to land, they increased the astonishment of the poor inhabitants, who saw men clad in iron with thunder and lightning in their hands. They did not understand each other, and signs are a very imperfect mode of communication, even to men of more knowledge than the negroes, so that they could

not easily negotiate or traffic: at last the Portuguese laid hands on some of them to carry them home for a sample; and their dread and amazement was raised, says Lafitau, to the highest pitch, when the Europeans fired their cannons and muskets among them, and they saw their companions fall dead at their feet without any enemy at hand, or any visible cause of their destruction.

On what occasion, or for what purpose, cannons and muskets were discharged among a people harmless and secure, by strangers who without any right visited their coast, it is not thought necessary to inform us. The Portuguese could fear nothing from them, and had therefore no adequate provocation; nor is there any reason to believe but that they murdered the negroes in wanton merriment, perhaps only to try how many a volley would destroy, or what would be the consternation of those that should escape. We are openly told that they had the less scruple concerning their treatment of the savage people, because they scarcely considered them as distinct from beasts; and indeed the practice of all the European nations, and among others of the English barbarians that cultivate the southern islands of America, proves, that this opinion, however absurd and foolish, however wicked and injurious, still continues to prevail. Interest and pride harden the heart, and it is in vain to dispute against avarice and power.

By these practices the first discoverers alienated the natives from them; and whenever a ship appeared, every one that could fly betook himself to the mountains and the woods, so that nothing was to be got more than they could steal: they sometimes surprised a few fishers, and made them slaves, and did what they could to offend the negroes, and enrich themselves. This practice of robbery continued till some of the negroes who had been enslaved learned the language of Portugal, so as to be able to interpret for their countrymen, and one John Fernandez applied himself to the negro tongue.

From this time began something like a regular traffic, such as can subsist between nations where all the power is on one side; and a factory was settled in the isle of Arguin, under the protection of a fort. The profit of this new trade was assigned for a certain term to Ferdinando Gomez; which seems to be the common method of establishing a trade that is yet too small to engage the care of a nation, and can only be enlarged by that attention which is bestowed by private men upon private advantage. Gomez continued the discoveries to Cape Catharine, two degrees and a half beyond the line.

In the latter part of the reign of Alphonso V. the ardour of discovery was somewhat intermitted, and all commercial enterprises were in-

terrupted by the wars in which he was engaged with various success. But John II., who succeeded, being fully convinced both of the honour and advantage of extending his dominions in countries hitherto unknown, prosecuted the designs of prince Henry with the utmost vigour, and in a short time added to his other titles, that of king of Guinea and of the coast of Africa.

In 1483, in the third year of the reign of John II., died prince Henry, the first encourager of remote navigation, by whose incitement, patronage, and example, distant nations have been made acquainted with each other, unknown countries have been brought into general view, and the power of Europe has been extended to the remotest parts of the world. What mankind has lost and gained by the genius and designs of this prince, it would be long to compare, and very difficult to estimate. Much knowledge has been acquired, and much cruelty been committed; the belief of religion has been very little propagated, and its laws have been outrageously and enormously violated. The Europeans have scarcely visited any coast, but to gratify avarice, and extend corruption; to arrogate dominion without right, and practise cruelty without incentive. Happy had it then been for the oppressed, if the designs of Henry had slept in his bosom, and surely more happy for the oppressors. But there is reason to hope that out of so much evil good may sometimes be produced; and that the light of the gospel will at last illuminate the sands of Africa, and the deserts of America, though its progress cannot but be slow when it is so much obstructed by the lives of Christians.

The death of Henry did not interrupt the progress of king John, who was very strict in his injunctions, not only to make discoveries, but to secure possession of the countries that were found. The practice of the first navigators was only to raise a cross upon the coast, and to carve upon the trees the device of Don Henry, the name which they thought it proper to give to the new coast, and any other information, for those that might happen to follow them; but now they began to erect piles of stone with a cross on the top, and engraved on the stone the arms of Portugal, the name of the king, and of the commander of the ship, with the day and year of the discovery. This was accounted sufficient to prove their claim to the new lands; which might be pleaded with justice enough against any other Europeans, and the rights of the original inhabitants were never taken into notice. Of these stone records, nine more were erected in the reign of king John, along the coast of Africa, as far as the Cape of Good Hope.

The fortress in the isle of Arguin was finished, and it was found necessary to build another at S. Georgio de la Mina, a few degrees north

of the line, to secure the trade of gold dust, which was chiefly carried on at that place. For this purpose a fleet was fitted out of ten large and three smaller vessels, freighted with materials for building the fort, and with provisions and ammunition for six hundred men, of whom one hundred were workmen and labourers. Father Lafitau relates, in very particular terms, that these ships carried hewn stones, bricks, and timber, for the fort, so that nothing remained but barely to erect it. He does not seem to consider how small a fort could be made out of the lading of ten ships.

The command of this fleet was given to Don Diego d'Azambue, who set sail December 11th, 1481, and reaching La Mina January 19th, 1482, gave immediate notice of his arrival to Caramansa, a petty prince of that part of the country, whom he very earnestly invited to an immediate conference.

Having received a message of civility from the negro chief, he landed, and chose a rising ground, proper for his intended fortress, on which he planted a banner with the arms of Portugal, and took possession in the name of his master. He then raised an altar at the foot of a great tree, on which mass was celebrated, the whole assembly, says Lafitau, breaking out into tears of devotion at the prospect of inviting these barbarous nations to the profession of the true faith. Being secure of the goodness of the end, they had no scruple about the means, nor ever considered how differently from the primitive martyrs and apostles they were attempting to make proselytes. The first propagators of Christianity recommended their doctrines by their sufferings and virtues; they entered no defenceless territories with swords in their hands; they built no forts upon ground to which they had no right, nor polluted the purity of religion with the avarice of trade, or insolence of power.

What may still raise higher the indignation of a Christian mind, this purpose of propagating truth appears never to have been seriously pursued by any European nation; no means, whether lawful or unlawful, have been practised with diligence and perseverance for the conversion of savages. When a fort is built, and a factory established, there remains no other care than to grow rich. It is soon found that ignorance is most easily kept in subjection, and that by enlightening the mind with truth, fraud and usurpation would be made less practicable and less secure.

In a few days an interview was appointed between Caramansa and Azambue. The Portuguese uttered by his interpreter a pompous speech, in which he made the negro prince large offers of his master's friendship, exhorting him to embrace the religion of his new ally; and told him, that as they came to form a league of

friendship with him, it was necessary that they should build a fort, which might serve as a retreat from their common enemies, and in which the Portuguese might be always at hand to lend him assistance.

The negro, who seemed very well to understand what the admiral intended, after a short pause, returned an answer full of respect to the king of Portugal, but appeared a little doubtful what to determine with relation to the fort. The commander saw his diffidence, and used all his art of persuasion to overcome it. Caramansa, either induced by hope, or constrained by fear, either desirous to make them friends, or not daring to make them enemies, consented, with a show of joy, to that which it was not in his power to refuse; and the new comers began the next day to break the ground for the foundation of a fort.

Within the limit of their intended fortification were some spots appropriated to superstitious practices; which the negroes no sooner perceived in danger of violation by the spade and pick-axe, than they ran to arms, and began to interrupt the work. The Portuguese persisted in their purpose, and there had soon been tumult and bloodshed, had not the admiral, who was at a distance to superintend the unloading the materials for the edifice, been informed of the danger. He was told at the same time, that the support of their superstition was only a pretence, and that all their rage might be appeased by the presents which the prince expected, the delay of which had greatly offended him.

The Portuguese admiral immediately ran to his men, prohibited all violence, and stopped the commotion; he then brought out the presents, and spread them with great pomp before the prince; if they were of no great value, they were rare, for the negroes had never seen such wonders before; they were therefore received with ecstasy, and perhaps the Portuguese derided them for their fondness of trifles, without considering how many things derive their value only from their scarcity; and that gold and rubies would be trifles, if nature had scattered them with less frugality.

The work was now peaceably continued, and such was the diligence with which the strangers hastened to secure the possession of the country, that in twenty days they had sufficiently fortified themselves against the hostility of the negroes. They then proceeded to complete their design. A church was built in the place where their first altar had been raised, on which a mass was established to be celebrated for ever once a day, for the repose of the soul of Henry, the first mover of these discoveries.

In this fort the admiral remained with sixty soldiers, and sent back the rest in the ships, with gold, slaves, and other commodities. It

may be observed that slaves were never forgotten, and that wherever they went, they gratified their pride, if not their avarice, and brought some of the natives, when it happened that they brought nothing else.

The Portuguese endeavoured to extend their dominions still farther. They had gained some knowledge of the Jaloffs, a nation inhabiting the coast of Guinea, between the Gambia and Senegal. The king of the Jaloffs being vicious and luxurious, committed the care of the government to Bemoin, his brother by the mother's side, in preference to two other brothers by his father. Bemoin, who wanted neither bravery nor prudence, knew that his station was invidious and dangerous, and therefore made an alliance with the Portuguese, and retained them in his defence by liberality and kindness. At last the king was killed by the contrivance of his brothers, and Bemoin was to lose his power, or maintain it by war.

He had recourse in this exigence to his great ally the king of Portugal, who promised to support him, on condition that he should become a christian, and sent an ambassador, accompanied with missionaries. Bemoin promised all that was required, objecting only, that the time of a civil war was not a proper season for a change of religion, which would alienate his adherents; but said, that when he was once peaceably established, he would not only embrace the true religion himself but would endeavour the conversion of the kingdom.

This excuse was admitted, and Bemoin delayed his conversion for a year, renewing his promise from time to time. But the war was unsuccessful, trade was at a stand, and Bemoin was not able to pay the money which he had borrowed of the Portuguese merchants, who sent intelligence to Lisbon of his delays, and received an order from the king, commanding them, under severe penalties, to return home.

Bemoin here saw his ruin approaching, and, hoping that money would pacify all resentment, borrowed of his friends a sum sufficient to discharge his debts; and finding that even this enticement would not delay the departure of the Portuguese, he embarked his nephew in their ships, with a hundred slaves, whom he presented to the king of Portugal, to solicit his assistance. The effect of this embassy he could not stay to know; for being soon after deposed, he sought shelter in the fortress of Arguin, whence he took shipping for Portugal, with twenty-five of his principal followers.

The king of Portugal pleased his own vanity and that of his subjects, by receiving him with great state and magnificence, as a mighty monarch who had fled to an ally for succour in misfortune. All the lords and ladies of the court were assembled, and Bemoin was conducted with a splendid attendance into the hall

of audience, where the king rose from his throne to welcome him. Bemoin then made a speech with great ease and dignity, representing his unhappy state, and imploring the favour of his powerful ally. The king was touched with his affliction, and struck by his wisdom.

The conversion of Bemoin was much desired by the king; and it was therefore immediately proposed to him that he should become a christian. Ecclesiastics were sent to instruct him; and having now no more obstacles from interest, he was easily persuaded to declare himself whatever would please those on whom he now depended. He was baptized on the third day of December, 1489, in the palace of the queen, with great magnificence, and named John, after the king.

Some time was spent in feasts and sports on this great occasion, and the negroes signalled themselves by many feats of agility, far surpassing the power of Europeans, who having more helps of art, are less diligent to cultivate the qualities of nature. In the meantime twenty large ships were fitted out, well manned, stored with ammunition, and laden with materials necessary for the erection of a fort. With this powerful armament were sent a great number of missionaries under the direction of Alvarez the king's confessor. The command of this force, which filled the coast of Africa with terror, was given to Pedro Vaz d'Acugna surnamed Bisagu; who soon after they had landed, not being well pleased with his expedition, put an end to its inconveniences by stabbing Bemoin suddenly to the heart. The king heard of this outrage with great sorrow, but did not attempt to punish the murderer.

The king's concern for the restoration of Bemoin was not the mere effect of kindness, he hoped by his help to facilitate greater designs. He now began to form hopes of finding a way to the East Indies, and of enriching his country by that gainful commerce: this he was encouraged to believe practicable, by a map which the Moors had given to prince Henry, and which subsequent discoveries have shown to be sufficiently near to exactness, where a passage round the south-east part of Africa was evidently described.

The king had another scheme yet more likely to engage curiosity, and not irreconcilable with his interest. The world had for some time been filled with the report of a powerful christian prince called Prester John, whose country was unknown, and whom some, after Paulus Venetus, supposed to reign in the midst of Asia, and others in the depth of Ethiopia, between the ocean and Red Sea. The account of the African christians was confirmed by some Abyssinians who had travelled into Spain, and by some friars that had visited the holy land;

and the king was extremely desirous of their correspondence and alliance.

Some obscure intelligence had been obtained, which made it seem probable that a way might be found from the countries lately discovered, to those of this far-famed monarch. In 1486, an ambassador came from the king of Bemoin, to desire that preachers might be sent to instruct him and his subjects in the true religion. He related that in the inland country, three hundred and fifty leagues eastward from Bemoin, was a mighty monarch called Ogane, who had jurisdiction both spiritual and temporal over other kings; that the king of Bemoin and his neighbours, at their accession, sent ambassadors to him with rich presents, and received from him the investiture of their dominions, and the marks of sovereignty, which were a kind of sceptre, a helmet, and a latten cross, without which they could not be considered as lawful kings; that this great prince was never seen but on the day of audience, and then held out one of his feet to the ambassador, who kissed it with great reverence, and who at his departure had a cross of latten hung on his neck, which ennobled him thenceforward, and exempted him from all servile offices.

Bemoin had likewise told the king, that to the east of the kingdom of Tombut, there was among other princes, one that was neither Mahometan nor idolator, but who seemed to profess a religion nearly resembling the christian. These informations compared with each other, and with the current accounts of Prester John, induced the king to an opinion, which, though formed somewhat at hazard, is still believed to be right, that by passing up the river Senegal his dominions would be found. It was therefore ordered that when the fortress was finished, an attempt should be made to pass upward to the source of the river. The design failed then, and has never yet succeeded.

Other ways likewise were tried of penetrating to the kingdom of Prester John, for the king resolved to leave neither sea nor land unsearched till he should be found. The two messengers who were sent first on this design, went to Jerusalem, and then returned, being persuaded that, for want of understanding the language of the country, it would be vain or impossible to travel farther. Two more were then despatched, one of whom was Pedro de Covillan, the other Alphonso de Paiva; they passed from Naples to Alexandria, and then travelled to Cairo, from whence they went to Aden, a town of Arabia, on the Red Sea, near its mouth. From Aden, Paiva set sail for Ethiopia, and Covillan for the Indies. Covillan visited Canavar, Calicut, and Goa in the Indies, and Sossula in the eastern Africa; thence he returned to Aden, and then to Cairo, where he had agreed to meet Paiva.

At Cairo he was informed that Paiva was dead, but he met with two Portuguese Jews, one of whom had given the king an account of the situation and trade of Ormus: they brought orders to Covillan, that he should send one of them home with the journal of his travels, and go to Ormus with the other.

Covillan obeyed the orders, sending an exact account of his adventures to Lisbon, and proceeding with the other messenger to Ormus; where having made sufficient inquiry, he sent his companion homewards with the caravans that were going to Aleppo, and embarking once more on the Red Sea, arrived in time at Abyssinia, and found the prince whom he had sought so long, and with such danger.

Two ships were sent out upon the same search, of which Bartholomew Diaz had the chief command; they were attended by a smaller vessel laden with provisions, that they might not return upon pretence of want either felt or feared.

Navigation was now brought nearer to perfection. The Portuguese claim the honour of many inventions by which the sailor is assisted, and which enable him to leave sight of land, and commit himself to the boundless ocean. Diaz had orders to proceed beyond the river Zaire, where Diego Can had stopped, to build monuments of his discoveries, and to leave upon the coasts negro men and women well instructed, who might inquire after Prester John, and fill the natives with reverence for the Portuguese.

Diaz, with much opposition from his crew, whose mutinies he repressed, partly by softness and partly by steadiness, sailed on till he reached the utmost point of Africa, which from the bad weather that he met there, he called Cabo Tormentoso, or the Cape of Storms. He would have gone forward, but his crew forced him to return. In his way back he met the Victualler, from which he had been parted nine months before; of the nine men which were in it at the separation, six had been killed by the negroes, and of the three remaining, one died for joy at the sight of his friends. Diaz returned to Lisbon in December, 1487, and gave an account of his voyage to the king, who ordered the Cape of Storms to be called thenceforward Cabo de buena Esperanza, or the Cape of Good Hope.

Some time before the expedition of Diaz, the river Zaire and the kingdom of Congo had been discovered by Diego Can, who found a nation of negroes who spoke a language which those that were in his ships could not understand. He landed, and the natives, whom he expected to fly like the other inhabitants of the coast, met them with confidence, and treated them with kindness; but Diego, finding that they could not understand each other, seized some of their chiefs, and carried them to Portugal, leaving some of his own people in their room to learn the language of Congo.

The negroes were soon pacified, and the Portuguese left to their mercy were well treated; and as they by degrees grew able to make themselves understood, recommended themselves, their nation, and their religion. The king of Portugal sent Diego back in a very short time with the negroes whom he had forced away; and when they were set safe on shore the king of Congo conceived so much esteem for Diego, that he sent one of those who had returned, back again in the ship to Lisbon, with two young men despatched as ambassadors, to desire instructors to be sent for the conversion of his kingdom.

The ambassadors were honourably received, and baptized with great pomp, and a fleet was immediately fitted out for Congo, under the command of Gonsalvo Sorza, who dying in his passage, was succeeded in authority by his nephew Roderigo.

When they came to land, the king's uncle, who commanded the province, immediately requested to be solemnly initiated in the Christian religion, which was granted to him and his young son, on Easter day, 1491. The father was named Manuel, and the son Antonio. Soon afterwards the king, queen, and eldest prince, received at the font the names of John, Eleanor, and Alphonso; and a war breaking out, the whole army was admitted to the rites of Christianity, and then sent against the enemy. They returned victorious, but soon forgot their faith, and formed a conspiracy to restore paganism; a powerful opposition was raised by infidels and apostates, headed by one of the king's younger sons: and the missionaries had been destroyed, had not Alphonso pleaded for them and for Christianity.

The enemies of religion now became the enemies of Alphonso, whom they accused to his father of disloyalty. His mother, queen Eleanor, gained time, by one artifice after another, till the king was calmed; he then heard the cause again, declared his son innocent, and punished his accusers with death.

The king died soon after, and the throne was disputed by Alphonso, supported by the Christians, and Aquitimo, his brother, followed by the infidels. A battle was fought, Aquitimo was taken and put to death, and Christianity was for a time established in Congo; but the nation has relapsed into its former follies.

Such was the state of the Portuguese navigation, when, in 1492, Columbus made the daring and prosperous voyage which gave a new world to European curiosity and European cruelty. He had offered his proposal, and declared his expectations to king John of Portugal, who had slighted him as a fanciful and rash projector, that promised what he had not reasonable hopes to perform. Columbus had solicited other princes, and had been repulsed with the same indignity; at last Isabella of Arragon furnished

him with ships, and having found America, he entered the mouth of the Tagus in his return, and showed the natives of the new country. When he was admitted to the king's presence, he acted and talked with so much haughtiness, and reflected on the neglect which he had undergone with so much acrimony, that the courtiers who saw their prince insulted, offered to destroy him; but the king, who knew that he deserved the reproaches that had been used, and who now sincerely regretted his incredulity, would suffer no violence to be offered him, but dismissed him with presents and with honours.

The Portuguese and Spaniards became now jealous of each other's claim to countries which

neither had yet seen; and the Pope, to whom they appealed, divided the new world between them by a line drawn from north to south, a hundred leagues westward from Cape Verd and the Azores, giving all that lies west from that line to the Spaniards, and all that lies east to the Portuguese. This was no satisfactory division, for the east and west must meet at last, but that time was then at a great distance.

According to this grant, the Portuguese continued their discoveries eastward, and became masters of much of the coast both of Africa and the Indies; but they seized much more than they could occupy, and while they were under the dominion of Spain, lost the greater part of their Indian territories.

---

## THE

## PREFACE TO THE PRECEPTOR;

## CONTAINING A GENERAL PLAN OF EDUCATION.

PUBLISHED IN 1748, BY DODSLEY.

---

THE importance of education is a point so generally understood and confessed, that it would be of little use to attempt any new proof or illustration of its necessity and advantages.

At a time when so many schemes of education have been projected, so many proposals offered to the public, so many schools opened for general knowledge, and so many lectures in particular sciences attended; at a time when mankind seems intent rather upon familiarising than enlarging the several arts; and every age, sex, and profession, is invited to an acquaintance with those studies, which were formerly supposed accessible only to such as had devoted themselves to literary leisure, and dedicated their powers to philosophical inquiries; it seems rather requisite that an apology should be made for any further attempt to smooth a path so frequently beaten, or to recommend attainments so ardently pursued, and so officiously directed.

That this general desire may not be frustrated, our schools seem yet to want some book, which may excite curiosity by its variety, encourage diligence by its facility, and reward application by its usefulness. In examining the treatises hitherto offered to the youth of this nation, there appeared none that did not fail in one or other of these essential qualities; none that were not either unpleasing, or abstruse, or

crowded with learning very rarely applicable to the purposes of common life.

Every man who has been engaged in teaching, knows with how much difficulty youthful minds are confined to close application, and how readily they deviate to any thing, rather than attend to that which is imposed as a task. That this disposition, when it becomes inconsistent with the forms of education, is to be checked, will be readily granted; but since, though it may be in some degree obviated, it cannot wholly be suppressed, it is surely rational to turn it to advantage, by taking care that the mind shall never want objects on which its faculties may be usefully employed. It is not impossible, that this restless desire of novelty which gives so much trouble to the teacher, may be often the struggle of the understanding starting from that, to which it is not by nature adapted, and travelling in search of something on which it may fix with greater satisfaction. For without supposing each man particularly marked out by his genius for particular performances, it may be easily conceived, that when a numerous class of boys is confined indiscriminately to the same forms of composition, the repetition of the same words, or the explication of the same sentiments, the employment must, either by nature or accident, be less suitable to some than others; that the

Ideas to be contemplated may be too difficult for the apprehension of one, and too obvious for that of another: they may be such as some understandings cannot reach, though others look down upon them as below their regard. Every mind in its progress through the different stages of scholastic learning, must be often in one of these conditions, must either flag with the labour, or grow wanton with the facility, of the work assigned; and in either state it naturally turns aside from the track before it. Weariness looks out for relief, and leisure for employment, and surely it is rational to indulge the wanderings of both. For the faculties which are too lightly burdened with the business of the day, may with great propriety add to it some other inquiry: and he that finds himself over-wearied by a task, which perhaps, with all his efforts, he is not able to perform, is undoubtedly to be justified in addicting himself rather to easier studies, and endeavouring to quit that which is above his attainment, for that which nature has made him capable of pursuing with advantage.

That therefore this roving curiosity may not be unsatisfied, it seems necessary to scatter in its way such allurements as may withhold it from a useless and unbounded dissipation; such as may regulate it without violence, and direct it without restraint; such as may suit every inclination, and fit every capacity; may employ the stronger genius, by operations of reason; and engage the less active or forcible mind, by supplying it with easy knowledge, and obviating that despondence, which quickly prevails, when nothing appears but a succession of difficulties, and one labour only ceases that another may be imposed.

A book intended thus to correspond with all dispositions, and afford entertainment for minds of different powers, is necessarily to contain treatises on different subjects. As it is designed for schools, though for the higher classes, it is confined wholly to such parts of knowledge as young minds may comprehend; and as it is drawn up for readers yet unexperienced in life, and unable to distinguish the useful from the ostentatious or unnecessary parts of science, it is requisite that a very nice distinction should be made, that nothing unprofitable should be admitted for the sake of pleasure, nor any arts of attraction neglected, that might fix the attention upon more important studies.

These considerations produced the book which is here offered to the public, as better adapted to the great design of pleasing by instruction, than any which has hitherto been admitted into our seminaries of literature. There are not indeed wanting in the world compendiums of science, but many were written at a time when philosophy was imperfect, as that of G. Valla; many contain only naked schemes, or

synoptical tables, as that of Sterius; and others are too large and voluminous, as that of Alstedius; and, what is not to be considered as the least objection, they are generally in a language, which, to boys, is more difficult than the subject; and it is too hard a task to be condemned to learn a new science in an unknown tongue. As in life, so in study, it is dangerous to do more things than one at a time; and the mind is not to be harassed with unnecessary obstructions, in a way, of which the natural and unavoidable asperity is such as too frequently produces despair.

If the language however had been the only objection to any of the volumes already extant, the schools might have been supplied at a small expense by a translation; but none could be found that was not defective, redundant, or erroneous, as to be of more danger than use. It was necessary then to examine, whether upon every single science there was not some treatise written for the use of scholars, which might be adapted to this design, so that a collection might be made from different authors, without the necessity of writing new systems. This search was not wholly without success, for two authors were found, whose performances might be admitted with little alteration. But so widely does this plan differ from all others, so much has the state of many kinds of learning been changed, or so unfortunately have they hitherto been cultivated, that none of the other subjects were explained in such a manner as was now required; and therefore neither care nor expense has been spared to obtain new lights, and procure to this book the merit of an original.

With what judgment the design has been formed, and with what skill it has been executed, the learned world is now to determine. But before sentence shall pass, it is proper to explain more fully what has been intended, that censure may not be incurred by the omission of that which the original plan did not comprehend; to declare more particularly who they are to whose instructions these treatises pretend, that a charge of arrogance and presumption may be obviated; to lay down the reasons which directed the choice of the several subjects; and to explain more minutely the manner in which each particular part of these volumes is to be used.

The title has already declared, that these volumes are particularly intended for the use of schools, and therefore it has been the care of the authors to explain the several sciences, which they have treated, in the most familiar manner; for the mind used only to common expressions, and inaccurate ideas, does not suddenly conform itself to scholastic modes of reasoning, or conceive the nice distinctions of a subtle philosophy, and may be properly initiated in speculative studies by an introduction like

this, in which the grossness of vulgar conception is avoided, without the observation of metaphysical exactness. It is observed that in the course of the natural world no change is instantaneous, but all its vicissitudes are gradual and slow; the motions of intellect proceed in the like imperceptible progression, and proper degrees of transition from one study to another are therefore necessary; but let it not be charged upon the writers of this book, that they intended to exhibit more than the dawn of knowledge, or pretended to raise in the mind any nobler product than the blossoms of science, which more powerful institutions may ripen into fruit.

For this reason it must not be expected, that in the following pages should be found a complete circle of the sciences; or that any authors, now deservedly esteemed, should be rejected to make way for what is here offered. It was intended by the means of these precepts, not to deck the mind with ornaments, but to protect it from nakedness; not to enrich it with affluence, but to supply it with necessaries. The *inquiry*, therefore, was not what degrees of knowledge are desirable, but what are in most stations of life indispensably required; and the *choice* was determined not by the splendour of any part of literature, but by the extent of its use, and the inconvenience which its neglect was likely to produce.

I. The prevalence of this consideration appears in the first part, which is appropriated to the humble purposes of teaching to *read*, and *speak*, and *write letters*; an attempt of little magnificence, but in which no man needs to blush for having employed his time, if honour be estimated by use. For precepts of this kind, however neglected, extend their importance as far as men are found who communicate their thoughts one to another; they are equally useful to the highest and the lowest; they may often contribute to make ignorance less inelegant; and may it not be observed, that they are frequently wanted for the embellishment even of learning?

In order to show the proper use of this part, which consists of various exemplifications of such differences of style as require correspondent diversities of pronunciation, it will be proper to inform the scholar, that there are in general three forms of style, each of which demands its particular mode of elocution: the *familiar*, the *solemn*, and the *pathetic*. That in the familiar, he that reads is only to talk with a paper in his hand, and to indulge himself in all the lighter liberties of voice, as when he reads the common articles of a newspaper, or a cursory letter of intelligence or business. That the solemn style, such as that of a serious narrative, exacts a uniform steadiness of speech, equal, clear, and calm. That for the pathetic, such as an ani-

ated oration, it is necessary the voice be regulated by the sense, varying and rising with the passions. These rules, which are the most general, admit a great number of subordinate observations, which must be particularly adapted to every scholar; for it is observable, that though very few read well, yet every man errs in a different way. But let one remark never be omitted; inculcate strongly to every scholar the danger of copying the voice of another; an attempt which, though it has been often repeated, is always unsuccessful.

The importance of writing letters with propriety, justly claims to be considered with care, since, next to the power of pleasing with his presence, every man would wish to be able to give delight at a distance. This great art should be diligently taught, the rather, because of those letters which are most useful, and by which the general business of life is transacted, there are no *examples* easily to be found. It seems the general fault of those who undertake this part of education, that they propose for the exercise of their scholars, occasions which rarely happen; such as congratulations and condolences, and neglect those without which life cannot proceed. It is possible to pass many years without the necessity of writing panegyrics or epithalamiums; but every man has frequent occasion to state a contract, or demand a debt, or make a narrative of some minute incidents of common life. On these subjects, therefore, young persons should be taught to think justly, and write clearly, neatly, and succinctly, lest they come from school into the world without any acquaintance with common affairs, and stand idle spectators of mankind, in expectation that some great event will give them an opportunity to exert their rhetoric.

II. The second place is assigned to *geometry*; on the usefulness of which it is unnecessary to expatiate in an age when mathematical studies have so much engaged the attention of all classes of men. This treatise is one of those which have been borrowed, being a translation from the work of M. Le Clerc; and is not intended as more than the first initiation. In delivering the fundamental principles of geometry, it is necessary to proceed by slow steps, that each proposition may be fully understood before another is attempted. For which purpose it is not sufficient, that when a question is asked in the words of the book, the scholar likewise can in the words of the book, return the proper answer; for this may be only an act of memory, not of understanding; it is always proper to vary the words of the question, to place the proposition in different points of view, and to require of the learner an explanation in his own terms, informing him however when they are improper. By this method the scholar will become cautious and attentive, and the master will

know with certainty the degree of his proficiency. Yet, though this rule is generally right, I cannot but recommend a precept of Pardie's, that when the student cannot be made to comprehend some particular part, it should be, for that time, laid aside, till new light shall arise from subsequent observation.

When this compendium is completely understood, the scholar may proceed to the perusal of Tacquet, afterwards of Euclid himself, and then of the modern improvers of geometry, such as Barrow, Keil, and Sir Isaac Newton.

III. The necessity of some acquaintance with *geography* and *astronomy* will not be disputed. If the pupil is born to the ease of a large fortune, no part of learning is more necessary to him than the knowledge of the situation of nations, on which their interests generally depend; if he is dedicated to any of the learned professions, it is scarcely possible that he will not be obliged to apply himself in some part of his life to these studies, as no other branch of literature can be fully comprehended without them; if he is designed for the arts of commerce or agriculture, some general acquaintance with these sciences will be found extremely useful to him; in a word, no studies afford more extensive, more wonderful, or more pleasing scenes; and therefore there can be no ideas impressed upon the soul, which can more conduce to its future entertainment.

In the pursuit of these sciences, it will be proper to proceed with the same gradation and caution as in geometry. And it is always of use to decorate the nakedness of science, by interspersing such observations and narratives as may amuse the mind, and excite curiosity. Thus, in explaining the state of the polar regions, it might be fit to read the narrative of the Englishmen that wintered in Greenland, which will make young minds sufficiently curious after the cause of such a length of night, and intenseness of cold; and many stratagems of the same kind might be practised to interest them in all parts of their studies, and call in their passions to animate their inquiries. When they have read this treatise, it will be proper to recommend to them Varenius's *Geography*, and Gregory's *Astronomy*.

IV. The study of *chronology* and *history* seems to be one of the most natural delights of the human mind. It is not easy to live without inquiring by what means every thing was brought into the state in which we now behold it, or without finding in the mind some desire of being informed concerning the generations of mankind, that have been in possession of the world before us, whether they were better or worse than ourselves; or what good or evil has been derived to us from their schemes, practices, and institutions. These are inquiries which history alone can satisfy; and history can only be made

intelligible by some knowledge of chronology, the science by which events are ranged in their order, and the periods of computation are settled; and which therefore assists the memory by method, and enlightens the judgment by showing the dependence of one transaction on another. Accordingly it should be diligently inculcated to the scholar, that unless he fixes in his mind some idea of the time in which each man of eminence lived, and each action was performed, with some part of the contemporary history of the rest of the world, he will consume his life in useless reading, and darken his mind with a crowd of unconnected events; his memory will be perplexed with distant transactions resembling one another, and his reflections be like a dream in a fever, busy and turbulent, but confused and indistinct.

The technical part of chronology, or the art of computing and adjusting time, as it is very difficult, so it is not of absolute necessity, but should however be taught, so far as it can be learned without the loss of those hours which are required for attainments of nearer concern. The student may join with this treatise Le Clerc's *Compendium of History*; and afterwards may, for the historical part of chronology, procure Helvicius's and Isaacson's *Tables*; and, if he is desirous of attaining the technical part, may first peruse Holder's *Account of Time*, Hearne's *Ductor Historicus*, Strauchius, the first part of Petavius's *Rationarium Temporum*; and at length, Scaliger de *Emendatione Temporum*. And for instruction in the method of his historical studies, he may consult Hearne's *Ductor Historicus*, Wheare's *Lectures*, Rawlinson's *Directions for the Study of History*; and for ecclesiastical history, Cave and Dupin, Baronius and Fleury.

V. *Rhetoric* and *poetry* supply life with its highest intellectual pleasures; and in the hands of virtue are of great use for the impression of just sentiments, and recommendation of illustrious examples. In the practice of these great arts, so much more is the effect of nature than the effect of education, that nothing is attempted here but to teach the mind some general heads of observation, to which the beautiful passages of the best writers may commonly be reduced. In the use of this it is not proper that the teacher should confine himself to the examples before him; for by that method he will never enable his pupils to make just application of the rules; but, having inculcated the true meaning of each figure, he should require them to exemplify it by their own observations, pointing to them the poem, or, in longer works, the book or canto in which an example may be found, and leaving them to discover the particular passage by the light of the rules which they have lately learned.

For a farther progress in these studies, they may consult Quintilian and Vossius's *Rhetoric*;

the art of poetry will be best learned from Bossu and Bohours in French, together with Dryden's Essays and Prefaces, the critical Papers of Addison, Spence on Pope's *Odyssey*, and Trapp's *Prælectiones Poeticæ*; but a more accurate and philosophical account is expected from a commentary upon Aristotle's Art of Poetry, with which the literature of this nation will be in a short time augmented.

VI. With regard to the practice of *drawing*, it is not necessary to give any directions, the use of the treatise being only to teach the proper method of imitating the figures which are annexed. It will be proper to incite the scholars to industry, by showing in other books the use of the art, and informing them how much it assists the apprehension, and relieves the memory; and if they are obliged sometimes to *write* descriptions of engines, utensils, or any complex pieces of workmanship, they will more fully apprehend the necessity of an expedient which so happily supplies the defects of language, and enables the eye to conceive what cannot be conveyed to the mind any other way. When they have read this treatise, and practised upon these figures, their theory may be improved by the Jesuit's *Perspective*, and their manual operations by other figures which may be easily procured.

VII. *Logic*, or the art of arranging and connecting ideas, of forming and examining arguments, is universally allowed to be an attainment in the utmost degree worthy the ambition of that being whose highest honour is to be endued with reason; but it is doubted whether that ambition has yet been gratified, and whether the powers of ratiocination have been much improved by any systems of art, or methodical institutions. The logic which for so many ages kept possession of the schools, has at last been condemned as a mere art of wrangling, of very little use in the pursuit of truth; and later writers have contented themselves with giving an account of the operations of the mind, marking the various stages of her progress, and giving some general rules for the regulation of her conduct. The method of these writers is here followed; but without a servile adherence to any, and with endeavours to make improvements upon all. This work, however laborious, has yet been fruitless, if there be truth in an observation very frequently made, that logicians out of the school do not reason better than men unassisted by those lights which their science is supposed to bestow. It is not to be doubted but that logicians may be sometimes overborne by their passions, or blinded by their prejudices: and that a man may reason ill, as he may act ill, not because he does not know what is right, but because he does not regard it; yet it is no more the fault of his art that it does not direct him when his attention is withdrawn

from it, than it is the defect of his sight that he misses his way when he shuts his eyes. Against this cause of error there is no provision to be made, otherwise than by inculcating the value of truth, and the necessity of conquering the passions. But logic may likewise fail to produce its effects upon common occasions, for want of being frequently and familiarly applied, till its precepts may direct the mind imperceptibly, as the fingers of a musician are regulated by his knowledge of the tune. This readiness of recollection is only to be procured by frequent impression; and therefore it will be proper, when logic has been once learned, the teacher take frequent occasion, in the most easy and familiar conversation, to observe when its rules are preserved, and when they are broken; and that afterwards he read no authors without exacting of his pupil an account of every remarkable exemplification, or breach of the laws of reasoning.

When this system has been digested, if it be thought necessary to proceed farther in the study of method, it will be proper to recommend Crousaz, Watts, Le Clerc, Wolfius, and Locke's *Essay on Human Understanding*; and if there be imagined any necessity of adding the peripatetic logic, which has been perhaps condemned without a candid trial, it will be convenient to proceed to Sanderson, Wallis, Crackanthorpe, and Aristotle.

VIII. To excite a curiosity after the works of God, is the chief design of the small specimen of *natural history* inserted in this collection; which, however, may be sufficient to put the mind in motion, and in some measure to direct its steps; but its effects may easily be improved by a philosophic master, who will every day find a thousand opportunities of turning the attention of his scholars to the contemplation of the objects that surround them, of laying open the wonderful art with which every part of the universe is formed, and the providence which governs the vegetable and animal creation. He may lay before them the Religious Philosopher, Ray, Derham's *Physico-Theology*, together with the *Spectacle de la Nature*; and in time recommend to their perusal Rondoletius and Aldrovandus.

IX. But how much soever the reason may be strengthened by logic, or the conceptions of the mind enlarged by the study of nature, it is necessary the man be not suffered to dwell upon them so long as to neglect the study of himself, the knowledge of his own station in the ranks of being, and his various relations to the innumerable multitudes which surround him, and with which his Maker has ordained him to be united for the reception and communication of happiness. To consider these aright is of the greatest importance, since from these arise duties which he cannot neglect. *Ethics*, or *morality*,

therefore, is one of the studies which ought to begin with the first glimpse of reason, and only end with life itself. Other acquisitions are merely temporary benefits, except as they contribute to illustrate the knowledge, and confirm the practice, of morality and piety, which extend their influence beyond the grave, and increase our happiness through endless duration.

This great science, therefore, must be inculcated with care and assiduity, such as its importance ought to incite in reasonable minds; and for the prosecution of this design, fit opportunities are always at hand. As the importance of logic is to be shown by detecting false arguments, the excellence of *morality* is to be displayed by proving the deformity, the reproach, and the misery of all deviations from it. Yet it is to be remembered, that the laws of mere morality are no coercive power; and, however they may by conviction of their fitness please the reasoner in the shade, when the passions stagnate without impulse, and the appetites are secluded from their objects, they will be of little force against the ardour of desire, or the vehemence of rage, amidst the pleasures and tumults of the world. To counteract the power of temptations, hope must be excited by the prospect of rewards, and fear by the expectation of punishment; and virtue may owe her panegyrics to morality, but must derive her authority from religion.

When therefore the obligations of morality are taught, let the sanctions of Christianity never be forgotten; by which it will be shown, that they give strength and lustre to each other; religion will appear to be the voice of reason, and morality the will of God. Under this article must be recommended Tully's Offices, Grotius, Puffendorf, Cumberland's Laws of Nature, and the excellent Mr. Addison's Moral and Religious Essays.

X. Thus far the work is composed for the use of scholars, merely as they are men. But it was thought necessary to introduce something that might be particularly adapted to that country for which it is designed; and therefore a discourse has been added upon *trade and commerce*, of which it becomes every man of this nation to understand at least the general principles, as it is impossible that any should be high or low enough not to be in some degree affected by their declension or prosperity. It is therefore necessary that it should be universally known among us, what changes of property are advantageous, or when the balance of trade is on our side; what are the products or manufactures of other countries; and how far one nation may in any species of traffic obtain or preserve superiority over another. The theory of trade is yet but little understood, and therefore the practice is often without real advantage to the public; but it might be carried on with more

general success, if its principles were better considered; and to excite that attention is our chief design. To the perusal of this book may succeed that of Mun upon foreign Trade, Sir Josiah Child, Locke upon Coin, Davenant's Treatises, the British Merchant, Dictionnaire de Commerce, and, for an abstract or compendium, Gee, and an improvement that may hereafter be made upon his plan.

XI. The principles of *laws and government* come next to be considered; by which men are taught to whom obedience is due, for what it is paid, and in what degree it may be justly required. This knowledge, by peculiar necessity, constitutes a part of the education of an Englishman, who professes to obey his prince according to the law, and who is himself a secondary legislator, as he gives his consent, by his representative, to all the laws by which he is bound, and has a right to petition the great council of the nation, whenever he thinks they are deliberating upon an act detrimental to the interest of the community. This is therefore a subject to which the thoughts of a young man ought to be directed; and that he may obtain such knowledge as may qualify him to act and judge as one of a free people, let him be directed to add to this introduction, Fortescue's Treatises, N. Bacon's Historical Discourse on the Laws and Government of England, Temple's Introduction, Locke on Government, Zouch's Elementa Juris Civilis, Plato Redivivus, Gurdon's History of Parliaments, and Hooker's Ecclesiastical Polity.

XII. Having thus supplied the young student with knowledge, it remains now that he learns its application; and that thus qualified to act his part, he be at last taught to choose it. For this purpose a section is added upon *human life and manners*; in which he is cautioned against the danger of indulging his *passions*, of vitiating his *habits*, and depraving his *sentiments*. He is instructed in these points by three fables, two of which were of the highest authority in the ancient Pagan world. But at this he is not to rest; for if he expects to be wise and happy, he must diligently study the *Scriptures* of God.

Such is the book now proposed, as the first initiation into the knowledge of things, which has been thought by many to be too long delayed in the present forms of education. Whether the complaints be not often ill-grounded, may perhaps be disputed; but it is at least reasonable to believe, that greater proficiency might sometimes be made; that real knowledge might be more early communicated; and that children might be allowed, without injury to health, to spend many of those hours upon useful employments, which are generally lost in idleness and play; therefore the public will surely encourage an experiment, by which, if it fails, no-

body is hurt; and if it succeeds, all the future ages of the world may find advantage; which may eradicate or prevent vice, by turning to a better use those moments in which it is learned or indulged: and in some sense lengthen life, by teaching posterity to enjoy those years which have hitherto been lost. The success, and even the trial of this experiment, will depend upon those to whom the care of our youth is committed; and a due sense of the importance of their trust will easily prevail upon them to encourage a work which pursues the design of improving

education. If any part of the following performance shall upon trial be found capable of amendment: if any thing can be added or altered, so as to render the attainment of knowledge more easy; the Editor will be extremely obliged to any gentleman, particularly those who are engaged in the business of teaching, for such hints or observations as may tend towards the improvement, and will spare neither expense nor trouble in making the best use of their information.

---

## PREFACE TO ROLT'S DICTIONARY.\*

---

No expectation is more fallacious than that which authors form of the reception which their labours will find among mankind. Scarcely any man publishes a book, whatever it be, without believing that he has caught the moment when the public attention is vacant to his call, and the world is disposed in a particular manner to learn the art which he undertakes to teach.

The writers of this volume are not so far exempt from epidemical prejudices, but that they likewise please themselves with imagining, that they have reserved their labours to a propitious conjuncture, and that this is the proper time for the publication of a Dictionary of Commerce.

The predictions of an author are very far from infallibility; but in justification of some degree of confidence it may be properly observed, that there was never from the earliest ages a time in which trade so much engaged the attention of mankind, or commercial gain was sought with such general emulation. Nations which have hitherto cultivated no art but that of war, nor conceived any means of increasing riches but by plunder, are awakened to more inoffensive industry. Those whom the possession of subterraneous treasures have long disposed to accommodate themselves by foreign industry, are at last convinced, that idleness never will

be rich. The merchant is now invited to every port, manufactures are established in all cities, and princes who just can view the sea from some single corner of their dominions, are enlarging harbours, erecting mercantile companies, and preparing to traffic in the remotest countries.

Nor is the form of this work less popular than the subject. It has lately been the practice of the learned to range knowledge by the alphabet, and publish dictionaries of every kind of literature. This practice has perhaps been carried too far by the force of fashion. Sciences, in themselves systematical and coherent, are not very properly broken into such fortuitous distributions. A dictionary of arithmetic or geometry can serve only to confound; but commerce, considered in its whole extent, seems to refuse any other method of arrangement, as it comprises innumerable particulars unconnected with each other, among which there is no reason why any should be first or last, better than is furnished by the letters that compose their names.

We cannot indeed boast ourselves the inventors of a scheme so commodious and comprehensive. The French, among innumerable projects for the promotion of traffic, have taken care to supply their merchants with a *Dictionnaire de Commerce*, collected with great industry and exactness, but too large for common use, and adapted to their own trade. This book, as well as others, has been carefully consulted, that our merchants may not be ignorant of any thing known by their enemies or rivals.

Such indeed is the extent of our undertaking, that it was necessary to solicit every information,

---

\* A new Dictionary of Trade and Commerce, compiled from the Information of the most eminent Merchants, and from the Works of the best Writers on commercial Subjects in all Languages, by Mr. Rolt. Folio, 1757.

to consult the living and the dead. The great qualification of him that attempts a work thus general is diligence of inquiry. No man has opportunity or ability to acquaint himself with all the subjects of a commercial dictionary, so as to describe from his own knowledge, or assert on his own experience. He must therefore often depend upon the veracity of others, as every man depends in common life, and have no other skill to boast than that of selecting judiciously, and arranging properly.

But to him who considers the extent of our subject, limited only by the bounds of nature and of art, the task of selection and method will appear sufficient to overburden industry and distract attention. Many branches of commerce are subdivided into smaller and smaller parts, till at last they become so minute as not easily to be noted by observation. Many interests are so woven among each other as not to be disentangled without long inquiry; many arts are industriously kept secret, and many practices necessary to be known, are carried on in parts too remote for intelligence.

But the knowledge of trade is of so much importance to a maritime nation, that no labour can be thought great by which information may be obtained; and therefore we hope the reader will not have reason to complain, that, of what he might justly expect to find, any thing is omitted.

To give a detail or analysis of our work is very difficult; a volume intended to contain whatever is requisite to be known by every trader, necessarily becomes so miscellaneous and unconnected as not to be easily reducible to heads; yet, since we pretend in some measure to treat of traffic as a science, and to make that regular and systematical which has hitherto been to a great degree fortuitous and conjectural, and has often succeeded by chance rather than by conduct, it will be proper to show that a distribution of parts has been attempted, which, though rude and inadequate, will at least preserve some order, and enable the mind to take a methodical and successive view of this design.

In the dictionary which we here offer to the public, we propose to exhibit the *materials*, the *places*, and the *means* of traffic.

The materials or subjects of traffic are *whatsoever is bought and sold*, and include therefore every production of nature.

In giving an account of the commodities of nature, whether those which are to be used in their original state, as drugs and spices, or those which become useful when they receive a new form from human art, as flax, cotton, and metals, we shall show the places of their production, the manner in which they grow, the art of cultivating or collecting them, their discriminations and varieties, by which the best sorts are known from the worse, and genuine from ficti-

tious, the arts by which they are counterfeited, the casualties by which they are impaired, and the practice by which the damage is palliated or concealed. We shall likewise show their virtues and uses, and trace them through all the changes which they undergo.

The history of manufactures is likewise delivered. Of every artificial commodity the manner in which it is made is in some measure described, though it must be remembered, that, manual operations are scarce to be conveyed by any words to him that has not seen them. Some general notions may however be afforded: it is easy to comprehend, that plates of iron are formed by the pressure of rollers, and bars by the strokes of a hammer; that a cannon is cast, and that an anvil is forged. But as it is to most traders of more use to know when their goods are well wrought, than by what means, care has been taken to name the places where every manufacture has been carried furthest, and the marks by which its excellency may be ascertained.

By the *places of trade* are understood all ports, cities, or towns, where staples are established, manufactures are wrought, or any commodities are bought and sold advantageously. This part of our work includes an enumeration of almost all the remarkable places in the world, with such an account of their situation, customs, and products, as the merchant would require, who being to begin a new trade in any foreign country, was yet ignorant of the commodities of the place and the manners of the inhabitants.

But the chief attention of the merchant, and consequently of the author who writes for merchants, ought to be employed upon the *means* of trade, which include all the knowledge and practice necessary to the skilful and successful conduct of commerce.

The first of the means of trade is proper education, which may confer a competent skill in numbers; to be afterwards completed in the counting-house, by observation of the manner of stating accounts, and regulating books, which is one of the few arts which having been studied in proportion to its importance, is carried as far as use can require. The counting-house of an accomplished merchant is a school of method, where the great science may be learned of ranging particulars under generals, of bringing the different parts of a transaction together, and of showing at one view a long series of dealing and exchange. Let no man venture into large business while he is ignorant of the method of regulating books; never let him imagine that any degree of natural abilities will enable him to supply this deficiency, or preserve multiplicity of affairs from inextricable confusion.

This is the study, without which all other studies will be of little avail; but this alone is not sufficient. It will be necessary to learn many

other things, which however may be easily included in the preparatory institutions, such as an exact knowledge of the *weights* and *measures* of different countries, and some skill in geography and navigation, with which this book may perhaps sufficiently supply him.

In navigation, considered as part of the skill of a merchant, is included not so much the art of steering a ship, as the knowledge of the sea-coast, and of the different parts to which his cargoes are sent; the customs to be paid; the passes, permissions, or certificates to be procured; the hazards of every voyage, and the true rate of insurances. To this must be added, an acquaintance with the policies and arts of other nations, as well those to whom the commodities are sold, as of those who carry goods of the same kind to the same market; and who are therefore to be watched as rivals endeavouring to take advantage of every error, miscarriage, or debate.

The chief of the *means* of trade is *money*, of which our late refinements in traffic have made the knowledge extremely difficult. The merchant must not only inform himself of the various denominations and value of foreign coins, together with their method of counting and reducing; such as the milleries of Portugal, and the livres of France; but he must learn what is of more difficult attainment; the discount of exchanges, the nature of current paper, the principles upon which the several banks of Europe are established, the real value of funds, the true credit of trading companies, with all the sources of profit, and possibilities of loss.

All this he must learn merely as a private dealer, attentive only to his own advantage; but as every man ought to consider himself as part of the community to which he belongs, and while he prosecutes his own interest to promote likewise that of his country, it is necessary for the trader to look abroad upon mankind, and study many questions which are perhaps more properly political than mercantile.

He ought therefore to consider very accurately the balance of trade, or the proportion between things exported and imported; to examine what kinds of commerce are unlawful, either as being expressly prohibited, because detrimental to the manufactures or other interest of his country, as the exportation of silver to the East Indies, and the introduction of French commodities; or unlawful in itself, as the traffic for negroes. He ought to be able to state with accuracy, the benefits and mischiefs of monopolies, and exclusive companies; to enquire into the arts which have been practised by them to make them necessary, or by their op-

ponents to make them odious. He should inform himself what trades are declining, and what are improveable; when the advantage is on our side, and when on that of our rivals.

The state of our *colonies* is always to be diligently surveyed, that no advantage may be lost which they can afford, and that every opportunity may be improved of increasing their wealth and power, or of making them useful to their mother country.

There is no knowledge of more frequent use than that of duties and imposts, whether customs paid at the ports, or excises levied on the manufacturer. Much of the prosperity of a trading nation depends upon duties properly apportioned; so that what is necessary may continue cheap, and what is of use only to luxury may in some measure atone to the public for the mischief done to individuals. Duties may often be so regulated as to become useful even to those that pay them; and they may be likewise so unequally imposed as to discourage honesty, and depress industry, and give temptation to fraud and unlawful practices.

To teach all this is the design of the Commercial Dictionary; which though immediately and primarily written for the merchants, will be of use to every man of business or curiosity. There is no man who is not in some degree a merchant, who has not something to buy and something to sell, and who does not therefore want such instructions as may teach him the true value of possessions or commodities.

The descriptions of the productions of the earth and water, which this volume will contain, may be equally pleasing and useful to the speculatist with any other natural history; and the accounts of various manufactures will constitute no contemptible body of experimental philosophy. The descriptions of ports and cities may instruct the geographer as well as if they were found in books appropriated only to his own science; and the doctrines of funds, insurances, currency, monopolies, exchanges, and duties, is so necessary to the politician, that without it he can be of no use either in the council or the senate, nor can speak or think justly either on war or trade.

We therefore hope that we shall not repent the labour of compiling this work; nor flatter ourselves unreasonably, in predicting a favourable reception to a book which no condition of life can render useless, which may contribute to the advantage of all that make or receive laws, of all that buy or sell, of all that wish to keep or improve their possessions, of all that desire to be rich, and all that desire to be wise.

## PREFACE

TO THE TRANSLATION OF

### FATHER LOBO'S VOYAGE TO ABYSSINIA.\*

---

THE following relation is so curious and entertaining, and the dissertations that accompany it so judicious and instructive, that the translator is confident his attempt stands in need of no apology, whatever censures may fall on the performance.

The Portuguese traveller, contrary to the general vein of his countrymen, has amused his reader with no romantic absurdities or incredible fictions: whatever he relates, whether true or not, is at least probable; and he who tells nothing exceeding the bounds of probability, has a right to demand that they should believe him who cannot contradict him.

He appears, by his modest and unaffected narration, to have described things as he saw them, to have copied nature from the life, and to have consulted his senses, not his imagination. He meets with no basilisks that destroy with their eyes; his crocodiles devour their prey without tears; and his cataracts fall from the rock without deafening the neighbouring inhabitants.

The reader will here find no regions cursed with irremediable barrenness, or blessed with spontaneous fecundity; no perpetual gloom or unceasing sunshine; nor are the nations here described either devoid of all sense of humanity, or consummate in all private and social virtues: here are no Hottentots without religion, polity, or articulate language; no Chinese perfectly polite, and completely skilled in all sciences: he will discover what will always be discovered by a diligent and impartial inquirer, that wherever human nature is to be found, there is a mixture of vice and virtue, a contest of passion and reason; and that the Creator doth not appear partial in his distributions, but has balanced in most countries their particular inconveniences by particular favours.

In his account of the mission, where his veracity is most to be suspected, he neither exaggerates over-much the merits of the jesuits, if we consider the partial regard paid by the Por-

tuguese to their countrymen, by the jesuits to their society, and by the papists to their church, nor aggravates the vices of the Abyssinians; but if the reader will not be satisfied with a popish account of a popish mission, he may have recourse to the History of the Church of Abyssinia, written by Dr. Geddes, in which he will find the actions and sufferings of the missionaries placed in a different light, though the same in which Mr. Le Grand, with all his zeal for the Roman church, appears to have seen them.

This learned dissertator, however valuable for his industry and erudition, is yet more to be esteemed for having dared so freely, in the midst of France, to declare his disapprobation of the patriarch Oviedo's sanguinary zeal, who was continually importuning the Portuguese to beat up their drums for missionaries who might preach the gospel with swords in their hands, and propagate by desolation and slaughter the true worship of the God of peace.

It is not easy to forbear reflecting with how little reason these men profess themselves the followers of Jesus, who left this great characteristic to his disciples, that they should be known by *loving one another*, by universal and unbounded charity and benevolence.

Let us suppose an inhabitant of some remote and superior region, yet unskilled in the ways of men, having read and considered the precepts of the gospel, and the example of our Saviour, to come down in search of the *true church*. If he would not inquire after it among the cruel, the insolent, and the oppressive; among those who are continually grasping at dominion over souls as well as bodies; among those who are employed in procuring to themselves impunity for the most enormous villanies, and studying methods of destroying their fellow-creatures, not for their crimes but their errors—if he would not expect to meet benevolence engaged in massacres, or to find mercy in a court of inquisition, he would not look for the *true church* in the church of Rome.

Mr. Le Grand has given in one dissertation an example of great moderation, in deviating from the temper of his religion; but in the others has left proofs, that learning and honesty are often too weak to oppose prejudice. He

---

\* For an account of this book, see the Life of Dr. Johnson, by Mr. Morphy.

has made no scruple of preferring the testimony of father Du Bernat to the writings of all the Portuguese jesuits, to whom he allows great zeal, but little learning, without giving any other reason than that his favourite was a Frenchman. This is writing only to Frenchmen and to papists: a protestant would be desirous to know, why he must imagine that father Du Bernat had a cooler head or more knowledge, and why one man whose account is singular, is not more likely to be mistaken than many agreeing in the same account.

If the Portuguese were biassed by any particular views, another bias equally powerful may have deflected the Frenchman from the truth; for they evidently write with contrary designs: the Portuguese, to make their mission seem more necessary, endeavoured to place in the strongest light the differences between the Abyssinian and Roman church; but the great Ludolfus, laying hold on the advantage, reduced these later writers to prove their conformity.

Upon the whole, the controversy seems of no great importance to those who believe the Holy Scriptures sufficient to teach the way of salvation; but, of whatever moment it may be thought, there are no proofs sufficient to decide it.

His discourses on indifferent subjects will divert as well as instruct; and if either in these, or in the relation of father Lobo, any argument shall appear unconvincing, or description obscure, they are defects incident to all mankind, which, however, are not too rashly to be im-

puted to the authors, being sometimes perhaps more justly chargeable on the translator.

In this translation (if it may be so called) great liberties have been taken, which, whether justifiable or not, shall be fairly confessed, and let the judicious part of mankind pardon or condemn them.

In the first part the greatest freedom has been used, in reducing the narration into a narrow compass; so that it is by no means a translation, but an epitome, in which, whether every thing either useful or entertaining be comprised, the compiler is least qualified to determine.

In the account of Abyssinia, and the continuation, the authors have been followed with more exactness; and as few passages appeared either insignificant or tedious, few have been either shortened or omitted.

The dissertations are the only part in which an exact translation has been attempted; and even in those, abstracts are sometimes given instead of literal quotations, particularly in the first; and sometimes other parts have been contracted.

Several memorials and letters, which are printed at the end of the dissertations to secure the credit of the foregoing narrative, are entirely left out.

It is hoped that after this confession, whoever shall compare this attempt with the original, if he shall find no proofs of fraud or partiality, will candidly overlook any failure of judgment.

## AN ESSAY ON EPITAPHS.

FROM THE GENTLEMAN'S MAGAZINE, 1740.

THOUGH criticism has been cultivated in every age of learning, by men of great abilities and extensive knowledge, till the rules of writing are become rather burdensome than instructive to the mind; though almost every species of composition has been the subject of particular treatises, and given birth to definitions, distinctions, precepts, and illustrations; yet no critic of note, that has fallen within my observation, has hitherto thought *sepulchral inscriptions* worthy of a minute examination, or pointed out with proper accuracy their beauties and defects.

The reasons of this neglect it is useless to inquire, and perhaps impossible to discover; it might be justly expected that this kind of writ-

ing would have been the favourite topic of criticism, and that self-love might have produced some regard for it, in those authors that have crowded libraries with elaborate dissertations upon Homer; since to afford a subject for heroic poems is the privilege of very few, but every man may expect to be recorded in an epitaph, and therefore finds some interest in providing that his memory may not suffer by an unskilful panegyric.

If our prejudices in favour of antiquity deserve to have any part in the regulation of our studies, Epitaphs seem entitled to more than common regard, as they are probably of the same age with the art of writing. The most ancient structures in the world, the Pyramids,

are supposed to be sepulchral monuments, which either pride or gratitude erected; and the same passions which incited men to such laborious and expensive methods of preserving their own memory, or that of their benefactors, would doubtless incline them not to neglect any easier means by which the same ends might be obtained. Nature and reason have dictated to every nation, that to preserve good actions from oblivion, is both the interest and duty of mankind: and therefore we find no people acquainted with the use of letters, that omitted to grace the tombs of their heroes and wise men with panegyric inscriptions.

To examine, therefore, in what the perfection of Epitaphs consists, and what rules are to be observed in composing them, will be at least of as much use as other critical inquiries; and for assigning a few hours to such disquisitions, great examples at least, if not strong reasons, may be pleaded.

An Epitaph, as the word itself implies, is an *inscription on the tomb*, and in its most extensive import may admit indiscriminately satire or praise. But as malice has seldom produced monuments of defamation, and the tombs hitherto raised have been the work of friendship and benevolence, custom has contracted the original latitude of the word, so that it signifies in the general acceptance an *inscription engraven on a tomb in honour of the person deceased*.

As honours are paid to the dead in order to incite others to the imitation of their excellences, the principal intention of Epitaphs is to perpetuate the examples of virtue, that the tomb of a good man may supply the want of his presence, and veneration for his memory produce the same effect as the observation of his life. Those Epitaphs are, therefore, the most perfect, which set virtue in the strongest light, and are best adapted to exalt the reader's ideas and rouse his emulation.

To this end it is not always necessary to recount the actions of a hero, or enumerate the writings of a philosopher; to imagine such informations necessary, is to detract from their characters, or to suppose their works mortal, or their achievements in danger of being forgotten. The bare name of such men answers every purpose of a long inscription.

Had only the name of Sir ISAAC NEWTON been subjoined to the design upon his monument, instead of a long detail of his discoveries, which no philosopher can want, and which none but a philosopher can understand, those, by whose direction it was raised, had done more honour both to him and to themselves.

This indeed is a commendation which it requires no genius to bestow, but which can never become vulgar or contemptible, if bestowed with judgment, because no single age produces many men of merit superior to panegyric.

None but the first names can stand unassisted against the attacks of time; and if men raised to reputation by accident or caprice, have nothing but their names engraved on their tombs, there is danger lest in a few years the inscription require an interpreter. Thus have their expectations been disappointed who honoured Picius of Mirandola with this pompous epitaph:

Hic situs est PICIUS MIRANDOLA, cætera norunt  
Et Tagus et Ganges, forsan et Antipodes.

His name, then celebrated in the remotest corners of the earth, is now almost forgotten; and his works, then studied, admired, and applauded, are now mouldering in obscurity.

Next in dignity to the bare name is a short character simple and unadorned, without exaggeration, superlatives, or rhetoric. Such were the inscriptions in use among the Romans, in which the victories gained by their emperors were commemorated by a single epithet; as *Cæsar Germanicus*, *Cæsar Dacicus*, *Germanicus*, *Illyricus*. Such would be this epitaph, ISAACUS NEWTONUS, *natura legibus investigatis, hic quiescit*.

But to far the greatest part of mankind a longer encomium is necessary for the publication of their virtues, and the preservation of their memories; and in the composition of these it is that art is principally required, and precepts therefore may be useful.

In writing Epitaphs, one circumstance is to be considered, which affects no other composition; the place in which they are now commonly found restrains them to a particular air of solemnity, and debars them from the admission of all lighter or gayer ornaments. In this it is that the style of an Epitaph necessarily differs from that of an elegy. The custom of burying our dead either in or near our churches, perhaps originally founded on a rational design of fitting the mind for religious exercises, by laying before it the most affecting proof of the uncertainty of life, makes it proper to exclude from our Epitaphs all such allusions as are contrary to the doctrines for the propagation of which the churches are erected, and to the end for which those who peruse the monuments must be supposed to come thither. Nothing is, therefore, more ridiculous than to copy the Roman inscriptions, which were engraven on stones by the high-way, and composed by those who generally reflected on mortality only to excite in themselves and others a quicker relish of pleasure, and a more luxurious enjoyment of life, and whose regard for the dead extended no farther than a wish that *the earth might be light upon them*.

All allusions to the heathen mythology are therefore absurd, and all regard for the senseless remains of a dead man impertinent and superstitious. One of the first distinctions of the

primitive Christians, was their neglect of bestowing garlands on the dead, in which they are very rationally defended by their apologist in Minutius Felix. "We lavish no flowers nor odours on the dead," says he, "because they have no sense of fragrance or of beauty." We profess to reverence the dead, not for their sake, but for our own. It is therefore always with indignation or contempt that I read the epitaph on Cowley, a man whose learning and poetry were his lowest merits.

Aurea dum late volitant tna scripta per orbem,  
Et fama eternum vivis, divine Pcſſa,  
Hic placida jaceas requie, custodiat urnam  
Cana Fides, vigilentque perenni lampade Musæ!  
Sit sacer ille locus, nec quis temerarius ausit  
Sacrilega turbare manu venerabile bustum.  
Intacti maneat, maneat per sæcula dulces  
COWLEYI cineres, serventque immobile saxum.

To pray that the ashes of a friend may lie undisturbed, and that the divinities that favoured him in his life, may watch for ever round him, to preserve his tomb from violation, and drive sacrilege away, is only rational in him who believes the soul interested in the repose of the body, and the powers which he invokes for its protection able to preserve it. To censure such expressions as contrary to religion, or as remains of heathen superstition, would be too great a degree of severity. I condemn them only as uninstrusive and unaffecting, as too ludicrous for reverence or grief, for Christianity and a temple.

That the designs and decorations of monuments ought likewise to be formed with the same regard to the solemnity of the place, cannot be denied; it is an established principle, that all ornaments owe their beauty to their propriety. The same glitter of dress that adds graces to gayety and youth, would make age and dignity contemptible. Charon with his boat is far from heightening the awful grandeur of the universal judgment, though drawn by Angelo himself; nor is it easy to imagine a greater absurdity than that of gracing the walls of a Christian temple with the figure of Mars leading a hero to battle, or Cupids sporting round a virgin. The pope who defaced the statues of the deities at the tomb of Sannazarius, is, in my opinion, more easily to be defended, than he that erected them.

It is for the same reason improper to address the Epitaph to the passenger, a custom which an injudicious veneration for antiquity introduced again at the revival of letters, and which, among many others, Passeratius suffered to mislead him in his Epitaph upon the heart of Henry king of France, who was stabbed by Clement the monk; which yet deserves to be inserted, for the sake of showing how beautiful even improprieties may become in the hands of a good writer.

Adsta, viator, et dolo regum vices.  
Cec Regis isto conditur sub marmore,  
Qui jura Gallis, jura Sarmatis cecidit.  
Tectus cucullo hunc sustulit sicarius.  
Abi, viator, et dolo regum vices.

In the monkish ages, however ignorant and unpolished, the Epitaphs were drawn up with far greater propriety than can be shown in those which more enlightened times have produced.

Orate pro Anima—miserrimi Peccatoris,

was an address to the last degree striking and solemn, as it flowed naturally from the religion then believed, and awakened in the reader sentiments of benevolence for the deceased, and concern for his own happiness. There was nothing trifling or ludicrous, nothing that did not tend to the noblest end, the propagation of piety and the increase of devotion.

It may seem very superfluous to lay it down as the first rule for writing Epitaphs, that the name of the deceased is not to be omitted; nor should I have thought such a precept necessary, had not the practice of the greatest writers shown that it has not been sufficiently regarded. In most of the poetical Epitaphs, the names for whom they were composed, may be sought to no purpose, being only prefixed on the monument. To expose the absurdity of this omission, it is only necessary to ask how the Epitaphs, which have outlived the stones on which they were inscribed, would have contributed to the information of posterity, had they wanted the names of those whom they celebrated.

In drawing the character of the deceased, there are no rules to be observed which do not equally relate to other compositions. The praise ought not to be general, because the mind is lost in the extent of any indefinite idea, and cannot be affected with what it cannot comprehend. When we hear only of a good or great man, we know not in what class to place him, nor have any notion of his character, distinct from that of a thousand others; his example can have no effect upon our conduct, as we have nothing remarkable or eminent to propose to our imitation. The Epitaph composed by Ennius for his own tomb, has both the faults last mentioned.

Nemo me decoret lacrimis, nec funera, fletu  
Faxit. Cur? volito vivu' per ora virum.

The reader of this Epitaph receives scarce any idea from it; he neither conceives any veneration for the man to whom it belongs, nor is instructed by what methods this boasted reputation is to be obtained.

Though a sepulchral inscription is professedly a panegyric, and, therefore, not confined to historical impartiality, yet it ought always to be

written with regard to truth. No man ought to be commended for virtues which he never possessed, but whoever is curious to know his faults must inquire after them in other places; the monuments of the dead are not intended to perpetuate the memory of crimes, but to exhibit patterns of virtue. On the tomb of Mæcenas his luxury is not to be mentioned with his munificence, nor is the proscription to find a place on the monument of Augustus.

The best subject for Epitaphs is private virtue; virtue exerted in the same circumstances in which the bulk of mankind are placed, and which, therefore, may admit of many imitators. He that has delivered his country from oppression, or freed the world from ignorance and error, can excite the emulation of a very small number; but he that has repelled the temptations of poverty, and disdained to free himself from distress at the expense of his virtue, may animate multitudes, by his example, to the same firmness of heart and steadiness of resolution.

Of this kind I cannot forbear the mention of two Greek inscriptions; one upon a man whose writings are well known, the other upon a person whose memory is preserved only in her Epitaph, who both lived in slavery, the most calamitous estate in human life:

Ζωσίμα ἡ πρὶν εἶσα μόνῃ τῇ σώματι δούλη,  
Καὶ τῇ σώματι νῦν εἶσα ἐλευθέρῃ.

*Zosima, quæ solo fuit olim corpore serva,  
Corpore nunc etiam libera facta fuit.*

"ZOSIMA, who in her life could only have her body enslaved, now finds her body likewise set at liberty."

It is impossible to read this Epitaph without being animated to bear the evils of life with constancy, and to support the dignity of human nature under the most pressing afflictions, both by the example of the heroine, whose grave we behold, and the prospect of that state in which, to use the language of the inspired writers, "The poor cease from their labours, and the weary be at rest."

The other is upon Epictetus, the Stoic philosopher:

Δούλος Ἐπικτῆτος γνομῆν, καὶ σωτὴ ἀναπηγῶς,  
Καὶ πένην ἱστῶ, καὶ φίλος Ἀθανάτῃς.

*Servus Epictetus, mutilatus corpore, vixit  
Pauperieque Irus, curaque prima Diæ.*

"EPICETUS, who lies here, was a slave and a cripple, poor as the beggar in the proverb, and the favourite of Heaven."

In this distich is comprised the noblest panegyric, and the most important instruction. We may learn from it that virtue is impracticable in no condition, since Epictetus could recommend himself to the regard of Heaven, amidst the temptations of poverty and slavery; slavery, which has always been found so destructive to virtue, that in many languages a slave and a thief are expressed by the same word. And we may be likewise admonished by it, not to lay any stress on a man's outward circumstances, in making an estimate of his real value, since Epictetus, the beggar, the cripple, and the slave, was the favourite of Heaven.

## PREFACE \*

### TO AN ESSAY ON MILTON'S USE AND IMITATION OF THE MODERNS IN HIS PARADISE LOST.

FIRST PUBLISHED IN THE YEAR 1750.

It is now more than half a century since the "Paradise Lost," having broke through the

cloud with which the unpopularity of the author, for a time, obscured it, has attracted the

\* "It is to be hoped, nay, it is *expected*, that the elegant and nervous writer, whose judicious sentiments, and inimitable style, points out the author of Lauder's Preface and Postscript, will no longer allow one to *plume himself with his feathers*, who appears so little to have deserved his assistance; an assistance which I am persuaded would never have been communicated, had there been the least suspicion

of those facts which I have been the instrument of conveying to the world in these sheets."—*Milton vindicated from the charge of plagiarism brought against him by Mr. Lauder, and Lauder himself convicted of several forgeries and gross impositions on the public.* By John Douglas, M. A., Rector of Eaton Constantine, Salop. 8vo. 1751, p. 77.

general admiration of mankind; who have endeavoured to compensate the error of their first neglect, by lavish praises and boundless veneration. There seems to have arisen a contest, among men of genius and literature, who should most advance its honour, or best distinguish its beauties. Some have revised editions, others have published commentaries, and all have endeavoured to make their particular studies, in some degree, subservient to this general emulation.

Among the inquiries, to which this ardour of criticism has naturally given occasion, none is more obscure in itself, or more worthy of rational curiosity, than a retrospection of the progress of this mighty genius, in the construction of his work; a view of the fabric gradually rising, perhaps from small beginnings, till its foundation rests in the centre, and its turrets sparkle in the skies; to trace back the structure, through all its varieties, to the simplicity of its first plan; to find what was first projected, whence the scheme was taken, how it was improved, by what assistance it was executed, and from what stores the materials were collected, whether its founder dug them from the quarries of nature, or demolished other buildings to embellish his own.

This inquiry has been, indeed, not wholly neglected, nor, perhaps, prosecuted with the care and diligence that it deserves. Several critics have offered their conjectures; but none have much endeavoured to enforce or ascertain them. Mr. Voltaire tells us without proof, that the first hint of "Paradise Lost" was taken from a farce called *Adamo*, written by a player; Dr. Pearce, that it was derived from an Italian tragedy, called *Il Paradiso Perso*; and \* Mr. Peck, that it was borrowed from a wild romance. Any of these conjectures may possibly be true, but, as they stand without sufficient proof, it must be granted, likewise, that they may all possibly be false; at least they cannot preclude any other opinion, which without argument has the same claim to credit, and may perhaps be shown, by resistless evidence, to be better founded.

It is related, by steady and uncontroverted tradition, that the "Paradise Lost" was at first a *Tragedy*, and therefore, amongst tragedies, the first hint is properly to be sought. In a manuscript, published from Milton's own hand, among a great number of subjects for tragedy, is, "Adam unparadis'd," or "Adam in Exile;" and this, therefore, may be justly supposed the embryo of this great poem. As it is observable that all these subjects had been treated by others, the manuscript can be supposed nothing more

than a memorial or catalogue of plays, which, for some reason, the writer thought worthy of his attention. When, therefore, I had observed that "Adam in Exile" was named amongst them, I doubted not but, in finding the original of that tragedy, I should disclose the genuine source of "Paradise Lost." Nor was my expectation disappointed; for, having procured the *Adamus Exul* of Grotius, I found, or imagined myself to find, the first draught, the *prima stammina* of this wonderful poem.

Having thus traced the *original* of this work, I was naturally induced to continue my search to the *collateral relations*, which it might be supposed to have contracted, in its progress to *maturity*: and having, at least, persuaded my own judgment that the search has not been entirely ineffectual, I now lay the result of my labours before the public; with full conviction, that in questions of this kind, the world cannot be *mis-taken*, at least cannot long continue in error.

I cannot avoid acknowledging the *candour* of the author of that excellent monthly book, the "Gentleman's Magazine," in giving admission to the specimens in favour of this argument; and his *impartiality* in as freely inserting the several answers. I shall here subjoin some *extracts* from the xviii volume of this work, which I think suitable to my purpose. To which I have added, in order to obviate every pretence for cavil, a *list* of the authors quoted in the following *Essay*, with their respective *dates*, in comparison with the *date* of "Paradise Lost."

#### POSTSCRIPT.

WHEN this Essay was almost finished, the splendid Edition of "Paradise Lost," so long promised by the Rev. Dr. Newton, fell into my hands; of which I had, however, so little use, that as it would be injustice to censure, it would be flattery to commend it: and I should have totally forborne the mention of a book that I have not read, had not one passage at the conclusion of the life of Milton, excited in me too much pity and indignation to be suppressed in silence.

"Deborah, Milton's youngest daughter," says the Editor, "was married to Mr. Abraham Clarke, a weaver, in Spitalfields, and died in August, 1727, in the 76th year of her age. She had ten children. Elizabeth, the youngest, was married to Mr. Thomas Foster, a weaver in Spitalfields, and had seven children, who are all dead; and she herself is aged about *sixty*, and *weak and infirm*. She seemeth to be a *good, plain, sensible woman*, and has confirmed several particulars related above, and informed me of some others, which she had often heard from her mother." These the doctor enumerates, and then adds, "In all probability, Milton's whole family will be extinct with her, and he can live

\* New Memoirs of Mr. John Milton. By Francis Peck. 4to. 1740. p. 52.

only in his writings. And such is the caprice of fortune, this grand-daughter of a man, who will be an everlasting glory to the nation, has now, for some years, with her husband, kept a little chandler's or grocer's shop, for their subsistence, lately at the lower Holloway, in the road between Highgate and London, and at present in Cock Lane, not far from Shoreditch Church."

That this relation is true, cannot be questioned: but, surely, the honour of letters, the dignity of sacred poetry, the spirit of the English nation, and the glory of human nature, require—that it should be true no longer.—In an age in which statues are erected to the honour of this great writer, in which his effigy has been diffused on medals, and his works propagated by translations, and illustrated by commentaries; in an age, which amidst all its vices, and all its follies, has not become infamous for want of charity; it may be, surely, allowed to hope, that the living remains of Milton will be no longer suffered to languish in distress. It is yet in the power of a great people, to reward the poet whose name they boast, and from their alliance to whose genius, they claim some kind of superiority to every other nation of the earth; that poet, whose works may possibly be read when every other monument of British great-

ness shall be obliterated; to reward him—not with pictures, or with medals, which if he sees, he sees with contempt, but—with tokens of gratitude, which he, perhaps, may even now consider as not unworthy the regard of an immortal spirit. And, surely, to those who refuse their names to no other scheme of expense, it will not be unwelcome, that a *subscription* is proposed, for relieving, in the languor of age, the pains of disease, and the contempt of poverty, the grand-daughter of the author of "Paradise Lost." Nor can it be questioned, that if I, who have been marked out as the Zoilus of Milton, think this regard due to his posterity, the design will be warmly seconded by those, whose lives have been employed in discovering his excellences, and extending his reputation.

Subscriptions  
For the Relief of  
Mrs. ELIZABETH FOSTER,  
Grand-daughter to JOHN MILTON,  
are taken in by

Mr. Dodsley, in Pall Mall;  
Messrs. Cox & Collings, under the Royal Exchange;  
Mr. Cave, at St. John's Gate, Clerkenwell; and  
Messrs. Payne & Bouquet, in Paternoster Row.

CROTII Adamus Exsul.

FIRST PRINTED IN THE YEAR 1751.

TO THE REV. MR. DOUGLAS.

SIR,—CANDOUR and tenderness are in any relation, and on all occasions, eminently amiable; but when they are found in an adversary, and found so prevalent, as to overpower that zeal which his cause excites, and that heat which naturally increases in the prosecution of argument, and which may be in a great measure

justified by the love of truth, they certainly appear with particular advantages; and it is impossible not to envy those who possess the friendship of him, whom it is even some degree of good fortune to have known as an enemy.

I will not so far dissemble my weakness, or my fault, as not to confess that my wish was to have passed undetected; but since it has been my fortune to fail in my original design, to have

the supposititious passages which I have inserted in my quotations made known to the world, and the shade which began to gather on the splendour of Milton totally dispersed, I cannot but count it an alleviation of my pain, that I have been defeated by a man who knows how to use advantages with so much moderation, and can enjoy the honour of conquest without the insolence of triumph.

It was one of the maxims of the Spartans, not to press upon a flying army, and therefore their enemies were always ready to quit the field, because they knew the danger was only in opposing. The civility with which you have thought proper to treat me, when you had incontestible superiority, has inclined me to make your victory complete, without any further struggle, and not only publicly to acknowledge the truth of the charge which you have hitherto advanced, but to confess, without the least dissimulation, subterfuge, or concealment, every other interpolation I have made in those authors, which you have not yet had opportunity to examine.

On the sincerity and punctuality of this confession I am willing to depend for all the future regard of mankind, and cannot but indulge some hopes, that they whom my offence has alienated from me, may by this instance of ingenuity and repentance, be propitiated and reconciled. Whatever be the event, I shall at least have done all that can be done in reparation of my former injuries to Milton, to truth, and to mankind, and intreat that those who shall continue implacable, will examine their own hearts, whether they have not committed equal crimes without equal proofs of sorrow, or equal acts of atonement.\*

The word *pandæmonium* in the marginal notes of Book I. Essay, page 10.

CITATION VI. Essay, page 38.

Adnuit ipsa dolo, malumque (heu! longa dolendi Materies! et triste nefas!) vesana momordit  
Tanti ignari mali. Mora nulla, solutus Avernus  
Exspuit infandas acies; fractumque renugit  
Divulso compage solum. Nabathæa receptum  
Regna dedere sonum, Pharioque in littore  
Nereus

Territus erubuit: simul adgemuere dolentes  
Hesperie valles, Libyæque calentis arenæ  
Exarsere procul. Stupefacta Lycaonis ursa  
Constitit, et pavidò riguit glacialis in axe:  
Omnis cardinibus submotus inhorruit orbis;  
*Angeli hoc efficiunt, cœlestia jussa secuti.*

CITATION VII. Essay, page 41.

*Illa quidem fugiens, sparsis per terga capillis,*

\* The interpolations are distinguished by *Italic* characters.

Ora rigat lacrimis, et cœlum questibus implet.  
Talia voce rogans. Magni Deus arbiter orbis!  
Qui rerum momenta tenes, solusque futuri  
Præscius, elapsique memor: quem terra potentem

Imperio, cœlique tremunt; quem dite superbus  
Horrescit Phlegethon, pavidoque furore veretur:  
En! Styge crudeli premimur. Laxantur hiatus  
Tartarei, dirusque solo dominatur Avernus,  
*Inferniq; canes populantur cuncta creata,*  
Et manes violant superos: discrimina rerum  
Sustulit Antitheus, divumque oppressit honorem.  
Respice Sarcotheim: nimis, heu! decepta momordit

Infastas epulas, nosque omnes prodidit hosti.

CITATION VIII. Essay, page 42, the whole passage.

*Quadrupedi pugnat quadrupes, volucricque volucris;  
Et piscis cum pisce feror hostilibus armis  
Prælia sava gerit: jam prisina pabula spernunt.  
Jam tondere piget viridantes gramine campos:  
Alterum et alterius vivunt animalia letho:  
Prisca nec in gentem humanam reverentur durat;  
Sed fugiunt, vel si steterant fera bella minantur  
Fronte truci, torvosque oculos jaculantur in illam.*

CITATION IX. Essay, page 43.

*Vatibus antiquis numerantur lumine cassis,  
Tiresias, Phineus, Thamyrisque, et magnus  
Homerus.*

The above passage stands thus in Masenius, in one line.

Tiresias cæcus, Thamyrisque, et Daphnis,  
Homerus.

N. B. The verse now cited is in Masenius's Poems, but not in the *Sarcotis*.

CITATION X. Essay, page 46.

In medio, turmas inter provectus ovantes  
Cernitur Antitheus, reliquis hic altior unus  
Eminet, et circum vulgus despectat inane:  
Frons nebulis obscura latet, torvumque furorem  
Dissimulat, fidæ tectus velamine noctis;  
*Persimilis turri præcelsæ, aut montibus altis  
Antiquæ cedro, nudata frondis honore.*

## INTERPOLATIONS IN TAUBMAN.

Essay, page 132.

Tune, ait, imperio regere omnia solus; et una  
Filius iste tuus, qui se tibi subiecit ultro,  
Ac genibus minor ad terram prosternit, et offert  
Nescio quos toties animi servilis honores?  
Et tamen æterni proles æterna Jehovah  
Audit ab æthere luteaque propagine mundi.  
*(Scilicet hunc natum dixisti cuncta regentem;  
Cellibus regem cunctis, dominumque supremum.)*  
Huic ego sim supplex? ego? quo præstantior  
alter [qui  
Non agit in superis. Mihi jus dabit ille, suum  
Dat caput alterius sub jus et vincula legum?  
Semideus reget iste polos? reget avia terræ?  
Me pressum leviori manu fortuna tenebit?  
*Et cogar æternum duplici servire tyranno?*  
Haud ita. Tu solus non polles fortibus ausis.  
Non ego sic cecidi, nec sic mea fata premuntur,  
Ut nequeam relevare caput, colloque superbum

\* For *facile*, the word *volunté* was substituted in the Essay.

Excutere imperium. Mihi si mea dextra favebit,  
Audeo totius mihi jus promittere mundi.

Essay, page 132.

*Throni, dominationes, principatus, virtutes, potestates*, is said to be a line borrowed by Milton from the title-page of Heywood's "Hierarchy of Angels." But there are more words in Heywood's title; and, according to his own arrangement of his subjects, they should be read thus: *Seraphim, cherubin, throni, potestates, angeli, archangeli, principatus, dominationes.*

These are my interpolations, minutely traced without any arts of evasion. Whether from the passages that yet remain, any reader will be convinced of my general assertion, and allow that Milton had recourse for assistance to any of the authors whose names I have mentioned, I shall not now be very diligent to inquire, for I had no particular pleasure in subverting the reputation of Milton, which I had myself once endeavoured to exalt; \* and of which, the foundation had always remained untouched by me, had not my credit and my interest been blasted, or thought to be blasted, by the shade which it cast from its boundless elevation.

About ten years ago, I published an edition of Dr. Johnston's translation of the "Psalms," and having procured from the general assembly of the church of Scotland, a recommendation of its use to the lower classes of grammar-schools, into which I had begun to introduce it, though not without much controversy and opposition; I thought it likely that I should, by annual pub-

\* Virorum maximus—JOANNES MILTONUS—Poeta celeberrimus—non Anglice modo, soli natalis, verum generis humani ornamentum—cujus eximius liber, Anglicanis versibus conscriptus, vulgo PARADISUS AMISSUS, immortalis illud ingenii monumentum, cum ipsa ferè æternitate perennaturum est opus!—Hujus memoriam Anglorum primus, post tantum, pro dolor! ab tanti excessu poetæ intervallum, statua elegant in loco celeberrimo, cenobio Westminsteriensis, posita, regum, principum, antistitum, illustriumque Angliæ virorum cimiterio, vir ornatissimus, Gulielmus Benson prosecutus est.

*Poëtarum Scotorum Musa Sacra in præfatione, Edinb. 1739.*

A character, as high and honourable as ever was bestowed upon him by the most sanguine of his admirers! and as this was my cool and sincere opinion of that wonderful man formerly, so I declare it to be the same still, and ever will be, notwithstanding all appearances to the contrary, occasioned merely by passion and resentment; which appear, however, by the Postscript to the Essay, to be so far from extending to the posterity of Milton, that I recommend his only remaining descendant, in the warmest terms, to the public.

lications, improve my little fortune, and be enabled to support myself in freedom from the miseries of indigence. But Mr. Pope, in his malvolence to Mr. Benson, who had distinguished himself by his fondness for the same version, destroyed all my hopes by a distich, in which he places Johnston in a contemptuous comparison with the author of "Paradise Lost."\*

From this time all my praises of Johnston became ridiculous, and I was censured with great freedom, for forcing upon the schools, an author whom Mr. Pope had mentioned only as a foil to a better poet. On this occasion, it was natural not to be pleased, and my resentment seeking to discharge itself somewhere, was unhappily directed against Milton. I resolved to attack his fame, and found some passages in cursory reading, which gave me hopes of stigmatising him as a plagiarist. The farther I carried my search the more eager I grew for the discovery, and the more my hypothesis was opposed, the more I was heated with rage. The consequence of my blind passion, I need not relate; it has, by your detection, become apparent to mankind. Nor do I mention this provocation as adequate to the fury which I have shown, but as a cause of anger, less shameful and reproachful than fractious malice, personal envy, or national jealousy.

But for the violation of truth, I offer no excuse, because I well know that nothing can excuse it. Nor will I aggravate my crime, by disingenuous palliations. I confess it, I repent it, and resolve, that my first offence shall be my last. More I cannot perform, and more therefore cannot be required. I intreat the pardon of all men, whom I have by any means induced

to support, to countenance, or patronise my frauds, of which I think myself obliged to declare, that not one of my friends was conscious. I hope to deserve, by better conduct and more useful undertakings, that patronage which I have obtained from the most illustrious and venerable names by misrepresentation and delusion, and to appear hereafter in such a character, as shall give you no reason to regret that your name is frequently mentioned with that of, Reverend Sir, your most humble servant,

WILLIAM LAUDER.

December 20th, 1750.

### TESTIMONIES CONCERNING MR. LAUDER.

*Edinb. May 22d, 1734.*

THESE are certifying, that Mr. William Lauder passed his course at this university, to the general satisfaction of these masters, under whom he studied. That he has applied himself particularly to the study of humanity\* ever since. That for several years past, he has taught with success, students in the Humanity Class, who were recommended to him by the professor thereof. And lastly, has taught that class itself, during the indisposition, and since the death, of its late professor: and therefore is, in our opinion, a fit person to teach Humanity in any school or college whatever.

Dunciad, Book IV.

† Benson. This man endeavoured to raise himself to fame, by erecting monuments, striking coins, and procuring translations of Milton; and afterwards by a great passion for Arthur Johnston, a Scots Physician's version of the Psalms, of which he printed many fine editions. *Notes on the Dunciad.*

No fewer than six different editions of that useful and valuable book, two in quarto, two in octavo, and two in a lesser form, now lie like lumber in the hand of Mr. Vaillant, bookseller, the effects of Mr. Pope's ill-natured criticism.

One of these editions in quarto, illustrated with an interpretation and notes, after the manner of the classic authors in *usum Delphini*, was by the worthy editor, anno 1741, inscribed to his Royal Highness Prince George, as a proper book for his instruction in principles of piety, as well as knowledge of the Latin tongue, when he should arrive at due maturity of age. To restore this book to credit, was the cause that induced me to engage in this disagreeable controversy, rather than any design to depreciate the just reputation of Milton.

A Letter from the Rev. Mr. Patrick Cuming, one of the ministers of Edinburgh, and Regius Professor of Church History in the University there, to the Rev. Mr. Blair, Rector of the Grammar-School at Dundee.

D. B.—Upon a public advertisement in the newspapers, of the vacancy of a master's place in your school, Mr. William Lauder, a friend of mine, proposes to set up for a candidate, and goes over for that purpose. He has long taught

\* So the Latin tongue is called in Scotland, from the Latin phrase, *classis humaniorum literarum*, the class or form where that language is taught.

the Latin with great approbation in this place, and given such proofs of his mastery in that language, that the best judges do upon all occasions recommend him as one who is qualified in the best manner. He has taught young boys and young gentlemen, with great success; nor did I ever hear of any complaint of him from either parents or children. I beg leave to recommend him to you as my friend; what friendship you show him, I will look upon as a very great act of friendship to me, of which he and I will retain the most grateful sense, if he is so happy as to be preferred. I persuade myself, you will find him ready at all times to be advised by you, as I have found him. *Indeed, if justice had been done him, he should long ago have been advanced for his merit.* I ever am, D. B., your most affectionate, humble servant,

PATRICK CUMING.

*Edinb. Nov. 13th, 1742.*

---

A Letter from Mr. Mac-Laurin, late Professor of Mathematics in the University of Edinburgh, to the Reverend Mr. George Blair, Rector of the Grammar-School at Dundee.

SIR,—THOUGH unacquainted, I take the liberty of giving you this trouble, from the desire I have always had to see Mr. Lauder provided in a manner suited to his talent. I know him to have made uncommon progress in classical learning, to have taught it with success, and never heard there could be any complaint against his method of teaching. I am, indeed, a stranger to the reasons of his want of success on former occasions. But after conversing with him, I have ground to hope, that he will be always advised by you, for whom he professes great esteem, and will be useful under you. I am, Sir, your most obedient, humble servant,

COLIN MAC-LAURIN.

*College of Edinburgh, Nov. 30th, 1742.*

---

A Letter from the Authors of the "Universal History," to Mr. Lauder.

*London, August 12th, 1741.*

LEARNED SIR,—WHEN we so gladly took the first opportunity of reviving the memory and merit of your incomparable Johnston, in the first volume of our "Universal History," our chief aim was to excite some generous *Mecenas* to favour the world with a new edition of a poem which we had long since beheld with no small concern, buried, as it were, by some unaccountable fatality, into an almost total oblivion: whilst others of that kind, none of them supe-

rior, many vastly inferior, to it, rode, unjustly, as we thought, triumphant over his silent grave.

And it is with great satisfaction that we have seen our endeavours so happily crowned in the edition you soon after gave of it at Edinburgh, in your learned and judicious vindication of your excellent author, and more particularly by the just deference which your learned and pious convocation has been pleased to pay to that *admirable version*.

We have had since then, the pleasure to see your worthy example followed here, in the several beautiful editions of the honourable Mr. Auditor Benson, with his critical notes upon the work.

It was, indeed, the farthest from our thoughts, to enter into the merit of the controversy between your two great poets, Johnston and Buchanan; neither were we so partial to either as not to see, that each had their shades as well as lights; so that, if the latter has been more happy in the choice and variety of his metre, it is as plain, that he has given his poetic genius such an unlimited scope, as has in many cases quite disfigured the peculiar and inimitable beauty, simplicity, and energy of the original, which the former, by a more close and judicious version, has constantly and surprisingly displayed. Something like this we ventured to hint in our note upon these two noble versions: to have said more, would have been inconsistent with our designed brevity.

We have likewise since seen what your opponent has writ in praise of the one, and derogation of the other, and think you have sufficiently confuted him, and with respect to us, he has been so far from giving us any cause to retract what we had formerly said, that it has administered an occasion to us of vindicating it, as we have lately done by some critical notes on your excellent Johnston, which we communicated soon after to Mr. *A. B.*, who was pleased to give them a place in his last edition of him, and which we doubt not you have seen long ago. How they have been relished among you we know not, but with us they have been thought sufficient to prove what we have advanced, as well as to direct the attentive reader to discover new instances of your author's exactness and elegance, in every page, if not almost in every line.

We gratefully accept of the books and kind compliments you were pleased to transmit to us by Mr. Strahan, and had long since returned you our thanks, but for the many avocations which the great work you know us to be engaged in doth of necessity bring upon us; obliging us, or some at least of our society, to make from time to time an excursion to one or other of our two learned universities, and consulting them upon the best method of carrying on this work to the greatest advantage to the

public. This has been some considerable part of our employment for these twelve months past; and we flatter ourselves, that we have, with their assistance and approbation, made such considerable improvements on our original plan, as will scarcely fail of being acceptable to the learned world. They will shortly appear in print, to convince the world that we have not been idle, though this sixth volume is like to appear somewhat later in the year than was usual with our former ones. We shall take the liberty to transmit some copies of our new plan to you as soon as they are printed. All we have left to wish with respect to your excellent countryman and his version is, that it may always meet with such powerful and impartial advocates, and that it may be as much esteemed by all candid judges, as it is by, learned Sir, your sincere well-wishers and humble servants,

The Authors of the "Universal History."

---

A Letter from the learned Mr. Robert Ainsworth, Author of the Latin and English Dictionary, to Mr. Lauder.

LEARNED AND WORTHY SIR,—THESE wait on you to thank you for the honour you have done a person equally unknown as undeserving, in your valuable present, which I did not receive till several weeks after it was sent; and since I received it, my eyes have been so bad, and my hand so unstable, that I have been forced to defer my duty, as desirous to thank you with my own hand. I congratulate to your nation the just honour ascribed to it by its neighbours and more distant countries, in having bred two such excellent poets as your Buchanan and Johnston, whom to name is to commend; but am concerned for their honour at home, who being committed together, seem to me both to suffer a diminution, whilst justice is done to neither. But at the same time I highly approve your nation's piety in bringing into your schools sacred instead of profane poesy, and heartily wish that ours, and all Christian governments, would follow your example herein. If a mixture of *utile dulci* be the best composition in poetry, (which is too evident to need the judgment of the nicest critic in the art) surely the *utile* so transcendently excels in the sacred hymns, that a Christian must deny his name that doth not acknowledge it: and if the *dulce* seem not equally to excel, it must be from a vitiated taste of those who read them in the original, and in others at second-hand from translations. For the manner of writing in the East and West are widely distant, and which to a paraphrast must render his task exceeding difficult, as requiring a perfect knowledge in two languages, wherein the idioms and graces of

speech, caused by the diversity of their religion, laws, customs, &c. are as remote as the inhabitants, wherein notwithstanding your poets have succeeded to admiration.

Your main contest seems to me, when stript of persons, whether the easy or sublime in poesy be preferable; if so,

Non opis est nostræ tantam componere litem :

nor think I it in your case material to be decided. Both these have their particular excellences and graces, and youth ought to be taught wherein (which the matter ought chiefly to determine) the one hath place, and where the other. Now since the hymns of David, Moses, and other divine poets intermix with them, (infinitely excelling those of Callimachus, Alcæus, Sappho, Anacreon, and all others) abound in both these virtues, and both your poets are acknowledged to be very happy in paraphrasing them, it is my opinion both of them, without giving the least preference to either, should be read alternately in your schools, as the tutor shall direct. Pardon, learned Sir, this scribble to my age and weakness, both which are very great, and command me wherein I may serve you, as, learned Sir, your obliged, thankful, and obedient servant,

ROBERT AINSWORTH.

Spitalfields, Sept. 1741.

---

A Letter from the Authors of the "Universal History," to Mr. Auditor Benson.

SIR,—It is with no small pleasure that we see Dr. Johnston's translation of the Psalms revived in so elegant a manner, and adorned with such a just and learned display of its inimitable beauties. As we flatter ourselves that the character we gave it in our first volume of the "Universal History," did in some measure contribute to it, we hope, that in justice to that great poet, you will permit us to cast the following mites into your treasury of critical notes on his noble version. We always thought the palm by far this author's due, as upon many other accounts, so especially for two excellences hitherto not taken notice of by any critic, that we know of, and which we beg leave to transmit to you, and if you think fit, by you to the public, in the following observations.

We beg leave to subscribe ourselves, Sir, &c.

The Authors of the "Universal History."

---

Dr. Isaac Watts, D.D. in his late Book entitled, "The Improvement of the Mind," Lond. 1741. p. 114.

UPON the whole survey of things, it is my opin-

ion, that for almost all boys who learn this tongue, [the Latin] it would be much safer to be taught *Latin poetry* (as soon, and as far as they can need it) from those excellent translations of David's Psalms, which are given us by Buchanan in the various measures of Horace; and the *lower classes* had better read Dr. Johnston's translation of those Psalms, another elegant writer of the Scots nation, instead of Ovid's Epistles; for he has turned the same Psalms, perhaps with greater elegance, into elegiac verse, whereof the learned W. Benson, Esq. has lately published a new edition; and I hear that these Psalms are honoured with an increasing use in the schools of Holland and Scotland. A stanza, or a couplet of those writers, would now and then stick upon the minds of youth, and would furnish them infinitely better with pious and moral thoughts, and do something towards making them good men and Christians.

An act of the Commission of the General Assembly of the Kirk of Scotland, recommending Dr. Arthur Johnston's Latin Paraphrase of the Psalms of David, &c.

*At Edinburgh, 13th of November, 1740, post meridien.*

A PETITION having been presented to the late General Assembly, by Mr. William Lauder, Teacher of Humanity in Edinburgh, craving, That Dr. Arthur Johnston's Latin Paraphrase on the Psalms of David, and Mr. Robert Boyd, of Trochrig, his *Hecatombe Christiana*, may be recommended to be taught in all grammar-schools; and the assembly having appointed a committee of their number to take the desire of the foresaid petition into their consideration, and report to the Commission: the said committee offered their opinion, that the Commission should grant the desire of the said petition, and recommend the said Dr. Johnston's Paraphrase to be taught in the lower classes of the schools, and Mr. George Buchanan's Paraphrase on the Psalms, together with Mr. Robert Boyd of Trochrig's *Hecatombe Christiana* in the higher classes of schools, and Humanity-classes in universities. The Commission having heard the said report, unanimously approved thereof, and did, and hereby do, recommend accordingly. Extracted by

WILLIAM GRANT,\* Cl. Ecl. Sc.

\* This honourable gentleman is now his Majesty's Advocate for Scotland.

A letter from the learned Mr. Abraham Gronovius, Secretary to the University of Leyden, to Mr. Lauder, concerning the *Adamus Eersul* of Grotius.

Clarissimo Viro, Wilhelmo Laudero, Abrahamus Gronovius, S. P. D.

POSTQUAM binæ literæ tuæ ad me perlætæ fuerunt, duas editiones carminum H. Grotii, viri vere summi, excussi; verùm ab utraque tragediam, quam *Adamum Eersulem* incipit, *i. adu*, abesse deprehendi; neque ullum ejusdem exemplar, quamvis tres \* editiones exstare adnotaveram, ullibi offendere potui, adeo ut spe, quam vorabam desiderio tuo satisfaciendi, me prorsus excidisse existimarem.

Verùm nuperrime fortè contigit, ut primam *Tragediæ Grotianæ* editionem Hagæ, An. 1601. publicatam, beneficio amicissimi mihi viri nactus fuero, ejusque decem priores paginas, quibus præter chorum actus primus comprehenditur, a Jacobo meo, optimæ spei adolescente, transcriptas nunc ad te mitto. Vale vir doctissime, meque ut facis aniare perge. Dabam Lugd. Bat. A. D. iv, Eid. Sept. A. D. MDCCXlvi.

A Second Letter from the same Gentleman to Mr. Lauder, on the same Subject.

Clarissime atque Eruditissime Vir!

POSTEAQUAM tandem Jacobus meus residuam partem, quam desiderabas, *Tragediæ Grotianæ* transcripserat, ut eâ diutius careres, committere nolui: quod autem citius illam ad finem perducere non potuerit, obstitit varæ occupationes, quibus districtus fuit. Nam præter scholastica studia, quibus strenuè incubuit, ipsi componenda erat oratio, qua rudimenta linguæ Græcæ Latinæque deponeret, eamque, quod vehementer lætor, venustè, et quidem stilo ligato, composuit, et in magna auditorum corona pronuntiavit. Quod autem ad exemplar ipsum, quo *Adamus Eersul* comprehenditur, spectat, id lubens, si meum foret, ad te perferri curarem, verùm illud a clarissimo possessore tanti æstimatur, ut persuasum habeam me istud minimè ab ipso impleturum: et sanè sacra carmina Grotii adeò rarè obvia sunt, ut eorundem exemplar apud ipsos *remonstrantium* ecclesiastas frustra quæsserim.

Opus ipsum inscriptum est HENRICO BOR-

\* Though Gronovius here mentions only three editions of this noble and curious performance, the *Adamus Eersul* of Grotius; yet it appears from the catalogue of his works, that no fewer than four have been printed, two in quarto, and two in octavo, in the years 1601, 1609, and 1635; two having been made, one in quarto, the other in octavo, Anno. 1601.

BONIO, PRINCIPI CONDÆO; et forma libri est in quarto, ut nullo pacto literis includi possit. Ceterum, pro splendidissima et Magnæ Britanniae principe, cui meritò dicata est, digna editione Psalmorum, ex versione metrica *omnium fere poetarum principis* JOHNSTONI maximas tibi grates habet agitque Jacobus. Utinam illustrissimus Bensonus in usum serenissimi principis, atque ingeniorum in altiora surgentium, eadem formâ isdemque typis exarari juberet divinos illos Ciceronis de Officiis libros, dignos sane, quos diurnâ nocturnâque manu versaret princeps, a quo aliquando Britannici regui majestas et populi salus pendeant! Interim tibi, eruditissime vir, atque etiam politissimo D. Caveo, pro muneribus literariis, quæ per nobilissimum Lawsonium \* ad me curâstis, magno opere me obstrictum agnosco, eademque summa cum voluptate a me perfecta sunt.

Filius meus te plurimum salutat.

Vale doctissime vir, meisque verbis D. Caveum saluta, atque amare perge, Tum,

ABRAHAMUM GRONOVIVM.

Dubam Leidis, A. D. XIV. KAL.

Maias, A. D. MDCCXLVII.

# POSTSCRIPT.

AND now my character is placed above all suspicion of fraud by authentic documents, I will make bold at last to pull off the mask, and declare sincerely the true motive that induced me to interpolate a few lines into some of the authors quoted by me in my Essay on Milton, which was this: Knowing the prepossession in favour of Milton, how deeply it was rooted in

many, I was willing to make trial, if the partial admirers of that author would admit a translation of his own words to pass for his sense, or exhibit his meaning: which I thought they would not: nor was I mistaken in my conjecture, forasmuch as several gentlemen, seemingly persons of judgment and learning, assured me, they humbly conceived I had not proved my point, and that Milton might have written as he has done supposing he had never seen these authors, or they had never existed. Such is the force of prejudice! This exactly confirms the judicious observation of the excellent moralist and poet:

Pravo favore labi mortales solent,  
Et pro judicio dum stant erroris sui,  
Ad poenitendum rebus manifestis agi.

For had I designed (as the vindicator of Milton supposes) to impose a trick on the public, and procure credit to my assertions by an imposture, I would never have drawn lines from Hog's translation of Milton, a book common at every sale, I had almost said at every stall, nor ascribed them to authors so easily attained: I would have gone another way to work, by translating forty or fifty lines, and assigning them to an author, whose works possibly might not be found till the world expire at the general conflagration. My imposing therefore on the public in general, instead of a few obstinate persons, (for whose sake alone the stratagem was designed) is the only thing culpable in my conduct, for which again I most humbly ask pardon: and that this, and this only, was, as no other could be, my design, no one I think can doubt, from the account I have just now given; and whether that was so criminal, as it has been represented, I shall leave every impartial mind to determine.

## AN ACCOUNT OF AN ATTEMPT

TO

## ASCERTAIN THE LONGITUDE.†

FIRST PRINTED IN THE YEAR 1755.

It is well known to seamen and philosophers, that after the numerous improvements produced

by the extensive commerce of the later ages, the great defect in the art of sailing is ignorance

\* The person here meant was the learned and worthy Dr. Isaac Lawson, late physician to the English army in Flanders: by whom Mr. Gronovius did me the honour to transmit to me two or three acts of the *Adamus Exsul* of Grothius, transcribed by his son Mr. James. The truth of this particular

consists perfectly well with the knowledge of the Doctor's brother John Lawson, Esq. counsellor at law; who also had the same thing lately confirmed to him by Mr. Gronovius himself in Holland.

† An Account of an attempt to ascertain the Longitude at Sea, by an exact Theory of the Varia-

of longitude, or of the distance to which the ship has passed eastward or westward from any given meridian.

That navigation might at length be set free from this uncertainty, the legislative power of this kingdom incited the industry of searchers into nature, by a large reward proposed to him who should show a practicable method of finding the longitude at sea; and proportionable recompences to those, who, though they should not fully attain this great end, might yet make such advances and discoveries as should facilitate the work to those that might succeed them.

By the splendour of this golden encouragement many eyes were dazzled, which nature never intended to pry into her secrets. By the hope of sudden riches many understandings were set on work very little proportioned to their strength, among whom whether mine shall be numbered, must be left to the candour of posterity: for I, among others, laid aside the business of my profession, to apply myself to the study of the longitude, not indeed in expectation of the reward due to a complete discovery; yet not without hopes, that I might be considered as an assistant to some greater genius, and receive from the justice of my country the wages offered to an honest and not unsuccessful labourer in science.

Considering the various means by which this important inquiry has been pursued, I found that the observation of the eclipses, either of the primary or secondary planets, being possible but at certain times, could be of no use to the sailor; that the motions of the moon had been long attended, however accurately, without any consequence; that other astronomical observations were difficult and uncertain with every advantage of situation, instruments, and knowledge: and were therefore utterly impracticable to the sailor, tost upon the water, ill provided with instruments, and not very skillful in their application.

The hope of an accurate clock or time-keeper is more specious. But when I began these studies, no movements had yet been made that were not evidently inaccurate and uncertain: and even of the mechanical labours which I now hear so loudly celebrated, when I consider the obstruction of movements by friction, the waste of their parts by attrition, the various pressure of the atmosphere, the effects of different effluvia upon metals, the power of heat and cold upon all matter, the changes of gravitation and the hazard of concussion, I cannot but fear that they will supply the world with another instance of fruitless ingenuity, though I hope they will not

leave upon this country the reproach of unrewarded diligence.

I saw therefore nothing on which I could fix with probability of success, but the magnetical needle, an instrument easily portable, and little subject to accidental injuries, with which the sailor has had a long acquaintance, which he will willingly study, and can easily consult.

The magnetic needle from the year 1300, when it is generally supposed to have been first applied by John Goia, of Amalphi, to the seaman's use, seems to have been long thought to point exactly to the north and south by the navigators of those times; who sailing commonly on the calm Mediterranean, or making only short voyages, had no need of very accurate observations; and who, if they ever transiently observed any deviations from the meridian, either ascribed them to some extrinsic and accidental cause, or willingly neglected what it was not necessary to understand.

But when the discovery of the new world turned the attention of mankind upon the naval sciences, and long courses required greater niceties of practice, the variation of the needle soon became observable, and was recorded in 1500 by Sebastian Cabot, a Portuguese, who, at the expense of the king of England, discovered the northern coasts of America.

As the next century was a time of naval adventures, it might be expected that the variation once observed, should have been well studied: yet it seems to have been little heeded; for it was supposed to be constant and always the same in the same place, till in 1625 Gellibrand noted its changes, and published his observations.

From this time the philosophical world had a new subject of speculation, and the students of magnetism employed their researches upon the gradual changes of the needle's direction, or the variations of the variation, which have hitherto appeared so desultory and capricious, as to elude all the schemes which the most fanciful of the philosophical dreamers could devise for its explication. Any system that could have united these tormenting diversities, they seem inclined to have received, and would have contentedly numbered the revolutions of a central magnet, with very little concern about its existence, could they have assigned it any motion, or vicissitude of motions, which would have corresponded with the changes of the needle.

Yet upon this secret property of magnetism I ventured to build my hopes of ascertaining the longitude at sea. I found it undeniably certain that the needle varies its direction in a course eastward or westward between any assignable parallels of latitude: and supposing nature to be in this as in all other operations uniform and consistent, I doubted not but the variation proceeded in some established method, though per-

tion of the Magnetical Needle; with a Table of Variations at the most remarkable cities in Europe, from the year 1600 to 1699. By Zachariah Williams.

haps too abstruse and complicated for human comprehension.

This difficulty however was to be encountered; and by close and steady perseverance of attention I at last subdued, or thought myself to have subdued, it; having formed a regular system in which all the phenomena seemed to be reconciled; and being able from the variation in places where it is known to trace it to those where it is unknown; or from the past to predict the future: and consequently knowing the latitude and variation, to assign the true longitude of any place.

With this system I came to London, where having laid my proposals before a number of ingenious gentlemen, it was agreed that during the time required to the completion of my experiments, I should be supported by a joint subscription to be repaid out of the reward, to which they concluded me entitled. Among the subscribers was Mr. Rowley, the memorable constructor of the orrery; and among my favourers was the Lord Piesley, a title not unknown among magnetical philosophers. I frequently showed upon a globe of brass, experiments by which my system was confirmed, at the house of Mr. Rowley, where the learned and curious of that time generally assembled.

At this time great expectations were raised by Mr. Whiston, of ascertaining the longitude by the inclination of the needle, which he supposed to increase or diminish regularly. With this learned man I had many conferences, in which I endeavoured to evince what he has at last confessed in the narrative of his life, the uncertainty and inefficacy of his method.

About the year 1729, my subscribers explained my pretensions to the Lords of the Admiralty, and the Lord Torrington declared my claim just to the reward assigned in the last clause of the act to those who should make discoveries conducive to the perfection of the art of sailing. This he pressed with so much warmth, that the commissioners agreed to lay my tables before Sir Isaac Newton, who excused himself, by reason of his age, from a regular examination: but when he was informed that I held the variation at London to be still increasing, which he and the other philosophers, his pupils, thought to be then stationary, and on the point of regression, he declared that he believed my system visionary. I did not much murmur to be for a time overborne by that mighty name, even when I believed that the name only was against me: and I have lived till I am able to produce, in my favour, the testimony of time, the inflexible enemy of false hypotheses; the only testimony which it becomes human understanding to oppose to the authority of Newton.

My notions have indeed been since treated with equal superciliousness by those who have not the same title to confidence of decision; men

who, though perhaps very learned in their own studies, have had little acquaintance with mine. Yet even this may be borne far better than the petulance of boys whom I have seen shoot up into philosophers by experiments which I have long since made and neglected, and by improvements which I have so long transferred into my ordinary practice, that I cannot remember when I was without them.

When Sir Isaac Newton had declined the office assigned him, it was given to Mr. Molineux, one of the commissioners of the Admiralty, who engaged in it with no great inclination to favour me; but however thought one of the instruments, which, to confirm my own opinion, and to confute Mr. Whiston's, I had exhibited to the Admiralty, so curious or useful, that he surreptitiously copied it on paper, and clandestinely endeavoured to have it imitated by a workman for his own use.

This treatment naturally produced remonstrances and alterations, which indeed did not continue long, for Mr. Molineux died soon afterwards; and my proposals were for a time forgotten.

I will not however accuse him of designing to condemn me, without a trial; for he demanded a portion of my tables to be tried in a voyage to America, which I then thought I had reason to refuse him, not yet knowing how difficult it was to obtain, on any terms, an actual examination.

About this time the theory of Dr. Halley was the chief subject of mathematical conversation; and though I could not but consider him as too much a rival to be appealed to as a judge, yet his reputation determined me to solicit his acquaintance and hazard his opinion. I was introduced to him by Mr. Lowthorp and Dr. Desaguliers, and put my tables into his hands; which, after having had them about twenty days under consideration, he returned in the presence of the learned Mr. Machin, and many other skillful men, with an entreaty *that I would publish them speedily; for I should do infinite service to mankind.*

It is one of the melancholy pleasures of an old man, to recollect the kindness of friends, whose kindness he shall experience no more. I have now none left to favour my studies: and therefore naturally turn my thoughts on those by whom I was favoured in better days: and I hope the vanity of age may be forgiven, when I declare that I can boast among my friends, almost every name of my time that is now remembered: and that in that great period of mathematical competition scarce any man failed to appear as my defender, who did not appear as my antagonist.

By these friends I was encouraged to exhibit to the Royal Society, an ocular proof of the reasonableness of my theory, by a sphere of

iron, on which a small compass moved in various directions, exhibited no imperfect system of magnetical attraction. The experiment was shown by Mr. Hawkesbee, and the explanation with which it was accompanied, was read by Dr. Mortimer. I received the thanks of the society; and was solicited to reposit my theory properly sealed and attested among their archives, for the information of posterity. I am informed, that this whole transaction is recorded in their minutes.

After this I withdrew from public notice, and applied myself wholly to the continuation of my experiments, the confirmation of my system, and the completion of my tables, with no other companion than Mr. Gray, who shared all my studies and amusements, and used to repay my communications of magnetism, with his discoveries in electricity. Thus I proceeded with incessant diligence; and perhaps in the zeal of inquiry did not sufficiently reflect on the silent encroachments of time, or remember, that no man is in more danger of doing little, than he who flatters himself with abilities to do all. When I was forced out of my retirement, I came loaded with the infirmities of age, to struggle with the difficulties of a narrow fortune, cut off by the blindness of my daughter from the only assistance which I ever had; deprived by time of my patron and friends, a kind of stranger in a new world, where curiosity is now diverted to other objects, and where, having no means of ingratiating my labours, I stand the single votary of an obsolete science, the scoff of puny pupils of puny philosophers.

In this state of dereliction and depression, I have bequeathed to posterity the following table; which, if time shall verify my conjectures, will show that the variation was once known; and that mankind had once within their reach an easy method of discovering the longitude.

I will not however engage to maintain, that all my numbers are theoretically and minutely exact; I have not endeavoured at such degrees of accuracy as only distract inquiry without benefiting practice. The quantity of the variation has been settled partly by instruments, and partly by computation; instruments must always partake of the imperfection of the eyes and hands of those that make, and of those that use them; and computation, till it has been rectified by experiment, is always in danger of some omission in the premises, or some error in the deduction.

It must be observed, in the use of this table, that though I name particular cities for the sake

of exciting attention, yet the tables are adjusted only to longitude and latitude. Thus when I predict that at Prague, the variation will in the year 1800 be  $24\frac{1}{2}$  W., I intend to say, that it will be such if Prague be, as I have placed it, after the best geographers, in longitude  $14^{\circ} 30'$  E. latitude  $50^{\circ} 40'$ ; but that this is its true situation, I cannot be certain. The latitude of many places is unknown, and the longitude is known of very few; and even those who are unacquainted with science, will be convinced that it is not easily to be found, when they are told how many degrees Dr. Halley, and the French mathematicians, place the Cape of Good Hope distant from each other.

Those who would pursue this inquiry with philosophical nicety, must likewise procure better needles than those commonly in use. The needle, which after long experience I recommend to mariners, must be of pure steel, the spines and the cap of one piece, the whole length three inches, each spine containing four grains and a half of steel, and the cap thirteen grains and a half.

The common needles are so ill formed, or so unskillfully suspended, that they are affected by many causes besides magnetism; and among other inconveniences have given occasion to the idle dream of a horary variation.

I doubt not but particular places may produce exceptions to my system. There may be, in many parts of the earth, bodies which obstruct or intercept the general influence of magnetism; but those interruptions do not infringe the theory. It is allowed, that water will run down a declivity, though sometimes a strong wind may force it upwards. It is granted, that the sun gives light at noon, though in certain conjunctions it may suffer an eclipse.

These causes, whatever they are, that interrupt the course of the magnetical powers, are least likely to be found in the great ocean, when the earth, with all its minerals, is secluded from the compass by the vast body of uniform water. So that this method of finding the longitude, with a happy contrariety to all others, is most easy and practicable at sea.

This method, therefore, I recommend to the study and prosecution of the sailor and philosopher; and the appendant specimen I exhibit to the candid examination of the maritime nations, as a specimen of a general table, showing the variation at all times and places for the whole revolution of the magnetic poles, which I have long ago begun, and, with just encouragement, should have long ago completed.

# CONSIDERATIONS

ON THE

PLANS OFFERED FOR THE

## CONSTRUCTION OF BLACK-FRIARS BRIDGE.

IN THREE LETTERS, TO THE PRINTER OF THE GAZETTEER.

### LETTER I.

Dec. 1st, 1759.

SIR,

THE Plans which have been offered by different architects, of different reputation and abilities, for the construction of the Bridge intended to be built at Black-Friars, are, by the rejection of the greater part, now reduced to a small number; in which small number, three are supposed to be much superior to the rest; so that only three architects are now properly competitors for the honour of this great employment; *by two of whom are proposed semicircular, and by the other elliptical arches.*

The question is, therefore, whether an elliptical or semicircular arch is to be preferred?

The first excellence of a bridge built for commerce over a large river, is strength; for a bridge which cannot stand, however beautiful, will boast its beauty but a little while; the stronger arch is therefore to be preferred, and much more to be preferred, if with greater strength it has greater beauty.

Those who are acquainted with the mathematical principles of architecture, are not many; and yet fewer are they who will, upon any single occasion, endure any laborious stretch of thought, or harass their minds with unaccustomed investigations. We shall therefore attempt to show the *weakness of the elliptical arch*, by arguments which appear simply to common reason, and which will yet stand the test of geometrical examination.

All arches have a certain degree of weakness. No hollow building can be equally strong with a solid mass, of which every upper part presses perpendicularly upon the lower. Any weight laid upon the top of an arch, has a tendency to force that top into the vacuity below; and the arch thus loaded on the top, stands only because the stones that form it, being wider in the upper than in the lower parts, that part that fills a wider space cannot fall through a space less wide; but the force which laid upon a flat would press directly downwards, is dispersed each way in a lateral direction, as the parts of a beam are pushed out to the right and

left by a wedge driven between them. In proportion as the stones are wider at the top than at the bottom, they can less easily be forced downwards, and as their lateral surfaces tend more from the centre to each side, to so much more is the pressure directed laterally towards the piers, and so much less perpendicularly towards the vacuity.

Upon this plain principle the semicircular arch may be demonstrated to excel in strength the elliptical arch, which approaching nearer to a straight line, must be constructed with stones whose diminution downwards is very little, and of which the pressure is almost perpendicular.

It has yet been sometimes asserted by hardy ignorance, that the elliptical arch is stronger than the semicircular; or in other terms, that any mass is more strongly supported the less it rests upon the supporters. If the elliptical arch be equally strong with the semicircular, that is, if an arch, by approaching to a straight line, loses none of its stability, it will follow, that all arcuation is useless, and that the bridge may at last without any inconvenience, consist of stone laid in straight lines from pillar to pillar. But if a straight line will bear no weight, which is evident at the first view, it is plain likewise, that an ellipsis will bear very little; and that as the arch is more curved, its strength is increased.

Having thus evinced the superior strength of the semicircular arch, we have sufficiently proved, that it ought to be preferred; but to leave no objection unprevented, we think it proper likewise to observe, that the elliptical arch must always appear to want elevation and dignity; and that if beauty be to be determined by suffrages, the elliptical arch will have little to boast, since the only bridge of that kind has now stood *two hundred years without imitation.*

If in opposition to these arguments, and in defiance at once of right reason and general authority, the elliptical arch should at last be chosen, what will the world believe, than that some other motive than reason influenced the determination? And some degree of partiality cannot but be suspected by him, who has been

told that one of the judges appointed to decide this question, is Mr. M—l—r, who having by ignorance, or thoughtlessness, already preferred the elliptical arch, will probably think himself obliged to maintain his own judgment, though his opinion will avail but little with the public, when it is known that Mr. S—ps—n declares it to be false.

He that in the list of the committee chosen for the superintendency of the bridge, reads many of the most illustrious names of this great city, will hope that the greater number will have more reverence for the opinion of posterity, than to disgrace themselves, and the metropolis of the kingdom, in compliance with any man, who, instead of voting, aspires to dictate, perhaps without any claim to such superiority, either by greatness of birth, dignity of employment, extent of knowledge, or largeness of fortune.

---

## LETTER II.

Dec. 8th, 1759.

SIR,

IN questions of general concern, there is no law of government or rule of decency, that forbids open examination and public discussion. I shall therefore not betray, by a mean apology, that right which no man has power, and, I suppose, no wise man has desired to refuse me; but shall consider the Letter published by you last Friday, in defence of Mr. M—s\* design for a new bridge.

Mr. M—— proposes elliptical arches. It has been objected that elliptical arches are weak: and therefore improper for a bridge of commerce, in a country where greater weights are ordinarily carried by land than perhaps in any other part of the world. That there is an elliptical bridge at Florence is allowed, but the objectors maintain, that its stability is so much doubted, that carts are not permitted to pass over it.

To this no answer is made, but that it was built for coaches; and if it had been built for carts, it would have been made stronger: thus all the controvertists agree, that the bridge is too weak for carts; and it is of little importance, whether carts are prohibited because the bridge is weak, or whether the architect, knowing that carts were prohibited, voluntarily constructed a weak bridge. The instability of the elliptical arch has been sufficiently proved by argument, and Ammanuti's attempt has proved it by example.

The iron rail, whether gilt or varnished, ap-

pears to me unworthy of debate. I suppose every judicious eye will discern it to be minute and trifling, equally unfit to make a part of a great design, whatever be its colour. I shall only observe how little the writer understands his own positions, when he recommends it to be cast in whole pieces from pier to pier. That iron forged is stronger than iron cast, every smith can inform him; and if it be cast in large pieces, the fracture of a single bar must be repaired by a new piece.

The abrupt rise which is feared from firm circular arches, may be easily prevented, by a little extension of the abutment at each end, which will take away the objection, and add almost nothing to the expense.

The whole of the argument in favour of Mr. M——, is only that there is an elliptical bridge at Florence, and an iron balustrade at Rome; the bridge is owned to be weak, and the iron balustrade we consider as mean; and are loth that our own country should unite two follies in a public work.

The architrave of Perault, which has been pompously produced, bears nothing but its entablature; and is so far from owing its support to the artful section of the stone, that it is held together by cramps of iron; to which I am afraid Mr. M—— must have recourse, if he persists in his ellipsis, or, to use the words of his vindicator, forms his arch of four segments of circles drawn from four different centres.

That Mr. M—— obtained the prize of the architecture at Rome, a few months ago, is willingly confessed; nor do his opponents doubt that he obtained it by deserving it. May he continue to obtain whatever he deserves; but let it not be presumed that a prize granted at Rome, implies an irresistible degree of skill. The competition is only between boys, and the prize given to excite laudable industry, not to reward consummate excellence. Nor will the suffrage of the Romans much advance any name among those who know, what no man of science will deny, that architecture has for some time degenerated at Rome to the lowest state, and that the Pantheon is now deformed by petty decorations. I am, Sir, yours, &c.

---

## LETTER III.

Dec. 15th, 1759.

SIR,

IT is the common fate of erroneous positions, that they are betrayed by defence, and obscured by explanation; that their authors deviate from the main question into incidental disquisitions, and raise a mist where they should let in light.

Of all these concomitants of errors, the Letter of Dec. 10th, in favour of elliptical arches, has

---

\* Mr. Mylne.

afforded examples. A great part of it is spent upon digressions. The writer allows, that *the first excellence of a bridge is undoubtedly strength*: but this concession affords him an opportunity of telling us, that strength, or provision against decay, has its limits; and of mentioning the Monument and Cupola, without any advance towards evidence or argument.

The *first excellence of a bridge* is now allowed to be *strength*; and it has been asserted, that a semi-ellipsis has less strength than a semicircle. To this he first answers, that *granting this position for a moment*, the semi-ellipsis may yet have strength sufficient for the purposes of commerce. This grant, which was made but for a moment, needed not to have been made at all; for before he concludes his Letter, he undertakes to prove, that the *elliptical arch must in all respects be superior in strength to the semicircle*. For this daring assertion he made way by the intermediate paragraphs; in which he observes, that the *convexity of a semi-ellipsis may be increased at will to any degree that strength may require*: which is, that an elliptical arch may be made less elliptical, to be made less weak; or that an arch, which by its elliptical form is superior in strength to the semicircle, may become almost as strong as a semicircle, by being made almost semicircular.

That the longer diameter of an ellipsis may be shortened, till it shall differ little from a circle, is indisputably true; but why should the writer forget the semicircle differs as little from such an ellipsis? It seems that the difference, whether small or great, is to the advantage of the semicircle; for he does not promise that the elliptical arch, with all the convexity that his imagination can confer, will stand without *cramps of iron, and melted lead, and large stones, and a very thick arch*; assistances which the semicircle does not require, and which can be yet less required by a semi-ellipsis, which is in *all respects superior in strength*.

Of a man who loves opposition so well, as to

be thus at variance with himself, little doubt can be made of his contrariety to others; nor do I think myself entitled to complain of disregard from one, with whom the performances of antiquity have so *little weight*: yet in defiance of all this contemptuous superiority, I must again venture to declare, that *a straight line will bear no weight*; being convinced, that not even the science of Vasari can make that form strong which the laws of nature have condemned to weakness. By the position, that *a straight line will bear nothing*, is meant, that *it receives no strength from straightness*; for that many bodies, laid in straight lines, will support weight by the cohesion of their parts, every one has found, who has seen dishes on a shelf, or a thief upon the gallows. It is not denied, that stones may be so crushed together by enormous pressure on each side, that a heavy mass may safely be laid upon them; but the strength must be derived merely from the lateral resistance; and the line so loaded will be itself part of the load.

The semi-elliptical arch has one recommendation yet unexamined; we are told that it is difficult of execution. Why difficulty should be chosen for its own sake, I am not able to discover; but it must not be forgotten, that as the convexity is increased, the difficulty is lessened; and I know not well whether this writer, who appears equally ambitious of difficulty and studious of strength, will wish to increase the convexity for the gain of strength, or to lessen it for the love of difficulty.

The friend of Mr. M—, however he may be mistaken in some of his opinions, does not want the appearance of reason, when he prefers facts to theories; and that I may not dismiss the question without some appeal to facts, I will borrow an example, suggested by a great artist, and recommended to those who may still doubt which of the two arches is the stronger, to press an egg first on the ends, and then upon the sides. I am, Sir, yours, &c.

## SOME THOUGHTS ON AGRICULTURE,

BOTH ANCIENT AND MODERN;

WITH AN ACCOUNT OF THE HONOUR DUE TO AN ENGLISH FARMER.

FROM THE UNIVERSAL VISITOR FOR FEB. 1756.

AGRICULTURE, in the primeval ages, was the common parent of traffic: for the opulence of mankind then consisted in cattle, and the product of tillage; which are now very essential

for the promotion of trade in general, but more particularly so to such nations as are most abundant in cattle, corn, and fruits. The labour of the farmer gives employment to the manufacturer, and yields a support for the other parts of the community: it is now the spring which sets the whole grand machine of commerce in motion; and the sail could not be spread without the assistance of the plough. But though the farmers are of such utility in a state, we find them in general too much disregarded among the politer kind of people in the present age; while we cannot help observing the honour that antiquity has always paid to the profession of the husbandman; which naturally leads us into some reflections upon that occasion.

Though mines of gold and silver should be exhausted, and the species made of them lost; though diamonds and pearls should remain concealed in the bowels of the earth, and the womb of the sea; though commerce with strangers be prohibited; though all arts which have no other object than splendour and embellishment, should be abolished; yet the fertility of the earth alone would afford an abundant supply for the occasions of an industrious people, by furnishing subsistence for them, and such armies as should be mustered in their defence. We, therefore, ought not to be surprised, that agriculture was in so much honour among the ancients: for it ought rather to seem wonderful that it should ever cease to be so, and that the most necessary and most indispensable of all professions should have fallen into any contempt.

Agriculture was in no part of the world in higher consideration than Egypt, where it was the particular object of government and policy: nor was any country ever better peopled, richer, or more powerful. The *Satrapæ*, among the Assyrians and Persians, were rewarded, if the lands in their governments were well cultivated; but were punished, if that part of their duty was neglected. Africa abounded in corn, but the most famous countries were Thrace, Sardinia, and Sicily.

Cato, the censor, has justly called Sicily the magazine and nursing mother of the Roman people, who were supplied from thence with almost all their corn, both for the use of the city, and the subsistence of her armies: though we also find in Livy, that the Romans received no inconsiderable quantities of corn from Sardinia. But, when Rome had made herself mistress of Carthage and Alexandria, Africa and Egypt became her store-houses: for those cities sent such numerous fleets every year, freighted with corn, to Rome, that Alexandria alone annually supplied twenty millions of bushels: and, when the harvest happened to fail in one of these provinces, the other came in to its aid, and sup-

ported the metropolis of the world; which, without this supply, would have been in danger of perishing by famine. Rome actually saw herself reduced to this condition under Augustus; for there remained only three days' provision of corn in the city; and that prince was so full of tenderness for the people, that he had resolved to poison himself, if the expected fleets did not arrive before the expiration of that time; but they came; and the preservation of the Romans was attributed to the good fortune of their emperor; but wise precautions were taken to avoid the like danger for the future.

When the seat of empire was transplanted to Constantinople, that city was supplied in the same manner; and when the emperor Septimius Severus died, there was corn in the public magazines for seven years, expending daily 75,000 bushels in bread, for 600,000 men.

The ancients were no less industrious in the cultivation of the vine than in that of corn, though they applied themselves to it later: for Noah planted it by order, and discovered the use that might be made of the fruit, by pressing out and preserving the juice. The vine was carried by the offspring of Noah into the several countries of the world: but Asia was the first to experience the sweets of this gift; from whence it was imparted to Europe and Africa. Greece and Italy, which were distinguished in so many other respects, were particularly so by the excellency of their wines. Greece was most celebrated for the wines of Cyprus, Lesbos, and Chio; the former of which is in great esteem at present: though the cultivation of the vine has been generally suppressed in the Turkish dominions. As the Romans were indebted to the Grecians for the arts and sciences, so were they likewise for the improvement of their wines; the best of which were produced in the country of Capua, and were called the Massick, Calenian, Formian, Cæcuban, and Falernian, so much celebrated by Horace. Domitian passed an edict for destroying all the vines, and that no more should be planted throughout the greatest part of the west; which continued almost two hundred years afterwards, when the emperor Probus employed his soldiers in planting vines in Europe, in the same manner as Hannibal had formerly employed his troops in planting olive-trees in Africa. Some of the ancients have endeavoured to prove, that the cultivation of vines is more beneficial than any other kind of husbandry: but, if this was thought so in the time of Columella, it is very different at present; nor were all the ancients of his opinion, for several gave the preference to pasture lands.

The breeding of cattle has always been considered as an important part of agriculture. The riches of Abraham, Laban, and Job, con-

sisted in their flocks and herds. We also find from Latinus in Virgil, and Ulysses in Homer, that the wealth of those princes consisted in cattle. It was likewise the same among the Romans, till the introduction of money, which put a value upon commodities, and established a new kind of barter. Varro has not disdained to give an extensive account of all the beasts that are of any use to the country, either for tillage, breed, carriage, or other conveniences of man. And Cato, the censor, was of opinion, that the feeding of cattle was the most certain and speedy method of enriching a country.

Luxury, avarice, injustice, violence, and ambition, take up their ordinary residence in populous cities; while the hard and laborious life of the husbandmen will not admit of these vices. The honest farmer lives in a wise and happy state, which inclines him to justice, temperance, sobriety, sincerity, and every virtue that can dignify human nature. This gave room for the poets to feign, that Astræa, the goddess of justice, had her last residence among husbandmen, before she quitted the earth. Hesiod and Virgil have brought the assistance of the muses in praise of agriculture. Kings, generals, and philosophers, have not thought it unworthy their birth, rank, and genius, to leave precepts to posterity upon the utility of the husbandman's profession. Hiero, Attalus, and Archelaus, kings of Syracuse, Pergamus, and Cappadocia, have composed books for supporting and augmenting the fertility of their different countries. The Carthaginian general Mago wrote twenty-eight volumes upon this subject; and Cato, the censor, followed his example. Nor have Plato, Xenophon, and Aristotle, omitted this article, which makes an essential part of their politics. And Cicero, speaking of the writings of Xenophon, says, "How fully and excellently does he, in that book called his 'Economics,' set out the advantages of husbandry, and a country life!"

When Britain was subject to the Romans, she annually supplied them with great quantities of corn; and the Isle of Anglesea was then looked upon as the granary for the western provinces; but the Britons, both under the Romans and Saxons, were employed like slaves at the plough. On the intermixture of the Danes and Normans, possessions were better regulated, and the state of vassalage gradually declined, till it was entirely wore off under the reigns of Henry VII. and Edward VI., for they hurt the old nobility by favouring the commons, who grew rich by trade, and purchased estates.

The wines of France, Portugal, and Spain, are now the best; while Italy can only boast of the wine made in Tuscany. The breeding of cattle is now chiefly confined to Denmark and Ireland. The corn of Sicily is still in great esteem, as well as what is produced in the northern

countries: but England is the happiest spot in the universe for all the principal kinds of agriculture, and especially its great produce of corn.

The improvement of our landed estates, is the enrichment of the kingdom; for, without this, how could we carry on our manufactures, or prosecute our commerce? We should look upon the English farmer as the most useful member of society. His arable grounds not only supply his fellow-subjects with all kinds of the best grain, but his industry enables him to export great quantities to other kingdoms, which might otherwise starve: particularly Spain and Portugal; for in one year, there have been exported 51,520 quarters of barley, 219,781 of malt, 1,920 of oatmeal, 1,329 of rye, and 153,343 of wheat; the bounty on which amounted to 72,433 pounds. What a fund of treasure arises from his pasture lands, which breed such innumerable flocks of sheep, and afford such fine herds of cattle, to feed Britons, and clothe mankind! He rears flax and hemp for the making of linen; while his plantations of apples and hops supply him with generous kinds of liquors.

The land-tax, when at four shillings in the pound, produces 2,000,000 pounds a year. This arises from the labour of the husbandman: it is a great sum: but how greatly is it increased by the means it furnishes for trade? Without the industry of the farmer, the manufacturer could have no goods to supply the merchant, nor the merchant find any employment for the mariners: trade would be stagnated; riches would be of no advantage to the great; and labour of no service to the poor.

The Romans, as historians all allow,  
Sought, in extreme distress, the rural plough;  
*Io triumph!* for the village swain,  
Retired to be a nobleman \* again.

#### FURTHER THOUGHTS ON AGRICULTURE.

FROM THE VISITOR FOR MARCH, 1756.

At my last visit, I took the liberty of mentioning a subject, which, I think, is not considered with attention proportionate to its importance. Nothing can more fully prove the ingratitude of mankind, a crime often charged upon them, and often denied, than the little regard which the disposers of honorary rewards have paid to agriculture; which is treated as a subject so remote from common life, by all those who do not immediately hold the plough, or give fodder

to the ox, that I think there is room to question, whether a great part of mankind has yet been informed that life is sustained by the fruits of the earth. I was once indeed provoked to ask a lady of great eminence for genius, *Whether she knew of what bread is made?*

I have already observed, how differently agriculture was considered by the heroes and wise men of the Roman commonwealth, and shall now only add, that even after the emperors had made great alteration in the system of life, and taught men to portion out their esteem to other qualities than usefulness, agriculture still maintained its reputation, and was taught by the polite and elegant Celsus among the other arts.

The usefulness of agriculture I have already shown; I shall now, therefore, prove its necessity; and having before declared that it produces the chief riches of a nation, I shall proceed to show, that it gives its only riches, the only riches which we can call our own, and of which we need not fear either deprivation or diminution.

Of nations, as of individuals, the first blessing is independence. Neither the man nor the people can be happy to whom any human power can deny the necessities or conveniences of life. There is no way of living without the need of foreign assistance, but by the product of our own land, improved by our own labour. Every other source of plenty is perishable or casual.

Trade and manufactures must be confessed often to enrich countries: and we ourselves are indebted to them for those ships by which we now command the sea from the equator to the poles, and for those sums with which we have shown ourselves able to arm the nations of the north in defence of regions in the western hemisphere. But trade and manufactures, however profitable, must yield to the cultivation of lands in usefulness and dignity.

Commerce, however we may please ourselves with the contrary opinion, is one of the daughters of Fortune, inconstant and deceitful as her mother; she chooses her residence where she is least expected, and shifts her abode, when her continuance is in appearance most firmly settled. Who can read of the present distresses of the Genoese, whose only choice now remaining is from what monarch they shall solicit protection? Who can see the Hanseatic towns in ruins, where perhaps the inhabitants do not always equal the number of the houses; but he will say to himself, These are the cities, whose trade enabled them once to give laws to the world, to whose merchants princes sent their jewels in pawn, from whose treasuries armies were paid, and navies supplied! And who can then forbear to consider trade as a weak and uncertain basis of power, and wish to his own

country greatness more solid, and felicity more durable?

It is apparent, that every trading nation flourishes, while it can be said to flourish by the courtesy of others. We cannot compel any people to buy from us, or to sell to us. A thousand accidents may prejudice them in favour of our rivals; the workmen of another nation may labour for less price, or some accidental improvement, or natural advantage, may procure a just preference for their commodities; as experience has shown, that there is no work of the hands, which, at different times, is not best performed in different places.

Traffic, even while it continues in its state of prosperity, must owe its success to agriculture; the materials of manufacture are the produce of the earth. The wool which we weave into cloth, the wood which is formed into cabinets, the metals which are forged into weapons, are supplied by nature with the help of art. Manufactures, indeed, and profitable manufactures, are sometimes raised from imported materials, but then we are subjected a second time to the caprice of our neighbours. The natives of Lombardy might easily resolve to retain their silk at home, and employ workmen of their own to weave it. And this will certainly be done when they grow wise and industrious, when they have sagacity to discern their true interest, and vigour to pursue it.

Mines are generally considered as the great sources of wealth, and superficial observers have thought the possession of great quantities of precious metals the first national happiness. But Europe has long seen, with wonder and contempt, the poverty of Spain, who thought herself exempted from the labour of tilling the ground, by the conquest of Peru, with its veins of silver. Time, however, has taught even this obstinate and haughty nation, that without agriculture they may indeed be the transmitters of money, but can never be the possessors. They may dig it out of the earth, but must immediately send it away to purchase cloth or bread, and it must at last remain with some people wise enough to sell much and to buy little; to live upon their own lands, without a wish for those things which nature has denied them.

Mines are themselves of no use, without some kind of agriculture. We have in our own country, inexhaustible stores of iron, which lie useless in the ore for want of wood. It was never the design of Providence to feed man without his own concurrence; we have from nature only what we cannot provide for ourselves; she gives us wild fruits, which art must meliorate, and drossy metals, which labour must refine.

Particular metals are valuable, because they are scarce; and they are scarce, because the

mines that yield them are emptied in time. But the surface of the earth is more liberal than its caverns. The field, which is this autumn laid naked by the sickle, will be covered, in the succeeding summer, by a new harvest; the grass, which the cattle are devouring, shoots up again when they have passed over it.

Agriculture, therefore, and agriculture alone, can support us without the help of others, in certain plenty and genuine dignity. Whatever we buy from without, the sellers may refuse; whatever we sell, manufactured by art, the purchasers may reject; but, while our ground is covered with corn and cattle, we can want nothing; and if imagination should grow sick of native plenty, and call for delicacies or embellishments from other countries, there is nothing which corn and cattle will not purchase.

Our country is, perhaps, beyond all others, productive of things necessary to life. The pine-apple thrives better between the tropics, and better furs are found in the northern regions. But let us not envy these unnecessary privileges. Mankind cannot subsist upon the indulgences of nature, but must be supported by her more common gifts. They must feed upon bread, and be clothed with wool; and the nation that can furnish these universal commodities, may have her ships welcomed at a thousand ports, or sit at home and receive the tribute of foreign countries, enjoy their arts, or treasure up their gold.

It is well known to those who have examined the state of other countries, that the vineyards of France are more than equivalent to the mines of America; and that one great use of Indian gold, and Peruvian silver, is to procure the wines of Champagne and Burgundy. The advantage is indeed always rising on the side of France, who will certainly have wines, when Spain, by a thousand natural or accidental causes, may want silver. But surely the valleys of England have more certain stores of wealth. Wines are chosen by caprice; the products of France have not always been equally esteemed; but there never was any age, or people, that reckoned bread among superfluities, when once it was known. The price of wheat and barley

suffers not any variation, but what is caused by the uncertainty of seasons.

I am far from intending to persuade my countrymen to quit all other employments for that of manuring the ground. I mean only to prove, that we have, at home, all that we can want, and that therefore we need feel no great anxiety about the schemes of other nations for improving their arts, or extending their traffic. But there is no necessity to infer, that we should cease from commerce, before the revolution of things shall transfer it to some other regions! Such vicissitudes the world has often seen; and therefore such we have reason to expect. We hear many clamours of declining trade, which are not, in my opinion, always true; and many imputations of that decline to governors and ministers, which may be sometimes just, and sometimes calumnious. But it is foolish to imagine, that any care or policy can keep commerce at a stand, which almost every nation has enjoyed and lost, and which we must expect to lose as we have long enjoyed it.

There is some danger, lest our neglect of agriculture should hasten its departure. Our industry has for many ages been employed in destroying the woods which our ancestors have planted. It is well known that commerce is carried on by ships, and that ships are built out of trees; and therefore, when I travel over naked plains, to which tradition has preserved the name of forests, or see hills arising on either hand barren and useless, I cannot forbear to wonder, how that commerce, of which we promise ourselves the perpetuity, shall be continued by our descendants; nor can restrain a sigh, when I think on the time, a time at no great distance, when our neighbours may deprive us of our naval influence, by refusing us their timber.

By agriculture only can commerce be perpetuated; and by agriculture alone can we live in plenty without intercourse with other nations. This, therefore, is the great art, which every government ought to protect, every proprietor of lands to practise, and every inquirer into nature to improve.

## CONSIDERATIONS ON THE CORN LAWS.\*

By what causes the necessities of life have risen to a price at which a great part of the people

are unable to procure them, how the present scarcity may be remedied, and calamities of the

\* These "Considerations," for which we are indebted to Mr. Maloué, who published them in 1808, or rather to his liberal publisher, Mr. Payne, were,

in the opinion of Mr. Maloué, written in November, 1766, when the policy of the parliamentary bounty on the exportation of corn became naturally a sub-

same kind may for the future be prevented, is an inquiry of the first importance; an inquiry before which all the considerations which commonly busy the legislature vanish from the view.

The interruption of trade, though it may distress part of the community, leaves the rest power to communicate relief; the decay of one manufacture may be compensated by the advancement of another; a defeat may be repaired by victory; a rupture with one nation may be balanced by an alliance with another. These are partial and slight misfortunes, which leave us still in the possession of our chief comforts. They may lop some of our superfluous pleasures, and repress some of our exorbitant hopes; but we may still retain the essential part of civil and of private happiness,—the security of law, and the tranquillity of content. They are small obstructions of the stream, which raise a foam and noise where they happen to be found, but at a little distance are neither seen nor felt, and suffer the main current to pass forward in its natural course.

But scarcity is an evil that extends at once to the whole community: that neither leaves quiet to the poor, nor safety to the rich: that in its approaches distresses all the subordinate ranks of mankind, and in its extremity must subvert government, drive the populace upon their rulers, and end in bloodshed and massacre. Those who want the supports of life will seize them wherever they can be found. If in any place there are more than can be fed, some must be expelled, or some must be destroyed.

Of this dreadful scene there is no immediate danger; but there is already evil sufficient to deserve and require all our diligence, and all our wisdom. The miseries of the poor are such as cannot easily be borne: such as have already incited them in many parts of the kingdom to an open defiance of government, and produced one of the greatest of political evils—the necessity of ruling by immediate force.

Cæsar declared after the battle of Munda, that he had often fought for victory, but that he had that day fought for life. We have often deliberated how we should prosper; we are now to inquire how we shall subsist.

The present scarcity is imputed by some to the bounty for exporting corn, which is considered as having a necessary and perpetual tendency to pour the grain of this country into other nations.

ject of discussion. The harvest in that year had been so deficient, and corn had risen to so high a price, that in the months of September and October there had been many insurrections in the midland counties, to which Dr. Johnson alludes; and which were of so alarming a kind, that it was necessary to repress them by military force.

This position involves two questions: whether the present scarcity has been caused by the bounty, and whether the bounty is likely to produce scarcity in future times.

It is an uncontroverted principle, that *sublatâ causâ tollitur effectus*: if therefore the effect continues when the supposed cause has ceased, that effect must be imputed to some other agency.

The bounty has ceased, and the exportation would still continue, if exportation were permitted. The true reason of the scarcity is the failure of the harvest; and the cause of exportation is the like failure in other countries, where they grow less, and where they are therefore always nearer to the danger of want.

This want is such, that in countries where money is at a much higher value than with us, the inhabitants are yet desirous to buy our corn at a price to which our own markets have not risen.

If we consider the state of those countries, which being accustomed to buy our corn cheaper than ourselves, when it was cheap, are now reduced to the necessity of buying it dearer than ourselves, when it is dear, we shall yet have reason to rejoice in our own exemption from the extremity of this wide-extended calamity; and if it be necessary to inquire why we suffer scarcity, it may be fit to consider likewise, why we suffer yet less scarcity than our neighbours.

That the bounty upon corn has produced plenty, is apparent,

Because ever since the grant of the bounty, agriculture has increased: scarce a session has passed without a law for enclosing commons and waste grounds:

Much land has been subjected to tillage, which lay uncultivated with little profit:

Yet, though the quantity of land has been thus increased, the rent, which is the price of land, has generally increased at the same time.

That more land is appropriated to tillage, is a proof that more corn is raised; and that the rents have not fallen, proves that no more is raised than can readily be sold.

But it is urged, that exportation, though it increases our produce, diminishes our plenty: that the merchant has more encouragement for exportation than the farmer for agriculture.

This is a paradox which all the principles of commerce, and all the experience of policy, concur to confute. Whatever is done for gain will be done more, as more gain is to be obtained.

Let the effects of the bounty be minutely considered.

The state of every country with respect to corn is varied by the chances of the year.

Those to whom we sell our corn, must have every year either more corn than they want, or less than they want. We likewise are naturally subject to the same varieties.

When they have corn equal to their wants, or more, the bounty has no effect: for they will not buy what they do not want, unless our exuberance be such as tempts them to store it for another year. This case must suppose that our produce is redundant and useless to ourselves; and therefore the profit of exportation produces no inconvenience.

When they want corn, they must buy of us, and buy at a higher price; in this case, if we have corn more than enough for ourselves, we are again benefited by supplying them.

But they may want when we have no superfluity. When our markets rise, the bounty ceases; and therefore produces no evil. They cannot buy our corn but at a higher rate than it is sold at home. If their necessities, as now has happened, force them to give a higher price, that event is no longer to be charged upon the bounty. We may then stop our corn in our ports, and pour it back upon our own markets.

It is in all cases to be considered, what events are political and certain, and what are political and arbitrary.

The first effect of the bounty is the increase of agriculture, and by consequence the promotion of plenty. This is an effect physically good, and morally certain. While men are desirous to be rich, where there is profit there will be diligence. If much corn can be sold, much will be raised.

The second effect of the bounty is the diminution by exportation of that product which it occasioned. But this effect is political and arbitrary; we have it wholly in our own hands: we can prescribe its limits, and regulate its quantity. Whenever we feel want, or fear it, we retain our corn, and feed ourselves upon that which was sown and raised to feed other nations.

It is perhaps impossible for human wisdom to go further, than to contrive a law of which the good is certain and uniform, and the evil, though possible in itself, yet always subject to certain and effectual restraints.

This is the true state of the bounty upon corn: it certainly and necessarily increases our crops, and can never lessen them but by our own permission.

That, notwithstanding the bounty, there have been from time to time years of scarcity, cannot be denied. But who can regulate the seasons? In the dearest years we owe to the bounty that they have not been dearer. We must always suppose part of our ground sown for our own consumption, and part in hope of a foreign sale. The time sometimes comes, when the product of all this land is scarcely sufficient; but if the whole be too little, how great would have been the deficiency, if we had sown only that part which was designed for ourselves.

“ But perhaps, if exportation were less encouraged, the superfluous stores of plentiful years might be laid up by the farmer against years of scarcity.”

This may be justly answered by affirming, that, if exportation were discouraged, we should have no years of plenty. Cheapness is produced by the possibility of dearth. Our farmers at present plough and sow with the hope that some country will always be in want, and that they shall grow rich by supplying. Indefinite hopes are always carried by the frailty of human nature beyond reason. While therefore exportation is encouraged, as much corn will be raised as the farmer can hope to sell, and therefore generally more than can be sold at the price of which he dreamed, when he ploughed and sowed.

The greatest part of our corn is well known to be raised by those who pay rent for the ground which they employ, and of whom few can bear to delay the sale of one year's produce to another.

It is therefore vain to hope that large stocks of grain will ever remain in private hands; he that has not sold the corn of last year, will with diffidence and reluctance till his field again: the accumulation of a few years would end in a vacation of agriculture, and the husbandman would apply himself to some more profitable calling.

If the exportation of corn were totally prohibited, the quantity possible to be consumed among us would be quickly known, and being known would rarely be exceeded; for why should corn be gathered which cannot be sold? we should therefore have little superfluity in the most favourable seasons; for the farmer, like the rest of mankind, acts in hope of success, and the harvest seldom outgoes the expectation of the spring. But for droughts or blights, we should never be provided; any intemperature of seasons would reduce us to distress, which we now only read of in our histories; what is now scarcity, would then be famine.

What would be caused by prohibiting exportation, will be caused in a less degree by obstructing it, and in some degree by every deduction of encouragement; as we lessen hope, we shall lessen labour; as we lessen labour, we shall lessen plenty.

It must always be steadily remembered, that the good of the bounty is certain, and evil avoidable; that by the hope of exportation corn will be increased, and that this increase may be kept at home.

Plenty can only be produced by encouraging agriculture; and agriculture can be encouraged only by making it gainful. No influence can dispose the farmer to sow what he cannot sell; and if he is not to have the chance of scarcity in his favour, he will take care that there never shall be plenty.

The truth of these principles our ancestors discovered by reason, and the French have now found it by experience. In this regulation we have the honour of being masters to those, who, in commercial policy, have been long accounted the masters of the world. Their prejudices, their emulation, and their vanity, have at last submitted to learn of us how to ensure the bounties of nature; and it forms a strange vicissitude of opinions, that should incline us to repeal the law which our rivals are adopting.

It may be speciously enough proposed, that the bounty should be discontinued sooner. Of this every man will have his own opinion; which, as no general principles can reach it, will always seem to him more reasonable than that of another. This is a question of which the state is always changing with time and place, and which it is therefore very difficult to state or to discuss.

It may however be considered, that the change of old establishments is always an evil; and that therefore, where the good of the change is not certain and constant, it is better to preserve that reverence and that confidence which is produced by consistency of conduct and permanency of laws.

That, since the bounty was so fixed, the price of money has been much diminished: so that the bounty does not operate so far as when it was first fixed, but the price at which it ceases,

though nominally the same, has, in effect and in reality, gradually diminished.

It is difficult to discover any reason why that bounty, which has produced so much good, and has hitherto produced no harm, should be withdrawn or abated. It is possible, that if it were reduced lower, it would still be the motive of agriculture, and the cause of plenty; but why we should desert experience for conjecture, and exchange a known for a possible good, will not easily be discovered. If by a balance of probabilities, in which a grain of dust may turn the scale—or by a curious scheme of calculation, in which, if one postulate in a thousand be erroneous, the deduction which promises plenty may end in famine;—if, by a specious mode of uncertain ratiocination, the critical point at which the bounty should stop, might seem to be discovered; I shall still continue to believe that it is more safe to trust what we have already tried; and cannot but think bread a product of too much importance to be made the sport of subtilty, and the topic of hypothetical disputation.

The advantage of the bounty is evident and irrefragable. Since the bounty was given, multitudes eat wheat who did not eat it before, and yet the price of wheat has abated. What more is to be hoped from any change of practice? An alteration cannot make our condition better, and is therefore very likely to make it worse.

## COMPLETE VINDICATION

OF THE

## LICENSERS OF THE STAGE,

FROM THE MALICIOUS AND SCANDALOUS ASPERSIONS OF MR. BROOKE, AUTHOR OF GUSTAVUS VASA,  
WITH A PROPOSAL FOR MAKING THE OFFICE OF LICENSER MORE EXTENSIVE AND EFFECTUAL. BY  
AN IMPARTIAL HAND.

It is generally agreed by the writers of all parties, that few crimes are equal, in their degree of guilt, to that of calumniating a good and gentle, or defending a wicked and oppressive, administration.

It is therefore with the utmost satisfaction of mind, that I reflect how often I have employed my pen in vindication of the present ministry, and their dependents and adherents, how often I have detected the specious fallacies of the advocates for independence, how often I have softened the obstinacy of patriotism, and how often triumphed over the clamour of opposition.

I have, indeed, observed but one set of men, upon whom all my arguments have been thrown away; which neither flattery can draw to compliance, nor threats reduce to submission; and who have, notwithstanding all expedients that either invention or experience could suggest, continued to exert their abilities in a vigorous and constant opposition of all our measures.

The unaccountable behaviour of these men, the enthusiastic resolution with which, after a hundred successive defeats, they still renewed their attacks: the spirit with which they continued to repeat their arguments in the senate, though they found a majority determined to condemn them; and the inflexibility with which they rejected all offers of places and preferments, at last excited my curiosity so far, that I applied myself to inquire with great diligence into the real motives of their conduct, and to discover what principle it was that had force to inspire such unextinguishable zeal, and to animate such unwearyed efforts.

For this reason I attempted to cultivate a nearer acquaintance with some of the chiefs of that party, and imagined that it would be necessary for some time to dissemble my sentiments, that I might learn theirs.

Dissimulation to a true politician is not difficult, and therefore I readily assumed the character of a proselyte; but found, that their principle of action was no other, than that which they make no scruple of avowing in the most public manner, notwithstanding the contempt and ridicule to which it every day exposes them, and the loss of those honours and profits from which it excludes them.

This wild passion, or principle, is a kind of fanaticism by which they distinguish those of their own party, and which they look upon as a certain indication of a great mind. *We* have no name for it *at court*; but among themselves they term it by a kind of cant-phrase, a regard for posterity.

This passion seems to predominate in all their conduct, to regulate every action of their lives, and sentiment of their minds; I have heard L— and P—, when they have made a vigorous opposition, or blasted the blossom of some ministerial scheme, cry out, in the height of their exultations, *This will deserve the thanks of posterity!* And when their adversaries, as it much more frequently falls out, have outnumbered and overthrown them, they will say with an air of revenge, and a kind of gloomy triumph, *Posterity will curse you for this.*

It is common among men under the influence of any kind of phrenzy, to believe that all the

world has the same odd notions that disorder their own imaginations. Did these unhappy men, these deluded patriots, know how little we are concerned about posterity, they would never attempt to fright us with their curses, or tempt us to a neglect of our own interest by a prospect of their gratitude.

But so strong is their infatuation, that they seem to have forgotten even the primary law of self-preservation; for they sacrifice without scruple every flattering hope, every darling enjoyment, and every satisfaction of life, to this *ruling passion*, and appear in every step to consult not so much their own advantage, as that of posterity.

Strange delusion! that can confine all their thoughts to a race of men whom they neither know, nor can know; from whom nothing is to be feared, nor any thing expected; who cannot even bribe a special jury, nor have so much as a single riband to bestow.

This fondness for posterity is a kind of madness which at Rome was once almost epidemic, and infected even the women and the children. It reigned there till the entire destruction of Carthage; after which it began to be less general, and in a few years afterwards a remedy was discovered, by which it was almost entirely extinguished.

In England it never prevailed in any such degree: some few of the ancient Barons seem indeed to have been disordered by it; but the contagion has been for the most part timely checked, and our ladies have been generally free.

But there has been in every age a set of men much admired and revered, who have affected to be always talking of posterity, and have laid out their lives upon the composition of poems, for the sake of being applauded by this imaginary generation.

The present poets I reckon amongst the most inexorable enemies of our most excellent ministry, and much doubt whether any method will effect the cure of a distemper, which in this class of men may be termed not an accidental disease, but a defect in their original frame and constitution.

Mr. Brooke, a name I mention with all the detestation suitable to my character, could not forbear discovering this depravity of his mind in his very prologue, which is filled with sentiments so wild, and so much unheard of among those who frequent levees and courts, that I much doubt, whether the zealous licenser proceeded any further in his examination of his performance.

He might easily perceive that a man,

Who bade his moral beam through every age,

was too much a bigot to exploded notions, to

compose a play which he could license without manifest hazard of his office, a hazard which no man would incur untainted with the love of posterity.

We cannot therefore wonder that an author, wholly possessed by this passion, should vent his resentment for the licenser's just refusal, in virulent advertisements, insolent complaints, and scurrilous assertions of his rights and privileges, and proceed in defiance of authority to solicit a subscription.

This temper, which I have been describing, is almost complicated with ideas of the high prerogatives of human nature, of a sacred unalienable birthright, which no man has conferred upon us, and which neither kings can take, nor senates give away: which we may justly assert whenever and by whomsoever it is attacked, and which, if ever it should happen to be lost, we may take the first opportunity to recover it.

The natural consequence of these chimeras is contempt of authority, and an irreverence for any superiority but what is founded upon merit; and their notions of merit are very peculiar, for it is among them no great proof of merit to be wealthy and powerful, to wear a garter or a star, to command a regiment or a senate, to have the ear of the minister or of the king, or to possess any of those virtues and excellences, which among us entitle a man to little less than worship and prostration.

We may therefore easily conceive that Mr. Brooke thought himself entitled to be importunate for a license, because, in his own opinion, he deserved one, and to complain thus loudly at the repulse he met with.

His complaints will have, I hope, but little weight with the public; since the opinions of the sect in which he is enlisted are exposed, and shown to be evidently and demonstrably opposite to that system of subordination and dependence, to which we are indebted for the present tranquillity of the nation, and that cheerfulness and readiness with which the two houses concur in all our designs.

I shall, however, to silence him entirely, or at least to show those of our party that he ought to be silent, consider singly every instance of hardship and oppression which he has dared to publish in the papers, and to publish in such a manner, that I hope no man will condemn me for want of candour in becoming an advocate for the ministry, if I can consider his advertisements as nothing less than an *appeal to his country*.

Let me be forgiven if I cannot speak with temper of such insolence as this: is a man without title, pension, or place, to suspect the impartiality or the judgment of those who are intrusted with the administration of public affairs? Is he, when the law is not strictly observed in regard to him, to think himself *aggrieved*, to tell

his sentiments in print, assert his claim to better usage, and fly for redress to another tribunal?

If such practices be permitted, I will not venture to foretell the effects of them; the ministry may soon be convinced, that such sufferers will find compassion, and that it is safer not to bear hard upon them, than to allow them to complain.

The power of licensing in general being firmly established by an Act of Parliament, our poet has not attempted to call in question, but contents himself with censuring the manner in which it has been executed; so that I am not now engaged to assert the licenser's authority, but to defend his conduct.

The poet seems to think himself aggrieved, because the licenser kept his tragedy in his hands one and twenty days, whereas the law allows him to detain it only fourteen.

Where will the insolence of the malecontents end? Or how are such unreasonable expectations possibly to be satisfied? Was it ever known that a man exalted into a high station, dismissed a suppliant in the time limited by law? Ought not Mr. Brooke to think himself happy that his play was not detained longer? If he had been kept a year in suspense, what redress could he have obtained? Let the poets remember, when they appear before the licenser, or his deputy, that they stand at the tribunal from which there is no appeal permitted, and where nothing will so well become them as reverence and submission.

Mr. Brooke mentions in his preface his knowledge of the laws of his own country: had he extended his inquiries to the civil law, he could have found a full justification of the licenser's conduct, *Boni judicis est ampliare suam auctoritatem*.

If then it be the business of a good judge to enlarge his authority, was it not in the licenser the utmost clemency and forbearance, to extend fourteen days only to twenty one?

I suppose this great man's inclination to perform at least this duty of a good judge, is not questioned by any, either of his friends or enemies. I may therefore venture to hope, that he will extend his power by proper degrees, and that I shall live to see a malecontent writer earnestly soliciting for the copy of a play, which he had delivered to the licenser twenty years before.

"I waited," says he, "often on the licenser, and with the utmost importunity entreated an answer." Let Mr. Brooke consider, whether that importunity was not a sufficient reason for the disappointment. Let him reflect how much more decent it had been to have waited the leisure of a great man, than to have pressed upon him with repeated petitions, and to have intruded upon those precious moments which he has dedicated to the service of his country

Mr. Brooke was doubtless led into this improper manner of acting, by an erroneous notion that the grant of a license was not an act of favour, but of justice; a mistake into which he could not have fallen, but from a supine inattention to the design of the statute, which was only to bring poets into subjection and dependence, not to encourage good writers, but to discourage all.

There lies no obligation upon the licenser to grant his sanction to a play, however excellent; nor can Mr. Brooke demand any reparation, whatever applause his performance may meet with.

Another grievance is, that the licenser assigned no reason for his refusal. This is a higher strain of insolence than any of the former. Is it for a poet to demand a licenser's reason for his proceedings? Is he not rather to acquiesce in the decision of authority, and conclude that there are reasons which he cannot comprehend?

Unhappy would it be for men in power, were they always obliged to publish the motives of their conduct. What is power but the liberty of acting without being accountable? The advocates for the Licensing Act have alleged, that the Lord Chamberlain has always had authority to prohibit the representation of a play for just reasons. Why then did we call in all our force to procure an act of parliament? Was it to enable him to do what he has always done? to confirm an authority which no man attempted to impair, or pretended to dispute? No certainly: our intention was to invest him with new privileges, and to empower him to do that *without* reason, which *with* reason he could do before.

We have found by long experience, that to lie under a necessity of assigning reasons, is very troublesome, and that many an excellent design has miscarried by the loss of time spent unnecessarily in examining reasons.

Always to call for reasons, and always to reject them, shows a strange degree of perverseness; yet such is the daily behaviour of our adversaries, who have never yet been satisfied with any reasons that have been offered by us.

They have made it their practice to demand once a-year the reasons for which we maintain a standing army.

One year we told them that it was necessary, because all the nations round us were involved in war; this had no effect upon them, and therefore resolving to do our utmost for their satisfaction, we told them the next year that it was necessary, because all the nations round us were at peace.

This reason finding no better reception than the other, we had recourse to our apprehensions of an invasion from the Pretender, of an insurrection in favour of *gin*, and of a general disaffection among the people.

But as they continue still impenetrable, and

oblige us still to assign our annual reasons, we shall spare no endeavour to procure such as may be more satisfactory than any of the former.

The reason we once gave for building barracks was for fear of the plague, and we intend next year to propose the augmentation of our troops for fear of a famine.

The committee, by which the act for licensing the stage was drawn up, had too long known the inconvenience of giving reasons, and were too well acquainted with the characters of great men, to lay the Lord Chamberlain, or his deputy, under any such tormenting obligation.

Yet lest Mr. Brooke should imagine that a license was refused him without just reasons, I shall condescend to treat him with more regard than he can reasonably expect, and point out such sentiments as not only justly exposed him to that refusal, but would have provoked any ministry less merciful than the present to have inflicted some heavier penalties upon him.

His prologue is filled with such insinuations as no friend of our excellent government can read without indignation and abhorrence, and cannot but be owned to be a proper introduction to such scenes, as seem designed to kindle in the audience a flame of opposition, patriotism, public spirit, and independency; that spirit which we have so long endeavoured to suppress, and which cannot be revived without the entire subversion of all our schemes.

The seditious poet, not content with making an open attack upon us, by declaring in plain terms, that he looks upon freedom as the only source of public happiness and national security, has endeavoured with subtlety, equal to his malice, to make us suspicious of our firmest friends, to infect our consultations with distrust, and to ruin us by disuniting us.

This indeed will not be easily effected; a union founded upon interest and cemented by dependence is naturally lasting; but confederacies which owe their rise to virtue or mere conformity of sentiments, are quickly dissolved, since no individual has any thing either to hope or fear for himself, and public spirit is generally too weak to combat with private passions.

The poet has, however, attempted to weaken our combination by an artful and sly assertion, which, if suffered to remain unconfuted, may operate by degrees upon our minds in the days of leisure and retirement which are now approaching, and perhaps fill us with such surmises as may at least very much embarrass our affairs.

The law by which the Swedes justified their opposition to the encroachments of the King of Denmark, he not only calls

Great Nature's law, the law within the breast,

but proceeds to tell us that it is

—Stamp'd by Heaven upon the unletter'd mind

By which he evidently intends to insinuate a maxim which is, I hope, as false as it is pernicious, that men are naturally fond of liberty till those unborn ideas and desires are effaced by literature.

The author, if he be not a man mew'd up in his solitary study, and entirely unacquainted with the conduct of the present ministry, must know that we have hitherto acted upon different principles. We have always regarded *letters* as great obstructions to our scheme of subordination, and have therefore, when we have heard of any man remarkably *unlettered*, carefully noted him down as the most proper person for any employments of trust or honour, and considered him as a man in whom we could safely repose our most important secrets.

From among the uneducated and *unlettered* we have chosen not only our ambassadors and other negotiators, but even our journalists and pamphleteers; nor have we had any reason to change our measures, or to repent of the confidence which we have placed in ignorance.

Are we now therefore to be told, that this law is

Stamp'd upon th' unletter'd mind?

Are we to suspect our placemen, our pensioners, our generals, our lawyers, our best friends in both houses, all our adherents among the atheists and infidels, and our very gazetteers, clerks and court-pages, as friends to independency? Doubtless this is the tendency of his assertion, but we have known them too long to be thus imposed upon, the *unlettered* have been our warmest and most constant defenders, nor have we omitted any thing to deserve their favour, but have always endeavoured to raise their reputation, extend their influence, and increase their number.

In his first act he abounds with sentiments very inconsistent with the ends for which the power of licensing was granted; to enumerate them all would be to transcribe a great part of his play, a task which I shall very willingly leave to others, who, though true friends to the government, are not inflamed with zeal so fiery and impatient as mine, and therefore do not feel the same emotions of rage and resentment at the sight of those infamous passages, in which venality and dependance are represented as mean in themselves, and productive of remorse and infelicity.

One line which ought, in my opinion, to be erased from every copy by a special act of parliament, is mentioned by Anderson, as pronounced by the hero in his sleep,

O Sweden, O my country, yet I'll save thee.

This line I have reason to believe thrown out as a kind of a watch-word for the opposing faction, who, when they meet in their seditious assem-

blies, have been observed to lay their hands upon their breasts, and cry out with great vehemence of accent,

O B———, O my country, yet I'll save thee.

In the second scene he endeavours to fix epithets of contempt upon those passions and desires which have been always found most useful to the ministry, and most opposite to the spirit of independency.

Base fear, the laziness of lust, gross appetites,  
These are the ladders and the grovelling foot-stool  
From whence the tyrant rises———  
Secure and scepter'd in the soul's servility.  
He has debauched the genius of our country,  
And rides triumphant, while her captive sons  
Await his nod, the silken slaves of pleasure,  
Or fetter'd in their fears.———

Thus is that decent submission to our superiors, and that proper awe of authority which we are taught in courts, termed *base fear* and the *servility of the soul*. Thus are those gayeties and enjoyments, those elegant amusements and lulling pleasures, which the followers of a court are blessed with, as the just rewards of their attendance and submission, degraded to *lust, grossness, and debauchery*. The author ought to be told, that courts are not to be mentioned with so little ceremony, and that though gallantries and amours are admitted there, it is almost treason to suppose them infected with debauchery or lust.

It is observable, that when this hateful writer has conceived any thought of an uncommon malignity, a thought which tends in a more particular manner to excite the love of liberty, animate the heat of patriotism, or degrade the majesty of kings, he takes care to put it in the mouth of his hero, that it may be more forcibly impressed upon his reader. Thus Gustavus, speaking of his tatters, cries out,

———Yes, my Arvida,  
Beyond the sweeping of the proudest train  
That shades a monarch's heel, I prize these weeds,  
For they are sacred to my country's freedom.

Here this abandoned son of liberty makes a full discovery of his execrable principles: the tatters of Gustavus, the usual dress of the assertors of these doctrines, are of more divinity, because they are sacred to freedom, than the sumptuous and magnificent robes of regality itself. Such sentiments are truly detestable, nor could any thing be an aggravation of the author's guilt, except his ludicrous manner of mentioning a monarch.

The *heel of a monarch*, or even the print of his *heel*, is a thing too venerable and sacred to be treated with such levity, and placed in contrast with rags and poverty. He, that will speak contemptuously of the *heel of a monarch*, will,

whenever he can with security, speak contemptuously of his head.

These are the most glaring passages which have occurred, in the perusal of the first pages; my indignation will not suffer me to proceed farther, and I think much better of the licenser, than to believe he went so far.

In the few remarks which I have set down, the reader will easily observe, that I have strained no expression beyond its natural import, and have divested myself of all heat, partiality, and prejudice.

So far therefore is Mr. Brooke from having received any hard or unwarrantable treatment, that the licenser has only acted in pursuance of that law to which he owes his power, a law which every admirer of the administration must own to be very necessary, and to have produced very salutary effects.

I am indeed surprised, that this great office is not drawn out into a longer series of deputations, since it might afford a gainful and reputable employment to a great number of the friends of the government; and I should think, instead of having immediate recourse to the deputy-licenser himself, it might be sufficient honour for any poet, except the laureat, to stand bare-headed in the presence of the deputy of the deputy's deputy in the nineteenth subordination.

Such a number cannot but be thought necessary, if we take into consideration the great work of drawing up an index *expurgatorius* to all the old plays; which is, I hope, already undertaken, or if it has been hitherto unhappily neglected, I take this opportunity to recommend.

The productions of our old poets are crowded with passages very unfit for the ears of an English audience, and which cannot be pronounced without irritating the minds of the people.

This censure I do not confine to those lines in which liberty, natural equality, wicked ministers, deluded king's, mean arts of negotiation, venal senates, mercenary troops, oppressive officers, servile and exorbitant taxes, universal corruption, the luxuries of a court, the miseries of the people, the decline of trade, or the happiness of independency are directly mentioned. These are such glaring passages as cannot be suffered to pass without the most supine and criminal negligence. I hope the vigilance of the licensers will extend to all such speeches and soliloquies as tend to recommend the pleasures of virtue, the tranquillity of an uncorrupted head, and the satisfactions of conscious innocence; for though such strokes as these do not appear to a common eye to threaten any danger to the government, yet it is well known to more penetrating observers, that they have such consequences as cannot be too diligently obviated, or too cautiously avoided.

A man, who becomes once enamoured of the charms of virtue, is apt to be very little concerned

about the acquisition of wealth or titles, and is therefore not easily induced to act in a manner contrary to his real sentiments, or to vote at the word of command; by contracting his desires, and regulating his appetites, he wants much less than other men, and every one versed in the arts of government can tell, that men are more easily influenced in proportion as they are more necessitous.

This is not the only reason why virtue should not receive too much countenance from a licensed stage; her admirers and followers are not only naturally independent, but learn such a uniform and consistent manner of speaking and acting, that they frequently by the mere force of artless honesty surmount all the obstacles which subtlety and politics can throw in their way, and obtain their ends in spite of the most profound and sagacious ministry.

Such then are the passages to be expunged by the licensers: in many parts indeed the speeches will be imperfect, and the action appear not regularly conducted, but the Poet Laureat may easily supply these vacuities, by inserting some of his own verses in praise of wealth, luxury, and venality.

But, alas! all those pernicious sentiments which shall be banished from the stage, will be vented from the press, and more studiously read because they are prohibited.

I cannot but earnestly implore the friends of the government to leave no art untried by which we may hope to succeed in our design of extending the power of the licenser to the press, and of making it criminal to publish any thing without an *imprimatur*.

How much would this single law lighten the mighty burden of state affairs! with how much security might our ministers enjoy their honours, their places, their reputations, and their admirers, could they once suppress those malicious invectives which are at present so industriously propagated, and so eagerly read; could they hinder any arguments but their own from coming to the ears of the people, and stop effectually the voice of cavil and inquiry!

I cannot but indulge myself a little while by dwelling on this pleasing scene, and imagining those *halcyon-days*, in which no politics shall be read but those of the *Gazetier*, nor any poetry but that of the Laureat; when we shall hear of nothing but the successful negotiations of our ministers, and the great actions of —

How much happier would this state be than those perpetual jealousies and contentions which are inseparable from knowledge and liberty, and which have for many years kept this nation in perpetual commotions.

But these are times rather to be wished for than expected, for such is the nature of our unquiet countrymen, that if they are not admitted to the knowledge of affairs, they are always sus-

pecting their governors of designs prejudicial to their interest; they have not the least notion of the pleasing tranquillity of ignorance, nor can be brought to imagine that they are kept in the dark, lest too much light should hurt their eyes. They have long claimed a right of directing their superiors, and are exasperated at the least mention of secrets of state.

This temper makes them very readily encourage any writer or printer, who, at the hazard of his life or fortune, will give them any information: and while this humour prevails, there never will be wanting some daring adventurer who will write in defence of liberty, and some zealous or avaricious printer who will disperse his papers.

It has never yet been found that any power, however vigilant or despotic, has been able to prevent the publication of seditious journals, ballads, essays, and dissertations; "Considerations on the present state of affairs," and "Enquiries into the conduct of the administration."

Yet I must confess, that considering the success with which the present ministry has hitherto proceeded in their attempts to drive out of the world the old prejudices of patriotism and public spirit, I cannot but entertain some hopes, that what has been so often attempted by their predecessors, is reserved to be accomplished by their superior abilities.

If I might presume to advise them upon this great affair, I should dissuade them from any direct attempt upon the liberty of the press, which is the darling of the common people, and therefore cannot be attacked without immediate danger. They may proceed by a more sure and silent way, and attain the desired end without noise, detraction, or oppression.

There are scattered over this kingdom several little seminaries, in which the lower ranks of people, and the youngest sons of our nobility and gentry are taught, from their earliest infancy, the pernicious arts of spelling and reading, which they afterwards continue to practise, very much to the disturbance of their own quiet, and the interruption of ministerial measures.

These seminaries may, by an act of parliament, be at once suppressed, and that our posterity be deprived of all means of reviving this corrupt method of education, it may be made felony to teach to read without a license from the Lord Chamberlain.

This expedient, which I hope will be carefully concealed from the vulgar, must infallibly answer the great end proposed by it, and set the power of the court not only above the insults of the poets, but in a short time above the necessity of providing against them. The licenser having his authority thus extended, will in time enjoy the title and the salary without the trouble of exercising his power, and the nation will rest at length in ignorance and peace.

## PREFACE

TO THE

### GENTLEMAN'S MAGAZINE, 1738.

THE usual design of Addresses of this sort is to implore the candour of the public! we have always had the more pleasing province of returning thanks, and making acknowledgments for the kind acceptance which our Monthly Collections have met with.

This, it seems, did not sufficiently appear from the numerous sale and repeated impressions of our books, which have at once exceeded our merit and our expectation; but have been still more plainly attested by the clamours, rage, and calumnies of our competitors, of whom we have seldom taken any notice, not only because it is cruelty to insult the depressed, and folly to engage with desperation, but because we consider all their outcries, menaces, and boasts, as nothing more than advertisements in our favour, being evidently drawn up with the bitterness of baffled malice and disappointed hope; and almost discovering in plain terms, that the unhappy authors have seventy thousand London Magazines mouldering in their warehouses, returned from all parts of the kingdom, unsold, unread, and disregarded.

Our obligations for the encouragement we have so long continued to receive, are so much the greater, as no artifices have been omitted to supplant us. Our adversaries cannot be denied the praise of industry; how far they can be celebrated for an honest industry we leave to the decision of the public, and even of their brethren the booksellers, not including those whose advertisements they obliterated to paste their invectives in our book.

The success of the Gentleman's Magazine has given rise to almost twenty imitations of it, which are either all dead, or very little regarded by the world. Before we had published sixteen months, we met with such a general approbation, that a knot of enterprising geniuses, and sagacious inventors, assembled from all parts of the town, agreed with a unanimity natural to understandings of the same size to seize upon our whole plan, without changing even the title. Some weak objections were indeed made by one of them against the design, as having an air of servility, dishonesty, and piracy; but it was concluded that all these imputations might be avoid-

ed by giving the picture of St. Paul's instead of St. John's gate: it was however thought indispensably necessary to add, printed in St. John's Street, though there was then no printing-house in that place.

That these plagiaries should, after having thus stolen their whole design from us, charge us with robbery, on any occasion, is a degree of impudence scarcely to be matched, and certainly entitles them to the first rank among false heroes. We have therefore inserted their names\* at length in our February Magazine, p. 61; being desirous that every man should enjoy the reputation he deserves.

Another attack has been made upon us by the author of Common Sense, an adversary equally malicious as the former, and equally despicable. What were his views, or what his provocations, we know not, nor have thought him considerable enough to inquire. To make him any further answer would be to descend too low: but as he is one of those happy writers, who are best exposed by quoting their own words, we have given his elegant remarks in our Magazine for December, where the reader may entertain himself at his leisure with an agreeable mixture of scurrility and false grammar.

For the future we shall rarely offend him by adopting any of his performances, being unwilling to prolong the life of such pieces as deserve no other fate than to be hissed, torn, and forgotten. However, that the curiosity of our readers may not be disappointed, we shall, whenever we find him a little excelling himself, perhaps print his dissertations upon our blue covers, that they may be looked over, and stripped off, without disgracing our collection, or swelling our volumes.

We are sorry that by inserting some of his essays, we have filled the head of this petty writer

\* The gay and learned C. Ackers, of Swan Alley, Printer; the polite and generous T. Cox, under the Royal Exchange; the eloquent and courtly J. Clark, of Duck Lane; and the modest, civil, and judicious T. Astley, of St. Paul's Church Yard, booksellers.—All these names appeared in the title of the London Magazine, begun in 1732.

with idle chimeras of applause, laurels, and immortality, nor suspected the bad effect of our regard for him, till we saw in the Postscript to one of his papers a wild \* prediction of the honours to be paid him by future ages. Should any mention of him be made, or his writings, by posterity, it will probably be in words like these: "In the Gentleman's Magazine are still preserved some essays under the specious and inviting title of *Common Sense*. How papers of so little value came to be rescued from the common lot of dulness, we are at this distance of time unable to conceive, but imagine that personal friendship prevailed with Urban to admit them in opposition to his judgment. If this was

the reason, he met afterwards with the treatment which all deserve who patronize stupidity; for the writer, instead of acknowledging his favours, complains of injustice, robbery, and mutilation; but complains in a style so barbarous and indecent, as sufficiently confutes his own calumnies." In this manner must this author expect to be mentioned.—But of him, and our other adversaries, we beg the reader's pardon for having said so much. We hope it will be remembered in our favour, that it is sometimes necessary to chastise insolence, and that there is a sort of men who cannot distinguish between forbearance and cowardice.

## AN APPEAL TO THE PUBLIC.

FROM THE GENTLEMAN'S MAGAZINE, MARCH, 1739.

Men' inoveat cimex Pantilius? aut crucier, quod  
Vellicet absentem Demetrius?

HOR.

Laudat, amat, cantat nostros mea Roma libellos,  
Meque sinus omnes, me manus omnis habet.  
Ecce rubet quidam, pallet, stupet, oscitat, odit.  
Hoc volo, nunc nobis carmina nostra placent.

MARTIAL.

It is plain, from the conduct of writers of the first class, that they have esteemed it no derogation from their characters to defend themselves against the censures of ignorance, or the calumnies of envy.

It is not reasonable to suppose that they always judged their adversaries worthy of a formal confutation, but they concluded it not prudent to neglect the feeblest attacks; they knew that such men have often done hurt who had not abilities to do good; that the weakest hand, if not timely disarmed, may stab a hero in his sleep; that a worm, however small, may destroy a fleet

in the acorn; and that citadels, which have defied armies, have been blown up by rats.

In imitation of these great examples, we think it not absolutely needless to vindicate ourselves from the virulent aspersions of the Craftsman and *Common Sense*, because their accusations, though entirely groundless, and without the least proof, are urged with an air of confidence, which the unwary may mistake for consciousness of truth.

In order to set the proceedings of these calumniators in a proper light, it is necessary to inform such of our readers as are unacquainted with the artifices of trade, that we originally incurred the displeasure of the greatest part of the booksellers by keeping this Magazine wholly in our own hands, without admitting any of that fraternity into a share of the property. For nothing is more criminal in the opinion of many of them, than for an author to enjoy more advantage from his own works than they are disposed to allow him. This is a principle so well established among them, that we can produce some who threatened printers with their highest displeasure for their having dared to print books for those that wrote them.

Hinc iræ, hinc odia.

This was the first ground of their animosity

\* *Common Sense Journal*, printed by Purser of White-Friars, March 11, 1731.

"I make no doubt but after some grave historian, three or four hundred years hence, has described the corruption, the baseness, and the flattery, which men run into in these times, he will make the following observation:—In the year 1737, a certain unknown author published a writing under the title of *Common Sense*: this writing came out weekly in little detached essays, some of which are political, some moral, and others humorous. By the best judgment that can be formed of a work, the style and language of which is become so obsolete that it is scarcely intelligible, it answers the title well," &c.

which for some time proceeded no farther than private murmurs and petty discouragements. At length determining to be no longer debarred from a share in so beneficial a project, a knot of them combined to seize our whole plan; and without the least attempt to vary or improve it, began with the utmost vigour to print and circulate the London Magazine, with such success, that in a few years, while we were printing the fifth edition of some of our earliest numbers, they had seventy thousand of their books returned unsold upon their hands.

It was then time to exert their utmost efforts to stop our progress, and nothing was to be left unattempted that interest could suggest. It will be easily imagined that their influence among those of their own trade was greater than ours, and that their Collections were therefore more industriously propagated by their brethren; but this being the natural consequence of such a relation, and therefore excusable, is only mentioned to show the disadvantages against which we are obliged to struggle, and to convince the reader, that we who depend so entirely upon his approbation, shall omit nothing to deserve it.

They then had recourse to advertisements, in which they sometimes made faint attempts to be witty, and sometimes were content with being merely scurrilous; but finding that their attacks, while we had an opportunity of returning hostilities, generally procured them such treatment as very little contributed to their reputation, they came at last to a resolution of excluding us from the Newspapers in which they have any influence; by this means they can at present insult us with impunity, and without the least danger of confutation.

Their last, and indeed their most artful expedient, has been to hire and incite the weekly journalists against us. The first weak attempt was made by the Universal Spectator, but this we took not the least notice of, as we did not imagine it would ever come to the knowledge of the public.

Whether there was then a confederacy between this journal and Common Sense, as at present between Common Sense and the Craftsman, or whether understandings of the same form receive at certain times the same impressions from the planets, I know not, but about that time war was likewise declared against us by the redoubted author of Common Sense: an adversary not so much to be dreaded for his abilities as for the title of his paper, behind which he has the art of sheltering himself in perfect security. He defeats all his enemies by calling them "enemies to Common Sense," and silences the strongest objections and the clearest reasonings by assuring his readers that "they are contrary to Common Sense."

I must confess, to the immortal honour of this

great writer, that I can remember but two instances of a genius able to use a few syllables to such great and so various purposes. One is, the old man in Shadwell, who seems, by long time and experience, to have attained to equal perfection with our author; for "when a young fellow began to prate and be pert," says he, "I silenced him with my old word, *Tace* is Latin for candle."

The other, who seems yet more to resemble this writer, was one *Goodman*, a horse-stealer, who being asked, after having been found guilty by the jury, what he had to offer to prevent sentence of death from being passed upon him, did not attempt to extenuate his crime, but entreated the judge to beware of hanging a *Good Man*.

This writer we thought, however injudiciously, worthy, not indeed of a reply, but of some correction, and in our Magazine for December, 1796, and the preface to the Supplement, treated him in such a manner as he does not seem inclined to forget.

From that time, losing all patience, he has exhausted his stores of scurrility upon us; but our readers will find upon consulting the passages above mentioned, that he has received too much provocation to be admitted as an impartial critic.

In our Magazine of January, p. 24, we made a remark upon the Craftsman; and in p. 3, dropped some general observations upon the weekly writers, by which we did not expect to make them more our friends. Nor, indeed, did we imagine that this would have inflamed *Caleb* to so high a degree. His resentment has arisen so much above the provocation, that we cannot but impute it more to what he fears than what he has felt. He has seen the solecisms of his brother Common Sense exposed, and remembers that—

—Tua res agitur, paries cum proximus ardet.

He imagines that he shall soon fall under the same censure, and is willing that our criticisms shall appear rather the effects of our resentment than our judgment.

For this reason, I suppose, (for I can find no other,) he has joined with Common Sense to charge us with partiality, and to recommend the London Magazine as drawn up with less regard to interest or party. A favour which the authors of that collection have endeavoured to deserve from them by the most servile adulation.

But as we have a higher opinion of the candour of our readers, than to believe that they will condemn us without examination, or give up their right of judging for themselves, we are not unconcerned at this charge, though the most atrocious and malignant that can be

brought against us. We entreat only to be compared with our rivals, in full confidence, that not only our innocence, but our superiority will appear.

## CONSIDERATIONS

ON THE CASE OF

## DR. T[RAPP]'S SERMONS.\*

ABRIDGED BY MR. CAVE, 1739.

1. THAT the copy of a book is the property of the author, and that he may, by sale or otherwise, transfer that property to another, who has a right to be protected in the possession of that property, so transferred, is not to be denied.

2. That the complainants may be lawfully invested with the property of this copy, is likewise granted.

3. But the complainants have mistaken the nature of this property; and, in consequence of their mistake, have supposed it to be invaded by an act, in itself legal, and justifiable by an uninterrupted series of precedents, from the first establishment of printing among us, down to the present time.

4. He that purchases the copy of a book, purchases the sole right of printing it, and of vending the books printed according to it; but has no right to add to it, or take from it, without the author's consent, who still preserves such a right in it, as follows from the right every man has to preserve his own reputation.

5. Every single book, so sold by the proprietor, becomes the property of the buyer, who purchases with the book the right of making use of it as he shall think most convenient, either for his own improvement or amusement, or the benefit or entertainment of mankind.

6. This right the reader of a book may use

many ways to the disadvantage both of the author and the proprietor, which yet they have not any right to complain of, because the author when he wrote, and the proprietor when he purchased, the copy, knew, or ought to have known, that the one wrote, and the other purchased, under the hazard of such treatment from the buyer and reader, and without any security from the bad consequences of that treatment except the excellence of the book.

7. Reputation and property are of different kinds; one kind of each is more necessary to be secured by the law than another, and the law has provided more effectually for its defence. My character as a man, a subject, or a trader, is under the protection of the law; but my reputation as an author is at the mercy of the reader, who lies under no other obligations to do me justice than those of religion and morality. If a man calls me rebel or bankrupt, I may prosecute and punish him; but, if a man calls me idiot or plagiarist, I have no remedy, since, by selling him the book, I admit his privilege of judging, and declaring his judgment, and can appeal only to other readers, if I think myself injured.

8. In different characters we are more or less protected; to hiss a pleader at the bar, would perhaps be deemed illegal and punishable, but to hiss a dramatic writer is justifiable by custom.

9. What is here said of the writer, extends itself naturally to the purchaser of a copy, since the one seldom suffers without the other.

10. By these liberties it is obvious, that authors and proprietors may often suffer, and sometimes unjustly: but as these liberties are encouraged and allowed for the same reason with writing itself, for the discovery and propagation of truth, though, like other human goods, they have their alloys and ill-consequences; yet, as their advantages abundantly preponderate, they have never yet been abolished or restrained.

\* Dr. Trapp, it will be recollected, was a popular preacher; and about the year 1739, when Methodism might be said to be in its infancy, preached Four Sermons "On the Nature, Folly, Sin and Danger, of being righteous over much;" which were published by Austen and Gilliver, and had an extensive sale. Mr. Cave, ever ready to oblige his readers with temporary subjects, took an extract from them, and promised a *continuation*, which never appeared; so that it was either stopped by a prosecution, or made up by other means. On all difficult occasions Johnson was Cave's oracle. And the paper now before us was certainly written on that occasion. Gent. Mag. July, 1737.

11. Thus every book, when it falls into the hands of the reader, is liable to be examined, confuted, censured, translated, and *abridged*; any of which may destroy the credit of the author, or hinder the sale of the book.

12. That all these liberties are allowed, and cannot be prohibited without manifest disadvantage to the public, may be easily proved; but we shall confine ourselves to the liberty of making epitomes, which gives occasion to our present inquiry.

13. That an uninterrupted prescription confers a right, will be easily granted, especially if it appears that the prescription, pleaded in defence of that right, might at any time have been interrupted, had it not been always thought agreeable to reason and to justice.

14. The numberless abridgments that are to be found of all kinds of writings, afford sufficient evidence that they were always thought legal, for they are printed with the names of the abreviators and publishers, and without the least appearance of a clandestine transaction. Many of the books so abridged were the properties of men who wanted neither wealth, nor interest, nor spirit, to sue for justice, if they had thought themselves injured. Many of these abridgments must have been made by men whom we can least suspect of illegal practices, for there are few books of late that are not abridged.

15. When Bishop Burnet heard that his "*History of the Reformation*" was about to be abridged, he did not think of appealing to the Court of Chancery; but, to avoid any misrepresentation of his *History*, epitomised it himself, as he tells us in his preface.

16. But, lest it should be imagined that an author might do this rather by choice than necessity, we shall produce two more instances of the like practice, where it would certainly not have been borne if it had been suspected of illegality. The one, in Clarendon's *History*, which was abridged in 2 vols. 8vo.; and the other in Bishop Burnet's "*History of his own Time*," abridged in the same manner. The first of these books was the property of the University of Oxford, a body tenacious enough of their rights; the other, of Bishop Burnet's heirs, whose circumstances were such as made them very sensible of any diminution of their inheritance.

17. It is observable, that both these abridgments last mentioned, with many others that might be produced, were made when the act of parliament for securing the property of copies was in force, and which, if that property was injured, afforded an easy redress: what then can be inferred from the silence and forbearance of the proprietors, but that they thought an epitome of a book no violation of the right of the proprietor?

18. That their opinion, so contrary to their

own interest, was founded in reason, will appear from the nature and end of an abridgment.

19. The design of an abridgment is, to benefit mankind by facilitating the attainment of knowledge, and by contracting arguments, relations, or descriptions, into a narrow compass; to convey instruction in the easiest method, without fatiguing the attention, burdening the memory, or impairing the health of the student.

20. By this method the original author becomes, perhaps, of less value, and the proprietor's profits are diminished; but these inconveniences give way to the advantage received by mankind from the easier propagation of knowledge; for as an incorrect book is lawfully criticised, and false assertions justly confuted, because it is more the interest of mankind that error should be detected and truth discovered, than that the proprietors of a particular book should enjoy their profits undiminished; so a tedious volume may no less lawfully be abridged, because it is better that the proprietors should suffer some damage, than that the acquisition of knowledge should be obstructed with unnecessary difficulties, and the valuable hours of thousands thrown away.

21. Therefore, as he that buys the copy of a book, buys it under this condition, that it is liable to be confuted if it is false, however his property may be affected by such a confutation; so he buys it likewise liable to be abridged if it be tedious, however his property may suffer by the abridgment.

22. To abridge a book, therefore, is no violation of the right of the proprietor, because to be subject to the hazard of an abridgment was an original condition of the property.

23. Thus we see the right of abridging authors established both by reason and the customs of trade. But, perhaps, the necessity of this practice may appear more evident, from a consideration of the consequences that must probably follow from the prohibition of it.

24. If abridgments be condemned as injurious to the proprietor of the copy, where will this argument end? Must not confutations be likewise prohibited for the same reason? or, in writings of entertainment, will not criticisms at least be entirely suppressed, as equally hurtful to the proprietor, and certainly not more necessary to the public?

25. Will not authors who write for pay, and who are rewarded commonly according to the bulk of their work, be tempted to fill their works with superfluities and digressions, when the dread of an abridgment is taken away, as doubtless more negligences would be committed, and more falsehoods published, if men were not restrained by the fear of censure and confutation?

26. How many useful works will the busy, the indolent, and the less wealthy part of mankind be deprived of? How few will read or purchase forty-four large volumes of the *Traus-*

actions of the Royal Society, which, in abridgment, are generally read, to the great improvement of philosophy?

27. How must general systems of sciences be written, which are nothing more than epitomes of those authors who have written on particular branches, and those works are made less necessary by such collections? Can he that destroys the profit of many copies, be less criminal than he that lessens the sale of one?

28. Even to confute an erroneous book will become more difficult, since it has always been a custom to abridge the author whose assertions are examined, and sometimes to transcribe all the essential parts of his book. Must an inquirer after truth be debarred from the benefit of such confutations, unless he purchases the

book, however useless, that gave occasion to the answer?

29. Having thus endeavoured to prove the legality of abridgments from custom, and the necessity of continuing that custom from reason, it remains only, that we show that we have not printed the complainant's copy, but abridged it.

30. This will need no proof, since it will appear, upon comparing the two books, that we have reduced thirty-seven pages to thirteen of the same print.

31. Our design is, to give our readers a short view of the present controversy; and we require that one of these two positions be proved, either that we have no right to exhibit such a view, or that we can exhibit it without epitomising the writers of each party.

## LETTER ON FIRE-WORKS,

FROM THE GENTLEMAN'S MAGAZINE, JAN. 1749.

MR. URBAN,

Among the principal topics of conversation which now furnish the places of assembly with amusement, may be justly numbered the Fire-works, which are advancing, by such slow degrees, and with such costly preparation.

The first reflection that naturally arises is upon the inequality of the effect to the cause. Here are vast sums expended, many hands, and some heads employed, from day to day, and from month to month, and the whole nation is filled with expectations, by delineations and narratives. And in what is all this to end? in a building that is to attract the admiration of ages? in a bridge, which may facilitate the commerce of future generations? in a work of any kind which may stand as the model of beauty, or the pattern of virtue? To show the blessings of the late change of our state\* by any monument of these kinds, were a project worthy not only of wealth, and power, and greatness, but of learning, wisdom, and virtue. But nothing of this kind is designed; nothing more is projected, than a crowd, a shout, and a blaze: the mighty work of artifice and contrivance is to be set on fire for no other purpose that I can see, than to show how idle pyrotechnical virtuosos have been busy. Four hours the sun will shine, and then fall from his orb, and lose his memory and his lustre together; the spectators will disperse as their inclinations lead them, and wonder by what

strange infatuation they had been drawn together. In this will consist the only propriety of this transient show, that it will resemble the war of which it celebrates the period. The powers of this part of the world, after long preparations, deep intrigues, and subtle schemes, have set Europe in a flame, and, after having gazed a while at their fire-works, have laid themselves down where they rose, to inquire for what they had been contending.

It is remarked likewise, that this blaze, so transitory and so useless, will be to be paid for, when it shines no longer: and many cannot forbear observing, how many lasting advantages might be purchased, how many acres might be drained, how many ways repaired, how many debtors might be released, how many widows and orphans, whom the war has ruined, might be relieved, by the expense which is about to evaporate in smoke, and to be scattered in rockets: and there are some who think not only reason, but humanity, offended, by such a trifling profusion, when so many sailors are starving, and so many churches sinking into ruins.

It is no improper inquiry by whom this expense is at last to be borne: for certainly nothing can be more unreasonable than to tax the nation for a blaze, which will be extinguished before many of them know it has been lighted; nor will it be consistent with the common practice, which directs that local advantages shall be procured at the expense of the district that enjoys them. I never found in any records, that any town petitioned the parliament for a maypole, a

\* The peace of Aix-la-Chapelle, 1748.

bull-ring, or a skittle-ground; and, therefore, I should think, fire-works, as they are less durable, and less useful, have at least as little claim to the public purse.

The fire-works are, I suppose, prepared, and therefore it is too late to obviate the project:

but I hope the generosity of the great is not so far extinguished, as that they can for their diversion drain a nation already exhausted, and make us pay for pictures in the fire, which none will have the poor pleasure of beholding but themselves.

## PROPOSALS

FOR PRINTING BY SUBSCRIPTION,

## ESSAYS IN VERSE AND PROSE.

BY ANNA WILLIAMS.

FROM THE GENTLEMAN'S MAGAZINE, SEPT. 1750.

WHEN a writer of my sex solicits the regard of the public, some apology seems always to be expected; and it is unhappily too much in my power to satisfy this demand; since, how little soever I may be qualified, either by nature or study, for furnishing the world with literary entertainments, I have such motives for venturing my little performances into the light, as are sufficient to counterbalance the censure of arrogance, and to turn off my attention from the threats of criticism. The world will perhaps be something softened when it shall be known, that my intention was to have lived by means

more suited to my ability, from which being now cut off by a total privation of sight, I have been persuaded to suffer such Essays as I had formerly written, to be collected, and fitted, if they can be fitted, by the kindness of my friends, for the press. The candour of those that have already encouraged me, will, I hope, pardon the delays incident to a work which must be performed by other eyes and other hands: and censure may surely be content to spare the compositions of a woman, written for amusement, and published for necessity.

## A PROJECT

FOR THE

## EMPLOYMENT OF AUTHORS.

FROM THE UNIVERSAL VISITER, APRIL, 1756.

TO THE VISITER.

SIR,

I KNOW not what apology to make for the little dissertation which I have sent, and which I will not deny that I have sent with design that you should print it. I know that admonition is very seldom grateful, and that authors are eminently choleric; yet, I hope, that you, and every impartial reader, will be convinced, that I intend the benefit of the public, and the advancement of knowledge; and that every reader, into whose hands this shall happen to fall, will rank himself

among those who are to be excepted from general censure.

I am, Sir, your humble servant.

*Scire velim quare toties mihi, Nævole, tristis  
Occurris fronte obductâ, cœu Marsya victus.—Juv.*

THERE is no gift of nature, or effect of art, however beneficial to mankind, which either by casual deviations, or foolish perversions, is not sometimes mischievous. Whatever may be the cause of happiness, may be made likewise the cause of misery. The medicine, which, rightly applied, has power to cure, has, when rashness

or ignorance prescribes it, the same power to destroy.

I have computed, at some hours of leisure, the loss and gain of literature, and set the pain which it produces against the pleasure. Such calculations are indeed at a great distance from mathematical exactness, as they arise from the induction of a few particulars, and from observations made rather according to the temper of the computist, than the nature of things. But such a narrow survey as can be taken, will easily show that letters cause many blessings, and inflict many calamities; that there is scarcely an individual who may not consider them as immediately or mediately influencing his life, as they are chief instruments of conveying knowledge, and transmitting sentiments; and almost every man learns, by their means, all that is right or wrong in his sentiments and conduct.

If letters were considered only as means of pleasure, it might well be doubted in what degree of estimation they should be held; but when they are referred to necessity, the controversy is at an end: it soon appears, that though they may sometimes incommode us, yet human life would scarcely rise, without them, above the common existence of animal nature: we might indeed breathe and eat in universal ignorance, but must want all that gives pleasure or security, all the embellishments and delights, and most of the conveniences and comforts of our present condition.

Literature is a kind of intellectual light, which, like the light of the sun, may sometimes enable us to see what we do not like; but who would wish to escape unpleasing objects, by condemning himself to perpetual darkness?

Since, therefore, letters are thus indispensably necessary, since we cannot persuade ourselves to lose their benefits for the sake of escaping their mischiefs, it is worth our serious inquiry, how their benefits may be increased and their mischiefs lessened; by what means the harvest of our studies may afford us more corn and less chaff; and how the roses of the gardens of science may gratify us more with their fragrance, and prick us less with their thorns.

I shall not at present mention the more formidable evils which the misapplication of literature produces, nor speak of churches infected with heresy, states inflamed with sedition, or schools infatuated with hypothetical fictions. These are evils which mankind have always lamented, and which, till mankind grow wise and modest, they must, I am afraid, continue to lament, without hope of remedy. I shall now touch only on some lighter and less extensive evils, yet such as are sufficiently heavy to those that feel them, and are of late so widely diffused, as to deserve, though perhaps not the notice of the legislature, yet the consideration of those

whose benevolence inclines them to a voluntary care of public happiness.

It was long ago observed by Virgil, and I suppose by many before him, that "Bees do not make honey for their own use;" the sweets which they collect in their laborious excursions, and store up in their lives with so much skill, are seized by those who have contributed neither toil nor art to the collection; and the poor animal is either destroyed by the invader, or left to shift without a supply. The condition is nearly the same of the gatherer of honey, and the gatherer of knowledge. The bee and the author work alike for others, and often lose the profit of their labour. The case, therefore, of authors, however hitherto neglected, may claim regard. Every body of men is important according to the joint proportion of their usefulness and their number. Individuals, however they may excel, cannot hope to be considered singly as of great weight in the political balance; and multitudes, though they may, merely by their bulk, demand some notice, are yet not of much value, unless they contribute to ease the burden of society, by co-operating to its prosperity.

Of the men, whose condition we are now examining, the usefulness never was disputed; they are known to be the great disseminators of knowledge, and guardians of the commonwealth; and of late their number has been so much increased, that they are become a very conspicuous part of the nation. It is not now, as in former times, when men studied long, and passed through the severities of discipline, and the probation of public trials, before they presumed to think themselves qualified for instructors of their countrymen; there is found a nearer way to fame and erudition, and the inclosures of literature are thrown open to every man whom idleness disposes to loiter, or whom pride inclines to set himself to view. The sailor publishes his journal, the farmer writes the process of his annual labour; he that succeeds in his trade, thinks his wealth a proof of his understanding, and boldly tutors the public; he that fails, considers his miscarriage as the consequence of a capacity too great for the business of a shop, and amuses himself in the Fleet with writing or translating. The last century imagined, that a man, composing in his chariot, was a new object of curiosity; but how much would the wonder have been increased by a footman studying behind it? There is now no class of men without its authors, from the peer to the thresher; nor can the sons of literature be confined any longer to Grub-street or Moorfields; they are spread over all the town and all the country, and fill every stage of habitation from the cellar to the garret.

It is well known, that the price of commodities must always fall as the quantity is increased, and that no trade can allow its professors to be mul-

tiplied beyond a certain number. The great misery of writers proceeds from their multitude. We easily perceive that in a nation of clothiers, no man could have any cloth to make but for his own back; that in a community of bakers every man must use his own bread; and what can be the case of a nation of authors, but that every man must be content to read his book to himself? for surely it is vain to hope, that of men labouring at the same occupation, any will prefer the work of his neighbour to his own; yet this expectation, wild as it is, seems to be indulged by many of the writing race, and therefore it can be no wonder, that like all other men who suffer their minds to form inconsiderate hopes, they are harassed and dejected with frequent disappointments.

If I were to form an adage of misery, or fix the lowest point to which humanity could fall, I should be tempted to name the life of an author. Many universal comparisons there are by which misery is expressed. We talk of a man teased like a bear at the stake, tormented like a toad under a harrow, or hunted like a dog with a stick at his tail; all these are indeed states of uneasiness, but what are they to the life of an author! of an author worried by critics, tormented by his bookseller, and hunted by his creditors. Yet such must be the case of many among the retailers of knowledge, while they continue thus to swarm over the land; and whether it be by propagation or contagion, produce new writers to heighten the general distress, to increase confusion, and hasten famine.

Having long studied the varieties of life, I can guess by every man's walk, or air, to what state of the community he belongs. Every man has noted the legs of a tailor, and the gait of a seaman, and a little extension of his physiognomical acquisitions will teach him to distinguish the countenance of an author. It is my practice, when I am in want of amusement, to place myself for an hour at Temple Bar, or any other narrow pass much frequented, and examine one by one the looks of the passengers; and I have commonly found, that, between the hours of eleven and four, every sixth man is an author. They are seldom to be seen very early in the morning, or late in the evening, but about dinner time they are all in motion, and have one uniform engerness in their faces, which gives little opportunity of discerning their hopes or fears, their pleasures or their pains.

But in the afternoon, when they have all dined, or composed themselves to pass the day without a dinner, their passions have full play, and I can perceive one man wondering at the stupidity of the public, by which his new book has been totally neglected; another cursing the French, who fright away literary curiosity by their threats of an invasion; another swearing at his bookseller, who will advance no money

without copy; another perusing as he walks, his publisher's bill; another murmuring at an unanswerable criticism; another determining to write no more to a generation of barbarians; and another resolving to try once again, whether he cannot awaken the drowsy world to a sense of his merit.

It sometimes happens, that there may be remarked among them a smile of complacency, or a strut of elevation; but if these favourites of fortune are carefully watched for a few days, they seldom fail to show the transitoriness of human felicity; the crest falls, the gayety is ended, and there appear evident tokens of a successful rival, or a fickle patron.

But of all authors, those are the most wretched, who exhibit their productions on the theatre, and who are to propitiate first the manager, and then the public. Many an humble visitant have I followed to the doors of these lords of the drama, seen him touch the knocker with a shaking hand, and, after long deliberation, adventure to solicit entrance, by a single knock; but I never staid to see them come out from their audience, because my heart is tender, and being subject to frights in bed, I would not willingly dream of an author.

That the number of authors is disproportionate to the maintenance which the public seems willing to assign them; that there is neither praise nor meat for all who write, is apparent from this, that, like wolves in long winters, they are forced to prey on one another. The *Reviewers* and *Critical Reviewers*, the *Remarkers* and *Examiners* can satisfy their hunger only by devouring their brethren. I am far from imagining that they are naturally more ravenous or blood-thirsty than those on whom they fall with so much violence and fury; but they are hungry, and hunger must be satisfied; and these savages, when their bellies are full, will fawn on those whom they now bite.

The result of all these considerations amounts only to this, that the number of writers must at last be lessened, but by what method this great design can be accomplished, is not easily discovered. It was lately proposed, that every man who kept a dog should pay a certain tax, which, as the contriver of ways and means very judiciously observed, would either destroy the dogs, or bring in money. Perhaps it might be proper to lay some such tax upon authors, only the payment must be lessened in proportion as the animal, upon which it is raised, is less necessary; for many a man that would pay for his dog, will dismiss his dedicatory. Perhaps if every one who employed or harboured an author, was assessed a groat a-year, it would sufficiently lessen the nuisance without destroying the species.

But no great alteration is to be attempted rashly. We must consider how the authors, which this tax shall exclude from their trade,

are to be employed. The nets used in the *her-ring-fishery* can furnish work but for few, and not many can be employed as labourers at the foundation of the *new bridge*. There must, therefore, be some other scheme formed for their accommodation, which the present state of affairs may easily supply. It is well known, that great efforts have been lately made to man the fleet, and augment the army, and loud complaints are made of useful hands forced away from their families into the service of the crown. This offensive exertion of power may be easily avoided, by opening a few houses for the entertainment of discarded authors, who would enter into the service with great alacrity, as most of them are zealous friends of every present government; many of them are men of able bodies and strong limbs, qualified at least as well for the *musket* as the *pen*; they are, perhaps, at present a little emaciated and enfeebled, but would soon recover their strength and flesh with good quarters and present pay.

There are some reasons for which they may seem particularly qualified for a military life. They are used to suffer want of every kind; they are accustomed to obey the word of command from their patrons and their booksellers; they have always passed a life of hazard and adventure, uncertain what may be their state on the next day; and, what is of yet more importance, they have long made their minds familiar to danger, by descriptions of bloody battles, daring undertakings, and wonderful escapes. They have their memories stored with all the stratagems of war, and have over and over practised in their closets the expedients of distress, the exultation of triumph, and the resignation of heroes, sentenced to destruction.

Some indeed there are, who, by often changing sides in controversy, may give just suspicion of

their fidelity, and whom I should think likely to desert for the pleasure of desertion, or for a farthing a month advanced in their pay. Of these men I know not what use can be made, for they can never be trusted, but with shackles on their legs. There are others whom long depression, under supercilious patrons, has so humbled and crushed, that they will never have steadiness to keep their ranks. But for these men there may be found fifes and drums, and they will be well enough pleased to inflame others to battle, if they are not obliged to fight themselves.

It is more difficult to know what can be done with the *ladies of the pen*, of whom this age has produced greater numbers than any former time. It is indeed common for women to follow the camp, but no prudent general will allow them in such numbers as the breed of authoresses would furnish. Authoresses are seldom famous for clean linen, therefore they cannot make laundresses; they are rarely skilful at their needle, and cannot mend a soldier's shirt; they will make bad sutlers, being not much accustomed to eat. I must therefore propose, that they shall form a regiment of themselves, and garrison the town which is supposed to be in most danger of a French invasion. They will probably have no enemies to encounter; but, if they are once shut up together, they will soon disencumber the public by tearing out the eyes of one another.

The great art of life, is to play for much, and to stake little; which rule I have kept in view through this whole project; for, if our authors and authoresses defeat our enemies, we shall obtain all the usual advantages of victory; and, if they should be destroyed in war, we shall lose only those who had wearied the public, and whom, whatever be their fate, nobody will miss.

\* \*

## PREFACE

TO THE

## LITERARY MAGAZINE, 1756.

### TO THE PUBLIC.

THERE are some practices which custom and prejudice have so unhappily influenced, that to observe or neglect them is equally censurable. The promises made by the undertakers of any new design, every man thinks himself at liberty

to deride, and yet every man expects, and expects with reason, that he who solicits the public attention should give some account of his pretensions.

We are about to exhibit to our countrymen a new Monthly Collection, to which the well deserved popularity of the first undertaking or

this kind, has now made it almost necessary to prefix the name of Magazine. There are already many such periodical compilations, of which we do not envy the reception, nor shall dispute the excellence. If the nature of things would allow us to indulge our wishes, we should desire to advance our own interest without lessening that of any other, and to excite the curiosity of the vacant, rather than withdraw that which other writers have already engaged.

Our design is to give the history, political and literary, of every month, and our pamphlets must consist, like other collections, of many articles unconnected and independent on each other.

The chief political object of an Englishman's attention must be the great council of the nation, and we shall therefore register all public proceedings with particular care. We shall not attempt to give any regular series of debates, or to amuse our readers with senatorial rhetoric. The speeches inserted in other papers have been long known to be fictitious, and produced sometimes by men who never heard the debate, nor had any authentic information. We have no design to impose thus grossly on our readers, and shall therefore give the naked arguments used in the discussion of every question, and add, when they can be obtained, the names of the speakers.

As the proceedings in parliament are unintelligible without a knowledge of the facts to which they relate, and of the state of the nations to which they extend their influence, we shall exhibit monthly a view, though contracted yet distinct, of foreign affairs, and lay open the designs and interests of those nations which are considered by English either as friends or enemies.

Of transactions in our own country curiosity will demand a more particular account, and we shall record every remarkable event, extraordinary casualty, uncommon performance, or striking novelty, and shall apply our care to the discovery of truth, with very little reliance on the daily historians.

The lists of births, marriages, deaths, and burials will be so drawn up, that we hope very few omissions or mistakes will be found, though some must be expected to happen in so great a variety, where there is neither leisure nor opportunity for minute information.

It is intended that lists shall be given of all the officers and persons in public employment; and that all the alterations shall be noted as they happen, by which our list will be a kind of Court Register always complete.

The literary history necessarily contains an account of the labours of the learned, in which whether we shall show much judgment or sagacity, must be left to our readers to determine; we can promise only justness and candour. It is not to be expected that we can insert extensive extracts or critical examinations of all the writings which this age of writers may offer to our notice. A few only will deserve the distinction of criticism, and a few only will obtain it. We shall try to select the best and most important pieces, and are not without hope, that we may sometimes influence the public voice, and hasten the popularity of a valuable work.

Our regard will not be confined to books; it will extend to all the productions of science. Any new calculation, a commodious instrument, the discovery of any property in nature, or any new method of bringing known properties into use or view, shall be diligently treasured up wherever found.

In a paper designed for general perusal, it will be necessary to dwell most upon things of general entertainment. The elegant trifles of literature, the wild strains of fancy, the pleasing amusements of harmless wit, shall therefore be considered as necessary to our collection. Nor shall we omit researches into antiquity, explanations of coins or inscriptions, disquisitions on controverted history, conjectures on doubtful geography, or any other on those petty works upon which learned ingenuity is sometimes employed.

To these accounts of temporary transactions and fugitive performances, we shall add some dissertations on things more permanent and stable; some inquiries into the history of nature, which has hitherto been treated as if mankind were afraid of exhausting it. There are in our own country many things and places worthy of note that are yet little known, and every day gives opportunities of new observations which are made and forgotten. We hope to find means of extending and perpetuating physiological discoveries, and with regard to this article, and all others, entreat the assistance of curious and candid correspondents.

We shall labour to attain as much exactness as can be expected in such variety, and shall give as much variety as can consist with reasonable exactness; for this purpose a selection has been made of men qualified for the different parts of the work, and each has the employment assigned him, which he is supposed most able to discharge.

A DISSERTATION  
UPON  
THE GREEK COMEDY,  
TRANSLATED FROM DRUMOY.

ADVERTISEMENT.

I CONCLUDE this work according to my promise, with an account of the Comic Theatre, and entreat the reader, whether a favourer or an enemy of the ancient drama, not to pass his censure upon the authors or upon me, without a regular perusal of this whole work. For, though it seems to be composed of pieces of which each may precede or follow without dependence upon the other, yet all the parts taken together, form a system which would be destroyed by their disjunction. Which way shall we come at the knowledge of the ancients' shows, but by comparing together all that is left of them? The value and necessity of this comparison determined me to publish all, or to publish nothing. Besides, the reflections on each piece, and on the general taste of antiquity, which, in my opinion, are not without importance, have a kind of obscure gradation, which I have carefully endeavoured to preserve, and of which the thread would be lost by him who should slightly glance sometimes upon one piece, and sometimes upon another. It is a structure which I have endeavoured to make as near to regularity as I could, and which must be seen in its full extent and in proper succession. The reader who skips here and there over the book, might make a hundred objections which are either anticipated or answered in those pieces which he might have overlooked. I have laid such stress upon the connection of the parts of this work, that I have declined to exhaust the subject, and have suppressed many of my notions, that I might leave the judicious reader to please himself by forming such conclusions as I supposed him like to discover as well as myself. I am not here attempting to prejudice the reader by an apology either for the ancients, or my own manner. I have not claimed a right of obliging others to determine, by my opinion, the degrees of esteem which I think due to the authors of the Athenian Stage; nor do I think that their reputation in the present time, ought to depend upon my mode of thinking or expressing my thoughts, which I leave entirely to the judgment of the public.

A DISSERTATION, &c.

I.

*Reasons why Aristophanes may be reviewed, without translating him entirely.*

I WAS in doubt a long time, whether I should meddle at all with the Greek comedy, both because the pieces which remain are very few, the licentiousness of Aristophanes, their author, is exorbitant, and it is very difficult to draw from the performances of a single poet, a just idea of Greek comedy. Besides, it seemed that tragedy was sufficient to employ all my attention, that I might give a complete representation of that kind of writing, which was most esteemed by the Athenians and the wiser Greeks,\* particularly by Socrates, who set no value upon comedy or comic actors. But the very name of that drama, which in polite ages, and above all others in our own, has been so much advanced, that it has become equal to tragedy, if not preferable, inclines me to think that I may be partly reproached with an imperfect work, if, after having gone as deep as I could into the nature of Greek tragedy, I did not at least sketch a draught of the comedy.

I then considered, that it was not wholly impossible to surmount, at least in part, the difficulties which had stopped me, and to go somewhat farther than the learned writers,† who have published in French some pieces of Aristophanes; not that I pretend to make large translations. The same reasons which have hindered with respect to the more noble parts of the Greek drama, operate with double force upon my present subject. Though ridicule, which is the business of comedy, be not less uniform in all times, than the passions which are moved by tragic compositions; yet, if diversity of manners may sometimes disguise the passions themselves, how much greater change will be made in

\* There was a law which forbade any judge of the Areopagus to write comedy.

† Madame Dacier, M. Boivin.

jocularities! The truth is, that they are so much changed by the course of time, that pleasantry and ridicule become dull and flat much more easily than the pathetic becomes ridiculous.

That which is commonly known by the term jocular and comic, is nothing but a turn of expression, an airy phantom, that must be caught at a particular point. As we lose this point, we lose the jocularity, and find nothing but dulness in its place. A lucky sally, which has filled a company with laughter, will have no effect in print, because it is shown single and separate from the circumstances which gave it force. Many satirical jests, found in ancient books, have had the same fate; their spirit has evaporated by time, and has left nothing to us but insipidity. None but the most biting passages have preserved their points unblunted.

But, besides this objection, which extends universally to all translations of Aristophanes, and many allusions of which time has deprived us, there are loose expressions thrown out to the populace to raise laughter from corrupt passions, which are unworthy of the curiosity of decent readers, and which ought to rest eternally in proper obscurity. Not every thing in this infancy of comedy was excellent, at least it would not appear excellent at this distance of time, in comparison of compositions of the same kind, which lie before our eyes; and this is reason enough to save me the trouble of translating, and the reader that of perusing. As for that small number of writers who delight in those delicacies, they give themselves very little trouble about translations, except it be to find fault with them; and the majority of people of wit like comedies that may give them pleasure, without much trouble of attention, and are not much disposed to find beauties in that which requires long deductions to find it beautiful. If Helen had not appeared beautiful to the Greeks and Trojans but by force of argument, we had never been told of the Trojan war.

On the other side, Aristophanes is an author more considerable than one would imagine. The History of Greece could not pass over him when it comes to touch upon the people of Athens; this alone might procure him respect, even when he was not considered as a comic poet. But when his writings are taken into view, we find him the only author from whom may be drawn a just idea of the comedy of his age; and farther, we find in his pieces, that he often makes attacks upon the tragic writers, particularly upon the three chief, whose valuable remains we have had under examination; and what is yet worse, fell sometimes upon the state, and upon the gods themselves.

*The chief heads of this discourse.*

II. These considerations have determined me to follow, in my representation of this writer,

the same method which I have taken in several tragic pieces, which is, that of giving an exact analysis as far as the matter would allow, from which I deduce four important systems. First, Upon the nature of the comedy of that age, without omitting that of Menander.\* Secondly, Upon the vices and government of the Athenians. Thirdly, Upon the notion we ought to entertain of Aristophanes, with respect to Eschylus, Sophocles, and Euripides. Fourthly, Upon the jest which he makes upon the gods. These things will not be treated in order, as a regular discourse seems to require, but will arise sometimes separately, sometimes together, from the view of each particular comedy, and from the reflections which this free manner of writing will allow. I shall conclude with a short view of the whole, and so finish my design.

### *History of Comedy.*

III. I shall not repeat here what Madame Dacier, and so many others before her, have collected of all that can be known relating to the history of comedy. Its beginnings are as obscure as those of tragedy, and there is an appearance that we take these two words in a more extensive meaning; they had both the same original, that is, they began among the festivals of the vintage, and were not distinguished from one another but by a burlesque or serious chorus, which made all the soul and all the body. But, if we give these words a stricter sense, according

---

\* Menander, an Athenian, son of Diopythus and Registrata, was apparently the most eminent of the writers of the new comedy. He had been a scholar of Theophrastus: his passion for the women brought infamy upon him: he was squint-eyed, and very lively. Of the one hundred and eighty comedies, or, according to Suidas, the eighty which he composed, and which are all stated to be translated by Terence, we have now only a few fragments remaining. He flourished about the 115th Olympiad, 318 years before the Christian Era. He was drowned as he was bathing in the port of Piræus. I have told in another place, what is said of one Philemon, his antagonist, not so good a poet as himself, but one who often gained the prize. This Philemon was older than him, and was much in fashion in the time of Alexander the Great. He expressed all his wishes in two lines: "To have health, and fortune, and pleasure, and never to be in debt, is all I desire." He was very covetous, and was pictured with his fingers hooked, so that he set his comedies at a high price. He lived about a hundred years, some say a hundred and one. Many tales are told of his death; Valerius Maximus says, that he died with laughing at a little incident: seeing an ass eating his figs, he ordered his servant to drive her away; the man madeno great haste, and the ass eat them all. "Well done," says Philemon, "now give her some wine."—Apuleius and Quintilian placed this writer much below Menander, but gave him the second place.

to the notion which has since been formed, comedy was produced after tragedy, and was in many respects a sequel and imitation of the works of Eschylus. It is in reality nothing more than an action set before the sight by the same artifice of representation. Nothing is different but the object, which is merely ridicule. This original of true comedy will be easily admitted, if we take the word of Horace, who must have known better than us the true dates of dramatic works. This poet supports the system which I have endeavoured to establish in the second discourse\* so strongly as to amount to demonstrative proof.

Horace† expresses himself thus: "Thespis is said to have been the first inventor of a species of tragedy, in which he carried about in carts, players smeared with the dregs of wine, of whom some sung and others declaimed." This was the first attempt both of tragedy and comedy: for Thespis made use only of one speaker, without the least appearance of dialogue. "Eschylus afterwards exhibited them with more dignity. He placed them on a stage somewhat above the ground, covered their faces with masks, put buskins on their feet, dressed them in trailing robes, and made them speak in a more lofty style." Horace omits invention of dialogue, which we learn from Aristotle.‡ But, however, it may be well enough inferred from the following words of Horace; this completion is mentioned while he speaks of Eschylus, and therefore to Eschylus it must be ascribed: "Then first appeared the old comedy, with great success in its beginning." Thus we see that the Greek comedy arose after tragedy, and by consequence tragedy was its parent. It was formed in imitation of Eschylus, the inventor of the tragic drama; or, to go yet higher into antiquity, had its original from Homer, who was the guide of Eschylus. For, if we credit Aristotle,§ comedy had its birth from the Margites, a satirical poem of Homer, and tragedy from the Iliad and Odyssey. Thus the design and artifice of comedy were drawn from Homer and Eschylus. This will appear less surprising, since the ideas of the human mind are always gradual, and arts are seldom invented but by imitation. The first idea contains the seed of the second; this second, expanding itself, gives birth to a third; and so on. Such is the progress of the mind of man; it proceeds in its productions step by step, in the same manner as nature multiplies her works by imitating, or repeating her own act, when she seems most to run into variety. In this manner it was that comedy had its birth, its increase, its improvement, its perfection, and its diversity.

IV. But the question is, who was the happy author of that imitation, and that show, whether only one like Eschylus of tragedy, or whether they were several? for neither Horace, nor any before him, explained this.\* This poet only quotes three writers, who had reputation in the old comedy, Eupolis,† Cratinus,‡ and Aristophanes, of whom he says, "That they, and others who wrote in the same way, reprehended the faults of particular persons with excessive liberty." These are probably the poets of the greatest reputation, though they were not the first, and we know the names of many others.§ Among these three we may be sure that Aristophanes had the greatest character, since not only the king of Persia|| expressed a high esteem of him to the Grecian ambassadors, as of a man extremely useful to his country, and Plato¶ rated him so high as to say that the Graces resided in his bosom; but likewise because he is the only writer of whom any comedies have made their way down to us, through the confusion of times. There are not indeed any proofs that he was the inventor of comedy, properly so called, especially since he had not only predecessors who wrote in the same kind, but it is at

\* "The alterations which have been made in tragedy, were perceptible, and the authors of them unknown; but comedy has lain in obscurity, being not cultivated, like tragedy, from the time of its original; for it was long before the magistrates began to give comic choruses. It was first exhibited by actors who played voluntarily, without orders of the magistrates. From the time that it began to take some settled form, we know its authors, but are not informed who first used masks, added prologues, increased the numbers of the actors, and joined all the other things which now belong to it. The first that thought of forming comic fables were Epicharmus and Phormys, and consequently this manner came from Sicily: Crates was the first Athenian that adopted it, and forsook the practice of gross raillery that prevailed before." *Aristot.* ch. 5. Crates flourished in the 82nd Olympiad, 450 years before our era, twelve or thirteen years before Aristophanes.

† Eupolis was an Athenian; his death, which we shall mention presently, is represented differently by authors, who almost all agree that he was drowned. Elian adds an incident which deserves to be mentioned: he says (book x. Of Animals,) that one Augeas of Eleusis, made Eupolis a present of a fine mastiff, who was so faithful to his master as to worry to death a slave who was carrying away some of his comedies. He adds, that when the poet died at Egene, his dog staid by his tomb till he perished by grief and hunger.

‡ Cratinus of Athens, who was son of Calimedes, died at the age of ninety-seven. He composed twenty comedies, of which nine had the prize: he was a daring writer, but a cowardly warrior.

§ Hertelius has collected the sentences of fifty Greek poets of the different ages of comedy.

least a sign, that he had contributed more than any other to bring comedy to the perfection in which he left it. We shall, therefore, not inquire farther, whether regular comedy was the work of a single mind, which seems yet to be unsettled, or of several contemporaries, such as these which Horace quotes. We must distinguish three forms which comedy wore, in consequence of the genius of the writers, or of the laws of the magistrates, and the change of the government of many into that of few.

*The Old, Middle, and New Comedy.*

V. That comedy,\* which Horace calls the ancient, and which, according to his account, was after Eschylus, retained something of its original state, and of the licentiousness which it practised, while it was yet without regularity, and uttered loose jokes and abuse upon the passers-by from the cart of Thespis. Though it was now properly modelled, as might have been worthy of a great theatre and a numerous audience, and deserved the name of a regular comedy, it was not yet much nearer to decency. It was a representation of real actions, and exhibited the dress, the motions, and the air, as far as could be done in a mask, of any one who was thought proper to be sacrificed to public scorn. In a city so free, or to say better, so licentious as Athens was at that time, nobody was spared, not even the chief magistrate, nor the very judges, by whose voice comedies were allowed or prohibited. The insolence of those performances reached to open impiety, and sport was made equally with men and gods.† These are the features by which the greatest part of the compositions of Aristophanes will be known. In which it may be particularly observed, that not the least appearance of praise will be found, and therefore certainly no trace of flattery or servility.

This licentiousness of the poets, to which in some sort Socrates fell a sacrifice, at last was restrained by a law. For the government, which was before shared by all the inhabitants, was now confined to a settled number of citizens. It was ordered that no man's name should be mentioned on the stage; but poetical malignity was not long in finding the secret of defeating the purpose of the law, and of making ample compensation for the restraint laid upon authors, by the necessity of inventing false names. They set themselves to work upon known and real characters, so that they had now the advantage of giving a more exquisite gratification to the vanity of poets, and the mal-

ice of spectators. One had the refined pleasure of setting others to guess, and the other that of guessing right by naming the masks. When pictures are so like that the name is not wanted, nobody inscribes it. The consequence of the law, therefore, was nothing more than to make that done with delicacy, which was done grossly before; and the art, which was expected would be confined within the limits of duty, was only partly transgressed with more ingenuity. Of this Aristophanes, who was comprehended in this law, gives us good examples in some of his poems. Such was that which was afterwards called the middle comedy.

The new comedy, or that which followed, was again an excellent refinement, prescribed by the magistrates, who, as they had before forbid the use of real names, forbade afterwards real subjects, and the train of choruses\* too much given to abuse; so that the poets saw themselves reduced to the necessity of bringing imaginary names and subjects upon the stage, which at once purified and enriched the theatre; for comedy from that time was no longer a fury armed with torches, but a pleasing and innocent mirror of human life.

Chacun peint avec art dans ce nouveau miroir  
S'y vit avec plaisir, ou crut ne s'y pas voir !  
L'avare des premiers rit du tableau fidèle  
D'un avare souvent tracé sous son modèle ;  
Et mille fois un fat finement exprimé  
Méconnut le portrait sur lui-même formé.†

The comedy of Menander and Terence is, in propriety of speech, the fine comedy. I do not repeat all this after so many writers, but just to recall it to memory, and to add to what they have said, something which they have omitted, a singular effect of public edicts appearing in the successive progress of the art. A naked history of poets and of poetry, such as has been often given, is a mere body without soul, unless it be enlivened with an account of the birth, progress, and perfection of the art, and of the causes by which they were produced.

*The Latin Comedy.*

VI. To omit nothing essential which concerns this part, we shall say a word of the Latin comedy. When the arts passed from Greece to Rome, comedy took its turn among the rest: but the Romans applied themselves only to the new species, without chorus or personal abuse; though perhaps they might have played some translations of the old or the middle comedy, for Pliny gives an account of one which was represented in his own time. But the Roman co-

\* This history of the three ages of comedy, and their different characters, is taken in part from the valuable fragments of Platonius.

† It will be shown how and in what sense this was allowed.

\* Perhaps the chorus was forbid in the middle age of the comedy. Platonius seems to say so.

† Despreaux *Art. Poet.* chant 8.

medy, which was modelled upon the last species of the Greek, hath nevertheless its different ages, according as its authors were rough or polished. The pieces of Livius Andronicus,\* more ancient and less refined than those of the writers who learned the art from him, may be said to compose the first age, or the old Roman comedy and tragedy. To him you must join Nevius his contemporary, and Ennius, who lived some years after him. The second age comprises Pacuvius, Cecilius, Accius, and Plautus, unless it shall be thought better to reckon Plautus with Terence, to make the third and highest age of the Latin comedy, which may properly be called the new comedy, especially with regard to Terence, who was the friend of Lilius, and the faithful copier of Menander.

But the Romans, without troubling themselves with this order of succession, distinguished their comedies by the dresses† of the players. The robe, called *Prætexta*, with large borders of purple, being the formal dress of magistrates in their dignity and in the exercises of their office, the actors who had this dress gave its name to the comedy. This is the same with that called *Trabeata*,‡ from *Trabea*, the dress of the consuls in peace, and the generals in triumph. The second species introduced the senators not in great offices, but as private men; this was called *Togata*, from *Toga*. The last species was named *Tabernaria*, from the tunic, or the common dress of the people, or rather from the mean houses which were painted on the scene. There is no need of mentioning the farces which took their name and original from Atella, an ancient town of Campania in Italy, because they differed from the low comedy only by greater licentiousness; nor of those which were called *Palliatae*, from the Greek, a cloak, in which the Greek characters were dressed upon the Roman stage, because that habit only distinguished the nation, not the dignity or character, like those which have been mentioned before. To say truth, these are but trifling distinctions; for, as we shall show in the following pages, comedy may be more usefully and judiciously distinguished by the general nature of its subjects. As to the Romans, whether they had or had not, reason for these names, they have left us so little upon the subject which is come down to us, that we need not trouble ourselves with a distinction which affords us no solid satisfaction. Plautus and Terence, the only authors of whom we are in possession, give us a fuller notion of the real nature of their comedy, with respect at least to their own times,

than can be received from names and terms, from which we have no real exemplification.

*The Greek Comedy is reduced only to Aristophanes.*

VII. Not to go too far out of our way, let us return to Aristophanes, the only poet in whom we can now find the Greek comedy. He is the single writer whom the violence of time has in some degree spared, after having buried in darkness, and almost in forgetfulness, so many great men, of whom we have nothing but the names and a few fragments, and such slight memorials as are scarcely sufficient to defend them against the enemies of the honour of antiquity; yet these memorials are like the last glimmer of the setting sun, which scarcely affords us a weak and fading light: yet from this glimmer we must endeavour to collect rays of sufficient strength to form a picture of the Greek comedy, approaching as near as possible to the truth.

Of the personal character of Aristophanes little is known; what account we can give of it must therefore be had from his comedies. It can scarcely be said with certainty of what country he was: the invectives of his enemies so often called in question his qualification as a citizen, that they have made it doubtful. Some said, he was of Rhodes, others of Egena, a little island in the neighbourhood, and all agreed that he was a stranger. As to himself, he said that he was the son of Philip, and born in the Cydathenian quarter; but he confessed that some of his fortune was in Egena, which was probably the original seat of his family. He was, however, formally declared a citizen of Athens, upon evidence, whether good or bad, upon a decisive judgment, and this for having made his judges merry by an application of a saying of Telemachus,\* of which this is the sense: "I am, as my mother tells me, the son of Philip; for my own part, I know little of the matter, for what child knows his own father?" This piece of merriment did him as much good as Archias received from the oration of Cicero,† who said that that poet was a Roman citizen. An honour which, if he had not inherited by birth, he deserved for his genius.

Aristophanes‡ flourished in the age of the great men of Greece, particularly of Socrates and Euripides, both of whom he outlived. He made a great figure during the whole Peloponnesian war, not merely as a comic poet by whom the people were diverted, but as the censor of the government, as a man kept in pay by the state to reform it, and almost to act the part of the arbitrator of the public. A particular account of his

comedies will best let us into his personal character as a poet, and into the nature of his genius, which is what we are most interested to know. It will, however, not be amiss to prepossess our readers a little by the judgments that have been passed upon him by the critics of our own time, without forgetting one of the ancients that deserves great respect.

*Aristophanes censured and praised.*

VIII. "Aristophanes," says Father Rapin, "is not exact in the contrivance of his fables; his fictions are not probable; he brings real characters upon the stage too coarsely and too openly. Socrates, whom he ridicules so much in his plays, had a more delicate turn of burlesque than himself, and had his merriment without his impudence. It is true, that Aristophanes wrote amidst the confusion and licentiousness of the old comedy, and he was well acquainted with the humour of the Athenians, to whom uncommon merit always gave disgust, and therefore he made the eminent men of his time the subject of his merriment. But the too great desire which he had to delight the people by exposing worthy characters upon the stage, made him, at the same time, an unworthy man; and the turn of his genius to ridicule was disfigured and corrupted by the indelicacy and outrageousness of his manners. After all, his pleasantry consists chiefly in new-coined puffy language. The dish of twenty-six syllables, which he gives in his last scene of his 'Female Orators,' would please few tastes in our days. His language is sometimes obscure, perplexed, and vulgar, and his frequent play with words, his oppositions of contradictory terms, his mixture of tragic and comic, of serious and burlesque, are all flat; and his jocularity, if you examine it to the bottom, is all false. Menander is diverting in a more elegant manner; his style is pure, clear, elevated, and natural; he persuades like an orator, and instructs like a philosopher; and if we may venture to judge upon the fragments which remain, it appears that his pictures of civil life are pleasing, that he makes every one speak according to his character, that every man may apply his pictures of life to himself, because he always follows nature, and feels for the personages which he brings upon the stage. To conclude: Plutarch, in his comparison of these authors, says, that the Muse of Aristophanes is an abandoned prostitute, and that of Menander a modest woman."

It is evident that this whole character is taken from Plutarch. Let us now go on with this remark of father Rapin, since we have already spoken of the Latin comedy, of which he gives us a description.

"With respect to the two Latin comic poets, Plautus is ingenious in his designs, happy in his conceptions, and fruitful of invention. He has,

however, according to Horace, some low jocularities, and those smart sayings, which made the vulgar laugh, made him be pitied by men of higher taste. It is true that some of his jests are extremely good, but others likewise are very bad. To this every man is exposed who is too much determined to make sallies of merriment; they endeavour to raise that laughter by hyperboles, which would not arise by a just representation of things. Plautus is not quite so regular as Terence in the scheme of his designs, or in the distribution of his acts, but he is more simple in his plot; for the fables of Terence are commonly complex, as may be seen in his *Andria*, which contains two amours. It was imputed as a fault to Terence, that, to bring more action upon the stage, he made one Latin comedy out of two Greek; but then Terence unravels his plot more naturally than Plautus, which Plautus did more naturally than Aristophanes; and though Cæsar calls Terence but one half of Menander, because, though he had softness and delicacy, there was in him some want of sprightliness and strength; yet he has written in a manner so natural and so judicious, that though he was then only a copy, he is now an original. No author has ever had a more exact sense of pure nature. Of Cælius, since we have only a few fragments, I shall say nothing. All that we know of him is told us by Varrus, that he was happy in the choice of subjects."

Rapin omits many others for the same reason, that we have not enough of their works to qualify us for judges. While we are upon this subject, it will perhaps not displease the reader to see what that critic's opinion is of Lopes de Vega and Moliere. It will appear, that with respect to Lopes de Vega, he is rather too profuse of praise: that in speaking of Moliere, he is too parsimonious. This piece will, however, be of use to our design, when we shall examine to the bottom what it is that ought to make the character of comedy.

"No man has ever had a greater genius for comedy than Lopes de Vega the Spaniard. He had a fertility of wit, joined with great beauty of conception, and a wonderful readiness of composition; for he has written more than three hundred comedies. His name alone gave reputation to his pieces; for his reputation was so well established, that a work which came from his hands, was sure to claim the approbation of the public. He had a mind too extensive to be subjected to rules, or restrained by limits. For that reason he gave himself up to his own genius, on which he could always depend with confidence. When he wrote, he consulted no other laws than the taste of his auditors, and regulated his manner more by the success of his work than by the rules of reason. Thus he discarded all scruples of unity, and all the

superstitions of probability." (This is certainly not said with a design to praise him, and must be connected with that which immediately follows.) "But as for the most, part he endeavours at too much jocularly, and carries ridicule to too much refinement; his conceptions are often rather happy than just, and rather wild than natural; for, by subtilizing merriment too far, it becomes too nice to be true, and his beauties lose their power of striking by being too delicate and acute.

"Among us, nobody has carried ridicule in comedy farther than Moliere. Our ancient comic writers brought no characters higher than servants, to make sport upon the theatre; but we are diverted upon the theatre of Moliere by marquises and people of quality. Others have exhibited in comedy no species of life above that of a citizen; but Moliere shows us all Paris, and the court. He is the only man amongst us, who has laid open those features of nature by which he is exactly marked, and may be accurately known. The beauties of his pictures are so natural, that they are felt by persons of the least discernment, and his power of pleasantry received half its force from his power of copying. His Misanthrope is, in my opinion, the most complete, and likewise the most singular character that has ever appeared upon the stage: but the disposition of his comedies is always defective some way or another. This is all which we can observe in general upon comedy."

Such are the thoughts of one of the most refined judges of works of genius, from which, though they are not all oraculous, some advantages may be drawn, as they always make some approaches to truth.

Madame Dacier,\* having her mind full of the merit of Aristophanes, expresses herself in this manner: "No man had ever more discernment than he, in finding out the ridiculous, or a more ingenious manner of showing it to others. His remarks are natural and easy, and, what very rarely can be found, with great copiousness he has great delicacy. To say all at once, the attic wit, of which the ancients made such boast, appears more in Aristophanes than in any other that I know of in antiquity. But what is most of all to be admired in him is, that he is always so much master of the subject before him, that, without doing any violence to himself, he finds a way to introduce naturally things which at first appeared most distant from his purpose; and even the most quick and unexpected of his desultory sallies appear the necessary consequence of the foregoing incidents. This is that art which sets the dialogues of Plato above imitation, which we must consider as so

many dramatic pieces, which are equally entertaining by the action and by the dialogue. The style of Aristophanes is no less pleasing than his fancy; for, besides its clearness, its vigour, and its sweetness, there is in it a certain harmony so delightful to the ear, that there is no pleasure equal to that of reading it. When he applies himself to vulgar mediocrity of style, he descends without meanness; when he attempts the sublime, he is elevated without obscurity; and no man has ever had the art of blending all the different kinds of writing so equally together. After having studied all that is left us of Grecian learning, if we have not read Aristophanes, we cannot yet know all the charms and beauties of that language."

*Plutarch's sentiment upon Aristophanes and Menander.*

IX. This is a pompous eulogium: but let us suspend our opinion, and hear that of Plutarch, who, being an ancient, well deserves our attention, at least after we have heard the moderns before him. This is then the sum of his judgment concerning Aristophanes and Menander. To Menander he gives the preference, without allowing much competition. He objects to Aristophanes, that he carries all his thoughts beyond nature, that he writes rather to the crowd than to men of character; that he affects a style obscure and licentious; tragical, pompous, and mean, sometimes serious, and sometimes ludicrous, even to puerility; that he makes none of his personages speak according to any distinct character, so that in his scenes the son cannot be known from the father, the citizen from the boor, the hero from the shopkeeper, or the divine from the serving-man. Whereas the diction of Menander, which is always uniform and pure, is very justly adapted to different characters, rising when it is necessary to vigorous and sprightly comedy, yet without transgressing the proper limits, or losing sight of nature, in which Menander, says Plutarch, has attained a perfection to which no other writer has arrived. For what man besides himself has ever found the art of making a diction equally suitable to women and children, to old and young, to divinities and heroes? Now Menander has found this happy secret, in the equality and flexibility of his diction, which, though always the same, is nevertheless different upon different occasions; like a current of clear water (to keep closely to the thoughts of Plutarch), which running through banks differently turned, complies with all their turns backward and forward, without changing any thing of its nature or its purity. Plutarch mentions it as a part of the merit of Menander, that he began very young, and was stopped only by old age, at a time when he would have produced the greatest wonders, if death had not prevented him.

\* Preface to Plantus. Paris, 1631.

This, joined to a reflection, which he makes as he returns to Aristophanes, shows that Aristophanes continued a long time to display his powers: for his poetry, says Plutarch, is a strum-pet that affects sometimes the airs of a prude, but whose impudence cannot be forgiven by the people, and whose affected modesty is despised by men of decency. Menander, on the contrary, always shows himself a man agreeable and witty, a companion desirable upon the stage, at table, and in gay assemblies; an extract of all the treasures of Greece, who deserves always to be read, and always to please. His irresistible power of persuasion, and the reputation which he has had, of being the best master of language of Greece, sufficiently show the delightfulness of his style. Upon this article of Menander, Plutarch does not know how to make an end; he says, that he is the delight of philosophers fatigued with study; that they use his works as a meadow enamelled with flowers, where purer air gratifies the sense; that notwithstanding the powers of the other comic poets of Athens, Menander has always been considered as possessing a salt peculiar to himself, drawn from the same waters that gave birth to Venus. That on the contrary, the salt of Aristophanes is bitter, keen, coarse, and corrosive; that one cannot tell whether his dexterity, which has been so much boasted, consists not more in the characters than in the expression, for he is charged with playing often upon words, with affecting antithetical allusions; that he has spoiled the copies which he endeavoured to take after nature; that artifice in his plays is wickedness, and simplicity, brutishness; that his jocularly ought to raise hisses rather than laughter; that his amours have more impudence than gaiety; and that he has not so much written for men of understanding, as for minds blackened with envy and corrupted with debauchery.

*The justification of Aristophanes.*

X. After such a character there seems no need of going further; and one would think that it would be better to bury for ever the memory of so hateful a writer, that makes us so poor a recompense for the loss of Menander, who cannot be recalled. But without showing any mercy to the indecent or malicious sallies of Aristophanes, any more than to Plantus his imitator, or at least the inheritor of his genius, may it not be allowed us to do, with respect to him, what, if I mistake not, Lucretius\* did to Ennius, from whose muddy verses he gathered jewels? *Enni de stercore gemmas.*

Besides, we must not believe that Plutarch, who lived more than four ages after Menander,

and more than five after Aristophanes, has passed so exact a judgment upon both, that it may be fit to re-examine it. Plato, the contemporary of Aristophanes, thought very differently, at least of his genius; for, in his piece called "The Entertainment," he gives that poet a distinguished place, and makes him speak, according to his character, with Socrates himself; from which, by the way, it is apparent that this dialogue of Plato was composed before the time that Aristophanes wrote his "Clouds" against Socrates. Plato is likewise said to have sent a copy of Aristophanes to Dionysius the tyrant, with advice to read it diligently, if he would attain a complete judgment of the state of the Athenian republic.

Many other scholars have thought that they might depart somewhat from the opinion of Plutarch. Frischlinus, for example, one of the commentators upon Aristophanes, though he justly allows his taste to be less pure than that of Menander, has yet undertaken his defence against the outrageous censure of the ancient critic. In the first place, he condemns without mercy his ribaldry and obscenity. But this part, so worthy of contempt, and written only for the lower people, according to the remark of Boivin, bad as it is, after all is not the chief part which is left of Aristophanes. I will not say with Frischlinus, that Plutarch seems in this to contradict himself, and in reality commends the poet when he accuses him of having adapted his language to the stage; by the stage, in this place, he meant the theatre of Farces, on which low mirth and buffoonery were exhibited. This plea of Frischlinus is a mere cavil; and though the poet had obtained his end, which was to divert a corrupted populace, he would not have been less a bad man, nor less a despicable poet, notwithstanding the excuse of his defender. To be able in the highest degree to divert fools and libertines, will not make a poet: it is not, therefore, by this defence that we must justify the character of Aristophanes. The depraved taste of the crowd, who once drove away Cratinus and his company, because the scenes had not low buffoonery enough for their taste, will not justify Aristophanes, since Menander found a way of changing the taste by giving a sort of comedy, not indeed so modest as Plutarch represents it, but less licentious than before. Nor is Aristophanes better justified by the reason which he himself offers, when he says, that he exhibited debauchery upon the stage, not to corrupt the morals, but to mend them. The sight of gross faults is rather a poison than a remedy.

The apologist has forgot one reason, which appears to me to be essential to a just account. As far as we can judge by appearance, Plutarch had in his hands all the plays of Aristophanes, which were at least fifty in number. In these he saw more licentiousness than has come to our hands,

\* Brumoy has mistaken Lucretius for Virgil.

though in the eleven that are still remaining, there is much more than could be wished.

Plutarch censures him in the second place for playing upon words; and against this charge Frischlinus defends him with less skill. It is impossible to exemplify this in French. But after all, this part is so little, that it deserved not so severe a reprehension, especially since amongst those sayings, there are some so mischievously malignant, that they became proverbial, at least by the sting of their malice, if not by the delicacy of their wit. One example will be sufficient: speaking of the tax-gatherers, or the excisemen of Athens, he crushes them at once by observing, *non quod essent rapinæ sed lætæ*. The word *lætæ* signified *walking spirils*, which, according to the vulgar notion, devoured men; this makes the spirit of the sarcasm against the tax-gatherers. This cannot be rendered in our language; but if any thing as good had been said in France on the like occasion, it would have lasted too long; and like many other sayings amongst us been too well received. The best is, that Plutarch himself confesses that it was extremely applauded.

The third charge is, a mixture of tragic and comic style. This accusation is certainly true; Aristophanes often gets into the buskin; but we must examine upon what occasion. He does not take upon him the character of a tragic writer; but, having remarked that his trick of parody was always well received by a people who liked to laugh at that for which they had been just weeping, he is eternally using the same craft; and there is scarcely any tragedy or striking passages known by memory by the Athenians which he does not turn into merriment, by throwing over it a dress of ridicule and burlesque, which is done sometimes by changing or transposing the words, and sometimes by an unexpected application of the whole sentence. These are the shreds of tragedy, in which he arrays the comic muse, to make her still more comic. Cratinus had before done the same thing; and we know that he made a comedy called "Ulysses," to burlesque Homer and his Odyssey; which shows, that the wits and poets are, with respect to one another, much the same at all times, and that it was at Athens as here. I will prove this system by facts, particularly with respect to the merriment of Aristophanes upon our three celebrated tragedians. This being the case, the mingled style of Aristophanes will, perhaps, not deserve so much censure as Plutarch has vented. We have no need of the Travesty of Virgil, nor the parodies of our own time, nor of the Lutrin of Boileau, to show us that this medley may have its merit upon particular occasions.

The same may be said in general of his obscenity, his meanness, and his high flights, and

of all the seeming inequality of style, which puts Plutarch in a rage. These censures can never be just upon a poet, whose style has always been allowed to be perfectly Attic, and of an Atticism which made them extremely delightful to the lovers of the Athenian taste. Plutarch, perhaps, rather means to blame the chorusses of which the language is sometimes elevated, sometimes burlesque, always very poetical, and therefore in appearance not suitable to comedy. But the chorus which had been borrowed from tragedy, was then all the fashion, particularly for pieces of satire, and Aristophanes admitted them like the other poets of the old, and perhaps of the middle comedy; whereas Menander suppressed them, not so much in compliance with his own judgment, as in obedience to the public edicts. It is not, therefore, this mixture of tragic and comic that will place Aristophanes below Menander.

The fifth charge is, that he kept no distinction of character; that, for example, he makes women speak like orators, and orators like slaves; but it appears by the characters which he ridicules, that this objection falls of itself. It is sufficient to say, that a poet who painted, not imaginary characters, but real persons, men well known, citizens whom he called by their names, and showed in dresses like their own, and masks resembling their faces, whom he branded in the sight of a whole city, extremely haughty and full of derision; it is sufficient to say, that such a poet could never be supposed to miss his characters. The applause, which his licentiousness produced, is too good a justification; besides, if he had not succeeded, he exposed himself to the fate of Eupolis, who in a comedy called "The Drowned Man," having imprudently pulled to pieces particular persons more powerful than himself, was laid hold of, and drowned more effectually than those he had drowned upon the open stage.

The condemnation of the poignancy of Aristophanes, as having too much acrimony, is better founded. Such was the turn of a species of comedy, in which all licentiousness was allowed: in a nation which made every thing a subject of laughter, in its jealousy of immoderate liberty, and its enmity to all appearance of rule and superiority; for the genius of independency naturally produces a kind of satire more keen and delicate, as may be easily observed in most of the inhabitants of islands. If we do not say with Longinus, that a popular government kindles eloquence, and that a lawful monarchy stifles it; at least it is easy to discover by the event, that eloquence in different governments takes a different appearance. In republics it is more sprightly and violent, and in monarchies more insinuating and soft. The same thing may be said of ridicule; it follows the cast of genius, as genius follows that of government.

Thus the republican raillery, particularly of the age which we are now considering, must have been rougher than that of the age which followed it, for the same reason that Horace is more delicate, and Lucilius more pointed. A dish of satire was always a delicious treat to human malignity, but that dish was differently seasoned, as the manners were polished more or less. By polished manners, I mean that good-breeding, that art of reserve and self-restraint, which is the consequence of dependence. If one were to determine the preference due to one of those kinds of pleasantry of which both have their value, there would not need a moment's hesitation, every voice would join in favour of the softer, yet without contempt of that which is rough. Menander will, therefore, be preferred, but Aristophanes will not be despised, especially since he was the first who quitted that wild practice of satirizing at liberty right or wrong, and by a comedy of another cast made way for the manner of Menander, more agreeable yet, and less dangerous. There is yet another distinction to be made between the acrimony of the one, and the softness of the other; the works of the one are acrimonious, and of the other soft, because the one exhibited personal, and the other general characters; which leaves us still at liberty to examine, if these different designs might not be executed with equal delicacy.

We shall know this by a view of the particulars; in this place we say only that the reigning taste or the love of striking likenesses, might justify Aristophanes for having turned, as Plutarch says, art into malignity, simplicity into brutality, merriment into farce, and amour into impudence; if in any age a poet could be excused for painting public folly and vice in their true colours.

There is a motive of interest at the bottom which disposed Elian, Plutarch, and many others, to condemn this poet without appeal. Socrates, who is said to have been destroyed by a poetical attack, at the instigation of two wretches,\* has too many friends among good men, to have pardon granted for so horrid a crime. This has filled them with an implacable hatred against Aristophanes, which is mingled with the spirit of philosophy, a spirit, wherever it comes, more dangerous than any other. A common enemy will confess some good qualities in his adversary; but a philosopher, made partial by philosophy, is never at rest till he has totally destroyed him who has hurt the most tender part of his heart; that is, has disturbed him in his adherence to some character, which,

like that of Socrates, takes possession of the mind. The mind is the freest part of man, and the most tender of its liberties; possessions, life, and reputation, may be in another's power, but opinion is always independent. If any man can obtain that gentle influence, by which he ingratiate himself with the understanding, and makes a sect in a commonwealth, his followers will sacrifice themselves for him, and nobody will be pardoned that dares to attack him justly or unjustly, because that truth, real or imaginary, which he maintained, is now become an idol. Time will do nothing for the extinction of this hatred; it will be propagated from age to age; and there is no hope that Aristophanes will ever be treated with tenderness by the disciples of Plato, who made Socrates his hero. Every body else may, perhaps, confess, that Aristophanes, though in one instance a bad man, may nevertheless be a good poet; but distinctions, like these, will not be admitted by prejudice and passion, and one or other dictates all characters, whether good or bad.

As I add my own reasons, such as they are, for or against Aristophanes, to those of Frischlinus his defender, I must not omit one thing which he has forgot, and which, perhaps, without taking in the rest, put Plutarch out of humour, which is that perpetual farce which goes through all the comedies of Aristophanes, like the character of Harlequin on the Italian theatre. What kind of personages are clouds, frogs, wasps, and birds? Plutarch, used to a comic stage of a very different appearance, must have thought them strange things; and yet stranger must they appear to us who have a newer kind of comedy, with which the Greeks were unacquainted. This is what our poet may be charged with, and what may be proved beyond refutation. This charge comprises all the rest, and against this I shall not pretend to justify him. It would be of no use to say, that Aristophanes wrote for an age that required shows which filled the eye, and grotesque paintings in satirical performances; that the crowds of spectators, which sometimes neglected Cratinus to throng Aristophanes, obliged him more and more to comply with the ruling taste, lest he should lose the public favour by pictures more delicate and less striking; that, in a state, where it was considered as policy to lay open every thing that had the appearance of ambition, singularity, or knavery, comedy was become a haranguer, a reformer, and a public counsellor, from whom the people learned to take care of their most valuable interests; and that this comedy, in the attempt to lead and please the people, claimed a right to the strongest touches of eloquence, and had likewise the power of personal painting peculiar to herself. All these reasons, and many others, would disappear immediately, and my mouth would be stopped with

\* It is not certain, that Aristophanes did procure the death of Socrates; but, however, he is certainly criminal for having, in "The Clouds," accused him publicly of impiety.

a single word, with which every body would agree: my antagonist would tell me that such an age was to be pitied, and passing on from age to age, till he came to our own, he would conclude flatly, that we are the only possessors of common sense; a determination with which the French are too much reproached, and which overthrows all the prejudice in favour of antiquity. At the sight of so many happy touches, which one cannot help admiring in Aristophanes, a man might, perhaps, be inclined to lament that such a genius was thrown into an age of fools: but what age has been without them? And have not we ourselves reason to fear, lest posterity should judge of Moliere and his age, as we judge of Aristophanes? Menander altered the taste, and was applauded in Athens, but it was after Athens was changed. Terence imitated him at Rome, and obtained the preference over Plautus, though Cæsar called him but a demi-Menander, because he appears to want that spirit and vivacity which he calls the *vis comica*. We are now weary of the manner of Menander and Terence, and leave them for Moliere, who appears like a new star in a new course. Who can answer, that in such an interval of time as has passed between these four writers there will not arise another author, or another taste, that may bring Moliere, in his turn, into neglect? Without going further, our neighbours, the English, think he wants force and fire. Whether they are right, or not, is another question; all that I mean to advance is, that we are to fix it as a conclusion, that comic authors must grow obsolete with the modes of life, if we admit any one age, or any one climate, for the sovereign rule of taste. But let us talk with more exactness, and endeavour by an exact analysis to find out what there is in comedy, whether of Aristophanes and Plautus, of Menander and Terence, of Moliere and his rivals, which is never obsolete, and must please all ages and all nations.

*Remarkable difference between the state of Comedy and other works of genius, with regard to their duration.*

XI. I now speak particularly of comedy; for we must observe that between that and other works of literature, especially tragedy, there is an essential difference, which the enemies of antiquity will not understand, and which I shall endeavour palpably to show.

All works show the age in which they are produced: they carry its stamp upon them; the manners of the times are impressed by indelible marks. If it be allowed, that the best of past times were rude in comparison with ours, the cause of the ancients is decided against them; and the want of politeness, with which their works are charged in our days, must be generally confessed. History alone seems to claim

exemption from this accusation. Nobody will dare to say of Herodotus or Thucydides, of Livius or Tacitus, that which has been said without scruple of Homer and the ancient poets. The reason is, that history takes the nearest way to its purpose, and gives the characters and practices of nations, be they what they will; it has no dependance upon its subject, and offers nothing to examination, but the art of the narrative. A history of China well written, would please a Frenchman as well as one of France. It is otherwise with mere works of genius, they depend upon their subjects, and consequently upon the characters and practices of the times in which they were written; this at least is the light in which they are beheld. This rule of judgment is not equitable; for, as I have said over and over, all the orators and poets are painters, and merely painters. They exhibit nature as it is before them, influenced by the accidents of education, which, without changing it entirely, yet give it, in different ages and climates, a different appearance; but we make their success depend in a great degree upon their subject, that is, upon circumstances which we measure by the circumstances of our own days. According to this prejudice, oratory depends more upon its subject than history, and poetry yet more than oratory. Our times, therefore, show more regard to Herodotus and Suetonius, than to Demosthenes and Cicero, and more to all these than to Homer or Virgil. Of this prejudice, there are regular gradations; and to come back to the point which we have left, we show, for the same imperceptible reason, less regard to tragic poets than to others. The reason is, that the subjects of their paintings are more examined than the art. Thus comparing the "Achilles" and "Hippolytus" of Euripides, with those of Racine, we drive them off the stage, without considering that Racine's heroes will be driven off, in a future age, if the same rule of judgment be followed, and one time be measured by another.

Yet tragedy having the passions for its object, is not wholly exposed to the caprice of our taste, which would make our own manners the rule of human kind; for the passions of Grecian heroes are often dressed in external modes of appearance that disgust us, yet they break through the veil when they are strongly marked, as we cannot deny them to be in Eschylus, Sophocles, and Euripides. The essence then gets the better of the circumstance. The passions of Greece and France do not so much differ by the particular characters of particular ages, as they agree by the participations of that which belongs to the same passion in all ages. Our three tragic poets will, therefore, get clear by suffering only a little ridicule, which falls directly upon their times; but these times and themselves will be well recompensed by the admiration which their art will irresistibly enforce.

Comedy is in a more lamentable situation ; for, not only its object is the ridiculous, which, though in reality always the same, is so dependant on custom, as to change its appearance with time, and with place ; but the art of a comic writer is, to lay hold of that species of the ridiculous which will catch the spectators of the present hour, without regard to futurity. But though comedy has attained its end, and diverted the pit, for which it was written ; if it goes down to posterity, it is in a new world, where it is no longer known ; it becomes there quite a foreigner, because there are no longer the same originals, nor the same species of the ridiculous, nor the same spectators, but a set of merciless readers, who complain that they are tired with it, though it once filled Athens, Rome, or Paris, with merriment. This position is general, and comprises all poets and all ages. To say all at once, comedy is the slave of its subject, and of the reigning taste ; tragedy is not subject to the same degree of slavery, because the ends of the two species of poetry are different. For this reason, if we suppose that in all ages, there are critics who measure every thing by the same rule, it will follow, that if the comedy of Aristophanes become obsolete, that of Menander likewise, after having delighted Athens, and revived again at Rome, at last suffered by the force of time. The Muse of Moliere has almost made both of them forgotten, and would still be walking the stage, if the desire of novelty did not in time make us weary of that which we have too frequently admired.

Those who have endeavoured to render their judgment independent upon manners and customs, and of such men there have been always some, have not judged so severely either of times, or of writers ; they have discovered that a certain resemblance runs through all polished ages, which are alike in essential things, and differ only in external manners, which, if we except religion, are things of indifference ; that wherever there is genius, politeness, liberty, or plenty, there prevails an exact and delicate taste, which, however hard to be expressed, is felt by those that were born to feel it ; that Athens, the inventress of all the arts, the mother first of the Roman and then of general taste, did not consist of stupid savages ; that the Athenian and Augustan ages have always been considered as times that enjoyed a particular privilege of excellence, though we may distinguish the good authors from the bad, as in our own days, yet we ought to suspend the vehemence of criticism, and proceed with caution and timidity before we pass sentence upon times and writers, whose good taste has been universally applauded. This obvious consideration has disposed them to pause ; they have endeavoured to discover the original of taste, and have found that there is not only a stable and immutable beauty, as there

is a common understanding in all times and places, which is never obsolete ; but that there is another kind of beauty, such as we are now treating, which depends upon times and places, and is therefore changeable. Such is the imperfection of every thing below, that one mode of beauty is never found without a mixture of the other, and from these two blended together results what is called the taste of an age. I am now speaking of an age sprightly and polite, an age which leaves works for a long time behind it, an age which is imitated or criticised when revolutions have thrown it out of sight.

Upon this incontestable principle, which supposes a beauty universal and absolute, and a beauty likewise relative and particular, which are mingled through one work in very different proportions, it is easy to give an account of the contrary judgments passed on Aristophanes. If we consider him only with respect to the beauties, which, though they do not please us, delighted the Athenians, we shall condemn him at once, though even this sort of beauty may sometimes have its original in universal beauty carried to extravagance. Instead of commending him for being able to give merriment to the most refined nation of those days, we shall proceed to place that people, with all their atticism, in the rank of savages, whom we take upon us to degrade, because they have no other qualifications but innocence and plain understanding. But have not we likewise, amidst our more polished manners, beauties merely fashionable, which make part of our writings as of the writings of former times ; beauties of which our self-love now makes us fond, but which, perhaps, will disgust our grandsons ? Let us be more equitable, let us leave this relative beauty to its real value more or less in every age : or if we must pass judgment upon it, let us say that these touches in Aristophanes, Menander, and Moliere, were well struck off in their own time ; but that, comparing them with true beauty, that part of Aristophanes was a colouring too strong, that of Menander was too weak, and that of Moliere was a peculiar varnish formed of one and the other, which, without being an imitation, is itself inimitable, yet depending upon time, which will efface it by degrees, as our notions, which are every day changing, shall receive a sensible alteration. Much of this has already happened since the time of Moliere, who, if he was now to come again, must take a new road.

With respect to unalterable beauties, of which comedy admits much fewer than tragedy, when they are the subject of our consideration, we must not too easily set Aristophanes and Plautus below Menander and Terence. We may properly hesitate with Boileau, whether we shall prefer the French comedy to the Greek and Latin. Let us only give, like him, the great rule

for pleasing in all ages, and the key by which all the difficulties in passing judgment may be opened. This rule and this key are nothing else but the ultimate design of the comedy.

Etudiez la cour, et connoissez la ville :  
L'une et l'autre est toujours en modéles fertile.  
C'est par-là que Moliere illustrant ses écrits  
Peut-être de son art eût remporté le prix.  
Si moins ami du peuple en ses doctes peintures  
Il n'eût point fait souvent grimacer ses figures,  
Quitté pour le bouffon l'agréable et le fin,  
Et sans honte à Terence allié Tabarin.\*

In truth, Aristophanes and Plautus united buffoonery and delicacy in a greater degree than Moliere; and for this they may be blamed. That which then pleased at Athens, and at Rome, was a transitory beauty, which had not sufficient foundation in truth, and therefore the taste changed. But if we condemn those ages for this, what age shall we spare? Let us refer every thing to permanent and universal taste, and we shall find in Aristophanes at least as much to commend as censure.

*Tragedy more uniform than Comedy.*

XII. But before we go on to his works, it may be allowed to make some reflections upon tragedy and comedy. Tragedy, though different according to the difference of times and writers, is uniform in its nature, being founded upon the passions, which never change. With comedy it is otherwise. Whatever difference there is between Eschylus, Sophocles, and Euripides; between Corneille and Racine; between the French and the Greeks, it will not be found sufficient to constitute more than one species of tragedy.

The works of those great masters are, in some respects, like the sea-nymphs, of whom Ovid says, "That their faces were not the same, yet so much alike that they might be known to be sisters."

Facies non omnibus una,  
Nec diversa tamen, qualem decet esse sororum.

The reason is, that the same passions give action and animation to them all. With respect to the comedies of Aristophanes and Plautus, Menander and Terence, Moliere and his imitators, if we compare them one with another, we shall find something of a family likeness, but much less strongly marked, on account of the different appearance which ridicule and pleasantry take from the different manners of every age. They will not pass for sisters, but for very distant relations. The Muse of Aristophanes and Plautus, to speak of her with justice, is a bacchanal at least, whose malignant tongue is dipped in gall, or in poison dangerous

as that of the aspic or viper; but whose bursts of malice, and sallies of wit, often give a blow where it is not expected. The Muse of Terence, and consequently of Menander, is an artless and unpainted beauty, of easy gayety, whose features are rather delicate than striking, rather soft than strong, rather plain and modest than great and haughty, but always perfectly natural.

Ce n'est pas un portrait, une image semblable :  
C'est un fils, un amant, un père véritable.

The Muse of Moliere is not always plainly dressed, but takes airs of quality, and rises above her original condition, so as to attire herself gracefully in magnificent apparel. In her manners she mingles elegance with foolery, force with delicacy, and grandeur, or even haughtiness, with plainness and modesty. If sometimes, to please the people, she gives a loose to farce, it is only the gay folly of a moment, from which she immediately returns, and which lasts no longer than a slight intoxication. The first might be painted encircled with little satyrs, some grossly foolish, the others delicate, but all extremely licentious and malignant; monkeys always ready to laugh in your face, and to point out to indiscriminate ridicule, the good and the bad. The second may be shown encircled with geniuses full of softness and of candour, taught to please by nature alone, and whose honeyed dialect is so much the more insinuating as there is no temptation to distrust it. The last must be accompanied with the delicate laughter of the court, and that of the city somewhat more coarse, and neither the one nor the other can be separated from her. The Muse of Aristophanes and of Plautus can never be denied the honour of sprightliness, animation, and invention; nor that of Menander and Terence the praise of nature and of delicacy; to that of Moliere must be allowed the happy secret of uniting all the piquancy of the former, with a peculiar art which they did not know. Of these three sorts of merit, let us show to each the justice that is due. Let us in each separate the pure and the true from the false gold, without approving or condemning either the one or the other in the gross. If we must pronounce in general upon the taste of their writings, we must indisputably allow that Menander, Terence, and Moliere, will give most pleasure to a decent audience, and consequently that they approach nearer to the true beauty, and have less mixture of beauties purely relative, than Plautus and Aristophanes.

If we distinguish comedy by its subjects, we shall find three sorts among the Greeks, and as many among the Latins, all differently dressed; if we distinguish it by ages and authors, we shall again find three sorts; and we shall find three sorts a third time if we regard more closely the subject. As the ultimate and general

\* Boileau, Art. Poet. chant. 3.

rules of all these sorts of comedy are the same, it will, perhaps, be agreeable to our purpose to sketch them out before we give a full display of the last class. I can do nothing better on this occasion than transcribe the twenty-fifth reflection of Rapsin upon poetry in particular.

*General rules of Comedy.*

XIII. "Comedy," says he,\* "is a representation of common life: its end is to show the faults of particular characters on the stage, to correct the disorder of the people by the fear of ridicule. Thus ridicule is the essential part of a comedy. Ridicule may be in words or in things; it may be decent, or grotesque. To find what is ridiculous in every thing, is the gift merely of nature; for all the actions of life have their bright and their dark sides; something serious, and something merry. But Aristotle, who has given rules for drawing tears, has given none for raising laughter; for this is merely the work of nature, and must proceed from genius, with very little help from art or matter. The Spaniards have a turn to find the ridicule in things much more than we: and the Italians, who are natural comedians, have a better turn for expressing it; their language is more proper for it than ours, by an air of drollery which it can put on, and of which ours may become capable when it shall be brought nearer to perfection. In short, that agreeable turn, that gayety which yet maintains the delicacy of its character without falling into dulness or into buffoonery, that elegant raillery which is the flower of fine wit, is the qualification which comedy requires. We must, however, remember that the true artificial ridicule, which is required on the theatre, must be only a transcript of the ridicule which nature affords. Comedy is naturally written, when, being on the theatre, a man can fancy himself in a private family, or a particular part of the town, and meets with nothing but what he really meets with in the world: for it is no real comedy in which a man does not see his own picture, and find his own manners and those of the people among whom he lives. Menander succeeded only by this art among the Greeks: and the Romans, when they sat at Terence's comedies, imagined themselves in a private party; for they found nothing there which they had not been used to find in common company. The great art of comedy is to adhere to nature without deviation; to have general sentiments and expressions which all the world can understand; for the writer must keep it always in his mind, that the coarsest touches after nature will please more than the most delicate with which nature is inconsistent. However, low and mean words should never be allowed upon the

stage, if they are not supported with some kind of wit. Proverbs and vulgar smartnesses can never be suffered, unless they have something in them of nature and pleasantry. This is the universal principle of comedy; whatever is represented in this manner, must please, and nothing can ever please without it. It is by application to the study of nature alone that we arrive at probability, which is the only infallible guide to theatrical success: without this probability every thing is defective, and that which has it, is beautiful: he that follows this, can never go wrong; and the most common faults of comedy proceed from the neglect of propriety, and the precipitation of incidents. Care must likewise be taken that the hints made use of to introduce the incidents, are not too strong, that the spectator may enjoy the pleasure of finding out their meaning: but commonly the weak place in our comedy is the untying of the plot, in which we almost always fail, on account of the difficulty which there is in disentangling of what has been perplexed. To perplex an intrigue is easy, the imagination does it by itself; but it must be disentangled merely by the judgment, and is, therefore, seldom done happily: and he that reflects a very little, will find that most comedies are faulty by an unnatural catastrophe. It remains to be examined whether comedy will allow pictures larger than the life, that this strength of the strokes may make a deeper impression upon the mind of the spectators; that is, if a poet may make a covetous man more covetous, and a peevish man more impertinent and more troublesome than he really is. To which I answer, that this was the practice of Plautus, whose aim was to please the people; but that Terence, who wrote for gentlemen, confined himself within the compass of nature, and represented vice without addition or aggravation. However, these extravagant characters, such as the "Citizen turned Gentleman," and the "Hypochondriac Patient," of Moliere, have lately succeeded at court, where delicacy is carried so far; but every thing, even to provincial interludes, is well received if it has but merriment, for we had rather laugh than admire. These are the most important rules of comedy."

*Three sorts of Comedy.*

XIV. These rules, indeed, are common to the three kinds which I have in my mind; but it is necessary to distinguish each from the rest, which may be done by diversity of matter, which always makes some diversity of management. The old and middle comedy simply represented real adventures: in the same way some passages of history and of fable might form a class of comedies, which should resemble it without having its faults; such is the "Amphitryon." How many moral tales, how many adventures ancient and modern, how many little fables of

\* Reflexions sur la Poët. p. 154, Paris, 1684.

Æsop, of Phædrus, of Fontaine, or some other ancient poet, would make pretty exhibitions, if they were all made use of as materials by skilful hands? And have we not seen some like "Timon the Man Hater," that have been successful in this way? This sort chiefly regards the Italians. The ancient exhibition called a satire, because the satyrs played their part in it, of which we have no other instance than the "Cyclops" of Euripides, has, without doubt, given occasion to the pastoral comedies, for which we are chiefly indebted to Italy, and which are there more cultivated than in France. It is, however, a kind of exhibition that would have its charms, if it were touched with elegance and without meanness; it is the pastoral put into action. To conclude: the new comedy, invented by Menander, has produced the comedy properly so called in our times. This is that which has for its subject general pictures of common life, and feigned names and adventures, whether of the court or of the city. This third kind is incontestably the most noble, and has received the strongest sanction from custom. It is likewise the most difficult to perform, because it is merely the work of invention, in which the poet has no help from real passages, or persons, which the tragic poet always makes use of. Who knows but by deep thinking, another kind of comedy may be invented wholly different from the three which I have mentioned? such is the fruitfulness of comedy; but its course is already too wide for the discovery of new fields to be wished, and on ground where we are already so apt to stumble, nothing is so dangerous as novelty imperfectly understood. This is the rock on which men have often split in every kind of pursuit; to go no further, in that of grammar and language: it is better to endeavour after novelty in the manner of expressing common things, than to hunt for ideas out of the way, in which many a man loses himself. The ill success of that odd composition, Tragic Comedy, a monster wholly unknown to antiquity, sufficiently shows the danger of novelty in attempts like these.

*Whether Tragedy or Comedy be the harder to write.*

XV. To finish the parallel of the two dramas, a question may be revived equally common and important, which has been oftener proposed than well decided: it is, whether comedy or tragedy be most easy or difficult to be well executed. I shall not have the temerity to determine positively a question which so many great geniuses have been afraid to decide; but if it be allowed to every literary man to give his reason for and against a mere work of genius, considered without respect to its good or bad tendency, I shall in a few words give my opinion, drawn from the nature of the two works, and the qualifications

they demand. Horace\* proposes a question nearly of the same kind: "It has been inquired, whether a good poem be the work of art or nature: for my part, I do not see much to be done by art without genius, nor by genius without knowledge. The one is necessary to the other, and the success depends upon their co-operation." If we should endeavour to accommodate matters in imitation of this decision of Horace, it were easy to say at once, that supposing two geniuses equal, one tragic and the other comic, supposing the art likewise equal in each, one would be as easy or difficult as the other; but this, though satisfactory in the simple question put by Horace, will not be sufficient here. Nobody can doubt but genius and industry contribute their part to every thing valuable, and particularly to good poetry. But if genius and study were to be weighed one against the other, in order to discover which must contribute most to a good work, the question would become more curious, and, perhaps, very difficult of solution. Indeed, though nature must have a great part of the expense of poetry, yet no poetry lasts long that is not very correct: the balance, therefore, seems to incline in favour of correction. For is it not known that Virgil with less genius than Ovid, is yet valued more by men of exquisite judgment; or, without going so far, Boileau, the Horace of our time, who composed with so much labour, and asked Moliere where he found his rhyme so easily, has said, "If I write four words, I shall blot out three;" has not Boileau, by his polished lines, retouched and retouched a thousand times, gained the preference above the works of the same Moliere, which are so natural, and produced by so fruitful a genius! Horace was of that opinion, for when he is teaching the writers of his age the art of poetry, he tells them in plain terms, that Rome would excel in writing as in arms, if the poets were not afraid of the labour, patience, and time required to polish their pieces. He thought every poem was bad that had not been brought ten times back to the anvil, and required that a work should be kept nine years, as a child is nine months in the womb of its mother, to restrain that natural impatience which combines with sloth and self-love to disguise faults; so certain is it that correction is the touchstone of writing.

The question proposed comes back to the comparison which I have been making between genius and correction, since we are now engaged in inquiring whether there is more or less difficulty in writing tragedy or comedy: for as we must compare nature and study one with another, since they must both concur more or less to make a poet; so if we will compare the la-

\* Poet. v. 467.

hours of two different minds in different kinds of writing, we must, with regard to the authors, compare the force of genius, and with respect to the composition, the difficulties of the task.

The genius of the tragic and comic writer will be easily allowed to be remote from each other. Every performance, be what it will, requires a turn of mind which a man cannot confer upon himself: it is purely the gift of nature, which determines those who have it, to pursue, almost in spite of themselves, the taste which predominates in their minds. Pascal found in his childhood that he was a mathematician, and Vandyke that he was born a painter. Sometimes this internal direction of the mind does not make such evident discoveries of itself; but it is rare to find Corneilles who have lived long without knowing that they were poets. Corneille having once got some notion of his powers, tried a long time on all sides to know what particular direction he should take. He had first made an attempt in comedy, in an age when it was yet so gross in France that it could give no pleasure to polite persons. "Melite" was so well received when he dressed her out, that she gave rise to a new species of comedy and comedians. This success, which encouraged Corneille to pursue that sort of comedy of which he was the first inventor, left him no reason to imagine, that he was one day to produce those master-pieces of tragedy, which his muse displayed afterwards with so much splendour; and yet less did he imagine, that his comic pieces, which, for want of any that were preferable, were then very much in fashion, would be eclipsed by another genius\* formed upon the Greeks and Romans, and who would add to their excellences improvements of his own, and that this modish comedy, to which Corneille, as to his idol, dedicated his labours, would quickly be forgot. He wrote first "Medea," and afterwards "The Cid," and, by that prodigious flight of his genius he discovered, though late, that nature had formed him to run in no other course but that of Sophocles. Happy genius! that, without rule or imitation, could at once take so high a flight; having once, as I may say, made himself an eagle, he never afterwards quitted the path which he had worked out for himself, over the heads of the writers of his time: yet he retained some traces of the false taste which infected the whole nation; but even in this, he deserves our admiration, since in time he changed it completely by the reflections he made, and those he occasioned. In short, Corneille was born for tragedy, as Moliere for comedy. Moliere, indeed, knew his own genius sooner, and was not less happy in procuring applause, though it often happened to him as to Corneille,

"L'Ignorence et l'Erreur à ses naissantes pièces  
En habit de Marquis, en robes de Comtesses,  
Vinssent pour diffamer son chef-d'œuvre nouveau,  
Et secouer la tête à l'endroit le plus beau."

But, without taking any farther notice of the time at which either came to the knowledge of his own genius, let us suppose that the powers of tragedy and comedy were as equally shared between Moliere and Corneille, as they are different in their own nature, and then nothing more will remain than to compare the several difficulties of each composition, and to rate those difficulties together which are common to both.

It appears, first, that the tragic poet has in his subject an advantage over the comic, for he takes it from history; and his rival, at least in the more elevated and splendid comedy, is obliged to form it by his own invention. Now, it is not so easy as it might seem to find comic subjects capable of a new and pleasing form; but history is a source, if not inexhaustible, yet certainly so copious as never to leave the genius aground. It is true, that invention seems to have a wider field than history: real facts are limited in their number, but the facts which may be feigned have no end; but though, in this respect, invention may be allowed to have the advantage, is the difficulty of inventing to be accounted as nothing? To make a tragedy, is to get materials together, and to make use of them like a skilful architect; but to make a comedy, is to build like *Æsop* in the air. It is in vain to boast that the compass of invention is as wide as the extent of desire; every thing is limited, and the mind of man like every thing else. Besides, invention must be in conformity to nature; but distinct and remarkable characters are very rare in nature herself. Moliere has got hold on the principal touches of ridicule. If any man should bring characters less strong, he will be in danger of dulness. Where comedy is to be kept up by subordinate personages, it is in great danger. All the force of a picture must arise from the principal persons, and not from the multitude clustered up together. In the same manner, a comedy, to be good, must be supported by a single striking character, and not by under-parts.

But, on the contrary, tragic characters are without number, though of them the general outlines are limited; but dissimulation, jealousy, policy, ambition, desire of dominion, and other interests and passions, are various without end, and take a thousand different forms in different situations of history; so that as long as there is tragedy, there may be always novelty. Thus the jealous and dissembling Mithridates, so happily painted by Racine, will not stand in the way of a poet who shall attempt a jealous and dissembling Tiberius. The stormy violence of an Achilles will always leave room for the stormy violence of Alexander.

\* Moliere.

But the case is very different with avarice, trifling vanity, hypocrisy, and other vices, considered as ridiculous. It would be safer to double and treble all the tragedies of our greatest poets, and use all their subjects over and over, as has been done with *Cedipus* and *Sophonisba*, than to bring again upon the stage in five acts a *Miser*, a *Citizen turned Gentleman*, a *Tartuffe*, and other subjects sufficiently known. Not that these popular vices are less capable of diversification, or are less varied by different circumstances, than the vices and passions of heroes; but that if they were to be brought over again in comedies, they would be less distinct, less exact, less forcible, and, consequently, less applauded. Pleasantry and ridicule must be more strongly marked than heroism and pathos, which support themselves by their own force. Besides, though these two things of so different natures could support themselves equally in equal variety, which is very far from being the case; yet comedy, as it now stands, consists not in incidents, but in characters. Now it is by incidents only that characters are diversified, as well upon the stage of comedy, as upon the stage of life. Comedy, as *Moliere* has left it, resembles the pictures of manners drawn by the celebrated *La Bruyere*. Would any man after him venture to draw them over again, he would expose himself to the fate of those who have ventured to continue them. For instance, what could we add to his character of the *Absent Man*? Shall we put him in other circumstances? The principal strokes of absence of mind will always be the same; and there are only those striking touches which are fit for a comedy, of which the end is painting after nature, but with strength and sprightliness like the designs of *Callot*. If comedy were among us what it is in Spain, a kind of romance, consisting of many circumstances and intrigues, perplexed and disentangled, so as to surprise; if it was nearly the same with that which *Cornelle* practised in his time; if, like that of *Terence*, it went no farther than to draw the common portraits of simple nature, and show us fathers, sons, and rivals; notwithstanding the uniformity, which would always prevail, as in the plays of *Terence*, and probably in those of *Menander*, whom he imitated in his four first pieces, there would always be a resource found either in variety of incidents, like those of the *Spaniards*, or in the repetition of the same characters in the way of *Terence*: but the case is now very different, the public calls for new characters and nothing else. Multiplicity of accidents, and the laborious contrivance of an intrigue, are not now allowed to shelter a weak genius that would find great conveniences in that way of writing. Nor does it suit the taste of comedy, which requires an air less constrained, and such freedom and ease of manners as admit nothing of the romantic.

She leaves all the pomp of sudden events to the novels, or little romances, which were the diversion of the last age. She allows nothing but a succession of characters resembling nature, and falling in without any apparent contrivance. *Racine* has likewise taught us to give to tragedy the same simplicity of air and action; he has endeavoured to disentangle it from that great number of incidents, which made it rather a study than diversion to the audience, and which show the poet not so much to abound in invention as to be deficient in taste. But, notwithstanding all that he has done, or that we can do, to make it simple, it will always have the advantage over comedy in the number of its subjects, because it admits more variety of situations and events, which give variety and novelty to the characters. A miser, copied after nature, will always be the miser of *Plautus* or *Moliere*; but a *Nero*, or a prince like *Nero*, will not always be the hero of *Racine*. Comedy admits of so little intrigue, that the miser cannot be shown in any such position as will make his picture new; but the great events of tragedy may put *Nero* in such circumstances as to make him wholly another character.

But, in the second place, over and above the subjects, may we not say something concerning the final purpose of comedy and tragedy? The purpose of the one is to divert, and the other to move; and of these two, which is the easier? To go to the bottom of those purposes; to move, is to strike those strings of the heart which are most natural, terror and pity: to divert, is to make one laugh, a thing which indeed is natural enough, but more delicate. The gentleman and the rustic have both sensibility and tenderness of heart, perhaps in greater or less degree; but as they are men alike, the heart is moved by the same touches. They both love likewise to send their thoughts abroad, and to expand themselves in merriment; but the springs which must be touched for this purpose, are not the same in the gentleman and the rustic. The passions depend on nature, and merriment upon education. The clown will laugh at a vaggery, and the gentleman only at a stroke of delicate conceit. The spectators of a tragedy, if they have but a little knowledge, are almost all on a level; but with respect to comedy, we have three classes, if not more—the people, the learned, and the court. If there are certain cases in which all may be comprehended in the term people, this is not one of those cases. Whatever father *Rapin* may say about it, we are more willing even to admire than to laugh. Every man that has any power of distinction, laughs as rarely as the philosopher admires; for we are not to reckon those fits of laughter which are not incited by nature, and which are given merely to complaisance, to respect, flattery, and good-humour; such as break out at sayings which pretend to smartness

in assemblies. The laughter of the theatre is of another stamp. Every reader and spectator judges of wit by his own standard, and measures it by his capacity, or by his condition : the different capacities and conditions of men, make them diverted on very different occasions. If, therefore, we consider the end of the tragic and comic poet, the comedian must be involved in much more difficulties, without taking in the obstructions to be encountered equally by both, in an art which consists in raising the passions, or the mirth of a great multitude. The tragedian has little to do but to reflect upon his own thought, and draw from his heart those sentiments which will certainly make their way to the hearts of others, if he found them in his own. The other must take many forms, and change himself almost into as many persons as he undertakes to satisfy and divert.

It may be said, that, if genius be supposed equal, and success supposed to depend upon genius, the business will be equally easy and difficult to one author and to the other. The objection is of no weight ; for the same question still recurs, which is, whether of these two kinds of genius is more valuable or more rare. If we proceed by example, and not by reasoning, we shall decide, I think, in favour of comedy.

It may be said, that if merely art be considered, it will require deeper thoughts to form a plan just and simple ; to produce happy surprises without apparent contrivance ; to carry a passion skilfully through its gradations to its height ; to arrive happily to the end by always moving from it, as Ithaca seemed to fly Ulysses ; to unite the acts and scenes ; and to raise by insensible degrees a striking edifice, of which the least merit shall be exactness of proportion. It may be added, that in comedy this art is infinitely less, for there the characters come upon the stage with very little artifice or plot : the whole scheme is so connected that we see it at once, and the plan and disposition of the parts make a small part of its excellence, in comparison of a gloss of pleasantry diffused over each scene, which is more the happy effect of a lucky moment, than of long consideration.

These objections, and many others, which so fruitful a subject might easily suggest, it is not difficult to refute ; and if we were to judge by the impression made on the mind by tragedies and comedies of equal excellence, perhaps, when we examine those impressions, it will be found that a sally of pleasantry, which diverts all the world, required more thought than a passage which gave the highest pleasure in tragedy ; and to this determination we shall be more inclined when a closer examination shall show us, that a happy vein of tragedy is opened and effused at less expense, than a well-placed witticism in comedy has required merely to assign its place.

It would be too much to dwell long upon such

a digression ; and as I have no business to decide the question, I leave both that and my arguments to the taste of each particular reader, who will find what is to be said for or against it. My purpose was only to say of comedy, considered as a work of genius, all that a man of letters can be supposed to deliver without departing from his character, and without palliating in any degree the corrupt use which has been almost always made of an exhibition which in its nature might be innocent ; but has been vicious from the time that it has been infected with the wickedness of men. It is not for public exhibitions that I am now writing, but for literary inquiries. The stage is too much frequented, and books too much neglected. Yet it is to the literature of Greece and Rome that we are indebted for that valuable taste, which will be insensibly lost by the affected negligence which now prevails of having recourse to originals. If reason has been a considerable gainer, it must be confessed that taste has been somewhat a loser.

To return to Aristophanes. So many great men of antiquity, through a long succession of ages, down to our times, have set a value upon his works, that we cannot naturally suppose them contemptible, notwithstanding the essential faults with which he may be justly reproached. It is sufficient to say, that he was esteemed by Plato and Cicero ; and to conclude by that which does him most honour, but still falls short of justification, the strong and sprightly eloquence of St. Chrysostom drew its support from the masculine and vigorous atticism of this sarcastic comedian, to whom the father paid the same regard as Alexander to Homer, that of putting his works under his pillow, that he might read them at night before he slept, and in the morning as soon as he awaked.

## GENERAL CONCLUSION

TO

### BRUMOY'S GREEK THEATRE.

*Summary of the four articles treated of in this discourse.*

I. Thus I have given a faithful extract of the remains of Aristophanes. That I have not shown them in their true form, I am not afraid that any body will complain. I have given an account of every thing, as far as it was consistent with moral decency. No pen, however cynical or heathenish, would venture to produce in open day the horrid passages which I have put out of sight ; and instead of regretting any part that I have suppressed, the very suppression will easily show to what degree the Athenians

were infected with licentiousness of imagination and corruption of principles. If the taste of antiquity allows us to preserve what time and barbarity have hitherto spared, religion and virtue at least oblige us not to spread it before the eyes of mankind. To end this work in a useful manner, let us examine in a few words the four particulars which are most striking in the eleven pieces of Aristophanes.

*Character of ancient Comedy.*

II. The first is the character of the ancient comedy, which has no likeness to any thing in nature. Its genius is so wild and strange, that it scarce admits a definition. In what class of comedy must we place it? It appears to me to be a species of writing by itself. If we had Phrynicius, Plato, Eupolis, Cratinus, Ameipsias, and so many other celebrated rivals of Aristophanes, of whom all that we can find are a few fragments scattered in Plutarch, Athenæus, and Suidas, we might compare them with our poet, settle the general scheme, observe the minuter differences, and form a complete notion of their comic stage. But for want of all this we can fix only on Aristophanes, and it is true that he may be in some measure sufficient to furnish a tolerable judgment of the old comedy; for if we believe him, and who can be better credited? he was the most daring of all his brethren, the poets, who practised the same kind of writing. Upon this supposition we may conclude, that the comedy of those days consisted in an allegory drawn out and continued; an allegory never very regular, but often ingenious, and almost always carried beyond strict propriety, of satire keen and biting, but diversified, sprightly, and unexpected; so that the wound was given before it was perceived. Their points of satire were thunderbolts, and their wild figures, with their variety and quickness, had the effect of lightning. Their imitation was carried even to resemblance of persons, and their common entertainments were a parody of rival poets joined, if I may so express it, with a parody of manners and habits.

But it would be tedious to draw out to the reader that which he will already have perceived better than myself. I have no design to anticipate his reflections; and therefore shall only sketch the picture, which he must finish by himself: he will pursue the subject farther, and form to himself a view of the common and domestic life of the Athenians, of which this kind of comedy was a picture, with some aggravation of the features: he will bring within his view all the customs, manners, and vices, and the whole character of the people of Athens. By bringing all these together, he will fix in his mind an indelible idea of a people in whom so many contrarieties were united, and who, in a manner that can

scarce be expressed, connected nobility with the cast of Athens, wisdom with madness, rage for novelty with a bigotry for antiquity, the politeness of a monarchy with the roughness of a republic, refinement with coarseness, independence with slavery, haughtiness with servile compliance, severity of manners with debauchery, a kind of irreligion with piety. We shall do this in reading; as in travelling through different nations we make ourselves masters of their characters by combining their different appearances, and reflecting upon what we see.

*The Government of the Athenians.*

III. The government of Athens makes a fine part of the ancient comedy. In most states the mystery of government is confined within the walls of the cabinets; even in commonwealths it does not pass but through five or six heads, who rule those that think themselves the rulers. Oratory dares not touch it, and comedy still less. Cicero himself did not speak freely upon so nice a subject as the Roman commonwealth; but the Athenian eloquence was informed of the whole secret, and searches the recesses of the human mind, to fetch it out and expose it to the people. Demosthenes, and his contemporaries, speak with a freedom at which we are astonished, notwithstanding the notion we have of a popular government; yet at what time but this did comedy adventure to claim the same rights with civil eloquence? The Italian comedy of the last age, all daring as it was, could for its boldness come into no competition with the ancient. It was limited to general satire, which was sometimes carried so far, that the malignity was overlooked in an attention to the wild exaggeration, the unexpected strokes, the pungent wit, and the malignity concealed under such wild flights as became the character of Harlequin. But though it so far resembled Aristophanes, our age is yet at a great distance from his, and the Italian comedy from his scenes. But with respect to the liberty of censuring the government, there can be no comparison made of one age of comedy with another. Aristophanes is the only writer of this kind, and is for that reason of the highest value. A powerful state set at the head of Greece, is the subject of his merriment, and that merriment is allowed by the state itself. This appears to us an inconsistency; but it is true that it was the interest of the state to allow it, though not always without inconveniency. It was a restraint upon the ambition and tyranny of single men, a matter of great importance to a people so very jealous of their liberty. Cleon, Alcibiades, Lamachus, and many other generals and magistrates, were kept under by fear of the comic strokes of a poet so little cautious as Aristophanes. He was once indeed in danger of paying dear for his wit. He

professed, as he tells us himself, to be of great use by his writings to the state; and rated his merit so high as to complain that he was not rewarded. But, under pretence of this public spirit, he spared no part of the public conduct; neither was government, councils, revenues, popular assemblies, secret proceedings in judicature, choice of ministers, the government of the nobles, or that of the people, spared.

The "Acharnians," the "Peace," and the "Birds," are eternal monuments of the boldness of the poet, who was not afraid of censuring the government for the obstinate continuance of a ruinous war, for undertaking new ones, and feeding itself with wild imaginations, and running to destruction as it did for an idle point of honour.

Nothing can be more reproachful to the Athenians than his play of the "Knights," when he represents, under an allegory that may be easily seen through, the nation of the Athenians as an old dotting fellow tricked by a new man, such as Cleon and his companions, who were of the same stamp.

A single glance upon "Lysistrata," and the "Female Orators," must raise astonishment when the Athenian policy is set below the schemes of women, whom the author makes ridiculous for no other reason than to bring contempt upon their husbands, who held the helm of government.

The "Wasps," is written to expose the madness of people for lawsuits and litigations; and a multitude of iniquities are laid open.

It may easily be gathered, that notwithstanding the wise laws of Solon, which they still professed to follow, the government was falling into decay, for we are not to understand the jest of Aristophanes in the literal sense. It is plain that the corruption, though we should suppose it but half as much as we are told, was very great, for it ended in the destruction of Athens, which could scarce raise its head again, after it had been taken by Lysander. Though we consider Aristophanes as a comic writer who deals in exaggeration, and bring down his stories to their true standard, we still find that the fundamentals of their government fail in almost all the essential points. That the people were inveigled by men of ambition; that all councils and decrees had their original in factious combinations; that avarice and private interest animated all their policy to the hurt of the public; that their revenues were ill managed, their allies improperly treated; that their good citizens were sacrificed, and the bad put in places; that a mad eagerness for judicial litigation took up all their attention within, and that war was made without, not so much with wisdom and precaution, as with temerity and good luck; that the love of novelty and fashion in the manner of managing the public affairs, was a mad-

ness universally prevalent; and that Melanthius says in Plutarch, the republic of Athens was continued only by the perpetual discord of those that managed its affairs. This remedied the dishonour by preserving the equilibrium, and was kept always in action by eloquence and comedy.

This is what in general may be drawn from the reading Aristophanes. The sagacity of the readers will go farther: they will compare the different forms of government by which that tumultuous people endeavoured to regulate or increase the democracy, which forms were all fatal to the state, because they were not built upon lasting foundations, and had all in them the principles of destruction. A strange contrivance it was to perpetuate a state by changing the just proportion which Solon had wisely settled between the nobles and the people; and by opening a gate to the skilful ambition of those who had art or courage enough to force themselves into the government by means of the people, whom they flattered with protections that they might more certainly crush them.

#### *The Tragical Poets rallied.*

IV. Another part of the works of Aristophanes are his pleasant reflections upon the most celebrated poets: the shafts which he lets fly at the three heroes of tragedy, and particularly at Euripides, might incline the reader to believe that he had little esteem for those great men; and that probably the spectators that applauded him were of his opinion. This conclusion would not be just, as I have already shown by arguments, which, if I had not offered them, the reader might have discovered better than I. But that I may leave no room for objections, and prevent any shadow of captiousness, I shall venture to observe, that posterity will not consider Racine as less a master of the French stage because his plays were ridiculed by parodies. Parody always fixes upon the best pieces, and was more to the taste of the Greeks than to ours. At present, the high theatres give it up to stages of an inferior rank; but in Athens, the comic theatre considered parody as its principal ornament, for a reason which is worth examining. The ancient comedy was not like ours, a remote and delicate imitation; it was the art of gross mimicry, and would have been supposed to have missed its aim, had it not copied the mien, the walk, the dress, the motions of the face of those whom it exhibited. Now parody is an imitation of this kind; it is a change of serious to burlesque, by a slight variation of words, inflection of voice, or an imperceptible art of mimicry. Parody is to poetry as a mask to a face. As the tragedies of Eschylus, of Sophocles, and of Euripides, were much in fashion, and were known by memory to the people, the parodies upon them would naturally strike and

please, when they were accompanied by the grimaces of a good comedian, who mimicked with archness a serious character. Such is the malignity of human nature; we love to laugh at those whom we esteem most, and by this make ourselves some recompense for the unwilling homage which we pay to merit. The parodies upon these poets made by Aristophanes, ought to be considered rather as encomiums than satires. They give us occasion to examine whether the criticisms are just or not in themselves: but what is more important, they afford no proof that Euripides or his predecessors wanted the esteem of Aristophanes or his age. The statues raised to their honour, the respect paid by the Athenians to their writings, and the careful preservation of those writings themselves, are immortal testimonies in their favour, and make it unnecessary for me to stop any longer upon so plausible a solution of so frivolous an objection.

*Frequent ridicule of the Gods.*

V. The most troublesome difficulty, and that which, so far as I know, has not yet been cleared, to satisfaction, is the contemptuous manner in which Aristophanes treats the gods. Though I am persuaded in my own mind that I have found the true solution of this question, I am not sure that it will make more impression than that of M. Boivin, who contents himself with saying, that every thing was allowed to the comic poets; and that even Atheism was permitted to the licentiousness of the stage: that the Athenians applauded all that made them laugh; and believed that Jupiter himself laughed with them at the smart sayings of a poet. Mr. Collier, an Englishman, in his remarks upon their stage, attempts to prove that Aristophanes was an open Atheist. For my part, I am not satisfied with the account either of one or the other, and think it better to venture a new system, of which I have already dropt some hints in this work. The truth is, that the Athenians professed to be great laughers; always ready for merriment on whatever subject. But it cannot be conceived that Aristophanes should, without punishment, publish himself an Atheist, unless we suppose that Atheism was the opinion likewise of the spectators, and of the judges commissioned to examine the plays; and yet this cannot be suspected of those who boasted themselves the most religious nation, and naturally the most superstitious of all Greece. How can we suppose those to be Atheists who passed sentence upon Diagoras, Socrates, and Alcibiades, for impiety? These are glaring inconsistencies. To say like M. Boivin, for the sake of getting clear of the difficulty, that Alcibiades, Socrates, and Diagoras attacked religion seriously, and were therefore not allowed, but that Aristophanes did it in jest, or was authorised by cus-

tom, would be to trifle with the difficulty, and not to clear it. Though the Athenians loved merriment, it is not likely that if Aristophanes had professed Atheism, they would have spared him more than Socrates, who had as much life and pleasantry in his discourses, as the poet in his comedies. The pungent railery of Aristophanes, and the fondness of the Athenians for it, are therefore not the true reason why the poet was spared when Socrates was condemned. I shall now solve the question with great brevity.

The true answer to this question is given by Plutarch in his treatise of reading of the poets. Plutarch attempts to prove that youth is not to be prohibited the reading of the poets; but to be cautioned against such parts as may have bad effects. They are first to be prepossessed with this leading principle, that poetry is false and fabulous. He then enumerates at length the fables which Homer and other poets have invented about their deities; and concludes thus: "When therefore there is found in poetical compositions any thing strange and shocking, with respect to gods, or demigods, or concerning the virtue of any excellent and renowned characters, he that should receive these fictions as truth, would be corrupted by an erroneous opinion: but he that always keeps in his mind the fables and allusions which it is the business of poetry to contrive, will not be injured by these stories, nor receive any ill impressions upon his thoughts, but will be ready to censure himself, if at any time he happens to be afraid, lest Neptune in his rage should split the earth, and lay open the infernal regions." Some pages afterwards, he tells us, "That religion is a thing difficult of comprehension, and above the understanding of poets; which it is," says he, "necessary to have in mind when we read their fables."

The Pagans therefore had their fables, which they distinguished from their religion; for no one can be persuaded that Ovid intended his *Metamorphoses* as a true representation of the religion of the Romans. The poets were allowed their imaginations about their gods, as things which have no regard to the public worship. Upon this principle, I say, as I said before, there was amongst the Pagans two sorts of religion: one a poetical, and a real religion: one practical, the other theatrical: a mythology for the poets, a theology for use. They had fables, and a worship, which, though founded upon fable, was yet very different.

Diagoras, Socrates, Plato, and the philosophers of Athens, with Cicero, their admirer, and the other pretended wise men of Rome, are men by themselves. These were the Atheists with respect to the ancients. We must not therefore look into Plato, or into Cicero, for the real religion of the Pagans, as distinct from the fabulous. These two authors involve them-

selves in the clouds, that their opinions may not be discovered. They durst not openly attack the real religion; but destroyed it by attacking fable.

To distinguish here with exactness the agreement or difference between fable and religion, is not at present my intention: it is not easy \* to show with exactness what was the Athenian notion of the nature of the gods whom they worshipped. Plutarch himself tells us, that this was a thing very difficult for the philosophers. It is sufficient for me that the mythology and theology of the ancients were different at the bottom; that the names of the gods continued the same; and that long custom gave up one to the caprices of the poets, without supposing the other affected by them. This being once settled upon the authority of the ancients themselves, I am no longer surprised to see Jupiter, Minerva, Neptune, Bacchus, appear upon the stage in the comedy of Aristophanes; and at the same time receiving incense in the temples of Athens. This is, in my opinion, the most reasonable account of a thing so obscure; and I am ready to give up my system to any other, by which the Athenians shall be made more consistent with themselves; those Athenians who sat laughing at the gods of Aristophanes, while they condemned Socrates for having appeared to despise the gods of his country.

#### *The Mimi and Pantomimes.*

VI. A word is now to be spoken of the *Mimi*, which had some relation to comedy. This appellation was, by the Greeks and Romans, given to certain dramatic performances, and to the actors that played them. The denomination sufficiently shows, that their art consisted in imitation and buffoonery. Of their works, nothing, or very little, is remaining: so that they can only be considered by the help of some passages in authors: from which little is to be learned that deserves consideration. I shall extract the substance, as I did with respect to the chorus, without losing time, by defining all the different species, or producing all the quotations, which would give the reader more trouble than instruction. He that desires fuller instructions may read Vossius, Valois, Saumaises, and Gataker, of whose compilations, however learned, I should think it shame to be the author.

The *Mimi* had their original from comedy, of which at its first appearance they made a part; for their mimic actors always played and exhibited grotesque dances in the comedies. The jealousy of rivalry afterwards broke them off from the comic actors, and made them a company by themselves. But to secure their recep-

tion, they borrowed from comedy all its drollery, wildness, grossness, and licentiousness. This amusement they added to their dances, and they produced what are now called farces, or burlettas. These farces had not the regularity or delicacy of comedies; they were only a succession of single scenes contrived to raise laughter; formed or unravelled without order and without connection. They had no other end but to make the people laugh. Now and then there might be good sentences, like the sentences of P. Syrus, that are yet left us: but the ground work was low comedy; and any thing of greater dignity drops in by chance. We must however imagine, that this odd species of the drama rose at length to somewhat a higher character, since we are told that Plato the philosopher laid the *Mimi* of Sophron under his pillow, and they were found there after his death. But in general we may say with truth, that it always discovered the meanness of its original, like a false pretension to nobility, in which the cheat is always discovered through the concealment of fictitious splendour.

These *Mimi* were of two sorts, of which the length was different, but the purposes the same. The *Mimi* of one species was short; those of the other long, and not quite so grotesque. These two kinds were subdivided into many species, distinguished by the dresses and characters, such as show drunkards, physicians, men, and women.

Thus far of the Greeks. The Romans having borrowed of them the more noble shows of tragedy and comedy, were not content till they had their rhapsodies. They had their *Planipedes*, who played with flat soles, that they might have the more agility; and their *Sannions*, whose heads were shaved, that they might box the better. There is no need of naming here all who had a name for these diversions among the Greeks and Romans. I have said enough, and perhaps too much, of this abortion of comedy, which drew upon itself the contempt of good men, the censures of the magistrates, and the indignation of the fathers of the church.\*

Another set of players were called *Pantomimas*; these were at least so far preferable to the former, that they gave no offence to the ears. They spoke only to the eyes: but with such art of expression, that without the utterance of a single word, they represented, as we are told, a complete tragedy or comedy, in the same manner as dumb Harlequin is exhibited on our theatres. These Pantomimes among the Greeks

\* It is the licentiousness of the *Mimi* and *Pantomimes*, against which the censure of the Holy Fathers particularly breaks out, as against a thing irregular and indecent, without supposing it much connected with the cause of religion.

\* See St. Paul upon the subject of the *Ignoto Deo*.

first mingled singing with their dances; afterwards, about the time of Livius Andronicus, the songs were performed by one part, and the dances by another. Afterwards, in the time of Augustus, when they were sent for to Rome, for the diversions of the people, whom he had enslaved, they played comedies without songs or vocal utterance; but by the sprightliness, activity, and efficacy of their gestures; or, as Sidonius Apollinaris, expresses it, *clausis faucibus, et loquente gestu*, they not only exhibited things and passions, but even the most delicate distinctions of passions, and the slightest circumstances of facts. We must not however imagine, at least in my opinion, that the *Pantomimes* did literally represent regular tragedies or comedies by the mere motions of their bodies. We may justly determine, notwithstanding all their agility, that their representations would at last be very incomplete: yet we may suppose, with good reason, that their action was very lively; and that the art of imitation went great lengths, since it raised the admiration of the wisest men, and made the people mad with eagerness. Yet when we read that one Hylus, the pupil of one Pylades, in the time of Augustus, divided the applauses of the people with his master, when they represented *Œdipus*, or when Juvenal tells us, that Bathillus played *Leda*, and other things of the same kind, it is not easy to believe that a single man, without speaking a word, could exhibit tragedies or comedies, and make starts and bounds supply the place of vocal articulation. Notwithstanding the obscurity of this whole matter, one may know what to admit as certain, or how far a representation could be carried by dance, posture, and grimace. Among these artificial dances, of which we know nothing but the names, there was as early as the time of Aristophanes some extremely indocent. These were continued in Italy from the time of Augustus, long after the emperors. It was a public mischief, which contributed in some measure to the decay and ruin of the Roman empire. To have a due detestation of those licentious entertainments, there is no need of any recourse to the fathers; the wiser Pagans tell us very plainly what they thought of them. I have made this mention of the *Mimi* and *Pantomimes*, only to show how the most noble of public spectacles were corrupted and abused, and to conduct the reader to the end through every road, and through all the by-paths of human wit, from Homer and *Eschylus* to our own time.

*Wanderings of the human mind in the birth and progress of theatrical representations.*

VII. That we may conclude this work by applying the principles laid down at the beginning, and extend it through the whole, I desire the reader to recur to that point where I have represented the human mind as beginning the

course of the drama. The chorus was first a hymn to *Bacchus*, produced by accident; art brought it to perfection, and delight made it a public diversion. *Thespis* made a single actor play before the people; this was the beginning of theatrical shows. *Eschylus*, taking the idea of the *Iliad* and *Odyssey*, animated, if I may so express it, the epic poem, and gave a dialogue in place of simple recitation; puts the whole into action, and sets it before the eyes, as if it was a present and real transaction: he gives the chorus\* an interest in the scenes, contrives habits of dignity and theatrical decorations. In a word, he gives birth to tragedy; or, more properly, draws it from the bosom of the epic poem. She made her appearance sparkling with graces, and displayed such majesty as gained every heart at the first view. *Sophocles* considers her more nearly, with the eyes of a critic, and finds that she has something still about her rough and swelling: he divests her of her false ornaments, teaches her a more regular walk, and more familiar dignity. *Euripides* was of opinion, that she ought to receive still more softness and tenderness; he teaches her the new art of pleasing by simplicity, and gives her the charms of graceful negligence; so that he makes her stand in suspense, whether she appears most to advantage in the dress of *Sophocles* sparkling with gems, or in that of *Euripides*, which is more simple and modest. Both indeed are elegant; but the elegance is of different kinds, between which no judgment as yet has decided the prize of superiority.

We can now trace it no farther; its progress amongst the Greeks is out of sight. We must pass at once to the time of Augustus, when *Apollo* and the *Muses* quitted their ancient residence in Greece, to fix their abode in Italy. But it is vain to ask questions of *Melpomene*; she is obstinately silent, and we only know from strangers her power amongst the Romans. *Seneca* endeavours to make her speak; but the gaudy show with which he rather loads than adorns her, makes us think that he took some phantom of *Melpomene* for the Muse herself.

Another flight, equally rapid with that to Rome, must carry us through thousands of years, from Rome to France. There in the time of *Lewis XIV.* we see the mind of man giving birth to tragedy a second time, as if the Greek tragedy had been utterly forgot. In the place of *Eschylus*, we have our *Rotrou*. In *Cornille*

\* *Eschylus*, in my opinion, as well as the other poets his contemporaries, retained the chorus, not merely because it was the fashion, but because examining tragedy to the bottom, they found it not rational to conceive, that an action great and splendid, like the revolution of a state, could pass without witnesses.

we have another Sophocles, and in Racine a second Euripides. Thus is tragedy raised from her ashes, carried to the utmost point of greatness, and so dazzling that she prefers herself to herself. Surprised to see herself produced again in France in so short a time, and nearly in the same manner as before in Greece, she is disposed to believe that her fate is to make a short transition from her birth to her perfection, like the goddess that issued from the brain of Jupiter.

If we look back on the other side to the rise of comedy, we shall see it hatched by Margites from the *Odyssey* of Homer, in imitation of her eldest sister; but we see her, under the conduct of Aristophanes, become licentious and petulant, taking airs to herself which the magistrates were obliged to crush. Menander reduced her to bounds, taught her at once gayety and politeness, and enabled her to correct vice, without shocking the offenders. Plautus, among the Romans, to whom we must now pass, united the earlier and the later comedy, and joined buffoonery with delicacy. Terence, who was better instructed, received comedy from Menander, and surpassed his original, as he endeavoured to copy it. And lastly, Moliere produced a new species of comedy, which must be placed in a class by itself, in opposition to that of Aristophanes, whose manner is likewise peculiar to himself.

But such is the weakness of the human mind, that when we review the successions of the drama a third time, we find genius falling from its height, forgetting itself, and led astray by the love of novelty, and the desire of striking out new paths. Tragedy degenerated in Greece from the time of Aristotle, and in Rome after Augustus. At Rome and Athens comedy produced *Mimi*, pantomimes, burlettas, tricks, and farces, for the sake of variety; such is the character, and such the madness of the mind of man. It is satisfied with having made great conquests, and gives them up to attempt others, which are far from answering its expectation, and only enable it to discover its own folly, weakness, and deviations. But why should we be tired with standing still at the true point of perfection when it is attained? If eloquence be wearied, and forgets herself a while, yet she soon returns to her former point; so will it happen to our thea-

tres if the French Muses will keep the Greek models in their view, and not look with disdain upon a stage, whose mother is nature, whose soul is passion, and whose art is simplicity: a stage, which, to speak the truth, does not perhaps equal ours in splendour and elevation, but which excels it in simplicity and propriety, and equals it at least in the conduct and direction of those passions which may properly affect an honest man and a Christian.

For my part, I shall think myself well recompensed for my labour, and shall attain the end which I had in view, if I shall in some little measure revive in the minds of those who purpose to run the round of polite literature, not an immoderate and blind reverence, but a true taste of antiquity; such a taste as both feeds and polishes the mind, and enriches it by enabling it to appropriate the wealth of foreigners, and to exert its natural fertility in exquisite productions; such a taste as gave the Racines, the Molières, the Boileaus, the Fontaines, the Patras, the Pelissons, and many other great geniuses of the last age, all that they were, and all that they will always be; such a taste as puts the seal of immortality to those works in which it is discovered; a taste so necessary, that without it we may be certain that the greatest powers of nature will long continue in a state below themselves; for no man ought to allow himself to be flattered or seduced by the example of some men of genius, who have rather appeared to despise this taste than to despise it in reality. It is true that excellent originals have given occasion, without any fault of their own, to very bad copies. No man ought severely to ape either the ancients, or the moderns: but if it was necessary to run into an extreme of one side or the other, which is never done by a judicious and well-directed mind, it would be better for a wit, as for a painter, to enrich himself by what he can take from the ancients, than to grow poor by taking all from his own stock; or openly to affect an imitation of those moderns whose more fertile genius has produced beauties peculiar to themselves, and which themselves only can display with grace: beauties of that peculiar kind, that they are not fit to be imitated by others; though in those who first invented them they may be justly esteemed, and in them only.

## DEDICATIONS.

---

DR. JAMES'S MEDICINAL DICTIONARY.

3 vols. folio. 1748.

TO DR. MEAD.

SIR,—THAT the Medicinal Dictionary is dedicated to you, is to be imputed only to your reputation for superior skill in those sciences which I have endeavoured to explain and facilitate; and you are, therefore, to consider this address, if it be agreeable to you, as one of the rewards of merit; and if otherwise, as one of the inconveniences of eminence.

However you shall receive it, my design cannot be disappointed; because this public appeal to your judgment will show that I do not found my hopes of approbation upon the ignorance of my readers, and that I fear his censure least, whose knowledge is most extensive. I am, sir, your most obedient humble servant,

R. JAMES.

---

### THE FEMALE QUIXOTE.

BY MRS. LENNOX. 1752.

TO THE RIGHT HON. THE EARL OF MIDDLESEX.

MY LORD,—SUCH is the power of interest over almost every mind, that no one is long without arguments to prove any position which is ardently wished to be true, or to justify any measures which are dictated by inclination.

By this subtle sophistry of desire, I have been persuaded to hope that this book may, without impropriety, be inscribed to your lordship; but am not certain that my reasons will have the same force upon other understandings.

The dread which a writer feels of the public censure; the still greater dread of neglect; and the eager wish for support and protection, which is impressed by the consciousness of imbecility, are unknown to those who have never adventured into the world; and I am afraid, my lord, equally unknown to those who have always found the world ready to applaud them.

It is therefore not unlikely that the design of this address may be mistaken, and the effects of my fear imputed to my vanity. They who see your lordship's name prefixed to my performance, will rather condemn my presumption, than compassionate my anxiety.

But whatever be supposed my motive, the praise of judgment cannot be denied me: for, to whom can timidity so properly fly for shelter, as to him who has been so long distinguished for candour and humanity? How can vanity be so completely gratified as by the allowed patronage of him, whose judgment has so long given a standard to the national taste? Or by what other means could I so powerfully suppress all opposition, but that of envy, as by declaring myself, my lord, your lordship's obliged and most obedient servant,

THE AUTHOR.

---

SHAKSPEARE Illustrated; or, The NOVELS and HISTORIES on which the Plays of SHAKSPEARE are founded; collected and translated from the original authors. With Critical Remarks. By the Author of the FEMALE QUIXOTE. 1753.

TO THE RIGHT HON. JOHN EARL OF ORRERY.

MY LORD,—I HAVE no other pretence to the honour of a patronage so illustrious as that of your lordship, than the merit of attempting what has by some unaccountable neglect been hitherto omitted, though absolutely necessary to a perfect knowledge of the abilities of Shakspeare.

Among the powers that must conduce to constitute a poet, the first and most valuable is invention; the highest seems to be that which is able to produce a series of events. It is easy when the thread of a story is once drawn, to diversify it with variety of colours; and when a train of action is presented to the mind, a little acquaintance with life will supply circumstances and reflections, and a little knowledge of books furnish parallels and illustrations. To tell over again a story that has been told already, and to

tell it better than the first author, is no rare qualification; but to strike out the first hints of a new fable: hence to introduce a set of characters so diversified in their several passions and interests, that from the clashing of this variety may result many necessary incidents: to make these incidents surprising, and yet natural, so as to delight the imagination without shocking the judgment of a reader; and finally to wind up the whole in a pleasing catastrophe, produced by those very means which seem most likely to oppose and prevent it, is the utmost effort of the human mind.

To discover how few of those writers, who profess to recount imaginary adventures, have been able to produce any thing by their own imagination, would require too much of that time which your lordship employs in nobler studies. Of all the novels and romances that wit or idleness, vanity or indigence, have pushed into the world, there are very few of which the end cannot be conjectured from the beginning; or where the authors have done more than to transpose the incidents of other tales, or strip the circumstances from one event for the decoration of another.

In the examination of a poet's character, it is therefore first to be inquired what degree of invention has been exerted by him. With this view I have very diligently read the works of Shakspeare, and now presume to lay the result of my searches before your lordship, before that judge whom Pliny himself would have wished for his assessor to hear a literary cause.

How much the translation of the following novels will add to the reputation of Shakspeare, or take away from it, you, my lord, and men learned and candid like you, if any such can be found, must now determine. Some danger, I am informed, there is, lest his admirers should think him injured, by this attempt, and clamour as at the diminution of the honour of that nation which boasts itself the parent of so great a poet.

That no such enemies may arise against me (though I am unwilling to believe it), I am far from being too confident, for who can fix bounds to bigotry and folly? My sex, my age, have not given me many opportunities of mingling in the world: there may be in it many a species of absurdity which I have never seen, and among them such vanity as plagues itself with false praise bestowed on another, and such superstition as worships idols, without supposing them to be gods.

But the truth is, that a very small part of the reputation of this mighty genius depends upon the naked plot or story of his plays. He lived in an age when the books of chivalry were yet popular, and when therefore the minds of his auditors were not accustomed to balance probabilities, or to examine nicely the proportion between causes and effects. It was sufficient to

recommend a story, that it was far removed from common life, that its changes were frequent, and its close pathetic.

This disposition of the age concurred so happily with the imagination of Shakspeare, that he had no desire to reform it; and indeed to this he was indebted for the licentious variety, by which he made his plays more entertaining than those of any other author.

He had looked with great attention on the scenes of nature: but his chief skill was in human actions, passions, and habits: he was therefore delighted with such tales as afforded numerous incidents, and exhibited many characters in many changes of situation. These characters are so copiously diversified, and some of them so justly pursued, that his works may be considered as a map of life, a faithful miniature of human transactions; and he that has read Shakspeare with attention, will perhaps find little new in the crowded world.

Among his other excellences it ought to be remarked, because it has hitherto been unnoticed, that his heroes are men, that the love and hatred, the hopes and fears, of his chief personages, are such as are common to other human beings, and not like those which later times have exhibited, peculiar to phantoms that strut upon the stage.

It is not perhaps very necessary to inquire whether the vehicle of so much delight and instruction be a story probable or unlikely, native or foreign. Shakspeare's excellence is not the fiction of a tale, but the representation of life: and his reputation is therefore safe, till human nature shall be changed. Nor can he, who has so many just claims to praise, suffer by losing that which ignorant admiration has unreasonably given him. To calumniate the dead is baseness, and to flatter them is surely folly.

From flattery, my lord, either of the dead or the living, I wish to be clear, and have therefore solicited the countenance of a patron, whom, if I knew how to praise him, I could praise with truth, and have the world on my side; whose candour and humanity are universally acknowledged, and whose judgment perhaps was then first to be doubted, when he condescended to admit this address from, my lord, your lordship's most obliged and most obedient humble servant,

THE AUTHOR.

---

PAYNE's Introduction to the GAME of  
DRAUGHTS. 1756.

TO THE RIGHT HON. WILLIAM HENRY EARL OF  
ROCHFORD, &c.

MY LORD,—When I take the liberty of address-

ing to your lordship "A Treatise on the Game of Draughts," I easily foresee that I shall be in danger of suffering ridicule on one part, while I am gaining honour on the other, and that many who may envy me the distinction of approaching you, will deride the present I presume to offer.

Had I considered this little volume as having no purpose beyond that of teaching a game, I should indeed have left it to take its fate without a patron. Triflers may find or make any thing a trifle; but since it is the great characteristic of a wise man to see events in their causes, to obviate consequences, and ascertain contingencies, your lordship will think nothing a trifle by which the mind is inured to caution, foresight, and circumspection. The same skill, and often the same degree of skill, is exerted in great and little things, and your lordship may sometimes exercise, on a harmless game, those abilities which have been so happily employed in the service of your country. I am, my lord, your lordship's most obliged, most obedient, and most humble servant,

WILLIAM PAYNE.

The EVANGELICAL HISTORY of JESUS CHRIST  
harmonized, explained, and illustrated.

2 vols. 8vo. 1758.

TO THE LORDS SPIRITUAL AND TEMPORAL, AND  
COMMONS IN PARLIAMENT ASSEMBLED.

THAT we are fallen upon an age in which corruption is barely not universal, is universally confessed. Venality skulks no longer in the dark, but snatches the bribe in public; and prostitution issues forth without shame, glittering with the ornaments of successful wickedness. Rapine preys on the public without opposition, and perjury betrays it without inquiry. Irreligion is not only avowed, but boasted; and the pestilence that used to walk in darkness, is now destroying at noon-day.

Shall this be the state of the English nation, and shall her lawgivers behold it without regard? Must the torrent continue to roll on till it shall sweep us in the gulph of perdition? Surely there will come a time when the careless shall be frightened, and the sluggish shall be roused; when every passion shall be put upon the guard by the dread of general depravity; when he who laughs at wickedness in his companion, shall start from it in his child: when the man who fears not for his soul, shall tremble for his possessions: when it shall be discovered that religion only can secure the rich from robbery, and the poor from oppression: can defend the state from treachery, and the throne from assassination.

If this time be ever to come, let it come quickly: a few years longer, and perhaps all endeavours will be vain. We may be swallowed by an earthquake, we may be delivered to our enemies, or abandoned to that discord, which must inevitably prevail among men that have lost all sense of divine superintendence, and have no higher motive of action or forbearance, than present opinion of present interest.

It is the duty of private men to supplicate and propose; it is yours to hear and to do right. Let religion be once more restored, and the nation shall once more be great and happy. This consequence is not far distant: that nation must always be powerful where every man performs his duty: and every man will perform his duty that considers himself as a being whose condition is to be settled to all eternity by the laws of Christ.

The only doctrine by which man can be made *wise unto salvation*, is the will of God revealed in the books of the Old and the New Testament.

To study the Scriptures, therefore, according to his abilities and attainments, is every man's duty, and to facilitate that study to those whom nature hath made weak, or education has left ignorant, or indispensable cares detain from regular processes of inquiry, is the business of those who have been blessed with abilities and learning, and are appointed the instructors of the lower classes of men, by that common father, who distributes to all created beings their qualifications and employments; who has allotted some to the labour of the hand, and some to the exercise of the mind; has commanded some to teach, and others to learn; has prescribed to some the patience of instruction, and to others the meekness of obedience.

By what methods the unenlightened and ignorant may be made proper readers of the word of God, has been long and diligently considered. Commentaries of all kinds have indeed been copiously produced: but there still remain multitudes to whom the labours of the learned are of little use, for whom expositions require an expositor. To those, indeed, who read the divine books without vain curiosity, or a desire to be wise beyond their powers, it will always be easy to discern the strait path, to find the words of everlasting life. But such is the condition of our nature, that we are always attempting what it is difficult to perform: he who reads the Scripture to gain goodness, is desirous likewise to gain knowledge, and by his impatience of ignorance, falls into error.

This danger has appeared to the doctors of the Romish church, so much to be feared, and so difficult to be escaped, that they have snatched the Bible out of the hands of the people, and confined the liberty of perusing it to those whom literature has previously qualified. By this expedient they have formed a kind of uniformity,

I am afraid too much like that of colours in the dark: but they have certainly usurped a power which God has never given them, and precluded great numbers from the highest spiritual consolation.

I know not whether this prohibition has not brought upon them an evil which they themselves have not discovered. It is granted, I believe, by the Romanists themselves, that the best commentaries on the Bible have been the works of Protestants. I know not, indeed, whether, since the celebrated paraphrase of Erasmus, any scholar has appeared amongst them, whose works are much valued, even in his own communion. Why have those who excel in every other kind of knowledge, to whom the world owes much of the increase of light which has shone upon these latter ages, failed, and failed only when they have attempted to explain the scriptures of God? Why, but because they are in the church less read and less examined, because they have another rule of deciding controversies, and instituting laws.

Of the Bible some of the books are prophetic, some doctrinal and historical, as the gospels, of which we have in the subsequent pages attempted an illustration. The books of the evangelists contain an account of the life of our blessed Saviour, more particularly of the years of his ministry, interspersed with his precepts, doctrines, and predictions. Each of these histories contains facts and dictates related likewise in the rest, that the truth might be established by concurrence of testimony; and each has likewise facts and dictates which the rest omit, to prove that they were wrote without communication.

These writers, not affecting the exactness of chronologers, and relating various events of the same life, or the same events with various circumstances, have some difficulties to him, who, without the help of many books, desires to collect a series of the acts and precepts of Jesus Christ; fully to know his life, whose example was given for our imitation; fully to understand his precepts, which it is sure destruction to disobey. In this work, therefore, an attempt has been made, by the help of harmonists and expositors, to reduce the four gospels into one series of narration, to form a complete history out of the different narratives of the evangelists, by inserting every event in the order of time, and connecting every precept of life and doctrine, with the occasion on which it was delivered; showing, as far as history or the knowledge of ancient customs can inform us, the reason and propriety of every action; and explaining, or endeavouring to explain, every precept and declaration in its true meaning.

Let it not be hastily concluded, that we intend to substitute this book for the gospels, or obtrude our own expositions as the oracles of God. We

recommend to the unlearned reader to consult us when he finds any difficulty, as men who have laboured not to deceive ourselves, and who are without any temptation to deceive him: but as men, however, that, while they mean best, may be mistaken. Let him be careful, therefore, to distinguish what we cite from the gospels, from what we offer as our own: he will find many difficulties removed; and if some yet remain, let him remember that "God is in heaven, and we upon earth," that "our thoughts are not God's thoughts," and that the great cure of doubt is an humble mind.

#### ANGELL'S STENOGRAPHY, OR SHORT-HAND IMPROVED. 1758.

TO THE MOST NOBLE CHARLES DUKE OF RICHMOND, LENNIX, AUBIGNY, &c.

MAY IT PLEASE YOUR GRACE—The improvement of arts and sciences has always been esteemed laudable; and in proportion to their utility and advantage to mankind, they have generally gained the patronage of persons the most distinguished for birth, learning, and reputation in the world. This is an art undoubtedly of public utility, and which has been cultivated by persons of distinguished abilities, as will appear from its history. But as most of their systems have been defective, clogged with a multiplicity of rules, and perplexed by arbitrary, intricate, and impracticable schemes, I have endeavoured to rectify their defects, to adapt it to all capacities, and render it of general, lasting, and extensive benefit. How this is effected, the following plates will sufficiently explain, to which I have prefixed a suitable introduction, and a concise and impartial history of the origin and progressive improvements of this art. And as I have submitted the whole to the inspection of accurate judges, whose approbation I am honoured with, I most humbly crave leave to publish it to the world under your grace's patronage; not merely on account of your great dignity and high rank in life, though these receive a lustre from your grace's humanity; but also from a knowledge of your grace's disposition to encourage every useful art, and favour all true promoters of science. That your grace may long live the friend of learning, the guardian of liberty, and the patron of virtue, and then transmit your name with the highest honour and esteem to latest posterity, is the ardent wish of your grace's most humble, &c.

BARETTI'S DICTIONARY OF THE ENGLISH  
AND ITALIAN LANGUAGES.

2 vols. 4to. 1760.

TO HIS EXCELLENCY DON FELIX, MARQUIS OF  
ABREU AND BERTODANO, AMBASSADOR EXTRA-  
ORDINARY AND PLENIPOTENTIARY FROM HIS  
CATHOLIC MAJESTY TO THE KING OF GREAT  
BRITAIN.

MY LORD,—That acuteness of penetration into  
characters and designs, and that nice discern-  
ment of human passions and practices which  
have raised you to your present height of station  
and dignity of employment, have long shown  
you that dedicatory addresses are written for  
the sake of the author more frequently than  
of the patron : and though they profess only re-  
verence and zeal, are commonly dictated by in-  
terest or vanity.

I shall therefore not endeavour to conceal my  
motives, but confess that the Italian Dictionary  
is dedicated to your excellency, that I might gra-  
tify my vanity, by making it known, that in a  
country where I am a stranger, I have been able,  
without any external recommendation, to obtain  
the notice and countenance of a nobleman so  
eminent for knowledge and ability, that in his  
twenty-third year he was sent as plenipotentiary  
to superintend, at Aix-la-Chapelle, the interests  
of a nation remarkable above all others for gra-  
vity and prudence : and who, at an age when  
very few are admitted to public trust, transacts  
the most important affairs between two of the  
greatest monarchs of the world.

If I could attribute to my own merits the fa-  
vours which your excellency every day confers  
upon me, I know not how much my pride might  
be inflamed ; but when I observe the extensive  
benevolence and boundless liberality by which  
all who have the honour to approach you, are  
dismissed more happy than they come, I am  
afraid of raising my own value, since I dare not  
ascribe it so much to my power of pleasing as  
your willingness to be pleased.

Yet as every man is inclined to flatter himself,  
I am desirous to hope that I am not admitted to  
greater intimacy than others without some quali-  
fications for so advantageous a distinction, and  
shall think it my duty to justify, by constant re-  
spect and sincerity, the favours which you have  
been pleased to show me. I am, my lord, your  
excellency's most humble and most obedient  
servant,

J. BARETTI.

London, Jan. 12, 1760.

A Complete System of ASTRONOMICAL CHRO-  
NOLOGY, unfolding the Scriptures. By JOHN  
KENNEDY, Rector of Bradley, in Derbyshire.  
4to. 1762.

TO THE KING.

SIRE,—Having by long labour and diligent in-  
quiry, endeavoured to illustrate and establish the  
chronology of the Bible, I hope to be pardoned  
the ambition of inscribing my work to your ma-  
jesty.

An age of war is not often an age of learning :  
the tumult and anxiety of military preparations  
seldom leave attention vacant to the silent pro-  
gress of study, and the placid conquests of in-  
vestigation ; yet, surely, a vindication of the in-  
spired writers can never be unseasonably offered  
to the Defender of the Faith, nor can it ever be  
improper to promote that religion without which  
all other blessings are snares of destruction,  
without which armies cannot make us safe, nor  
victories make us happy.

I am far from imagining that my testimony  
can add any thing to the honours of your ma-  
jesty, to the splendour of a reign crowned with  
triumphs, to the beauty of a life dignified by  
virtue. I can only wish, that your reign may  
long continue such as it has begun, and that the  
effulgence of your example may spread its light  
through distant ages, till it shall be the highest  
praise of any future monarch, that he exhibits  
some resemblance of George the Third. I am,  
sire, your majesty's, &c.

JOHN KENNEDY.

HOOLE'S TRANSLATION OF TASSO'S  
JERUSALEM DELIVERED. 1763.

TO THE QUEEN.

MADAM,—To approach the high and the illus-  
trious has been in all ages the privilege of poets ;  
and though translators cannot justly claim the  
same honour, yet they naturally follow their au-  
thors as attendants : and I hope that in return  
for having enabled Tasso to diffuse his fame  
through the British dominions, I may be intro-  
duced by him to the presence of your majesty.

Tasso has a peculiar claim to your majesty's  
favour, as follower and panegyrist of the house  
of Este, which has one common ancestor with  
the house of Hanover ; and in reviewing his life  
it is not easy to forbear a wish that he had lived  
in a happier time, when he might among the de-  
scendants of that illustrious family have found  
a more liberal and potent patronage.

I cannot but observe, Madam, how unequally  
reward is proportioned to merit, when I reflect  
that the happiness which was withheld from

Tasso is reserved for me; and that the poem which once hardly procured to its author the countenance of the Princes of Ferrara, has attracted to its translator the favourable notice of a British queen.

Had this been the fate of Tasso, he would have been able to have celebrated the condescension of your majesty in nobler language, but could not have felt it with more ardent gratitude, than, madam, your majesty's most faithful and devoted servant.

---

LONDON AND WESTMINSTER IMPROVED.

Illustrated by PLANS. 4to. 1766.

TO THE KING.

SIRE,—The patronage of works which have a tendency towards advancing the happiness of mankind, naturally belongs to great princes; and public good, in which public elegance is comprised, has ever been the object of your majesty's regard.

In the following pages your majesty, I flatter myself, will find, that I have endeavoured at extensive and general usefulness. Knowing, therefore, your majesty's early attention to the polite arts, and more particular affection for the study of architecture, I was encouraged to hope that the work which I now presume to lay before your majesty, might be thought not unworthy your royal favour: and that the protection which your majesty always affords to those who mean well, may be extended to, sire, your majesty's most dutiful subject, and most obedient and most humble servant,

JOHN GWYNN.

---

The ENGLISH WORKS OF ROGER ASCHAM, edited by JAMES BENNET. 4to. 1767.

TO THE RIGHT HON. ANTHONY ASHLEY COOPER, EARL OF SHAFTESBURY, BARON ASILEY, LORD LEUTENANT AND CUSTOS ROTULORUM OF DORSETSHIRE, F. R. S.

MY LORD,—Having endeavoured, by an elegant and useful edition, to recover the esteem of the public to an author undeservedly neglected, the only care which I now owe to his memory, is that of inscribing his works to a patron whose acknowledged eminence of character may awaken attention and attract regard.

I have not suffered the zeal of an editor so far to take possession of my mind, as that I should obtrude upon your lordship any productions unsuitable to the dignity of your rank or of your sentiments. Ascham was not only the chief ornament of a celebrated college, but visited for-

eign countries, frequented courts, and lived in familiarity with statesmen and princes; not only instructed scholars in literature, but formed Elizabeth to empire.

To propagate the works of such a writer will not be unworthy of your lordship's patriotism: for I know not what greater benefits you can confer on your country, than that of preserving worthy names from oblivion, by joining them with your own. I am, my lord, your lordship's most obliged, most obedient, and most humble servant,

JAMES BENNET.

---

ADAMS'S TREATISE ON THE GLOBES. 1767.

TO THE KING.

SIRE,—It is the privilege of real greatness not to be afraid of diminution by condescending to the notice of little things: and I therefore can boldly solicit the patronage of your majesty to the humble labours by which I have endeavoured to improve the instruments of science, and make the globes on which the earth and sky are delineated less defective in their construction, and less difficult in their use.

Geography is in a peculiar manner the science of princes. When a private student revolves the terraqueous globe, he beholds a succession of countries in which he has no more interest than in the imaginary regions of Jupiter and Saturn. But your majesty must contemplate the scientific picture with other sentiments, and consider, as oceans and continents are rolling before you, how large a part of mankind is now waiting on your determinations, and may receive benefits or suffer evils, as your influence is extended or withdrawn.

The provinces which your majesty's arms have added to your dominions, make no inconsiderable part of the orb allotted to human beings. Your power is acknowledged by nations whose names we know not yet how to write, and whose boundaries we cannot yet describe. But your majesty's lenity and beneficence give us reason to expect the time when science shall be advanced by the diffusion of happiness: when the deserts of America shall become pervious and safe: when those who are now restrained by fear shall be attracted by reverence: and multitudes who now range the woods for prey, and live at the mercy of winds and seasons, shall by the paternal care of your majesty enjoy the plenty of cultivated lands, the pleasures of society, the security of law, and the light of revelation. I am, sire, your majesty's most humble, most obedient, and most dutiful subject and servant,

GEORGE ADAMS.

Bishop ZACHARY PEARCE'S Posthumous Works.  
2 vols. 4to. Published by the Rev. Mr. DERBY, 1777.

TO THE KING.

SIRE,—I presume to lay before your majesty the last labours of a learned bishop, who died in the toils and duties of his calling. He is now beyond the reach of all earthly honours and rewards; and only the hope of inciting others to imitate him, makes it now fit to be remembered, that he enjoyed in his life the favour of your majesty.

The tumultuary life of princes seldom permits

them to survey the wide extent of national interest without losing sight of private merit: to exhibit qualities which may be imitated by the highest and the humblest of mankind: and to be at once amiable and great.

Such characters, if now and then they appear in history, are contemplated with admiration. May it be the ambition of all your subjects to make haste with their tribute of reverence: and as posterity may learn from your majesty how kings should live, may they learn, likewise, from your people how they should be honoured. I am, may it please your majesty, with the most profound respect, your majesty's most dutiful and devoted subject and servant.

## PREFACE

TO

### NEW TABLES OF INTEREST:

Designed to answer, in the most correct and expeditious manner, the common purposes of business, particularly the business of the Public Funds. By JOHN PAYNE, of the bank of England. 1758.

AMONG the writers of fiction, whose business is to furnish that entertainment which fancy perpetually demands, it is a standing plea, that the beauties of nature are now exhausted: that imitation has exerted all its power, and that nothing more can be done for the service of their mistress, than to exhibit a perpetual transposition of known objects, and draw new pictures, not by introducing new images, but by giving new lights and shades, a new arrangement and colouring to the old. This plea has been cheerfully admitted: and fancy, led by the hand of a skilful guide, treads over again the flowery path she has often trod before, as much enamoured with every new diversification of the same prospect, as with the first appearance of it.

In the regions of science, however, there is not the same indulgence: the understanding and the judgment travel there in the pursuit of truth, whom they always expect to find in one simple form, free from the disguises of dress and ornament: and, as they travel with laborious step and a fixed eye, they are content to stop when the shades of night darken the prospect, and patiently wait the radiance of a new morning, to lead them forward in the path they have chosen, which, however thorny, or however steep, is severely preferred to the most pleasing excursions that bring them no nearer to the object of their

search. The plea, therefore, that nature is exhausted, and that nothing is left to gratify the mind, but different combinations of the same ideas, when urged as a reason for multiplying unnecessary labours among the sons of science, is not so readily admitted: the understanding, when in possession of truth, is satisfied with the simple acquisition; and not like fancy, inclined to wander after new pleasures in the diversification of objects already known, which, perhaps, may lead to error.

But notwithstanding this general disinclination to accumulate labours for the sake of that pleasure which arises merely from different modes of investigating truth, yet, as the mines of science have been diligently opened, and their treasures widely diffused, there may be parts chosen, which, by a proper combination and arrangement, may contribute not only to entertainment but use, like the rays of the sun collected in a concave mirror, to serve particular purposes of light and heat.

The power of arithmetical numbers has been tried to a vast extent, and variously applied to the improvement both of business and science. In particular, so many calculations have been made with respect to the value and use of money, that some serve only for speculation and amusement; and there is great opportunity for select-

ing a few that are peculiarly adapted to common business, and the daily interchanges of property among men. Those which happen in the public funds are, at this time, the most frequent and numerous: and to answer the purposes of that business, in some degree, more perfectly than has hitherto been done, the following tables are published. What that degree of perfection above other tables of the same kind may be, is a matter, not of opinion and taste, in which many might vary, but of accuracy and usefulness, with respect to which most will agree. The approbation they meet with will, therefore, depend upon the experience of those for whom they were principally designed, the proprietors of the public funds, and the brokers who transact the business of the funds, to whose patronage they are cheerfully committed.

Among the brokers of stocks are men of great honour and probity, who are candid and open in all their transactions, and incapable of mean and selfish purposes: and it is to be lamented, that a market of such importance as the present state of this nation has made theirs, should be brought into any discredit, by the intrusion of bad men, who, instead of serving their country, and procuring an honest subsistence in the army, or the fleet, endeavour to maintain luxurious tables, and splendid equipages, by sporting with the public credit.

It is not long since the evil of stock-jobbing was risen to such an enormous height, as to threaten great injury to every actual proprietor: particularly to many widows and orphans, who,

being bound to depend upon the funds for their whole subsistence, could not possibly retreat from the approaching danger. But this evil, after many unsuccessful attempts of the legislature to conquer it, was, like many other, at length subdued by its own violence; and the reputable stock-brokers seem now to have it in their power effectually to prevent its return, by not suffering the most distant approaches of it to take footing in their own practice, and by opposing every effort made for its recovery by the desperate sons of fortune, who, not having the courage of highwaymen, take 'Change Alley rather than the road, because, though more injurious than highwaymen, they are less in danger of punishment by the loss either of liberty or life.

With respect to the other patrons to whose encouragement these Tables have been recommended, the proprietors of the public funds, who are busy in the improvement of their fortunes, it is sufficient to say—that no motive can sanctify the accumulation of wealth, but an ardent desire to make the most honourable and virtuous use of it, by contributing to the support of good government, the increase of arts and industry, the rewards of genius and virtue, and the relief of wretchedness and want.

What Good, what True, what Fit we justly call,  
Let this be all our care—for this is All;  
To lay this treasure up, and hoard with haste  
What *every day* will want, and most the *last*.  
This done, the poorest can no wants endure;  
And this not done, the richest must be poor.—POPE.

## THOUGHTS

ON

### THE CORONATION OF HIS PRESENT MAJESTY KING GEORGE THE THIRD;

OR

Reasons offered against confining the Procession to the usual Track, and pointing out others more commodious and proper. To which are prefixed, a plan of the different Paths recommended, with the Parts adjacent, and a Sketch of the Procession. Most humbly submitted to consideration.

FIRST PRINTED IN THE YEAR 1761.

ALL pomp is instituted for the sake of the public. A show without spectators can no longer be a show. Magnificence in obscurity is equally vain with a *sun dial in the grave*.

As the wisdom of our ancestors has appointed

a very splendid and ceremonious inauguration of our kings, their intention was, that they should receive their crown with such awful rites, as might for ever impress upon them a due sense of the duties which they were to take,

when the happiness of nations is put into their hands; and that the people, as many as can possibly be witnesses to any single act, should openly acknowledge their sovereign by universal homage.

By the late method of conducting the coronation, all these purposes have been defeated. Our kings with their train, have crept to the temple, through obscure passages; and the crown has been worn out of sight of the people. Of the multitudes, whom loyalty or curiosity brought together, the greater part has returned without a single glimpse of their prince's grandeur, and the day that opened with festivity ended in discontent.

This evil has proceeded from the narrowness and shortness of the way through which the procession has lately passed. As it is narrow, it admits of very few spectators; as it is short, it is soon passed. The first part of the train reaches the abbey before the whole has left the palace; and the nobility of England, in their robes of state, display their riches only to themselves.

All this inconvenience may be easily avoided by choosing a wider and longer course, which may be again enlarged and varied by going one way, and returning another. This is not without a precedent; for, not to enquire into the practice of remoter princes, the procession of Charles the Second's Coronation issued from the Tower, and passed through the whole length of the city to Whitehall.\*

---

\* The king went early in the morning to the Tower of London in his coach, most of the lords being there before. And about ten of the clock they set forward towards Whitehall, ranged in that order as the heralds had appointed; those of the long robe, the king's council at law, the masters of the chancery, and judges, going first, and so the lords in their order, very splendidly habited, on rich footcloths; the number of their footmen being limited, to the dukes ten, to the lords eight, to the viscounts six, and the barons four, all richly clad, as their other servants were. The whole show was the most glorious in the order and expense, that had been ever seen in England; they who rode first being in Fleet-street when the king issued out of the Tower, as was known by the discharge of the ordnance: and it was near three of the clock in the afternoon, when the king alighted at Whitehall. The next morning the king rode in the same state in his robes, and with his crown on his head, and all the lords in their robes, to Westminster Hall; where all the ensigns for the coronation were delivered to those who were appointed to carry them, the Earl of Northumberland being made high constable, and the Earl of Suffolk earl marshal, for the day. And then all the lords in their order, and the king himself, walked on foot, upon blue cloth, from Westminster Hall to the Abbey Church, where, after a sermon preached by Dr. Morley (then bishop of Worcester), in Henry the Seventh's Chapel, the king was sworn, crowned and anointed, by Dr. Juxon, Archbishop of Canterbury, with all the solemnity that in those cases had been used. All which being done, the king returned in the same manner on foot to Westminster Hall, which was adorned with rich hangings and statues;

The path in the late coronations has been only from Westminster Hall, along New Palace-yard, into Union-street, through the extreme end of King-street, and to the Abbey-door, by the way of St. Margaret's church-yard.

The paths which I propose the procession to pass through, are,

I. From St. James's Palace, along Pall-Mall and Charing-Cross, by Whitehall, through Parliament-street, down Bridge-street, into King-street, round St. Margaret's church-yard, and from thence into the Abbey.

II. From St. James's Palace across the canal, into the Bird Cage Walk, from thence into Great George-street, then turning down Long-ditch, (the Gate-house previously to be taken down) proceed to the Abbey. Or,

III. Continuing the course along George-street, into King-street, and by the way of St. Margaret's church-yard, to pass into the west door of the Abbey.

IV. From St. James's Palace, the usual way his Majesty passes to the House of Lords, as far as to the parade, when leaving the Horse Guards on the left, proceed along the Park, up to Great George-street, and pass to the Abbey in either of the tracks last mentioned.

V. From Westminster Hall into Parliament-street, down Bridge-street, along Great George-street, through Long-ditch (the Gate-house, as before observed, to be taken down), and so on to the west door of the Abbey.

VI. From Whitehall up Parliament-street, down Bridge-street, into King-street, round St. Margaret's church-yard, proceed into the Abbey.

VII. From the House of Lords along St. Margaret's-street, across New Palace-yard, into Parliament-street, and from thence to the Abbey by the way last mentioned.

But if, on no account, the path must be extended to any of the lengths here recommended, I could wish, rather than see the procession confined to the old way, that it should pass,

VIII. From Westminster Hall along Palace-yard, into Parliament-street, and continued in the last mentioned path, viz. through Bridge-street, King-street, and round the church-yard, to the west door of the cathedral.

IX. The return from the Abbey, in either case, to be as usual, viz. round St. Margaret's church-yard, into King-street, through Union-street, along New Palace-yard, and so into Westminster Hall.

It is almost indifferent which of the six first ways now proposed be taken; but there is a

---

and there the king dined, and the lords on either side at tables provided for them: and all other ceremonies were performed with great order and magnificence.—Life of Lord Clarendon, p. 187.

stronger reason than mere convenience for changing the common course. Some of the streets in the old track are so ruinous, that there is danger lest the houses, loaded as they will be with people, all pressing forward in the same direction, should fall down upon the procession. The least evil that can be expected is, that in so close a crowd, some will be trampled upon, and others smothered; and surely a pomp that costs a single life, is too dearly bought. The new streets, as they are more extensive, will afford place to greater numbers with less danger.

In this proposal I do not foresee any objection that can reasonably be made. That a longer march will require more time, is not to be mentioned, as implying any defect in a scheme of which the whole purpose is to lengthen the march and protract the time. The longest course which I have proposed is not equal to an hour's walk in the Park. The labour is not such, as that the king should refuse it to his people, or the nobility grudge it to the king. Queen Anne went from the palace through the Park to the Hall, on the day of her coronation; and when old and infirm, used to pass on solemn thanksgivings from the palace to St. Paul's church.\*

---

\* In order to convey to the reader some idea how highly parade and magnificence were estimated by our ancestors, on these solemn occasions, I shall take notice of the manner of conducting Lady Anne Boleyn from Greenwich, previous to her coronation, as it is recited by Stow.

King Henry VIII. (says that historian) having divorced Queen Catherine, and married Anne Boleyn, or Boloine, who was descended from Godfrey Boloine, Mayor of the city of London, and intending her coronation, sent to order the Lord Mayor, not only to make all the preparations necessary for conducting his royal consort from Greenwich, by water, to the Tower of London, but to adorn the city after the most magnificent manner, for her passage through it to Westminster.

In obedience to the royal precept, the mayor and common-council not only ordered the company of haberdashers, of which the lord mayor was a member, to prepare a magnificent state barge; but enjoined all the city corporations to provide themselves with barges, and to adorn them in the most superb manner, and especially to have them supplied with good bands of music.

On the 29th of May, the time prefixed for this pompous procession by water, the mayor, aldermen, and commons, assembled at St. Mary-hill; the mayor and aldermen in scarlet, with gold chains, and those who were knights, with the collars of SS. At one, they went on board the city barge at Billingsgate, which was most magnificently decorated, and attended by fifty noble barges, belonging to the several companies of the city, with each its own corporation on board; and, for the better regulation of this procession, it was ordered, that each barge should keep twice their lengths asunder.

Thus regulated, the city barge was preceded by another mounted with ordnance, and the figures of dragons, and other monsters, incessantly emitting fire and smoke, with much noise. Then the city barge, attended on the right by the haberdashers' state barge, called the Bachelors,

Part of my scheme supposes the demolition of the Gate-house, a building so offensive, that, without any occasional reason, it ought to be pulled down, for it disgraces the present magni-

---

which was covered with gold brocade, and adorned with sails of silk, with two rich standards of the king's and queen's arms at her head and stern, besides a variety of flags and streamers, containing the arms of that company, and those of the merchant adventurers; besides which, the shrouds and ratlines were hung with a number of small bells: on the left was a barge that contained a very beautiful mount, on which stood a white falcon crowned, perched upon a golden stump enriched with roses, being the queen's emblem: and round the mount sat several beautiful virgins, singing, and playing upon instruments. The other barges followed in regular order, till they came below Greenwich. On their return the procession began with that barge which was before the last, in which were mayors' and sheriffs' officers, and this was followed by those of the inferior companies, ascending to the lord mayor's, which immediately preceded that of the queen, who was attended by the Bachelors, or state barge, with the magnificence of which her majesty was much delighted: and being arrived at the Tower, she returned the lord mayor and aldermen thanks, for the pomp with which she had been conducted thither.

Two days after, the lord mayor, in a gown of crimson velvet, and a rich collar of SS, attended by the sheriffs, and two domestics in red and white damask, went to receive the queen at the Tower of London, whence the sheriffs returned to see that every thing was in order. The streets were just before now gravelled from the Tower to Temple-bar, and railed in on each side, to the intent that the horses should not slide on the pavement, nor the people be hurt by the horses; within the rails near Gracechurch, stood a body of Anseatic merchants, and next to them the several corporations of the city, in their formalities, reaching to the aldermen's station at the upper end of Cheapside. On the opposite side were placed the city constables dressed in silk and velvet, with staffs in their hands to prevent the breaking in of the mob, or any other disturbance. On this occasion, Gracechurch-street and Cornhill were hung with crimson and scarlet cloth, and the sides of the houses of a place then called Goldsmiths-row, in Cheapside, were adorned with gold brocades, velvet, and rich tapestry.

The procession began from the Tower with twelve of the French ambassador's domestics in blue velvet, the trappings of their horses being blue sarsnet, interspersed with white crosses; after whom marched those of the equestrian order, two and two, followed by judges in their robes, two and two; then came the knights of the Bath in violet gowns, purged with menever. Next came the abbots, barons, bishops, earls, and marquises, in their robes, two and two. Then the lord chancellor, followed by the Venetian ambassador and the Archbishop of York: next the French ambassador and the Archbishop of Canterbury, followed by two gentlemen representing the dukes of Normandy and Aquitaine; after whom rode the lord mayor of London with his mace, and Garter in his coat of arms; then the Duke of Suffolk, lord high steward, followed, by the deputy marshal of England, and all the other officers of state in their robes, carrying the symbols of their several offices: then others of the nobility in crimson velvet, and all the queen's officers in scarlet, followed by her chancellor uncovered, who immediately preceded his mistress.

The queen was dressed in silver brocade, with a mantle of the same furred with ermine; her hair was dishevelled, and she wore a chaplet upon her head set with jewels of

ficence of the capital, and is a continual nuisance to neighbours and passengers.

A longer course of scaffolding is doubtless more expensive than a shorter; but it is hoped that the time is now past, when any design was received or rejected according to the money that it would cost. Magnificence cannot be cheap, for what is cheap cannot be magnificent. The money that is so spent is spent at home, and the king will receive again what he lays out on the pleasure of his people. Nor is it to be omitted, that if the cost be considered as expended by the public, much more will be saved than lost; for the excessive prices at which windows and tops

inestimable value. She sat in a litter covered with silver tissue, and carried by two beautiful pads clothed in white damask, and led by her footmen. Over the litter was carried a canopy of cloth of gold, with a silver bell at each corner, supported by sixteen knights alternately by four at a time.

After her majesty came her chamberlain, followed by her master of horse, leading a beautiful pad, with a side saddle and trappings of silver tissue. Next came seven ladies in crimson velvet, faced with gold brocade, mounted on beautiful horses with gold trappings. Then followed two chariots covered with cloth of gold, in the first of which were the Dutchess of Norfolk and the Marchioness of Dorset, and in the second four ladies in crimson velvet; then followed seven ladies dressed in the same manner, on horseback, with magnificent trappings, followed by another chariot all in white, with six ladies in crimson velvet; this was followed by another all in red, with eight ladies in the same dress with the former: next came thirty gentlemen, attendants to the ladies of honour; they were on horseback, dressed in silks and velvet; and the cavalcade was closed by the horse-guards.

This pompous procession being arrived in Fenchurch-street, the queen stopped at a beautiful pageant crowded with children in mercantile habits; who congratulated her majesty upon the joyful occasion of her happy arrival in the city.

Thence she proceeded to Gracechurch corner, where was erected a very magnificent pageant, at the expense of the company of Anseutic merchants, in which was represented mount Parnassus, with the fountain of Helicon, of white marble, out of which arose four springs about four feet high, centering at the top in a small globe, from whence issued plenty of Rhenish wine till night. On the mount sat Apollo, at his feet was Calliope, and beneath were the rest of the Muses, surrounding the mount, and playing upon a variety of musical instruments, at whose feet were inscribed several epigrams suited to the occasion, in letters of gold.

Her majesty then proceeded to Leadenhall, where stood a pageant, representing a hill encompassed with red and white roses; and above it was a golden stump, upon which a white falcon, descending from above, perched, and was quickly followed by an angel, who put a crown of gold upon his head. A little lower on the hillock sat St. Anne, surrounded by her progeny, one of whom made an oration, in which was a wish that her majesty might prove extremely prolific.

The procession then advanced to the conduit in Cornhill; where the graces sat enthroned, with a fountain before them, incessantly discharging wine; and underneath, a poet, who, described the qualities peculiar to each of these amiable deities, and presented the queen with their several gifts.

of houses are now let, will be abated, not only greater numbers will be admitted to the show, but each will come at a cheaper rate.

Some regulations are necessary, whatever track be chosen. The scaffold ought to be raised at least four feet, with rails high enough to support the standards, and yet so low as not to hinder the view.

It would add much to the gratification of the people, if the horse-guards, by which all our processions have been of late encumbered, and rendered dangerous to the multitude, were to be left behind at the coronation; and if contrary to the desires of the people, the procession must pass in the old track, that the number of footsoldiers be diminished; since it cannot but offend every Englishman to see troops of soldiers placed between him and his sovereign, as if they were the

The cavalcade thence proceeded to a great conduit that stood opposite to Mercers-hall in Cheapside, and upon that occasion, was painted with a variety of emblems, and during the solemnity and remaining part of the day, ran with different sorts of wine, for the entertainment of the populace.

At the end of Wood-street, the standard there was finely embellished with royal portraits and a number of flags, on which were painted coats of arms and trophies, and above was a concert of vocal and instrumental music.

At the upper end of Cheapside was the aldermen's station, where the recorder addressed the queen in a very elegant oration, and, in the name of the citizens, presented her with a thousand marks in a purse of gold tissue, which her majesty very gracefully received.

At a small distance, by Cheapside conduit was a pageant, in which were seated Minerva, Juno, and Venus; before whom stood the god Mercury; who in their names, presented the queen a golden apple.

At St. Paul's gate there was a fine pageant, in which sat three ladies, richly dressed, with each a chaplet on her head, and a tablet in her hand, containing Latin inscriptions.

At the east of St. Paul's cathedral, the queen was entertained by some of the scholars belonging to St. Paul's school, with verses in praise of the king and her majesty, with which she seemed highly delighted.

Thence proceeding to Ludgate, which was finely decorated, her majesty was entertained with several songs adapted to the occasion, sung in concert by men and boys upon the leads over the gate.

At the end of Shoe-lane, in Fleet-street, a handsome tower with four turrets was erected upon the conduit, in each of which stood one of the cardinal virtues, with their several symbols; who addressing themselves to the queen, promised they would never leave her, but be always her constant attendants. Within the tower was an excellent concert of music, and the conduit all the while ran with various sorts of wine.

At Temple-bar she was again entertained with songs, sung in concert by a choir of men and boys; and having from thence proceeded to Westminster, she returned the lord mayor thanks for his good offices, and those of the citizens, that day. The day after, the lord mayor, aldermen, and sheriffs, assisted at the coronation, which was performed with great splendour.

*Stow's Annals.*

Note, The same historian informs us, that Queen Elizabeth passed in the like manner, through the city, to her coronation.

most honourable of the people, or the king required guards to secure his person from his subjects. As their station makes them think themselves important, their insolence is always such

as may be expected from servile authority; and the impatience of the people, under such immediate oppression, always produces quarrels, tumults, and mischief.

## PREFACE

TO THE

### ARTISTS' CATALOGUE, FOR 1762.

THE public may justly require to be informed of the nature and extent of every design, for which the favour of the public is openly solicited. The artists, who were themselves the first projectors of an exhibition in this nation, and who have now contributed to the following catalogue, think it therefore necessary to explain their purpose, and justify their conduct. An exhibition of the works of art, being a spectacle new in this kingdom, has raised various opinions and conjectures among those who are unacquainted with the practice in foreign nations. Those who set out their performances to general view, have been too often considered as the rivals of each other, as men actuated, if not by avarice, at least by vanity, and contending for superiority of fame, though not for a pecuniary prize; it cannot be denied or doubted, that all who offer themselves to criticism are desirous of praise; this desire is not only innocent, but virtuous, while it is undebased by artifice, and unpolluted by envy; and of envy or artifice these men can never be accused, who, already enjoying all the honours and profits of their profession, are content to stand candidates for public notice, with genius yet unexperienced, and diligence yet unrewarded; who, without any hope of increasing their own reputation or interest, expose their names and their works only that they may furnish an opportunity of appearance to the young, the diffident, and the neglected.

The purpose of this exhibition is not to enrich the artists, but to advance the art: the eminent are not flattered with preference, nor the obscure insulted with contempt; whoever hopes to de-

serve public favour, is here invited to display his merit.

Of the price put upon this exhibition some account may be demanded. Whoever sets his work to be shown, naturally desires a multitude of spectators; but his desire defeats its own end, when spectators assemble in such numbers as to obstruct one another. Though we are far from wishing to diminish the pleasures, or depreciate the sentiments, of any class of the community, we know, however, what every one knows, that all cannot be judges or purchasers of works of art; yet we have already found by experience, that all are desirous to see an exhibition. When the terms of admission were low, our room was thronged with such multitudes as made access dangerous, and frightened away those whose approbation was most desired.

Yet, because it is seldom believed that money is got but for the love of money, we shall tell the use which we intend to make of our expected profits.

Many artists of great abilities are unable to sell their works for their due price; to remove this inconvenience, an annual sale will be appointed, to which every man may send his works, and send them if he will, without his name. These works will be reviewed by the committee that conduct the exhibition. A price will be secretly set on every piece, and registered by the secretary. If the piece exposed is sold for more, the whole price shall be the artist's; but if the purchasers value it at less than the committee, the artist shall be paid the deficiency from the profits of the exhibition.

## OPINIONS ON QUESTIONS OF LAW.

FROM BOSWELL'S LIFE OF JOHNSON.

### ON SCHOOL CHASTISEMENT.

[A SCHOOLMASTER in Scotland, was, in 1772, by a court of inferior jurisdiction, deprived of his office, for being somewhat severe in the chastisement of his scholars. The Court of Session considering it to be dangerous to the interest of learning and education to lessen the dignity of teachers, and make them afraid of too indulgent parents, instigated by the complaints of their children, restored him. His opponent appealed to the House of Lords, where Mr. Boswell was his counsel. On this occasion, Dr. Johnson dictated the following paper to Mr. Boswell, as some assistance to Mr. B. in his address to the Lords.]

"The charge is, that this schoolmaster has used immoderate and cruel correction. Correction, in itself, is not cruel: children, being not reasonable, can be governed only by fear. To impress this fear, is therefore one of the first duties of those who have the care of children. It is the duty of a parent; and has never been thought inconsistent with parental tenderness. It is the duty of a master, who is in his highest exaltation when he is *loco parentis*. Yet, as good things become evil by excess, correction, by being immoderate, may become cruel. But when is correction immoderate? When it is more frequent or more severe than is required *ad monendum et docendum*, for reformation and instruction. No severity is cruel which obstinacy makes necessary; for the greatest cruelty would be to desist, and leave the scholar too careless for instruction, and too much hardened for reproof. Locke, in his *Treatise of Education*, mentions a mother, with applause, who whipped an infant eight times before she had subdued it: for had she stopped at the seventh act of correction, her daughter, says he, would have been ruined. The degrees of obstinacy in young minds, are very different; as different must be the degrees of persevering severity. A stubborn scholar must be corrected till he is subdued. The discipline of a school is military. There must be either unbounded license, or absolute authority. The master, who punishes, not only

consults the future happiness of him who is the immediate subject of correction, but he propagates obedience through the whole school; and establishes regularity by exemplary justice. The victorious obstinacy of a single boy would make his future endeavours of reformation or instruction totally ineffectual. Obstinance, therefore, must never be victorious. Yet, it is well known that there sometimes occurs a sullen and hardy resolution, that laughs at all common punishment, and bids defiance to all common degrees of pain. Corrections must be proportionate to occasions. The flexible will be reformed by gentle discipline, and the refractory must be subdued by harsher methods. The degrees of scholastic, as of military punishment, no stated rules can ascertain. It must be enforced till it overpowers temptation; till stubbornness become flexible, and perverseness regular. Custom and reason have, indeed, set some bounds to scholastic penalties. The schoolmaster inflicts no capital punishments; nor enforces his edicts by either death or mutilation. The civil law has wisely determined, that a master who strikes at a scholar's eye shall be considered as criminal. But punishments, however severe, that produce no lasting evil, may be just and reasonable, because they may be necessary. Such have been the punishments used by the respondent. No scholar has gone from him either blind or lame, or with any of his limbs or powers injured or impaired. They were irregular, and he punished them: they were obstinate, and he enforced his punishment. But however provoked, he never exceeded the limits of moderation, for he inflicted nothing beyond present pain; and how much of that was required, no man is so little able to determine as those who have determined against him—the parents of the offenders. It has been said, that he used unprecedented and improper instruments of correction. Of this accusation the meaning is not very easy to be found. No instrument of correction is more proper than another, but as it is better adapted to produce present pain without lasting mischief. Whatever were his instruments, no lasting mischief has ensued: and therefore, however unusual, in hands

so cautious they were proper. It has been objected, that the respondent admits the charge of cruelty, by producing no evidence to confute it. Let it be considered, that his scholars are either dispersed at large in the world, or continue to inhabit the place in which they were bred. Those who are dispersed cannot be found: those who remain are the sons of his prosecutors, and are not likely to support a man to whom their fathers are enemies. If it be supposed that the enmity of their fathers proves the justness of the charge, it must be considered how often experience shows us, that men who are angry on one ground will accuse on another; with how little kindness, in a town of low trade, a man who lives by learning is regarded; and how implicitly, where the inhabitants are not very rich, a rich man is hearkened to and followed. In a place like Campbelltown, it is easy for one of the principal inhabitants to make a party. It is easy for that party to heat themselves with imaginary grievances. It is easy for them to oppress a man poorer than themselves; and natural to assert the dignity of riches, by persisting in oppression. The argument which attempts to prove the impropriety of restoring him to the school, by alleging that he has lost the confidence of the people, is not the subject of juridical consideration; for he is to suffer, if he must suffer, not for their judgment, but for his own actions. It may be convenient for them to have another master; but it is a convenience of their own making. It would be likewise convenient for him to find another school; but this convenience he cannot obtain. The question is not what is now convenient, but what is generally right. If the people of Campbelltown be distressed by the restoration of the respondent, they are distressed only by their own fault; by turbulent passions and unreasonable desires; by tyranny, which law has defeated, and by malice, which virtue has surmounted."

[The decree of the Court of Session was reversed in the House of Lords, April 14, 1772, and the schoolmaster consequently deprived of his situation.]

### ON VICIOUS INTROMISSION.

[It was held of old, and continued for a long period to be an established principle in Scotch law, that whoever intermeddled with the effects of a person deceased, without the interposition of legal authority to guard against embezzlement, should be subjected to pay all the debts of the deceased, as having been guilty of what was technically called VICIOUS INTROMISSION. The Court of Session had gradually relaxed the strictness of this principle, where the interference proved had been inconsiderable. In a case

which came before that Court, in 1772, Mr. Boswell had laboured to persuade the judges to return to the ancient law. It was his opinion that they ought to adhere to it, but he exhausted all his powers of reasoning in vain. Dr. Johnson thought as he did, and in order to assist him in his application to the Court for a revision and alteration of the judgment, dictated to Mr. Boswell the following argument.]

"This, we are told, is a law which has its force only from the long practice of the Court; and may, therefore, be suspended or modified as the Court shall think proper.

"Concerning the power of the Court to make or to suspend a law, we have no intention to inquire. It is sufficient for our purpose that every just law is dictated by reason; and that the practice of every legal court is regulated by equity. It is the quality of reason to be invariable and constant; and of equity, to give to one man what, in the same case, is given to another. The advantage which humanity derives from law is this: that the law gives every man a rule of action, and prescribes a mode of conduct which shall entitle him to the support and protection of society. That the law may be a rule of action, it is necessary that it be known: it is necessary that it be permanent and stable. The law is the measure of civil right: but if the measure be changeable, the extent of the thing measured never can be settled.

"To permit a law to be modified at discretion, is to leave the community without law. It is to withdraw the direction of that public wisdom, by which the deficiencies of private understanding are to be supplied. It is to suffer the rash and ignorant to act at discretion, and then to depend for the legality of that action on the sentence of the judge. He that is thus governed, lives not by law, but by opinion: not by a certain rule to which he can apply his intention before he acts, but by an uncertain and variable opinion, which he can never know but after he has committed the act on which that opinion shall be passed. He lives by a law (if a law it be) which he can never know before he has offended it. To this case may be justly applied that important principle, *misera est servitus ubi jus est aut incognitum aut vagum*. If intromission be not criminal till it exceeds a certain point, and that point be unsettled, and consequently different in different minds, the right of intromission, and the right of the creditor arising from it, are all *jura vaga*, and, by consequence, are *jura incognita*; and the result can be no other than a *misera servitus*, an uncertainty concerning the event of action, a servile dependance on private opinion.

"It may be urged, and with great plausibility, that there may be intromission without fraud; which, however true, will by no means justify an occasional and arbitrary relaxation of

the law. The end of law is protection as well as vengeance. Indeed, vengeance is never used but to strengthen protection. That society only is well governed, where life is freed from danger, and from suspicion; where possession is so sheltered by salutary prohibitions, that violation is prevented more frequently than punished. Such a prohibition was this, while it operated with its original force. The creditor of the deceased was not only without loss, but without fear. He was not to seek a remedy for an injury suffered; for injury was warded off.

"As the law has been sometimes administered, it lays us open to wounds, because it is imagined to have the power of healing. To punish fraud when it is detected, is the proper art of vindictive justice: but to prevent frauds, and make punishment unnecessary, is the great employment of legislative wisdom. To permit intromission, and to punish fraud, is to make law no better than a pitfall. To tread upon the brink is safe; but to come a step further is destruction. But, surely, it is better to enclose the gulph, and hinder all access, than by encouraging us to advance a little, to entice us afterwards a little further, and let us perceive our folly only by our destruction.

"As law supplies the weak with adventitious strength, it likewise enlightens the ignorant with extrinsic understanding. Law teaches us to know when we commit injury and when we suffer it. It fixes certain marks upon actions, by which we are admonished to do or to forbear them. *Qui sibi bene temperat in lictis*, says one of the fathers, *nunquam cadet in illicita*. He who never intromits at all, will never intromit with fraudulent intentions.

"The relaxation of the law against vicious intromission, has been very favourably represented by a great master of jurisprudence,\* whose words have been exhibited with unnecessary pomp, and seem to be considered as irresistibly decisive. The great moment of his authority makes it necessary to examine his position. 'Some-ages ago (says he), before the ferocity of the inhabitants of this part of the island was subdued, the utmost severity of the civil law was necessary, to restrain individuals from plundering each other. Thus, the man who intermeddled irregularly with the moveables of a person deceased, was subjected to all the debts of the deceased without limitation. This makes a branch of the law of Scotland, known by the name of *vicious intromission*: and so rigidly was this regulation applied in our Courts of Law, that the most trifling moveable abstracted *mala fide*, subjected the intermeddler to the foregoing consequences, which proved in many instances a most rigorous punishment. But this severity

was necessary, in order to subdue the undisciplined nature of our people. It is extremely remarkable, that in proportion to our improvement in manners, this regulation has been gradually softened and applied by our Sovereign Court with a sparing hand.'

"I find myself under the necessity of observing, that this learned and judicious writer has not accurately distinguished the deficiencies and demands of the different conditions of human life, which, from a degree of savageness and independence, in which all laws are vain, passes, or may pass, by innumerable gradations, to a state of reciprocal benignity, in which laws shall be no longer necessary. Men are first wild and unsocial, living each man to himself, taking from the weak, and losing to the strong. In their first coalitions of society, much of this original savageness is retained. Of general happiness, the product of general confidence, there is yet no thought. Men continue to prosecute their own advantages by the nearest way; and the utmost severity of the civil law is necessary to restrain individuals from plundering each other. The restraints then necessary, are restraints from plunder, from acts of public violence, and undisguised oppression. The ferocity of our ancestors, as of all other nations, produced not fraud, but rapine. They had not yet learned to cheat, and attempted only to rob. As manners grew more polished, with the knowledge of good, men attain likewise dexterity in evil. Open rapine becomes less frequent, and violence gives way to cunning. Those who before invaded pastures and stormed houses, now begin to enrich themselves by unequal contracts and fraudulent intromissions. It is not against the violence of ferocity, but the circumventions of deceit, that this law was framed; and I am afraid the increase of commerce, and the incessant struggle for riches which commerce excites, give us no prospect of an end speedily to be expected of artifice and fraud. It therefore seems to be no very conclusive reasoning, which connects those two propositions:—'the nation is become less ferocious, and therefore the laws against fraud and *convin* shall be relaxed.'

"Whatever reason may have influenced the Judges to a relaxation of the law, it was not that the nation was grown less fierce; and, I am afraid, it cannot be affirmed, that it is grown less fraudulent.

"Since this law has been represented as rigorously and unreasonably penal, it seems not improper to consider what are the conditions and qualities that make the justice or propriety of a penal law.

"To make a penal law reasonable and just, two conditions are necessary, and two proper. It is necessary that the law should be adequate to its end; that, if it be observed, it shall prevent the evil against which it is directed. It is,

\* Lord Kames, in his "Historical Law Tracts."

secondly, necessary that the end of the law be of such importance as to deserve the security of a penal sanction. The other conditions of a penal law, which, though not absolutely necessary, are to a very high degree fit, are, that to the moral violation of the law there are many temptations, and that of the physical observance there is great facility.

"All these conditions apparently concur to justify the law which we are now considering. Its end is the security of property, and property very often of great value. The method by which it effects the security is efficacious, because it admits in its original rigour, no gradations of injury; but keeps guilt and innocence apart, by a distinct and definite limitation. He that intromits, is criminal; he that intromits not, is innocent. Of the two secondary considerations it cannot be denied that both are in our favour. The temptation to intromit is frequent and strong: so strong and so frequent, as to require the utmost activity of justice, and vigilance of caution, to withstand its prevalence; and the method by which a man may entitle himself to legal intromission, is so open and so facile, that to neglect it is a proof of fraudulent intention: for why should a man omit to do (but for reasons which he will not confess) that which he can do so easily, and that which he knows to be required by the law? If temptation were rare, a penal law might be deemed unnecessary. If the duty enjoined by the law were of difficult performance, omission, though it could not be justified, might be pitied. But in the present case, neither equity nor compassion operate against it. A useful, a necessary law is broken, not only without a reasonable motive, but with all the inducements to obedience that can be derived from safety and facility.

"I therefore return to my original position, that a law, to have its effects, must be permanent and stable. It may be said in the language of the schools, *Lex non recipit majus et minus*,—we may have a law, or we may have no law, but we cannot have half a law. We must either have a rule of action, or be permitted to act by discretion and by chance. Deviations from the law must be uniformly punished, or no man can be certain when he shall be safe.

"That from the rigour of the original institution this court has sometimes departed, cannot be denied. But as it is evident that such deviations as they make law uncertain, make life unsafe, I hope, that the wisdom of our ancestors will be treated with due reverence: and that consistent and steady decisions will furnish the people with a rule of action, and leave fraud and fraudulent intromissions no future hope of impunity or escape."

## ON LAY-PATRONAGE

IN THE CHURCH OF SCOTLAND.

[Question—Whether the claim of lay-patrons to present ministers to parishes be well founded: and supposing it to be well founded, whether it ought to be exercised without the concurrence of the people?—Written in 1773.]

"Against the right of patrons is commonly opposed, by the inferior judicatures, the plea of conscience. Their conscience tells them, that the people ought to choose their pastor: their conscience tells them, that they ought not to impose upon a congregation a minister ungrateful and unacceptable to his auditors. Conscience is nothing more than a conviction felt by ourselves of something to be done, or something to be avoided: and in questions of simple unperplexed morality, conscience is very often a guide that may be trusted. But before conscience can determine, the state of the question is supposed to be completely known. In questions of law, or of fact, conscience is very often confounded with opinion. No man's conscience can tell him the rights of another man; they must be known by rational investigation or historical inquiry. Opinion, which he that holds it may call his conscience, may teach some men that religion would be promoted, and quiet preserved, by granting to the people universally the choice of their ministers. But it is a conscience very ill informed that violates the rights of one man, for the convenience of another. Religion cannot be promoted by injustice: and it was never yet found that a popular election was very quietly transacted.

"That justice would be violated by transferring to the people the right of patronage, is apparent to all who know whence that right had its original. The right of patronage was not at first a privilege torn by power from unresisting poverty. It is not an authority at first usurped in times of ignorance, and established only by succession and by precedents. It is not a grant capriciously made from a higher tyrant to a lower. It is a right dearly purchased by the first possessors, and justly inherited by those that succeed them. When Christianity was established in this island, a regular mode of worship was prescribed. Public worship requires a public place; and the proprietors of lands, as they were converted, built churches for their families and their vassals. For the maintenance of ministers they settled a certain portion of their lands; and a district, through which each minister was required to extend his care, was, by that circumscription, constituted a parish. This is a position so generally received in England, that the extent of a manor and of a parish are regularly received for each other. The churches which the proprietors of lands had thus built and

thus endowed, they justly thought themselves entitled to provide with ministers; and where the episcopal government prevails, the bishop has no power to reject a man nominated by the patron, but for some crime that might exclude him from the priesthood. For the endowment of the church being the gift of the landlord, he was consequently at liberty to give it according to his choice, to any man capable of performing the holy offices. The people did not choose him, because the people did not pay him.

"We hear it sometimes urged, that this original right is passed out of memory, and is obliterated and obscured by many translations of property and changes of government; that scarce any church is now in the hands of the heirs of the builders; and that the present persons have entered subsequently upon the pretended rights by a thousand accidental and unknown causes. Much of this, perhaps, is true. But how is the right of patronage extinguished? If the right followed the lands, it is possessed by the same equity by which the lands are possessed. It is, in effect, part of the manor, and protected by the same laws with every other privilege. Let us suppose an estate forfeited by treason, and granted by the Crown to a new family. With the lands were forfeited all the rights appendant to those lands; by the same power that grants the lands, the rights also are granted. The right lost to the patron falls not to the people, but is either retained by the Crown, or, what to the people is the same thing, is by the Crown given away. Let it change hands ever so often, it is possessed by him that receives it with the same right as it was conveyed. It may, indeed, like all our possessions, be forcibly seized or fraudulently obtained. But no injury is still done to the people; for what they never had, they have never lost. Caius may usurp the right of Titius, but neither Caius nor Titius injure the people; and no man's conscience, however tender or however active, can prompt him to restore what may be proved to have been never taken away. Supposing, what I think cannot be proved, that a popular election of ministers were to be desired, our desires are not the measure of equity. It were to be desired that power should be only in the hands of the merciful, and riches in the possession of the generous; but the law must leave both riches and power where it finds them; and must often leave riches with the covetous, and power with the cruel. Convenience may be a rule in little things, where no other rule has been established. But as the great end of government is to give every man his own, no inconvenience is greater than that of making right uncertain. Nor is any man more an enemy to public peace, than he who fills weak heads with imaginary claims, and breaks the series of civil subordination, by inciting the lower classes of mankind to encroach upon the higher.

"Having thus shown that the right of patronage, being originally purchased, may be legally transferred, and that it is now in the hands of lawful possessors, at least as certainly as any other right;—we have left the advocates of the people no other plea than that of convenience. Let us, therefore, now consider what the people would really gain by a general abolition of the right of patronage. What is most to be desired by such a change is, that the country should be supplied with better ministers. But why should we suppose that the parish will make a wiser choice than the patron? If we suppose mankind actuated by interest, the patron is more likely to choose with caution, because he will suffer more by choosing wrong. By the deficiencies of his minister, or by his vices, he is equally offended with the rest of the congregation; but he will have this reason more to lament them, that they will be imputed to his absurdity or corruption. The qualifications of a minister are well known to be learning and piety. Of his learning the patron is probably the only judge in the parish; and of his piety not less a judge than others; and is more likely to inquire minutely and diligently before he gives a presentation, than one of the parochial rabble, who can give nothing but a vote. It may be urged, that though the parish might not choose better ministers, they would at least choose ministers whom they like better, and who would therefore officiate with greater efficacy. That ignorance and perverseness should always obtain what they like, was never considered as the end of government; of which it is the great and standing benefit, that the wise see for the simple, and the regular act for the capricious. But that this argument supposes the people capable of judging, and resolute to act according to their best judgments, though this be sufficiently absurd, it is not all its absurdity. It supposes not only wisdom, but unanimity in those, who upon no other occasions are unanimous or wise. If by some strange concurrence all the voices of a parish should unite in the choice of any single man, though I could not charge the patron with injustice for presenting a minister, I should censure him as unkind and injudicious. But it is evident, that as in all other popular elections there will be contrariety of judgment and acrimony of passion, a parish upon every vacancy would break into factions, and the contest for the choice of a minister would set neighbours at variance, and bring discord into families. The minister would be taught all the arts of a candidate, would flatter some, and bribe others; and the electors, as in all other cases, would call for holidays and ale, and break the heads of each other during the jollity of the canvass. The time must, however, come at last, when one of the factions must prevail, and one of the ministers get possession of the church. On what terms does he enter

upon his ministry but those of enmity with half his parish? By what prudence or what diligence can he hope to conciliate the affections of that party by whose defeat he has obtained his living? Every man who voted against him will enter the church with hanging head and downcast eyes, afraid to encounter that neighbour by whose vote and influence he has been overpowered. He will hate his neighbour for opposing him, and his minister for having prospered by the opposition; and as he will never see him but with pain, he will never see him but with hatred. Of a minister presented by the patron, the parish has seldom any thing worse to say than that they do not know him. Of a minister chosen by a popular contest, all those who do not favour him, have nursed up in their bosoms principles of hatred and reasons of rejection. Anger is excited principally by pride. The pride of a common man is very little exasperated by the supposed usurpation of an acknowledged superior. He bears only his little share of a general evil, and suffers in common with the whole parish; but when the contest is between equals, the defeat has many aggravations, and he that is defeated by his next neighbour, is seldom satisfied without some revenge: and it is hard to say what bitterness of malignity would prevail in a parish where these elections should happen to be frequent, and the enmity of opposition should be rekindled before it had cooled."

### ON PULPIT CENSURE.

[In 1776, in the course of a contested election for the borough of Dumfermline, one of the agents for a candidate who was charged with having been unfaithful to his employer, and with having deserted to the opposite party for a pecuniary reward, attacked very rudely in a newspaper the Rev. Mr. James Thomson, one of the ministers of that place, on account of a supposed allusion to him in one of his sermons. Upon this the minister, on a subsequent Sunday, arraigned him by name from the pulpit with some severity; and the agent, after the sermon was over, rose up and asked the minister aloud, "What bribe he had received for telling so many lies from the chair of verity?" The person arraigned, and his father and brother, who also had a share both of the reproof from the pulpit, and in the retaliation, brought an action against Mr. Thomson, in the Court of Session, for defamation and damages, and the court decided against the reverend defendant. Dr. Johnson was satisfied that this judgment was wrong, and dictated to Mr. Boswell, who was one of the defendant's counsel, the following argument in confutation of it.]

"Of the censure pronounced from the pulpit,

our determination must be formed, as in other cases, by a consideration of the act itself, and the particular circumstances with which it is invested.

"The right of censure and rebuke seems necessarily appendant to the pastoral office. He, to whom the care of a congregation is entrusted, is considered as the shepherd of a flock, as the teacher of a school, as the father of a family. As a shepherd tending not his own sheep, but those of his master, he is answerable for those that stray, and that lose themselves by straying. But no man can be answerable for losses which he has not power to prevent, or for vagrancy which he has not authority to restrain.

"As a teacher giving instruction for wages, and liable to reproach, if those whom he undertakes to inform make no proficiency, he must have the power of enforcing attendance, of awakening negligence, and repressing contradiction.

"As a father, he possesses the paternal authority of admonition, rebuke, and punishment. He cannot, without reducing his office to an empty name, be hindered from the exercise of any practice necessary to stimulate the idle, to reform the vicious, to check the petulant, and correct the stubborn.

"If we inquire into the practice of the primitive church, we shall, I believe, find the ministers of the word exercising the whole authority of this complicated character. We shall find them not only encouraging the good by exhortation, but terrifying the wicked by reproof and denunciation. In the earliest ages of the church, while religion was yet pure from secular advantages, the punishment of sinners was public censure, and open penance: penalties inflicted merely by ecclesiastical authority, at a time when the church had yet no help from the civil power: while the hand of the magistrate lifted only the rod of persecution; and when governors were ready to afford a refuge to all those who fled from clerical authority."

"That the church, therefore, had once a power of public censure is evident, because that power was frequently exercised. That it borrowed not its power from the civil authority, is likewise certain, because civil authority was at that time its enemy.

"The hour came at length, when, after three hundred years of struggle and distress, Truth took possession of imperial power, and the civil laws lent their aid to the ecclesiastical constitutions. The magistrate from that time co-operated with the priest, and clerical sentences were made efficacious by secular force. But the state, when it came to the assistance of the church, had no intention to diminish its authority. Those rebukes and those censures which were lawful before, were lawful still. But they had hitherto operated only upon voluntary submission. The

refractory and contemptuous were at first in no danger of temporal severities, except what they might suffer from the reproaches of conscience, or the detestation of their fellow Christians. When religion obtained the support of law, if admonitions and censures had no effect, they were seconded by the magistrates with coercion and punishment.

"It therefore appears from ecclesiastical history, that the right of inflicting shame by public censure, has been always considered as inherent in the church: and that this right was not conferred by the civil power; for it was exercised when the civil power operated against it. By the civil power it was never taken away; for the Christian magistrate interposed his office, not to rescue sinners from censure, but to supply more powerful means of reformation; to add pain where shame was insufficient; and when men were proclaimed unworthy of the society of the faithful, to restrain them by imprisonment, from spreading abroad the contagion of wickedness.

"It is not improbable that from this acknowledged power of public censure, grew in time the practice of auricular confession. Those who dreaded the blast of public reprehension, were willing to submit themselves to the priest, by a private accusation of themselves; and to obtain a reconciliation with the church by a kind of clandestine absolution, and invisible penance; conditions with which the priest would in times of ignorance and corruption easily comply, as they increased his influence, by adding the knowledge of secret sins to that of notorious offences, and enlarged his authority, by making him the sole arbiter of the terms of reconciliation.

"From this bondage the Reformation set us free. The minister has no longer power to press into the retirements of conscience, or torture us by interrogatories, or put himself in possession of our secrets and our lives. But though we have thus controlled his usurpations, his just and original power remains unimpaired. He may still see, though he may not pry: he may yet hear, though he may not question. And that knowledge which his eyes and ears force upon him it is still his duty to use, for the benefit of his flock. A father who lives near a wicked neighbour, may forbid a son to frequent his company. A minister who has in his congregation a man of open and scandalous wickedness, may warn his parishioners to shun his conversation. To warn them is not only lawful, but not to warn them would be criminal. He may warn them one by one in friendly converse, or by a parochial visitation. But if he warn each man singly, what shall forbid him to warn them altogether? Of that which is to be made known to all, how is there any difference whether it be communicated to each singly, or

to all together? What is known to all, must necessarily be public; whether it shall be public at once, or public by degrees, is the only question. And of a sudden and solemn publication the impression is deeper, and the warning more effectual.

"It may easily be urged, if a minister be thus left at liberty to delate sinners from the pulpit, and to publish at will the crimes of a parishioner, he may often blast the innocent and distress the timorous. He may be suspicious, and condemn without evidence: he may be rash, and judge without examination: he may be severe, and treat slight offences with too much harshness: he may be malignant and partial and gratify his private interest or resentment under the shelter of his pastoral character.

"Of all this there is possibility, and of all this there is danger. But if possibility of evil be to exclude good, no good ever can be done. If nothing is to be attempted in which there is danger, we must all sink into hopeless inactivity. The evils that may be feared from this practice arise not from any defect in the institution, but from the infirmities of human nature. Power, in whatever hands it is placed, will be sometimes improperly exerted; yet courts of law must judge, though they will sometimes judge amiss. A father must instruct his children, though he may often want instruction. A minister must censure sinners, though his censure may be sometimes erroneous by want of judgment, and sometimes unjust by want of honesty.

"If we examine the circumstances of the present case, we shall find the sentence neither erroneous nor unjust: we shall find no breach of private confidence, no intrusions into secret transactions. The fact was notorious and indubitable; so easy to be proved, that no proof was desired. The act was base and treacherous, the perpetration insolent and open, and the example naturally mischievous. The minister, however, being retired and recluse, had not yet heard what was publicly known throughout the parish; and on occasion of a public election, warned his people, according to his duty, against the crimes which public elections frequently produce. His warning was felt by one of his parishioners, as pointed particularly at himself. But instead of producing, as might be wished, private compunction and immediate reformation, it kindled only rage and resentment. He charged his minister, in a public paper, with scandal, defamation, and falsehood. The minister, thus reproached, had his own character to vindicate, upon which his pastoral authority must necessarily depend. To be charged with a defamatory lie, is an injury which no man patiently endures in common life. To be charged with polluting the pastoral office with scandal and falsehood, was a violation of char-

acter still more atrocious, as it affected not only his personal but his clerical veracity. His indignation naturally rose in proportion to his honesty, and with all the fortitude of injured honesty, he dared his calumniator in the church, and at once exonerated himself from censure, and rescued his flock from deception and from danger. The man whom he accuses pretends not to be innocent: or at least only pretends; for he declines a trial. The crime of which he is accused has frequent opportunities and strong temptations. It has already spread far, with much depravation of private morals, and much injury to public happiness. To warn the people, therefore, against it, was not wanton and officious, but necessary and pastoral.

"What then is the fault with which this worthy minister is charged? He has usurped no dominion over conscience. He has exerted no authority in support of doubtful and controverted opinions. He has not dragged into light a bashful and corrigible sinner. His censure was directed against a breach of morality, against an act which no man justifies. The man who appropriated this censure to himself, is evidently and notoriously guilty. His consciousness of his own wickedness incited him to attack his faithful reprover with open insolence and printed accusations. Such an attack made defence necessary; and we hope it will be at last decided that the means of defence were just and lawful."

## REVIEWS AND CRITICISMS.

LETTER ON DU HALDE'S HISTORY  
OF CHINA, 1738.

THERE are few nations in the world more talked of, or less known, than the Chinese. The confused and imperfect account which travellers have given of their grandeur, their sciences, and their policy, have hitherto excited admiration, but have not been sufficient to satisfy even a superficial curiosity. I therefore return you my thanks for having undertaken, at so great an expense, to convey to English readers the most copious and accurate account, yet published, of that remote and celebrated people, whose antiquity, magnificence, power, wisdom, peculiar customs, and excellent constitution, undoubtedly deserve the attention of the public.

As the satisfaction found in reading descriptions of distant countries arises from a comparison which every reader naturally makes, between the ideas which he receives from the relation, and those which were familiar to him before; or, in other words, between the countries with which he is acquainted, and that which the author displays to his imagination; so it varies according to the likeness or dissimilitude of the manners of the two nations. Any custom or law unheard and unthought of before, strikes us with that *surprise* which is the effect of novelty; but a practice conformable to our own pleasures us, because it flatters our self-love, by showing us that our opinions are approved by the general concurrence of mankind. Of these two pleasures, the first is more violent, the other more lasting; the first seems to partake more of instinct than reason, and is not

easily to be explained, or defined; the latter has its foundation in good sense and reflection, and evidently depends on the same principles with most human passions.

An attentive reader will frequently feel each of these agreeable emotions in the perusal of Du Halde. He will find a calm, peaceful satisfaction, when he reads the moral precepts and wise instructions of the Chinese sages; he will find that virtue is in every place the same, and will look with new contempt on those wild reasoners, who affirm that morality is merely ideal, and that the distinctions between good and ill are wholly chimerical.

But he will enjoy all the pleasure that novelty can afford, when he becomes acquainted with the Chinese government and constitution; he will be amazed to find that there is a country where nobility and knowledge are the same, where men advance in rank as they advance in learning, and promotion is the effect of virtuous industry, where no man thinks ignorance a mark of greatness, or laziness the privilege of high birth.

His surprise will be still heightened by the relations he will there meet with of honest ministers, who, however incredible it may seem, have been seen more than once in that monarchy, and have adventured to admonish the emperors of any deviation from the laws of their country, or any error in their conduct, that has endangered either their own safety, or the happiness of their people. He will read of emperors, who, when they have been addressed in this manner, have neither stormed, nor threatened, nor kicked their ministers, nor

thought it majestic to be obstinate in the wrong : but have, with a greatness of mind worthy of a Chinese monarch, brought their actions willingly to the test of reason, law, and morality, and scorned to exert their power in defence of that which they could not support by argument.

I must confess my wonder at these relations was very great, and had been much greater, had I not often entertained my imagination with an instance of the like conduct in a prince of England, on an occasion that happened not quite a century ago, and which I shall relate, that so remarkable an example of spirit and firmness in a subject, and of conviction and compliance in a prince, may not be forgotten. And I hope that you will look upon this letter as intended to do honour to my country, and not to serve your interest by promoting your undertaking.

The prince, at the christening of his first son, had appointed a noble duke to stand as proxy for the father of the princess, without regard to the claim of a marquis, (their apparent to a higher title,) to whom, as lord of the bed-chamber then in waiting, that honour properly belonged.—The marquis was wholly unacquainted with the affair, till he heard at dinner the duke's health drunk by the name of the prince he was that evening to represent. This he took an opportunity after dinner of inquiring the reason of, and was informed by the prince's treasurer of his highness's intention. The marquis immediately declared, that he thought his right invaded, and his honour injured, which he could not bear without requiring satisfaction from the usurper of his privileges ; nor would he longer serve a prince who paid no regard to his lawful pretensions. The treasurer could not deny that the marquis's claim was incontestable, and by his permission acquainted the prince with his resolution. The prince thereupon sending for the marquis, demanded, with a resentful and imperious air, how he could dispute his commands, and by what authority he presumed to control him in the management of his own family, and the christening of his own son. The marquis answered that he did not encroach upon the prince's right, but only defended his own : that he thought his honour concerned, and, as he was a young man, would not enter the world with the loss of his reputation. The prince, exasperated to a very high degree, repeated his commands ; but the marquis, with a spirit and firmness not to be depressed or shaken, persisted in his determination to assert his claim, and concluded with declaring that he would do himself the justice that was denied him, and that not the prince himself should trample on his character. He was then ordered to withdraw, and the duke coming to him, assured him, that the honour was offered him unasked ; that when he accepted it, he was not informed of his lordship's claim, and that now he very willingly resigned

it. The marquis very gracefully acknowledged the civility of the duke's expressions, and declared himself satisfied with his grace's conduct ; but thought it inconsistent with his honour to accept the representation as a cession of the duke, or on any other terms than as his own acknowledged right. The prince, being informed of the whole conversation, and having upon inquiry found all the precedents on the marquis's side, thought it below his dignity to persist in an error, and restoring the marquis to his right upon his own conditions, continued him in his favour, believing that he might safely trust his affairs in the hands of a man, who had so nice a sense of honour, and so much spirit to assert it.

EUBULUS.

## REVIEW OF THE ACCOUNT OF THE CONDUCT OF THE DUTCHESS OF MARLBOROUGH.

FROM THE GENTLEMAN'S MAGAZINE, 1742.

THE universal regard which is paid by mankind to such accounts of public transactions as have been written by those who were engaged in them, may be, with great probability, ascribed to that ardent love of truth, which nature has kindled in the breast of man, and which remains even where every other laudable passion is extinguished. We cannot but read such narratives with uncommon curiosity, because we consider the writer as indubitably possessed of the ability to give us just representations, and do not always reflect, that, very often, proportionate to the opportunities of knowing the truth, are the temptations to disguise it.

Authors of this kind have at least an incontestable superiority over those whose passions are the same, and whose knowledge is less. It is evident that those who write in their own defence, discover often more impartiality, and less contempt of evidence, than the advocates which faction or interest have raised in their favour.

It is, however, to be remembered, that the parent of all Memoirs, is the ambition of being distinguished from the herd of mankind, and the fear of either infamy or oblivion, passions which cannot but have some degree of influence, and which may at least affect the writer's choice of facts, though they may not prevail upon him to advance known falsehoods. He may aggravate or extenuate particular circumstances, though he preserves the general transaction ; as the general likeness may be preserved in painting, though a blemish is hid, or a beauty improved.

Every man that is solicitous about the esteem of others, is in a great degree desirous of his own, and makes by consequence his first apology

for his conduct to himself; and when he has once deceived his own heart, which is for the greatest part too easy a task, he propagates the deceit in the world without reluctance or consciousness of falsehood.

But to what purpose, it may be asked, are such reflections, except to produce a general incredulity, and to make history of no use? The man who knows not the truth *cannot*, and he who knows it *will not*, tell it; what then remains, but to distrust every relation, and live in perpetual negligence of past events; or what is still more disagreeable, in perpetual suspense?

That by such remarks some incredulity is indeed produced, cannot be denied, but distrust is a necessary qualification of a student in history. Distrust quickens his discernment of different degrees of probability, animates his search after evidence, and perhaps heightens his pleasure at the discovery of truth; for truth, though not always obvious, is generally discoverable, nor is it any where more likely to be found than in private memoirs, which are generally published at a time when any gross falsehood may be detected by living witnesses, and which always contain a thousand incidents, of which the writer could not have acquired a certain knowledge, and which he has no reason for disguising.

Such is the Account lately published by the Dutchess of Marlborough, of her own Conduct, by which those who are very little concerned about the character which it is principally intended to preserve or to retrieve, may be entertained and instructed. By the perusal of this account, the inquirer into human nature may obtain an intimate acquaintance with the characters of those whose names have crowded the latest histories, and discover the relation between their minds and their actions. The historian may trace the progress of great transactions, and discover the secret causes of important events. And, to mention one use more, the polite writer may learn an unaffected dignity of style, and an artful simplicity of narration.

The method of confirming her relation, by inserting at length the letters that every transaction occasioned, has not only set the greatest part of the work above the danger of confutation, but has added to the entertainment of the reader, who has now the satisfaction of forming to himself the characters of the actors, and judging now nearly such as have hitherto been given of them agree with those which they now give of themselves.

Even of those whose letters could not be made public, we have a more exact knowledge than can be expected from general histories, because we see them in their private apartments in their careless hours, and observe those actions in which they indulged their own inclinations, without any regard to censure or applause.

Thus it is that we are made acquainted with

the disposition of King William, of whom it may be collected from various instances that he was arbitrary, insolent, gloomy, rapacious, and brutal; that he was at all times disposed to play the tyrant; that he had neither in great things nor in small the manners of a gentleman; that he was capable of gaining money by mean artifices; and that he only regarded his promise when it was his interest to keep it.

There are doubtless great numbers who will be offended with this delineation of the mind of the immortal William, but they whose honesty or sense enables them to consider impartially the events of his reign, will now be enabled to discover the reason of the frequent oppositions which he encountered, and of the personal affronts which he was sometimes forced to endure. They will observe that it is not always sufficient to do right, and that it is often necessary to add gracefulness to virtue. They will recollect how vain it is to endeavour to gain men by great qualities, while our cursory behaviour is insolent and offensive: and that those may be disgusted by little things who can scarcely be pleased with great.

Charles the Second, by his affability and politeness, made himself the idol of the nation, which he betrayed and sold. William the Third was, for his insolence and brutality, hated by that people which he protected and enriched:—had the best part of these two characters been united in one prince, the house of Bourbon had fallen before him.

It is not without pain that the reader observes a shade encroaching upon the light with which the memory of Queen Mary has been hitherto invested—the popular, the beneficent, the pious, the celestial Queen Mary, from whose presence none ever withdrew without an addition to his happiness. What can be charged upon this delight of human kind? Nothing less than that *she wanted bowels*, and was insolent with her power; that she was resentful, and pertinacious in her resentment; that she descended to mean acts of revenge, when heavier vengeance was not in her power; that she was desirous of controlling where she had no authority, and backward to forgive, even when she had no real injury to complain of.

This is a character so different from all those that have been hitherto given of this celebrated princess, that the reader stands in suspense, till he considers the inconsistencies in human conduct, remembers that no virtue is without its weakness, and considers that Queen Mary's character has hitherto had this great advantage, that it has only been compared with those of kings.

The greatest number of the letters inserted in this account were written by Queen Anne, of which it may be truly observed, that they will be equally useful for the confutation of those

who have exalted or depressed her character. They are written with great purity and correctness, without any forced expressions, affected phrases, or unnatural sentiments, and show uncommon clearness of understanding, tenderness of affection, and rectitude of intention; but discover at the same time, a temper timorous, anxious, and impatient of misfortune, a tendency to burst into complaints, helpless dependance on the affection of others, and a weak desire of moving compassion. There is indeed nothing insolent or overbearing, but then there is nothing great, or firm, or regal; nothing that enforces obedience and respect, or which does not rather invite opposition and petulance. She seems born for friendship, not for government; and to be unable to regulate the conduct of others, otherwise than by her own example.

That this character is just, appears from the occurrences in her reign, in which the nation was governed for many years by a party whose principles she detested, but whose influence she knew not how to obviate, and to whose schemes she was subservient against her inclination.

The charge of tyrannising over her, which was made by turns against each party, proves that, in the opinion of both, she was easily to be governed; and though it may be supposed that the letters here published were selected with some regard to respect and ceremony, it appears plainly enough from them that she was what she has been represented, little more than the slave of the Marlborough family.

The inferior characters, as they are of less importance, are less accurately delineated; the picture of Harley is at least partially drawn, all the deformities are heightened, and the beauties, for beauties of mind he certainly had, are entirely omitted.

## REVIEW OF MEMOIRS OF THE COURT OF AUGUSTUS.

BY THOMAS BLACKWELL, J. U. D.

PRINCIPAL OF MARISCHAL-COLLEGE IN THE UNIVERSITY OF ABERDEEN.

THE first effect which this book has upon the reader, is that of disgusting him with the author's vanity. He endeavours to persuade the world, that here are some new treasures of literature spread before his eyes; that something is discovered, which to this happy day had been concealed in darkness; that by his diligence time has been robbed of some valuable monument which he was on the point of devouring; and that names and facts doomed to oblivion are now restored to fame.

How must the unlearned reader be surprised,

when he shall be told that Mr. Blackwell has neither digged in the ruins of any demolished city, nor found out the way to the library of Fez; nor had a single book in his hands, that has not been in the possession of every man that was inclined to read it, for years and ages; and that his book relates to a people who, above all others, have furnished employment to the studious, and amusements to the idle; who have scarcely left behind them a coin or a stone, which has not been examined and explained a thousand times, and whose dress, and food, and household stuff, it has been the pride of learning to understand.

A man need not fear to incur the imputation of vicious diffidence or affected humility, who should have forborne to promise many novelties, when he perceived such multitudes of writers possessed of the same materials, and intent upon the same purpose. Mr. Blackwell knows well the opinion of Horace, concerning those that open their undertakings with magnificent promises; and he knows likewise the dictates of Common Sense and Common Honesty, names of greater authority than that of Horace, who direct that no man should promise what he cannot perform.

I do not mean to declare that this volume has nothing new, or that the labours of those who have gone before our author, have made his performance a useless addition to the burden of literature. New works may be constructed with old materials, the disposition of the parts may show contrivance, the ornaments interspersed may discover elegance.

It is not always without good effect that men of proper qualifications write in succession on the same subject, even when the latter add nothing to the information given by the former; for the same ideas may be delivered more intelligibly or more delightfully by one than by another, or with attractions that may lure minds of a different form. No writer pleases all, and every writer may please some.

But after all, to inherit is not to acquire; to decorate is not to make; and the man who had nothing to do but to read the ancient authors who mention the Roman affairs, and reduce them to common-places, ought not to boast himself as a great benefactor to the studious world.

After a preface of boast, and a letter of flattery, in which he seems to imitate the address of Horace in his *vile patavis modicis Sabinum*—he opens his book with telling us, that the "Roman republic, after the horrible proscription, was no more at bleeding Rome. The regal power of her consuls, the authority of her senate, and the majesty of her people, were now trampled under foot; these [for those] divine laws and hallowed customs, that had been the essence of her constitution—were set at nought, and her best friends were lying exposed in their blood."

These were surely very dismal times to those who suffered; but I know not why any one but a school-boy in his declamation should whine over the commonwealth of Rome, which grew great only by the misery of the rest of mankind. The Romans, like others, as soon as they grew rich grew corrupt, and, in their corruption, sold the lives and freedoms of themselves, and of one another.

"About this time Brutus had his patience put to the *highest* trial: he had been married to Clodia; but whether the family did not please him, or whether he was dissatisfied with the lady's behaviour during his absence, he soon entertained thoughts of a separation. *This raised a good deal of talk*, and the women of the Clodian family inveighed bitterly against Brutus—but he married Portia, who was worthy of such a father as M. Cato, and such a husband as M. Brutus. She had a soul capable of an *exalted passion*, and found a proper object to raise and give it a sanction; she did not only love but adored her husband: his worth, his truth, his every shining and heroic quality, made her gaze upon him like a god, while the endearing returns of esteem and tenderness she met with, brought her joy, her pride, her every wish to centre in her beloved Brutus."

When the reader has been awakened by this rapturous preparation, he hears the whole story of Portia in the same luxuriant style, till she breathed out her last, a little before the *bloody proscription*, and "Brutus complained heavily of his friends at Rome, as not having paid due attention to his *Lady* in the declining state of her health.

He is a great lover of modern terms. His senators and their wives are *Gentlemen and Ladies*. In this review of Brutus's army, who was under the command of *galiant men, not braver officers than true patriots*, he tells us, "that Sextus the Questor was *Paymaster, Secretary at War, and Commissary General*, and that the *sacred discipline* of the Roman required the closest connection, like that of father and son, to subsist between the General of an army and his Questor. Cicero was *General of the Cavalry*, and the next *general officer* was Flavius, *Master of the Artillery*, the elder Lentulus was *Admiral*, and the younger rode in the *Band of Volunteers*: under these the tribunes, *with many others too tedious to name*." Lentulus, however, was but a subordinate officer; for we are informed afterwards, that the Romans had made Sextus Pompeius *Lord High Admiral in all the seas of their dominions*.

Among other affectations of this writer is a furious and unnecessary zeal for liberty, or rather for one form of government as preferable to another. This indeed might be suffered, because political institution is a subject in which men have always differed, and if they continue to

obey their lawful governors, and attempt not to make innovations for the sake of their favourite schemes, they may differ for ever without any just reproach from one another. But who can bear the hardy champion who ventures nothing? who in full security undertakes the defence of the assassination of Cæsar, and declares his resolution to *speak plain*? Yet let not just sentiments be overlooked: he has justly observed, that the greater part of mankind will be naturally prejudiced against Brutus, for all feel the benefits of private friendship: but few can discern the advantages of a well-constituted government.

We know not whether some apology may not be necessary for the distance [seven months] between the first account of this book, and its continuation. The truth is, that this work not being forced upon our attention by much public applause or censure, was sometimes neglected, and sometimes forgotten; nor would it, perhaps, have been now resumed, but that we might avoid to disappoint our readers by an abrupt desertion of any subject.

It is not our design to criticise the facts of this history, but the style; not the veracity, but the address of the writer; for, an account of the ancient Romans, as it cannot nearly interest any present reader, and must be drawn from writings that have been long known, can owe its value only to the language in which it is delivered, and the reflections with which it is accompanied. Dr. Blackwell, however, seems to have heated his imagination so as to be much affected with every event, and to believe that he can affect others. Enthusiasm is indeed sufficiently contagious; but I never found any of his readers much enamoured of the *glorious Pompey, the patriot approved*, or much incensed against the *lawless Cæsar*; whom this author probably stabs every day and night in his sleeping or waking dreams.

He is come too late into the world with his fury for freedom, with his Brutus and Cassius. We have all on this side of the Tweed long since settled our opinions; his zeal for Roman liberty and declamations against the violators of the republican constitution, only stand now in the reader's way, who wishes to proceed in the narrative without the interruption of epithets and exclamations. It is not easy to forbear laughter at a man so bold in fighting shadows, so busy in a dispute two thousand years past, and so zealous for the honour of a people, who while they were poor robbed mankind, and as soon as they became rich, robbed one another. Of these robberies our author seems to have no very quick sense, except when they are committed by Cæsar's party, for every act is sanctified by the name of a patriot.

If this author's skill in ancient literature were less generally acknowledged, one might some-

times suspect that he had too frequently consulted the French writers. He tells us that Archelaus the Rhodian made a speech to Cassius, and *in so saying* dropt some tears, and that Cassius after the reduction of Rhodes was *covered with glory*.—Deiotarus was a keen and happy spirit.—The ingrate Castor kept his court.

His great delight is to show his universal acquaintance with terms of art, with words that every other polite writer has avoided and despised. When Pompey conquered the pirates, he destroyed fifteen hundred ships of the line.—The Xanthian parapets were tore down.—Brutus, suspecting that his troops were plundering, commanded the trumpets to sound to their colours.—Most people understood the act of attainerd passed by the senate.—The Numidian troopers were unlikely in their appearance.—The Numidians beat up one quarter after another.—Salvidienus resolved to pass his men over in boats of leather, and he gave orders for equipping a sufficient number of that sort of small craft.—Pompey had light agile frigates, and fought in a strait where the current and caverns occasion swirls and a roll.—A sharp out-look was kept by the admiral.—It is a run of about fifty Roman miles.—Brutus broke Lipella in the sight of the army.—Mark Antony garbled the senate.—He was a brave man, well qualified for a commodore.

In his choice of phrases he frequently uses words with great solemnity, which every other mouth and pen has appropriated to jocularity and levity. The Rhodians gave up the contest, and in poor plight fled back to Rhodes.—Boys and girls were easily kidnapped.—Deiotarus was a mighty believer of augury.—Deiotarus destroyed his ungracious progeny.—The regularity of the Romans was their mortal aversion.—They desired the consuls to curb such heinous doings.—He had such a shrewd invention, that no side of a question came amiss to him.—Brutus found his mistress a coquettish creature.

He sometimes, with most unlucky dexterity, mixes the grand and the burlesque together; *the violation of faith, Sir, says Cassius, lies at the door of the Rhodians by reiterated acts of perfidy*.—The iron grate fell down, crushed those under it to death, and caught the rest as in a trap.—When the Xanthians heard the military shout, and saw the flame mount, they concluded there would be no mercy. It was now about sun-set, and they had been at hot work since noon.

He has often words or phrases with which our language has hitherto had no knowledge.—One was a heart-friend to the republic.—A deed was expedited.—The Numidians began to reel, and were in hazard of falling into confusion.—The

tutor embraced his pupil close in his arms.—Four hundred women were taxed, who have no doubt been the wives of the best Roman citizens.—Men not born to action are inconsequential in government.—Collectitious troops.—The foot by their violent attack began the fatal break in the Phasaliac field.—He and his brother, with a politic common to other countries, had taken opposite sides.

His epithets are of the gaudy or hyperbolical kind. The glorious news—eager hopes and dismal fears—bleeding Rome—divine laws and hallowed customs—merciless war—intense anxiety.

Sometimes the reader is suddenly ravished with a sonorous sentence, of which when the noise is past, the meaning does not long remain. When Brutus set his legions to fill a moat, instead of heavy dragging and slow toil, they set about it with huzzas and racing, as if they had been striving at the Olympic games. They hurled impetuous down the huge trees and stones, and with shouts forced them into the water; so that the work, expected to continue half the campaign, was with rapid toil completed in a few days. Brutus's soldiers fell to the gate with resistless fury, it gave way at last with hideous crash.—This great and good man, doing his duty to his country, received a mortal wound, and glorious fell in the cause of Rome; may his memory be ever dear to all lovers of liberty, learning, and humanity.—This promise ought ever to embalm his memory.—The queen of nations was torn by no foreign invader.—Rome fell a sacrifice to her own sons, and was ravaged by her unnatural offspring: all the great men of the state, all the good, all the holy, were openly murdered by the wickedest and worst. Little islands cover the harbour of Brindisi, and form the narrow outlet from the numerous creeks that compose its capacious port. At the appearance of Brutus and Cassius a shout of joy rent the heavens from the surrounding multitudes.

Such are the flowers which may be gathered by every hand in every part of this garden of eloquence. But having thus freely mentioned our Author's faults, it remains that we acknowledge his merit; and confess that this book is the work of a man of letters, that it is full of events displayed with accuracy, and related with vivacity; and though it is sufficiently defective to crush the vanity of its Author, it is sufficiently entertaining to invite readers.\*

\* From the Literary Magazine, vol. I. p. 41. 1756

REVIEW OF FOUR LETTERS FROM  
SIR ISAAC NEWTON TO DR.  
BENTLEY,

CONTAINING SOME ARGUMENTS IN PROOF  
OF A DEITY.

FROM THE LITERARY MAGAZINE, VOL. I. p. 89,  
1756.

It will certainly be required, that notice should be taken of a book, however small, written on such a subject, by such an author. Yet I know not whether these Letters will be very satisfactory: for they are answers to inquiries not published; and therefore though they contain many positions of great importance, are, in some parts, imperfect and obscure, by their reference to Dr. Bentley's Letters.

Sir Isaac declares, that what he has done is *due to nothing but industry and patient thought*; and indeed long consideration is so necessary in such abstruse inquiries, that it is always dangerous to publish the productions of great men, which are not known to have been designed for the press, and of which it is uncertain whether much patience and thought have been bestowed upon them. The principal question of these Letters gives occasion to observe how even the mind of Newton gains ground gradually upon darkness.

"As to your first query," says he, "it seems to me, that if the matter of our sun and planets, and all the matter of the universe, were evenly scattered throughout all the heavens, and every particle had an innate gravity towards all the rest, and the whole space throughout which this matter was scattered was but finite; the matter on the outside of this space would by its gravity tend towards all the matter on the inside, and by consequence fall down into the middle of the whole space, and there compose one great spherical mass. But if the matter was evenly disposed throughout an infinite space, it could never convene into one mass, but some of it would convene into one mass, and some into another, so as to make an infinite number of great masses, scattered at great distances from one to another throughout all that infinite space. And thus might the sun and fixed stars be formed, supposing the matter were of a lucid nature. But how the matter should divide itself into two sorts, and that part of it which is fit to compose a shining body, should fall down into one mass and make a sun, and the rest which is fit to compose an opaque body, should coalesce, not into one great body like the shining matter, but into many little ones; or if the sun at first were an opaque body like the planets, or the planets lucid bodies like the sun, how he alone should be changed into a shining body, whilst all they continue opaque, or all they be changed into

opaque ones whilst he remains unchanged, I do not think more explicable by mere natural causes, but am forced to ascribe it to the counsel and contrivance of a voluntary agent."

The hypothesis of matter evenly disposed through infinite space, seems to labour with such difficulties, as makes it almost a contradictory supposition, or a supposition destructive of itself.

*Matter evenly disposed through infinite space*, is either created or eternal; if it was created, it infers a Creator: if it was eternal, it had been from eternity *evenly spread through infinite space*; or it had been once coalesced in masses, and afterwards been diffused. Whatever state was first, must have been from eternity, and what had been from eternity could not be changed, but by a cause beginning to act as it had never acted before, that is, by the voluntary act of some external power. If matter infinitely and evenly diffused was a moment without coalition, it could never coalesce at all by its own power. If matter originally tended to coalesce, it could never be evenly diffused through infinite space. Matter being supposed eternal, there never was a time when it could be diffused before its conglobation, or conglobated before its diffusion.

This Sir Isaac seems by degrees to have understood: for he says, in his second Letter, "The reason why matter evenly scattered through a finite space would convene in the midst, you conceive the same with me; but that there should be a central particle, so accurately placed in the middle, as to be always equally attracted on all sides, and thereby continue without motion, seems to me a supposition fully as hard as to make the sharpest needle stand upright upon its point on a looking-glass. For if the very mathematical centre of the central particle be not accurately in the very mathematical centre of the attractive power of the whole mass, the particle will not be attracted equally on all sides. And much harder is it to suppose all the particles in an infinite space should be so accurately poised one among another, as to stand still in a perfect equilibrium. For I reckon this as hard as to make not one needle only, but an infinite number of them (so many as there are particles in an infinite space) stand accurately poised upon their points. Yet I grant it possible, at least by a divine power; and if they were once to be placed, I agree with you that they would continue in that posture, without motion, for ever, unless put into new motion by the same power. When therefore I said, that matter evenly spread through all space, would convene by its gravity into one or more great masses, I understand it of matter not resting in an accurate poise."

Let not it be thought irreverence to this great name if I observe, that by *matter evenly spread through infinite space*, he now finds it necessary

to mean matter not evenly spread. Matter not evenly spread will indeed convene, but it will convene as soon as it exists. And, in my opinion, this puzzling question about matter is only how that could be that never could have been, or what a man thinks on when he thinks of nothing.

Turn matter on all sides, make it eternal, or of late production, finite or infinite, there can be no regular system produced but by a voluntary and meaning agent. This the great Newton always asserted, and this he asserts in the third letter: but proves in another manner, in a manner perhaps more happy and conclusive.

"The hypothesis of deriving the frame of the world by mechanical principles from matter evenly spread through the heavens, being inconsistent with my system, I had considered it very little before your letter put me upon it, and therefore trouble you with a line or two more about it, if this comes not too late for your use.

"In my former I represented that the diurnal rotations of the planets could not be derived from gravity, but required a divine arm to impress them. And though gravity might give the planets a motion of descent towards the sun, either directly, or with some little obliquity, yet the transverse motions by which they revolve in their several orbs, required the divine arm to impress them according to the tangents of their orbs. I would now add, that the hypothesis of matter being at first evenly spread through the heavens, is, in my opinion, inconsistent with the hypothesis of innate gravity, without a supernatural power to reconcile them, and therefore it infers a Deity. For if there be innate gravity, it is impossible now for the matter of the earth, and all the planets and stars, to fly up from them, and become evenly spread throughout all the heavens, without a supernatural power; and certainly that which can never be hereafter without a supernatural power, could never be heretofore without the same power."

#### REVIEW OF A JOURNAL OF EIGHT DAYS' JOURNEY,

From PORTSMOUTH to KINGSTON UPON THAMES, through Southampton, Wiltshire, &c. with Miscellaneous Thoughts, moral and religious; in Sixty-four Letters: addressed to Two Ladies of the Party. To which is added, An Essay on Tea, considered as pernicious to Health, obstructing Industry, and impoverishing the Nation: with an Account of its Growth, and great Consumption in these Kingdoms; with several Political Reflections; and Thoughts on Public Love: in Thirty-two Letters to Two Ladies. By Mr. H \*\*\*\*\*.

FROM THE LITERARY MAGAZINE, VOL. II. NO. XIII.  
1757.

Our readers may perhaps remember that we

gave them a short account of this book, with a letter extracted from it, in November, 1756. The author then sent us an injunction to forbear his work till a second edition should appear: this prohibition was rather too magisterial; for an author is no longer the sole master of a book which he has given to the public; yet he has been punctually obeyed; we had no desire to offend him, and if his character may be estimated by his book, he is a man whose failings may well be pardoned for his virtues.

The second edition is now sent into the world, corrected and enlarged, and yielded up by the author to the attacks of criticism. But he shall find in us no malignity of censure. We wish, indeed, that among other corrections he had submitted his pages to the inspection of a grammarian, that the elegances of one line might not have been disgraced by the improprieties of another; but with us to mean well is a degree of merit which overbalances much greater errors than impurity of style.

We have already given in our collections one of the letters, in which Mr. Hanway endeavours to show, that the consumption of tea is injurious to the interest of our country. We shall now endeavour to follow him regularly through all his observations on this modern luxury; but it can scarcely be candid, not to make a previous declaration, that he is to expect little justice from the author of this extract, a hardened and shameless tea-drinker, who has for twenty years diluted his meals with only the infusion of this fascinating plant, whose kettle has scarcely time to cool, who with tea amuses the evening, with tea solaces the midnight, and with tea welcomes the morning.

He begins by refuting a popular notion, that bohea and green tea are leaves of the same shrub, gathered at different times of the year. He is of opinion that they are produced by different shrubs. The leaves of tea are gathered in dry weather; then dried and curled over the fire in copper pans. The Chinese use little green tea, imagining that it hinders digestion and excites fevers. How it should have either effect is not easily discovered; and if we consider the innumerable prejudices which prevail concerning our own plants, we shall very little regard these opinions of the Chinese vulgar, which experience does not confirm.

When the Chinese drink tea they infuse it slightly, and extract only the more volatile parts; but though this seems to require great quantities at a time, yet the author believes, perhaps only because he has an inclination to believe it, that the English and Dutch use more than all the inhabitants of that extensive empire. The Chinese drink it sometimes with acids, seldom with sugar; and this practice our author, who has no intention to find any thing right at home, recommends to his countrymen.

The history of the rise and progress of tea-drinking is truly curious. Tea was first imported from Holland by the Earls of Arlington and Ossory, in 1666; from their ladies the women of quality learned its use. Its price was then three pounds a pound, and continued the same to 1707. In 1715, we began to use green tea, and the practice of drinking it descended to the lower class of the people. In 1720, the French began to send it hither by a clandestine commerce. From 1717 to 1726, we imported annually seven hundred thousand pounds. From 1732 to 1742, a million and two hundred thousand pounds were every year brought to London; in some years afterwards three millions; and in 1755, near four millions of pounds, or two thousand tons, in which we are not to reckon that which is surreptitiously introduced, which perhaps is nearly as much. Such quantities are indeed sufficient to alarm us; it is at least worth inquiry to know what are the qualities of such a plant, and what the consequences of such a trade.

He then proceeds to enumerate the mischiefs of tea, and seems willing to charge upon it every mischief that he can find. He begins, however, by questioning the virtues ascribed to it, and denies that the crews of the Chinese ships are preserved in their voyage homewards from the scurvy by tea. About this report I have made some inquiry, and though I cannot find that these crews are wholly exempt from scorbutic maladies, they seem to suffer them less than other mariners in any course of equal length. This I ascribe to the tea, not as possessing any medicinal qualities, but as tempting them to drink more water, to dilute their salt food more copiously, and perhaps to forbear punch, or other strong liquors.

He then proceeds in the pathetic strain, to tell the ladies how, by drinking tea, they injure their health, and what is yet more dear, their beauty.

"To what can we ascribe the numerous complaints which prevail? How many *sweet creatures* of your sex languish with a *weak digestion, low spirits, lassitudes, melancholy*, and twenty disorders, which, in spite of the *faculty*, have yet no names, except the general one of *nervous complaints*? Let them change their diet, and among other articles, leave off drinking tea, it is more than probable the greatest part of them will be restored to health."

"Hot water is also very hurtful to the teeth. The Chinese do not drink their tea so hot as we do, and yet they have bad teeth. This cannot be ascribed entirely to *sugar*, for they use very little, as already observed; but we all know that *hot or cold things which pain the teeth*, destroy them also. If we drank less tea, and used gentle *acids* for the gums and teeth, particularly *sour oranges*, though we had a less number of *French*

*dentists*, I fancy this *essential* part of beauty would be much *better* preserved.

"The women in the United Provinces, who *sip* tea from morning till night, are also as remarkable for *bad teeth*. They also look pallid, and many are troubled with certain feminine disorders arising from a relaxed habit. The Portuguese ladies, on the other hand, entertain with *sweetmeats*, and yet they have very *good teeth*; but their food in general is more of a *farinaceous* and vegetable kind than ours. They also *drink cold water* instead of *sipping hot*, and never taste any fermented liquors; for these reasons the use of *sugar* does not seem to be at all pernicious to them."

"Men seem to have lost their stature and comeliness, and women their beauty. I am not *young*, but methinks there is not quite so much *beauty* in this land as there was. Your very *chambermaids* have lost their bloom, I suppose by *sipping tea*. Even the agitations of the passions at *cards* are not so great enemies to female charms. What Shakspeare ascribes to the concealment of love, is in *this age* more frequently occasioned by the use of *tea*."

To raise the fright still higher, he quotes an account of a pig's tail scalded with tea, on which, however, he does not much insist.

Of these dreadful effects, some are perhaps imaginary, and some may have another cause. That there is less beauty in the present race of females, than in those who entered the world with us, all of us are inclined to think on whom beauty has ceased to smile; but our fathers and grandfathers made the same complaint before us; and our posterity will still find beauties irresistibly powerful.

That the diseases commonly called nervous, tremors, fits, habitual depression, and all the maladies which proceed from laxity and debility, are more frequent than in any former time, is, I believe, true, however deplorable. But this new race of evils will not be expelled by the prohibition of tea. This general languor is the effect of general luxury, of general idleness. If it be most to be found among tea-drinkers, the reason is, that tea is one of the stated amusements of the idle and luxurious. The whole mode of life is changed; every kind of voluntary labour, every exercise that strengthened the nerves and hardened the muscles, is fallen into disuse. The inhabitants are crowded together in populous cities, so that no occasion of life requires much motion: every one is near to all that he wants; and the rich and delicate seldom pass from one street to another, but in carriages of pleasure. Yet we eat and drink, or strive to eat and drink, like the hunter and huntresses, the farmers and the housewives of the former generation: and they that pass ten hours in bed, and eight at cards, and the greater part of the other six at the table, are taught to impute to

tea all the diseases which a life unnatural in all its parts may chance to bring upon them.

Tea, among the greater part of those who use it most, is drunk in no great quantity. As it neither exhilarates the heart, nor stimulates the palate, it is commonly an entertainment merely nominal, a pretence for assembling to prattle, for interrupting business, or diversifying idleness. They who drink one cup, and who drink twenty, are equally punctual in preparing or partaking it; and indeed there are few but discover by their indifference about it, that they are brought together not by the tea, but the tea-table. Three cups make the common quantity, so slightly impregnated, that perhaps they might be tinged with the *Athenian cicuta*, and produce less effects than these letters charge upon tea.

Our author proceeds to show yet other bad qualities of this hated leaf.

"Green tea, when made strong even by infusion, is an *emetic*; nay, I am told it is used as such in China; a decoction of it certainly performs this operation; yet by long use it is drunk by many without such an effect. The infusion also, when it is made strong, and stands long to draw the grosser particles, will *convulse* the bowels; even in the manner *commonly* used, it has this effect on some constitutions, as I have already remarked to you from my own experience.

"You see I confess my *weakness* without reserve; but those who are very fond of tea, if their digestion is weak, and they find themselves disordered, they generally ascribe it to any *cause* except the *true* one. I am aware that the effect just mentioned is imputed to the hot water; let it be so, and my argument is still good; but who pretends to say it is not *partly* owing to particular kinds of tea? perhaps such as partake of *copperas*, which there is cause to apprehend is sometimes the case: if we judge from the manner in which it is said to be cured, together with its ordinary effects, there is some foundation for this opinion. Put a drop of strong tea, either *green* or *bohea*, but chiefly the former, on the blade of a knife, though it is not corrosive in the same manner as vitriol, yet there appears to be a corrosive quality in it, very different from that of fruit, which stains the knife."

He afterwards quotes Paulli to prove that tea is a *desiccative*, and ought not to be used after the fortieth year. I have then long exceeded the limits of permission, but I comfort myself, that all the enemies of tea cannot be in the right. If tea be *desiccative*, according to Paulli, it cannot weaken the fibres, as our author imagines; if it be *emetic*, it must constrict the stomach, rather than relax it.

The formidable quality of tinging the knife, it has in common with acorns, the bark and leaves of oak, and every astringent bark or leaf: the *copperas* which is given to the tea, is really in the knife. Ink may be made of any ferruginous

matter and astringent vegetable, as it is generally made of galls and *copperas*.

From Tea the writer digresses to spirituous liquors, about which he will have no controversy with the "Literary Magazine;" we shall therefore insert almost his whole letter, and add to it one testimony, that the mischiefs arising on every side from this compendious mode of drunkenness, are enormous and insupportable; equally to be found among the great and the mean; filling palaces with disquiet and distraction; harder to be borne as it cannot be mentioned; and overwhelming multitudes with incurable diseases and unpitied poverty.

"Though *tea* and *gin* have spread their baneful influence over this island and his Majesty's other dominions, yet you may be well assured, that the governors of the Foundling Hospital will exert their utmost skill and vigilance to prevent the children under their care from being poisoned, or enervated by one or the other. This, however, is not the case of *work-houses*; it is well known, to the shame of those who are charged with the care of them, that *gin* has been too often permitted to enter their gates; and the debauched appetites of the people who inhabit these houses, has been urged as a reason for it.

"*Desperate* diseases require *desperate* remedies: if laws are rigidly executed against murderers in the highway, those who provide a draught of *gin*, which we see is *murderous*, ought not to be countenanced. I am now informed, that in certain hospitals, where the number of the *sick* used to be about 5600, in 14 years,

From 1704 to 1718, they increased to 8189;

From 1718 to 1734, still augmented to 12,710;

And from 1734 to 1749, multiplied to 38,147.

"What a dreadful *spectre* does this exhibit! nor must we wonder, when satisfactory evidence was given before the great council of the nation, that near eight millions of gallons of distilled spirits, at the standard it is commonly reduced to for drinking, was actually consumed annually in drams! the shocking difference in the numbers of the *sick*, and we may presume of the *dead* also, was supposed to keep pace with *gin*: and the most ingenious and unprejudiced physicians ascribed it to this cause. What is to be done under these melancholy circumstances? Shall we still countenance the *distillery*, for the sake of the *revenue*; out of tenderness to the *few* who will suffer by its being abolished; for fear of the madness of the people; or that foreigners will run it in upon us? There can be no *evil* so great as that we now suffer, except the making the same consumption, and paying for it to foreigners in *money*, which I hope never will be the case.

"As to the *revenue*, it certainly may be replaced by taxes upon the *necessaries* of life, even upon the *bread* we eat, or, in other words, upon

the land, which is the great source of supply to the public and to individuals. Nor can I persuade myself, but that the people may be weaned from the habit of poisoning themselves. The difficulty of *smuggling* a bulky liquid, joined to the severity which ought to be exercised towards smugglers, whose *illegal* commerce is of so infernal a nature, must in time produce the effect desired. Spirituous liquors being abolished, instead of having the most undisciplined and abandoned poor, we might soon boast a race of men, temperate, religious, and industrious even to a proverb. We should soon see the ponderous burden of the poor's rate decrease, and the beauty and strength of the land rejuvenate. Schools, work-houses, and hospitals, might then be sufficient to clear our streets of distress and misery, which never will be the case whilst the love of poison prevails, and the means of ruin is sold in above one thousand houses in the city of London, two thousand two hundred in Westminster, and one thousand nine hundred and thirty in Holborn and St. Giles's.

"But if other uses still demand *liquid fire*, I would really propose, that it should be sold only in quart bottles, sealed up with the king's seal, with a very high duty, and none sold without being mixed with a *strong emetic*.

"Many become objects of charity by their *intemperance*, and this excludes others who are such by the unavoidable accidents of life, or who cannot by any means support themselves. Hence it appears, that the introducing *new habits* of life, is the most substantial charity; and that the regulation of charity-schools, hospitals, and work-houses, not the augmentation of their number, can make them answer the wise ends for which they were instituted.

"The children of beggars should be also taken from them, and bred up to labour, as children of the public. Thus the *distressed* might be relieved at a sixth part of the present expense; the idle be compelled to *work or starve*; and the mad be sent to Bedlam. We should not see human nature disgraced by the aged, the maimed, the sickly, and young children, *begging* their bread; nor would compassion be abused by those who have reduced it to an *art* to catch the unwary. Nothing is wanting but common sense and *honesty* in the execution of laws.

"To prevent such abuse in the *streets*, seems more practicable than to abolish *bad habits* within doors, where *greater* numbers perish. We see in many familiar instances the fatal effects of example. The careless spending of time among *servants*, who are charged with the care of infants, is often fatal; the nurse frequently destroys the child! the poor infant being left neglected, expires whilst she is sipping her tea! This may appear to you as *rank prejudice*, or *jest*; but I am assured, from the most *indubitable* evidence, that many very extraordinary cases of

this kind have *really* happened among those whose *duty* does not permit of such kind of habits."

"It is partly from such causes, that nurses of the children of the public often *forget* themselves, and become *impatient* when infants cry: the next step to this, is using extraordinary means to quiet them. I have already mentioned the term *killing nurse*, as known in some work-houses: *Venice treacle*, *poppy water*, and *Godfrey's cordial*, have been the kind instruments of lulling the child to his *everlasting* rest. If these *pious* women could send up an ejaculation when the child expired, all was *well*, and no questions asked by the *superiors*. An ingenious friend of mine informs me, that this has been so often the case, in some workhouses, that *Venice treacle* has acquired the appellation of *'the Lord have mercy upon me*, in allusion to the nurses' *hackneyed* expression of *pretended* grief when infants expire! *Farewell!*"

I know not upon what observation Mr. Hanway founds his confidence in the governors of the Foundling Hospital, men of whom I have not any knowledge, but whom I intreat to consider a little the minds as well as bodies of the children. I am inclined to believe irreligion equally pernicious with gin and tea, and therefore think it not unseasonable to mention, that when a few months ago I wandered through the Hospital, I found not a child that seemed to have heard of his creed or the commandments. To breed up children in this manner, is to rescue them from an early grave, that they may find employment for the gibbet; from dying in innocence, that they may perish by their crimes.

Having considered the effects of tea upon the health of the drinker, which, I think, he has aggravated in the vehemence of his zeal, and which, after soliciting them by this watery luxury, year after year, I have not yet felt: he proceeds to examine how it may be shown to affect our interest; and first calculates the national loss by the time spent in drinking tea. I have no desire to appear captious, and shall therefore readily admit, that tea is a liquor not proper for the lower classes of the people, as it supplies no strength to labour, or relief to dis-ease, but gratifies the taste without nourishing the body. It is a barren superfluity, to which those who can hardly procure what nature requires, cannot prudently habituate themselves. Its proper use is to amuse the idle, and relax the studious, and dilute the full meals of those who cannot use exercise, and will not use abstinence. That time is lost in this insipid entertainment, cannot be denied; many trifle away at the tea-table those moments which would be better spent; but that any national detriment can be inferred from this waste of time, does not evidently appear, because I know not that any work remains undone for want of hands.

Our manufactures seem to be limited, not by the possibility of work, but by the possibility of sale.

His next argument is more clear. He affirms, that one hundred and fifty thousand pounds in silver are paid to the Chinese annually, for three millions of pounds of tea, and that for two millions more brought clandestinely from the neighbouring coast, we pay, at twenty-pence a pound, one hundred and sixty-six thousand six hundred and sixty-six pounds. The author justly conceives that this computation will waken us; for, says he, "The loss of health, the loss of time, the injury of morals, are not very sensibly felt by some, who are alarmed when you talk of the loss of money." But he excuses the East-India Company, as men not obliged to be political arithmeticians, or to inquire so much what the nation loses, as how themselves may grow rich. It is certain, that they who drink tea, have no right to complain of those that import it; but if Mr. Hanway's computation be just, the importation and the use of it ought at once to be stopped by a penal law.

The author allows one slight argument in favour of tea, which, in my opinion, might be with far greater justice urged both against that and many other parts of our naval trade. "The tea-trade employs (he tells us) six ships, and five or six hundred seamen, sent annually to China. It likewise brings in a revenue of three hundred and sixty thousand pounds, which, as a tax on luxury, may be considered as of great utility to the state." The utility of this tax I cannot find; a tax on luxury is no better than another tax, unless it hinders luxury, which cannot be said of the impost upon tea, while it is thus used by the great and the mean, the rich and the poor. The truth is, that by the loss of one hundred and fifty thousand pounds, we procure the means of shifting three hundred and sixty thousand at best, only from one hand to another; but perhaps sometimes into hands by which it is not very honestly employed. Of the five or six hundred seamen sent to China, I am told that sometimes half, and commonly a third part, perish in the voyage; so that instead of setting this navigation against the inconveniences already alleged, we may add to them, the yearly loss of two hundred men in the prime of life; and reckon, that the trade of China has destroyed ten thousand men since the beginning of this century.

If tea be thus pernicious, if it impoverishes our country, if it raises temptation, and gives opportunity to illicit commerce, which I have always looked on as one of the strongest evidences of the inefficacy of our law, the weakness of our government, and the corruption of our people, let us at once resolve to prohibit it for ever.

"If the question was, how to promote indus-

try most *advantageously*, in lieu of our tea-trade, supposing every branch of our commerce to be already fully supplied with men and money? If a *quarter* the sum now spent in tea, were laid out annually in plantations, making public gardens, in paving and widening streets, in making roads, in rendering *rivers* navigable, erecting *palaces*, building *bridges*, or neat and convenient *houses* where are now only *huts*; *draining* lands, or rendering those which are now *barren* of some *use*; should we not be gainers, and provide more for health, pleasure, and long life, compared with the consequences of the tea-trade?"

Our riches would be much better employed to these purposes; but if this project does not please, let us first resolve to save our money, and we shall afterwards very easily find ways to spend it.

## REPLY TO A PAPER IN THE GAZETTEER OF MAY 26, 1757.

FROM THE LITERARY MAGAZINE, VOL. II. P. 253.

It is observed in the sage Gil Blas, that an exasperated author is not easily pacified. I have therefore, very little hope of making my peace with the writer of the *Eight Days' Journey*: indeed so little, that I have long deliberated whether I should not rather sit silently down under his displeasure, than aggravate my misfortune by a defence of which my heart forbodes the ill success. Deliberation is often useless. I am afraid that I have at last made the wrong choice; and that I might better have resigned my cause, without a struggle, to time and fortune, since I shall run the hazard of a new offence by the necessity of asking him *why he is angry*?

Distress and terror often discover to us those faults with which we should never have reproached ourselves in a happy state. Yet, dejected as I am, when I review the transaction between me and this writer, I cannot find that I have been deficient in reverence. When his book was first printed, he hints that I procured a sight of it before it was published. How the sight of it was procured, I do not now very exactly remember; but if my curiosity was greater than my prudence, if I laid rash hands on the fatal volume, I have surely suffered like him who burst the box, from which evil rushed into the world.

I took it, however, and inspected it as the work of an author not higher than myself; and was confirmed in my opinion, when I found that these letters were *not written to be printed*. I concluded, however, that though not *written to be printed*, they were *printed to be read*, and inserted one of them in the collection of November last. Not many days after I received a

note, informing me, that I ought to have waited for a more correct edition. This injunction was obeyed. The edition appeared, and I supposed myself at liberty to tell my thoughts upon it, as upon any other book, upon a royal manifesto, or an act of parliament. But see the fate of ignorant temerity! I now find, but find too late, that instead of a writer whose only power is in his pen, I have irritated an important member of an important corporation; a man who, as he tells us in his letters, puts horses to his chariot.

It was allowed to the disputant of old to yield up the controversy with little resistance to the master of forty legions. Those who know how weakly naked truth can defend her advocates, would forgive me if I should pay the same respect to a Governor of the Foundlings. Yet the consciousness of my own rectitude of intention incites me to ask once again, how I have offended?

There are only three subjects upon which my unlucky pen has happened to venture. Tea; the author of the Journal; and the Foundling Hospital.

Of tea what have I said? That I have drank it twenty years without hurt, and therefore believe it not to be poison; that if it dries the fibres, it cannot soften them; that if it constricts, it cannot relax. I have modestly doubted whether it has diminished the strength of our men, or the beauty of our women; and whether it much hinders the progress of our woollen or iron manufactures; but I allowed it to be a barren superfluity, neither medicinal nor nutritious, that neither supplied strength nor cheerfulness, neither relieved weariness, nor exhilarated sorrow: I inserted, without charge or suspicion of falsehood, the sums exported to purchase it; and proposed a law to prohibit it for ever.

Of the author I unfortunately said, that his injunction was somewhat too magisterial. This I said before I knew that he was a Governor of the Foundlings; but he seems inclined to punish this failure of respect, as the Czar of Muscovy made war upon Sweden, because he was not treated with sufficient honours when he passed through the country in disguise. Yet was not this irreverence without extenuation. Something was said of the merit of *meaning well*, and the Journalist was declared to be a man *whose failings might well be pardoned for his virtues*. This is the highest praise which human gratitude can confer upon human merit; praise that would have more than satisfied Titus or Augustus, but which I must own to be inadequate and penurious, when offered to the member of an important corporation.

I am asked whether I meant to satirise the man, or criticise the writer, when I say that he believes, *only perhaps because he has inclination to believe it, that the English and Dutch consume*

*more tea than the vast empire of China?* Between the writer and the man I did not at that time consider the distinction. The writer I found not of more than mortal might, and I did not immediately recollect that the man put horses to his chariot. But I did not write wholly without consideration. I knew but two causes of belief, evidence and inclination. What evidence the Journalist could have of the Chinese consumption of tea, I was not able to discover. The officers of the East India Company are excluded, they best know why, from the towns and the country of China; they are treated as we treat gypsies and vagrants, and obliged to retire every night to their own hovel. What intelligence such travellers may bring, is of no great importance. And though the missionaries boast of having once penetrated further, I think they have never calculated the tea drank by the Chinese. There being thus no evidence for his opinion, to what could I ascribe it but to inclination?

I am yet charged more heavily for having said, that *he has no intention to find any thing right at home*. I believe every reader restrained this imputation to the subject which produced it, and supposed me to insinuate only that he meant to spare no part of the tea-table, whether essence or circumstance. But this line he has selected as an instance of virulence and acrimony, and confutes it by a lofty and splendid panegyric on himself. He asserts, that he finds many things right at home, and that he loves his country almost to enthusiasm.

I had not the least doubt that he had found in his country many things to please him; nor did I suppose that he desired the same inversion of every part of life, as of the use of tea. The proposal of drinking tea sour, showed indeed such a disposition to practical paradoxes, that there was reason to fear lest some succeeding letter should recommend the dress of the Picts, or the cookery of the Eskimaux. However, I met with no other innovations, and therefore was willing to hope that he found something right at home.

But his love of his country seemed not to rise quite to enthusiasm, when, amidst his rage against tea, he made a smooth apology for the East India Company, as men who might not think themselves obliged to be political arithmeticians. I hold, though no enthusiastic patriot, that every man who lives and trades under the protection of a community, is obliged to consider whether he hurts or benefits those who protect him; and that the most which can be indulged to private interest is a neutral traffic, if any such can be, by which our country is not injured, though it may not be benefited.

But he now renews his declamation against tea, notwithstanding the greatness or power of those that have interest or inclination to support

it. I know not of what power or greatness he may dream. The importers only have an interest in defending it. I am sure they are not great, and I hope they are not powerful. Those whose inclination leads them to continue this practice, are too numerous, but I believe their power is such as the Journalist may defy without enthusiasm. The love of our country, when it rises to enthusiasm, is an ambiguous and uncertain virtue: when a man is enthusiastic, he ceases to be reasonable, and when he once departs from reason, what will he do but drink sour tea? As the Journalist, though enthusiastically zealous for his country, has, with regard to smaller things, the placid happiness of philosophical indifference, I can give him no disturbance by advising him to restrain even the love of his country within due limits, lest it should sometimes swell too high, fill the whole capacity of his soul, and leave less room for the love of truth.

Nothing now remains but that I review my positions concerning the Foundling-Hospital. What I declared last month, I declare now once more, that I found none of the children that appeared to have heard the catechism. It is inquired how I wandered, and how I examined? There is doubtless subtilty in the question; I know not well how to answer it. Happily I did not wander alone; I attended some ladies with another gentleman, who all heard and assisted the inquiry with equal grief and indignation. I did not conceal my observations. Notice was given of this shameful defect soon after, at my request, to one of the highest names of the society. This I am now told is incredible; but since it is true, and the past is out of human power, the most important corporation cannot make it false. But why is it incredible? Because in the rules of the Hospital the children are ordered to learn the rudiments of religion. Orders are easily made, but they do not execute themselves. They say their catechism, at stated times, under an able master. But this able master was, I think, not elected before last February; and my visit happened, if I mistake not, in November. The children were shy when interrogated by a stranger. This may be true, but the same shyness I do not remember to have hindered them from answering other questions; and I wonder why children so much accustomed to new spectators should be eminently shy.

My opponent, in the first paragraph, calls the inference that I made from this negligence, a hasty conclusion: to the decency of this expression I had nothing to object: but as he grew hot in his career, his enthusiasm began to sparkle; and in the vehemence of his postscript, he charges my assertions, and my reasons for advancing them, with folly and malice. His argumentation being somewhat enthusiastic, I

cannot fully comprehend, but it seems to stand thus: my insinuations are foolish or malicious, since I know not one of the governors of the Hospital; for he that knows not the governors of the Hospital, must be very foolish or malicious.

He has, however, so much kindness for me, that he advises me to consult my safety when I talk of corporations. I know not what the most important corporation can do, becoming manhood, by which my safety is endangered. My reputation is safe, for I can prove the fact; my quiet is safe, for I meant well; and for any other safety, I am not used to be very solicitous.

I am always sorry when I see any being labouring in vain; and in return for the Journalist's attention to my safety, I will confess some compassion for his tumultuous resentment; since all his invectives fume into the air, with so little effect upon me, that I still esteem him as one that has the merit of meaning well; and still believe him to be a man whose failings may be justly pardoned for his virtues.

## REVIEW OF AN ESSAY ON THE WRITINGS AND GENIUS OF POPE.

FROM THE LITERARY MAGAZINE, 1756.

THIS is a very curious and entertaining miscellany of critical remarks and literary history. Though the book promises nothing but observations on the writings of Pope, yet no opportunity is neglected of introducing the character of any other writer, or the mention of any performance or event in which learning is interested. From Pope, however, he always takes his hint, and to Pope he returns again from his digressions. The facts which he mentions, though they are seldom anecdotes in a rigorous sense, are often such as are very little known, and such as will delight more readers than naked criticism.

As he examines the works of this great poet in an order nearly chronological, he necessarily begins with his pastorals, which, considered as representations of any kind of life, he very justly censures; for there is in them a mixture of Grecian and English, of ancient and modern, images. *Windsor* is coupled with *Hybla*, and *Thames* with *Pactolus*. He then compares some passages which Pope has imitated or translated, with the imitation or version, and gives the preference to the originals, perhaps not always upon convincing arguments.

Theocritus makes his lover wish to be a bee, that he might creep among the leaves that form the chaplet of his mistress. Pope's enamoured swain longs to be made the captive bird that

sings in his fair one's bower, that she might listen to his songs, and reward them with her kisses. The critic prefers the image of Theocritus as more wild, more delicate, and more uncommon.

It is natural for a lover to wish that he might be any thing that could come near to his lady. But we more naturally desire to be that which she fondles and caresses, than that which she would avoid, at least would neglect. The superior delicacy of Theocritus I cannot discover, nor can indeed find, that either in the one or the other image there is any want of delicacy. Which of the two images was less common in the time of the poet who used it, for on that consideration the merit of novelty depends, I think it is now out of any critic's power to decide.

His remarks, I am afraid with too much justice, that there is not a single new thought in the pastorals; and with equal reason declares, that their chief beauty consists in their correct and musical versification, which has so influenced the English ear, as to render every moderate rhymers harmonious.

In his examination of the *Messiah*, he justly observes some deviations from the inspired author, which weaken the imagery, and dispirit the expression.

On *Windsor Forest*, he declares, I think without proof, that descriptive poetry was by no means the excellence of Pope; he draws this inference from the few images introduced in this poem, which would not equally belong to any other place. He must inquire whether *Windsor Forest* has in reality any thing peculiar.

The *Stag-chase* is not, he says, so full, so animated, and so circumstantiated as Somerville's. Barely to say that one performance is not so good as another, is to criticise with little exactness. But Pope has directed that we should in every work regard the author's end. The *Stag-chase* is the main subject of Somerville, and might therefore be properly dilated in all its circumstances; in Pope it is only incidental, and was to be despatched in a few lines.

He makes a just observation, "that the description of the external beauties of nature is usually the first effort of a young genius, before he hath studied nature and passions. Some of Milton's most early as well as most exquisite pieces are his *Lycidas*, *l' Allegro*, and *Il Penseroso*, if we may except his ode on the Nativity of Christ, which is indeed prior in order of time, and in which a penetrating critic might have observed the seeds of that boundless imagination which was one day to produce the *Paradise Lost*."

Mentioning Thomson and other descriptive poets, he remarks, that writers fail in their copies for want of acquaintance with originals, and justly ridicules those who think they can form

just ideas of valleys, mountains, and rivers, in a garret of the Strand. For this reason I cannot regret with this author, that Pope laid aside his design of writing American pastorals; for as he must have painted scenes which he never saw, and manners which he never knew, his performance, though it might have been a pleasing amusement of fancy, would have exhibited no representation of nature or of life.

After the pastorals, the critic considers the lyric poetry of Pope, and dwells longest on the ode on *St. Cecilia's day*, which he, like the rest of mankind, places next to that of Dryden, and not much below it. He remarks after Mr. Spence, that the first stanza is a perfect concert. The second he thinks a little flat; he justly commends the fourth, but without notice of the best line in that stanza, or in the poem:

Transported demi-gods stood round  
And men grew heroes at the sound.

In the latter part of the ode he objects to the stanza of triumph:

Thus song could reveal, &c.

as written in a measure ridiculous and burlesque, and justifies his answer by observing that Addison uses the same numbers in the scene of Rosamond between Grideline and Sir Trusty:

How unhappy is he, &c.

That the measure is the same in both passages, must be confessed, and both poets perhaps chose their numbers properly; for they both meant to express a kind of airy hilarity. The two passions of merriment and exultation are undoubtedly different; they are as different as a gambol and a triumph, but each is a species of joy; and poetical measures have not in any language been so far refined as to provide for the subdivisions of passion. They can only be adapted to general purposes; but the particular and minuter propriety must be sought only in the sentiment and language. Thus the numbers are the same in *Colin's Complaint*, and in the ballad of *Darby and Joan*, though in one sadness is represented, and in the other tranquillity; so the measure is the same of Pope's *Unfortunate Lady*, and the *Praise of Voltaire*.

He observes very justly, that the odes both of Dryden and Pope conclude unsuitably and unnaturally with epigram.

He then spends a page upon Mr. Handel's music to Dryden's ode, and speaks of him with that regard which he has generally obtained among the lovers of sound. He finds something amiss in the air "With ravished ears," but has overlooked or forgotten the grossest fault in that composition, which is that in this line:

Revenge, revenge, Timotheus cries.

He has laid much stress upon the two latter words, which are merely words of connection, and ought in music to be considered as parenthetical.

From this ode is struck out a digression on the nature of odes, and the comparative excellence of the ancients and moderns. He mentions the chorus which Pope wrote for the Duke of Buckingham; and thence takes occasion to treat of the chorus of the ancients. He then comes to another ode, of "*The dying Christian to his Soul*," in which finding an apparent imitation of Flatman, he falls into a pleasing and learned speculation on the resembling passages to be found in different poets.

He mentions with great regard Pope's ode on *Solitude*, written when he was but twelve years old, but omits to mention the poem on *Silence*, composed, I think, as early, with much greater elegance of diction, music of numbers, extent of observation, and force of thought. If he had happened to think on Baillet's chapter of *Enfances celebres*, he might have made on this occasion a very entertaining dissertation on early excellence.

He comes next to the *Essay on Criticism*, the stupendous performance of a youth not yet twenty years old; and after having detailed the felicities of condition to which he imagines Pope to have owed his wonderful prematurity of mind, he tells us that he is well informed this essay was first written in prose. There is nothing improbable in the report, nothing indeed but what is more likely than the contrary; yet I cannot forbear to hint to this writer and all others, the danger and weakness of trusting too readily to information. Nothing but experience could evince the frequency of false information, or enable any man to conceive that so many groundless reports should be propagated as every man of eminence may hear of himself. Some men relate what they think as what they know; some men of confused memories and habitual inaccuracy ascribe to one man what belongs to another; and some talk on without thought or care. A few men are sufficient to broach falsehoods, which are afterwards innocently diffused by successive relaters.

He proceeds on examining passage after passage of this essay; but we must pass over all those criticisms to which we have not something to add or to object, or where this author does not differ from the general voice of mankind. We cannot agree with him in his censure of the comparison of a student advancing in science with a traveller passing the Alps, which is perhaps the best simile in our language; that in which the most exact resemblance is traced between things in appearance utterly unrelated to each other. That the last line conveys no new *idea*, is not true; it makes particular what was before general. Whether the description which he adds

from another author be, as he says, more full and striking than that of Pope, is not to be inquired. Pope's description is relative, and can admit no greater length than is usually allowed to a simile, nor any other particulars than such as form the correspondence.

Unvaried rhymes, says this writer, highly disgust readers of a good ear. It is surely not the ear but the mind that is offended. The fault arising from the use of common rhymes is, that by reading the past line the second may be guessed, and half the composition loses the grace of novelty.

On occasion of the mention of an alexandrine, the critic observes, that "the alexandrine may be thought a modern measure, but that *Robert of Gloucester's Wife* is an alexandrine, with the addition of two syllables; and that Sternhold and Hopkins translated the Psalms in the same measure of fourteen syllables, though they are printed otherwise."

This seems not to be accurately conceived or expressed: an alexandrine with the addition of two syllables, is no more an alexandrine than with the detraction of two syllables. Sternhold and Hopkins did generally write in the alternate measure of eight and six syllables; but Hopkins commonly rhymed the first and third, Sternhold only the second and fourth: so that Sternhold may be considered as writing couplets of long lines; but Hopkins wrote regular stanzas. From the practice of printing the long lines of fourteen syllables in two short lines, arose the license of some of our poets, who, though professing to write in stanzas, neglected the rhymes of the first and third lines.

Pope has mentioned Petronius among the great names of criticism, as the remarker justly observes, without any critical merit. It is to be suspected that Pope had never read his book, and mentioned him on the credit of two or three sentences which he had often seen quoted, imagining that where there was so much there must necessarily be more. Young men in haste to be renowned, too frequently talk of books which they have scarcely seen.

The revival of learning mentioned in this poem, affords an opportunity of mentioning the chief periods of literary history, of which this writer reckons five: that of Alexander, of Ptolemy Philadelphus, of Augustus, of Leo the Tenth, of Queen Anne.

These observations are concluded with a remark which deserves great attention: "In no polished nation, after criticism has been much studied, and the rules of writing established, has any very extraordinary book ever appeared."

The *Rape of the Lock* was always regarded by Pope as the highest production of his genius. On occasion of this work, the history of the comic heroic is given; and we are told that it descended from Fassoni to Boileau, from

Boileau to Garth, and from Garth to Pope. Garth is mentioned perhaps with too much honour; but all are confessed to be inferior to Pope. There is in his remarks on this work no discovery of any latent beauty, nor any thing subtle or striking; he is indeed commonly right, but has discussed no difficult question.

The next pieces to be considered are the *Verses to the Memory of an unfortunate Lady*, the *Prologue to Cato*, and *Epilogue to Jane Shore*. The first piece he commends. On occasion of the second he digresses, according to his custom, into a learned dissertation on tragedies, and compares the English and French with the Greek stage. He justly censures Cato for want of action and of characters; but scarcely does justice to the sublimity of some speeches, and the philosophical exactness in the sentiments. "The simile of mount Atlas, and that of the Numidian traveller smothered in the sands, are indeed in character," says the critic, "but sufficiently obvious." The simile of the mountain is indeed common; but of that of the traveller I do not remember. That it is obvious, is easy to say, and easy to deny. Many things are obvious when they are taught.

He proceeds to criticise the other works of Addison, till the Epilogue calls his attention to Rowe, whose character he discusses in the same manner with sufficient freedom and sufficient candour.

The translation of the *Epistle of Sappho to Phaon*, is next considered: but Sappho and Ovid are more the subjects of this disquisition than Pope. We shall therefore pass over it to a piece of more importance, the *Epistle of Eloisa to Abelard*, which may justly be regarded as one of the works on which the reputation of Pope will stand in future times.

The critic pursues Eloisa through all the changes of passion, produces the passages of her letters to which any allusion is made, and intersperses many agreeable particulars and incidental relations. There is not much profundity of criticism, because the beauties are sentiments of nature, which the learned and the ignorant feel alike. It is justly remarked by him, that the wish of Eloisa for the happy passage of Abelard into the other world, is formed according to the ideas of mystic devotion.

These are the pieces examined in this volume; whether the remaining part of the work will be one volume or more, perhaps the writer himself cannot yet inform us. This piece is, however, a complete work, so far as it goes; and the writer is of opinion that he has despatched the chief part of this task: for he ventures to remark, that the reputation of Pope as a poet, among posterity, will be principally founded on his *Windsor Forest*, *Rape of the Lock*, and *Eloisa to Abelard*; while the facts and characters alluded to in his late writings will be forgotten

and unknown, and their poignancy and propriety little relished; for wit and satire are transitory and perishable, but nature and passion are eternal.

He has interspersed some passages of Pope's life, with which most readers will be pleased. When Pope was yet a child, his father, who had been a merchant in London, retired to Binfield. He was taught to read by an aunt; and learned to write without a master, by copying printed books. His father used to order him to make English verses, and would oblige him to correct and retouch them over and over, and at last could say, "These are good rhymes."

At eight years of age, he was committed to one Taverner, a priest, who taught him the rudiments of the Latin and Greek. At this time he met with Ogleby's Homer, which seized his attention: he fell next upon Sandys's Ovid, and remembered these two translations with pleasure to the end of his life.

About ten, being at school near Hyde-Park-corner, he was taken to the play-house, and was so struck with the splendour of the drama, that he formed a kind of play out of Ogleby's Homer, intermixed with verses of his own. He persuaded the head-boys to act this piece, and Ajax was performed by his master's gardener. They were habited according to the pictures in Ogleby. At twelve he retired with his father to Windsor Forest, and formed himself by study in the best English poets.

In this extract it was thought convenient to dwell chiefly upon such observations as relate immediately to Pope, without deviating with the author into incidental inquiries. We intend to kindle, not to extinguish, curiosity, by this slight sketch of a work abounding with curious quotations and pleasing disquisitions. He must be much acquainted with literary history, both of remote and late times, who does not find in this essay many things which he did not know before: and if there be any too learned to be instructed in facts or opinions, he may yet properly read this book as a just specimen of literary moderation.

#### REVIEW OF A FREE INQUIRY INTO THE NATURE AND ORIGIN OF EVIL.

This is a treatise consisting of Six Letters upon a very difficult and important question, which I am afraid this author's endeavours will not free from the perplexity which has entangled the speculatists of all ages, and which must always continue while we see but in part. He calls it a *Free Inquiry*, and indeed his freedom is, I think, greater than his modesty. Though he

is far from the contemptible arrogance, or the impious licentiousness, of Bolingbroke, yet he decides too easily upon questions out of the reach of human determination, with too little consideration of mortal weakness, and with too much vivacity for the necessary caution.

In the first letter on *Evil in general*, he observes, that "it is the solution of this important question, *whence came Evil*, alone, that can ascertain the moral characteristic of God, without which there is an end of all distinction between Good and Evil." Yet he begins this Inquiry by this declaration: "That there is a Supreme Being, infinitely powerful, wise, and benevolent, the great Creator and Preserver of all things, is a truth so clearly demonstrated, that it shall be here taken for granted." What is this but to say, that we have already reason to grant the existence of those attributes of God, which the present Inquiry is designed to prove? The present Inquiry is then surely made to no purpose. The attributes, to the demonstration of which the solution of this great question is necessary, have been demonstrated without any solution, or by means of the solution of some former writer.

He rejects the Manichean system, but imputes to it an absurdity, from which, amidst all its absurdities, it seems to be free, and adopts the system of Mr. Pope. "That pain is no evil, if asserted with regard to the individuals who suffer it, is downright nonsense: but if considered as it affects the universal system, is an undoubted truth, and means only that there is no more pain in it than what is necessary to the production of happiness. How many soever of these evils then force themselves into the creation, so long as the good preponderates, it is a work well worthy of infinite wisdom and benevolence; and notwithstanding the imperfections of its parts, the whole is most undoubtedly perfect." And in the former part of the Letter, he gives the principle of his system in these words: "Omnipotence cannot work contradictions, it can only effect all possible things. But so little are we acquainted with the whole system of nature, that we know not what are possible, and what are not: but if we may judge from that constant mixture of pain with pleasure, and inconveniency with advantage, which we must observe in every thing round us, we have reason to conclude, that to endue created beings with perfection, that is, to produce Good exclusive of Evil, is one of those impossibilities which even infinite power cannot accomplish."

This is elegant and acute, but will by no means calm discontent, or silence curiosity; for whether Evil can be wholly separated from Good or not, it is plain that they may be mixed in various degrees, and as far as human eyes can judge, the degree of Evil might have been less without any impediment to Good.

The second Letter on *the evils of imperfection*, is little more than a paraphrase of Pope's epistles, or yet less than a paraphrase, a mere translation of poetry into prose. This is surely to attack difficulty with very disproportionate abilities, to cut the Gordian knot with very blunt instruments. When we are told of the insufficiency of former solutions, why is one of the latest, which no man can have forgotten, given us again? I am told, that this pamphlet is not the effort of hunger: what can it be then but the product of vanity? and yet how can vanity be gratified by plagiarism or transcription? When this speculatist finds himself prompted to another performance, let him consider whether he is about to disburthen his mind, or employ his fingers; and if I might venture to offer him a subject, I should wish that he would solve this question, Why he that has nothing to write, should desire to be a writer?

Yet is not this Letter without some sentiments, which, though not new, are of great importance, and may be read with pleasure in the thousandth repetition.

"Whatever we enjoy, is purely a free gift from our Creator; but that we enjoy no more, can never sure be deemed an injury, or a just reason to question his infinite benevolence. All our happiness is owing to his goodness; but that it is no greater, is owing only to ourselves; that is, to our not having any inherent right to any happiness, or even to any existence at all. This is no more to be imputed to God, than the wants of a beggar to the person who has relieved him: that he had something, was owing to his benefactor; but that he had no more, only to his own original poverty."

Thus far he speaks what every man must approve, and what every wise man has said before him. He then gives us the system of subordination, not invented, for it was known I think to the Arabian metaphysicians, but adopted by Pope; and from him borrowed by the diligent researches of this great investigator.

"No system can possibly be formed, even in imagination, without a subordination of parts. Every animal body must have different members subservient to each other; every picture must be composed of various colours, and of light and shade; all harmony must be formed of trebles, tenors, and basses; every beautiful and useful edifice must consist of higher and lower, more and less magnificent apartments. This is in the very essence of all created things, and therefore cannot be prevented by any means whatever, unless by not creating them at all."

These instances are used instead of Pope's *oak and weeds*, or *Jupiter* and his *satellites*; but neither Pope nor this writer have much contributed to solve the difficulty. Perfection or imperfection of unconscious beings has no

meaning as referred to themselves; the *bass* and the *treble* are equally perfect; the mean and magnificent apartments feel no pleasure or pain from the comparison. Pope might ask the *weed*, why it was less than the *oak*, but the *weed* would never ask the question for itself. The *bass* and *treble* differ only to the hearer, meanness and magnificence only to the inhabitant. There is no Evil but must inhere in a conscious being, or be referred to it; that is, Evil must be felt before it is Evil. Yet even on this subject many questions might be offered, which human understanding has not yet answered, and which the present haste of this extract will not suffer me to dilate.

He proceeds to an humble detail of Pope's opinion: "The universe is a system whose very essence consists in subordination; a scale of beings descending by insensible degrees from infinite perfection to absolute nothing; in which, though we may justly expect to find perfection in the whole, could we possibly comprehend it; yet would it be the highest absurdity to hope for it in all its parts, because the beauty and happiness of the whole depend altogether on the just inferiority of its parts, that is, on the comparative imperfections of the several beings of which it is composed."

"It would have been no more an instance of God's wisdom to have created no beings but of the highest and most perfect order, than it would be of a painter's art to cover his whole piece with one single colour, the most beautiful he could compose. Had he confined himself to such, nothing could have existed but demi-gods, or archangels, and then all inferior orders must have been void and uninhabited: but as it is surely more agreeable to infinite Benevolence, that all these should be filled up with beings capable of enjoying happiness themselves, and contributing to that of others, they must necessarily be filled with inferior beings, that is, with such as are less perfect, but from whose existence, notwithstanding that less perfection, more felicity upon the whole accrues to the universe, than if no such had been created. It is moreover highly probable, that there is such a connection between all ranks and orders by subordinate degrees, that they mutually support each other's existence, and every one in its place is absolutely necessary towards sustaining the whole vast and magnificent fabric.

"Our pretences for complaint could be of this only, that we are not so high in the scale of existence as our ignorant ambition may desire; a pretence which must eternally subsist; because, were we ever so much higher, there would be still room for infinite power to exalt us; and since no link in the chain can be broke, the same reason for disquiet must remain to those who succeed to that chasm, which must be occasioned by our preferment. A man can have no reason

to repine that he is not an angel; nor a horse that he is not a man; much less, that in their several stations they possess not the faculties of another; for this would be an insufferable misfortune."

This doctrine of the regular subordination of beings, the scale of existence, and the chain of nature, I have often considered, but always left the inquiry in doubt and uncertainty.

That every being not infinite, compared with infinity, must be imperfect, is evident to intuition; that whatever is imperfect must have a certain line which it cannot pass, is equally certain. But the reason which determined this limit, and for which such being was suffered to advance thus far, and no farther, we shall never be able to discern. Our discoveries tell us, the Creator has made beings of all orders, and that therefore one of them must be such as man. But this system seems to be established on a concession, which, if it be refused, cannot be extorted.

Every reason which can be brought to prove, that there are beings of every possible sort, will prove that there is the greatest number possible of every sort of beings; but this with respect to man we know, if we know any thing, not to be true.

It does not appear even to the imagination, that of three orders of being, the first and the third receive any advantage from the imperfection of the second, or that indeed they may not equally exist, though the second had never been, or should cease to be; and why should that be concluded necessary, which cannot be proved even to be useful?

The scale of existence from infinity to nothing, cannot possibly have being. The highest being not infinite must be, as has been often observed, at an infinite distance below infinity. Cheyne, who, with the desire inherent in mathematicians to reduce every thing to mathematical images, considers all existence as a *conc*, allows that the basis is at an infinite distance from the body. And in this distance between finite and infinite, there will be room for ever for an infinite series of indefinable existence.

Between the lowest positive existence and nothing, wherever we suppose positive existence to cease, is another chasm infinitely deep; where there is room again for endless orders of subordinate nature, continued for ever and for ever, and yet infinitely superior to non-existence.

To these meditations humanity is unequal. But yet we may ask, not of our Maker, but of each other, since on the one side creation, wherever it stops, must stop infinitely below infinity, and on the other infinitely above nothing, what necessity there is that it should proceed so far either way, that beings so high or so low should ever have existed? We may ask; but I believe no created wisdom can give an adequate answer.

Nor is this all. In the scale, wherever it begins or ends, are infinite vacuities. At whatever distance we suppose the next order of beings to be above man, there is room for an intermediate order of beings between them; and if for one order, then for infinite orders; since every thing that admits of more or less, and consequently all the parts of that which admits them, may be infinitely divided. So that, as far as we can judge, there may be room in the vacancy between any two steps of the scale, or between any two points of the cone of being, for infinite exertion of infinite power.

Thus it appears how little reason those who repose their reason upon the scale of being have to triumph over those who recur to any other expedient of solution, and what difficulties arise on every side to repress the rebellions of presumptuous decision. *Qui pauca considerat, facile pronunciat.* In our passage through the boundless ocean of disquisition we often take fogs for land, and after having long toiled to approach them, find, instead of repose and harbours, new storms of objection, and fluctuations of uncertainty.

We are next entertained with Pope's alleviations of those evils which we are doomed to suffer.

"Poverty, or the want of riches, is generally compensated by having more hopes, and fewer fears, by a greater share of health, and a more exquisite relish of the smallest enjoyments, than those who possess them are usually blessed with. The want of taste and genius, with all the pleasures that arise from them, are commonly recompensed by a more useful kind of common sense, together with a wonderful delight, as well as success, in the busy pursuits of a scrambling world. The sufferings of the sick are greatly relieved by many trifling gratifications imperceptible to others, and sometimes almost repaid by the inconceivable transports occasioned by the return of health and vigour. Folly cannot be very grievous, because imperceptible; and I doubt not but there is some truth in that rant of a mad poet, that there is a pleasure in being mad, which none but madmen know. Ignorance, or the want of knowledge and literature, the appointed lot of all born to poverty, and the drudgeries of life, is the only opiate capable of infusing that insensibility which can enable them to endure the miseries of the one and the fatigues of the other. It is a cordial administered by the gracious hand of Providence; of which they ought never to be deprived by an ill-judged and improper education. It is the basis of all subordination, the support of society, and the privilege of individuals: and I have ever thought it a most remarkable instance of the divine wisdom, that whereas in all animals, whose individuals rise little above the rest of their species, knowledge is instinctive; in

man, whose individuals are so widely different, it is acquired by education; by which means the prince and the labourer, the philosopher and the peasant, are in some measure fitted for their respective situations."

Much of these positions is perhaps true, and the whole paragraph might well pass without censure, were not objections necessary to the establishment of knowledge. *Poverty* is very gently paraphrased by *want of riches*. In that sense, almost every man may in his own opinion be poor. But there is another poverty, which is *want of competence*, of all that can soften the miseries of life, of all that can diversify attention, or delight imagination. There is yet another poverty, which is *want of necessities*, a species of poverty which no care of the public, no charity of particulars, can preserve many from feeling openly, and many secretly.

That hope and fear are inseparably or very frequently connected with poverty, and riches, my surveys of life have not informed me. The milder degrees of poverty are sometimes supported by hope, but the more severe often sink down in motionless despondence. Life must be seen before it can be known. This author and Pope perhaps never saw the miseries which they imagine thus easy to be borne. The poor indeed are insensible of many little vexations which sometimes embitter the possessions and pollute the enjoyments of the rich. They are not pained by casual incivility, or mortified by the mutilation of a compliment; but this happiness is like that of a malefactor, who ceases to feel the cords that bind him when the pincers are tearing his flesh.

That want of taste for one enjoyment is supplied by the pleasures of some other, may be fairly allowed. But the compensations of sickness I have never found near to equivalence, and the transports of recovery only prove the intenseness of the pain.

With folly no man is willing to confess himself very intimately acquainted, and therefore its pains and pleasures are kept secret. But what the author says of its happiness seems applicable only to fatuity, or gross dulness; for that inferiority of understanding which makes one man without any other reason the slave, or tool, or property of another, which makes him sometimes useless, and sometimes ridiculous, is often felt with very quick sensibility. On the happiness of madmen, as the case is not very frequent, it is not necessary to raise a disquisition, but I cannot forbear to observe, that I never yet knew disorders of mind increase felicity: every madman is either arrogant and irascible, or gloomy and suspicious, or possessed by some passion or notion destructive to his quiet. He has always discontent in his look, and malignity in his bosom. And, if he had the power of choice, he would soon repent who should resign his reason to secure his peace.

Concerning the portion of ignorance necessary to make the condition of the lower classes of mankind safe to the public and tolerable to themselves, both morals and policy exact a nicer inquiry than will be very soon or very easily made. There is undoubtedly a degree of knowledge which will direct a man to refer all to Providence, and to acquiesce in the condition which omniscient Goodness has determined to allot him; to consider this world as a phantom that must soon glide from before his eyes, and the distresses and vexations that encompass him, as dust scattered in his path, as a blast that chills him for a moment, and passes off for ever.

Such wisdom, arising from the comparison of a part with the whole of our existence, those that want it most cannot possibly obtain from philosophy; nor unless the method of education, and the general tenor of life, are changed, will very easily receive it from religion. The bulk of mankind is not likely to be very wise or very good: and I know not whether there are not many states of life, in which all knowledge, less than the highest wisdom, will produce discontent and danger. I believe it may be sometimes found, that a *little learning* is to a poor man a *dangerous thing*. But such is the condition of humanity, that we easily see, or quickly feel, the wrong, but cannot always distinguish the right. Whatever knowledge is superfluous, in irremediable poverty, is hurtful; but the difficulty is to determine when poverty is irremediable, and at what point superfluity begins. Gross ignorance every man has found equally dangerous with perverted knowledge. Men left wholly to their appetites and their instincts, with little sense of moral or religious obligation, and with very faint distinctions of right and wrong, can never be safely employed, or confidently trusted: they can be honest only by obstinacy, and diligent only by compulsion or caprice. Some instruction, therefore, is necessary, and much perhaps may be dangerous.

Though it should be granted that those who are *born to poverty and drudgery* should not be deprived by an *improper education* of the *opiate of ignorance*; even this concession will not be of much use to direct our practice, unless it be determined who are those that are *born to poverty*. To entail irreversible poverty upon generation after generation, only because the ancestor happened to be poor, is in itself cruel, if not unjust, and is wholly contrary to the maxims of a commercial nation, which always suppose and promote a rotation of property, and offer every individual a chance of mending his condition by his diligence. Those who communicate literature to the son of a poor man, consider him as one not born to poverty, but to the necessity of deriving a better fortune from himself. In this

attempt, as in others, many fail, and many succeed. Those that fail will feel their misery more acutely; but since poverty is now confessed to be such a calamity as cannot be borne without the opiate of insensibility, I hope the happiness of those whom education enables to escape from it, may turn the balance against that exacerbation which the others suffer.

I am always afraid of determining on the side of envy or cruelty. The privileges of education may sometimes be improperly bestowed, but I shall always fear to withhold them, lest I should be yielding to the suggestions of pride, while I persuade myself that I am following the maxims of policy; and under the appearance of salutary restraints, should be indulging the lust of domination, and that malevolence which delights in seeing others depressed.

Pope's doctrine is at last exhibited in a comparison, which, like other proofs of the same kind, is better adapted to delight the fancy than convince the reason.

"Thus the universe resembles a large and well-regulated family, in which all the officers and servants, and even the domestic animals, are subservient to each other in a proper subordination: each enjoys the privileges and perquisites peculiar to his place, and at the same time contributes by that just subordination to the magnificence and happiness of the whole."

The magnificence of a house is of use or pleasure always to the master, and sometimes to the domestics. But the magnificence of the universe adds nothing to the Supreme Being; for any part of its inhabitants with which human knowledge is acquainted, a universe much less spacious or splendid would have been sufficient; and of happiness it does not appear that any is communicated from the beings of a lower world to those of a higher.

The Inquiry after the cause of *natural Evil* is continued in the third Letter, in which, as in the former, there is mixture both of borrowed truth, and native folly, of some notions just and trite, with others uncommon and ridiculous.

His opinion of the value and importance of happiness is certainly just, and I shall insert it, not that it will give any information to any reader, but it may serve to show how the most common notion may be swelled in sound, and diffused in bulk, till it shall perhaps astonish the author himself.

"Happiness is the only thing of real value in existence; neither riches, nor power, nor wisdom, nor learning, nor strength, nor beauty, nor virtue, nor religion, nor even life itself, being of any importance, but as they contribute to its production. All these are in themselves neither good nor evil; happiness alone is their great end, and they are desirable only as they tend to promote it."

Success produces confidence. After this discovery of the value of happiness, he proceeds, without any distrust of himself, to tell us what has been hid from all former inquirers.

"The true solution of this important question, so long and so vainly searched for by the philosophers of all ages and all countries, I take to be at last no more than this, that these real evils proceed from the same source as those imaginary ones of imperfection, before treated of, namely, from that subordination, without which no created system can subsist; all subordination implying imperfection, all imperfection evil, and all evil some kind of inconveniency or suffering: so that there must be particular inconveniences and sufferings annexed to every particular rank of created beings, by the circumstances of things, and their modes of existence.

"God indeed might have made us quite other creatures, and placed us in a world quite differently constituted; but then we had been no longer men, and whatever beings had occupied our stations in the universal system, they must have been liable to the same inconveniences."

In all this there is nothing that can silence the inquiries of curiosity, or calm the perturbations of doubt. Whether subordination implies imperfection, may be disputed. The means respecting themselves may be as perfect as the end. The weed, as a weed, is no less perfect than the oak as an oak. *That imperfection implies Evil, and Evil suffering*, is by no means evident. Imperfection may imply privative evil, or the absence of some good, but this privation produces no suffering, but by the help of knowledge. An infant at the breast is yet an imperfect man, but there is no reason for belief that he is unhappy by his immaturity, unless some positive pain be superadded.

When this author presumes to speak of the universe, I would advise him a little to distrust his own faculties, however large and comprehensive. Many words easily understood on common occasions, become uncertain and figurative when applied to the works of Omnipotence. Subordination in human affairs is well understood; but when it is attributed to the universal system, its meaning grows less certain, like the petty distinctions of locality, which are of good use upon our own globe, but have no meaning with regard to infinite space, in which nothing is *high* or *low*.

That if a man, by exaltation to a higher nature, were exempted from the evils which he now suffers, some other being must suffer them; that if man were not man, some other being must be man, is a position arising from his established notion of the scale of being—a notion to which Pope has given some importance by adopting it, and of which I have therefore endeavoured to show the uncertainty and inconsistency. This scale of being I have demonstrated to be raised by presumptuous imagination, to rest on nothing

at the bottom, to lean on nothing at the top, and to have vacuities from step to step through which any order of being may sink into nihilism without any inconvenience, so far as we can judge, to the next rank above or below it. We are therefore little enlightened by a writer who tells us that any being in the state of man must suffer what man suffers, when the only question that requires to be resolved is, Why any being is in this state?

Of poverty and labour he gives just and elegant representations, which yet do not remove the difficulty of the first and fundamental question, though supposing the present state of man necessary, they may supply some motives to content.

"Poverty is what all could not possibly have been exempted from, not only by reason of the fluctuating nature of human possessions, but because the world could not subsist without it; for had all been rich none could have submitted to the commands of another, or the necessary drudgeries of life; thence all governments must have been dissolved, arts neglected, and lands uncultivated, and so a universal penury have overwhelmed all, instead of now and then pinching a few. Hence, by the by, appears the great excellence of charity, by which men are enabled, by a particular distribution of the blessings and enjoyments of life, on proper occasions, to prevent that poverty which by a general one Omnipotence itself could never have prevented: so that, by enforcing this duty, God as it were demands our assistance to promote universal happiness, and to shut out misery at every door, where it strives to intrude itself.

"Labour, indeed, God might easily have excused us from, since at his command the earth would readily have poured forth all her treasures without our inconsiderable assistance; but if the severest labour cannot sufficiently subdue the malignity of human nature, what plots and machinations, what wars, rapine, and devastation, what profligacy and licentiousness, must have been the consequences of universal idleness! so that labour ought only to be looked upon as a task kindly imposed upon us by our indulgent Creator, necessary to preserve our health, our safety, and our innocence."

I am afraid that the latter end of his commonwealth forgets the beginning. If God could easily have excused us from labour, I do not comprehend why he could not possibly have exempted all from poverty. For poverty, in its easier and more tolerable degree, is little more than necessity of labour; and in its more severe and deplorable state, little more than inability for labour. To be poor, is to work for others, or to want the succour of others without work. And the same exuberant fertility which would make work unnecessary, might make poverty impossible.

Surely a man who seems not completely master of his own opinion, should have spoken more cautiously of Omnipotence, nor have presumed to say what it could perform, or what it could prevent. I am in doubt whether those who stand highest in the *scale of being*, speak thus confidently of the dispensations of their Maker:

For fools rush in, where angels fear to tread.

Of our inquietudes of mind his account is still less reasonable. "Whilst men are injured, they must be inflamed with anger; and whilst they see cruelties, they must be melted with pity; whilst they perceive danger, they must be sensible of fear." This is to give a reason for all Evil, by showing that one Evil produces another. If there is danger, there ought to be fear; but if fear is an Evil, why should there be danger? His vindication of pain is of the same kind: pain is useful to alarm us, that we may shun greater evils, but those greater evils must be presupposed, that the fitness of pain may appear.

Treating on death, he has expressed the known and true doctrine with sprightliness of fancy, and neatness of diction. I shall therefore insert it. There are truths which, as they are always necessary, do not grow stale by repetition.

"Death, the last and most dreadful of all Evils, is so far from being one, that it is the infallible cure for all others.

To die, is landing on some silent shore,  
Where billows never beat, nor tempests roar.  
Ere well we feel the friendly stroke, 'tis o'er.

GARTH.

For, abstracted from the sickness and sufferings usually attending it, it is no more than the expiration of that term of life God was pleased to bestow on us, without any claim or merit on our part. But was it an Evil ever so great, it could not be remedied but by one much greater, which is by living for ever; by which means our wickedness, unrestrained by the prospect of a future state, would grow so insupportable, our sufferings so intolerable by perseverance, and our pleasures so tiresome by repetition, that no being in the universe could be so completely miserable as a species of immortal men. We have no reason, therefore, to look upon death as an Evil, or to fear it as a punishment, even without any supposition of a future life: but if we consider it as a passage to a more perfect state, or a remove only in an eternal succession of still-improving states (for which we have the strongest reasons), it will then appear a new favour from the divine munificence; and a man must be as absurd to repine at dying, as a traveller would be, who proposed to himself a delightful tour through various unknown countries, to la-

ment that he cannot take up his residence at the first dirty inn which he baits at on the road.

"The instability of human life, or of the changes of its successive periods, of which we so frequently complain, are no more than the necessary progress of it to this necessary conclusion; and are so far from being Evils deserving these complaints, that they are the source of our greatest pleasures, as they are the source of all novelty, from which our greatest pleasures are ever derived. The continual succession of seasons in the human life, by daily presenting to us new scenes, render it agreeable, and like those of the year, afford us delights by their change, which the choicest of them could not give us by their continuance. In the spring of life, the gilding of the sun-shine, the verdure of the fields, and the variegated paintings of the sky, are so exquisite in the eyes of infants at their first looking abroad into a new world, as nothing perhaps afterwards can equal. The heat and vigour of the succeeding summer of youth ripens for us new pleasures, the blooming maid, the nightly revel, and the jovial chase: the serene autumn of complete manhood feasts us with the golden harvests of our worldly pursuits: nor is the hoary winter of old age destitute of its peculiar comforts and enjoyments, of which the recollection and relation of those past are perhaps none of the least; and at last death opens to us a new prospect, from whence we shall probably look back upon the diversions and occupations of this world with the same contempt we do now on our tops and hobbyhorses, and with the same surprise that they could ever so much entertain or engage us."

I would not willingly detract from the beauty of this paragraph; and in gratitude to him who has so well inculcated such important truths, I will venture to admonish him, since the chief comfort of the old is the recollection of the past, so to employ his time and his thoughts, that when the imbecility of age shall come upon him, he may be able to recreate its languors by the remembrance of hours spent, not in presumptuous decisions, but modest inquiries, not in dogmatical limitations of Omnipotence, but in humble acquiescence and fervent adoration. Old age will show him that much of the book now before us has no other use than to perplex the scrupulous, and to shake the weak, to encourage impious presumption or stimulate idle curiosity.

Having thus despatched the consideration of particular evils, he comes at last to a general reason for which *Evil* may be said to be *our Good*. He is of opinion that there is some inconceivable benefit in pain abstractedly considered; that pain, however inflicted, or wherever felt, communicates some good to the general system of being, and that every animal is some way or other the better for the pain of every

other animal. This opinion he carries so far as to suppose that there passes some principle of union through all animal life, as attraction is communicated to all corporeal nature; and that the Evils suffered on this globe, may by some inconceivable means contribute to the felicity of the inhabitants of the remotest planet.

How the Origin of Evil is brought nearer to human conception by any *inconceivable* means, I am not able to discover. We believed that the present system of creation was right, though we could not explain the adaptation of one part to the other, or for the whole succession of causes and consequences. Where has this inquirer added to the little knowledge that we had before? He has told us of the benefits of Evil, which no man feels, and relations between distant parts of the universe, which he cannot himself conceive. There was enough in this question inconceivable before, and we have little advantage from a new inconceivable solution.

I do not mean to reproach this author for not knowing what is equally hidden from learning and from ignorance. The shame is to impose words for ideas upon ourselves or others. To imagine that we are going forward when we are only turning round. To think that there is any difference between him that gives no reason, and him that gives a reason, which by his own confession cannot be conceived.

But that he may not be thought to conceive nothing but things inconceivable, he has at last thought on a way by which human sufferings may produce good effects. He imagines that as we have not only animals for food, but choose some for our diversion, the same privilege may be allowed to some beings above us, *who may deceive, torment, or destroy us for the ends only of their own pleasure or utility*. This he again finds impossible to be conceived, *but that impossibility lessens not the probability of the conjecture, which by analogy is so strongly confirmed*.

I cannot resist the temptation of contemplating this analogy, which, I think, he might have carried further, very much to the advantage of his argument. He might have shown that these *hunters, whose game is man*, have many sports analogous to our own. As we drown whelps and kittens, they amuse themselves now and then with sinking a ship, and stand round the fields of Blenheim or the walls of Prague, as we encircle a cock-pit. As we shoot a bird flying, they take a man in the midst of his business or pleasure, and knock him down with an apoplexy. Some of them, perhaps, are virtuosi, and delight in the operations of an asthma, as a human philosopher in the effects of the air-pump. To swell a man with a tympany is as good sport as to blow a frog. Many a merry bout have these frolic beings at the vicissitudes of an ague, and good sport it is to see a man tumble with an epilepsy, and revive and tumble

again, and all this he knows not why. As they are wiser and more powerful than we, they have more exquisite diversions, for we have no way of procuring any sport so brisk and so lasting, as the paroxysms of the gout and stone, which undoubtedly must make high mirth, especially if the play be a little diversified with the blunders and puzzles of the blind and deaf. We know not how far their sphere of observation may extend. Perhaps now and then a merry being may place himself in such a situation as to enjoy at once all the varieties of an epidemical disease, or amuse his leisure with the tossings and contortions of every possible pain exhibited together.

One sport the merry malice of these beings has found means of enjoying, to which we have nothing equal or similar. They now and then catch a mortal proud of his parts, and flattered either by the submission of those who court his kindness, or the notice of those who suffer him to court theirs. A head thus prepared for the reception of false opinions, and the projection of vain designs, they easily fill with idle notions, till in time they make their plaything an author: their first diversion commonly begins with an ode or an epistle, then rises perhaps to a political irony, and is at last brought to its height, by a treatise of philosophy. Then begins the poor animal to entangle himself in sophisms, and flounder in absurdity, to talk confidently of the scale of being, and to give solutions which himself confesses impossible to be understood. Sometimes, however, it happens that their pleasure is without much mischief. The author feels no pain, but while they are wondering at the extravagance of his opinion, and pointing him out to one another as a new example of human folly, he is enjoying his own applause, and that of his companions, and perhaps is elevated with the hope of standing at the head of a new sect.

Many of the books which now crowd the world, may be justly suspected to be written for the sake of some invisible order of beings, for surely they are of no use to any of the corporeal inhabitants of the world. Of the productions of the last bounteous year, how many can be said to serve any purpose of use or pleasure? The only end of writing is to enable the readers better to enjoy life, or better to endure it: and how will either of those be put more in our power by him who tells us that we are puppets, of which some creature not much wiser than ourselves manages the wires? That set of beings unseen and unheard, are hovering about us, trying experiments upon our sensibility, putting us in agonies to see our limbs quiver, torturing us to madness, that they may laugh at our vagaries, sometimes obstructing the bile, that they may see how a man looks when he is yellow; sometimes breaking a traveller's bones, to try

how he will get home; sometimes wasting a man to a skeleton, and sometimes killing him fat for the greater elegance of his hide.

This is an account of natural Evil, which though, like the rest, not quite new, is very entertaining, though I know not how much it may contribute to patience. The only reason why we should contemplate Evil, is that we may bear it better; and I am afraid nothing is much more placidly endured, for the sake of making others sport.

The first pages of the fourth Letter are such as incline me both to hope and wish that I shall find nothing to blame in the succeeding part. He offers a criterion of action, on account of virtue and vice, for which I have often contended, and which must be embraced by all who are willing to know why they act, or why they forbear to give any reason of their conduct to themselves or others.

"In order to find out the true Origin of moral Evil, it will be necessary, in the first place, to inquire into its nature and essence; or what it is that constitutes one action evil, and another good. Various have been the opinions of various authors on this criterion of virtue; and this variety has rendered that doubtful, which must otherwise have been clear and manifest to the meanest capacity. Some indeed have denied that there is any such thing, because different ages and nations have entertained different sentiments concerning it: but this is just as reasonable as to assert, that there are neither sun, moon, nor stars, because astronomers have supported different systems of the motions and magnitudes of these celestial bodies. Some have placed it in conformity to truth, some to the fitness of things, and others to the will of God. But all this is merely superficial: they resolve us not why truth, or the fitness of things, are either eligible or obligatory, or why God should require us to act in one manner rather than another. The true reason of which can possibly be no other than this, because some actions produce happiness, and others misery: so that all moral Good and Evil are nothing more than the production of natural. This alone it is that makes truth preferable to falsehood, this that determines the fitness of things, and this that induces God to command some actions, and forbid others. They who extol the truth, beauty, and harmony of virtue, exclusive of its consequences, deal but in pompous nonsense; and they who would persuade us, that Good and Evil are things indifferent, depending wholly on the will of God, do but confound the nature of things, as well as all our notions of God himself, by representing him capable of willing contradictions; that is, that we should be, and be happy, and at the same time that we should torment and destroy each other; for injuries cannot be made benefits, pain

cannot be made pleasure, and consequently vice cannot be made virtue, by any power whatever. It is the consequences, therefore, of all human actions that must stamp their value. So far as the general practice of any action tends to produce good, and introduce happiness into the world, so far we may pronounce it virtuous; so much Evil as it occasions, such is the degree of vice it contains. I say the general practice, because we must always remember, in judging by this rule, to apply it only to the general species of actions, and not to particular actions: for the infinite wisdom of God, desirous to set bounds to the destructive consequences which must otherwise have followed from the universal depravity of mankind, has so wonderfully contrived the nature of things, that our most vicious actions may sometimes accidentally and collaterally produce good. Thus, for instance, robbery may disperse useless hoards to the benefit of the public; adultery may bring heirs and good humour too into many families, where they would otherwise have been wanting; and murder free the world from tyrants and oppressors. Luxury maintains its thousands, and vanity its ten thousands. Superstition and arbitrary power contribute to the grandeur of many nations, and the liberties of others are preserved by the perpetual contentions of avarice, knavery, selfishness and ambition; and thus the worst of vices, and the worst of men, are often compelled by Providence to serve the most beneficial purposes, contrary to their own malevolent tendencies and inclinations: and thus private vices become public benefits, by the force only of accidental circumstances. But this impeaches not the truth of the criterion of virtue before mentioned, the only solid foundation on which any true system of ethics can be built, the only plain, simple and uniform rule by which we can pass any judgment on our actions: but by this we may be enabled, not only to determine which are Good, and which are Evil, but almost mathematically to demonstrate the proportion of virtue or vice which belongs to each, by comparing them with the degrees of happiness or misery which they occasion. But though the production of happiness is the essence of virtue, it is by no means the end; the great end is the probation of mankind, or the giving them an opportunity of exalting or degrading themselves in another state by their behaviour in the present. And thus indeed it answers two most important purposes; those are the conservation of our happiness, and the test of our obedience; for had not such a test seemed necessary to God's infinite wisdom, and productive of universal good, he would never have permitted the happiness of men, even in this life, to have depended on so precarious a tenure, as their mutual good behaviour to each other. For it is observable, that

he who best knows our formation, has trusted no one thing of importance to our reason or virtue: he trusts only to our appetites for the support of the individual, and the continuance of our species; to our vanity or compassion, for our bounty to others; and to our fears, for the preservation of ourselves; often to our vices for the support of government, and sometimes to our follies for the preservation of our religion. But since some rest of our obedience was necessary, nothing sure could have been commanded for that end so fit and proper, and at the same time so useful, as the practice of virtue: nothing could have been so justly rewarded with happiness, as the production of happiness in conformity to the will of God. It is this conformity alone which adds merit to virtue, and constitutes the essential difference between morality and religion. Morality obliges men to live honestly and soberly, because such behaviour is most conducive to public happiness, and consequently to their own; religion, to pursue the same course, because conformable to the will of their Creator. Morality induces them to embrace virtue from prudential considerations; religion, from those of gratitude and obedience. Morality, therefore, entirely abstracted from religion, can have nothing meritorious in it; it being but wisdom, prudence, or good economy, which, like health, beauty, or riches, are rather obligations conferred upon us by God, than merits in us towards him; for though we may be justly punished for injuring ourselves, we can claim no reward for self-preservation; as suicide deserves punishment and infamy, but a man deserves no reward or honours for not being guilty of it. This I take to be the meaning of all those passages in our Scriptures, in which works are represented to have no merit without faith; that is, not without believing in historical facts, in creeds, and articles; but without being done in pursuance of our belief in God, and in obedience to his commands. And now, having mentioned Scripture, I cannot omit observing that the Christian is the only religious or moral institution in the world, that ever set in a right light these two material points, the essence and the end of virtue, that ever founded the one in the production of happiness, that is, in universal benevolence, or, in their language, charity to all men; the other, in the probation of man, and his obedience to his Creator. Sublime and magnificent as was the philosophy of the ancients, all their moral systems were deficient in these two important articles. They were all built on the sandy foundations of the innate beauty of virtue, or enthusiastic patriotism; and their great point in view was the contemptible reward of human glory; foundations which were by no means able to support the magnificent structures which they erected upon them; for the beauty of virtue, independent of its effects, is unmeaning nonsense; patriotism,

which injures mankind in general for the sake of a particular country, is but a more extended selfishness, and really criminal: and all human glory but a mean and ridiculous delusion. The whole affair then of religion and morality, the subject of so many thousand volumes, is, in short, no more than this: the Supreme Being, infinitely good, as well as powerful, desirous to diffuse happiness by all possible means, has created innumerable ranks and orders of beings, all subservient to each other by proper subordination. One of these is occupied by man, a creature endued with such a certain degree of knowledge, reason, and free-will, as is suitable to his situation, and placed for a time on this globe as in a school of probation and education. Here he has an opportunity given him of improving or debasing his nature, in such a manner as to render himself fit for a rank of higher perfection and happiness, or to degrade himself to a state of greater imperfection and misery; necessary indeed towards carrying on the business of the universe, but very grievous and burdensome to those individuals who, by their own misconduct, are obliged to submit to it. The test of this his behaviour, is doing good, that is, co-operating with his Creator, as far as his narrow sphere of action will permit, in the production of happiness. And thus the happiness and misery of a future state will be the just reward or punishment of promoting or preventing happiness in this. So artificially by this means is the nature of all human virtue and vice contrived, that their rewards and punishments are woven, as it were, in their very essence; their immediate effects give us a foretaste of their future, and their fruits in the present life are the proper samples of what they must unavoidably produce in another. We have reason given us to distinguish these consequences, and regulate our conduct; and lest that should neglect its post, conscience also is appointed as an instinctive kind of monitor, perpetually to remind us both of our interest and our duty."

*Si sic omnia dirisset!* To this account of the essence of vice and virtue, it is only necessary to add, that the consequences of human actions being sometimes uncertain, and sometimes remote, it is not possible in many cases for most men, nor in all cases for any man, to determine what actions will ultimately produce happiness, and therefore it was proper that *revelation* should lay down a rule to be followed invariably in opposition to appearances, and in every change of circumstances, by which we may be certain to promote the general felicity, and be set free from the dangerous temptation of *doing Evil that Good may come*.

Because it may easily happen, and in effect will happen very frequently, that our own private happiness may be promoted by an act injurious to others, when yet no man can be obliged

by nature to prefer ultimately the happiness of others to his own ; therefore, to the instructions of infinite wisdom it was necessary that infinite power should add penal sanctions. That every man to whom those instructions shall be imparted may know, that he can never ultimately injure himself by benefiting others, or ultimately by injuring others benefit himself ; but that however the lot of the good and bad may be huddled together in the seeming confusion of our present state, the time shall undoubtedly come, when the most virtuous will be most happy.

I am sorry that the remaining part of this Letter is not equal to the first. The author has indeed engaged in a disquisition in which we need not wonder if he fails, in the solution of questions on which philosophers have employed their abilities from the earliest times,

And found no end, in wandering mazes lost.

He denies that man was created *perfect*, because the system requires subordination, and because the power of losing his perfection, of "rendering himself wicked and miserable, is the highest imperfection imaginable." Besides, the regular gradations of the scale of being required somewhere "such a creature as man with all his infirmities about him, and the total removal of those would be altering his nature, and when he became perfect he must cease to be man."

I have already spent some considerations on the *scale of being*, of which yet I am obliged to renew the mention whenever a new argument is made to rest upon it ; and I must therefore again remark, that consequences cannot have greater certainty than the postulate from which they are drawn, and that no system can be more hypothetical than this, and perhaps no hypothesis more absurd.

He again deceives himself with respect to the perfection with which *man* is held to be originally vested. "That man came perfect, that is, endued with all possible perfection, out of the hands of his Creator, is a false notion, derived from the philosophers.—The universal system required subordination, and consequently comparative imperfection." That *man was ever endued with all possible perfection*, that is, with all perfection of which the idea is not contradictory, or destructive of itself, is undoubtedly *false*. But it can hardly be called a *false notion*, because no man ever thought it, nor can it be derived from the *philosophers* ; for without pretending to guess what philosophers he may mean, it is very safe to affirm, that no philosopher ever said it. Of those who now maintain that *man* was once perfect, who may very easily be found, let the author inquire whether *man* was ever omniscient, whether he was ever omnipotent, whether he ever had even the lower power of arch-angels or angels. Their answers will soon inform him, that the supposed perfection of *man* was not ab-

solute but relative, that he was perfect in a sense consistent enough with subordination, perfect, not as compared with different beings, but with himself in his present degeneracy ; not perfect as an angel, but perfect as man.

From this perfection, whatever it was, he thinks it necessary that man should be debarred, because pain is necessary to the good of the universe ; and the pain of one order of beings extending its salutary influence to innumerable orders above and below, it was necessary that man should suffer ; but because it is not suitable to justice that pain should be inflicted on innocence, it was necessary that man should be criminal.

This is given as a satisfactory account of the Original of moral Evil, which amounts only to this, that God created beings, whose guilt he foreknew, in order that he might have proper objects of pain, because the pain of part is, no man knows how or why, necessary to the felicity of the whole.

The perfection which man once had, may be so easily conceived, that without any unusual strain of imagination we can figure its revival. All the duties to God or man that are neglected, we may fancy performed ; all the crimes that are committed, we may conceive forborne. Man will then be restored to his moral perfections : and into what head can it enter, that by this change the universal system would be shaken, or the condition of any order of beings altered for the worse?

He comes in the fifth Letter to political, and in the sixth to religious Evils. Of political Evil, if we suppose the Origin of moral Evil discovered, the account is by no means difficult : polity being only the conduct of immoral men in public affairs. The Evils of each particular kind of government are very clearly and elegantly displayed, and from their secondary causes very rationally deduced ; but the first cause lies still in its ancient obscurity. There is in this Letter nothing new, nor any thing eminently instructive ; one of his practical deductions, that "from government Evils cannot be eradicated, and their excess only can be prevented," has been always allowed ; the question upon which all dissension arises is, when that excess begins, at what point men shall cease to bear, and attempt to remedy.

Another of his precepts, though not new, well deserves to be transcribed, because it cannot be too frequently impressed.

"What has here been said of their imperfections and abuses, is by no means intended as a defence of them ; every wise man ought to redress them to the utmost of his power ; which can be effected by one method only ; that is, by a reformation of manners : for as all political Evils derive their original from moral, these can never be removed until those are first amended.

He, therefore, who strictly adheres to virtue and sobriety in his conduct, and enforces them by his example, does more real service to a state, than he who displaces a minister, or dethrones a tyrant; this gives but a temporary relief, but that exterminates the cause of the disease. No immoral man then can possibly be a true patriot: and all those who profess outrageous zeal for the liberty and prosperity of their country, and at the same time infringe her laws, affront her religion, and debauch her people, are but despicable quacks, by fraud or ignorance increasing the disorders they pretend to remedy."

Of religion he has said nothing but what he has learned, or might have learned from the divines; that it is not universal, because it must be received upon conviction and successively received by those whom conviction reached; that its evidences and sanctions are not irresistible, because it was intended to induce, not to compel; and that it is obscure, because we want faculties to comprehend it. What he means by his assertion, that it wants policy, I do not well understand; he does not mean to deny that a good christian will be a good governor, or a good subject; and he has before justly observed, that the good man only is a patriot.

Religion has been, he says, corrupted by the wickedness of those to whom it was communicated, and has lost part of its efficacy by its connection with temporal interest and human passion.

He justly observes, that from all this, no conclusion can be drawn against the divine original of Christianity, since the objections arise not from the nature of the revelation, but of him to whom it is communicated.

All this is known, and all this is true; but why, we have not yet discovered. Our author, if I understand him right, pursues the argument thus: the religion of man produces evils, because the morality of man is imperfect; his morality is imperfect, that he may be justly a subject of punishment; he is made subject to punishment because the pain of part is necessary to the happiness of the whole; pain is necessary to happiness, no mortal can tell why or how.

Thus, after having clambered with great labour from one step of argumentation to another, instead of rising into the light of knowledge, we are devolved back into dark ignorance; and all our effort ends in belief, that for the Evils of life there is some good reason, and in confession, that the reason cannot be found. This is all that has been produced by the revival of Chrysippus's untractableness of matter, and the Arabian scale of existence. A system has been raised, which is so ready to fall to pieces of itself, that no great praise can be derived from its destruction. To object is always easy, and it has been well observed by a late writer, that *the*

*hand which cannot build a hovel, may demolish a temple.\**

## REVIEW OF THE HISTORY OF THE ROYAL SOCIETY OF LONDON,

For improving of Natural Knowledge, from its first Rise. In which the most considerable Papers communicated to the Society, which have hitherto not been published, are inserted in their proper Order, as a supplement to the Philosophical Transactions. By THOMAS BIRCH, D.D. Secretary to the Society. 2 vols. 4to.

THIS book might more properly have been entitled by the author a diary than a history, as it proceeds regularly from day to day so minutely as to number over the members present at each committee, and so slowly, that two large volumes contain only the transactions of the eleven first years from the institution of the Society.

I am yet far from intending to represent this work as useless. Many particularities are of importance to one man, though they appear trifling to another, and it is always more safe to admit copiousness than to affect brevity. Many informations will be afforded by this book to the biographer. I know not where else it can be found, but here and in Ward, that Cowley was doctor in physic. And whenever any other institution of the same kind shall be attempted, the exact relation of the progress of the Royal Society may furnish precedents.

These volumes consist of an exact journal of the Society; of some papers delivered to them, which though registered and preserved, had been never printed; and of short memoirs of the more eminent members, inserted at the end of the year in which each died.

The original of the society is placed earlier in this history than in that of Dr. Sprat. Theodore Haak, a German of the Palatinate, in 1645, proposed to some inquisitive and learned men a weekly meeting for the cultivation of natural knowledge. The first Associates, whose names ought surely to be preserved, were Dr. Wilkins, Dr. Wallis, Dr. Goddard, Dr. Ent, Dr. Glisson, Dr. Merret, Mr. Foster of Gresham, and Mr. Haak. Sometime afterwards Wilkins, Wallis, and Goddard being removed to Oxford carried on the same design there by stated meetings, and adopted into their society Dr. Ward, Dr. Bathurst, Dr. Petty, and Dr. Willis.

The Oxford Society coming to London in 1659, joined their friends, and augmented their number, and for some time met in Gresham-College. After the restoration their number

\* New Practice of Physic.

was again increased, and on the 28th of November, 1660, a select party happening to retire for conversation to Mr. Rooke's apartment in Gresham-College, formed the first plan of a regular society. Here Dr. Sprat's history begins, and therefore from this period the proceedings are well known.\*

## REVIEW OF THE GENERAL HISTORY OF POLYBIUS,

IN FIVE BOOKS, TRANSLATED FROM THE GREEK,  
BY MR. HAMPTON.

THIS appears to be one of the books which will long do honour to the present age. It has been by some remarker observed, that no man ever grew immortal by a translation: and undoubtedly translations into the prose of a living language must be laid aside whenever the language changes, because the matter being always to be found in the original, contributes nothing to the preservation of the form superinduced by the translator. But such versions may last long, though they can scarcely last always; and there is reason to believe that this will grow in reputation while the English tongue continues in its present state.

The great difficulty of a translator is to preserve the native form of his language, and the unconstrained manner of an original writer. This Mr. Hampton seems to have attained in a degree of which there are few examples. His book has the dignity of antiquity, and the easy flow of a modern composition.

It were, perhaps, to be desired that he had illustrated with notes an author which must have many difficulties to an English reader, and particularly that he had explained the ancient art of war; but these omissions may be easily supplied by an inferior hand, from the antiquaries and commentators.

To note omissions where there is so much performed, would be invidious, and to commend is unnecessary where the excellence of the work may be more easily and effectually shown by exhibiting a specimen.\*

## REVIEW OF MISCELLANIES ON MORAL AND RELIGIOUS SUBJECTS,

IN PROSE AND VERSE, BY ELIZABETH HARRISON.

THIS volume, though only one name appears upon the first page, has been produced by the

contribution of many hands, and printed by the encouragement of a numerous subscription, both which favours seem to be deserved by the modesty and piety of her on whom they were bestowed.

The authors of the essays in prose seem generally to have imitated, or tried to imitate, the copiousness and luxuriance of Mrs. Rowe; this however is not all their praise: they have laboured to add to her brightness of imagery her purity of sentiments. The poets have had Dr. Watts before their eyes, a writer who, if he stood not in the first class of genius, compensated that defect by a ready application of his powers to the promotion of piety. The attempt to employ the ornaments of romance in the decoration of religion was, I think, first made by Mr. Boyle's *Martyrdom of Theodora*, but Boyle's philosophical studies did not allow him time for the cultivation of style, and the completion of the great design was reserved for Mrs. Rowe. Dr. Watts was one of the first who taught the dissenters to write and speak like other men, by showing them that elegance might consist with piety. They would have both done honour to a better society, for they had that charity, which might well make their failings forgotten, and with which the whole Christian world might wish for communion. They were pure from all the heresies of an age, to which every opinion is become a favourite that the universal church has hitherto detested.

This praise the general interest of mankind requires to be given to writers who please and do not corrupt, who instruct and do not weary. But to them all human eulogies are vain, whom I believe applauded by angels, and numbered with the just.\*

## ACCOUNT OF A BOOK ENTITLED, AN HISTORICAL AND CRITICAL INQUIRY INTO THE EVIDENCE

Produced by the Earls of MORAY and MORRIS against  
MARY QUEEN OF SCOTS:†

With an Examination of the Rev. Dr. ROBERTSON'S Dissertation, and Mr. HUME'S History, with respect to that Evidence;‡

We live in an age in which there is much talk of independence, of private judgment, of liberty of

\* From the *Literary Magazine*, 1756.—There are other Reviews of Books by Dr. Johnson in this Magazine, but, in general, very short, and consisting chiefly of a few introductory remarks, and an extract. That on Mrs. Harrison's *Miscellanies* may be accounted somewhat interesting from the notice of Dr. Watts.

† Written by Mr. Tytler, of Edinburgh.

‡ Printed in the *Gentleman's Magazine*, October, 1760.

\* From the *Literary Magazine*, 1756.

thought, and liberty of press. Our clamorous praises of liberty sufficiently prove that we enjoy it; and if by liberty nothing else be meant, than security from the persecutions of power, it is so fully possessed by us, that little more is to be desired, except that one should talk of it less, and use it better.

But a social being can scarcely rise to complete independence; he that has any wants, which others can supply, must study the gratification of them whose assistance he expects; this is equally true, whether his wants be wants of nature or of vanity. The writers of the present time are not always candidates for preferment, nor often the hirelings of a patron. They profess to serve no interest, and speak with loud contempt of sycophants and slaves.

There is, however, a power, from whose influence neither they nor their predecessors have ever been free. Those who have set greatness at defiance, have yet been the slaves of fashion. When an opinion has once become popular, very few are willing to oppose it. Idleness is more willing to credit than inquire; cowardice is afraid of controversy, and vanity of answer; and he that writes merely for sale, is tempted to court purchasers by flattering the prejudices of the public.

It has now been fashionable for near half a century, to defame and vilify the house of Stuart, and to exalt and magnify the reign of Elizabeth. The Stuarts have found few apologists, for the dead cannot pay for praise; and who will, without reward, oppose the tide of popularity? Yet there remains still among us, not wholly extinguished, a zeal for truth, a desire of establishing right, in opposition to fashion. The author, whose work is now before us, has attempted a vindication of Mary of Scotland, whose name has for some years been generally resigned to infamy, and who has been considered as the murderer of her husband, and condemned by her own letters.

Of these letters, the author of this vindication confesses the importance to be such, that *if they be genuine, the queen was guilty; and if they be spurious, she was innocent*. He has, therefore, undertaken to prove them spurious, and divided his treatise into six parts.

In the *first* is contained the history of the letters, from their discovery by the earl of Morton, their being produced against queen Mary, and their several appearances in England before Queen Elizabeth and her commissioners, until they were finally delivered back again to the earl of Morton.

The *second* contains a short abstract of Mr. Goodall's arguments for proving the letters to be spurious and forged; and of Dr. Robertson and Mr. Hume's objections by way of answer to Mr. Goodall, with critical observations on these authors.

The *third* contains an examination of the arguments of Dr. Robertson and Mr. Hume, in support of the authenticity of the letters.

The *fourth* contains an examination of the confession of Nicholas Hubert, commonly called *French Paris*, with observations showing the same to be a forgery.

The *fifth* contains a short recapitulation or summary of the arguments on both sides of the question. And,

The *last* is an historical collection of the direct or positive evidence still on record, tending to show what part the earls of Murray and Morton, and secretary Lethington, had in the murder of the lord Darnley.

The author apologises for the length of this book, by observing, that it necessarily comprises a great number of particulars, which could not easily be contracted: the same plea may be made for the imperfection of our extract, which will naturally fall below the force of the book, because we can only select parts of that evidence, which owes its strength to its concatenation, and which will be weakened whenever it is disjointed.

The account of the seizure of these controverted letters is thus given by the queen's enemies:

"That in the castell of Edinburgh thair was left be the Erle of Bothwell, before his fleeing away, and was send for be ane George Dalgleish, his servand, who was taken be the Erle of Mortoun, ane small gylt coffer, not fully ane fute lang, garnisht in sindrie places with the Roman letter E. under ane king's crowne: wharin were certane letteris and writings weel knawin, and be aithis to be affirmit to have been written with the Quene of Scottis awn hand to the Erle."

The papers in the box were said to be eight letters in French, some love sonnets in French also, and a promise of marriage by the Queen to Bothwell.

To the reality of these letters our author makes some considerable objections, from the nature of things; but as such arguments do not always convince, we will pass to the evidence of facts.

On June 15th, 1567, the queen delivered herself to Morton, and his party, who imprisoned her.

June 20th, 1567, Dalgleish was seized, and six days after was examined by Morton; his examination is still extant, and there is no mention of this fatal box.

December 4th, 1567, Murray's secret council published an act, in which is the first mention of these letters, and in which they are said to be *written and subscript with her awn hand*. Ten days after Murray's first parliament met, and passed an act, in which they mention *previe letters written hablelie [wholly] with her awn hand*. The difference between *written* and *subscribed*, and *wholly written*, gives the author just reason

to suspect, first, a forgery, and then a variation of the forgery. It is indeed very remarkable, that the first account asserts more than the second, though the second contains all the truth; for the letters, whether *written* by the queen or not, were not *subscribed*. Had the second account differed from the first only by something added, the first might have contained truth, though not all the truth; but as the second corrects the first by diminution, the first cannot be cleared from falsehood.

In October, 1568, these letters were shown at York to Elizabeth's commissioners, by the agents of Murray, but not in their public character as commissioners, but by way of private information, and were not therefore exposed to Mary's commissioners. Mary, however, hearing that some letters were intended to be produced against her, directed her commissioners to require them for her inspection, and, in the mean time, to declare them *false and feigned, forged and invented*, observing that there were many that could counterfeit her hand.

To counterfeit a name is easy, to counterfeit a hand through eight letters very difficult. But it does not appear that the letters were ever shown to those who would desire to detect them; and to the English commissioners a rude and remote imitation might be sufficient, since they were not shown as judicial proofs, and why they were not shown as proof, no other reason can be given than they must have then been examined, and that examination would have detected the forgery.

These letters, thus timorously and suspiciously communicated, were all the evidence against Mary; for the servants of Bothwell, executed for the murder of the king, acquitted the queen at the hour of death. These letters were so necessary to Murray, that he alleges them as the reason of the queen's imprisonment, though he imprisoned her on the 16th, and pretended not to have intercepted the letters before the 20th of June.

Of these letters, on which the fate of princes and kingdoms was suspended, the authority should have been put out of doubt; yet that such letters were ever found, there is no witness but Morton, who accused the queen, and Crawford, a dependent on Lennox, another of her accusers. Dalgleish, the bearer, was hanged without any interrogatories concerning them; and Hulet, mentioned in them, though then in prison, was never called to authenticate them, nor was his confession produced against Mary till death had left him no power to disown it.

Elizabeth, indeed, was easily satisfied; she declared herself ready to receive the proofs against Mary, and absolutely refused Mary the liberty of confronting her accusers, and making her defence. Before such a judge, a very little proof would be sufficient. She gave the accusers of

Mary leave to go to Scotland, and the box and letters were seen no more. They have been since lost, and the discovery, which comparison of writing might have made, is now no longer possible. Hume has, however, endeavoured to palliate the conduct of Elizabeth, but *his account*, says our author, is *contradicted almost in every sentence by the records, which, it appears, he has himself perused*.

In the next part, the authenticity of the letters is examined; and it seems to be proved beyond contradiction, that the French letters, supposed to have been written by Mary, are translated from the Scotch copy, and, if originals, which it was so much the interest of such numbers to preserve, are wanting, it is much more likely that they never existed, than that they have been lost.

The arguments used by Dr. Robertson, to prove the genuineness of the letters, are next examined. Robertson makes use principally of what he calls the *internal evidence*, which, amounting at most to conjecture, is opposed by conjecture equally probable.

In examining the confession of Nicholas Hubert, or *French Paris*, this new apologist of Mary seems to gain ground upon her accuser. *Paris* is mentioned in the letters, as the bearer of them to Bothwell; when the rest of Bothwell's servants were executed, clearing the queen in the last moment, *Paris*, instead of suffering his trial with the rest at Edinburgh, was conveyed to St. Andrew's, where Murray was absolute, put into a dungeon of Murray's citadel, and two years after condemned by Murray himself nobody knew how. Several months after his death, a confession in his name, without the regular testifications, was sent to Cecil, at what exact time nobody can tell.

Of this confession, Lesly, Bishop of Ross, openly denied the genuineness, in a book printed at London, and suppressed by Elizabeth; and another historian of that time declares, that *Paris* died without any confession; and the confession itself was never shown to Mary, or to Mary's commissioners. The author makes this reflection:—

“ From the violent presumptions that arise from their carrying this poor ignorant stranger from Edinburgh, the ordinary seat of justice; their keeping him hid from all the world, in a remote dungeon, and not producing him with their other evidences, so as he might have been publicly questioned; the positive and direct testimony of the author of Crawford's manuscript, then living, and on the spot at the time; with the public affirmation of the bishop of Ross at the time of *Paris's* death, that he had vindicated the queen with his dying breath; the behaviour of Murray, Morton, Buchanan, and even of Hay, the attester of this pretended confession, on that occasion; their close and reserved silence at the time when they must have had

this confession of *Paris* in their pocket; and their publishing every other circumstance that could tend to blacken the queen, and yet omitting this confession, the only direct evidence of her supposed guilt; all this duly and dispassionately considered, I think one may safely conclude, that it was judged not fit to expose so soon to light this piece of evidence against the queen; which a cloud of witnesses, living, and present at *Paris's* execution, would surely have given clear testimony against, as a notorious imposture."

Mr. Hume, indeed, observes, "It is in vain at present to seek for improbabilities in Nicholas Hubert's dying confession, and to magnify the smallest difficulties into a contradiction. It was certainly a *regular judicial* paper, given in regularly and judicially, and ought to have been canvassed at the time, if the persons, whom it concerned, had been assured of their innocence." —To which our author makes a reply, which cannot be shortened without weakening it:

"Upon what does this author ground his sentence? Upon two very plain reasons, *first*, That the confession was a judicial one, that is, taken in presence, or by authority of a judge. And *secondly*, That it was regularly and judicially given in; that must be understood during the time of the conferences before queen Elizabeth and her council, in presence of Mary's commissioners; at which time she ought to have canvassed it, says our author, if she knew her innocence.

"That it was not a judicial confession, is evident; the paper itself does not bear any such mark; nor does it mention that it was taken in presence of any person, or by any authority whatsoever; and, by comparing it with the judicial examinations of Dalgleish, Hay, and Hepburn, it is apparent, that it is destitute of every formality requisite in a judicial evidence. In what dark corner, then, this strange production was generated, our author may endeavour to find out, if he can.

"As to his second assertion, that it was regularly and judicially given in, and therefore ought to have been canvassed by Mary during the conferences, we have already seen that this likewise is not fact: the conferences broke up in February, 1569: Nicholas Hubert was not hanged till August thereafter, and his dying confession, as Mr. Hume calls it, is only dated the 10th of that month. How then can this gentleman gravely tell us, that this confession was judicially given in, and ought to have been at that very time canvassed by queen Mary, and her commissioners? Such positive assertions, apparently contrary to fact, are unworthy the character of an historian, and may very justly render his decision, with respect to evidences of a higher nature, very dubious. In answer then to Mr. Hume: As the queen's accusers did not

choose to produce this material witness, *Paris*, whom they had alive, and in their hands, nor any declaration or confession from him at the critical and proper time for having it canvassed by the queen, I apprehend our author's conclusion may fairly be used against himself; that it is in vain at present to support the improbabilities and absurdities in a confession, taken in a clandestine way, nobody knows how; and produced after *Paris's* death, by nobody knows whom; and from every appearance destitute of every formality requisite and common to such sort of evidence: for these reasons, I am under no sort of hesitation to give sentence against Nicholas Hubert's confession, as a gross imposture and forgery."

The state of the evidence relating to the letters is this:

Morton affirms that they were taken in the hands of Dalgleish. The examination of Dalgleish is still extant, and he appears never to have been once interrogated concerning the letters.

Morton and Murray affirm that they were written by the queen's hand; they were carefully concealed from Mary and her commissioners, and were never collated by one man, who could desire to disprove them.

Several of the incidents mentioned in the letters are confirmed by the oath of Crawford, one of Lennox's defendants, and some of the incidents are so minute, as that they could scarcely be thought on by a forger. Crawford's testimony is not without suspicion. Whoever practises forgery, endeavours to make truth the vehicle of falsehood. Of a prince's life very minute incidents are known; and if any are too slight to be remarked, they may be safely feigned, for they are likewise too slight to be contradicted. But there are still more reasons for doubting the genuineness of these letters. They had no date of time or place, no seal, no direction, no superscription.

The only evidences that could prove their authenticity were Dalgleish and *Paris*, of which Dalgleish, at his trial, was never questioned about them; *Paris* was never publicly tried, though he was kept alive through the time of the conference.

The servants of Bothwell, who were put to death for the king's murder, cleared Mary with their last words.

The letters were first declared to be subscribed, and were then produced without subscription.

They were shown during the conferences at York privately to the English commissioners, but were concealed from the commissioners of Mary.

Mary always solicited the perusal of these letters, and was always denied it.

She demanded to be heard in person by

Elizabeth, before the nobles of England, and the ambassadors of other princes, and was refused.

When Mary persisted in demanding copies of the letters, her commissioners were dismissed with their box to Scotland, and the letters were seen no more.

The French letters, which for almost two centuries have been considered as originals, by the enemies of Mary's memory, are now discovered to be forgeries, and acknowledged to be translations, and, perhaps, French translations of a Latin translation. And the modern ac-

cusers of Mary are forced to infer from these letters, which now exist, that other letters existed formerly, which have been lost in spite of curiosity, malice, and interest.

The rest of this treatise is employed in an endeavour to prove, that Mary's accusers were the murderers of Darnley: through this inquiry it is not necessary to follow him; only let it be observed, that, if these letters were forged by them, they may easily be thought capable of other crimes. That the letters were forged, is now made so probable, that perhaps they will never more be cited as testimonies.

## TALES OF IMAGINATION.

### THE VISION OF THEODORE, THE HERMIT OF TENERIFFE,

FOUND IN HIS CELL.—1748.

FROM THE PRECEPTOR.

SON of Perseverance, whoever thou art, whose curiosity has led thee hither, read and be wise. He that now calls upon thee is Theodore, the Hermit of Teneriffe, who in the fifty-seventh year of his retreat, left this instruction to mankind, lest his solitary hours should be spent in vain.

I was once what thou art now, a groveller on the earth, and a gazer at the sky; I trafficked and heaped wealth together, I loved and was favoured, I wore the robe of honour and heard the music of adulation: I was ambitious, and rose to greatness: I was unhappy, and retired. I sought for some time what I at length found here, a place where all real wants might be easily supplied, and where I might not be under the necessity of purchasing the assistance of men by the toleration of their follies. Here I saw fruits and herbs and water, and here determined to wait the hand of death, which I hope, when at last it comes, will fall lightly upon me.

Forty-eight years had I now passed in forgetfulness of all mortal cares, and without any inclination to wander farther than the necessity of procuring sustenance required; but as I stood one day beholding the rock that overhangs my cell, I found in myself a desire to climb it; and when I was on its top, was in the same manner determined to scale the next, till by degrees I conceived a wish to view the summit of the

mountain, at the foot of which I had so long resided. This motion of my thoughts I endeavoured to suppress, not because it appeared criminal, but because it was new; and all change not evidently for the better, alarms a mind taught by experience to distrust itself. I was often afraid that my heart was deceiving me, that my impatience of confinement arose from some earthly passion, and that my ardour to survey the works of nature was only a hidden longing to mingle once again in the scenes of life. I therefore endeavoured to settle my thoughts into their former state, but found their distraction every day greater. I was always reproaching myself with the want of happiness within my reach, and at last began to question whether it was not laziness rather than caution that restrained me from climbing to the summit of Teneriffe.

I rose therefore before the day, and began my journey up the steep of the mountain; but I had not advanced far, old as I was and burthened with provisions, when the day began to shine upon me, the declivities grew more precipitous, and the sand slid from beneath my feet: at last, fainting with labour, I arrived at a small plain almost inclosed by rocks, and open only to the east. I sat down to rest awhile, in full persuasion, that when I had recovered my strength I should proceed on my design; but when once I had tasted ease, I found many reasons against disturbing it. The branches spread a shade over my head, and the gales of spring wafted odours to my bosom.

As I sat thus, forming alternately excuses for delay, and resolutions to go forward, an irresistible heaviness suddenly surprised me; I laid my

head upon the bank, and resigned myself to sleep : when methought I heard the sound as of the flight of eagles, and a being of more than human dignity stood before me. While I was deliberating how to address him, he took me by the hand with an air of kindness, and asked me solemnly, but without severity, "Theodore, whither art thou going?" "I am climbing," answered I, "to the top of the mountain, to enjoy a more extensive prospect of the works of nature." "Attend first," says he, "to the prospect which this place affords, and what thou dost not understand I will explain. I am one of the benevolent beings who watch over the children of the dust, to preserve them from those evils, which will not ultimately terminate in good, and which they do not, by their own faults, bring upon themselves. Look round therefore without fear : observe, contemplate, and be instructed."

Encouraged by this assurance, I looked and beheld a mountain higher than Teneriffe, to the summit of which the human eye could never reach : when I had tired myself with gazing upon its height, I turned my eyes towards its foot, which I could easily discover, but was amazed to find it without foundation, and placed inconceivably in emptiness and darkness. Thus I stood terrified and confused ; above were tracks inscrutable, and below was total vacuity. But my preceptor, with a voice of admonition, cried out, "Theodore, be not affrighted, but raise thy eyes again ; the Mountain of Existence is before thee, survey it and be wise."

I then looked with more deliberate attention, and observed the bottom of the mountain to be of gentle rise, and overspread with flowers ; the middle to be more steep, embarrassed with crags, and interrupted by precipices, over which hung branches loaded with fruits, and among which were scattered palaces and bowers. The tracts which my eye could reach nearest the top were generally barren ; but there were among the clefts of the rocks a few hardy ever-greens, which though they did not give much pleasure to the sight or smell, yet seemed to cheer the labour and facilitate the steps of those who were clambering among them.

Then, beginning to examine more minutely the different parts, I observed at a great distance a multitude of both sexes issuing into view from the bottom of the mountain. Their first actions I could not accurately discern ; but, as they every moment approached nearer, I found that they amused themselves with gathering flowers under the superintendence of a modest virgin in a white robe, who seemed not over solicitous to confine them to any settled pace or certain track : for she knew that the whole ground was smooth and solid, and that they could not easily be hurt or bewildered. When, as it often happened, they plucked a thistle for a flower, Inno-

cence, so she was called, would smile at the mistake. Happy, said I, are they who are under so gentle a government, and yet are safe. But I had no opportunity to dwell long on the consideration of their felicity ; for I found that Innocence continued her attendance but a little way, and seemed to consider only the flowery bottom of the mountain as her proper province. Those whom she abandoned scarcely knew that they were left, before they perceived themselves in the hands of Education, a nymph more severe in her aspect, and imperious in her commands, who confined them to certain paths, in their opinion too narrow and too rough. These they were continually solicited to leave by Appetite, whom Education could never fright away, though she sometimes averted her to such timidity, that the effects of her presence were scarcely perceptible. Some went back to the first part of the mountain, and seemed desirous of continuing busied in plucking flowers, but were no longer guarded by Innocence ; and such as Education could not force back, proceeded up the mountain by some miry road, in which they were seldom seen, and scarcely ever regarded.

As Education led her troop up the mountain, nothing was more observable than that she was frequently giving them cautions to beware of Habits ; and was calling out to one or another at every step, that a Habit was ensnaring them ; that they would be under the dominion of Habit before they perceived their danger : and that those whom Habit should once subdue, had little hope of regaining their liberty.

Of this caution, so frequently repeated, I was very solicitous to know the reason, when my protector directed my regard to a troop of pygmies, which appeared to walk silently before those that were climbing the mountain, and each to smooth the way before her follower. I found that I had missed the notice of them before, both because they were so minute as not easily to be discerned, and because they grew every moment nearer in their colour to the objects with which they were surrounded. As the followers of Education did not appear to be sensible of the presence of these dangerous associates, or, ridiculing their diminutive size, did not think it possible that human beings should ever be brought into subjection by such feeble enemies, they generally heard her precepts of vigilance with wonder : and when they thought her eye withdrawn, treated them with contempt. Nor could I myself think her cautions so necessary as her frequent inculcations seemed to suppose, till I observed that each of these petty beings held secretly a chain in her hand, with which she prepared to bind those whom she found within her power. Yet these Habits, under the eye of Education, went quietly forward, and seemed very little to increase in bulk

or strength; for though they were always willing to join with Appetite, yet when Education kept them apart from her, they would very punctually obey command, and make the narrow roads in which they were confined easier and smoother.

It was observable, that their stature was never at a stand, but continually growing or decreasing, yet not always in the same proportions: nor could I forbear to express my admiration, when I saw in how much less time they generally gained than lost bulk. Though they grew slowly in the road of Education, it might however be perceived that they grew; but if they once deviated at the call of Appetite, their stature soon became gigantic; and their strength was such that Education pointed out to her tribe many that were led in chains by them, whom she could never more rescue from their slavery. She pointed them out, but with little effect; for all her pupils appeared confident of their own superiority to the strongest Habit, and some seemed in secret to regret that they were hindered from following the triumph of Appetite.

It was the peculiar artifice of Habit not to suffer her power to be felt at first. Those whom she led, she had the address of appearing only to attend, but was continually doubling her chains upon her companions; which were so slender in themselves, and so silently fastened, that while the attention was engaged by other objects, they were not easily perceived. Each link grew tighter as it had been longer worn; and when by continual additions they became so heavy as to be felt, they were very frequently too strong to be broken.

When Education had proceeded in this manner to the part of the mountain where the declivity began to grow craggy, she resigned her charge to two powers of superior aspect. The meaner of them appeared capable of presiding in senates, or governing nations, and yet watched the steps of the other with the most anxious attention, and was visibly confounded and perplexed if ever she suffered her regard to be drawn away. The other seemed to approve her submission as pleasing, but with such a condescension as plainly showed that she claimed it as due; and indeed so great was her dignity and sweetness, that he who would not reverence, must not behold her.

"Theodore," said my protector, "be fearless, and be wise; approach these powers, whose dominion extends to all the remaining part of the Mountain of Existence." I trembled, and ventured to address the inferior nymph, whose eyes, though piercing and awful, I was not able to sustain. "Bright Power," said I, "by whatever name it is lawful to address thee, tell me, thou who presidest here, on what condition thy protection will be granted?" "It will be granted," said she, "only to obedience. I am Reason, of all subordinate beings the noblest and

the greatest; who, if thou wilt receive my laws, will reward thee like the rest of my votaries, by conducting thee to Religion." Charmed by her voice and aspect, I professed my readiness to follow her. She then presented me to her mistress, who looked upon me with tenderness. I bowed before her, and she smiled.

When Education delivered up those for whose happiness she had been so long solicitous, she seemed to expect that they should express some gratitude for her care, or some regret at the loss of that protection which she had hitherto afforded them. But it was easy to discover, by the alacrity which broke out at her departure, that her presence had been long displeasing, and that she had been teaching those who felt in themselves no want of instruction. They all agreed in rejoicing that they should no longer be subject to her caprices, or disturbed by her documents, but should be now under the direction only of Reason, to whom they made no doubt of being able to recommend themselves by a steady adherence to all her precepts. Reason counselled them, at their first entrance upon her province, to inlist themselves among the votaries of Religion; and informed them, that if they trusted to her alone, they would find the same fate with her other admirers, whom she had not been able to secure against Appetites and Passions, and who, having been seized by Habits in the regions of Desire, had been dragged away to the caverns of Despair. Her admonition was vain; the greater number declared against any other direction, and doubted not but by her superintendency they should climb with safety up the Mountain of Existence. "My power," said Reason, "is to advise, not to compel; I have already told you the danger of your choice. The path seems now plain and even, but there are asperities and pitfalls, over which Religion only can conduct you. Look upwards, and you perceive a mist before you, settled upon the highest visible part of the mountain; a mist by which my prospect is terminated, and which is pierced only by the eyes of Religion. Beyond it are the temples of Happiness, in which those who climb the precipice by her direction, after the toil of their pilgrimage, repose for ever. I know not the way, and therefore can only conduct you to a better guide. Pride has sometimes reproached me with the narrowness of my view, but, when she endeavoured to extend it, could only show me, below the mist, the bowers of Content; even they vanished as I fixed my eyes upon them; and those whom she persuaded to travel towards them were enchained by Habits, and engulfed by Despair, a cruel tyrant, whose caverns are beyond the darkness on the right side and on the left, from whose prisons none can escape, and whom I cannot teach you to avoid."

Such was the declaration of Reason to those who demanded her protection. Some that re-

collected the dictates of Education, finding them now seconded by another authority, submitted with reluctance to the strict decree, and engaged themselves among the followers of Religion, who were distinguished by the uniformity of their march, though many of them were women, and by their continual endeavours to move upwards, without appearing to regard the prospects which at every step courted their attention.

All those who determined to follow either Reason or Religion, were continually importuned to forsake the road, sometimes by Passions, and sometimes by Appetites, of whom both had reason to boast the success of their artifices; for so many were drawn into by-paths, that any way was more populous than the right. The attacks of the Appetites were more impetuous, those of the Passions longer continued. The Appetites turned their followers directly from the true way; but the Passions marched at first in a path nearly in the same direction with that of Reason and Religion, but deviated by slow degrees, till at last they entirely changed their course. Appetite drew aside the dull, and Passion the sprightly. Of the Appetites, Lust was the strongest; and of the Passions, Vanity. The most powerful assault was to be feared, when a Passion and an Appetite joined their enticements; and the path of Reason was best followed, when a Passion called to one side, and an Appetite to the other.

These seducers had the greatest success upon the followers of Reason, over whom they scarcely ever failed to prevail, except when they counteracted one another. They had not the same triumphs over the votaries of Religion; for though they were often led aside for a time, Religion commonly recalled them by her emissary Conscience, before Habit had time to enchain them. But they that professed to obey Reason, if once they forsook her, seldom returned; for she had no messenger to summon them but Pride, who generally betrayed her confidence, and employed all her skill to support Passion; and if ever she did her duty, was found unable to prevail, if Habit had interposed.

I soon found that the great danger to the followers of Religion was only from Habit; every other power was easily resisted, nor did they find any difficulty, when they inadvertently quitted her, to find her again by the direction of Conscience, unless they had given time to Habit to draw her chain behind them, and bar up the way by which they had wandered. Of some of those, the condition was justly to be pitied, who turned at every call of Conscience, and tried, but without effect, to burst the chains of Habit; saw Religion walking forward at a distance, saw her with reverence, and longed to join her; but were, whenever they approached her, withheld by Habit, and languished in sordid bondage,

which they could not escape, though they scorned and hated it.

It was evident that the Habits were so far from growing weaker by these repeated contests, that if they were not totally overcome, every struggle enlarged their bulk and increased their strength; and a Habit opposed and victorious was more than twice as strong as before the contest. The manner in which those who were weary of their tyranny endeavoured to escape from them, appeared by the event to be generally wrong; they tried to loose their chains one by one, and to retreat by the same degrees as they advanced; but before the deliverance was completed, Habit always threw new chains upon her fugitive; nor did any escape her but those, who, by an effort sudden and violent, burst their shackles at once and left her at a distance; and even of these many rushing too precipitately forward, and hindered by their terrors from stopping where they were safe, were fatigued with their own vehemence, and resigned themselves again to that power from whom an escape must be so dearly bought, and whose tyranny was little felt, except when it was resisted.

Some however there always were, who, when they found Habit prevailing over them, called upon Reason or Religion for assistance; each of them willingly came to the succour of her suppliant, but neither with the same strength nor the same success. Habit, insolent with her power, would often presume to parley with Reason, and offer to loose some of her chains if the rest might remain. To this Reason, who was never certain of victory, frequently consented, but always found her concession destructive, and saw the captive led away by Habit to his former slavery. Religion never submitted to treaty, but held out her hand with certainty of conquest; and if the captive to whom she gave it did not quit his hold, always led him away in triumph, and placed him in the direct path to the Temple of Happiness, where Reason never failed to congratulate his deliverance, and encourage his adherence to that power to whose timely succour he was indebted for it.

When the traveller was again placed in the road of Happiness, I saw Habit again gliding before him, but reduced to the stature of a dwarf, without strength and without activity; but when the Passions or Appetites, which had before seduced him, made their approach, Habit would on a sudden start into size, and with unexpected violence push him towards them. The wretch, thus impelled on one side, and allured on the other, too frequently quitted the road of Happiness, to which after his second deviation from it, he rarely returned: but by a timely call upon Religion, the force of Habit was eluded, her attacks grew fainter, and at last her

correspondence with the enemy was entirely destroyed. She then began to employ those restless faculties in compliance with the power which she could not overcome; and as she grew again in stature and in strength, cleared away the asperities of the road to Happiness.

From this road I could not easily withdraw my attention, because all who travelled it appeared cheerful and satisfied; and the farther they proceeded, the greater appeared their alacrity, and the stronger their conviction of the wisdom of their guide. Some, who had never deviated but by short excursions, had Habit in the middle of their passage vigorously supporting them, and driving off their Appetites and Passions which attempted to interrupt their progress. Others, who had entered this road late, or had long forsaken it, were toiling on without her help at least, and commonly against her endeavours. But I observed, when they approached to the barren top, that few were able to proceed without some support from Habit: and that they, whose Habits were strong, advanced towards the mists with little emotion, and entered them at last with calmness and confidence; after which, they were seen only by the eye of Religion: and though Reason looked after them with the most earnest curiosity, she could only obtain a faint glimpse, when her mistress to enlarge her prospect raised her from the ground. Reason, however, discerned that they were safe, but Religion saw that they were happy.

"Now, Theodore," said my protector, "withdraw thy view from the regions of obscurity, and see the fate of those who, when they were dismissed by Education, would admit no direction but that of Reason. Survey their wanderings, and be wise."

I looked then upon the Road of Reason, which was indeed, so far as it reached, the same with that of Religion, nor had Reason discovered it but by her instruction. Yet when she had once been taught it, she clearly saw that it was right; and Pride had sometimes incited her to declare that she discovered it herself, and persuaded her to offer herself as a guide to Religion: whom after many vain experiments she found it her highest privilege to follow. Reason was however at last well instructed in part of the way, and appeared to teach it with some success when her precepts were not misrepresented by Passion, or her influence overborne by Appetite. But neither of these enemies was she able to resist. When Passion seized upon her votaries, she seldom attempted opposition: she seemed indeed to contend with more vigour against Appetite, but was generally over-wearied in the contest; and if either of her opponents had confederated with Habit, her authority was wholly at an end. When Habit endeavoured to captivate the votaries of Religion, she grew

by slow degrees, and gave time to escape; but in seizing the unhappy followers of Reason, she proceeded as one that had nothing to fear, and enlarged her size, and doubled her chains without intermission, and without reserve.

Of those who forsook the directions of Reason, some were led aside by the whispers of Ambition, who was perpetually pointing to stately palaces, situated on eminences on either side, recounting the delights of affluence, and boasting the security of power. They were easily persuaded to follow her, and Habit quickly threw her chains upon them; they were soon convinced of the folly of their choice, but few of them attempted to return. Ambition led them forward from precipice to precipice, where many fell and were seen no more. Those that escaped were, after a long series of hazards, generally delivered over to Avarice, and enlisted by her in the service of Tyranny, where they continued to heap up gold till their patrons or their heirs pushed them headlong at last into the cavern of Despair.

Others were enticed by Intemperance to ramble in search of those fruits that hung over the rocks, and filled the air with their fragrance. I observed, that the Habits which hovered about these soon grew to an enormous size, nor were there any who less attempted to return to Reason, or sooner sunk into the gulfs that lay before them. When these first quitted the road, Reason looked after them with a frown of contempt, but had little expectations of being able to reclaim them; for the bowl of intoxication was of such quantities as to make them lose all regard but for the present moment; neither Hope nor Fear could enter their retreats: and Habit had so absolute a power, that even Conscience, if Religion had employed her in their favour, would not have been able to force an entrance.

There were others whose crime it was rather to neglect Reason than to disobey her: and who retreated from the heat and tumult of the way, not to the bowers of Intemperance, but to the maze of Indolence. They had this peculiarity in their condition, that they were always in sight of the Road of Reason, always wishing for her presence, and always resolving to return to-morrow. In these was most eminently conspicuous the subtlety of Habit, who hung imperceptible shackles upon them, and was every moment leading them farther from the road, which they always imagined that they had the power of reaching. They wandered on from one double of the labyrinth to another, with the chains of Habit hanging secretly upon them, till, as they advanced, the flowers grew paler, and the scents fainter; they proceeded in their dreary march without pleasure in their progress, yet without power to return; and had this aggravation above all others, that they were

criminal but not delighted. The drunkard for a time laughed over his wine; the ambitious man triumphed in the miscarriage of his rival; but the captives of Indolence had neither superiority nor merriment. Discontent lowered in their looks, and Sadness hovered round their shades; yet they crawled on reluctant and gloomy, till they arrived at the depth of the recess, varied only with poppies and nightshade, where the dominion of Indolence terminates, and the hopeless wanderer is delivered up to Melancholy; the chains of Habit are rivetted for ever, and Melancholy, having tortured her prisoner for a time, consigns him at last to the cruelty of Despair.

While I was musing on this miserable scene, my protector called out to me, "Remember, Theodore, and be wise, and let not Habit prevail against thee." I started, and beheld myself surrounded by the rocks of Teneriffe: the birds of light were singing in the trees, and the glances of the morning darted upon me.

## THE FOUNTAINS:

A FAIRY TALE.\*

Felix qui potuit boni  
Fontem visere lucidum.

BOETHIUS.

As Floretta was wandering in a meadow at the foot of Plinlimmon, she heard a little bird cry in such a note as she had never observed before, and looking round her, saw a lovely goldfinch entangled by a lime twig, and a hawk hovering over him, as at the point of seizing him in his talons.

Floretta longed to rescue the little bird, but was afraid to encounter the hawk, who looked fiercely upon her without any apparent dread of her approach, and as she advanced seemed to increase in bulk, and clapped his wings in token of defiance. Floretta stood deliberating a few moments, but, seeing her mother at no great distance, took courage, and snatched the twig with the little bird upon it. When she had disengaged him, she put him in her bosom, and the hawk flew away.

Floretta, showing her bird to her mother, told her from what danger she had rescued him: her mother, after admiring his beauty, said, that he would be a very proper inhabitant of the little gilded cage, which had hung empty since the starling died for want of water, and that he should be placed at the chamber window, for it would be wonderfully pleasant to hear him in the morning.

Floretta, with tears in her eyes, replied, that he had better have been devoured by the hawk than die for want of water, and that she would not save him from a less evil to put him in danger of a greater: she therefore took him into her hand, cleaned his feathers from the bird lime, looked upon him with great tenderness, and, having put his bill to her lips, dismissed him into the air.

He flew in circles round her as she went home, and, perching on a tree before the door, delighted them awhile with such sweetness of song, that her mother reproved her for not putting him in the cage. Floretta endeavoured to look grave, but silently approved her own act, and wished her mother more generosity. Her mother guessed her thoughts, and told her, that when she was older she would be wiser.

Floretta, however, did not repent, but hoped to hear her little bird the next morning singing at liberty. She awaked early and listened, but no goldfinch could she hear. She rose, and walking again in the same meadow, went to view the bush where she had seen the lime-twig the day before.

When she entered the thicket, and was near the place for which she was looking, from behind a blossoming hawthorn advanced a female form of very low stature, but of elegant proportion and majestic air, arrayed in all the colours of the meadow, and sparkling as she moved like a dew-drop in the sun.

Floretta was too much disordered to speak or fly, and stood motionless between fear and pleasure, when the little lady took her by the hand.

"I am," says she, "one of that order of beings which some call Fairies, and some Piskies; we have always been known to inhabit the crags and caverns of Plinlimmon. The maids and shepherds when they wander by moonlight, have often heard our music, and sometimes seen our dances.

"I am the chief of the fairies of this region, and am known among them by the name of Lady Lilinet of the Blue Rock. As I lived always in my own mountain, I had very little knowledge of human manners, and thought better of mankind than other fairies found them to deserve; I therefore often opposed the mischievous practices of my sisters, without always inquiring whether they were just. I extinguished the light that was kindled to lead a traveller into a marsh, and found afterwards that he was hasting to corrupt a virgin; I dissipated a mist which assumed the form of a town, and was raised to decoy a monopolizer of corn from his way to the next market; I removed a thorn artfully planted to prick the foot of a churl that was going to hinder the poor from following his reapers; and defeated so many schemes of obstruction and punishment, that I was cited before the queen as one who favoured wickedness, and opposed the execution of fairy justice.

\* From *Miscellanies in Prose and Verse*. [By Anna Williams. 1786, 4to.]

"Having never been accustomed to suffer control, and thinking myself disgraced by the necessity of defence, I so much irritated the Queen by my sullenness and petulance, that in her anger she transformed me into a goldfinch. 'In this form,' says she, 'I doom thee to remain till some human being shall show thee kindness without any prospect of interest.'

"I flew out of her presence not much dejected; for I did not doubt but every reasonable being must love that which having never offended, could not be hated, and having no power to hurt, could not be feared.

"I therefore fluttered about the villages, and endeavoured to force myself into notice.

"Having heard that nature was least corrupted among those who had no acquaintance with elegance and splendour, I employed myself for five years in hopping before the doors of cottages, and often sat singing on the thatched roof: my motions were seldom seen, nor my notes heard, no kindness was ever excited, and all the reward of my officiousness was to be aimed at with a stone when I stood within a throw.

"The stones never hurt me, for I had still the power of a fairy.

"I then betook myself to spacious and magnificent habitations, and sung in bowers by the walks or on the banks of fountains.

"In these places, where novelty was recommended by satiety, and curiosity excited by leisure, my form and my voice were soon distinguished, and I was known by the name of the pretty goldfinch; the inhabitants would walk out to listen to my music, and at last it was their practice to court my visits by scattering meat in my common haunts.

"This was repeated till I went about pecking in full security, and expected to regain my original form, when I observed two of my most liberal benefactors silently advancing with a net behind me. I flew off, and fluttering beside them pricked the leg of each, and left them halting and groaning with the cramp.

"I then went to another house, where for two springs and summers I entertained a splendid family with such melody as they had never heard in the woods before. The winter that followed the second summer was remarkably cold, and many little birds perished in the field. I hid myself in the way of one of the ladies as benumbed with cold and faint with hunger; she picked me up with great joy, telling her companions that she had found the goldfinch that sung so finely all summer in the myrtle hedge, that she would lay him where he should die, for she could not bear to kill him, and would then pick his fine feathers very carefully, and stick them in her muff.

"Finding that her fondness and her gratitude could give way to so slight an interest, I chilled her fingers that she could not hold me, then flew

at her face, and with my beak gave her nose four pecks that left four black spots indelible behind them, and broke a match by which she would have obtained the finest equipage in the county.

"At length the queen repented of her sentence, and being unable to revoke it, assisted me to try experiments upon man, to excite his tenderness, and attract his regard.

"We made many attempts, in which we were always disappointed. At last she placed me in your way held by a lime-twigg, and herself in the shape of a hawk, made the show of devouring me. You, my dear, have rescued me from the seeming danger without desiring to detain me in captivity, or seeking any other recompence than the pleasure of benefiting a feeling creature.

"The queen is so much pleased with your kindness, that I am come, by her permission, to reward you with a greater favour, than ever fairy bestowed before.

"The former gifts of fairies, though bounties in design, have proved commonly mischiefs in the event. We have granted mortals to wish according to their own discretion, and their discretion being small, and their wishes irreversible, they have rashly petitioned for their own destruction. But you, my dearest Floretta shall have, what none have ever before obtained from us, the power of indulging your wish and the liberty of retracting it. Behold, and follow me."

Floretta was easily persuaded to accompany the fairy, who led her through a labyrinth of crags and shrubs, to a cavern covered by a thicket on the side of the mountain.

"This cavern," said she, "is the court of Lilinet, your friend; in this place you shall find a certain remedy for all real evils." Lilinet then went before her through a long subterraneous passage, where she saw many beautiful fairies, who came to gaze at the stranger, but who, from reverence to their mistress, gave her no disturbance. She heard from remote corners of the gloomy cavern, the roar of winds and the fall of waters, and more than once entreated to return; but Lilinet, assuring her that she was safe, persuaded her to proceed, till they came to an arch, into which the light found its way through a fissure of the rock.

There Lilinet seated herself and her guest upon a bench of agate, and pointing to two fountains that bubbled before them, said, "Now attend, my dear Floretta, and enjoy the gratitude of a fairy. Observe the two fountains that spring up in the middle of the vault, one into a basin of alabaster, and the other into a basin of dark flint. The one is called the Spring of Joy, the other of Sorrow; they rise from distant veins in the rock, and burst out in two places, but after a short course unite their streams, and run ever after in one mingled current.

"By drinking of these fountains, which, though shut up from all other human beings,

shall be always accessible to you, it will be in your power to regulate your future life.

"When you are drinking the water of joy from the alabaster fountain, you may form your wish, and it shall be granted. As you raise your wish higher, the water will be sweeter and sweeter to the taste; but beware that you are not tempted by its increasing sweetness to repeat your draughts, for the ill effects of your wish can only be removed by drinking the spring of sorrow from the basin of flint, which will be bitter in the same proportion as the water of joy was sweet. Now, my Floretta, make the experiment, and give me the first proof of moderate desires. Take the golden cup that stands on the margin of the spring of joy, form your wish, and drink."

Floretta wanted no time to deliberate on the subject of her wish; her first desire was the increase of her beauty. She had some disproportion of features. She took the cup, and wished to be agreeable; the water was sweet, and she drank copiously; and in the fountain, which was clearer than crystal, she saw that her face was completely regular.

She then filled the cup again, and wished for a rosy bloom upon her cheeks: the water was sweeter than before, and the colour of her cheeks was heightened.

She next wished for a sparkling eye: the water grew yet more pleasant, and her glances were like the beams of the sun.

She could not yet stop; she drank again, desired to be made a perfect beauty, and a perfect beauty she became.

She had now whatever her heart could wish; and making an humble reverence to Lilinet, requested to be restored to her own habitation. They went back, and the fairies in the way wondered at the change of Floretta's form. She came home delighted to her mother, who, on seeing the improvement, was yet more delighted than herself.

Her mother from that time pushed her forward into public view: Floretta was at all the resorts of idleness and assemblies of pleasure; she was fatigued with balls, she was cloyed with treats, she was exhausted by the necessity of returning compliments. This life delighted her a while, but custom soon destroyed its pleasure. She found that the men who courted her to-day, resigned her on the morrow to other flatterers, and that the women attacked her reputation by whispers and calumnies, till, without knowing how she had offended, she was shunned as infamous.

She knew that her reputation was destroyed by the envy of her beauty, and resolved to degrade herself from the dangerous pre-eminence. She went to the bush where she rescued the bird, and called for Lady Lilinet. Immediately Lilinet appeared, and discovered by Floretta's

dejected look that she had drank too much from the alabaster fountain.

"Follow me," she cried, "my Floretta, and be wiser for the future."

They went to the fountains, and Floretta began to taste the waters of sorrow, which were so bitter that she withdrew more than once the cup from her mouth: at last she resolutely drank away the perfection of beauty, the sparkling eye and rosy bloom, and left herself only agreeable.

She lived for some time with great content; but content is seldom lasting. She had a desire in a short time again to taste the waters of joy; she called for the conduct of Lilinet, and was led to the alabaster fountain, where she drank, and wished for a faithful lover.

After her return she was soon addressed by a young man, whom she thought worthy of her affection. He courted, and flattered, and promised; till at last she yielded up her heart. He then applied to her parents; and, finding her fortune less than he expected, contrived a quarrel, and deserted her.

Exasperated by her disappointment, she went in quest of Lilinet, and expostulated with her for the deceit which she had practised. Lilinet asked her with a smile, for what she had been wishing; and being told, made her this reply, "You are not, my dear, to wonder or complain: you may wish for yourself, but your wishes can have no effect upon another. You may become lovely by the efficacy of the fountain, but that you shall be loved is by no means a certain consequence; for you cannot confer upon another either discernment or fidelity: that happiness which you must derive from others, it is not in my power to regulate or bestow."

Floretta was for some time so dejected by this limitation of the fountain's power, that she thought it unworthy of another visit; but, being on some occasion thwarted by her mother's authority, she went to Lilinet, and drank at the alabaster fountain for a spirit to do her own way.

Lilinet saw that she drank immoderately, and admonished her of her danger; but *spirit and her own way* gave such sweetness to the water, that she could not prevail upon herself to forbear, till Lilinet, in pure compassion, snatched the cup out of her hand.

When she came home every thought was contempt, and every action was rebellion: she had drunk into herself a spirit to resist, but could not give her mother a disposition to yield; the old lady asserted her right to govern; and, though she was often foiled by the impetuosity of her daughter, she supplied by pertinacity what she wanted in violence: so that the house was in continual tumult by the pranks of the daughter and opposition of the mother.

In time, Floretta was convinced that spirit

had only made her a capricious termagant, and that her own ways ended in error, perplexity, and disgrace; she perceived that the vehemence of mind, which to a man may sometimes procure awe and obedience, produce to a woman nothing but detestation; she therefore went back, and by a large draught from the flinty fountain, though the water was very bitter, replaced herself under her mother's care, and quitted her spirit, and her own way.

Floretta's fortune was moderate, and her desires were not larger, till her mother took her to spend a summer at one of the places which wealth and idleness frequent, under pretence of drinking the waters. She was now no longer a perfect beauty, and therefore conversation in her presence took its course as in other company, opinions were freely told, and observations made without reserve. Here Floretta first learned the importance of money. When she saw a woman of mean air and empty talk draw the attention of the place, she always discovered upon inquiry that she had so many thousands to her fortune.

She soon perceived that where these golden goddesses appeared, neither birth, nor elegance, nor civility, had any power of attraction, and every art of entertainment was devoted to them, and that the great and the wise courted their regard.

The desire after wealth was raised yet higher by her mother, who was always telling her how much neglect she suffered for want of fortune, and what distinctions, if she had but a fortune, her good qualities would obtain. Her narrative of the day was always, that Floretta walked in the morning, but was not spoken to because she had a small fortune, and that Floretta danced at the ball better than any of them, but nobody minded her for want of a fortune.

This want, in which all other wants appeared to be included, Floretta was resolved to endure no longer, and came home flattering her imagination in secret with the riches which she was now about to obtain.

On the day after her return she walked out alone to meet Lady Lilinet, and went with her to the fountain: riches did not taste so sweet as either beauty or spirit, and therefore she was not immoderate in her draught.

When they returned from the cavern, Lilinet gave her wand to a fairy that attended her, with an order to conduct Floretta to the Black Rock.

The way was not long, and they soon came to the mouth of a mine in which there was a hidden treasure, guarded by an earthy fairy deformed and shaggy, who opposed the entrance of Floretta till he recognised the wand of the Lady of the Mountain. Here Floretta saw vast heaps of gold and silver and gems, gathered and repositied in former ages, and intrusted to the guard of the fairies of the earth. The little fairy

delivered the orders of her mistress, and the surly sentinel promised to obey them.

Floretta, wearied with her walk, and pleased with her success, went home to rest, and when she waked in the morning, first opened her eyes upon a cabinet of jewels, and looking into her drawers and boxes, found them filled with gold.

Floretta was now as fine as the finest. She was the first to adopt any expensive fashion, to subscribe to any pompous entertainment, to encourage any foreign artist, or engage in any frolic of which the cost was to make the pleasure.

She was on a sudden the favourite of every place. Report made her wealth thrice greater than it really was, and wherever she came, all was attention, reverence, and obedience. The ladies who had formerly slighted her, or by whom she had been formerly caressed, gratified her pride by open flattery and private murmurs. She sometimes overheard them railing at upstarts, and wondering whence some people came, or how their expenses were supplied. This incited her to heighten the splendour of her dress, to increase the number of her retinue, and to make such propositions of costly schemes, that her rivals were forced to desist from contest.

But she now began to find that the tricks which can be played with money will seldom bear to be repeated, that admiration is a short-lived passion, and that the pleasure of expense is gone when wonder and envy are no more excited. She found that respect was an empty form, and that all those who crowded round her were drawn to her by vanity or interest.

It was, however, pleasant to be able on any terms to elevate and to mortify, to raise hopes and fears: and she would still have continued to be rich, had not the ambition of her mother contrived to marry her to a lord, whom she despised as ignorant, and abhorred as profligate. Her mother persisted in her importunity; and Floretta having now lost the spirit of resistance, had no other refuge than to divest herself of her fairy fortune.

She implored the assistance of Lilinet, who praised her resolution. She drank cheerfully from the flinty fountain, and found the waters not extremely bitter. When she returned she went to bed, and in the morning perceived that all her riches had been conveyed away she knew not how, except a few ornamental jewels, which Lilinet had ordered to be carried back as a reward for her dignity of mind.

She was now almost weary of visiting the fountain, and solaced herself with such amusements as every day happened to produce: at last there arose in her imagination a strong desire to become a Wit.

The pleasures with which this new character appeared to teem were so numerous and so great,

that she was impatient to enjoy them, and, rising before the sun, hastened to the place where she knew that her fairy patroness was always to be found. Lillinet was willing to conduct her, but could now scarcely restrain her from leading the way but by telling her, that, if she went first, the fairies of the cavern would refuse her passage.

They came in time to the fountain, and Floretta took the golden cup into her hand; she filled it and drank, and again she filled it, for wit was sweeter than riches, spirit, or beauty.

As she returned she felt new successions of imagery rise in her mind, and whatever her memory offered to her imagination, assumed a new form, and connected itself with things to which it seemed before to have no relation. All the appearances about her were changed, but the novelties exhibited were commonly defects. She now saw that almost every thing was wrong, without often seeing how it could be better; and frequently imputed to the imperfection of art those failures which were caused by the limitation of nature.

Wherever she went, she breathed nothing but censure and reformation. If she visited her friends, she quarrelled with the situation of their houses, the disposition of their gardens, the direction of their walks, and the termination of their views. It was vain to show her fine furniture, for she was always ready to tell how it might be finer, or to conduct her through spacious apartments, for her thoughts were full of nobler fabrics, of airy palaces, and Hesperian gardens. She admired nothing, and praised but little.

Her conversation was generally thought uncivil. If she received flatteries, she seldom repaid them; for she set no value upon vulgar praise. She could not hear a long story without hurrying the speaker on to the conclusion; and obstructed the mirth of her companions, for she rarely took notice of a good jest, and never laughed except when she was delighted.

This behaviour made her unwelcome wherever she went; nor did her speculation upon human manners much contribute to forward her reception. She now saw the disproportions between language and sentiment, between passion and exclamation; she discovered the defects of every action, and the uncertainty of every conclusion; she knew the malignity of friendship, the avarice of liberality, the anxiety of content, and the cowardice of temerity.

To see all this was pleasant, but the greatest of all pleasures was to show it. To laugh was something, but it was much more to make others laugh. As every deformity of character made a strong impression upon her, she could not always forbear to transmit it to others: as she hated false appearances, she thought it her duty to detect them, till, between wantonness and virtue, scarce any that she knew escaped

without some wounds by the shafts of ridicule; not that her merriment was always the consequence of total contempt, for she often honoured virtue where she laughed at affectation.

For these practices, and who can wonder, the cry was raised against her from every quarter, and to hunt her down was generally determined. Every eye was watching for a fault, and every tongue was busy to supply its share of defamation. With the most unpolled purity of mind, she was censured as too free of favours, because she was not afraid to talk with men: with generous sensibility of every human excellence, she was thought cold or envious, because she could not scatter praise with undistinguished profusion: with tenderness that agonized at real misery, she was charged with delight in the pain of others, when she would not condole with those whom she knew to counterfeit affliction. She derided false appearances of kindness and of pity, and was therefore avoided as an enemy to society. As she seldom commended or censured but with some limitations and exceptions, the world condemned her as indifferent to the good and bad; and because she was often doubtful where others were confident, she was charged with laxity of principles, while her days were distracted and her rest broken by niceties of honour and scruples of morality.

Report had now made her so formidable that all flattered and all shunned her. If a lover gave a ball to his mistress and her friends, it was stipulated that Floretta should not be invited. If she entered a public room, the ladies courtied, and shrunk away, for there was no such thing as speaking, but Floretta would find something to criticise. If a girl was more sprightly than her aunt, she was threatened that in a little time she would be like Floretta. Visits were very diligently paid when Floretta was known not to be at home; and no mother trusted her daughter to herself without a caution, if she should meet Floretta, to leave the company as soon as she could.

With all this Floretta made sport at first, but in time grew weary of general hostility. She would have been content with a few friends, but no friendship was durable: it was the fashion to desert her, and with the fashion what fidelity will contend? She could have easily amused herself in solitude, but that she thought it mean to quit the field to treachery and folly.

Persecution at length tired her constancy, and she implored Lillinet to rid her of her wit: Lillinet complied, and walked up the mountain, but was often forced to stop and wait for her follower. When they came to the flinty fountain, Floretta filled a small cup and slowly brought it to her lips, but the water was insupportably bitter. She just tasted it, and dashed it to the ground, diluted the bitterness at the

fountain of alabaster, and resolved to keep her wit with all its consequences.

Being now a wit for life, she surveyed the various conditions of mankind with such superiority of sentiment, that she found few distinctions to be envied or desired, and therefore did not very soon make another visit to the fountain. At length being alarmed by sickness, she resolved to drink length of life from the golden cup. She returned elated and secure, for though the longevity acquired was indeterminate, she considered death as far distant, and therefore suffered it not to intrude upon her pleasures.

But length of life included not perpetual health. She felt herself continually decaying, and saw the world fading about her. The delights of her early days would delight no longer, and however widely she extended her view, no new pleasure could be found; her friends, her enemies, her admirers, her rivals dropped one by one into the grave, and with those who succeeded them she had neither community of joys nor strife of competition.

By this time she began to doubt whether old age were not dangerous to virtue; whether pain would not produce peevishness, and peevishness impair benevolence. She thought that the spectacle of life might be too long continued, and the vices which were often seen might raise less abhorrence; that resolution might be sapped by time, and let that virtue sink, which in its firmest state it had not without difficulty supported and that it was vain to delay the hour which must come at last, and might come at a time of less preparation and greater imbecility.

These thoughts led her to Lilinet, whom she accompanied to the flinty fountain; where, after a short combat with herself, she drank the bitter water. They walked back to the favourite bush pensive and silent; "And now," said she, "accept my thanks for the last benefit that Floretta can receive." Lady Lilinet dropped a tear, impressed upon her lips the final kiss, and resigned her, as she resigned herself, to the course of nature.

## PAPERS IN THE ADVENTURER.

No. 34.] SATURDAY, MARCH 3, 1753.

*Ilas toties optata exegit gloria pœnas.*

JUV.

Such fate pursues the votaries of praise.

TO THE ADVENTURER.

*Fleet Prison, Feb. 24.*

SIR,

To a benevolent disposition, every state of life will afford some opportunities of contributing to the welfare of mankind. Opulence and splendour are enabled to dispel the cloud of adversity, to dry up the tears of the widow and the orphan, and to increase the felicity of all around them; their example will animate virtue, and retard the progress of vice. And even indigence and obscurity, though without power to confer happiness, may at least prevent misery, and apprise those who are blinded by their passions, that they are on the brink of irremediable calamity.

Pleased, therefore, with the thought of recovering others from that folly which has embittered my own days, I have presumed to address the Adventurer from the dreary mansions of wretchedness and despair, of which the gates are

so wonderfully constructed, as to fly open for the reception of strangers, though they are impervious as a rock of adamant to such as are within them:

*—Facilis d. scensus Avernus;*

*Noctes atque dies patet atri janua Ditis:*

*Sed revocare gradum, superasque evadere ad auras,*

*Hoc opus, hic labor est.*

VIRG.

The gates of Hell are open night and day;

Smooth the descent, and easy is the way:

But to return and view the cheerful skies;

In this the task and mighty labour lies. DRYDEN.

Suffer me to acquaint you, Sir, that I have glittered at the ball, and sparkled in the circle; that I have had the happiness to be the unknown favourite of an unknown lady at the masquerade, have been the delight of tables of the first fashion, and envy of my brother beaux; and to descend a little lower, it is, I believe, still remembered, that Messrs. Velours and d'Espagne stand indebted for a great part of their present influence at Guildhall, to the elegance of my shape, and the graceful freedom of my carriage.

*—Sed quæ præclara et prospera tantis,*

*Ut rebus latis par sit mensura malorum!*

JUV.

See the wild purchase of the bold and vain,  
Where every bliss is bought with equal pain

As I entered into the world very young, with an elegant person and a large estate, it was not long before I disentangled myself from the shackles of religion; for I was determined to the pursuit of pleasure, which, according to my notions, consisted in the unrestrained and unlimited gratifications of every passion and every appetite; and as this could not be obtained under the frowns of a perpetual dictator, I considered religion as my enemy; and proceeding to treat her with contempt and derision, was not a little delighted, that the unfashionableness of her appearance, and the unanimated uniformity of her motions, afforded frequent opportunities for the sallies of my imagination.

Conceiving now that I was sufficiently qualified to laugh away scruples, I imparted my remarks to those among my female favourites, whose virtue I intended to attack; for I was well assured, that pride would be able to make but a weak defence, when religion was subverted; nor was my success below my expectation: the love of pleasure is too strongly implanted in the female breast, to suffer them scrupulously to examine the validity of arguments designed to weaken restraint; all are easily led to believe, that whatever thwarts their inclination must be wrong: little more, therefore, was required, than by the addition of some circumstances, and the exaggeration of others, to make merriment supply the place of demonstration; nor was I so senseless as to offer arguments to such as could not attend to them, and with whom a repartee or catch would more effectually answer the same purpose. This being effected, there remained only "the dread of the world:" but Roxana soared too high, to think the opinion of others worthy her notice; Lætitia seemed to think of it only to declare, that "if all her hairs were worlds," she should reckon them "well lost for love;" and Pastorella fondly conceived, that she could dwell for ever by the side of a bubbling fountain, content with her swain and fleecy care; without considering that stillness and solitude can afford satisfaction only to innocence.

It is not the desire of new acquisitions, but the glory of conquests, that fires the soldier's breast; as indeed the town is seldom worth much, when it has suffered the devastations of a siege; so that though I did not openly declare the effects of my own prowess, which is forbidden by the laws of honour, it cannot be supposed that I was very solicitous to bury my reputation, or to hinder accidental discoveries. To have gained one victory, is an inducement to hazard a second engagement: and though the success of the general should be a reason for increasing the strength of the fortification, it becomes, with many, a pretence for an immediate surrender, under the notion that no power is able to withstand so formidable an adversary; while others brave the danger, and think it

mean to surrender, and dastardly to fly. Melissa, indeed, knew better; and though she could not boast the apathy, steadiness, and inflexibility of a Cato, wanted not the more prudent virtue of Scipio, and gained the victory by declining the contest.

You must not, however, imagine, that I was, during this state of abandoned libertinism, so fully convinced of the fitness of my own conduct, as to be free from uneasiness. I knew very well, that I might justly be deemed the pest of society; and that such proceedings must terminate in the destruction of my health and fortune; but to admit thoughts of this kind was to live upon the rack: I fled, therefore, to the regions of mirth and jollity, as they are called, and endeavoured with burgundy, and a continual rotation of company, to free myself from the pangs of reflection. From these orgies we frequently sallied forth in quest of adventures, to the no small terror and consternation of all the sober stragglers that came in our way: and though we never injured, like our illustrious progenitors, the Mohocks, either life or limbs; yet we have in the midst of Covent Garden buried a tailor, who had been troublesome to some of our fine gentlemen, beneath a heap of cabbage-leaves and stalks, with this conceit,

*Satia te caule quem semper cupisti.*

Glut yourself with cabbage, of which you have always been greedy.

There can be no reason for mentioning the common exploits of breaking windows and bruising the watch; unless it be to tell you of the device of producing before the justice broken lanthorns, which have been paid for a hundred times: or their appearances with patches on their heads, under pretence of being cut by the sword that was never drawn: nor need I say any thing of the more formidable attack of sturdy chairmen, armed with poles; by a slight stroke of which, the pride of Ned Revel's face was at once laid flat, and that effected in an instant, which its most mortal foe had for years assayed in vain. I shall pass over the accidents that attended attempts to scale windows, and endeavours to dislodge signs from their hooks: there are many "hair breadth 'scapes," besides those in the "imminent deadly breach;" but the rake's life, though it be equally hazardous with that of the soldier, is neither accompanied with present honour nor with pleasing retrospect; such is, and such ought to be, the difference between the enemy and the preserver of his country.

Amidst such giddy and thoughtless extravagance, it will not seem strange, that I was often the dupe of coarse flattery. When Mons. L'Allonge assured me that I thrust quart over arm better than any man in England, what could

I less than present him with a sword that cost me thirty pieces? I was bound for a hundred pounds for Tom Trippet, because he had declared that he would dance a minuet with any man in the three kingdoms except myself. But I often parted with money against my inclination, either because I wanted the resolution to refuse, or dreaded the appellation of a niggardly fellow; and I may be truly said to have squandered my estate, without honour, without friends, and without pleasure. The last may, perhaps, appear strange to men unacquainted with the masquerade of life: I deceived others, and I endeavoured to deceive myself; and have worn the face of pleasantry and gayety, while my heart suffered the most exquisite torture.

By the instigation and encouragement of my friends, I became at length ambitious of a seat in parliament; and accordingly set out for the town of Wallop in the west, where my arrival was welcomed by a thousand throats, and I was in three days sure of a majority: but after drinking out one hundred and fifty hogsheds of wine, and bribing two-thirds of the corporation twice over, I had the mortification to find that the borough had been before sold to Mr. Courtly.

In a life of this kind, my fortune, though considerable, was presently dissipated; and as the attraction grows more strong the nearer any body approaches the earth, when once a man begins to sink into poverty, he falls with velocity always increasing; every supply is purchased at a higher and higher price, and every office of kindness obtained with greater and greater difficulty. Having now acquainted you with my state of elevation, I shall, if you encourage the continuance of my correspondence, show you by what steps I descended from a first floor in Pall Mall to my present habitation. I am, Sir, your humble servant,

MISARGYRUS.

—Οδυσευ πολλοισι καλῶντα, τὸ δ' αὖ Ἀδρη  
"Ἰππον καὶ ἄρμασι χῶ", ἵνα μιν παυσίεν ταχίστα  
Δυσπτοῖσι κομμάτοισι.

HOM.

—Pallas pour'd sweet slumbers on his soul;  
And balmy dreams, the gift of soft repose,  
Calm'd all his pains, and banish'd all his woes.

POPE.

If every day did not produce fresh instances of the ingratitude of mankind, we might, perhaps, be at a loss why so liberal and impartial a benefactor as Sleep should meet with so few historians or panegyrists. Writers are so totally ab-

sorbed by the business of the day, as never to turn their attention to that power, whose officious hand so seasonably suspends the burden of life: and without whose interposition man would not be able to endure the fatigue of labour, however rewarded, or the struggle with opposition, however successful.

Night, though she divides to many the longest part of life, and to almost all the most innocent and happy, is yet unthankfully neglected, except by those who pervert her gifts.

The astronomers, indeed, expect her with impatience, and felicitate themselves upon her arrival: Fontenelle has not failed to celebrate her praises; and to chide the sun for hiding from his view the worlds, which he imagines to appear in every constellation. Nor have the poets been always deficient in her praises; Milton has observed of the Night, that it is "the pleasant time, the cool, the silent."

These men may, indeed, well be expected to pay particular homage to Night; since they are indebted to her, not only for cessation of pain, but increase of pleasure; not only for slumber, but for knowledge. But the greater part of her avowed votaries are the sons of luxury: who appropriate to festivity the hours designed for rest; who consider the reign of pleasure as commencing when day begins to withdraw her busy multitudes, and ceases to dissipate attention by intrusive and unwelcome variety; who begin to awake to joy when the rest of the world sinks into insensibility; and revel in the soft affluence of flattering and artificial lights, which "more shadowy set off the face of things."

Without touching upon the fatal consequences of a custom, which, as Ramazzini observes, will be for ever condemned, and for ever retained; it may be observed, that however Sleep may be put off from time to time, yet the demand is of so importunate a nature, as not to remain long unsatisfied: and if, as some have done, we consider it as the tax of life, we cannot but observe it as a tax that must be paid, unless we could cease to be men; for Alexander declared, that nothing convinced him that he was not a divinity, but his not being able to live without sleep.

To live without sleep in our present fluctuating state, however desirable it might seem to the lady in Clelia, can surely be the wish only of the young or the ignorant; to every one else, a perpetual vigil will appear to be a state of wretchedness, second only to that of the miserable beings whom Swift has in his travels so elegantly described, as "supremely cursed with immortality."

Sleep is necessary to the happy to prevent satiety, and to endear life by a short absence; and to the miserable, to relieve them by intervals of quiet. Life is to most, such as could not be endured without frequent intermission of existence: Homer, therefore, has thought it an

office worthy of the goddess of wisdom, to lay Ulysses asleep when landed on Phæacia.

It is related of Barretier, whose early advances in literature scarce any human mind has equalled, that he spent twelve hours of the four and twenty in sleep: yet this appears from the bad state of his health, and the shortness of his life, to have been too small a respite for a mind so vigorously and intensely employed: it is to be regretted, therefore, that he did not exercise his mind less, and his body more: since by this means it is highly probable, that though he would not then have astonished with the blaze of a comet, he would yet have shone with the permanent radiance of a fixed star.

Nor should it be objected, that there have been many men who daily spend fifteen or sixteen hours in study: for by some of whom this is reported it has never been done; others have done it for a short time only; and of the rest it appears, that they employed their minds in such operations as required neither celerity nor strength, in the low drudgery of collating copies, comparing authorities, digesting dictionaries, or accumulating compilations.

Men of study and imagination are frequently upbraided by the industrious and plodding sons of care, with passing too great a part of their life in a state of inaction. But these defers of sleep seem not to remember, that though it must be granted them that they are crawling about before the break of day, it can seldom be said that they are perfectly awake; they exhaust no spirits, and require no repairs; but lie torpid as a toad in marble, or at least are known to live only by an inert and sluggish locomotive faculty, and may be said, like a wounded snake, to "drag their slow length along."

Man has been long known among philosophers by the appellation of the microcosm, or epitome of the world: the resemblance between the great and little world might, by a rational observer, be detailed to many particulars; and to many more by a fanciful speculatist. I know not in which of these two classes I shall be ranged for observing, that as the total quantity of light and darkness allotted in the course of the year to every region of the earth is the same, though distributed at various times and in different portions; so, perhaps, to each individual of the human species, nature has ordained the same quantity of wakefulness and sleep; though divided by some into a total quiescence and vigorous exertion of their faculties, and blended by others in a kind of twilight of existence, in a state between dreaming and reasoning, in which they either think without action, or act without thought.

The poets are generally well affected to sleep: as men who think with vigour, they require respite from thought; and gladly resign themselves to that gentle power, who not only be-

stows rest, but frequently leads them to happier regions, where patrons are always kind, and audiences are always candid, where they are feasted in the bowers of imagination, and crowned with flowers divested of their prickles, and laurels of unfading verdure.

The more refined and penetrating part of mankind, who take wide surveys of the wilds of life, who see the innumerable terrors and distresses that are perpetually preying on the heart of man, and discern with unhappy perspicuity, calamities yet latent in their causes, are glad to close their eyes upon the gloomy prospect, and lose in a short insensibility the remembrance of others' miseries and their own. The hero has no higher hope, than that, after having routed legions after legions, and added kingdom to kingdom, he shall retire to milder happiness, and close his days in social festivity. The wit or the sage can expect no greater happiness, than that, after having harassed his reason in deep researches, and fatigued his fancy in boundless excursions, he shall sink at night in the tranquillity of sleep.

The poets, among all those that enjoy the blessings of sleep, have been least ashamed to acknowledge their benefactor. How much Statius considered the evils of life as assuaged and softened by the balm of slumber, we may discover by that pathetic invocation, which he poured out in his waking nights: and that Cowley among the other felicities of his darling solitude, did not forget to number the privilege of sleeping without disturbance, we may learn from the rank that he assigns among the gifts of nature to the poppy, "which is scattered," says he, "over the fields of corn, that all the needs of man may be easily satisfied, and that bread and sleep may be found together."

*Si quis inanis Cerei benigna  
Me putat germen, vehementer errat;  
Illa me in partem recipit libenter  
Fertilis agri.*

*Meque frumentumque simul per omnes  
Consulens mundo Dea spargit oras;  
Crescite, O! divit, duo magna susci-  
tacula vite.*

*Carpe, mortalis, mea dona lætus,  
Carpe, nec plantas alias require,  
Sed satur panis, satur et soporis,  
Cætera sperne.*

He wildly errs who thinks I yield  
Precedence in the well-cloth'd field,  
Though mix'd with wheat I grow:  
Indulgent Ceres knew my worth,  
And to adorn the teeming earth,  
She bade the Poppy blow.

Nor vainly gay the sight to please,  
But blessed with power mankind to ease,  
The goddess saw me rise:  
"Thrive with the life-supporting grain,"  
She cried, "the solace of the swain,  
The cordial of his eyes

"Seize, happy mortal, seize the good,  
My hand supplies thy sleep and food.  
And makes thee truly blest:  
With plenteous meals enjoy the day,  
In slumbers pass the night away,  
And leave to fate the rest."

C. B.

Sleep, therefore, as the chief of all earthly blessings, is justly appropriated to industry and temperance; the refreshing rest, and the peaceful night, are the portion only of him who lies down weary with honest labour, and free from the fumes of indigested luxury; it is the just doom of laziness and gluttony, to be inactive without ease, and drowsy without tranquillity.

Sleep has been often mentioned as the image of death; "so like it," says Sir Thomas Brown, "that I dare not trust it without my prayers;" their resemblance is, indeed, apparent and striking; they both, when they seize the body, leave the soul at liberty; and wise is he that remembers of both, that they can be safe and happy only by virtue.

Th' attempt forsake,  
And not my chariot but my counsel take;  
While yet securely on the earth you stand;  
Nor touch the horses with too rash a hand.

ADDISON.

TO THE ADVENTURER.

*Fleet, March 24th.*

SIR,

I now send you the sequel of my story; which had not been so long delayed, if I could have brought myself to imagine, that any real impatience was felt for the fate of Misargyrus; who has travelled no unbeaten track to misery, and consequently can present the reader only with such incidents as occur in daily life.

You have seen me, Sir, in the zenith of my glory, not dispensing the kindly warmth of an all-cheering sun; but like another Phaëton, scorching and blasting every thing round me. I shall proceed, therefore, to finish my career, and pass as rapidly as possible through the remaining vicissitudes of my life.

When I first began to be in want of money, I made no doubt of an immediate supply. The newspapers were perpetually offering directions to men, who seemed to have no other business than to gather heaps of gold for those who place their supreme felicity in scattering it. I posted away, therefore, to one of these advertisers, who

by his proposals seemed to deal in thousands: and was not a little chagrined to find, that this general benefactor would have nothing to do with any larger sum than thirty pounds, nor would venture that without a joint note from myself and a reputable housekeeper, or for a longer time than three months.

It was not yet so bad with me, as that I needed to solicit surety for thirty pounds: yet partly from the greediness that extravagance always produces, and partly from a desire of seeing the humour of a petty usurer, a character of which I had hitherto lived in ignorance, I condescended to listen to his terms. He proceeded to inform me of my great felicity in not falling into the hands of an extortioner; and assured me, that I should find him extremely moderate in his demands: he was not, indeed, certain that he could furnish me with the whole sum, for people were at this particular time extremely pressing and importunate for money: yet, as I had the appearance of a gentleman, he would try what he could do, and give me his answer in three days.

At the expiration of the time, I called upon him again; and was again informed of the great demand for money, and that "money was money now:" he then advised me to be punctual in my payment, as that might induce him to befriend me hereafter; and delivered me the money, deducting at the rate of five and thirty *per cent.*, with another panegyric upon his own moderation.

I will not tire you with the various practices of usurious oppression; but cannot omit my transaction with Squeeze on Tower-hill, who, finding me a young man of considerable expectations, employed an agent to persuade me to borrow five hundred pounds, to be refunded by an annual payment of twenty *per cent.* during the joint lives of his daughter Nancy Squeeze and myself. The negotiator came prepared to enforce his proposal with all his art; but finding that I caught his offer with the eagerness of necessity, he grew cold and languid; "he had mentioned it out of kindness; he would try to serve me: Mr. Squeeze was an honest man, but extremely cautious." In three days he came to tell me, that his endeavours had been ineffectual, Mr. Squeeze having no good opinion of my life; but that there was one expedient remaining; Mrs. Squeeze could influence her husband, and her good will might be gained by a compliment. I waited that afternoon on Mrs. Squeeze, and poured out before her the flatteries which usually gain access to rank and beauty; I did not then know, that there are places in which the only compliment is a bribe. Having yet credit with a jeweller, I afterwards procured a ring of thirty guineas, which I humbly presented, and was soon admitted to a treaty with Mr. Squeeze. He appeared peevish and backward, and my old

friend whispered me, that he would never make a dry bargain: I therefore invited him to a tavern. Nine times we met on the affair; nine times I paid four pounds for the supper and claret; and nine guineas I gave the agent for good offices. I then obtained the money, paying ten *per cent.* advance; and at the tenth meeting gave another supper, and disbursed fifteen pounds for the writings.

Others who styled themselves brokers, would only trust their money upon goods: that I might, therefore, try every art of expensive folly, I took a house and furnished it. I amused myself with despoiling my moveables of their glossy appearance, for fear of alarming the lender with suspicions; and in this I succeeded so well, that he favoured me with one hundred and sixty pounds upon that which was rated at seven hundred. I then found that I was to maintain a guardian about me to prevent the goods from being broken or removed. This was, indeed, an unexpected tax; but it was too late to recede: and I comforted myself, that I might prevent a creditor, of whom I had some apprehensions, from seizing, by having a prior execution always in the house.

By such means I had so embarrassed myself, that my whole attention was engaged in contriving excuses, and raising small sums to quiet such as words would no longer mollify. It cost me eighty pounds in presents to Mr. Leech, the attorney, for his forbearance of one hundred, which he solicited me to take when I had no need. I was perpetually harassed with importunate demands, and insulted by wretches, who a few months before would not have dared to raise their eyes from the dust before me. I lived in continual terror, frightened by every noise at the door, and terrified at the approach of every step quicker than common. I never retired to rest without feeling the justness of the Spanish proverb, "Let him who sleeps too much, borrow the pillow of a debtor:" my solicitude and vexation kept me long waking; and when I had closed my eyes, I was pursued or insulted by visionary bailiffs.

When I reflected upon the meanness of the shifts I had reduced myself to, I could not but curse the folly and extravagance that had overwhelmed me in a sea of troubles, from which it was highly improbable that I should ever emerge. I had some time lived in hopes of an estate, at the death of my uncle; but he disappointed me by marrying his housekeeper; and, catching an opportunity soon after of quarrelling with me, for settling twenty pounds a year upon a girl whom I had seduced, told me that he would take care to prevent his fortune from being squandered upon prostitutes.

Nothing now remained, but the chance of extricating myself by marriage; a scheme which, I flattered myself, nothing but my present distress would have made me think on with patience. I

determined, therefore, to look out for a tender novice, with a large fortune at her own disposal; and accordingly fixed my eyes upon Miss Biddy Simper. I had now paid her six or seven visits; and so fully convinced her of my being a gentleman and a rake, that I made no doubt that both her person and fortune would soon be mine.

At this critical time, Miss Gripe called upon me, in a chariot bought with my money, and loaded with trinkets that I had in my days of affluence lavished on her. Those days were now over; and there was little hope that they would ever return. She was not able to withstand the temptation of ten pounds that Talon the bailiff offered her, but brought him into my apartment disguised in a livery; and taking my sword to the window, under pretence of admiring the workmanship, beckoned him to seize me.

Delay would have been expensive without use, as the debt was too considerable for payment or bail: I therefore suffered myself to be immediately conducted to jail.

*Vestibulum ante ipsum primisque in faucibus Orci,  
Luctus et ultrices posuere cubilia curæ;  
Pallentesque habitant morbi, tristisque senectus,  
Et metus, et malesuada fames, et turpis egestas.*

VIRG.

Just in the gate and in the jaws of hell,  
Revengeful cares and sullen sorrows dwell;  
And pale diseases, and repining age;  
Want, fear, and famine's unresisted rage. DRYDEN.

Confinement of any kind is dreadful: a prison is sometimes able to shock those, who endure it in a good cause: let your imagination, therefore, acquaint you with what I have not words to express, and conceive, if possible, the horrors of imprisonment attended with reproach and ignominy, of involuntary association with the refuse of mankind, with wretches who were before too abandoned for society, but being now freed from shame or fear, are hourly improving their vices by consorting with each other.

There are, however, a few whom, like myself, imprisonment has rather mortified than hardened: with these only I converse; and of these you may perhaps hereafter receive some account from your humble servant,

MISARGYRUS.

No. 45.] TUESDAY, APRIL 10, 1753.

*Nulla fides regni sociis, omnisque potestas  
Impatiens consortis erit.*

LUCAN.

No faith of partnership dominion owns:  
Still discord hovers o'er divided thrones.

It is well known, that many things appear plausible in speculation, which can never be reduced to practice; and that of the numberless projects

that have flattered mankind with theoretical speciousness, few have served any other purpose than to show the ingenuity of their contrivers. A voyage to the moon, however romantic and absurd the scheme may now appear, since the properties of air have been better understood, seemed highly probable to many of the aspiring wits in the last century, who began to doat upon their glossy plumes, and fluttered with impatience for the hour of their departure :

—*Pereunt vestigia mille*  
*Ante fugam, absentemque ferit gravis ungula campum.*

Hills, vales, and floods appear already crost :  
And, ere he starts, a thousand steps are lost. POPE.

Among the fallacies which only experience can detect, there are some of which scarcely experience itself can destroy the influence ; some which, by a captivating show of indubitable certainty, are perpetually gaining upon the human mind ; and which, though every trial ends in disappointment, obtain new credit as the sense of miscarriage wears gradually away, persuade us to try again what we have tried already, and expose us by the same failure to double vexation.

Of this tempting, this delusive kind, is the expectation of great performances by confederated strength. The speculatist, when he has carefully observed how much may be performed by a single hand, calculates by a very easy operation the force of thousands, and goes on accumulating power till resistance vanishes before it ; then rejoices in the success of his new scheme, and wonders at the folly or idleness of former ages, who have lived in want of what might so readily be procured, and suffered themselves to be debarred from happiness by obstacles which one united effort would have so easily surmounted.

But this gigantic phantom of collective power vanishes at once into air and emptiness, at the first attempt to put it into action. The different apprehensions, the discordant passions, the jarring interests of men, will scarcely permit that many should unite in one undertaking.

Of a great and complicated design some will never be brought to discern the end ; and of the several means by which it may be accomplished, the choice will be a perpetual subject of debate, as every man is swayed in his determination by his own knowledge or convenience. In a long series of action some will languish with fatigue, and some be drawn off by present gratifications : some will loiter because others labour, and some will cease to labour because others loiter : and if once they come within prospect of success and profit, some will be greedy and others envious ; some will undertake more than they can perform, to enlarge their claims of advantage ; some will perform less than they undertake, lest their

labours should chiefly turn to the benefit of others.

The history of mankind informs us that a single power is very seldom broken by a confederacy. States of different interests, and aspects malevolent to each other, may be united for a time by common distress ; and in the ardour of self preservation fall unanimously upon an enemy, by whom they are all equally endangered. But if their first attack can be withstood, time will never fail to dissolve their union : success and miscarriage will be equally destructive : after the conquest of a province, they will quarrel in the division ; after the loss of a battle, all will be endeavouring to secure themselves by abandoning the rest.

From the impossibility of confining numbers to the constant and uniform prosecution of a common interest, arises the difficulty of securing subjects against the encroachment of governors. Power is always gradually stealing away from the many to the few, because the few are more vigilant and consistent ; it still contracts to a smaller number, till in time it centres in a single person.

Thus all the forms of governments instituted among mankind, perpetually tend towards monarchy ; and power, however diffused through the whole community, is by negligence or corruption, commotion or distress, reposed at last in the chief magistrate.

" There never appear," says Swift, " more than five or six men of genius in an age ; but if they were united, the world could not stand before them." It is happy, therefore, for mankind, that of this union there is no probability. As men take in a wider compass of intellectual survey, they are more likely to choose different objects of pursuit ; as they see more ways to the same end, they will be less easily persuaded to travel together ; as each is better qualified to form an independent scheme of private greatness, he will reject with greater obstinacy the project of another ; as each is more able to distinguish himself as the head of a party, he will less readily be made a follower or an associate.

The reigning philosophy informs us, that the vast bodies which constitute the universe, are regulated in their progress through the ethereal spaces, by the perpetual agency of contrary forces ; by one of which they are restrained from deserting their orbits, and losing themselves in the immensity of heaven ; and held off by the other from rushing together, and clustering round their centre with everlasting cohesion.

The same contrariety of impulse may be perhaps discovered in the motions of men : we are formed for society, not for combination : we are equally unqualified to live in a close connection with our fellow-beings, and in total separation from them ; we are attracted towards each other

by general sympathy, but kept back from contact by private interests.

Some philosophers have been foolish enough to imagine, that improvements might be made in the system of the universe, by a different arrangement of the orbs of heaven; and politicians, equally ignorant and equally presumptuous, may easily be led to suppose that the happiness of our world would be promoted by a different tendency of the human mind. It appears, indeed, to a slight and superficial observer, that many things impracticable in our present state, might be easily effected, if mankind were better disposed to union and co-operation: but a little reflection will discover, that if confederacies were easily formed, they would lose their efficacy, since numbers would be opposed to numbers, and unanimity to unanimity; and instead of the present petty competitions of individuals or single families, multitudes would be supplanting multitudes, and thousands plotting against thousands.

There is no class of the human species, of which the union seems to have been more expected, than of the learned: the rest of the world have almost always agreed to shut scholars up together in colleges and cloisters; surely not without hope, that they would look for that happiness in concord, which they were debarred from finding in variety; and that such conjunctions of intellect would recompense the munificence of founders and patrons, by performances above the reach of any single mind.

But Discord, who found means to roll her apple into the banquetting chamber of the goddesses, has had the address to scatter her laurels in the seminaries of learning. The friendship of students and of beauties is for the most part equally sincere, and equally durable: as both depend for happiness on the regard of others, on that of which the value arises merely from comparison, they are both exposed to perpetual jealousies, and both incessantly employed in schemes to intercept the praises of each other.

I am, however, far from intending to inculcate that this confinement of the studious to studious companions, has been wholly without advantage to the public: neighbourhood, where it does not conciliate friendship, incites competition; and he that would contentedly rest in a lower degree of excellence, where he had no rival to dread, will be urged by his impatience of inferiority to incessant endeavours after great attainments.

These stimulations of honest rivalry are, perhaps, the chief effects of academies and societies; for whatever be the bulk of their joint labours, every single piece is always the production of an individual, that owes nothing to his colleagues but the contagion of diligence, a resolution to write, because the rest are writing, and the scorn of obscurity while the rest are illustrious.

No. 50.] SATURDAY, APRIL 28, 1738.

*Quicunque turpi fraude semel immotus,  
Etiam verum dicit, anitit fidem.*

PHED.

The wretch that often has deceived,  
Though truth he speaks, is ne'er believed.

WHEN Aristotle was once asked, what a man could gain by uttering falsehoods? he replied, "Not to be credited when he shall tell the truth."

The character of a liar is at once so hateful and contemptible, that even of those who have lost their virtue it might be expected that from the violation of truth they should be restrained by their pride. Almost every other vice that disgraces human nature, may be kept in countenance by applause and association; the corrupter of virgin innocence sees himself envied by the men, and at least not detested by the women; the drunkard may easily unite with beings, devoted like himself to noisy merriments or silent insensibility, who will celebrate his victories over the novices of intemperance, boast themselves the companions of his prowess, and tell with rapture of the multitudes whom unsuccessful emulation has hurried to the grave: even the robber and the cut-throat have their followers, who admire their address and intrepidity, their stratagems of rapine, and their fidelity to the gang.

The liar, and only the liar, is invariably and universally despised, abandoned, and disowned; he has no domestic consolations which he can oppose to the censure of mankind; he can retire to no fraternity, where his crimes may stand in the place of virtues; but is given up to the hisses of the multitude, without friend and without apologist. It is the peculiar condition of falsehood, to be equally detested by the good and bad: "The devils," says Sir Thomas Brown, "do not tell lies to one another; for truth is necessary to all societies: nor can the society of hell subsist without it."

It is natural to expect, that a crime thus generally detested, should be generally avoided; at least, that none should expose himself to unabated and unpitied infamy, without an adequate temptation; and that to guilt so easily detected, and so severely punished, an adequate temptation would not readily be found.

Yet so it is, that in defiance of censure and contempt, truth is frequently violated; and scarcely the most vigilant and unremitted circumspection will secure him that mixes with mankind, from being hourly deceived by men of whom it can scarcely be imagined, that they mean any injury to him or profit to themselves: even where the subject of conversation could not have been expected to put the passions in motion,

or to have excited either hope or fear, or zeal or malignity, sufficient to induce any man to put his reputation in hazard, however little he might value it, or to overpower the love of truth, however weak might be its influence.

The casuists have very diligently distinguished lies into their several classes, according to their various degrees of malignity; but they have, I think, generally omitted that which is most common, and, perhaps, not least mischievous: which, since the moralists have not given it a name, I shall distinguish as the *lie of vanity*.

To vanity may justly be imputed most of the falsehoods which every man perceives hourly playing upon his ear, and, perhaps, most of those that are propagated with success. To the lie of commerce, and the lie of malice, the motive is so apparent, that they are seldom negligently or implicitly received; suspicion is always watchful over the practices of interest; and whatever the hope of gain, or desire of mischief, can prompt one man to assert, another is by reasons equally cogent incited to refute. But vanity pleases herself with such slight gratifications, and looks forward to pleasure so remotely consequential, that her practices raise no alarm, and her stratagems are not easily discovered.

Vanity is, indeed, often suffered to pass unpursued by suspicion, because he that would watch her motions, can never be at rest: fraud and malice are bounded in their influence; some opportunity of time and place is necessary to their agency; but scarce any man is abstracted one moment from his vanity; and he, to whom truth affords no gratifications, is generally inclined to seek them in falsehoods.

It is remarked by Sir Kenelm Digby, "That every man has a desire to appear superior to others, though it were only in having seen what they have not seen." Such an accidental advantage, since it neither implies merit, nor confers dignity, one would think should not be desired so much as to be counterfeited: yet even this vanity, trifling as it is, produces innumerable narratives, all equally false; but more or less credible in proportion to the skill or confidence of the relater. How many may a man of diffusive conversation count among his acquaintances, whose lives have been signalized by numberless escapes; who never cross the river but in a storm, or take a journey into the country without more adventures than befel the knights-errant of ancient times in pathless forests or enchanted castles! How many must he know, to whom portents and prodigies are of daily occurrence; and for whom nature is hourly working wonders invisible to every other eye, only to supply them with subjects of conversation?

Others there are that amuse themselves with the dissemination of falsehood, at greater hazard of detection and disgrace; men marked out by

some lucky planet for universal confidence and friendship, who have been consulted in every difficulty, intrusted with every secret, and summoned to every transaction; it is the supreme felicity of these men, to stun all companies with noisy information; to still doubt, and overbear opposition, with certain knowledge or authentic intelligence. A liar of this kind, with a strong memory or brisk imagination, is often the oracle of an obscure club, and, till time discovers his impostures, dictates to his hearers with uncontrolled authority; for if a public question be started, he was present at the debate; if a new fashion be mentioned, he was at court the first day of its appearance; if a new performance of literature draws the attention of the public, he has patronised the author, and seen his work in manuscript; if a criminal of eminence be condemned to die, he often predicted his fate, and endeavoured his reformation: and who that lives at a distance from the scene of action, will dare to contradict a man who reports from his own eyes and ears, and to whom all persons and affairs are thus intimately known?

This kind of falsehood is generally successful for a time, because it is practised at first with timidity and caution: but the prosperity of the liar is of short duration; the reception of one story is always an incitement to the forgery of another less probable; and he goes on to triumph over tacit credulity, till pride or reason rises up against him, and his companions will no longer endure to see him wiser than themselves.

It is apparent, that the inventors of all these fictions intend some exaltation of themselves, and are led off by the pursuit of honour from their attendance upon truth: their narratives always imply some consequence in favour of their courage, their sagacity, or their activity, their familiarity with the learned, or their reception among the great; they are always bribed by the present pleasure of seeing themselves superior to those that surround them, and receiving the homage of silent attention, and envious admiration.

But vanity is sometimes excited to fiction by less visible gratifications: the present age abounds with a race of liars who are content with the consciousness of falsehood, and whose pride is to deceive others without any gain or glory to themselves. Of this tribe it is the supreme pleasure to remark a lady in the playhouse or the park, and to publish, under the character of a man suddenly enamoured, an advertisement in the news of the next day, containing a minute description of her person and her dress. From this artifice, however, no other effect can be expected than perturbations which the writer can never see, and conjectures of which he never can be informed; some mis-

chief, however, he hopes he has done ; and to have done mischief is of some importance. He sets his invention to work again, and produces a narrative of a robbery or a murder, with all the circumstances of time and place accurately adjusted. This is a jest of greater effect, and longer duration : if he fixes his scene at a proper distance, he may for several days keep a wife in terror for her husband, or a mother for her son ; and please himself with reflecting, that by his abilities and address some addition is made to the miseries of life.

There is, I think, an ancient law of Scotland, by which *leasing-making* was capitally punished. I am, indeed, far from desiring to increase in this kingdom the number of executions ; yet I cannot but think, that they who destroy the confidence of society, weaken the credit of intelligence, and interrupt the security of life ; harass the delicate with shame, and perplex the timorous with alarms ; might very properly be awakened to a sense of their crimes, by denunciations of a whipping-post or pillory : since many are so insensible of right and wrong, that they have no standard of action but the law ; nor feel guilt, but as they dread punishment.

No. 53.] TUESDAY, MAY 8, 1753.

*Quisque suos patimur manes.*

VIRG.

Each has his lot, and bears the fate he drew.

*Fleet, May 6.*

SIR,

IN consequence of my engagements, I address you once more from the habitations of misery. In this place, from which business and pleasure are equally excluded, and in which our only employment and diversion is to hear the narratives of each other, I might much sooner have gathered materials for a letter, had I not hoped to have been reminded of my promise ; but since I find myself placed in the regions of oblivion, where I am no less neglected by you than by the rest of mankind, I resolved no longer to wait for solicitation, but stole early this evening from between gloomy sullenness, and riotous merriment, to give you an account of part of my companions.

One of the most eminent members of our club is Mr. Edward Scamper, a man of whose name the Olympic heroes would not have been ashamed. Ned was born to a small estate, which he determined to improve ; and therefore, as soon as he became of age, mortgaged part of his land to buy a mare and stallion, and bred horses for the course. He was at first very successful, and gained several of the king's plates, as he is now every day boasting, at the expense of very little

more than ten times their value. At last, however, he discovered, that victory brought him more honour than profit : resolving, therefore, to be rich as well as illustrious, he replenished his pockets by another mortgage, became on a sudden a daring better, and resolving not to trust a jockey with his fortune, rode his horse himself, distanced two of his competitors the first heat, and at last won the race by forcing his horse on a descent to full speed at the hazard of his neck. His estate was thus repaired, and some friends that had no souls advised him to give over ; but Ned now knew the way to riches, and therefore without caution increased his expenses. From this hour he talked and dreamed of nothing but a horse-race ; and rising soon to the summit of equestrian reputation, he was constantly expected on every course, divided all his time between lords and jockeys, and, as the unexperienced regulated their bets by his example, gained a great deal of money by laying openly on one horse, and secretly on the other. Ned was now so sure of growing rich, that he involved his estate in a third mortgage, borrowed money of all his friends, and risked his whole fortune upon Bay Lincoln. He mounted with beating heart, started fair, and won the first heat ; but in the second, as he was pushing against the foremost of his rivals, his girth broke, his shoulder was dislocated, and before he was dismissed by the surgeon, two bailiffs fastened upon him, and he saw Newmarket no more. His daily amusement for four years has been to blow the signal for starting, to make imaginary matches, to repeat the pedigree of Bay Lincoln, and to form resolutions against trusting another groom with the choice of his girth.

The next in seniority is Mr. Timothy Snug, a man of deep contrivance, and impenetrable secrecy. His father died with the reputation of more wealth than he possessed : Tim, therefore, entered the world with a reputed fortune of ten thousand pounds. Of this he very well knew that eight thousand was imaginary : but being a man of refined policy, and knowing how much honour is annexed to riches, he resolved never to detect his own poverty ; but furnished his house with elegance, scattered his money with profusion, encouraged every scheme of costly pleasure, spoke of petty losses with negligence, and on the day before an execution entered his doors, had proclaimed at a public table his resolution to be jolted no longer in a hackney coach.

Another of my companions is the magnanimous Jack Scatter, the son of a country gentleman, who, having no other care than to leave him rich, considered that literature could not be had without expense ; masters would not teach for nothing ; and when a book was bought and read, it would sell for little. Jack was, therefore, taught to read and write by the butler ; and when this acquisition was made, was left to pass

his days in the kitchen and the stable, where he heard no crime censured but covetousness and distrust of poor honest servants, and where all the praise was bestowed on good house-keeping, and a free heart. At the death of his father, Jack set himself to retrieve the honour of his family: he abandoned his cellar to the butler, ordered his groom to provide hay and corn at discretion, took his housekeeper's word for the expenses of the kitchen, allowed all his servants to do their work by deputies, permitted his domestics to keep his house open to their relations and acquaintance, and in ten years was conveyed hither, without having purchased by the loss of his patrimony either honour or pleasure, or obtained any other gratification than that of having corrupted the neighbouring villagers by luxury and idleness.

Dick Serge was a draper in Cornhill, and passed eight years in prosperous diligence, without any care but to keep his books, or any ambition but to be in time an alderman: but then, by some unaccountable revolution in his understanding, he became enamoured of wit and humour, despised the conversation of pedlars and stock-jobbers, and rambled every night to the regions of gayety, in quest of company suited to his taste. The wits at first flocked about him for sport, and afterwards for interest; some found their way into his books, and some into his pockets; the man of adventure was equipped from his shop for the pursuit of a fortune; and he had sometimes the honour to have his security accepted when his friends were in distress. Elated with these associations, he soon learned to neglect his shop; and having drawn his money out of the funds, to avoid the necessity of teasing men of honour for trifling debts, he has been forced at last to retire hither, till his friends can procure him a post at court.

Another that joins in the same mess is Bob Cornice, whose life has been spent in fitting up a house. About ten years ago, Bob purchased the country habitation of a bankrupt: the mere shell of a building Bob holds no great matter; the inside is the test of elegance. Of this house he was no sooner master, than he summoned twenty workmen to his assistance, tore up the floors and laid them anew, stripped off the wainscot, drew the windows from their frames, altered the disposition of doors and fire-places, and cast the whole fabric into a new form: his next care was to have his ceilings painted, his panels gilt, and his chimney-pieces carved: every thing was executed by the ablest hands: Bob's business was to follow the workmen with a microscope, and call upon them to retouch their performances, and heighten excellence to perfection. The reputation of his house now brings round him a daily confluence of visitants, and every one tells him of some elegance which he has hitherto overlooked, some convenience not

yet procured, or some new mode in ornament or furniture. Bob, who had no wish but to be admired, nor any guide but the fashion, thought every thing beautiful in proportion as it was new, and considered his work as unfinished, while any observer could suggest an addition; some alteration was therefore every day made, without any other motive than the charms of novelty. A traveller at last suggested to him the convenience of a grotto: Bob immediately ordered the mount of his garden to be excavated: and having laid out a large sum in shells and minerals, was busy in regulating the disposition of the colours and lustres, when two gentlemen, who had asked permission to see his gardens, presented him a writ, and led him off to less elegant apartments.

I know not, Sir, whether among this fraternity of sorrow you will think any much to be pitied; nor indeed do many of them appear to solicit compassion, for they generally applaud their own conduct, and despise those whom want of taste or spirit suffers to grow rich. It were happy if the prisons of the kingdom were filled only with characters like these, men whom prosperity could not make useful, and whom ruin cannot make wise: but there are among us many who raise different sensations, many that owe their present misery to the seductions of treachery, the strokes of casualty, or the tenderness of pity; many whose sufferings disgrace society, and whose virtues would adorn it: of these, when familiarity shall have enabled me to recount their stories without horror, you may expect another narrative from, Sir, your most humble servant,

MISARGYRUS.

No. 58.] SATURDAY, MAY 25, 1753.

*Damnant quod non intelligunt.*

Cic.

They condemn what they do not understand.

EURIPIDES having presented Socrates with the writings of Heraclitus, a philosopher famed for involution and obscurity, inquired afterwards his opinion of their merit. "What I understand," said Socrates, "I find to be excellent; and, therefore, believe that to be of equal value which I cannot understand."

The reflection of every man who reads this passage will suggest to him the difference between the practice of Socrates, and that of modern critics; Socrates, who had, by long observation upon himself and others, discovered the weakness of the strongest, and the dimness of the most enlightened intellect, was afraid to decide hastily in his own favour, or to conclude

that an author had written without meaning, because he could not immediately catch his ideas; he knew that the faults of books are often more justly imputable to the reader, who sometimes wants attention, and sometimes penetration; whose understanding is often obstructed by prejudice, and often dissipated by remissness: who comes sometimes to a new study, unfurnished with knowledge previously necessary; and finds difficulties insuperable, for want of ardour sufficient to encounter them.

Obscurity and clearness are relative terms: to some readers scarce any book is easy, to others not many are difficult: and surely they, whom neither any exuberant praise bestowed by others, nor any eminent conquests over stubborn problems, have entitled to exalt themselves above the common orders of mankind, might condescend to imitate the candour of Socrates; and where they find incontestible proofs of superior genius, be content to think that there is justness in the connection which they cannot trace, and cogency in the reasoning which they cannot comprehend.

This diffidence is never more reasonable than in the perusal of the authors of antiquity; of those whose works have been the delight of ages, and transmitted as the great inheritance of mankind from one generation to another: surely, no man can, without the utmost arrogance, imagine that he brings any superiority of understanding to the perusal of these books which have been preserved in the devastation of cities, and snatched up from the wreck of nations; which those who fled before barbarians have been careful to carry off in the hurry of migration, and of which barbarians have repented the destruction. If in books thus made venerable by the uniform attestation of successive ages, any passages shall appear unworthy of that praise which they have formerly received, let us not immediately determine, that they owed their reputation to dulness or bigotry; but suspect at least that our ancestors had some reasons for their opinions, and that our ignorance of those reasons makes us differ from them.

It often happens that an author's reputation is endangered in succeeding times, by that which raised the loudest applause among his contemporaries: nothing is read with greater pleasure than allusions to recent facts, reigning opinions, or present controversies; but when facts are forgotten, and controversies extinguished, these favourite touches lose all their graces; and the author in his descent to posterity must be left to the mercy of chance, without any power of ascertaining the memory of those things, to which he owed his luckiest thoughts and his kindest reception.

On such occasions, every reader should remember the diffidence of Socrates, and repair by his candour the injuries of time: he should im-

pute the seeming defects of his author to some chasm of intelligence, and suppose that the sense which is now weak was once forcible, and the expression which is now dubious formerly determinate.

How much the mutilation of ancient history has taken away from the beauty of poetical performances, may be conjectured from the light which a lucky commentator sometimes effuses, by the recovery of an incident that had been long forgotten: thus, in the third book of Horace, Juno's denunciations against those that should presume to raise again the walls of Troy, could for many ages please only by splendid images and swelling language, of which no man discovered the use or propriety, till Le Fevre, by showing on what occasion the Ode was written, changed wonder to rational delight. Many passages yet undoubtedly remain in the same author, which an exacter knowledge of the incidents of his time would clear from objections. Among these I have always numbered the following lines:

*Aurum per medios ire satellites,  
Et perumpere amat saxa, potentius  
Ictu fulmineo. Concidit Auguris  
Argivi domus ob lucrum  
Demersa excidit. Diffidit urbium  
Portas vir Macedo, et subruit emulos  
Reges muneribus. Munera navium  
Savos illaqueant duces.*

Stronger than thunder's winged force,  
All-powerful gold can spread its course,  
Through watchful guards its passage make,  
And loves through solid walls to break:  
From gold the overwhelming woes  
That crush'd the Grecian anger rose:  
Philip with gold through cities broke,  
And rival monarchs felt his yoke;  
Captains of ships to gold are slaves,  
Though fierce as their own winds and waves.

FRANCIS.

The close of this passage, by which every reader is now disappointed and offended, was probably the delight of the Roman Court: it cannot be imagined, that Horace, after having given to gold the force of thunder, and told of its power to storm cities and to conquer kings, would have concluded his account of its efficacy with its influence over naval commanders, had he not alluded to some fact then current in the mouths of men, and therefore more interesting for a time than the conquests of Philip. Of the like kind may be reckoned another stanza in the same book:

*Jussa coram non sine conscio  
Surgit marito, seu vocat institor  
Scu navis Hispanæ magister  
Dedecorum pretiosus emptor.*

The conscious husband bids her rise,  
When some rich factor courts her charms,  
Who calls the wanton to his arms,

And, prodigal of wealth and fame,  
Profusely buys the costly shame.

FRANCIS.

He has little knowledge of Horace who imagines that the *factor*, or the *Spanish merchant*, are mentioned by chance: there was undoubtedly some popular story of an intrigue, which those names recalled to the memory of his reader.

The flame of his genius in other parts, though somewhat dimmed by time, is not totally eclipsed; his address and judgment yet appear, though much of the spirit and vigour of his sentiment is lost: this has happened to the twentieth Ode of the first book;

*Vile potabis modicis Sabinum  
Cantharis, Græcâ quod ego ipse testâ  
Conditum levi; datus in theatro  
Cum tibi plausus,  
Chære Mæcenas eques. Ut paterni  
Fluminis ripæ, simul et jocosa  
Redderet laudes tibi Vaticani  
Montis imago.*

A poet's beverage humbly cheap,  
(Should great Mæcenas be my guest)  
The vintage of the Sabine grape,  
But yet in sober cups shall crown the feast:  
'Twas rack'd into a Grecian cask,  
Its rougher juice to melt away;  
I seal'd it too—a pleasing task!  
With annual joy to mark the glorious day,  
When in applause shouts thy name  
Spread from the theatre around,  
Floating on thy own Tiber's stream,  
And Echo, playful nymph, return'd the sound.

FRANCIS.

We here easily remark the intertexture of a happy compliment with an humble invitation; but certainly are less delighted than those, to whom the mention of the applause bestowed upon Mæcenas, gave occasion to recount the actions or words that produced it.

Two lines which have exercised the ingenuity of modern critics, may, I think, be reconciled to the judgment, by an easy supposition: Horace thus addresses Agrippa:

*Scriberis Vario fortis, et hostium  
Victor, Mæonii carminis alite.*

Varius, a swan of Homer's wing,  
Shall brave Agrippa's conquests sing.

That Varius should be called "A bird of Homeric song," appears so harsh to modern ears, that an emendation of the text has been proposed: but surely the learning of the ancients had been long ago obliterated, had every man thought himself at liberty to corrupt the lines which he did not understand. If we imagine that Varius had been by any of his contemporaries celebrated under the appellation of *Musarum Ales*, the swan of the Muses, the language of Horace becomes graceful and familiar; and that such a compliment was at least possible, we

know from the transformation feigned by Horace of himself.

The most elegant compliment that was paid to Addison, is of this obscure and perishable kind:

When panting Virtue her last efforts made,  
You brought your Clio to the virgin's aid.

These lines must please as long as they are understood; but can be understood only by those that have observed Addison's signatures in the Spectator.

The nicety of these minute allusions I shall exemplify by another instance, which I take this occasion to mention, because, as I am told, the commentators have omitted it. Tibullus addresses Cynthia in this manner:

*Te spectem, suprema mihi cum venerit hora,  
Te teneam moriens deficiente manu.*

Before my closing eyes dear Cynthia stand,  
Held weakly by my fainting trembling hand.

To these lines Ovid thus refers in his elegy on the death of Tibullus:

*Cynthia decedens, felicius, inquit, amata  
Sum tibi; vixisti dum tuus ignis eram.  
Cui Nemesis, quid, ait, tibi sunt mea damna dolori  
Me tenuit moriens deficiente manu.*

Blest was my reign, retiring Cynthia cried;  
Nor till he left my breast, Tibullus died.  
Forbear, said Nemesis, my loss to moan,  
The fainting trembling hand was mine alone.

The beauty of this passage, which consists in the appropriation made by Nemesis of the line originally directed to Cynthia, had been wholly imperceptible to succeeding ages, had chance, which has destroyed so many greater volumes, deprived us likewise of the poems of Tibullus.

No. 62.] SATURDAY, JUNE 9, 1753.

*O fortuna viris invida fortibus,  
Quam non æqua bonis premia divides.* SENECA.

Capricious Fortune ever joys,  
With partial hand to deal the prize,  
To crush the brave and cheat the wise.

TO THE ADVENTURER.

Fleet, June 6.

SIR,

To the account of such of my companions as are imprisoned without being miserable, or are miserable without any claim to compassion; I promised to add the histories of those, whose virtue has made them unhappy, or whose

misfortunes are at least without a crime. That this catalogue should be very numerous, neither you nor your readers ought to expect: "*rari quippe boni*;" "the good men are few." Virtue is uncommon in all the classes of humanity; and I suppose it will scarcely be imagined more frequent in a prison than in other places.

Yet in these gloomy regions is to be found the tenderness, the generosity, the philanthropy of Serenus, who might have lived in competence and ease, if he could have looked without emotion on the miseries of another. Serenus was one of those exalted minds, whom knowledge and sagacity could not make suspicious; who poured out his soul in boundless intimacy, and thought community of possessions the law of friendship. The friend of Serenus was arrested for debt, and after many endeavours to soften his creditor, sent his wife to solicit that assistance which never was refused. The tears and importunity of female distress were more than was necessary to move the heart of Serenus; he hasted immediately away, and conferring a long time with his friend, found him confident that if the present pressure was taken off, he should soon be able to re-establish his affairs. Serenus, accustomed to believe, and afraid to aggravate distress, did not attempt to detect the fallacies of hope, nor reflect that every man overwhelmed with calamity believes, that if that was removed he shall immediately be happy: he, therefore, with little hesitation offered himself as surety.

In the first raptures of escape all was joy, gratitude, and confidence: the friend of Serenus displayed his prospects, and counted over the sums of which he should infallibly be master before the day of payment. Serenus in a short time began to find his danger, but could not prevail with himself to repent of beneficence: and therefore suffered himself still to be amused with projects which he durst not consider, for fear of finding them impracticable. The debtor, after he had tried every method of raising money which art or indigence could prompt, wanted either fidelity or resolution to surrender himself to prison, and left Serenus to take his place.

Serenus has often proposed to the creditor, to pay him whatever he shall appear to have lost by the flight of his friend: but however reasonable this proposal may be thought, avarice and brutality have been hitherto inexorable, and Serenus still continues to languish in prison.

In this place, however, where want makes almost every man selfish, or desperation gloomy, it is the good fortune of Serenus not to live without a friend: he passes most of his hours in the conversation of Candidus, a man whom the same virtuous ductility has, with some difference of circumstances, made equally unhappy. Candidus, when he was young, helpless, and ignorant, found a patron that educated, protected, and supported him: his patron being more vigilant

for others than himself, left at his death an only son, destitute and friendless. Candidus was eager to repay the benefits he had received; and having maintained the youth for a few years at his own house, afterwards placed him with a merchant of eminence, and gave bonds to a great value as a security for his conduct.

The young man, removed too early from the only eye of which he dreaded the observation, and deprived of the only instruction which he heard with reverence, soon learned to consider virtue as restraint, and restraint as oppression: and to look with a longing eye at every expense to which he could not reach, and every pleasure which he could not partake: by degrees he deviated from his first regularity, and unhappily mingling among young men busy in dissipating the gains of their fathers' industry, he forgot the precepts of Candidus, spent the evening in parties of pleasure, and the morning in expedients to support his riots. He was, however, dexterous and active in business: and his master, being secured against any consequences of dishonesty, was very little solicitous to inspect his manners, or to inquire how he passed those hours, which were not immediately devoted to the business of his profession: when he was informed of the young man's extravagance or debauchery, "let his bondsman look to that," said he, "I have taken care of myself."

Thus the unhappy spendthrift proceeded from folly to folly, and from vice to vice, with the connivance if not the encouragement of his master; till in the heat of a nocturnal revel he committed such violences in the street as drew upon him a criminal prosecution. Guilty and unexperienced, he knew not what course to take; to confess his crime to Candidus, and solicit his interposition, was little less dreadful than to stand before the frown of a court of justice. Having, therefore, passed the day with anguish in his heart and distraction in his looks, he seized at night a very large sum of money in the counting house, and setting out he knew not whither, was heard of no more.

The consequence of his flight was the ruin of Candidus; ruin surely undeserved and irreproachable, and such as the laws of a just government ought either to prevent or repair: nothing is more inequitable than that one man should suffer for the crimes of another, for crimes which he neither prompted nor permitted, which he could neither foresee nor prevent. When we consider the weakness of human resolutions and the inconsistency of human conduct, it must appear absurd that one man shall engage for another, that he will not change his opinions or alter his conduct.

It is, I think, worthy of consideration, whether, since no wager is binding without a possibility of loss on each side, it is not equally reasonable, that no contract should be valid

without reciprocal stipulations; but in this case, and others of the same kind, what is stipulated on his side to whom the bond is given? he takes advantage of the security, neglects his affairs, omits his duty, suffers timorous wickedness to grow daring by degrees, permits appetite to call for new gratifications, and, perhaps, secretly longs for the time in which he shall have power to seize the forfeiture; and if virtue or gratitude should prove too strong for temptation, and a young man persist in honesty, however instigated by his passions, what can secure him at last against a false accusation? I for my part always shall suspect, that he who can by such methods secure his property, will go one step farther to increase it; nor can I think that man safely trusted with the means of mischief, who, by his desire to have them in his hands, gives an evident proof how much less he values his neighbour's happiness than his own.

Another of our companions is Lentulus, a man whose dignity of birth was very ill supported by his fortune. As some of the first offices in the kingdom were filled by his relations, he was early invited to court, and encouraged by caresses and promises to attendance and solicitation; a constant appearance in splendid company, necessarily required magnificence of dress; and a frequent participation of fashionable amusements forced him into expense: but these measures were requisite to his success; since every body knows, that to be lost to sight is to be lost to remembrance, and that he who desires to fill a vacancy, must be always at hand, lest some man of greater vigilance should step in before him.

By this course of life his little fortune was every day made less: but he received so many distinctions in public, and was known to resort so familiarly to the houses of the great, that every man looked on his preferment as certain, and believed that its value would compensate for its slowness: he, therefore, found no difficulty in obtaining credit for all that his rank or his vanity made necessary: and, as ready payment was not expected, the bills were proportionably enlarged, and the value of the hazard or delay were adjusted solely by the equity of the creditor. At length death deprived Lentulus of one of his patrons, and a revolution in the ministry of another; so that all his prospects vanished at once, and those that had before encouraged his expenses, began to perceive that their money was in danger; there was now no other contention but who should first seize upon his person, and by forcing immediate payment, deliver him up naked to the vengeance of the rest. In pursuance of this scheme, one of them invited him to a tavern, and procured him to be arrested at the door; but Lentulus, instead of endeavouring secretly to pacify him by payment, gave notice to the rest, and offered to divide

amongst them the remnant of his fortune: they feasted six hours at his expense, to deliberate on his proposal; and at last determined, that as he could not offer more than five shillings in the pound, it would be more prudent to keep him in prison, till he could procure from his relations the payment of his debts.

Lentulus is not the only man confined within these walls, on the same account: the like procedure, upon the like motives, is common among men whom yet the law allows to partake the use of fire and water with the compassionate and the just; who frequent the assemblies of commerce in open day, and talk with detestation and contempt of highwaymen or house-breakers: but, surely, that man must be confessedly robbed, who is compelled, by whatever means, to pay the debts which he does not owe: nor can I look with equal hatred upon him, who, at the hazard of his life, holds out his pistol and demands my purse, as on him who plunders under shelter of the law, and by detaining my son or my friend in prison, extorts from me the price of their liberty. No man can be more an enemy to society than he, by whose machinations our virtues are turned to our disadvantage; he is less destructive to mankind that plunders cowardice, than he that preys upon compassion.

I believe, Mr. Adventurer, you will readily confess, that though not one of these, if tried before a commercial judicature, can be wholly acquitted from imprudence or temerity; yet that, in the eye of all who can consider virtue as distinct from wealth, the fault of two of them, at least, is outweighed by the merit; and that of the third is so much extenuated by the circumstances of his life, as not to deserve a perpetual prison: yet must these, with multitudes equally blameless, languish in confinement, till malevolence shall relent, or the law be changed. I am, Sir, your humble servant,

MISARGYRUS.

No. 67.] TUESDAY, JUNE 26, 1758.

*Inventas—vitam excoluere per artes.*

VIRG.

They polish life by useful arts.

THAT familiarity produces neglect, has been long observed. The effect of all external objects, however great or splendid, ceases with their novelty; the courtier stands without emotion in the royal presence; the rustic tramples under his foot the beauties of the spring with little attention to their colours or their fragrance; and the inhabitant of the coast darts his eye upon the immense diffusion of waters, without awe, wonder, or terror.

Those who have passed much of their lives in this great city, look upon its opulence and its multitudes, its extent and variety, with cold indifference; but an inhabitant of the remoter parts of the kingdom is immediately distinguished by a kind of dissipated curiosity, a busy endeavour to divide his attention amongst a thousand objects, and a wild confusion of astonishment and alarm.

The attention of a new comer is generally first struck by the multiplicity of cries that stun him in the streets, and the variety of merchandise and manufactures which the shopkeepers expose on every hand; and he is apt, by unwary bursts of admiration, to excite the merriment and contempt of those who mistake the use of their eyes for effects of their understanding, and confound accidental knowledge with just reasoning.

But, surely, these are subjects on which any man may without reproach employ his meditations: the innumerable occupations, among which the thousands that swarm in the streets of London are distributed, may furnish employment to minds of every cast, and capacities of every degree. He that contemplates the extent of this wonderful city, finds it difficult to conceive, by what method plenty is maintained in our markets, and how the inhabitants are regularly supplied with the necessaries of life; but when he examines the shops and warehouses, sees the immense stores of every kind of merchandise piled up for sale, and runs over all the manufactures of art and products of nature, which are every where attracting his eye and soliciting his purse, he will be inclined to conclude, that such quantities cannot easily be exhausted, and that part of mankind must soon stand still for want of employment, till the wares already provided shall be worn out and destroyed.

As Socrates was passing through the fair at Athens, and casting his eyes over the shops and customers, "how many things are here," says he, "that I do not want!" The same sentiment is every moment rising in the mind of him that walks the streets of London, however inferior in philosophy to Socrates; he beholds a thousand shops crowded with goods, of which he can scarcely tell the use, and which, therefore, he is apt to consider as of no value: and, indeed, many of the arts by which families are supported, and wealth is heaped together, are of that minute and superfluous kind, which nothing but experience could evince possible to be prosecuted with advantage, and which, as the world might easily want, it could scarcely be expected to encourage.

But so it is, that custom, curiosity, or wantonness, supplies every art with patrons, and finds purchasers for every manufacture; the world is so adjusted, that not only bread, but

riches, may be obtained without great abilities or arduous performances: the most unskilful hand and unenlightened mind have sufficient incitements to industry; for he that is resolutely busy, can scarcely be in want. There is, indeed, no employment, however despicable, from which a man may not promise himself more than competence, when he sees thousands and myriads raised to dignity, by no other merit than that of contributing to supply their neighbours with the means of sucking smoke through a tube of clay; and others raising contributions upon those, whose elegance disdains the grossness of smoky luxury, by grinding the same materials into a powder that may at once gratify and impair the smell.

Not only by these popular and modish trifles, but by a thousand unheeded and evanescent kinds of business, are the multitudes of this city preserved from idleness, and consequently from want. In the endless variety of tastes and circumstances that diversify mankind, nothing is so superfluous, but that some one desires it; or so common, but that some one is compelled to buy it. As nothing is useless but because it is in improper hands, what is thrown away by one is gathered up by another: and the refuse of part of mankind furnishes a subordinate class with the materials necessary to their support.

When I look round upon those who are thus variously exerting their qualifications, I cannot but admire the secret concatenation of society that links together the great and the mean, the illustrious and the obscure; and consider with benevolent satisfaction, that no man, unless his body or mind be totally disabled, has need to suffer the mortification of seeing himself useless or burdensome to the community: he that will diligently labour, in whatever occupation, will deserve the sustenance which he obtains, and the protection which he enjoys: and may lie down every night with the pleasing consciousness of having contributed something to the happiness of life.

Contempt and admiration are equally incident to narrow minds: he whose comprehension can take in the whole subordination of mankind, and whose perspicacity can pierce to the real state of things through the thin veils of fortune or of fashion, will discover meanness in the highest stations, and dignity in the meanest; and find that no man can become venerable but by virtue, or contemptible but by wickedness.

In the midst of this universal hurry, no man ought to be so little influenced by example, or so void of honest emulation, as to stand a lazy spectator of incessant labour; or please himself with the mean happiness of a drone, while the active swarms are buzzing about him: no man is without some quality, by the due application of which he might deserve well of the world; and whoever he be that has but little in his

power, should be in haste to do that little, lest he be confounded with him that can do nothing.

By this general concurrence of endeavours, arts of every kind have been so long cultivated, that all the wants of man may be immediately supplied; idleness can scarcely form a wish which she may not gratify by the toil of others, or curiosity dream of a toy, which the shops are not ready to afford her.

Happiness is enjoyed only in proportion as it is known; and such is the state or folly of man, that it is known only by experience of its contrary: we who have long lived amidst the conveniences of a town immensely populous, have scarce an idea of a place where desire cannot be gratified by money. In order to have a just sense of this artificial plenty, it is necessary to have passed some time in a distant colony, or those parts of our island which are thinly inhabited: he that has once known how many trades every man in such situations is compelled to exercise, with how much labour the products of nature must be accommodated to human use, how long the loss or defect of any common utensil must be endured, or by what awkward expedients it must be supplied, how far men may wander with money in their hands before any can sell them what they wish to buy, will know how to rate at its proper value the plenty and ease of a great city.

But that the happiness of man may still remain imperfect, as wants in this place are easily supplied, new wants likewise are easily created; every man, in surveying the shops of London, sees numberless instruments and conveniences, of which, while he did not know them, he never felt the need; and yet, when use has made them familiar, wonders how life could be supported without them. Thus it comes to pass, that our desires always increase with our possessions; the knowledge that something remains yet unenjoyed, impairs our enjoyment of the good before us.

They who have been accustomed to the refinements of science, and multiplications of contrivance, soon lose their confidence in the unassisted powers of nature, forget the paucity of our real necessities, and overlook the easy methods by which they may be supplied. It were a speculation worthy of a philosophical mind, to examine how much is taken away from our native abilities, as well as added to them, by artificial expedients. We are so accustomed to give and receive assistance, that each of us singly can do little for himself; and there is scarce any one among us, however contracted may be his form of life, who does not enjoy the labour of a thousand artists.

But a survey of the various nations that inhabit the earth will inform us, that life may be supported with less assistance; and that the dexterity, which practice enforced by necessity produces, is able to effect much by very scanty

means. The nations of Mexico and Peru erected cities and temples without the use of iron; and at this day the rude Indian supplies himself with all the necessities of life: sent like the rest of mankind naked into the world, as soon as his parents have nursed him up to strength, he is to provide by his own labour for his own support. His first care is to find a sharp flint among the rocks; with this he undertakes to fell the trees of the forest; he shapes his bow, heads his arrows, builds his cottage, and hollows his canoe, and from that time lives in a state of plenty and prosperity; he is sheltered from the storms, he is fortified against beasts of prey, he is enabled to pursue the fish of the sea, and the deer of the mountains; and as he does not know, does not envy the happiness of polished nations, where gold can supply the want of fortitude and skill, and he whose laborious ancestors have made him rich, may lie stretched upon a couch, and see all the treasures of all the elements poured down before him.

This picture of a savage life, if it shows how much individuals may perform, shows likewise how much society is to be desired. Though the perseverance and address of the Indian excite our admiration, they nevertheless cannot procure him the conveniences which are enjoyed by the vagrant beggar of a civilized country: he hunts like a wild beast to satisfy his hunger: and when he lies down to rest after a successful chase, cannot pronounce himself secure against the danger of perishing in a few days; he is, perhaps, content with his condition, because he knows not that a better is attainable by man; as he that is born blind does not long for the perception of light, because he cannot conceive the advantages which light would afford him; but hunger, wounds, and weariness are real evils, though he believes them equally incident to all his fellow-creatures; and when a tempest compels him to lie starving in his hut, he cannot justly be concluded equally happy with those whom art has exempted from the power of chance, and who make the foregoing year provide for the following.

To receive and to communicate assistance, constitutes the happiness of human life; man may, indeed, preserve his existence in solitude, but can enjoy it only in society; the greatest understanding of an individual doomed to procure food and clothing for himself, will barely supply him with expedients to keep off death from day to day; but as one of a large community performing only his share of the common business, he gains leisure for intellectual pleasures, and enjoys the happiness of reason and reflection.

No. 69.] TUESDAY, JULY 3, 1753.

*Fere libenter homines id quod volunt credunt.* CÆSAR.

Men willingly believe what they wish to be true.

TULLY has long ago observed, that no man, however weakened by long life, is so conscious of his own decrepitude, as not to imagine that he may yet hold his station in the world for another year.

Of the truth of this remark every day furnishes new confirmation: there is no time of life, in which men for the most part seem less to expect the stroke of death, than when every other eye sees it impending; or are more busy in providing for another year, than when it is plain to all but themselves, that at another year they cannot arrive. Though every funeral that passes before their eyes evinces the deceitfulness of such expectations, since every man who is borne to the grave thought himself equally certain of living at least to the next year; the survivor still continues to flatter himself, and is never at a loss for some reason why his life should be protracted, and the voracity of death continue to be pacified with some other prey.

But this is only one of the innumerable artifices practised in the universal conspiracy of mankind against themselves; every age and every condition indulges some darling fallacy; every man amuses himself with projects which he knows to be improbable, and which, therefore, he resolves to pursue without daring to examine them. Whatever any man ardently desires, he very readily believes that he shall some time attain: he whose intemperance has overwhelmed him with diseases, while he languishes in the spring, expects vigour and recovery from the summer sun; and while he melts away in the summer, transfers his hopes to the frosts of winter: he that gazes upon elegance or pleasure, which want of money hinders him from imitating or partaking, comforts himself that the time of distress will soon be at an end, and that every day brings him nearer to a state of happiness; though he knows it has passed not only without acquisition of advantage, but perhaps without endeavours after it, in the formation of schemes that cannot be executed, and in the contemplation of prospects which cannot be approached.

Such is the general dream in which we all slumber out our time: every man thinks the day coming, in which he shall be gratified with all his wishes, in which he shall leave all those competitors behind, who are now rejoicing like himself in the expectation of victory; the day is always coming to the servile in which they shall be powerful, to the obscure in which they shall

be eminent, and to the deformed in which they shall be beautiful.

If any of my readers has looked with so little attention on the world about him, as to imagine this representation exaggerated beyond probability, let him reflect a little upon his own life; let him consider what were his hopes and prospects ten years ago, and what additions he then expected to be made by ten years to his happiness: those years are now elapsed; have they made good the promise that was extorted from them, have they advanced his fortune, enlarged his knowledge, or reformed his conduct, to the degree that was once expected? I am afraid, every man that recollects his hopes must confess his disappointment; and own that day has glided unprofitably after day, and that he is still at the same distance from the point of happiness.

With what consolations can those, who have thus miscarried in their chief design, elude the memory of their ill-success? with what amusements can they pacify their discontent, after the loss of so large a portion of life? They can give themselves up again to the same delusions, they can form new schemes of airy gratifications, and fix another period of felicity; they can again resolve to trust the promise which they know will be broken, they can walk in a circle with their eyes shut, and persuade themselves to think that they go forward.

Of every great and complicated event, part depends upon causes out of our power, and part must be effected by vigour and perseverance. With regard to that which is styled in common language the work of chance, men will always find reasons for confidence or distrust, according to their different tempers or inclinations; and he that has been long accustomed to please himself with possibilities of fortuitous happiness, will not easily or willingly be reclaimed from his mistake. But the effects of human industry and skill are more easily subjected to calculation; whatever can be completed in a year, is divisible into parts, of which each may be performed in the compass of a day; he, therefore, that has passed the day without attention to the task assigned him, may be certain, that the lapse of life has brought him no nearer to his object; for whatever idleness may expect from time, its produce will be only in proportion to the diligence with which it has been used. He that floats lazily down the stream, in pursuit of something borne along by the same current, will find himself indeed move forward; but unless he lays his hand to the oar, and increases his speed by his own labour, must be always at the same distance from that which he is following.

There have happened in every age some contingencies of unexpected and undeserved success, by which those who are determined to believe whatever favours their inclinations, have been encouraged to delight themselves with fu-

ture advantages; they support confidence by considerations, of which the only proper use is to chase away despair: it is equally absurd to sit down in idleness because some have been enriched without labour, as to leap a precipice because some have fallen and escaped with life, or to put to sea in a storm because some have been driven from a wreck upon the coast to which they were bound.

We are all ready to confess, that belief ought to be proportioned to evidence or probability: let any man, therefore, compare the number of those who have been thus favoured by fortune, and of those who have failed of their expectations, and he will easily determine, with what justness he has registered himself in the lucky catalogue.

But there is no need on these occasions for deep inquiries or laborious calculations; there is a far easier method of distinguishing the hopes of folly from those of reason, of finding the difference between prospects that exist before the eyes, and those that are only painted on a fond imagination. Tom Drowsy had accustomed himself to compute the profit of a darling project till he had no longer any doubt of its success; it was at last matured by close consideration, all the measures were accurately adjusted, and he wanted only five hundred pounds to become master of a fortune that might be envied by a director of a trading company. Tom was generous and grateful, and was resolved to recompense this small assistance with an ample fortune: he, therefore, deliberated for a time, to whom amongst his friends he should declare his necessities; not that he suspected a refusal, but because he could not suddenly determine which of them would make the best use of riches, and was, therefore, most worthy of his favour. At last his choice was settled; and knowing that in order to borrow he must show the probability of repayment, he prepared for a minute and copious explanation of his project. But here the golden dream was at an end: he soon discovered the impossibility of imposing upon others the notions by which he had so long imposed upon himself; which way soever he turned his thoughts, impossibility and absurdity arose in opposition on every side; even credulity and prejudice were at last forced to give way, and he grew ashamed of crediting himself what shame would not suffer him to communicate to another.

To this test let every man bring his imaginations, before they have been too long predominant in his mind. Whatever is true will bear to be related, whatever is rational will endure to be explained; but when we delight to brood in secret over future happiness, and silently to employ our meditations upon schemes of which we are conscious that the bare mention would expose us to derision and contempt: we should then remember, that we are cheating ourselves

by voluntary delusions: and giving up to the unreal mockeries of fancy, those hours in which solid advantages might be attained by sober thought and rational assiduity.

There is, indeed, so little certainty in human affairs, that the most cautious and severe examiner may be allowed to indulge some hopes which he cannot prove to be much favoured by probability; since, after his utmost endeavours to ascertain events, he must often leave the issue in the hands of chance. And so scanty is our present allowance of happiness, that in many situations life could scarcely be supported, if hope were not allowed to relieve the present hour by pleasures borrowed from futurity; and reanimate the languor of dejection to new efforts, by pointing to distant regions of felicity, which yet no resolution or perseverance shall ever reach.

But these, like all other cordials, though they may invigorate in a small quantity, intoxicate in a greater; these pleasures, like the rest, are lawful only in certain circumstances, and to certain degrees; they may be useful in a due subserviency to nobler purposes, but become dangerous and destructive when once they gain the ascendant in the heart: to soothe the mind to tranquillity by hope, even when that hope is likely to deceive us, may be sometimes useful; but to lull our faculties in a lethargy, is poor and despicable.

Vices and errors are differently modified, according to the state of the minds to which they are incident; to indulge hope beyond the warrant of reason, is the failure alike of mean and elevated understandings; but its foundation and its effects are totally different: the man of high courage and great abilities is apt to place too much confidence in himself, and to expect from a vigorous exertion of his powers more than spirit or diligence can attain; between him and his wish he sees obstacles indeed, but he expects to overleap or break them; his mistaken ardour hurries him forward; and though perhaps he misses his end, he nevertheless obtains some collateral good, and performs something useful to mankind and honourable to himself.

The drone of timidity presumes likewise to hope, but without ground and without consequence; the bliss with which he solaces his hours, he always expects from others, though very often he knows not from whom: he folds his arms about him, and sits in expectation of some revolution in the state that shall raise him to greatness, or some golden shower that shall load him with wealth; he dozes away the day in musing upon the morrow; and at the end of life is roused from his dream only to discover that the time of action is past, and that he can now show his wisdom only by repentance.

No. 74.] SATURDAY, JULY 21, 1753.

*Insanientis dum sapienti  
Consultus erro.*

How.

*I miss'd my end, and lost my way,  
By crack-brain'd wisdom led astray.*

## TO THE ADVENTURER.

Sir,

It has long been charged by one part of mankind upon the other, that they will not take advice; that counsel and instruction are generally thrown away; and that, in defiance both of admonition and example, all claim the right to choose their own measures, and to regulate their own lives.

That there is something in advice very useful and salutary, seems to be equally confessed on all hands; since even those that reject it, allow for the most part that rejection to be wrong, but charge the fault upon the unskilful manner in which it is given: they admit the efficacy of the medicine, but abhor the nauseousness of the vehicle.

Thus mankind have gone on from century to century: some have been advising others how to act, and some have been teaching the advisers how to advise; yet very little alteration has been made in the world. As we must all by the law of nature enter life in ignorance, we must all make our way through it by the light of our own experience; and for any security that advice has been yet able to afford, must endeavour after success at the hazard of miscarriage, and learn to do right by venturing to do wrong.

By advice I would not be understood to mean, the everlasting and invariable principles of moral and religious truth, from which no change of external circumstances can justify any deviation; but such directions as respect merely the prudential part of conduct, and which may be followed or neglected without any violation of essential duties.

It is, indeed, not so frequently to make us good as to make us wise, that our friends employ the officiousness of counsel; and among the rejectors of advice, who are mentioned by the grave and sententious with so much acrimony, you will not so often find the vicious and abandoned, as the pert and the petulant, the vivacious and the giddy.

As the great end of female education is to get a husband, this likewise is the general subject of female advice; and the dreadful denunciation against those volatile girls, who will not listen patiently to the lectures of wrinkled wisdom, is, that they will die unmarried, or throw themselves away upon some worthless fellow, who will never be able to keep them a coach.

I being naturally of a ductile and easy temper, without strong desires or quick resentments, was always a favourite amongst the elderly ladies, because I never rebelled against seniority, nor could be charged with thinking myself wise before my time; but heard every opinion with submissive silence, professed myself ready to learn from all who seemed inclined to teach me, paid the same grateful acknowledgments for precepts contradictory to each other, and if any controversy arose, was careful to side with her who presided in the company.

Of this compliance I very early found the advantage; for my aunt Matilda left me a very large addition to my fortune, for this reason chiefly, as she herself declared, because I was not above hearing good counsel, but would sit from morning till night to be instructed, while my sister Sukey, who was a year younger than myself, and was, therefore, in greater want of information, was so much conceited of her own knowledge, that whenever the good lady in the ardour of benevolence reproved or instructed her, she would pout or titter, interrupt her with questions, or embarrass her with objections.

I had no design to supplant my sister by this complaisant attention; nor, when the consequence of my obsequiousness came to be known, did Sukey so much envy as despise me: I was, however, very well pleased with my success; and having received, from the concurrent opinion of all mankind, a notion that to be rich was to be great and happy, I thought I had obtained my advantages at an easy rate, and resolved to continue the same passive attention, since I found myself so powerfully recommended by it to kindness and esteem.

The desire of advising has a very extensive prevalence; and since advice cannot be given but to those that will hear it, a patient listener is necessary to the accommodation of all those who desire to be confirmed in the opinion of their own wisdom: a patient listener, however, is not always to be had; the present age, whatever age is present, is so vitiated and disordered, that young people are readier to talk than to attend, and good counsel is only thrown away upon those who are full of their own perfections.

I was, therefore, in this scarcity of good sense, a general favourite; and seldom saw a day in which some sober matron did not invite me to her house, or take me out in her chariot, for the sake of instructing me how to keep my character in this censorious age, how to conduct myself in the time of courtship, how to stipulate for a settlement, how to manage a husband of every character, regulate my family, and educate my children.

We are all naturally credulous in our own favour. Having been so often caressed and applauded for docility, I was willing to believe

myself really enlightened by instruction, and completely qualified for the task of life. I did not doubt but I was entering the world with a mind furnished against all exigencies, with expedients to extricate myself from every difficulty, and sagacity to provide against every danger; I was, therefore, in haste to give some specimen of my prudence, and to show that this liberality of instruction had not been idly lavished upon a mind incapable of improvement.

My purpose, for why should I deny it? was like that of other women, to obtain a husband of rank and fortune superior to my own; and in this I had the concurrence of all those that had assumed the province of directing me. That the woman was undone who married below herself, was universally agreed: and though some ventured to assert, that the richer man ought invariably to be preferred, and that money was a sufficient compensation for a defective ancestry; yet the majority declared warmly for a gentleman, and were of opinion that upstarts should not be encouraged.

With regard to other qualifications, I had an irreconcilable variety of instructions. I was sometimes told that deformity was no defect in a man; and that he who was not encouraged to intrigue by an opinion of his person, was more likely to value the tenderness of his wife: but a grave widow directed me to choose a man who might imagine himself agreeable to me, for that the deformed were always insupportably vigilant and apt to sink into sullenness, or burst into rage, if they found their wife's eye wandering for a moment to a good face or a handsome shape.

They were, however, all unanimous in warning me, with repeated cautions, against all thoughts of union with a wit, as a being with whom no happiness could possibly be enjoyed: men of every other kind I was taught to govern, but a wit was an animal for whom no arts of taming had been yet discovered: the woman whom he could once get within his power, was considered as lost to all hope of dominion or of quiet: for he would detect artifice and defeat allurement; and if once he discovered any failure of conduct, would believe his own eyes, in defiance of tears, caresses, and protestations.

In pursuance of these sage principles, I proceeded to form my schemes; and while I was yet in the first bloom of youth, was taken out at an assembly by Mr. Frisk. I am afraid my cheeks glowed, and my eyes sparkled; for I observed the looks of all my superintendants fixed anxiously upon me; and I was next day cautioned against him from all hands, as a man of the most dangerous and formidable kind, who had writ verses to one lady, and then forsaken her only because she could not read them, and had lampooned another for no other fault than defaming his sister.

Having been hitherto accustomed to obey, I ventured to dismiss Mr. Frisk, who happily did not think me worth the labour of a lampoon. I was then addressed by Mr. Sturdy, and congratulated by all my friends on the manors of which I was shortly to be lady: but Sturdy's conversation was so gross, that after the third visit I could endure him no longer; and incurred, by dismissing him, the censure of all my friends, who declared that my nicety was greater than my prudence, and that they feared it would be my fate at last to be wretched with a wit.

By a wit, however, I was never afterwards attacked, but lovers of every other class, or pretended lovers, I have often had; and, notwithstanding the advice constantly given me, to have no regard in my choice to my own inclinations, I could not forbear to discard some for vice, and some for rudeness. I was once loudly censured for refusing an old gentleman who offered an enormous jointure, and died of the phthisic a year after; and was so baited with incessant importunities, that I should have given my hand to Drone the stock-jobber, had not the reduction of interest made him afraid of the expenses of matrimony.

Some, indeed, I was permitted to encourage; but miscarried of the main end, by treating them according to the rules of art which had been prescribed me. Altilis, an old maid, infused into me so much haughtiness and reserve, that some of my lovers withdrew themselves from my frown, and returned no more; others were driven away, by the demands of settlement which the widow Trapland directed me to make; and I have learned, by many experiments, that to ask advice is to lose opportunity. I am sir, your humble servant,

PERDITA.

No. 81.] TUESDAY, AUG. 14, 1753.

*Nul desperandum.*

HOR.

*Avant despair.*

I HAVE sometimes heard it disputed in conversation, whether it be more laudable or desirable, that a man should think too highly or too meanly of himself: it is on all hands agreed to be best, that he should think rightly; but since a fallible being will always make some deviations from exact rectitude, it is not wholly useless to inquire towards which side it is safer to decline.

The prejudices of mankind seem to favour him who errs by underrating his own powers: he is considered as a modest and harmless member of society, not likely to break the peace by com-

petition, to endeavour after such splendour of reputation as may dim the lustre of others, or to interrupt any in the enjoyment of themselves; he is no man's rival, and, therefore, may be every man's friend.

The opinion which a man entertains of himself ought to be distinguished, in order to an accurate discussion of this question, as it relates to persons or to things. To think highly of ourselves in comparison with others, to assume by our own authority that precedence which none is willing to grant, must be always invidious and offensive; but to rate our powers high in proportion to things, and imagine ourselves equal to great undertakings, while we leave others in possession of the same abilities, cannot with equal justice provoke censure.

It must be confessed, that self-love may dispose us to decide too hastily in our own favour: but who is hurt by the mistake? If we are incited by this vain opinion to attempt more than we can perform, ours is the labour, and ours is the disgrace.

But he that dares to think well of himself, will not always prove to be mistaken; and the good effects of his confidence will then appear in great attempts and great performances: if he should not fully complete his design, he will at least advance it so far as to leave an easier task for him that succeeds him; and even though he should wholly fail, he will fail with honour.

But from the opposite error, from torpid despondency, can come no advantage; it is the frost of the soul, which binds up all its powers, and congeals life in perpetual sterility. He that has no hopes of success, will make no attempts; and where nothing is attempted, nothing can be done.

Every man should, therefore, endeavour to maintain in himself a favourable opinion of the powers of the human mind; which are, perhaps, in every man, greater than they appear, and might, by diligent cultivation, be exalted to a degree beyond what their possessor presumes to believe. There is scarce any man but has found himself able, at the instigation of necessity, to do what in a state of leisure and deliberation he would have concluded impossible; and some of our species have signalized themselves by such achievements, as prove that there are few things above human hope.

It has been the policy of all nations to preserve, by some public monuments, the memory of those who have served their country by great exploits: there is the same reason for continuing or reviving the names of those, whose extensive abilities have dignified humanity. An honest emulation may be alike excited; and the philosopher's curiosity may be inflamed by a catalogue of the works of Boyle or Bacon, as Themistocles was kept awake by the trophies of Miltiades.

Among the favourites of nature that have from time to time appeared in the world, enriched with various endowments and contraries of excellence, none seems to have been more exalted above the common rate of humanity, than the man known about two centuries ago by the appellation of the Admirable Crichton; of whose history, whatever we may suppress as surpassing credibility, yet we shall, upon incontestable authority, relate enough to rank him among prodigies.

"Virtue," says Virgil, "is better accepted when it comes in a pleasing form:" the person of Crichton was eminently beautiful; but his beauty was consistent with such activity and strength, that in fencing he would spring at one bound the length of twenty feet upon his antagonist; and he used the sword in either hand with such force and dexterity, that scarce any one had courage to engage him.

Having studied at St. Andrew's in Scotland, he went to Paris in his twenty-first year, and affixed on the gate of the college of Navarre a kind of challenge to the learned of that university to dispute with him on a certain day: offering to his opponents, whoever they should be the choice of ten languages, and of all the faculties and sciences. On the day appointed three thousand auditors assembled, when four doctors of the church and fifty masters appeared against him; and one of his antagonists confesses, that the doctors were defeated; that he gave proofs of knowledge above the reach of man; and that a hundred years passed without food or sleep, would not be sufficient for the attainment of his learning. After a disputation of nine hours, he was presented by the president and professors with a diamond and a purse of gold, and dismissed with repeated acclamations.

From Paris he went away to Rome, where he made the same challenge, and had in the presence of the Pope and cardinals the same success. Afterwards he contracted at Venice an acquaintance with Aldus Manutius, by whom he was introduced to the learned of that city: then visited Padua, where he engaged in another public disputation, beginning his performance with an extemporal poem in praise of the city and the assembly then present, and concluding with an oration equally unpremeditated in commendation of ignorance.

He afterwards published another challenge, in which he declared himself ready to detect the errors of Aristotle and all his commentators, either in the common forms of logic, or in any which his antagonists should propose of a hundred different kinds of verse.

These acquisitions of learning, however stupendous, were not gained at the expense of any pleasure which youth generally indulges, or by the omission of any accomplishment in which it becomes a gentleman to excel: he practised in

great perfection the arts of drawing and painting, he was an eminent performer in both vocal and instrumental music, he danced with uncommon gracefulness, and on the day after his disputation at Paris exhibited his skill in horsemanship before the court of France, where at a public match of tilting, he bore away the ring upon his lance fifteen times together.

He excelled likewise in domestic games of less dignity and reputation: and in the interval between his challenge and disputation at Paris, he spent so much of his time at cards, dice, and tennis, that a lampoon was fixed upon the gate of the Sorbonne, directing those that would see this monster of erudition, to look for him at the tavern.

So extensive was his acquaintance with life and manners, that in an Italian comedy composed by himself, and exhibited before the court of Mantua, he is said to have personated fifteen different characters: in all which he might succeed without great difficulty, since he had such power of retention, that once hearing an oration of an hour, he would repeat it exactly, and in the recital follow the speaker through all his variety of tone and gesticulation.

Nor was his skill in arms less than in learning, or his courage inferior to his skill: there was a prize-fighter at Mantua, who travelling about the world, according to the barbarous custom of that age, as a general challenger, had defeated the most celebrated masters in many parts of Europe; and in Mantua, where he then resided, had killed three that appeared against him. The duke repented that he had granted him his protection; when Crichton, looking on his sanguinary success with indignation, offered to stake fifteen hundred pistoles, and mount the stage against him. The duke, with some reluctance, consented, and on the day fixed the combatants appeared: their weapon seems to have been single rapier, which was then newly introduced in Italy. The prize-fighter advanced with great violence and fierceness, and Crichton contented himself calmly to ward his passes, and suffered him to exhaust his vigour by his own fury. Crichton then became the assailant; and pressed upon him with such force and agility, that he thrust him thrice through the body, and saw him expire: he then divided the prize he had won among the widows whose husbands had been killed.

The death of this wonderful man I should be willing to conceal, did I not know that every reader will inquire curiously after that fatal hour, which is common to all human beings, however distinguished from each other by nature or by fortune.

The duke of Mantua having received so many proofs of his various merit, made him tutor to his son Vicentio di Gonzaga, a prince of loose manners and turbulent disposition. On this

occasion it was, that he composed the comedy in which he exhibited so many different characters with exact propriety. But his honour was of short continuance: for as he was one night in the time of Carnival rambling about the streets, with his guitar in his hand, he was attacked by six men masked. Neither his courage nor skill in this exigence deserted him: he opposed them with such activity and spirit, that he soon dispersed them, and disarmed their leader, who throwing off his mask, discovered himself to be the prince his pupil. Crichton, falling on his knees, took his own sword by the point, and presented it to the prince; who immediately seized it, and instigated, as some say, by jealousy, according to others only by drunken fury and brutal resentment, thrust him through the heart.

Thus was the Admirable Crichton brought into that state, in which he could excel the meanest of mankind only by a few empty honours paid to his memory: the court of Mantua testified their esteem by a public mourning, the contemporary wits were profuse of their encomiums, and the palaces of Italy were adorned with pictures, representing him on horseback, with a lance in one hand and a book in the other.

— *Tolle periculum,  
Jam vaga prosiliet frænis natura remotis.* HOR.

But take the danger and the shame away,  
And vagrant nature bounds upon her prey. FRANCIS.

#### TO THE ADVENTURER.

SIR,

It has been observed, I think, by Sir William Temple, and after him by almost every other writer, that England affords a greater variety of characters than the rest of the world. This is ascribed to the liberty prevailing among us, which gives every man the privilege of being wise or foolish his own way, and preserves him from the necessity of hypocrisy or the servility of imitation.

That the position itself is true, I am not completely satisfied. To be nearly acquainted with the people of different countries can happen to very few; and in life, as in every thing else beheld at a distance, there appears an even uniformity: the petty discriminations which diversify the natural character, are not discoverable but by a close inspection; we, therefore, find them most at home, because there we have most opportunities of remarking them. Much less am I convinced, that this peculiar diversifica-

tion, if it be real, is the consequence of peculiar liberty; for where is the government to be found that superintends individuals with so much vigilance, as not to leave their private conduct without restraint? Can it enter into a reasonable mind to imagine, that men of every other nation are not equally masters of their own time or houses with ourselves; and equally at liberty to be parsimonious or profuse, frolic or sullen, abstinent or luxurious? Liberty is certainly necessary to the full play of predominant humours; but such liberty is to be found alike under the government of the many or the few, in monarchies or in commonwealths.

How readily the predominant passion snatches an interval of liberty, and how fast it expands itself when the weight of restraint is taken away, I had lately an opportunity to discover, as I took a journey into the country in a stage coach; which, as every journey is a kind of adventure, may be very properly related to you, though I can display no such extraordinary assembly as Cervantes has collected at Don Quixote's inn.

In a stage coach, the passengers are for the most part wholly unknown to one another, and without expectation of ever meeting again when their journey is at an end; one should therefore imagine, that it was of little importance to any of them, what conjectures the rest should form concerning him. Yet so it is, that as all think themselves secure from detection, all assume that character of which they are most desirous, and on no occasion is the general ambition of superiority more apparently indulged.

On the day of our departure, in the twilight of the morning, I ascended the vehicle with three men and two women, my fellow-travellers. It was easy to observe the affected elevation of mien with which every one entered, and the supercilious civility with which they paid their compliments to each other. When the first ceremony was despatched, we sat silent for a long time, all employed in collecting importance into our faces, and endeavouring to strike reverence and submission into our companions.

It is always observable, that silence propagates itself, and that the longer talk has been suspended, the more difficult it is to find any thing to say. We began now to wish for conversation; but no one seemed inclined to descend from his dignity, or first propose a topic of discourse. At last a corpulent gentleman, who had equipped himself for this expedition with a scarlet surtout and a large hat with a broad lace, drew out his watch, looked on it in silence, and then held it dangling at his finger. This was, I suppose, understood by all the company as an invitation to ask the time of the day, but nobody appeared to heed his overture; and his desire to be talking so far overcame his resentment, that he let us know of his own accord that it was

past five, and that in two hours we should be at breakfast.

His condescension was thrown away: we continued all obdurate; the ladies held up their heads; I amused myself with watching their behaviour; and of the other two, one seemed to employ himself in counting the trees as we drove by them, the other drew his hat over his eyes, and counterfeited a slumber. The man of benevolence, to show that he was not depressed by our neglect, hummed a tune, and beat time upon his snuff-box.

Thus universally displeased with one another, and not much delighted with ourselves, we came at last to the little inn appointed for our repast; and all began at once to recompense themselves for the constraint of silence, by innumerable questions and orders to the people that attended us. At last, what every one had called for was got, or declared impossible to be got at that time, and we were persuaded to sit round the same table; when the gentleman in the red surtout looked again upon his watch, told us that we had half an hour to spare, but he was sorry to see so little merriment among us; that all fellow-travellers were for the time upon the level, and that it was always his way to make himself one of the company. "I remember," says he, "it was on just such a morning as this, that I and my Lord Mumble and the duke of Tenterden were out upon a ramble: we called at a little house, as it might be this; and my landlady, I warrant you, not suspecting to whom she was talking, was so jocular and facetious, and made so many merry answers to our questions, that we were all ready to burst with laughter. At last the good woman happening to overhear me whisper the duke, and call him by his title, was so surprised and confounded, that we could scarcely get a word from her; and the duke never met me from that day to this, but he talks of the little house, and quarrels with me for terrifying the landlady."

He had scarcely time to congratulate himself on the veneration which this narrative must have procured him from the company, when one of the ladies having reached out for a plate on a distant part of the table, began to remark "the inconveniences of travelling, and the difficulty which they who never sat at home without a great number of attendants, found in performing for themselves such offices as the road required; but that people of quality often travelled in disguise, and might be generally known from the vulgar by their condescension to poor innkeepers, and the allowance which they made for any defect in their entertainment; that for her part, while people were civil and meant well, it was never her custom to find fault, for one was not to expect upon a journey all that one enjoyed at one's own house."

A general emulation seemed now to be excited.

One of the men who had hitherto said nothing, called for the last newspaper; and having perused it a while with deep pensiveness, "It is impossible," says he, "for any man to guess how to act with regard to the stocks; last week it was the general opinion that they would fall; and I sold out twenty thousand pounds in order to a purchase; they have now risen unexpectedly: and I make no doubt but at my return to London I shall risk thirty thousand pounds among them again."

A young man, who had hitherto distinguished himself only by the vivacity of his looks, and a frequent diversion of his eyes from one object to another, upon this closed his snuff-box, and told us that "he had a hundred times talked with the chancellor and the judges on the subject of the stocks; that for his part he did not pretend to be well acquainted with the principles on which they were established, but had always heard them reckoned pernicious to trade, uncertain in their produce, and unsolid in their foundation; and that he had been advised by three judges, his most intimate friends, never to venture his money in the funds, but to put it out upon land security, till he could light upon an estate in his own country."

It might be expected, that upon these glimpses of latent dignity, we should all have begun to look round us with veneration; and have behaved like the princes of romance, when the enchantment that disguises them is dissolved, and they discover the dignity of each other; yet it happened, that none of these hints made much impression on the company; every one was apparently suspected of endeavouring to impose false appearances upon the rest; all continued their haughtiness in hopes to enforce their claims; and all grew every hour more sullen, because they found their representations of themselves without effect.

Thus we travelled on four days with malevolence perpetually increasing, and without any endeavour but to outvie each other in superciliousness and neglect; and when any two of us could separate ourselves for a moment, we vented our indignation at the sauciness of the rest.

At length the journey was at an end; and time and chance, that strip off all disguises, have discovered that the intimate of lords and dukes is a nobleman's butler, who has furnished a shop with the money he has saved; the man who deals so largely in the funds, is the clerk of a broker in 'Change-alley; the lady who so carefully concealed her quality, keeps a cook-shop behind the Exchange; and the young man who is so happy in the friendship of the judges, engrosses and transcribes for bread in a gurret of the Temple. Of one of the women only I could make no disadvantageous detection, because she had assumed no character, but accommodated herself

to the scene before her, without any struggle for distinction or superiority.

I could not forbear to reflect on the folly of practising a fraud, which, as the event showed, had been already practised too often to succeed, and by the success of which no advantage could have been obtained: of assuming a character, which was to end with the day; and of claiming upon false pretences honours which must perish with the breath that paid them.

But, Mr. Adventurer, let not those who laugh at me and my companions, think this folly confined to a stage coach. Every man in the journey of life takes the same advantage of the ignorance of his fellow-travellers, disguises himself in counterfeit merit, and hears those praises with complacency, which his conscience reproaches him for accepting. Every man deceives himself, while he thinks he is deceiving others; and forgets that the time is at hand when every illusion shall cease, when fictitious excellence shall be torn away, and *all* must be shown to *all* in their real estate. I am, Sir, your humble servant,

VIATOR.

No. 85.] TUESDAY, AUGUST 28, 1753.

*Qui cupit optatam cursu contingere metam,  
Multa tulit fecitque puer.*

HOR.

The youth, who hopes th' Olympic prize to gain,  
All arts must try, and every toil sustain. FRANCIS.

It is observed by Bacon, that "reading makes a full man, conversation a ready man, and writing an exact man."

As Bacon attained to degrees of knowledge scarcely ever reached by any other man, the directions which he gives for study have certainly a just claim to our regard; for who can teach an art with so great authority, as he that has practised it with undisputed success?

Under the protection of so great a name, I shall, therefore, venture to inculcate to my ingenious contemporaries, the necessity of reading, the fitness of consulting other understandings than their own, and of considering the sentiments and opinions of those who, however neglected in the present age, had in their own times, and many of them a long time afterwards, such reputation for knowledge and acuteness as will scarcely ever be attained by those that despise them.

An opinion has of late been, I know not how, propagated among us, that libraries are filled only with useless lumber; that men of parts stand in need of no assistance; and that to spend life in poring upon books, is only to imbibe prejudices, to obstruct and embarrass the

powers of nature, to cultivate memory at the expense of judgment, and to bury reason under a chaos of indigested learning.

Such is the talk of many who think themselves wise, and of some who are thought wise by others; of whom part probably believe their own tenets, and part may be justly suspected of endeavouring to shelter their ignorance in multitudes, and of wishing to destroy that reputation which they have no hopes to share. It will, I believe, be found invariably true, that learning was never decried by any learned man: and what credit can be given to those who venture to condemn that which they do not know?

If reason has the power ascribed to it by its advocates, if so much is to be discovered by attention and meditation, it is hard to believe, that so many millions, equally participating of the bounties of nature with ourselves, have been for ages upon ages meditating in vain: if the wits of the present time expect the regard of posterity, which will then inherit the reason which is now thought superior to instruction, surely they may allow themselves to be instructed by the reason of former generations. When, therefore, an author declares, that he has been able to learn nothing from the writings of his predecessors, and such a declaration has been lately made, nothing but a degree of arrogance unpardonable in the greatest human understanding, can hinder him from perceiving that he is raising prejudices against his own performance; for with what hopes of success can he attempt that in which greater abilities have hitherto miscarried? or with what peculiar force does he suppose himself invigorated, that difficulties hitherto invincible should give way before him?

Of those whom Providence has qualified to make any additions to human knowledge, the number is extremely small; and what can be added by each single mind, even of his superior class, is very little; the greatest part of mankind must owe all their knowledge, and all must owe far the larger part of it, to the information of others. To understand the works of celebrated authors, comprehend their systems, and retain their reasonings, is a task more than equal to common intellects; and he is by no means to be accounted useless or idle, who has stored his mind with acquired knowledge, and can detail it occasionally to others who have less leisure or weaker abilities.

Persius has justly observed, that knowledge is nothing to him who is not known by others to possess it: to the scholar himself it is nothing with respect either to honour or advantage, for the world cannot reward those qualities which are concealed from it; with respect to others it is nothing, because it affords no help to ignorance or error.

It is with justice, therefore, that in an accomplished character, Horace unites just sentiments

with the power of expressing them; and he that has once accumulated learning, is next to consider, how he shall most widely diffuse and most agreeably impart it.

A ready man is made by conversation. He that buries himself among his manuscripts "besprent," as Pope expresses it, "with learned dust," and wears out his days and nights in perpetual research and solitary meditation, is too apt to lose in his elocution what he adds to his wisdom; and when he comes into the world, to appear overloaded with his own notions, like a man armed with weapons which he cannot wield. He has no facility of inculcating his speculations, of adapting himself to the various degrees of intellect which the accidents of conversation will present; but will talk to most unintelligibly, and to all unpleasantly.

I was once present at the lectures of a profound philosopher, a man really skilled in the science which he professed, who having occasion to explain the terms *opacum* and *pellucidum*, told us, after some hesitation, that *opacum* was, as one might say, *opaque*, and that *pellucidum* signified *pellucid*. Such was the dexterity with which this learned reader facilitated to his auditors the intricacies of science; and so true is it that a man may know what he cannot teach.

Boerhaave complains, that the writers who have treated of chemistry before him, are useless to the greater part of students, because they pre-suppose their readers to have such degrees of skill as are not often to be found. Into the same error are all men apt to fall, who have familiarized any subject to themselves in solitude: they discourse, as if they thought every other man had been employed in the same inquiries; and expect that short hints and obscure allusions will produce in others the same strain of ideas which they excite in themselves.

Nor is this the only inconvenience which the man of study suffers from a recluse life. When he meets with an opinion that pleases him, he catches it up with eagerness; looks only after such arguments as tend to his confirmation; or spares himself the trouble of discussion, and adopts it with very little proof; indulges it long without suspicion, and in time unites it to the general body of his knowledge, and treasures it up among incontestable truths; but when he comes into the world among men who, arguing upon dissimilar principles, have been led to different conclusions, and being placed in various situations, view the same object on many sides; he finds his darling position attacked, and himself in no condition to defend it: having thought always in one train, he is in the state of a man who having fenced always with the same master, is perplexed and amazed by a new posture of his antagonist; he is entangled in unexpected difficulties, he is harassed by sudden objections, he is unprovided with solutions or replies; his sur-

prise impedes his natural powers of reasoning, his thoughts are scattered and confounded, and he gratifies the pride of airy petulance, with an easy victory.

It is difficult to imagine, with what obstinacy truths which one mind perceives almost by intuition, will be rejected by another; and how many artifices must be practised, to procure admission for the most evident propositions into understandings frightened by their novelty, or hardened against them by accidental prejudice; it can scarcely be conceived, how frequently, in these extemporaneous controversies, the dull will be subtle, and the acute absurd; how often stupidity will elude the force of argument, by involving itself in its own gloom; and mistaken ingenuity will weave artful fallacies, which reason can scarcely find means to disentangle.

In these encounters the learning of the recluse usually fails him: nothing but long habit and frequent experiments can confer the power of changing a position into various forms, presenting it in different points of view, connecting it with known and granted truths, fortifying it with intelligible arguments, and illustrating it by apt similitudes: and he, therefore, that has collected his knowledge in solitude, must learn its application by mixing with mankind.

But while the various opportunities of conversation invite us to try every mode of argument, and every art of recommending our sentiments, we are frequently betrayed to the use of such as are not in themselves strictly defensible: a man heated in talk, and eager of victory, takes advantage of the mistakes or ignorance of his adversary, lays hold of concessions to which he knows he has no right, and urges proofs likely to prevail on his opponent, though he knows himself that they have no force: thus the severity of reason is relaxed, many topics are accumulated, but without just arrangement or distinction; we learn to satisfy ourselves with such ratiocination as silences others; and seldom recall to a close examination, that discourse which has gratified our vanity with victory and applause.

Some caution, therefore, must be used lest copiousness and facility be made less valuable by inaccuracy and confusion. To fix the thoughts by writing, and subject them to frequent examinations and reviews, is the best method of enabling the mind to detect its own sophisms, and keep it on guard against the fallacies which it practices on others: in conversation we naturally diffuse our thoughts, and in writing we contract them; method is the excellence of writing, and unconstraint the grace of conversation.

To read, write, and converse in due proportions, is, therefore, the business of a man of letters. For all these there is not often equal opportunity; excellence, therefore, is not often attainable; and most men fail in one or other of

the ends proposed, and are full without readiness, or ready without exactness. Some deficiency must be forgiven all, because all are men; and more must be allowed to pass uncensured in the greater part of the world, because none can confer upon himself abilities, and few have the choice of situations proper for the improvement of those which nature has bestowed: it is, however, reasonable to have *perfection* in our eye; that we may always advance towards it, though we know it never can be reached.

---

No. 92.] SATURDAY, SEPTEMBER 22, 1753.

*Cum tabulis animum censoris sumet honesti.* HOR.

Bold be the critic, zealous to his trust,  
Like the firm judge inexorably just.

#### TO THE ADVENTURER.

SIR,

IN the papers of criticism which you have given to the public, I have remarked a spirit of candour and love of truth, equally remote from bigotry and captiousness: a just distribution of praise amongst the ancients and the moderns: a sober deference to reputation long established, without a blind adoration of antiquity; and a willingness to favour later performances without a light or puerile fondness for novelty.

I shall, therefore, venture to lay before you, such observations as have risen to my mind in the consideration of Virgil's pastorals, without any inquiry how far my sentiments deviate from established rules or common opinions.

If we survey the ten pastorals in a general view, it will be found that Virgil can derive from them very little claim to the praise of an inventor. To search into the antiquity of this kind of poetry, is not my present purpose; that it has long subsisted in the east, the *Sacred Writings* sufficiently inform us; and we may conjecture, with great probability, that it was sometimes the devotion, and sometimes the entertainment, of the first generations of mankind. Theocritus united elegance with simplicity; and taught his shepherds to sing with so much ease and harmony, that his countrymen, despairing to excel, forbore to imitate him; and the Greeks, however vain or ambitious, left him in quiet possession of the garlands which the wood nymphs had bestowed upon him.

Virgil, however, taking advantage of another language, ventured to copy or to rival the *Sicilian bard*: he has written with greater splendour of diction, and elevation of sentiment: but as the magnificence of his performances was more, the simplicity was less; and perhaps where he excels Theocritus, he sometimes obtains his

superiority by deviating from the pastoral character, and performing what Theocritus never attempted.

Yet, though I would willingly pay to Theocritus the honour which is always due to an original author, I am far from intending to depreciate Virgil : of whom Horace justly declares, that the rural muses have appropriated to him their elegance and sweetness, and who, as he copied Theocritus in his design, has resembled him likewise in his success ; for, if we except Calphurnius, an obscure author of the lower ages, I know not that a single pastoral was written after him by any poet, till the revival of literature.

But though his general merit has been universally acknowledged, I am far from thinking all the productions of his rural Thalia equally excellent ; there is, indeed, in all his pastorals a strain of versification which it is vain to seek in any other poet ; but if we except the first and the tenth, they seem liable either wholly or in part to considerable objections.

The second, though we should forget the great charge against it, which I am afraid can never be refuted, might, I think, have perished without any diminution of the praise of its author ; for I know not that it contains one affecting sentiment or pleasing description, or one passage that strikes the imagination or awakens the passions.

The third contains a contest between two shepherds, begun with a quarrel of which some particulars might well be spared, carried on with sprightliness and elegance, and terminated at last in a reconciliation : but, surely, whether the invectives with which they attack each other be true or false, they are too much degraded from the dignity of pastoral innocence ; and instead of rejoicing that they are both victorious, I should not have grieved could they have been both defeated.

The poem to Pollio is indeed, of another kind : it is filled with images at once splendid and pleasing, and is elevated with grandeur of language worthy of the first of Roman poets, but I am not able to reconcile myself to the disproportion between the performance and the occasion that produced it : that the golden age should return because Pollio had a son, appears so wild a fiction, that I am ready to suspect the poet of having written for some other purpose, what he took this opportunity of producing to the public.

The fifth contains a celebration of Daphnis, which has stood to all succeeding ages as the model of pastoral elegies. To deny praise to a performance which so many thousands have laboured to imitate, would be to judge with too little deference for the opinion of mankind : yet whoever shall read it with impartiality, will find that most of the images are of the mythological

kind, and therefore easily invented ; and that there are few sentiments of rational praise or natural lamentation.

In the Silenus he again rises to the dignity of philosophic sentiments, and heroic poetry. The address to Varus is eminently beautiful : but since the compliment paid to Gallus fixes the transaction to his own time, the fiction of Silenus seems injudicious : nor has any sufficient reason yet been found, to justify his choice of those fables that make the subject of the song.

The seventh exhibits another contest of the tuneful shepherds : and, surely, it is not without some reproach to his inventive power, that of ten pastorals, Virgil has written two upon the same plan. One of the shepherds now gains an acknowledged victory, but without any apparent superiority, and the reader, when he sees the prize adjudged, is not able to discover how it was deserved.

Of the eighth pastoral, so little is properly the work of Virgil, that he has no claim to other praise or blame than that of a translator.

Of the ninth, it is scarce possible to discover the design or tendency : it is said, I know not upon what authority, to have been composed from fragments of other poems ; and except a few lines in which the author touches upon his own misfortunes, there is nothing that seems appropriated to any time or place, or of which any other use can be discovered than to fill up the poem.

The first and the tenth pastorals, whatever be determined of the rest, are sufficient to place their author above the reach of rivalry. The complaint of Gallus disappointed in his love, is full of such sentiments as disappointed love naturally produces : his wishes are wild, his resentment is tender ; and his purposes are inconstant. In the genuine language of despair, he soothes himself awhile with the pity that shall be paid him after his death.

——— *Tamen cantabilis, Arcades, inquit,  
Montibus hæc vestris ; soli cantare periti  
Arcades. O mihi tum quam mollior ossa quiescant,  
Vestra meos olim si fistula dicat amores !*

——— Yet, O Arcadian swains,  
Ye best artificers of soothing strains !  
Tune your soft reeds, and teach your rocks my woes,  
So shall my shade in sweeter rest repose.  
O that your birth and business had been mine ;  
To feed the flock, and prune the spreading vine !

WARTON.

Discontented with his present condition, and desirous to be any thing but what he is, he wishes himself one of the shepherds. He then catches the idea of rural tranquillity ; but soon discovers how much happier he should be in these happy regions, with Lycoris at his side :

*Hic gelidi fontes, hæc mollia prata, Lycori :  
Hic nemus ; hic ipso tecum consumerer ævo.*

*Nunc insanus amor duri me Martis in armis,  
Tela inter media, atque adversos detinet hostes.  
Tu procul a patria (nec sit mihi credere) tantum  
Alpinas, ah dura! nives, et frigora Rheni  
Me sine sola vides. Ah te ne frigora lædant!  
Ah ubi ne teneras glacies secat aspera plantas!*

Here cooling fountains roll through flowery meads,  
Here woods, Lycoris, lift their verdant heads;  
Here could I wear my careless life away,  
And in thy arms insensibly decay.  
Instead of that, me frantic love detains,  
Mid foes, and dreadful darts, and bloody plains:  
While you—and can my soul the tale believe,  
Far from your country, lonely wandering leave  
Me, me your lover, barbarous fugitive!  
Seek the rough Alps where snows eternal shine,  
And joyless borders of the frozen Rhine.  
Ah! may no cold e'er blast my dearest maid,  
Nor pointed ice thy tender feet invade. WARTON.

He then turns his thoughts on every side, in quest of something that may solace or amuse him; he proposes happiness to himself, first in one scene and then in another: and at last finds that nothing will satisfy:

*Jam neque Hamaaryades rursum, nec carmina nobis  
Ipsa placent: ipsæ rursum concedite sylvas.  
Non illum nostri possunt mutare labores;  
Nec si frigoribus mediis Hebrumque bibamus,  
Sithoniasque nives hyemis subeamus aquosæ:  
Nec si, cum moriens alta liber aret in ulmo,  
Æthiopum versemus oves sub sidere Cancræ.  
Omnia vincit amor: et nos cedamus amori.*

But now again no more the woodland maids,  
Nor pastoral songs delight—Farewell, ye shades—  
No toils of ours the cruel god can change,  
Though lost in frozen deserts we should range;  
Though we should drink where chilling Hebrus flows,  
Endure bleak winter blasts, and Thracian snows:  
Or on hot India's plains our flocks should feed,  
Where the parch'd elm declines his sickening head,  
Beneath fierce-glowing Cancer's fiery beams,  
Far from cool breezes and refreshing streams,  
Love over all maintains resistless sway,  
And let us love's all-conquering power obey.

WARTON.

But notwithstanding the excellence of the tenth pastoral, I cannot forbear to give the preference to the first, which is equally natural and more diversified. The complaint of the shepherd, who saw his old companion at ease in the shade, while himself was driving his little flock he knew not whither, is such as, with variation of circumstances, misery always utters at the sight of prosperity:

*Nos patria fines, et dulcia linquimus arva:  
Nos patriam fugimus: tu, Tityre, lentus in umbra,  
Formosam resonare doces Amaryllida sylvas.*

We leave our country's bounds, our much-loved plains,  
We from our country fly, unhappy swains!  
You, Tityrus, in the groves at leisure laid,  
Teach Amaryllis' name to every shade. WARTON.

His account of the difficulties of his journey, gives a very tender image of pastoral distress:

— *En! ipse capellas*

*Protinus ager ego: hanc etiam via, Tityre, ducit:  
Hic inter densas corymbos modo namque gemellos,  
Spem gregis, ah! silice in nudo comissa reliquit.*

And, lo! sad partner of the general care,  
Weary and faint I drive my goats afar!  
While scarcely this my leading hand sustains,  
Tired with the way, and recent from her pains;  
For 'mid you tangled hazels as we past,  
On the bare flints her hapless twin she cast,  
The hopes and promise of my ruin'd fold! WARTON.

The description of Virgil's happiness in his little farm, combines almost all the images of rural pleasure; and he, therefore, that can read it with indifference, has no sense of pastoral poetry:

*Fortunate senex, ergo tua rura manebunt,  
Et tibi magna satas: quamvis lapis omnia nudus,  
Limosoque palus obducit pascua junco:  
Non insueta graves tentabunt pabula factas,  
Nec mala vicini pecoris contagia cadent.  
Fortunate senex, hic inter flumina notæ,  
Et fontes sacros, frigus captabis opacum.  
Hinc tibi, quæ semper vicino ab limite sepes,  
Hyblæis apibus florem depasta salicis,  
Sæpe levi somnum suadebit intire susurro.  
Hinc altâ sub rupe canet frondator cœcæ auræ;  
Nec tamen interca rauca, tua cura, palumbes,  
Nec genera ævria cessabit turtur ab ulmo.*

Happy old man! then still thy farms restored,  
Enough for thee, shall bless thy frugal board.  
What though rough stones the naked soil o'erspread,  
Or marshy bulrush rear its watery head,  
No foreign food thy teeming ewes shall fear,  
No touch contagious spread its influence here.  
Happy old man! here 'mid th' accustom'd streams  
And sacred springs, you'll shun the scorching beams;  
While from yon willow-fence, thy picture's bound,  
The bees that suck the flowery stores around,  
Shall sweetly mingle with the whispering boughs  
Their lulling murmurs, and invite repose:  
While from steep rocks the pruner's song is heard;  
Nor the soft-cooing dove, thy favourite bird,  
Meanwhile shall cease to breathe her melting strain,  
Nor turtles from th' aerial elm to plain. WARTON.

It may be observed, that these two poems were produced by events that really happened; and may, therefore, be of use to prove, that we can always feel more than we can imagine, and that the most artful fiction must give way to truth. I am, Sir, your humble servant,

DUBIUS.

*Dulcique animos novitate tenebo.*

OWN.

And with sweet novelty your soul detain.

It is often charged upon writers, that with all their pretensions to genius and discoveries, they do little more than copy one another; and that

compositions obtruded upon the world with the pomp of novelty, contain only tedious repetitions of common sentiments, or at best exhibit a transposition of known images, and give a new appearance to truth only by some slight difference of dress and decoration.

The allegation of resemblance between authors is indisputably true; but the charge of plagiarism, which is raised upon it, is not to be allowed with equal readiness. A coincidence of sentiment may easily happen without any communication, since there are many occasions in which all reasonable men will nearly think alike. Writers of all ages have had the same sentiments, because they have in all ages had the same objects of speculation; the interests and passions, the virtues and vices of mankind, have been diversified in different times, only by unessential and casual varieties: and we must, therefore, expect in the works of all those who attempt to describe them, such a likeness as we find in the pictures of the same person drawn in different periods of his life.

It is necessary, therefore, that before an author be charged with plagiarism, one of the most reproachful, though perhaps not the most atrocious, of literary crimes, the subject on which he treats should be carefully considered. We do not wonder, that historians, relating the same facts, agree in their narration; or that authors, delivering the elements of science, advance the same theorems, and lay down the same definitions: yet it is not wholly without use to mankind, that books are multiplied, and that different authors lay out their labours on the same subject; for there will always be some reason why one should on particular occasions, or to particular persons, be preferable to another; some will be clear where others are obscure, some will please by their style and others by their method, some by their embellishments and others by their simplicity, some by closeness and others by diffusion.

The same indulgence is to be shown to the writers of morality: right and wrong are immutable; and those, therefore, who teach us to distinguish them, if they all teach us right, must agree with one another. The relations of social life, and the duties resulting from them, must be the same at all times and in all nations: some petty differences may be, indeed, produced, by forms of government or arbitrary customs; but the general doctrine can receive no alteration.

Yet it is not to be desired, that morality should be considered as interdicted to all future writers; men will always be tempted to deviate from their duty, and will, therefore, always want a monitor to recall them: and a new book often seizes the attention of the public without any other claim than that it is new. There is likewise in composition, as in other things, a per-

petual vicissitude of fashion; and truth is recommended at one time to regard, by appearances which at another would expose it to neglect; the author, therefore, who has judgment to discern the taste of his contemporaries, and skill to gratify it, will have always an opportunity to deserve well of mankind, by conveying instruction to them in a grateful vehicle.

There are likewise many modes of composition, by which a moralist may deserve the name of an original writer: he may familiarize his system by dialogues after the manner of the ancients, or subtilize it into a series of syllogistic arguments: he may enforce his doctrine by seriousness and solemnity, or enliven it by sprightliness and gayety: he may deliver his sentiments in naked precepts, or illustrate them by historical examples: he may detain the studious by the artful concatenation of a continued discourse, or relieve the busy by short strictures, and unconnected essays.

To excel in any of these forms of writing will require a particular cultivation of the genius: whoever can attain to excellence, will be certain to engage a set of readers, whom no other method would have equally allured; and he that communicates truth with success, must be numbered among the first benefactors to mankind.

The same observation may be extended likewise to the passions: their influence is uniform, and their effects nearly the same in every human breast: a man loves and hates, desires and avoids, exactly like his neighbour; resentment and ambition, avarice and indolence, discover themselves by the same symptoms in minds distant a thousand years from one another.

Nothing, therefore, can be more unjust, than to charge an author with plagiarism, merely because he assigns to every cause its natural effect; and makes his personages act, as others in like circumstances have always done. There are conceptions in which all men will agree, though each derives them from his own observation: whoever has been in love, will represent a lover impatient of every idea that interrupts his meditations on his mistress, retiring to shades and solitude, that he may muse without disturbance on his approaching happiness, or associating himself with some friend that flatters his passion, and talking away the hours of absence upon his darling subject. Whoever has been so unhappy as to have felt the miseries of long-continued hatred, will, without any assistance from ancient volumes, be able to relate how the passions are kept in perpetual agitation, by the recollection of injury, and meditations of revenge; how the blood boils at the name of the enemy, and life is worn away in contrivances of mischief.

Every other passion is alike simple and limited, if it be considered only with regard to the

breast which it inhabits; the anatomy of the mind, as that of the body, must perpetually exhibit the same appearances; and though by the continued industry of successive inquirers, new movements will be from time to time discovered, they can affect only the minuter parts, and are commonly of more curiosity than importance.

It will now be natural to inquire, by what arts are the writers of the present and future ages to attract the notice and favour of mankind. They are to observe the alterations which time is always making in the modes of life, that they may gratify every generation with a picture of themselves. Thus love is uniform, but courtship is perpetually varying: the different arts of gallantry, which beauty has inspired, would of themselves be sufficient to fill a volume; sometimes balls and serenades, sometimes tournaments and adventures, have been employed to melt the hearts of ladies, who in another century have been sensible of scarce any other merit than that of riches, and listened only to jointures and pin-money. Thus the ambitious man has at all times been eager of wealth and power; but these hopes have been gratified in some countries by supplicating the people, and in others, by flattering the prince: honour in some states has been only the reward of military achievements, in others, it has been gained by noisy turbulence, and popular clamours. Avarice has worn a different form, as she actuated the usurer of Rome, and the stockjobber of England; and idleness itself, how little soever inclined to the trouble of invention, has been forced from time to time to change its amusements, and contrive different methods of wearing out the day.

Here then is the fund, from which those who study mankind may fill their compositions with an inexhaustible variety of images and allusions; and he must be confessed to look with little attention upon scenes thus perpetually changing, who cannot catch some of the figures before they are made vulgar by reiterated descriptions.

It has been discovered by Sir Isaac Newton, that the distinct and primogenial colours are only seven; but every eye can witness, that from various mixtures, in various proportions, infinite diversifications of tints may be produced. In like manner, the passions of the mind, which put the world in motion, and produce all the bustle and eagerness of the busy crowds that swarm upon the earth; the passions, from whence arise all the pleasures and pains that we see and hear of, if we analyze the mind of man, are very few: but those few agitated and combined, as external causes shall happen to operate, and modified by prevailing opinions and accidental caprices, make such frequent alterations on the surface of life, that the show, while we are busied in delineating it, vanishes from the view, and a new set of objects succeed, doomed to the same shortness of duration with the former: thus curiosity may

always find employment, and the busy part of mankind will furnish the contemplative with the materials of speculation, to the end of time.

The complaint, therefore, that all topics are pre-occupied, is nothing more than the murmur of ignorance or idleness, by which some discourage others, and some themselves; the mutability of mankind will always furnish writers with new images, and the luxuriance of fancy may always embellish them with new decorations.

—*Magnis tamen excidit ausis.*

OVID.

But in the glorious enterprise he died. ADDISON.

It has always been the practice of mankind, to judge of actions by the event. The same attempts, conducted in the same manner, but terminated by different success, produce different judgments: they who attain their wishes, never want celebrators of their wisdom and their virtue; and they that miscarry, are quickly discovered to have been defective not only in mental but in moral qualities. The world will never be long without some good reason to hate the unhappy; their real faults are immediately detected; and if those are not sufficient to sink them into infamy, an additional weight of calumny will be superadded: he that fails in his endeavours after wealth or power, will not long retain either honesty or courage.

This species of injustice has so long prevailed in universal practice, that it seems likewise to have infected speculation: so few minds are able to separate the ideas of greatness and prosperity, that even Sir William Temple has determined, "that he who can deserve the name of a hero, must not only be virtuous but fortunate."

By this unreasonable distribution of praise and blame, none have suffered oftener than projectors, whose rapidity of imagination, and vastness of design, raise such envy in their fellow mortals, that every eye watches for their fall, and every heart exults at their distresses: yet even a projector may gain favour by success; and the tongue that was prepared to hiss, then endeavours to excel others in loudness of applause.

When Coriolanus, in Shakspeare, deserted to Aufidius, the Volscian servants at first insulted him, even while he stood under the protection of the household gods: but when they saw that the project took effect, and the stranger was seated at the head of the table, one of them very judiciously observes, "that he always thought there was more in him than he could think."

Machiavel has justly animadverted on the dif-

ferent notice taken by all succeeding times, of the two great projectors, Catiline and Cæsar. Both formed the same project, and intended to raise themselves to power, by subverting the commonwealth: they pursued their design, perhaps, with equal abilities, and with equal virtue; but Catiline perished in the field, and Cæsar returned from Pharsalia with unlimited authority: and from that time, every monarch of the earth has thought himself honoured by a comparison with Cæsar; and Catiline has been never mentioned, but that his name might be applied to traitors and incendiaries.

In an age more remote, Xerxes projected the conquest of Greece, and brought down the power of Asia against it: but after the world had been filled with expectation and terror, his army was beaten, his fleet was destroyed, and Xerxes has been never mentioned without contempt.

A few years afterwards, Greece likewise had her turn of giving birth to a projector; who, invading Asia with a small army, went forward in search of adventures, and by his escape from one danger, gained only more rashness to rush into another: he stormed city after city, overran kingdom after kingdom, fought battles only for barren victory, and invaded nations only that he might make his way through them to new invasions: but having been fortunate in the execution of his projects, he died with the name of Alexander the Great.

These are, indeed, events of ancient times; but human nature is always the same, and every age will afford us instances of public censures influenced by events. The great business of the middle centuries, was the holy war; which undoubtedly was a noble project, and was for a long time prosecuted with a spirit equal to that with which it had been contrived; but the ardour of the European heroes only hurried them to destruction; for a long time they could not gain the territories for which they fought, and, when at last gained, they could not keep them: their expeditions, therefore, have been the scoff of idleness and ignorance, their understanding and their virtue have been equally vilified, their conduct has been ridiculed, and their cause has been defamed.

When Columbus had engaged king Ferdinand in the discovery of the other hemisphere, the sailors with whom he embarked in the expedition had so little confidence in their commander, that after having been long at sea looking for coasts which they expected never to find, they raised a general mutiny, and demanded to return. He found means to soothe them into a permission to continue the same course three days longer, and on the evening of the third day descried land. Had the impatience of his crew denied him a few hours of the time requested, what had been his fate, but to have come back

with the infamy of a vain projector, who had betrayed the king's credulity to useless expenses, and risked his life in seeking countries that had no existence? how would those that had rejected his proposals, have triumphed in their acuteness! and when would his name have been mentioned, but with the makers of potable gold and malleable glass?

The last royal projectors with whom the world has been troubled, were Charles of Sweden, and the Czar of Muscovy. Charles, if any judgment may be formed of his designs by his measures and his inquiries, had purposed first to dethrone the Czar, then to lead his army through pathless deserts into China, thence to make his way by the sword through the whole circuit of Asia, and by the conquest of Turkey to unite Sweden with his new dominions: but this mighty project was crushed at Pultowa; and Charles has since been considered as a madman by those powers, who sent their ambassadors to solicit his friendship, and their generals "to learn under him the art of war."

The Czar found employment sufficient in his own dominions, and amused himself in digging canals, and building cities; murdering his subjects with insufferable fatigues, and transplanting nations from one corner of his dominions to another, without regretting the thousands that perished on the way: but he attained his end, he made his people formidable, and is numbered by fame among the demi-gods.

I am far from intending to vindicate the sanguinary projects of heroes and conquerors, and would wish rather to diminish the reputation of their success, than the infamy of their miscarriages: for I cannot conceive, why he that has burned cities, wasted nations, and filled the world with horror and desolation, should be more kindly regarded by mankind, than he who died in the rudiments of wickedness; why he that accomplished wickedness should be glorious, and he that only endeavoured it should be criminal. I would wish Cæsar and Catiline, Xerxes and Alexander, Charles and Peter, huddled together in obscurity or detestation.

But there is another species of projectors, to whom I would willingly conciliate mankind; whose ends are generally laudable, and whose labours are innocent; who are searching out new powers of nature, or contriving new works of art; but who are yet persecuted with incessant obloquy, and whom the universal contempt with which they are treated, often debars from that success which their industry would obtain, if it were permitted to act without opposition.

They who find themselves inclined to censure new undertakings, only because they are new, should consider, that the folly of projection is very seldom the folly of a fool; it is commonly the ebullition of a capacious mind, crowded with variety of knowledge, and heated with in-

tenseness of thought; it proceeds often from the consciousness of uncommon powers, from the confidence of those, who, having already done much, are easily persuaded that they can do more. When Rowley had completed the orrery, he attempted the perpetual motion; when Boyle had exhausted the secrets of vulgar chemistry, he turned his thoughts to the work of transmutation.

A projector generally unites those qualities which have the fairest claim to veneration, extent of knowledge, and greatness of design; it was said of Catiline, "*immoderata, incredibilia, nimis alta semper cupiebat.*" Projectors of all kinds agree in their intellects, though they differ in their morals; they all fail by attempting things, beyond their power, by despising vulgar attainments, and aspiring to performances to which perhaps nature has not proportioned the force of man; when they fail, therefore, they fail not by idleness or timidity, but by rash adventure and fruitless diligence.

That the attempts of such men will often miscarry, we may reasonably expect; yet from such men, and such only, are we to hope for the cultivation of those parts of nature which lie yet waste, and the invention of those arts which are yet wanting to the felicity of life. If they are, therefore, universally discouraged, art and discovery can make no advances. Whatever is attempted without previous certainty of success, may be considered as a project, and amongst narrow minds may, therefore, expose its author to censure and contempt; and if the liberty of laughing be once indulged, every man will laugh at what he does not understand, every project will be considered as madness, and every great or new design will be censured as a project. Men, unaccustomed to reason and researches, think every enterprise impracticable, which is extended beyond common effects, or comprises many intermediate operations. Many that presume to laugh at projectors, would consider a flight through the air in a winged chariot, and the movement of a mighty engine by the steam of water, as equally the dreams of mechanic lunacy; and would hear, with equal negligence, of the union of the Thames and Severn by a canal, and the scheme of Albuquerque, the viceroy of the Indies, who in the rage of hostility had contrived to make Egypt a barren desert, by turning the Nile into the Red Sea.

Those who have attempted much, have seldom failed to perform more than those who never deviate from the common roads of action: many valuable preparations of chemistry are supposed to have risen from unsuccessful inquiries after the grand elixir; it is, therefore, just to encourage those who endeavour to enlarge the power of art, since they often succeed beyond expectation; and when they fail, may sometimes benefit the world even by their miscarriages.

Conatus non pœniteat, votique peracti?*

JOT.

What in the conduct of our life appears  
So well design'd, so luckily begun,  
But when we have our wish, we wish undone?

DRYDEN.

## TO THE ADVENTURER.

SIR,

I HAVE been for many years a trader in London. My beginning was narrow, and my stock small. I was, therefore, a long time brow-beaten and despised by those, who, having more money, thought they had more merit than myself. I did not, however, suffer my resentment to instigate me to any mean arts of supplantation, nor my eagerness of riches to betray me to any indirect methods of gain; I pursued my business with incessant assiduity, supported by the hope of being one day richer than those who contemned me; and had, upon every annual review of my books, the satisfaction of finding my fortune increased beyond my expectation.

In a few years my industry and probity were fully recompensed; my wealth was really great, and my reputation for wealth still greater. I had large warehouses crowded with goods, and considerable sums in the public funds; I was caressed upon the Exchange by the most eminent merchants; became the oracle of the common council; was solicited to engage in all commercial undertakings; was flattered with the hopes of becoming in a short time one of the directors of a wealthy company, and, to complete my mercantile honours, enjoyed the expensive happiness of fining for sheriff.

Riches, you know, easily produce riches: when I had arrived to this degree of wealth, I had no longer any obstruction or opposition to fear; new acquisitions were hourly brought within my reach, and I continued for some years longer to heap thousands upon thousands.

At last I resolved to complete the circle of a citizen's prosperity by the purchase of an estate in the country, and to close my life in retirement. From the hour that this design entered my imagination, I found the fatigues of my employment every day more oppressive, and persuaded myself that I was no longer equal to perpetual attention, and that my health would soon be destroyed by the torment and distraction of extensive business. I could image to myself no happiness, but in vacant jollity, and uninterrupted leisure; nor entertain my friends with any other topic, than the vexation and uncertainty of trade, and the happiness of rural privacy.

But notwithstanding these declarations, I

could not at once reconcile myself to the thoughts of ceasing to get money; and though I was every day inquiring for a purchase, I found some reason for rejecting all that were offered me; and, indeed, had accumulated so many beauties and conveniences in my idea of the spot where I was finally to be happy, that, perhaps, the world might have been travelled over without discovery of a place which would not have been defective in some particular.

Thus I went on, still talking of retirement, and still refusing to retire; my friends began to laugh at my delays, and I grew ashamed to trifle longer with my own inclinations; an estate was at length purchased, I transferred my stock to a prudent young man who had married my daughter, went down into the country, and commenced lord of a spacious manor.

Here for some time, I found happiness equal to my expectation. I reformed the old house according to the advice of the best architects, I threw down the walls of the garden, and enclosed it with palisades, planted long avenues of trees, filled a greenhouse with exotic plants, dug a new canal, and threw the earth into the old moat.

The fame of these expensive improvements brought in all the country to see the show. I entertained my visitors with great liberality, led them round my gardens, showed them my apartments, laid before them plans for new decorations, and was gratified by the wonder of some and the envy of others.

I was envied; but how little can one man judge of the condition of another! The time was now coming, in which affluence and splendour could no longer make me pleased with myself. I had built till the imagination of the architect was exhausted; I had added one convenience to another, till I knew not what more to wish or to design; I had laid out my gardens, planted my park, and completed my waterworks; and what now remained to be done? what, but to look up to turrets, of which, when they were once raised I had no further use, to range over apartments where time was tarnishing the furniture, to stand by the cascade of which I scarcely now perceived the sound, and to watch the growth of woods that must give their shade to a distant generation.

In this gloomy inactivity, is every day begun and ended: the happiness that I have been so long procuring is now at an end, because it has been procured; I wander from room to room, till I am weary of myself; I ride out to a neighbouring hill in the centre of my estate, from whence all my lands lie in prospect around me; I see nothing that I have not seen before, and return home disappointed, though I knew that I had nothing to expect.

In my happy days of business I had been accustomed to rise early in the morning: and re-

member the time when I grieved that the night came so soon upon me, and obliged me, for a few hours, to shut out affluence and prosperity. I now seldom see the rising sun, but to "tell him," with the fallen angel, "how I hate his beams." I awake from sleep as to languor or imprisonment, and have no employment for the first hour but to consider by what art I shall rid myself of the second. I protract the breakfast as long as I can, because when it is ended I have no call for my attention, till I can with some degree of decency grow impatient for my dinner. If I could dine all my life, I should be happy; I eat not because I am hungry, but because I am idle: but, alas! the time quickly comes when I can eat no longer; and so ill does my constitution second my inclination, that I cannot bear strong liquors; seven hours must then be endured, before I shall sup; but supper comes at last, the more welcome as it is in a short time succeeded by sleep.

Such, Mr. Adventurer, is the happiness, the hope of which seduced me from the duties of a mercantile life. I shall be told by those who read my narrative, that there are many means of innocent amusement, and many schemes of useful employment, which I do not appear ever to have known; and that nature and art have provided pleasures by which, without the drudgery of settled business, the active may be engaged, the solitary soothed, and the social entertained.

These arts, Sir, I have tried. When first I took possession of my estate, in conformity to the taste of my neighbours, I bought guns and nets, filled my kennel with dogs, and my stable with horses: but a little experience showed me, that these instruments of rural felicity would afford me few gratifications. I never shot but to miss the mark, and, to confess the truth, was afraid of the fire of my own gun. I could discover no music in the cry of the dogs, nor could divest myself of pity for the animal whose peaceful and inoffensive life was sacrificed to our sport. I was not, indeed, always at leisure to reflect upon her danger; for my horse, who had been bred to the chase, did not always regard my choice either of speed or way, but leaped hedges and ditches at his own discretion, and hurried me along with the dogs, to the great diversion of my brother sportsmen. His eagerness of pursuit once incited him to swim a river; and I had leisure to resolve in the water, that I would never hazard my life again for the destruction of a hare.

I then ordered books to be procured, and by the direction of the vicar had in a few weeks, a closet elegantly furnished. You will, perhaps, be surprised when I shall tell you, that when once I had ranged them according to their sizes, and piled them up in regular gradations, I had received all the pleasure which they could give

me. I am not able to excite in myself any curiosity after events which have been long passed, and in which I can therefore have no interest; I am utterly unconcerned to know whether Tully or Demosthenes excelled in oratory, whether Hannibal lost Italy by his own negligence or the corruption of his countrymen. I have no skill in controversial learning, nor can conceive why so many volumes should have been written upon questions, which I have lived so long and so happily without understanding. I once resolved to go through the volumes relating to the office of justice of the peace, but found them so crabbed and intricate, that in less than a month I desisted in despair, and resolved to supply my deficiencies by paying a competent salary to a skilful clerk.

I am naturally inclined to hospitality, and for some time kept up a constant intercourse of visits with the neighbouring gentlemen; but though they are easily brought about me by better wine than they can find at any other house, I am not much relieved by their conversation; they have no skill in commerce or the stocks, and I have no knowledge of the history of families or the factions of the country; so that when the first civilities are over, they usually talk to one another, and I am left alone in the midst of the company. Though I cannot drink myself, I am obliged to encourage the circulation of the glass; their mirth grows more turbulent and obstreperous; and before their merriment is at an end, I am sick with disgust, and perhaps reproached with my sobriety, or by some sly insinuations insulted as a cit.

Such, Mr. Adventurer, is the life to which I am condemned by a foolish endeavour to be happy by imitation; such is the happiness to which I pleased myself with approaching, and which I considered as the chief end of my cares and my labours. I toiled year after year with cheerfulness, in expectation of the happy hour in which I might be idle: the privilege of happiness is attained, but has not brought with it the blessing of tranquillity. I am yours, &c.

MERCATOR.

No. 107.] TUESDAY, NOV. 13, 1753.

*Sub judice lis est.*—

HOR.

And of their vain disputings find no end. FRANCIS.

It has been sometimes asked by those who find the appearance of wisdom more easily attained by questions than solutions, how it comes to pass, that the world is divided by such difference of opinion; and why men, equally reasonable, and equally lovers of truth, do not always think in the same manner?

With regard to simple propositions, where the terms are understood, and the whole subject is comprehended at once, there is such a uniformity of sentiment among all human beings, that, for many ages, a very numerous set of notions were supposed to be innate, or necessarily coexistent with the faculty of reason; it being imagined, that universal agreement could proceed only from the invariable dictates of the universal parent.

In questions diffuse and compounded, this similarity of determination is no longer to be expected. At our first sally into the intellectual world, we all march together along one straight and open road; but as we proceed further, and wider prospects open to our view, every eye fixes upon a different scene; we divide into various paths, and, as we move forward, are still at a greater distance from each other. As a question becomes more complicated and involved, and extends to a greater number of relations, disagreement of opinion will always be multiplied; not because we are irrational, but because we are finite beings, furnished with different kinds of knowledge, exerting different degrees of attention, one discovering consequences which escape another, none taking in the whole concatenation of causes and effects, and most comprehending but a very small part, each comparing what he observes with a different criterion, and each referring it to a different purpose.

Where, then, is the wonder, that they who see only a small part, should judge erroneously of the whole? or that they, who see different and dissimilar parts, should judge differently from each other?

Whatever has various respects, must have various appearances of good and evil, beauty or deformity; thus the gardener tears up as a weed, the plant which the physician gathers as a medicine; and "a general," says Sir Kenelm Digby, "will look with pleasure over a plain, as a fit place on which the fate of empires might be decided in battle, which the farmer will despise as bleak and barren, neither fruitful of pasturage, nor fit for tillage."

Two men examining the same question, proceed commonly like the physician and gardener in selecting herbs, or the farmer and hero looking on the plain; they bring minds impressed with different notions, and direct their inquiries to different ends; they form, therefore, contrary conclusions, and each wonders at the other's absurdity.

We have less reason to be surprised or offended when we find others differ from us in opinion, because we very often differ from ourselves. How often we alter our minds, we do not always remark; because the change is sometimes made imperceptibly and gradually, and the last conviction effaces all memory of the former: yet every man accustomed from time

to time to take a survey of his own notions, will, by a slight retrospection, be able to discover, that his mind has suffered many revolutions; that the same things have in the several parts of his life been condemned and approved, pursued and shunned: and that on many occasions, even when his practice has been steady, his mind has been wavering, and he has persisted in a scheme of action, rather because he feared the censure of inconstancy, than because he was always pleased with his own choice.

Of the different faces shown by the same objects, as they are viewed on opposite sides, and of the different inclinations which they must constantly raise in him that contemplates them, a more striking example cannot easily be found than two Greek epigrammatists will afford us in their accounts of human life, which I shall lay before the reader in English prose.

Posidippus, a comic poet, utters this complaint: "Through which of the paths of life is it eligible to pass? In public assemblies are debates and troublesome affairs: domestic privacies are haunted with anxieties; in the country is labour; on the sea is terror: in a foreign land, he that has money must live in fear, he that wants it must pine in distress: are you married? you are troubled with suspicions; are you single? you languish in solitude; children occasion toil, and a childless life is a state of destitution: the time of youth is a time of folly, and gray hairs are loaded with infirmity. This choice only, therefore, can be made, either never to receive being, or immediately to lose it."

Such and so gloomy is the prospect which Posidippus has laid before us. But we are not to acquiesce too hastily in his determination against the value of existence: for Metrodorus, a philosopher of Athens, has shown, that life has pleasures as well as pains; and having exhibited the present state of man in brighter colours, draws with equal appearance of reason, a contrary conclusion.

"You may pass well through any of the paths of life. In public assemblies are honours and transactions of wisdom: in domestic privacy is stillness and quiet: in the country are the beauties of nature: on the sea is the hope of gain: in a foreign land, he that is rich is honoured, he that is poor may keep his poverty secret: are you married? you have a cheerful house; are you single? you are unincumbered; children are objects of affection, to be without children is to be without care: the time of youth is the time of vigour, and gray hairs are made venerable by piety. It will, therefore, never be a wise man's choice, either not to obtain existence, or to lose it; for every state of life has its felicity."

In these epigrams are included most of the questions which have engaged the speculations of the inquirers after happiness; and though they will not much assist our determinations, they

may, perhaps, equally promote our quiet, by showing that no absolute determination ever can be formed.

Whether a public station, or private life, be desirable, has always been debated. We see here both the allurements and discouragements of civil employments; on one side there is trouble, on the other honour; the management of affairs is vexatious and difficult, but it is the only duty in which wisdom can be conspicuously displayed: it must then still be left to every man to choose either ease or glory; nor can any general precept be given, since no man can be happy by the prescription of another.

Thus, what is said of children by Posidippus, "that they are occasions of fatigue," and by Metrodorus, "that they are objects of affection," is equally certain; but whether they will give most pain or pleasure, must depend on their future conduct and dispositions, on many causes over which the parent can have little influence: there is, therefore, room for all the caprices of imagination, and desire must be proportioned to the hope or fear that shall happen to predominate.

Such is the uncertainty in which we are always likely to remain with regard to questions wherein we have most interest, and which every day affords us fresh opportunity to examine: we may examine, indeed, but we never can decide, because our faculties are unequal to the subject: we see a little, and form an opinion; we see more, and change it.

This inconstancy and unsteadiness, to which we must so often find ourselves liable, ought certainly to teach us moderation and forbearance towards those who cannot accommodate themselves to our sentiments: if they are deceived, we have no right to attribute their mistake to obstinacy or negligence, because we likewise have been mistaken; we may, perhaps, again change our own opinion: and what excuse shall we be able to find for aversion and malignity conceived against him, whom we shall then find to have committed no fault, and who offended us only by refusing to follow us into error?

It may likewise contribute to soften that resentment which pride naturally raises against opposition, if we consider, that he who differs from us, does not always contradict us; he has one view of an object, and we have another; each describes what he sees with equal fidelity, and each regulates his steps by his own eyes: one man, with Posidippus, looks on celibacy as a state of gloomy solitude, without a partner in joy, or a comforter in sorrow; the other considers it, with Metrodorus, as a state free from incumbrances, in which a man is at liberty to choose his own gratifications, to remove from place to place in quest of pleasure, and to think of nothing but merriment and diversion: full of these notions one hastens to choose a wife, and

the other laughs at his rashness, or pities his ignorance; yet it is possible that each is right, but that each is right only for himself.

Life is not the object of science: we see a little, very little; and what is beyond we only can conjecture. If we inquire of those who have gone before us, we receive small satisfaction; some have travelled life without observation, and some willingly mislead us. The only thought, therefore, on which we can repose with comfort, is that which presents to us the care of Providence, whose eye takes in the whole of things, and under whose direction all involuntary errors will terminate in happiness.

No. 108.] SATURDAY, NOVEMBER 17, 1753.

*Nobis, cum simul occidit crevit lux,  
Nox est perpetua una dormienda.*

CATULLUS.

When once the short-lived mortal dies,  
A night eternal seals his eyes.

ADDISON.

It may have been observed by every reader, that there are certain topics which never are exhausted. Of some images and sentiments the mind of man may be said to be enamoured; it meets them, however often they occur, with the same ardour which a lover feels at the sight of his mistress, and parts from them with the same regret when they can no longer be enjoyed.

Of this kind are many descriptions which the poets have transcribed from each other, and their successors will probably copy to the end of time; which will continue to engage, or as the French term it, to flatter the imagination, as long as human nature shall remain the same.

When a poet mentions the spring, we know that the zephyrs are about to whisper, that the groves are to recover their verdure, the linnets to warble forth their notes of love, and the flocks and herds to frisk over vales painted with flowers: yet, who is there so insensible of the beauties of nature, so little delighted with the renovation of the world, as not to feel his heart bound at the mention of the spring?

When night overshadows a romantic scene, all is stillness, silence, and quiet; the poets of the grove cease their melody, the moon towers over the world in gentle majesty, men forget their labours, and their cares, and every passion and pursuit is for a while suspended. All this we know already, yet we hear it repeated without weariness; because such is generally the life of man, that he is pleased to think on the time when he shall pause from a sense of his condition.

When a poetical grove invites us to its covert, we know that we shall find what we have already

seen, a limpid brook murmuring over pebbles, a bank diversified with flowers, a green arch that excludes the sun, and a natural grot shaded with myrtles; yet who can forbear to enter the pleasing gloom, to enjoy coolness and privacy, and gratify himself once more by scenes with which nature has formed him to be delighted?

Many moral sentiments likewise are so adapted to our state, that they find approbation whenever they solicit it, and are seldom read without exciting a gentle emotion in the mind: such is the comparison of the life of man with the duration of a flower, a thought which perhaps every nation has heard warbled in its own language, from the inspired poets of the Hebrews to our own times; yet this comparison must always please, because every heart feels its justness, and every hour confirms it by example.

Such, likewise, is the precept that directs us to use the present hour, and refer nothing to a distant time, which we are uncertain whether we shall reach: this every moralist may venture to inculcate, because it will always be approved, and because it is always forgotten.

This rule is, indeed, every day enforced, by arguments more powerful than the dissertations of moralists: we see men pleasing themselves with future happiness, fixing a certain hour for the completion of their wishes, and perishing some at a greater and some at a less distance from the happy time; all complaining of their disappointments, and lamenting that they had suffered the years which Heaven allowed them, to pass without improvement, and deferred the principal purpose of their lives to the time when life itself was to forsake them.

It is not only uncertain, whether, through all the casualties and dangers which beset the life of man, we shall be able to reach the time appointed for happiness or wisdom; but it is likely, that whatever now hinders us from doing that which our reason and conscience declare necessary to be done, will equally obstruct us in times to come. It is easy for the imagination, operating on things not yet existing, to please itself with scenes of unmingled felicity, or plan out courses of uniform virtue; but good and evil are in real life inseparably united; habits grow stronger by indulgence; and reason loses her dignity, in proportion as she has oftener yielded to temptation: "he that cannot live well today," says Martial, "will be less qualified to live well to-morrow."

Of the uncertainty of every human good, every human being seems to be convinced; yet this uncertainty is voluntarily increased by unnecessary delay, whether we respect external causes, or consider the nature of our own minds. He that now feels a desire to do right, and wishes to regulate his life according to his reason, is not sure that, at any future time assignable, he

shall be able to rekindle the same ardour; he that has now an opportunity offered him of breaking loose from vice and folly, cannot know, but that he shall hereafter be more entangled, and struggle for freedom without obtaining it.

We are so unwilling to believe any thing to our own disadvantage, that we will always imagine the perspicacity of our judgment and the strength of our resolution more likely to increase than to grow less by time; and, therefore, conclude, that the will to pursue laudable purposes, will be always seconded by the power.

But, however we may be deceived in calculating the strength of our faculties, we cannot doubt the uncertainty of that life in which they must be employed: we see every day the unexpected death of our friends and our enemies, we see new graves hourly opened for men older and younger than ourselves, for the cautious and the careless, the dissolute and the temperate, for men who, like us, were providing to enjoy or improve hours now irreversibly cut off: we see all this, and yet, instead of living, let year glide after year in preparations to live.

Men are so frequently cut off in the midst of their projections, that sudden death causes little emotion in them that behold it, unless it be impressed upon the attention by uncommon circumstances. I, like every other man, have outlived multitudes, have seen ambition sink in its triumphs, and beauty perish in its bloom; but have been seldom so much affected as by the fate of Euryalus, whom I lately lost as I began to love him.

Euryalus had for some time flourished in a lucrative profession; but having suffered his imagination to be fired by an unextinguishable curiosity, he grew weary of the same dull round of life, resolved to harass himself no longer with the drudgery of getting money, but to quit his business and his profit, and enjoy for a few years the pleasures of travel. His friends heard him proclaim his resolution without suspecting that he intended to pursue it: but he was constant to his purpose, and with great expedition closed his accounts and sold his moveables, passed a few days in bidding farewell to his companions, and with all the eagerness of romantic chivalry, crossed the sea in search of happiness. Whatever place was renowned in ancient or modern history, whatever region art or nature had distinguished, he determined to visit: full of design and hope, he landed on the continent; his friends expected accounts from him of the new scenes that opened in his progress, but were informed in a few days, that Euryalus was dead.

Such was the end of Euryalus. He is entered that state whence none ever shall return; and can now only benefit his friends, by remaining to their memories a permanent and efficacious instance of the blindness of desire, and the uncertainty of all terrestrial good. But perhaps

every man has, like me, lost an Euryalus, has known a friend die with happiness in his grasp; and yet every man continues to think himself secure of life, and defers to some future time of leisure what he knows it will be fatal to have finally omitted.

It is, indeed, with this as with other frailties inherent in our nature; the desire of deferring to another time, what cannot be done without endurance of some pain, or forbearance of some pleasure, will, perhaps, never be totally overcome or suppressed; there will always be something that we shall wish to have finished, and be nevertheless unwilling to begin: but against this unwillingness it is our duty to struggle, and every conquest over our passions will make way for an easier conquest: custom is equally forcible to bad and good; nature will always be at variance with reason, but will rebel more feebly as she is oftener subdued.

The common neglect of the present hour is more shameful and criminal, as no man is betrayed to it by error, but admits it by negligence. Of the instability of life, the weakest understanding never thinks wrong, though the strongest often omits to think justly: reason and experience are always ready to inform us of our real state; but we refuse to listen to their suggestions, because we feel our hearts unwilling to obey them: but, surely, nothing is more unworthy of a reasonable being, than to shut his eyes, when he sees the road which he is commanded to travel, that he may deviate with fewer reproaches from himself: nor could any motive to tenderness, except the consciousness that we have all been guilty of the same fault, dispose us to pity those who thus consign themselves to voluntary ruin.

No. 111.] TUESDAY, Nov. 27, 1753.

Quæ non fecimus ipsi,  
Fia ea nostra voco.

OVID.

The deeds of long descended ancestors  
Are but by grace of imputation ours.

DRYDEN.

The evils inseparably annexed to the present condition of man, are so numerous and afflictive, that it has been, from age to age, the task of some to bewail, and of others to solace them, and he, therefore, will be in danger of seeming a common enemy, who shall attempt to depreciate the few pleasures and felicities which nature has allowed us.

Yet I will confess, that I have sometimes employed my thoughts in examining the pretensions that are made to happiness, by the splendid and envied condition of life; and have not thought the hour unprofitably spent, when I have de-

tected the imposture of counterfeit advantages, and found disquiet lurking under false appearances of gayety and greatness.

It is asserted by a tragic poet, that "*est miser nemo nisi comparatus*," "no man is miserable, but as he is compared with others happier than himself:" this position is not strictly and philosophically true. He might have said, with rigorous propriety, that no man is happy but as he is compared with the miserable; for such is the state of this world, that we find in it absolute misery, but happiness only comparative; we may incur as much pain as we can possibly endure, though we can never obtain as much happiness as we might possibly enjoy.

Yet it is certain likewise, that many of our miseries are merely comparative: we are often made unhappy, not by the presence of any real evil, but by the absence of some fictitious good; of something which is not required by any real want of nature, which has not in itself any power of gratification, and which neither reason nor fancy would have prompted us to wish, did we not see it in the possession of others.

For a mind diseased with vain longings after unattainable advantages, no medicine can be prescribed, but an impartial inquiry into the real worth of that which is so ardently desired. It is well known, how much the mind, as well as the eye, is deceived by distance; and, perhaps, it will be found, that of many imagined blessings it may be doubted, whether he that wants or possesses them has more reason to be satisfied with his lot.

The dignity of high birth and long extraction, no man, to whom nature has denied it, can confer upon himself; and, therefore, it deserves to be considered, whether the want of that which can never be gained, may not easily be endured. It is true, that if we consider the triumph and delight with which most of those recount their ancestors, who have ancestors to recount, and the artifices by which some who have risen to unexpected fortune endeavour to insert themselves into an honourable stem, we shall be inclined to fancy that wisdom or virtue may be had by inheritance, or that all the excellences of a line of progenitors are accumulated on their descendant. Reason, indeed, will soon inform us, that our estimation of birth is arbitrary and capricious, and that dead ancestors can have no influence but upon imagination: let it then be examined, whether one dream may not operate in the place of another; whether he that owes nothing to forefathers, may not receive equal pleasure from the consciousness of owing all to himself; whether he may not, with a little meditation, find it more honourable to found than to continue a family, and to gain dignity than transmit it; whether, if he receives no dignity from the virtues of his family, he does not likewise escape the danger of being disgraced by their

crimes; and whether he that brings a new name into the world, has not the convenience of playing the game of life without a stake, and opportunity of winning much though he has nothing to lose.

There is another opinion concerning happiness, which approaches much more nearly to universality, but which may, perhaps, with equal reason be disputed. The pretensions to ancestral honours many of the sons of earth easily see to be ill-grounded; but all agree to celebrate the advantage of hereditary riches, and to consider those as the minions of fortune, who are wealthy from their cradles, whose estate is "*res non parva labore, sed relicta*;" "the acquisition of another, not of themselves;" and whom a father's industry has dispensed from a laborious attention to arts or commerce, and left at liberty to dispose of life as fancy shall direct them.

If every man were wise and virtuous, capable to discern the best use of time, and resolute to practise it, it might be granted, I think, without hesitation, that total liberty would be a blessing; and that it would be desirable to be left at large to the exercise of religious and social duties, without the interruption of importunate avocations.

But, since felicity is relative, and that which is the means of happiness to one man may be to another the cause of misery, we are to consider, what state is best adapted to human nature in its present degeneracy and frailty. And, surely, to far the greater number it is highly expedient, that they should by some settled scheme of duties be rescued from the tyranny of caprice, that they should be driven on by necessity through the paths of life with their attention confined to a stated task, that they may be less at leisure to deviate into mischief at the call of folly.

When we observe the lives of those whom an ample inheritance has let loose to their own direction, what do we discover that can excite our envy? Their time seems not to pass with much applause from others, or satisfaction to themselves: many squander their exuberance of fortune in luxury and debauchery, and have no other use of money than to inflame their passions, and riot in a wide range of licentiousness; others, less criminal indeed, but surely not much to be praised, lie down to sleep, and rise up to trifle, are employed every morning in finding expedients to rid themselves of the day, chase pleasure through all the places of public resort, fly from London to Bath, and from Bath to London, without any other reason for changing place, but that they go in quest of company as idle and as vagrant as themselves, always endeavouring to raise some new desire, that they may have something to pursue, to kindle some hope which they know will be disappointed, changing one amusement for another which a few months will make equally insipid,

or sinking into languor and disease for want of something to actuate their bodies or exhilarate their minds.

Whoever has frequented those places, where idlers assemble to escape from solitude, knows that this is generally the state of the wealthy; and from this state it is no great hardship to be debarred. No man can be happy in total idleness: he that should be condemned to lie torpid and motionless, "would fly for recreation," says South, "to the mines and the galleys;" and it is well, when nature or fortune finds employment for those, who would not have known how to procure it for themselves.

He, whose mind is engaged by the acquisition or improvement of a fortune, not only escapes the insipidity of indifference, and the tediousness of inactivity, but gains enjoyments wholly unknown to those, who live lazily on the toll of others; for life affords no higher pleasure than that of surmounting difficulties, passing from one step of success to another, forming new wishes, and seeing them gratified. He that labours in any great or laudable undertaking, has his fatigues first supported by hope, and afterwards rewarded by joy; he is always moving to a certain end, and when he has attained it, an end more distant invites him to a new pursuit.

It does not, indeed, always happen, that diligence is fortunate; the wisest schemes are broken by unexpected accidents; the most constant perseverance sometimes toils through life without a recompence; but labour, though unsuccessful, is more eligible than idleness; he that prosecutes a lawful purpose by lawful means, acts always with the approbation of his own reason; he is animated through the course of his endeavours by an expectation which, though not certain, he knows to be just; and is at last comforted in his disappointment, by the consciousness that he has not failed by his own fault.

That kind of life is most happy which affords us most opportunities of gaining our own esteem; and what can any man infer in his own favour from a condition to which, however prosperous, he contributed nothing, and which the vilest and weakest of the species would have obtained by the same right, had he happened to be the son of the same father?

To strive with difficulties, and to conquer them, is the highest human felicity; the next is, to strive, and deserve to conquer: but he whose life has passed without a contest, and who can boast neither success nor merit, can survey himself only as a useless filler of existence; and if he is content with his own character, must owe his satisfaction to insensibility.

Thus it appears that the satirist advised rightly, when he directed us to resign ourselves to the hands of Heaven, and to leave to superior powers the determination of our lot:

*Permitte ipsis expendere Numinibus, quid  
Conveniat nobis, rebusque sit utile nostris:  
Carior est illis homo quam sibi.*

Intrust thy fortune to the Powers above:  
Leave them to manage for thee, and to grant  
What their unerring wisdom sees thee want.  
In goodness as in greatness they excel:  
Ah! that we loved ourselves but half so well.

DRYDEN.

What state of life admits most happiness, is uncertain; but that uncertainty ought to repress the petulance of comparison, and silence the murmurs of discontent.

No. 115.] TUESDAY, DEC. 11, 1753.

*Scribimus indocti doctique.*

HOR.

All dare to write, who can or cannot read.

THEY who have attentively considered the history of mankind, know that every age has its peculiar character. At one time, no desire is felt but for military honours; every summer affords battles and sieges, and the world is filled with ravage, bloodshed, and devastation: this sanguinary fury at length subsides, and nations are divided into factions, by controversies about points that will never be decided. Men then grow weary of debate and altercation, and apply themselves to the arts of profit; trading companies are formed, manufactures improved, and navigation extended; and nothing is any longer thought on, but the increase and preservation of property, the artifices of getting money, and the pleasures of spending it.

The present age, if we consider chiefly the state of our own country, may be styled with great propriety *The Age of Authors*; for, perhaps, there never was a time in which men of all degrees of ability, of every kind of education, of every profession and employment, were posting with ardour so general to the press. The province of writing was formerly left to those, who by study, or appearance of study, were supposed to have gained knowledge unattainable by the busy part of mankind; but in these enlightened days, every man is qualified to instruct every other man: and he that beats the anvil, or guides the plough, not content with supplying corporal necessities, amuses himself in the hours of leisure with providing intellectual pleasures for his countrymen.

It may be observed, that of this, as of other evils, complaints have been made by every generation: but though it may, perhaps, be true, that at all times more have been willing than have been able to write, yet there is no reason for believing, that the dogmatical legions of the

present race were ever equalled in number by any former period: for so widely is spread the itch of literary praise, that almost every man is an author either in act or in purpose: has either bestowed his favours on the public, or withholds them, that they may be more seasonably offered, or made more worthy of acceptance.

In former times, the pen, like the sword, was considered as consigned by nature to the hands of men; the ladies contented themselves with private virtues and domestic excellence; and a female writer, like a female warrior, was considered as a kind of eccentric being, that deviated, however illustriously, from her due sphere of motion, and was, therefore, rather to be gazed at with wonder, than countenanced by imitation. But as in the times past are said to have been a nation of Amazons, who drew the bow and wielded the battle-axe, formed encampments and wasted nations, the revolution of years has now produced a generation of Amazons of the pen, who with the spirit of their predecessors have set masculine tyranny at defiance, asserted their claim to the regions of science, and seem resolved to contest the usurpation of virility.

Some, indeed, there are of both sexes, who are authors only in desire, but have not yet attained the power of executing their intentions; whose performances have not arrived at bulk sufficient to form a volume, or who have not the confidence, however impatient of nameless obscurity, to solicit openly the assistance of the printer. Among these are the innumerable correspondents of public papers, who are always offering assistance which no man will receive, and suggesting hints that are never taken, and who complain loudly of the perverseness and arrogance of authors, lament their insensibility of their own interest, and fill the coffee-houses with dark stories of performances by eminent hands, which have been offered and rejected.

To what cause this universal eagerness of writing can be properly ascribed, I have not yet been able to discover. It is said, that every art is propagated in proportion to the rewards conferred upon it; a position from which a stranger would naturally infer, that literature was now blessed with patronage far transcending the candour or munificence of the Augustan age, that the road to greatness was open to none but authors, and that by writing alone riches and honour were to be obtained.

But since it is true, that writers, like other competitors, are very little disposed to favour one another, it is not to be expected, that at a time when every man writes, any man will patronize; and accordingly, there is not one that I can recollect at present, who professes the least regard for the votaries of science, invites

the addresses of learned men, or seems to hope for reputation from any pen but his own.

The cause, therefore, of this epidemical conspiracy for the destruction of paper, must remain a secret; nor can I discover, whether we owe it to the influences of the constellations, or the intemperance of seasons: whether the long continuance of the wind at any single point, or intoxicating vapours exhaled from the earth, have turned our nobles and our peasants, our soldiers and traders, our men and women, all into wits, philosophers, and writers.

It is, indeed, of more importance to search out the cure than the cause of this intellectual malady; and he would deserve well of his country, who, instead of amusing himself with conjectural speculations, should find means of persuading the peer to inspect his steward's accounts, or repair the rural mansion of his ancestors, who could replace the tradesman behind his counter, and send back the farmer to the mattock and the flail.

General irregularities are known in time to remedy themselves. By the constitution of ancient Egypt, the priesthood was continually increasing, till at length there was no people beside themselves; the establishment was then dissolved, and the number of priests was reduced and limited. Thus among us, writers will perhaps be multiplied, till no readers will be found, and then the ambition of writing must necessarily cease.

But as it will be long before the cure is thus gradually effected, and the evil should be stopped, if it be possible, before it rises to so great a height, I could wish that both sexes would fix their thoughts upon some salutary considerations, which might repress their ardour for that reputation which not one of many thousands is fated to obtain.

Let it be deeply impressed and frequently recollected, that he who has not obtained the proper qualifications of an author, can have no excuse for the arrogance of writing, but the power of imparting to mankind something necessary to be known. A man uneducated or unlettered may sometimes start a useful thought, or make a lucky discovery, or obtain by chance some secret of nature, or some intelligence of facts, of which the most enlightened mind may be ignorant, and which it is better to reveal, though by a rude and unskilful communication, than to lose for ever by suppressing it.

But few will be justified by this plea; for of the innumerable books and pamphlets that have overflowed the nation, scarce one has made any addition to real knowledge, or contained more than a transposition of common sentiments and a repetition of common phrases.

It will be naturally inquired, when the man who feels an inclination to write, may venture

to suppose himself properly qualified; and, since every man is inclined to think well of his own intellect, by what test he may try his abilities, without hazarding the contempt or resentment of the public.

The first qualification of a writer, is a perfect knowledge of the subject which he undertakes to treat; since we cannot teach what we do not know, nor can properly undertake to instruct others while we are ourselves in want of instruction. The next requisite is, that he be master of the language in which he delivers his sentiments: if he treats of science and demonstration, that he has attained a style clear, pure, nervous, and expressive; if his topics be probable and persuasory, that he be able to recommend them by the superaddition of elegance and imagery, to display the colours of varied diction, and pour forth the music of modulated periods.

If it be again inquired, upon what principles any man shall conclude that he wants those powers, it may be readily answered, that no end is attained but by the proper means; he only can rationally presume that he understands a subject, who has read and compared the writers that have hitherto discussed it, familiarized their arguments to himself by long meditation, consulted the foundations of different systems, and separated truth from error by a rigorous examination.

In like manner, he only has a right to suppose that he can express his thoughts, whatever they are, with perspicuity or elegance, who has carefully perused the best authors, accurately noted their diversities of style, diligently selected the best modes of diction, and familiarized them by long habits of attentive practice.

No man is a rhetorician or philosopher by chance. He who knows that he undertakes to write on questions which he has never studied, may without hesitation determine, that he is about to waste his own time and that of his reader, and expose himself to the derision of those whom he aspires to instruct; he that without forming his style by the study of the best models hastens to obtrude his compositions on the public, may be certain, that whatever hope or flattery may suggest, he shall shock the learned ear with barbarisms, and contribute, wherever his work shall be received, to the deprivation of taste and the corruption of language.

By virtue's precepts to control  
The thirsty cravings of the soul,  
Is over wider realms to reign  
Unenvied monarch, than if Spain  
You could to distant Lybia join,  
And both the Carthages were thine. FRANCIS.

WHEN Socrates was asked, "which of mortal men was to be accounted nearest to the gods in happiness?" he answered, "that man who is in want of the fewest things."

In this answer, Socrates left it to be guessed by his auditors, whether, by the exemption from want which was to constitute happiness, he meant amplitude of possessions or contraction of desire. And, indeed, there is so little difference between them, that Alexander the Great confessed the inhabitant of a tub the next man to the master of the world; and left a declaration to future ages, that if he was not Alexander, he should wish to be Diogenes.

These two states, however, though they resemble each other in their consequence, differ widely with respect to the facility with which they may be attained. To make great acquisitions can happen to very few; and in the uncertainty of human affairs, to many it will be incident to labour without reward, and to lose what they already possess by endeavours to make it more: some will always want abilities, and others opportunities to accumulate wealth. It is therefore happy, that nature has allowed us a more certain and easy road to plenty; every man may grow rich by contracting his wishes, and by quiet acquiescence in what has been given him, supply the absence of more.

Yet so far is almost every man from emulating the happiness of the gods, by any other means than grasping at their power, that it seems to be the great business of life to create wants as fast as they are satisfied. It has been long observed by moralists, that every man squanders or loses a great part of that life, of which every man knows and deprecates the shortness: and it may be remarked with equal justice, that though every man laments his own insufficiency to his happiness, and knows himself a necessitous and precarious being, incessantly soliciting the assistance of others, and feeling wants which his own art or strength cannot supply; yet there is no man, who does not, by the superaddition of unnatural cares, render himself still more dependent; who does not create an artificial poverty, and suffer himself to feel pain for the want of that, of which, when it is gained, he can have no enjoyment.

It must, indeed, be allowed, that as we lose part of our time because it steals away silent and invisible, and many an hour is passed before we recollect that it is passing; so unnatural desires insinuate themselves unobserved into the mind, and we do not perceive that they are gaining upon us, till the pain which they give us awakens

*Lætis regnes avidum domando  
Spirítum, quam sí Lybiam remotâ  
Gadiâs jungas, et utrique Pannus  
Serviat uni.*

Hon.

us to notice. No man is sufficiently vigilant to take account of every minute of his life, or to watch every motion of his heart. Much of our time likewise is sacrificed to custom : we trifle, because we see others trifle ; in the same manner we catch from example the contagion of desire ; we see all about us busied in pursuit of imaginary good, and begin to bustle in the same chase, lest greater activity should triumph over us.

It is true that to man as a member of society, many things become necessary, which, perhaps, in a state of nature are superfluous ; and that many things not absolutely necessary, are yet so useful and convenient, that they cannot easily be spared. I will make yet a more ample and liberal concession. In opulent states, and regular governments, the temptations to wealth and rank, and to the distinctions that follow them, are such as no force of understanding finds it easy to resist.

If, therefore, I saw the quiet of life disturbed only by endeavours after wealth and honour ; by solicitude, which the world, whether justly or not, considered as important ; I should scarcely have had courage to inculcate any precepts of moderation and forbearance. He that is engaged in a pursuit, in which all mankind profess to be his rivals, is supported by the authority of all mankind in the prosecution of his design, and will, therefore, scarcely stop to hear the lectures of a solitary philosopher. Nor am I certain, that the accumulation of honest gain ought to be hindered, or the ambition of just honours always to be repressed. Whatever can enable the possessor to confer any benefit upon others, may be desired upon virtuous principles ; and we ought not too rashly to accuse any man of intending to confine the influence of his acquisitions to himself.

But if we look round upon mankind, whom shall we find among these that fortune permits to form their own manners, that is not tormenting himself with a wish for something, of which all the pleasure and all the benefit will cease at the moment of attainment ? One man is beggaring his posterity to build a house, which when finished he never will inhabit ; another is levelling mountains to open a prospect, which when he has enjoyed it, he can enjoy no more ; another is painting ceilings, carving wainscot, and filling his apartments with costly furniture, only that some neighbouring house may not be richer or finer than his own.

That splendour and elegance are not desirable, I am not so abstracted from life as to inculcate ; but if we inquire closely into the reason for which they are esteemed, we shall find them valued principally as evidences of wealth. Nothing, therefore, can show greater depravity of understanding, than to delight in the show when the reality is wanting ; or voluntarily to

become poor, that strangers may for a time imagine us to be rich.

But there are yet minuter objects and more trifling anxieties. Men may be found, who are kept from sleep by the want of a shell particularly variegated ; who are wasting their lives in stratagems to obtain a book in a language which they do not understand : who pine with envy at the flowers of another man's parterre ; who hover like vultures round the owner of a fossil, in hopes to plunder his cabinet at his death ; and who would not much regret to see a street in flames, if a box of medals might be scattered in the tumult.

He that imagines me to speak of these sages in terms exaggerated and hyperbolic, has conversed but little with the race of virtuosos. A slight acquaintance with their studies, and a few visits to their assemblies, would inform him, that nothing is so worthless, but that prejudice and caprice can give it value ; nor any thing of so little use, but that by indulging an idle competition or unreasonable pride, a man may make it to himself one of the necessaries of life.

Desires like these, I may surely, without incurring the censure of moroseness, advise every man to repel when they invade his mind ; or if he admits them, never to allow them any greater influence than is necessary to give petty employments the power of pleasing, and diversify the day with slight amusements.

An ardent wish, whatever be its object, will always be able to interrupt tranquillity. What we believe ourselves to want, torments us not in proportion to its real value, but according to the estimation by which we have rated it in our own minds ; in some diseases, the patient has been observed to long for food, which scarce any extremity of hunger would in health have compelled him to swallow ; but while his organs were thus depraved, the craving was irresistible, nor could any rest be obtained till it was appeased by compliance. Of the same nature are the irregular appetites of the mind : though they are often excited by trifles, they are equally disquieting with real wants ; the Roman, who wept at the death of his lamprey, felt the same degree of sorrow that extorts tears on other occasions.

Inordinate desires, of whatever kind, ought to be repressed upon a yet higher consideration ; they must be considered as enemies not only to happiness but to virtue. There are men, among those commonly reckoned the learned and the wise, who spare no stratagems to remove a competitor at an auction, who will sink the price of a rarity at the expense of truth, and whom it is not safe to trust alone in a library or cabinet. These are faults, which the fraternity seem to look upon as jocular mischiefs, or to think excused by the violence of temptation : but I shall always fear that he who accustoms himself to

fraud in little things, wants only opportunity to practise it in greater; "he that has hardened himself by killing a sheep," says Pythagoras, "will with less reluctance shed the blood of a man."

To prize every thing according to its *real* use, ought to be the aim of a rational being. There are few things which can much conduce to happiness, and, therefore, few things to be ardently desired. He that looks upon the business and bustle of the world, with the philosophy with which Socrates surveyed the fair at Athens, will turn away at last with his exclamation, "How many things are here which I do not want!"

——— *Ultima semper*  
*Expectanda dies homini, dicique beatus*  
*Ante obitum nemo supremæque funera debet.* OVID.

But no frail man, however great or high,  
Can be concluded bless'd before he die. ADDISON.

THE numerous miseries of human life have extorted in all ages a universal complaint. The wisest of men terminated all his experiments in search of happiness, by the mournful confession, that "all is vanity;" and the ancient patriarchs lamented, that "the days of their pilgrimage were few and evil."

There is, indeed, no topic on which it is more superfluous to accumulate authorities, nor any assertion of which our own eyes will more easily discover, or our sensations more frequently impress the truth, than, that misery is the lot of man, that our present state is a state of danger and infelicity.

When we take the most distant prospect of life, what does it present us but a chaos of unhappiness, a confused and tumultuous scene of labour and contest, disappointment and defeat? If we view past ages in the reflection of history, what do they offer to our meditation but crimes and calamities? One year is distinguished by a famine, another by an earthquake: kingdoms are made desolate, sometimes by wars, and sometimes by pestilence; the peace of the world is interrupted at one time by the caprices of a tyrant, at another by the rage of the conqueror. The memory is stored only with vicissitudes of evil; and the happiness, such as it is, of one part of mankind, is found to arise commonly from sanguinary success, from victories which confer upon them the power, not so much of improving life by any new enjoyment, as of inflicting misery on others, and gratifying their own pride by comparative greatness.

But by him that examined life with a more

close attention, the happiness of the world will be found still less than it appears. In some intervals of public prosperity, or to use terms more proper, in some intermissions of calamity, a general diffusion of happiness may seem to overspread a people; all is triumph and exultation, jollity and plenty; there are no public fears and dangers, and "no complainings in the streets." But the condition of individuals is very little mended by this general calm; pain and malice and discontent still continue their havoc; the silent depredation goes incessantly forward; and the grave continues to be filled by the victims of sorrow.

He that enters a gay assembly, beholds the cheerfulness displayed in every countenance, and finds all sitting vacant and disengaged, with no other attention than to give or receive pleasure, would naturally imagine that he had reached at last the metropolis of felicity, the place sacred to gladness of heart, from whence all fear and anxiety were irreversibly excluded. Such, indeed, we may often find to be the opinion of those, who from a lower station look up to the pomp and gayety which they cannot reach; but who is there of those who frequent these luxurious assemblies, that will not confess his own uneasiness, or cannot recount the vexations and distresses that prey upon the lives of his gay companions?

The world, in its best state, is nothing more than a larger assembly of beings, combining to counterfeit happiness which they do not feel, employing every art and contrivance to embellish life, and to hide their real condition from the eyes of one another.

The species of happiness most obvious to the observation of others, is that which depends upon the goods of fortune; yet even this is often fictitious. There is in the world more poverty than is generally imagined; not only because many whose possessions are large have desires still larger, and many measure their wants by the gratifications which others enjoy: but great numbers are pressed by real necessities which it is their chief ambition to conceal, and are forced to purchase the appearance of competence and cheerfulness at the expense of many comforts and conveniences of life.

Many, however, are confessedly rich, and many more are sufficiently removed from all danger of real poverty: but it has been long ago remarked, that money cannot purchase quiet; the highest of mankind can promise themselves no exemption from that discord or suspicion, by which the sweetness of domestic retirement is destroyed; and must always be even more exposed, in the same degree as they are elevated above others, to the treachery of dependents, the calumny of defamers, and the violence of opponents.

Affliction is inseparable from our present

state; it adheres to all the inhabitants of this world, in different proportions indeed, but with an allotment which seems very little regulated by our own conduct.

It has been the boast of some swelling moralists, that every man's fortune was in his own power, that prudence supplied the place of all other divinities, and that happiness is the unfailing consequence of virtue. But, surely, the quiver of Omnipotence is stored with arrows, against which the shield of human virtue, however adamantine it has been boasted, is held up in vain: we do not always suffer by our crimes; we are not always protected by our innocence.

A good man is by no means exempt from the danger of suffering by the crimes of others; even his goodness may raise him enemies of implacable malice and restless perseverance: the good man has never been warranted by Heaven from the treachery of friends, the disobedience of children, or the dishonesty of a wife; he may see his cares made useless by profusion, his instructions defeated by perverseness, and his kindness rejected by ingratitude: he may languish under the infamy of false accusations, or perish reproachfully by an unjust sentence.

A good man is subject, like other mortals, to all the influences of natural evil; his harvest is not spared by the tempest, nor his cattle by the murrain; his house flames like others in a conflagration; nor have his ships any peculiar power of resisting hurricanes: his mind, however elevated, inhabits a body subject to innumerable casualties, of which he must always share the dangers and the pains; he bears about him the seeds of disease, and may linger away a great part of his life under the tortures of the gout or stone; at one time groaning with insufferable anguish, at another dissolved in listlessness and languor.

From this general and indiscriminate distribution of misery, the moralists have always derived one of their strongest moral arguments for a future state; for since the common events of the present life happen alike to the good and bad, it follows from the justice of the Supreme Being, that there must be another state of existence, in which a just retribution shall be made, and every man shall be happy and miserable according to his works.

The miseries of life may, perhaps, afford some proof of a future state, compared as well with the mercy as the justice of God. It is scarcely to be imagined that Infinite Benevolence would create a being capable of enjoying so much more than is here to be enjoyed, and qualified by nature to prolong pain by remembrance, and anticipate it by terror, if he was not designed for something nobler and better than a state, in which many of his faculties can serve only for his torment: in which he is to be importuned by desires that never can be satisfied, to feel

many evils which he had no power to avoid, and to fear many which he shall never feel: there will surely come a time, when every capacity of happiness shall be filled, and none shall be wretched but by his own fault.

In the mean time, it is by affliction chiefly that the heart of man is purified, and that the thoughts are fixed upon a better state. Prosperity, allayed and imperfect as it is, has power to intoxicate the imagination, to fix the mind upon the present scene, to produce confidence and elation, and to make him who enjoys affluence and honours forget the hand by which they were bestowed. It is seldom that we are otherwise, than by affliction, awakened to a sense of our own imbecility, or taught to know how little all our acquisitions can conduce to safety or to quiet; and how justly we may ascribe to the superintendence of a higher Power, those blessings which in the wantonness of success we considered as the attainments of our policy or courage.

Nothing confers so much ability to resist the temptations that perpetually surround us, as an habitual consideration of the shortness of life, and the uncertainty of those pleasures that solicit our pursuit; and this consideration can be inculcated only by affliction. "O Death! how bitter is the remembrance of thee, to a man that lives at ease in his possessions!" If our present state were one continued succession of delights, or one uniform flow of calmness and tranquillity, we should never willingly think upon its end; death would then surely surprise us as "a thief in the night;" and our task of duty would remain unfinished, till "the night came when no man can work."

While affliction thus prepares us for felicity, we may console ourselves under its pressures, by remembering, that they are no particular marks of divine displeasure: since all the distresses of persecution have been suffered by those "of whom the world was not worthy;" and the Redeemer of mankind himself was "a man of sorrows and acquainted with grief!"

No. 126.] SATURDAY, JAN. 19, 1754.

—*Steriles neo legit arenas  
Ut caneret paucis, morsitque hoc pulvere verum.*

LUCAN.

Canst thou believe the vast eternal Mind  
Was e'er to Syrtis and Lybian sands confined?  
That he would choose this waste, this barren ground,  
To teach the thin inhabitants around,  
And leave his truth in wilds and deserts drown'd?

THERE has always prevailed among that part of mankind that addict their minds to speculation,

a propensity to talk much of the delights of retirement : and some of the most pleasing compositions produced in every age contain descriptions of the peace and happiness of a country life.

I know not whether those who thus ambitiously repeat the praises of solitude, have always considered, how much they depreciate mankind by declaring, that whatever is excellent or desirable is to be obtained by departing from them ; that the assistance which we may derive from one another, is not equivalent to the evils which we have to fear ; that the kindness of a few is overbalanced by the malice of many ; and that the protection of society is too dearly purchased by encountering its dangers and enduring its oppressions.

These specious representations of solitary happiness, however opprobrious to human nature, have so far spread their influence over the world, that almost every man delights his imagination with the hopes of obtaining some time an opportunity of retreat. Many, indeed, who enjoy retreat only in imagination, content themselves with believing, that another year will transport them to rural tranquillity, and die while they talk of doing what, if they had lived longer, they would never have done. But many likewise there are, either of greater resolution or more credulity, who in earnest try the state which they have been taught to think thus secure from cares and dangers ; and retire to privacy, either that they may improve their happiness, increase their knowledge, or exalt their virtue.

The greater part of the admirers of solitude, as of all other classes of mankind, have no higher or remoter view, than the present gratification of their passions. Of these, some, haughty and impetuous, fly from society only because they cannot bear to repay to others the regard which themselves exact ; and think no state of life eligible, but that which places them out of the reach of censure or control, and affords them opportunities of living in a perpetual compliance with their own inclinations, without the necessity of regulating their actions by any other man's convenience or opinion.

There are others, of minds more delicate and tender, easily offended by every deviation from rectitude, soon disgusted by ignorance or impertinence, and always expecting from the conversation of mankind more elegance, purity, and truth, than the mingled mass of life will easily afford. Such men are in haste to retire from grossness, falsehood, and brutality ; and hope to find in private habitations at least a negative felicity, an exemption from the shocks and perturbations with which public scenes are continually distressing them.

To neither of these votaries will solitude afford that content, which she has been taught so

lavishly to promise. The man of arrogance will quickly discover, that by escaping from his opponents he has lost his flatterers, that greatness is nothing where it is not seen, and power nothing where it cannot be felt : and he whose faculties are employed in too close an observation of failings and defects, will find his condition very little mended by transferring his attention from others to himself : he will probably soon come back in quest of new objects, and be glad to keep his captiousness employed on any character rather than his own.

Others are seduced into solitude merely by the authority of great names, and expect to find those charms in tranquillity which have allured statesmen and conquerors to the shades ; these likewise are apt to wonder at their disappointment, for want of considering, that those whom they aspire to imitate, carried with them to their country seats minds full fraught with subjects of reflection, the consciousness of great merit, the memory of illustrious actions, the knowledge of important events, and the seeds of mighty designs to be ripened by future meditation. Solitude was to such men a release from fatigue, and an opportunity of usefulness. But what can retirement confer upon him, who having done nothing, can receive no support from his own importance, who having known nothing can find no entertainment in reviewing the past, and who intending nothing can form no hopes from prospects of the future ? He can, surely, take no wiser course than that of losing himself again in the crowd, and filling the vacuities of his mind with the news of the day.

Others consider solitude as the parent of philosophy, and retire in expectation of greater intimacies with science, as Numa repaired to the groves when he conferred with Egeria. These men have not always reason to repent. Some studies require a continued prosecution of the same train of thought, such as is too often interrupted by the petty avocations of common life : sometimes, likewise, it is necessary, that a multiplicity of objects be at once present to the mind ; and every thing, therefore, must be kept at a distance, which may perplex the memory, or dissipate the attention.

But though learning may be conferred by solitude, its application must be attained by general converse. He has learned to no purpose, that is not able to teach ; and he will always teach unsuccessfully, who cannot recommend his sentiments by his diction or address.

Even the acquisition of knowledge is often much facilitated by the advantages of society : he that never compares his notions with those of others readily acquiesces in his first thoughts, and very seldom discovers the objections which may be raised against his opinions : he, therefore, often thinks himself in possession of truth, when he is only fondling an error long since

exploded. He that has neither companions nor rivals in his studies, will always applaud his own progress, and think highly of his performances, because he knows not that others have equalled or excelled him. And I am afraid it may be added, that the student who withdraws himself from the world, will soon feel that ardour extinguished which praise and emulation had enkindled, and take the advantage of secrecy to sleep, rather than to labour.

There remains yet another set of recluses, whose intention entitles them to higher respect, and whose motives deserve a more serious consideration. These retire from the world, not merely to bask in ease or gratify curiosity; but that being disengaged from common cares, they may employ more time in the duties of religion: that they may regulate their actions with stricter vigilance, and purify their thoughts by more frequent meditation.

To men thus elevated above the mists of mortality, I am far from presuming myself qualified to give directions. On him that appears "to pass through things temporary," with no other care than "not to lose finally the things eternal," I look with such veneration as inclines me to approve his conduct in the whole, without a minute examination of its parts; yet I could never forbear to wish, that while vice is every day multiplying seducements, and stalking forth with more hardened effrontery, virtue would not withdraw the influence of her presence, or forbear to assert her natural dignity by open and undaunted perseverance in the right. Piety practised in solitude, like the flower that blooms in the deserts, may give its fragrance to the winds of heaven, and delight those unbodied spirits that survey the works of God and the actions of men; but it bestows no assistance upon earthly beings, and however free from taints of impurity, yet wants the sacred splendour of beneficence.

Our Maker, who though he gave us such varieties of temper and such difference of powers, yet designed us all for happiness, undoubtedly intended, that we should obtain that happiness by different means. Some are unable to resist the temptations of importunity, or the impetuosity of their own passions incited by the force of present temptations: of these it is undoubtedly the duty to fly from enemies which they cannot conquer, and to cultivate, in the calm of solitude, that virtue which is too tender to endure the tempest of public life. But there are others, whose passions grow more strong and irregular in privacy; and who cannot maintain a uniform tenour of virtue, but by exposing their manners to the public eye, and assisting the admonitions of conscience with the fear of infamy: for such, it is dangerous to exclude all witnesses of their conduct till they have formed strong habits of virtue, and weakened their

passions by frequent victories. But there is a higher order of men so inspired with ardour, and so fortified with resolution, that the world passes before them without influence or regard: these ought to consider themselves as appointed the guardians of mankind: they are placed in an evil world, to exhibit public examples of good life: and may be said, when they withdraw to solitude, to desert the station which Providence assigned them.

---

No. 128.] SATURDAY, JAN. 26, 1754.

*Ille sinistrorsum, hic dextrorsum abit; unus utrique  
Error, sed varis illud est partibus.* HOR.

When in a wood we leave the certain way,  
One error fools us, though we various stray,  
Some to the left, and some to t'other side. FRANCIS.

It is common among all the classes of mankind, to charge each other with trifling away life: every man looks on the occupation or amusement of his neighbour as something below the dignity of our nature, and unworthy of the attention of a rational being.

A man who considers the paucity of the wants of nature, and who, being acquainted with the various means by which all manual occupations are now facilitated, observes what numbers are supported by the labour of a few, would, indeed, be inclined to wonder, how the multitudes who are exempted from the necessity of working either for themselves or others, find business to fill up the vacuities of life. The greater part of mankind neither card the fleece, dig the mine, fell the wood, nor gather in the harvest; they neither tend herds nor build houses; in what then are they employed?

This is certainly a question, which a distant prospect of the world will not enable us to answer. We find all ranks and ages mingled together in a tumultuous confusion, with haste in their motions, and eagerness in their looks; but what they have to pursue or avoid, a more minute observation must inform us.

When we analyze the crowd into individuals, it soon appears that the passions and imaginations of men will not easily suffer them to be idle; we see things coveted merely because they are rare, and pursued because they are fugitive; we see men conspire to fix an arbitrary value on that which is worthless in itself, and then contend for the possession. One is a collector of fossils, of which he knows no other use than to show them; and when he has stocked his own repository, grieves that the stones which he has left behind him should be picked up by another. The florist nurses a tulip, and repines that his rival's beds enjoy the same showers and sunshine

with his own. This man is hurrying to a concert, only lest others should have heard the new musician before him; another bursts from his company to the play, because he fancies himself the patron of an actress; some spend the morning in consultations with their tailor, and some in directions to their cook; some are forming parties for cards, and some laying wagers at a horse-race.

It cannot, I think, be denied, that some of these lives are passed in trifles, in occupations by which the busy neither benefit themselves nor others, and by which no man could be long engaged, who seriously considered what he was doing, or had knowledge enough to compare what he is with what he might be made. However, as people who have the same inclination generally flock together, every trifler is kept in countenance by the sight of others as unprofitably active as himself; by kindling the heat of competition, he in time thinks himself important, and by having his mind intensely engaged, he is secured from weariness of himself.

Some degree of self-approbation is always the reward of diligence; and I cannot, therefore, but consider the laborious cultivation of petty pleasures, as a more happy and more virtuous disposition, than that universal contempt and haughty negligence, which is sometimes associated with powerful faculties, but is often assumed by indolence when it disowns its name, and aspires to the appellation of greatness of mind.

It has been long observed, that drollery and ridicule is the most easy kind of wit: let it be added, that contempt and arrogance is the easiest philosophy. To find some objection to every thing, and to dissolve in perpetual laziness under pretence that occasions are wanting to call forth activity, to laugh at those who are ridiculously busy without setting an example of more rational industry, is no less in the power of the meanest than of the highest intellects.

Our present state has placed us at once in such different relations, that every human employment, which is not a visible and immediate act of goodness, will be in some respect or other subject to contempt: but it is true, likewise, that almost every act, which is not directly vicious, is in some respect beneficial and laudable. "I often," says Bruyere, "observe from my window, two beings of erect form and amiable countenance, endowed with the powers of reason, able to clothe their thoughts in language, and convey their notions to each other. They rise early in the morning, and are every day employed till sunset in rubbing two smooth stones together, or, in other terms, in polishing marble."

"If lions could paint," says the fable, "in the room of those pictures which exhibit men vanquishing lions, we should see lions feeding upon

men." If the stone-cutter could have written like Bruyere, what would he have replied?

"I look up," says he, "every day from my shop, upon a man whom the idlers, who stand still to gaze upon my work, often celebrate as a wit and a philosopher. I often perceive his face clouded with care, and am told that his taper is sometimes burning at midnight. The sight of a man who works so much harder than myself, excited my curiosity. I heard no sound of tools in his apartment, and, therefore, could not imagine what he was doing; but was told at last, that he was writing descriptions of mankind, who when he had described them would live just as they had lived before; that he sat up whole nights to change a sentence, because the sound of a letter was too often repeated: that he was often disquieted with doubts, about the propriety of a word which every body understood; that he would hesitate between two expressions equally proper, till he could not fix his choice but by consulting his friends; that he will run from one end of Paris to the other, for an opportunity of reading a period to a nice ear; that if a single line is heard with coldness and inattention, he returns home dejected and disconsolate; and that by all this care and labour, he hopes only to make a little book, which at last will teach no useful art, and which none who has it not will perceive himself to want. I have often wondered for what end such a being as this was sent into the world; and should be glad to see those who live thus foolishly, seized by an order of the government, and obliged to labour at some useful occupation."

Thus, by a partial and imperfect representation, may every thing be made equally ridiculous. He that gazed with contempt on human beings rubbing stones together, might have prolonged the same amusement by walking through the city, and seeing others with looks of importance heaping one brick upon another; or by rambling into the country, where he might observe other creatures of the same kind driving in pieces of sharp iron into the clay, or, in the language of men less enlightened, ploughing the field.

As it is thus easy by a detail of minute circumstances to make every thing little, so it is not difficult by an aggregation of effects to make every thing great. The polisher of marble may be forming ornaments for the palaces of virtue, and the schools of science: or providing tables on which the actions of heroes and the discoveries of sages shall be recorded, for the incitement and instruction of future generations. The mason is exercising one of the principal arts by which reasoning beings are distinguished from the brute, the art to which life owes much of its safety and all its convenience, by which we are secured from the inclemency of the seasons, and fortified against the ravages of hostility; and the ploughman is changing the face of nature, dif-

fusing plenty and happiness over kingdoms, and compelling the earth to give food to her inhabitants.

Greatness and littleness are terms merely comparative; and we err in our estimation of things, because we measure them by some wrong standard. The trifler proposes to himself only to equal or excel some other trifler, and is happy or miserable as he succeeds or miscarries: the man of sedentary desire and unactive ambition sits comparing his power with his wishes; and makes his inability to perform things impossible, an excuse to himself for performing nothing. Man can only form a just estimate of his own actions, by making his power the test of his performance, by comparing what he does with what he can do. Whoever steadily perseveres in the exertion of all his faculties, does what is great with respect to himself; and what will not be despised by Him, who has given to all created beings their different abilities: he faithfully performs the task of life, within whatever limits his labours may be confined, or how soon soever they may be forgotten.

We can conceive so much more than we can accomplish, that whoever tries his own actions by his imagination, may appear despicable in his own eyes. He that despises for its littleness any thing really useful, has no pretensions to applaud the grandeur of his conceptions; since nothing but narrowness of mind hinders him from seeing, that by pursuing the same principles every thing limited will appear contemptible.

He that neglects the care of his family, while his benevolence expands itself in scheming the happiness of imaginary kingdoms, might with equal reason sit on a throne dreaming of universal empire, and of the diffusion of blessings over all the globe: yet even this globe is little, compared with the system of matter within our view; and that system barely something more than nonentity, compared with the boundless regions of space, to which neither eye nor imagination can extend.

From conceptions, therefore, of what we might have been, and from wishes to be what we are not, conceptions that we know to be foolish, and wishes which we feel to be vain, we must necessarily descend to the consideration of what we are. We have powers very scanty in their utmost extent, but which in different men are differently proportioned. Suitably to these powers we have duties prescribed, which we must neither decline for the sake of delighting ourselves with easier amusements, nor overlook in idle contemplation of greater excellence or more extensive comprehension.

In order to the right conduct of our lives, we must remember that we are not born to please ourselves. He that studies simply his own satisfaction, will always find the proper business of his station too hard or too easy for him. But if

we bear continually in mind, our relation to The Father of Being, by whom we are placed in the world, and who has allotted us the part which we are to bear in the general system of life, we shall be easily persuaded to resign our own inclinations to Unerring Wisdom, and do the work decreed for us with cheerfulness and diligence.

Misce

*Ergo aliquid nostris de moribus.*

JUVENAL.

And mingle something of our times to please.

DRYDEN, JUN.

Fontenelle, in his panegyric on Sir Isaac Newton, closes a long enumeration of that great philosopher's virtues and attainments, with an observation, that "he was not distinguished from other men by any singularity either natural or affected."

It is an eminent instance of Newton's superiority to the rest of mankind, that he was able to separate knowledge from those weaknesses by which knowledge is generally disgraced; that he was able to excel in science and wisdom, without purchasing them by the neglect of little things; and that he stood alone, merely because he had left the rest of mankind behind him, not because he deviated from the beaten track.

Whoever, after the example of Plutarch, should compare the lives of illustrious men, might set this part of Newton's character to view with great advantage, by opposing it to that of Bacon, perhaps the only man of latter ages who has any pretensions to dispute with him the palm of genius or science.

Bacon, after he had added to a long and careful contemplation of almost every other object of knowledge a curious inspection into common life, and after having surveyed nature as a philosopher, had examined "men's business and bosoms" as a statesman; yet failed so much in the conduct of domestic affairs, that, in the most lucrative post to which a great and wealthy kingdom could advance him, he felt all the miseries of distressful poverty, and committed all the crimes to which poverty incites. Such were at once his negligence and rapacity, that, as it is said, he would gain by unworthy practices that money, which, when so acquired, his servants might steal from one end of the table, while he sat studious and abstracted at the other.

As scarcely any man has reached the excellence, very few have sunk to the weakness of Bacon: but almost all the studious tribe, as they obtain any participation of his knowledge, feel likewise some contagion of his defects; and ob-

struct the veneration which learning would procure, by follies greater or less, to which only learning could betray them.

It has been formerly remarked by The Guardian, that the world punishes with too great severity the error of those, who imagine that the ignorance of little things may be compensated by the knowledge of great; for so it is, that as more can detect petty failings than can distinguish or esteem great qualifications, and as mankind is in general more easily disposed to censure than to admiration, contempt is often incurred by slight mistakes, which real virtue or usefulness cannot counterbalance.

Yet such mistakes and inadvertencies, it is not easy for a man deeply immersed in study to avoid; no man can become qualified for the common intercourses of life, by private meditation; the manners of the world are not a regular system, planned by philosophers upon settled principles, in which every cause has a congruous effect, and one part has a just reference to another. Of the fashions prevalent in every country, a few have arisen, perhaps, from particular temperatures of the climate; a few more from the constitution of the government; but the greater part have grown up by chance; been started by caprice, been contrived by affectation, or borrowed without any just motives of choice from other countries.

Of all these, the savage that hunts his prey upon the mountains, and the sage that speculates in his closet, must necessarily live in equal ignorance; yet by the observation of these trifles it is, that the ranks of mankind are kept in order, that the address of one to another is regulated, and the general business of the world carried on with facility and method.

These things, therefore, though small in themselves, become great by their frequency; and he very much mistakes his own interest, who to the unavoidable unskilfulness of abstraction and retirement, adds a voluntary neglect of common forms, and increases the disadvantages of a studious course of life by an arrogant contempt of those practices, by which others endeavour to gain favour and multiply friendships.

A real and interior disdain of fashion and ceremony is, indeed, not very often to be found; much the greater part of those who pretend to laugh at foppery and formality, secretly wish to have possessed those qualifications which they pretend to despise; and because they find it difficult to wash away the tincture which they have so deeply imbibed, endeavour to harden themselves in a sullen approbation of their own colour. Neutrality is a state into which the busy passions of man cannot easily subside; and he who is in danger of the pangs of envy, is generally forced to recreate his imagination with an effort of comfort.

Some, however, may be found, who, support-

ed by the consciousness of great abilities, and elevated by a long course of reputation and applause, voluntarily consign themselves to singularity, affect to cross the roads of life because they know that they shall not be jostled, and indulge a boundless gratification of will because they perceive that they shall be quietly obeyed. Men of this kind are generally known by the name of *Humourists*, an appellation by which he that has obtained it, and can be contented to keep it, is set free at once from the shackles of fashion: and can go in or out, sit or stand, be talkative or silent, gloomy or merry, advance absurdities or oppose demonstration, without any other reprehension from mankind than that it is his way, that he is an odd fellow, and must be let alone.

This seems to many an easy passport through the various factions of mankind; and those on whom it is bestowed, appear too frequently to consider the patience with which their caprices are suffered as an undoubted evidence of their own importance, of a genius to which submission is universally paid, and whose irregularities are only considered as consequences of its vigour. These peculiarities, however, are always found to spot a character, though they may not totally obscure it; and he who expects from mankind, that they should give up established customs in compliance with his single will, and exacts that deference which he does not pay, may be endured, but can never be approved.

Singularity is, I think, in its own nature universally and invariably displeasing. In whatever respect a man differs from others, he must be considered by them as either worse or better; by being better, it is well known that a man gains admiration oftener than love, since all approbation of his practice must necessarily condemn him that gives it; and though a man often pleases by inferiority, there are few who desire to give such pleasure. Yet the truth is, that singularity is almost always regarded as a brand of slight reproach; and where it is associated with acknowledged merit, serves as an abatement or an alloy of excellence, by which weak eyes are reconciled to its lustre, and by which, though kindness is not gained, at least envy is averted.

But let no man be in haste to conclude his own merit so great or conspicuous, as to require or justify singularity; it is as hazardous for a moderate understanding to usurp the prerogatives of genius, as for a common form to play over the airs of uncontested beauty. The pride of men will not patiently endure to see one whose understanding or attainments are but level with their own, break the rules by which they have consented to be bound, or forsake the direction which they submissively follow. All violation of established practice implies in its

own nature a rejection of the common opinion, a defiance of common censure, and an appeal from general laws to private judgment: he, therefore, who differs from others without apparent advantage, ought not to be angry if his arrogance is punished with ridicule; if those whose example he superciliously overlooks, point him out to derision, and hoot him back again into the common road.

The pride of singularity is often exerted in little things, where right and wrong are indeterminate, and where, therefore, vanity is without excuse. But there are occasions on which it is noble to dare to stand alone. To be pious among infidels, to be disinterested in a time of general venality, to lead a life of virtue and reason in the midst of sensualists, is a proof of a mind intent on nobler things than the praise or blame of men, of a soul fixed in the contemplation of the highest good, and superior to the tyranny of custom and example.

In moral and religious questions only, a wise man will hold no consultations with fashion, because these duties are constant and immutable, and depend not on the notions of men, but the commands of Heaven; yet even of these, the external mode is to be in some measure regulated by the prevailing taste of the age in which we live; for he is certainly no friend to virtue, who neglects to give it any lawful attraction, or suffers it to deceive the eye or alienate the affections for want of innocent compliance with fashionable decorations.

It is yet remembered of the learned and pious Nelson, that he was remarkably elegant in his manners, and splendid in his dress. He knew, that the eminence of his character drew many eyes upon him; and he was careful not to drive the young or the gay away from religion, by representing it as an enemy to any distinction or enjoyment in which human nature may innocently delight.

In this censure of singularity, I have, therefore, no intention to subject reason or conscience to custom or example. To comply with the degree and practices of mankind, is in some notions the duty of a social being; because by compliance only he can please, and by pleasing only he can become useful: but as the end is not to be lost for the sake of the means, we are not to give up virtue to complaisance; for the end of complaisance is only to gain the kindness of our fellow-beings, whose kindness is desirable only as instrumental to happiness, and happiness must be always lost by departure from virtue.

No. 137.] TUESDAY, FEB. 26, 1754.

ΤΙ Δ' ἔστιν;

ΠΥΘ.

What have I been doing?

As man is a being very sparingly furnished with the power of prescience, he can provide for the future only by considering the past; and as futurity is all in which he has any real interest, he ought very diligently to use the only means by which he can be enabled to enjoy it, and frequently to revolve the experiments which he has hitherto made upon life, that he may gain wisdom from his mistakes, and caution from his miscarriages.

Though I do not so exactly conform to the precepts of Pythagoras, as to practise every night this solemn recollection, yet I am not so lost in dissipation as wholly to omit it; nor can I forbear sometimes to inquire of myself, in what employment my life has passed away. Much of my time has sunk into nothing, and left no trace by which it can be distinguished; and of this now I only know, that it was once in my power, and might once have been improved.

Of other parts of life, memory can give some account; at some hours I have been gay, and at others serious; I have sometimes mingled in conversation, and sometimes meditated in solitude; one day has been spent in consulting the ancient sages, and another in writing *Adventurers*.

At the conclusion of any undertaking, it is usual to compute the loss and profit. As I shall soon cease to write *Adventurers*, I could not forbear lately to consider what has been the consequence of my labours; and whether I am to reckon the hours laid out in these compositions, as applied to a good and laudable purpose, or suffered to fume away in useless evaporations.

That I have intended well, I have the attestation of my own heart: but good intentions may be frustrated when they are executed without suitable skill, or directed to an end unattainable in itself.

Some there are, who leave writers very little room for self-congratulation: some who affirm, that books have no influence upon the public, that no age was ever made better by its authors, and that to call upon mankind to correct their manners, is, like Xerxes, to scourge the wind, or shackle the torrent.

This opinion they pretend to support by unfailing experience. The world is full of fraud and corruption, rapine or malignity; interest is the ruling motive of mankind, and every one is endeavouring to increase his own stores of happiness by perpetual accumulation, without reflecting upon the numbers whom his superfluity

condemns to want: in this state of things a book of morality is published, in which charity and benevolence are strongly enforced; and it is proved beyond opposition, that men are happy in proportion as they are virtuous, and rich as they are liberal. The book is applauded, and the author is preferred; he imagines his applause deserved, and receives less pleasure from the acquisition of reward than the consciousness of merit. Let us look again upon mankind; interest is still the ruling motive, and the world is yet full of fraud and corruption, malevolence and rapine.

The difficulty of confuting this assertion, arises merely from its generality and comprehension; to overthrow it by a detail of distinct facts, requires a wider survey of the world than human eyes can take; the progress of reformation is gradual and silent, as the extension of evening shadows; we know that they were short at noon, and are long at sunset, but our senses were not able to discern their increase; we know of every civil nation, that it was once savage, and how was it reclaimed but by precept and admonition?

Mankind are universally corrupt, but corrupt in different degrees; as they are universally ignorant, yet with greater or less irradiations of knowledge. How has knowledge or virtue been increased and preserved in one place beyond another, but by diligent inculcation and rational enforcement?

Books of morality are daily written, yet its influence is still little in the world; so the ground is annually ploughed, and yet multitudes are in want of bread. But, surely, neither the labours of the moralist nor of the husbandman are vain; let them for a while neglect their tasks, and their usefulness will be known; the wickedness that is now frequent would become universal, the bread that is now scarce would wholly fail.

The power, indeed, of every individual is small, and the consequence of his endeavours imperceptible, in a general prospect of the world. Providence has given no man ability to do much, that something might be left for every man to do. The business of life is carried on by a general co-operation; in which the part of any single man can be no more distinguished, than the effect of a particular drop when the meadows are floated by a summer shower; yet every drop increases the inundation, and every hand adds to the happiness or misery of mankind.

That a writer, however zealous or eloquent, seldom works a visible effect upon cities or nations, will readily be granted. The book which is read most, is read by few, compared with those that read it not; and of those few, the greater part peruse it with dispositions that very little favour their own improvement.

It is difficult to enumerate the several motives which procure to books the honour of perusal.

spite, vanity, and curiosity, hope and fear, love and hatred, every passion which incites to any other action, serves at one time or other to stimulate a reader.

Some are fond to take a celebrated volume into their hands, because they hope to distinguish their penetration, by finding faults which have escaped the public; others eagerly buy it in the first bloom of reputation, that they may join the chorus of praise, and not lag, as Falstaff terms it, in "the rearward of the fashion."

Some read for style and some for argument: one has little care about the sentiment, he observes only how it is expressed; another regards not the conclusion, but is diligent to mark how it is inferred: they read for other purposes than the attainment of practical knowledge; and are no more likely to grow wise by an examination of a treatise of moral prudence, than an architect to inflame his devotion by considering attentively the proportions of a temple.

Some read that they may embellish their conversation, or shine in dispute; some that they may not be detected in ignorance, or want the reputation of literary accomplishments; but the most general and prevalent reason of study is the impossibility of finding another amusement equally cheap or constant, equally independent on the hour or the weather. He that wants money to follow the chase of pleasure through her yearly circuit, and is left at home when the gay world rolls to Bath or Tunbridge; he whose gout compels him to hear from his chamber the rattle of chariots transporting happier beings to plays and assemblies, will be forced to seek in books a refuge from himself.

The author is not wholly useless, who provides innocent amusements for minds like these. There are in the present state of things, so many more instigations to evil, than incitements to good, that he who keeps men in a neutral state, may be justly considered as a benefactor to life.

But, perhaps, it seldom happens, that study terminates in mere pastime. Books have always a secret influence on the understanding; we cannot at pleasure obliterate ideas: he that reads books of science, though without any fixed desire of improvement, will grow more knowing; he that entertains himself with moral or religious treatises, will imperceptibly advance in goodness; the ideas which are often offered to the mind, will at last find a lucky moment when it is disposed to receive them.

It is, therefore, urged without reason, as a discouragement to writers, that there are already books sufficient in the world; that all the topics of persuasion have been discussed, and every important question clearly stated and justly decided; and that, therefore, there is no room to hope, that pigmies should conquer where heroes have been defeated, or that the petty copiers of

the present time should advance the great work of reformation, which their predecessors were forced to leave unfinished.

Whatever be the present extent of human knowledge, it is not only finite, and therefore in its own nature capable of increase; but so narrow, that almost every understanding may, by a diligent application of its powers, hope to enlarge it. It is, however, not necessary, that a man should forbear to write, till he has discovered some truth unknown before; he may be sufficiently useful, by only diversifying the surface of knowledge, and luring the mind by a new appearance to a second view of those beauties which it had passed over inattentively before. Every writer may find intellects correspondent to his own, to whom his expressions are familiar, and his thoughts congenial; and, perhaps, truth is often more successfully propagated by men of moderate abilities, who, adopting the opinions of others, have no care but to explain them clearly, than by subtle speculatists and curious searchers, who exact from their readers powers equal to their own, and if their fabrics of science be strong, take no care to render them accessible.

For my part, I do not regret the hours which I have laid out in these little compositions. That the world has grown apparently better, since the publication of the *Adventurer*, I have not observed; but am willing to think, that many have been affected by single sentiments, of which it is their business to renew the impression; that many have caught hints of truth, which it is now their duty to pursue; and that those who have received no improvement, have wanted not opportunity but intention to improve.

---

No. 138.] SATURDAY, MARCH 2, 1754.

*Quid pure tranquillæ? honos, an dulces lucellum,  
An secretum iter, et fallentis semita vitæ?* HOR.

Whether the tranquil mind and pure,  
Honours or wealth our bliss insure:  
Or down through life unknown to stray,  
Where lonely leads the silent way.

FRANCIS.

HAVING considered the importance of authors to the welfare of the public, I am led by a natural train of thought, to reflect on their condition with regard to themselves; and to inquire what degree of happiness or vexation is annexed to the difficult and laborious employment of providing instruction or entertainment for mankind.

In estimating the pain or pleasure of any particular state, every man, indeed, draws his decisions from his own breast, and cannot with

certainly determine whether other minds are affected by the same causes in the same manner. Yet by this criterion we must be content to judge, because no other can be obtained; and, indeed, we have no reason to think it very fallacious, for excepting here and there an anomalous mind, which either does not feel like others, or dissembles its sensibility, we find men unanimously concur in attributing happiness or misery to particular conditions, as they agree in acknowledging the cold of winter, and the heat of autumn.

If we apply to authors themselves for an account of their state, it will appear very little to deserve envy: for they have in all ages been addicted to complaint. The neglect of learning, the ingratitude of the present age, and the absurd preference by which ignorance and dulness often obtain favour and rewards, have been from age to age topics of invective; and few have left their names to posterity, without some appeal to future candour from the perverseness and malice of their own times.

I have, nevertheless, been often inclined to doubt, whether authors, however querulous, are in reality more miserable than their fellow-mortals. The present life is to all a state of infelicity; every man, like an author, believes himself to merit more than he obtains, and solaces the present with the prospect of the future; others, indeed, suffer those disappointments in silence, of which the writer complains, to show how well he has learnt the art of lamentation.

There is at least one gleam of felicity, of which few writers have missed the enjoyment: he whose hopes have so far overpowered his fears, as that he has resolved to stand forth a candidate for fame, seldom fails to amuse himself, before his appearance, with pleasing scenes of affluence or honour; while his fortune is yet under the regulation of fancy, he easily models it to his wish, suffers no thoughts of critics or rivals to intrude upon his mind, but counts over the bounties of patronage, or listens to the voice of praise.

Some there are, that talk very luxuriously of the second period of an author's happiness, and tell of the tumultuous raptures of invention, when the mind riots in imagery, and the choice stands suspended between different sentiments.

These pleasures, I believe, may sometimes be indulged to those, who come to a subject of disquisition with minds full of ideas, and with fancies so vigorous, as easily to excite, select, and arrange them. To write is, indeed, no unpleasant employment, when one sentiment readily produces another, and both ideas and expressions present themselves at the first summons; but such happiness, the greatest genius does not always obtain; and common writers know it only to such a degree, as to credit its possibility. Composition is, for the most part, an effort of

slow diligence and steady perseverance, to which the mind is dragged by necessity or resolution, and from which the attention is every moment starting to more delightful amusements.

It frequently happens, that a design which, when considered at a distance, gave flattering hopes of facility, mocks us in the execution with unexpected difficulties; the mind which, while it considered it in the gross, imagined itself amply furnished with materials, finds sometimes an unexpected barrenness and vacuity, and wonders whither all those ideas are vanished, which a little before seemed struggling for emission.

Sometimes many thoughts present themselves; but so confused and unconnected, that they are not without difficulty reduced to method or concatenated in a regular and dependent series; the mind falls at once into a labyrinth, of which neither the beginning nor end can be discovered, and toils and struggles without progress or extrication.

It is asserted by Horace, that "if matter be once got together, words will be found with very little difficulty;" a position which, though sufficiently plausible to be inserted in poetical precepts, is by no means strictly and philosophically true. If words were naturally and necessarily consequential to sentiments, it would always follow, that he who has most knowledge must have most eloquence, and that every man would clearly express what he fully understood: yet we find, that to think, and discourse, are often the qualities of different persons: and many books might surely be produced, where just and noble sentiments are degraded and obscured by unsuitable diction.

Words, therefore, as well as things, claim the care of an author. Indeed, of many authors, and those not useless or contemptible, words are almost the only care: many make it their study, not so much to strike out new sentiments, as to recommend those which are already known to more favourable notice by fairer decorations: but every man, whether he copies or invents, whether he delivers his own thoughts or those of another, has often found himself deficient in the power of expression, big with ideas which he could not utter, obliged to ransack his memory for terms adequate to his conceptions, and at last unable to impress upon his reader the image existing in his own mind.

It is one of the common distresses of a writer, to be within a word of a happy period, to want only a single epithet to give amplification its full force, to require only a correspondent term in order to finish a paragraph with elegance, and make one of its members answer to the other: but these deficiencies cannot always be supplied: and after a long study and vexation, the passage is turned anew, and the web unwoven that was so nearly finished.

But when thoughts and words are collected and adjusted, and the whole composition at last concluded, it seldom gratifies the author, when he comes coolly and deliberately to review it, with the hopes which had been excited in the fury of the performance: novelty always captivates the mind; as our thoughts rise fresh upon us, we readily believe them just and original, which, when the pleasure of production is over, we find to be mean and common, or borrowed from the works of others, and supplied by memory rather than invention.

But though it should happen that the writer finds no such fault in his performance, he is still to remember, that he looks upon it with partial eyes: and when he considers how much men who could judge of others with great exactness, have often failed of judging of themselves, he will be afraid of deciding too hastily in his own favour, or of allowing himself to contemplate with too much complacency, treasure that has not yet been brought to the test, nor passed the only trial that can stamp its value.

From the public, and only from the public, is he to await a confirmation of his claim, and a final justification of self-esteem; but the public is not easily persuaded to favour an author. If mankind were left to judge for themselves, it is reasonable to imagine, that of such writings, at least, as describe the movements of the human passions, and of which every man carries the archetype within him, a just opinion would be formed; but whoever has remarked the fate of books, must have found it governed by other causes than general consent arising from general conviction. If a new performance happens not to fall into the hands of some who have courage to tell, and authority to propagate their opinion, it often remains long in obscurity, and perishes unknown and unexamined. A few, a very few, commonly constitute the taste of the time; the judgment which they have once pronounced, some are too lazy to discuss, and some too timorous to contradict; it may however be, I think, observed, that their power is greater to depress than exalt, as mankind are more credulous of censure than of praise.

This perversion of the public judgment is not to be rashly numbered amongst the miseries of an author: since it commonly serves, after miscarriage, to reconcile him to himself. Because the world has sometimes passed an unjust sentence, he readily concludes the sentence unjust by which his performance is condemned; because some have been exalted above their merits by partiality, he is sure to ascribe the success of a rival, not to the merit of his work, but the zeal of his patrons. Upon the whole, as the author seems to share all the common miseries of life, he appears to partake likewise of its lenitives and abatements.

## POLITICAL TRACTS.

### MARMOR NORFOLCIENSE;

OR,

*An Essay on an Ancient Prophetic Inscription,  
in Monkish Rhyme, lately discovered near Lynn,  
in Norfolk, by Probus Britannicus.*

FIRST PRINTED IN THE YEAR 1739.

IN Norfolk, near the town of Lynn, in a field which an ancient tradition of the country affirms to have been once a deep lake or meer, and which appears from authentic records to have been called, about two hundred years ago, *Palus*, or the Marsh, was discovered not long since a large square stone which is found upon an exact inspection to be a kind of coarse marble, of a substance not firm enough to admit of being polished, yet harder than our common quarries afford, and not easily susceptible of injuries from weather or outward accidents.

It was brought to light by a farmer, who observing his plough obstructed by something, through which the share could not make its way, ordered his servants to remove it. This was not effected without some difficulty, the stone being three feet four inches deep, and four feet square in the superficies, and consequently of a weight not easily manageable. However, by the application of levers, it was at length raised, and conveyed to a corner of the field, where it lay for some months entirely unregarded: nor perhaps had we ever been made acquainted with this venerable relique of antiquity, had not our good fortune been greater than our curiosity.

A gentleman, well known to the learned world, and distinguished by the patronage of the *Mæcenæ*s of Norfolk, whose name, were I permitted to mention it, would excite the attention of my reader, and add no small authority to my conjectures, observing, as he was walking that way, that the clouds began to gather and threaten him with a shower, had recourse for shelter to the trees under which this stone happened to lie, and sat down upon it in expectation of fair weather. At length he began to amuse himself in his confinement, by clearing

the earth from his seat with the point of his cane: and had continued this employment some time, when he observed several traces of letters antique and irregular, which by being very deeply engraven were still easily distinguishable.

This discovery so far raised his curiosity, that going home immediately, he procured an instrument proper for cutting out the clay, that filled up the spaces of the letters, and with very little labour made the inscription legible, which is here exhibited to the public:

### POST-GENITIS.

*Cum lapidem hunc, magnus  
Qui nunc jacet incolæ stagni,  
Vel pede equus tange,  
Vel arator vomere frange,  
Sentiet ægra metus,  
Effundet patria fletus,  
Littoraque ut fluctu,  
Resonabunt oppido luctu:  
Nam fecunda rubri  
Serpent per præta colubri  
Græhina vastantes,  
Flores fructusque vorantes,  
Omnia sedantes,  
Vilantes, et spoliantes;  
Quantum laud pugnaces,  
Ibunt per cuncta minaces,  
Fures absque timore,  
Et pingues absque labore.  
Horrida dementes  
Rapiet discordia gentes,  
Plurima tunc leges  
Mutabit, plurima reges  
Natio, conversâ  
In rabiem tunc contremet uras  
Cynthia, tunc latis  
Florebunt lilla prætis,  
Nec frenere audebit  
Leo, sed violare timebit,  
Omnia consuetus  
Populâ pascua latus.  
Ante oculos natos  
Calceatos et cruciâtos  
Jam feret ignavus,  
Velitque libidine pravus.  
En quoque quæd mirum,  
Quod dicas denique dirum,  
Sanguinem equus sugit,  
Neque bellua victa remugit.*

These lines he carefully copied, accompanied

in his letter of July 19, with the following translation.

### TO POSTERITY.

When'er this stone, now hid beneath the lake,  
The horse shall trample, or the plough shall break,  
Then, O my country! shalt thou groan distressed,  
Grief swell thine eyes, and terror chill thy breast.  
Thy streets with violence of woe shall sound,  
Loud as the billows bursting on the ground.  
Then through thy fields shall scarlet reptiles stray,  
And rapine and pollution mark their way.  
Their hungry swarms the peaceful vale shall fright,  
Still fierce to threaten, still afraid to fight;  
The teeming year's whole product shall devour,  
Insatiate pluck the fruit, and crop the flower:  
Shall glutton on the industrious peasants' spoil,  
Rob without fear, and fatten without toil;  
Then o'er the world shall discord stretch her wings:  
Kings change their laws, and kingdoms change their kings.

The bear enraged th' affrighted moon shall dread;  
The lilies o'er the vales triumphant spread;  
Nor shall the lion, wont of old to reign  
Despotic o'er the desolated plain,  
Henceforth th' inviolable bloom invade,  
Or dare to murmur in the flowery glade;  
His tortured sons shall die before his face,  
While he lies melting in a lewd embrace;  
And, yet more strange! his veins a horse shall drain,  
Nor shall the passive coward once complain.

I make not the least doubt, but that this learned person has given us, as an antiquary, a true and uncontrovertible representation of the writer's meaning, and am sure he can confirm it by innumerable quotations from the authors of the middle age, should he be publicly called upon by any man of eminent rank in the republic of letters; nor will he deny the world that satisfaction, provided the animadverter proceeds with that sobriety and modesty, with which it becomes every learned man to treat a subject of such importance.

Yet with all proper deference to a name so justly celebrated, I will take the freedom of observing that he has succeeded better as a scholar than a poet; having fallen below the strength, the conciseness, and at the same time below the perspicuity of his author. I shall not point out the particular passages in which this disparity is remarkable, but content myself with saying in general, that the criticisms, which there is room for on this translation, may be almost an incitement to some lawyer, studious of antiquity, to learn Latin.

The inscription, which I now proceed to consider, wants no arguments to prove its antiquity to those among the learned, who are versed in the writers of the darker ages, and know that the Latin poetry of those times was of a peculiar cast and air, not easy to be understood, and very difficult to be imitated, nor can it be conceived that any man would lay out his abilities on a way of writing, which though attained with

much study, could gain him no reputation, and engrave his chimeras on a stone to astonish posterity.

Its antiquity therefore is out of dispute; but how high a degree of antiquity is to be assigned it, there is more ground for inquiry than determination. How early Latin rhymes made their appearance in the world is yet undecided by the critics. Verses of this kind were called *Leonine*; but whence they derived that appellation the learned Camden confesses himself ignorant, so that the style carries no certain marks of its age. I shall only observe farther on this head, that the characters are nearly of the same form with those on King Arthur's coffin; but whether from their similitude we may venture to pronounce them of the same date, I must refer to the decision of better judges.

Our inability to fix the age of this inscription necessarily infers our ignorance of its author, with relation to whom many controversies may be started worthy of the most profound learning, and most indefatigable diligence.

The first question that naturally arises is, Whether he was a Briton or a Saxon? I had at first conceived some hope, that in this question, in which not only the idle curiosity of virtuosos, but the honour of two mighty nations, is concerned, some information might be drawn from the word *Patria* [my country] in the third line; England being not in propriety of speech the country of the Saxons; at least not at their first arrival. But upon farther reflection this argument appeared not conclusive, since we find that in all ages, foreigners have affected to call England their country, even when, like the Saxons of old, they came only to plunder it.

An argument in favour of the Britons, may indeed be drawn from the tenderness with which the author seems to lament his country, and the compassion he shows for its approaching calamities. I, who am a descendant from the Saxons, and therefore unwilling to say any thing derogatory from the reputation of my forefathers, must yet allow this argument its full force: for it has been rarely, very rarely, known that foreigners, however well treated, caressed, enriched, flattered, or exalted, have regarded this country with the least gratitude or affection, till the race has, by long continuance, after many generations, been naturalized and assimilated.

They have been ready upon all occasions to prefer the petty interests of their own country, though perhaps only some desolate and worthless corner of the world. They have employed the wealth of England, in paying troops to defend mud-wall towns, and uninhabitable rocks, and in purchasing barriers for territories, of which the natural sterility secured them from invasion.

This argument, which wants no particular

instances to confirm it, is, I confess, of the greatest weight in this question, and inclines me strongly to believe, that the benevolent author of this prediction must have been born a Barron.

The learned discoverer of the inscription was pleased to insist with great warmth upon the etymology of the word *Patria*, which signifying, says he, *the land of my father*, could be made use of by none, but such whose ancestors had resided here: but in answer to this demonstration, as he called it, I only desired him to take notice, how common it is for intruders of yesterday, to pretend the same title with the ancient proprietors, and, having just received an estate by voluntary grant, to erect a claim of *hereditary right*.

Nor is it less difficult to form any satisfactory conjecture, concerning the rank or condition of the writer, who, contented with a consciousness of having done his duty, in leaving this solemn warning to his country, seems studiously to have avoided that veneration, to which his knowledge of futurity undoubtedly entitled him, and those honours which his memory might justly claim from the gratitude of posterity, and has therefore left no trace, by which the most sagacious and diligent inquirer can hope to discover him.

This conduct alone ought to convince us, that the prediction is of no small importance to mankind, since the author of it appears not to have been influenced by any other motive than that noble and exalted philanthropy, which is above the narrow views of recompense or applause.

That interest had no share in this inscription, is evident beyond dispute, since the age in which he lived received neither pleasure nor instruction from it. Nor is it less apparent from the suppression of his name, that he was equally a stranger to that wild desire of fame, which has sometimes infatuated the noblest minds.

His modesty, however, has not been able wholly to extinguish that curiosity, which so naturally leads us, when we admire a performance, to inquire after the author. Those whom I have consulted on this occasion, and my zeal for the honour of this benefactor of my country has not suffered me to forget a single antiquary of reputation, have almost unanimously determined, that it was written by a king. For where else, said they, are we to expect that greatness of mind, and that dignity of expression, so eminently conspicuous in this inscription?

It is with a proper sense of the weakness of my own abilities, that I venture to lay before the public, the reasons which hinder me from concurring with this opinion, which I am not only inclined to favour by my respect for the authors of it, but by a natural affection for monarchy, and a prevailing inclination to believe, that every excellence is inherent in a king.

To condemn an opinion so agreeable to the reverence due to the regal dignity, and countenanced by so great authorities, without a long and accurate discussion, would be a temerity justly liable to the severest censures. A supercilious and arrogant determination of a controversy of such importance, would doubtless be treated by the impartial and candid with the utmost indignation.

But as I have too high an idea of the learning of my contemporaries, to obtrude any crude, hasty, or indigested notions on the public, I have proceeded with the utmost degree of diffidence and caution; I have frequently reviewed all my arguments, traced them backwards to their first principles, and used every method of examination to discover whether all the deductions were natural and just, and whether I was not imposed on by some specious fallacy; but the farther I carried my inquiries, and the longer I dwelt upon this great point, the more was I convinced, in spite of all my prejudices, that this wonderful prediction was not written by a king.

For after a laborious and attentive perusal of histories, memoirs, chronicles, lives, characters, vindications, panegyrics, and epitaphs, I could find no sufficient authority for ascribing to any of our English monarchs, however gracious or glorious; any prophetic knowledge or prescience of futurity: which, when we consider how rarely regal virtues are forgotten, how soon they are discovered, and how loudly they are celebrated, affords a probable argument at least, that none of them have laid any claim to this character. For why should historians have omitted to embellish their accounts with such a striking circumstance? or if the histories of that age are lost by length of time, why was not so uncommon an excellence transmitted to posterity in the more lasting colours of poetry? Was that unhappy age without a Laureat? Was there then no Young or Phillips? no Ward or Mitchel, to snatch such wonders from oblivion, and immortalize a prince of such capacities? If this was really the case, let us congratulate ourselves upon being reserved for better days; days so fruitful of happy writers, that no princely virtue can shine in vain. Our monarchs are surrounded with refined spirits, so penetrating that they frequently discover in their masters great qualities invisible to vulgar eyes, and which, did not they publish them to mankind, would be unobserved for ever.

Nor is it easy to find in the lives of our monarchs many instances of that regard for posterity, which seems to have been the prevailing temper of this venerable man. I have seldom in any of the gracious speeches delivered from the throne, and received with the highest gratitude and satisfaction by both Houses of Parliament, discovered any other concern than for the

current year, for which supplies are generally demanded in very pressing terms, and sometimes such as imply no remarkable solicitude for posterity.

Nothing indeed can be more unreasonable and absurd, than to require that a monarch, distracted with cares and surrounded with enemies, should involve himself in superfluous anxieties, by an unnecessary concern about future generations. Are not pretenders, mock-patriots, masquerades, operas, birth-nights, treaties, conventions, reviews, drawing-rooms, the births of heirs, and the deaths of queens, sufficient to overwhelm any capacity but that of a king? Surely he that acquires himself successfully of such affairs, may content himself with the glory he acquires, and leave posterity to his successors.

That this has been the conduct of most princes, is evident from the accounts of all ages and nations; and therefore I hope it will not be thought that I have, without just reasons, deprived this inscription of the veneration it might demand as the work of a king.

With what laborious struggles against prejudice and inclination, with what efforts of reasoning, and pertinacity of self-denial, I have prevailed upon myself to sacrifice the honour of this monument to the love of truth, none who are unacquainted with the fondness of a commentator will be able to conceive. But this instance will be, I hope, sufficient to convince the public, that I write with sincerity, and that, whatever my success may be, my intentions are good.

Where we are to look for our author, it still remains to be considered; whether in the high road of public employments, or the bye-paths of private life.

It has always been observed of those that frequent a court, that they soon, by a kind of contagion, catch the regal spirit of neglecting futurity. The minister forms an expedient to suspend or perplex an inquiry into his measures for a few months, and applauds and triumphs in his own dexterity. The peer puts off his creditor for the present day, and forgets that he is ever to see him more. The frown of a prince, and the loss of a pension, have indeed been found of wonderful efficacy, to abstract men's thoughts from the present time, and fill them with zeal for the liberty and welfare of ages to come. But I am inclined to think more favourably of the author of this prediction, than that he was made a patriot by disappointment or disgust. If he ever saw a court, I would willingly believe, that he did not owe his concern for posterity to his ill reception there, but his ill reception there to his concern for posterity.

However, since truth is the same in the mouth of a hermit, or a prince, since it is not reason, but weakness, that makes us rate counsel by our

esteem for the counsellor, let us at length desist from this inquiry, so useless in itself, in which we have room to hope for so little satisfaction. Let us show our gratitude to the author, by answering his intentions, by considering minutely the lines which he has left us, and examining their import without heat, precipitancy, or party-prejudices; let us endeavour to keep the just mean, between searching ambitiously for far-fetched interpretations, and admitting such low meaning, and obvious and low sense, as is inconsistent with those great and extensive views, which it is reasonable to ascribe to this excellent man.

It may be yet farther asked, whether this inscription, which appears in the stone, be an original, and not rather a version of a traditional prediction in the old British tongue, which the zeal of some learned man prompted him to translate and engrave in a more known language for the instruction of future ages: but as the lines carry at the first view a reference both to the stone itself, and very remarkably to the place where it was found, I cannot see any foundation for such a suspicion.

It remains now that we examine the sense and import of the inscription, which, after having long dwelt upon it with the closest and most laborious attention, I must confess myself not yet able fully to comprehend. The following explications, therefore, are by no means laid down as certain and indubitable truths, but as conjectures not always wholly satisfactory even to myself, and which I had not dared to propose to so enlightened an age, an age which abounds with those great ornaments of human nature, sceptics, anti-moralists, and infidels, but with hopes that they would excite some person of greater abilities, to penetrate further into the oraculous obscurity of this wonderful prediction.

Not even the four first lines are without their difficulties, in which the time of the discovery of the stone seems to be the time assigned for the events foretold by it.

*Cum lapidem hunc, magni  
Qui nunc jacet incolæ signi  
Vel pede equus tanget,  
Vel arator vomere, franget,  
Sentiet ægra metus,  
Effundet patria fletus,  
Littorque ut fluctu,  
Resonabunt oppida luctu.*

Whene'er this stone, now hid beneath the lake,  
The horse shall trample, or the plough shall break,  
Then, O my country! shalt thou groan distrest,  
Grief in thine eyes, and terror in thy breast.  
Thy streets with violence of woe shall sound,  
Loud as the billows bursting on the ground.

"When this stone," says he, "which now lies hid beneath the waters of a deep lake, shall be struck upon by the horse, or broken by the plough, then shalt thou, my country, be astu-

nished with terrors, and drowned in tears; then shall thy toivis sound with lamentations, as thy shores with the roarings of the waves." These are the words literally rendered, but how are they verified? The lake is dry, the stone is turned up, but there is no appearance of this dismal scene. Is not all at home satisfaction and tranquillity? all abroad submission and compliance? Is it the interest or inclination of any prince or state to draw a sword against us? and are we not nevertheless secured by a numerous standing army, and a king who is himself an army? Have our troops any other employment than to march to a review? Have our fleets encountered any thing but winds and worms? To me the present state of the nation seems so far from any resemblance to the noise and agitation of a tempestuous sea, that it may be much more properly compared to the dead stillness of the waves before a storm.

*Nam fecunda rubri  
Serpent per prata colubri,  
Gramina visitantes,  
Flores fructusque vorantes,  
Omnia feedantes,  
Vilantes, et spoliantes;  
Quamquam laud pugnaces  
Ibunt per cuncta vinaces,  
Fures absque timore,  
Et pingues absque labore.*

Then through thy fields shall scarlet reptiles stray,  
And rapine and pollution mark their way.  
Their hungry swarms the peaceful vale shall fright,  
Still fierce to threaten, still afraid to fight;  
The teeming year's whole product shall devour,  
Insatiate pluck the fruit, and crop the flower:  
Shall glutton on the industrious peasant's spoil,  
Rob without fear, and fatten without toil.

He seems, in these verses, to descend to a particular account of this dreadful calamity; but his description is capable of very different senses with almost equal probability.

*Red serpents*, says he, (*rubri colubri* are the Latin words, which the poetical translator has rendered *scarlet reptiles*, using a general term for a particular, in my opinion too licentiously,) "Red serpents shall wander o'er her meadows, and pillage and pollute," &c. The particular mention of the colour of this destructive viper may be some guide to us in this labyrinth, through which, I must acknowledge, I cannot yet have any certain path. I confess that when a few days after my perusal of this passage, I heard of the multitude of lady-birds seen in Kent, I began to imagine that these were the fatal insects, by which the island was to be laid waste, and therefore looked over all accounts of them with uncommon concern. But when my first terrors began to subside, I soon recollected that these creatures, having both wings and feet, would scarcely have been called serpents; and was quickly convinced by their leaving the

country without doing any hurt, that they had no quality, but the colour, in common with the ravagers here described.

As I am not able to determine any thing on this question, I shall content myself with collecting, into one view, the several properties of this pestiferous brood, with which we are threatened, as hints to more sagacious and fortunate readers, who, when they shall find any *red animal* that ranges uncontrolled over the country, and devours the labours of the trader and the husbandman; that carries with it corruption, rapine, pollution, and devastation; that threatens without courage, robs without fear, and is pampered without labour, they may know that the prediction is completed. Let me only remark farther, that if the style of this, as of all other predictions, is figurative, the serpent, a wretched animal that crawls upon the earth, is a proper emblem of low views, self-interest, and base submission, as well as of cruelty, mischief, and malevolence.

I cannot forbear to observe in this place, that as it is of no advantage to mankind to be forewarned of inevitable and insurmountable misfortunes, the author probably intended to hint to his countrymen, the proper remedies for the evils he describes. In this calamity, on which he dwells longest, and which he seems to deplore with the deepest sorrow, he points out one circumstance, which may be of great use to disperse our apprehensions, and awaken us from that panic which the reader must necessarily feel at the first transient view of this dreadful description. These serpents, says the original, are *HAUD PUGNACES*, of *no fighting race*: they will threaten, indeed, and hiss, and terrify the weak, and timorous, and thoughtless, but have no real courage or strength. So that the mischief done by them, their ravages, devastations, and robberies, must be only the consequences of cowardice in the sufferers, who are harassed and oppressed only because they suffer it without resistance. We are therefore to remember whenever the pest here threatened shall invade us, that submission and tameness will be certain ruin, and that nothing but spirit, vigilance, activity, and opposition, can preserve us from the most hateful and reproachful misery, that of being plundered, starved, and devoured by vermin and by reptiles.

*Horrida dementes  
Rapti discordia gentes,  
Plurima tunc leges  
Mutabil, plurima reges  
Natio.*

Then o'er the world shall discord stretch her wings,  
Kings change their laws, and kingdoms change their kings.

Here the author takes a general survey of the state of the world, and the changes that were to

happen about the time of the discovery of this monument in many nations. As it is not likely that he intended to touch upon the affairs of other countries any farther than the advantage of his own made it necessary, we may reasonably conjecture, that he had a full and distinct view of all the negotiations, treaties, confederacies, of all the triple and quadruple alliances, and all the leagues offensive and defensive, in which we were to be engaged, either as principals, accessaries, or guarantees, whether by policy, or hope, or fear, or our concern for preserving the *balance of power*, or our tenderness for the liberties of Europe. He knew that our negotiators would interest us in the affairs of the whole earth, and that no state could either rise or decline in power, either extend or lose its dominions, without affecting politics and influencing our councils.

This passage will bear an easy and natural application to the present time, in which so many revolutions have happened, so many nations have changed their masters, and so many disputes and commotions are embroiling almost in every part of the world.

That almost every state in Europe and Asia, that is, almost every country then known, is comprehended in this prediction, may be easily conceived; but whether it extends to regions at that time undiscovered, and portends any alteration of government in Carolina and Georgia, let more able or more daring expositors determine.

— *Conversa*  
*In rabiem tunc contremet Ursu*  
*Cynthia.*

The bear enraged, th' affrighted moon shall dread.

The terror created to the moon by the anger of the bear, is a strange expression, but may perhaps relate to the apprehensions raised in the Turkish empire, of which a crescent or new moon is the imperial standard, by the increasing power of the Empress of Russia, whose dominions lie under the northern constellation called the *Bear*.

— *Tunc latus*  
*Flarebunt lilia pratis.*

The lilies o'er the vales triumphant spread.

The lilies borne by the kings of France are an apt representation of that country; and their flourishing over wide-extended valleys, seems to regard the new increase of the French power, wealth, and dominions, by the advancement of their trade, and the accession of Lorain. This is at first view an obvious, but perhaps for that very reason not the true, inscription. How can we reconcile it with the following passage,

*Nec, fremere audebit*  
*Leo, sed violare timebit,*

*Omnia consuetus*  
*Populari pascua letus,*

Nor shall the lion, wont of old to reign  
Despotic o'er the desolated plain,  
Henceforth th' inviolable bloom invade,  
Or dare to murmur in the flowery glade,

in which the lion that used at pleasure to lay the pastures waste, is represented as not daring to touch the lilies, or murmur at their growth? The lion, it is true, is one of the supporters of the arms of England, and may therefore figure our countrymen, who have in ancient times made France a desert. But can it be said, that the lion dares not murmur or rage (for *fremere* may import both), when it is evident, that for many years this whole kingdom has murmured? however, it may be at present calm and secure, by its confidence in the wisdom of our politicians and the address of our negotiators.

*Ante oculos natos*  
*Calcceatos et cruciatus*  
*Jam feret ignavus,*  
*Vetitaque libidine pravis.*

His tortured sons shall die before his face,  
While he lies melting in a lewd embrace.

Here are other things mentioned of the lion equally unintelligible, if we suppose them to be spoken of our nation, as that he lies sluggish, and depraved with unlawful lusts, while his offspring is trampled and tortured before his eyes. But in that place can the English be said to be trampled or tortured? Where are they treated with injustice or contempt? What nation is there from pole to pole that does not reverence the nod of the British King? Is not our commerce unrestrained? Are not the riches of the world our own? Do not our ships sail unmolested, and our merchants traffic in perfect security? Is not the very name of England treated by foreigners in a manner never known before? Or if some slight injuries have been offered, if some of our petty traders have been stopped, our possessions threatened, our effects confiscated, our flag insulted, or our ears cropped, have we lain sluggish and unactive? Have not our fleets been seen in triumph at Spithead? Did not Hosier visit the Bastimentos, and is not Haddock now stationed at Port Mahon?

*En quoque quoa mirum,*  
*Quod dicas denique dirum,*  
*Sanguinem equus sugit,*  
*Negue bellua victa remugit.*

And, yet more strange! his veins a horse shall drain,  
Nor shall the passive coward once complain.

It is farther asserted in the concluding lines, that the horse shall suck the lion's blood. This is still more obscure than any of the rest; and indeed the difficulties I have met with ever since the first mention of the lion are so many and

great, that I had, in utter despair of surmounting them, once desisted from my design of publishing any thing upon this subject: but was prevailed upon by the importunity of some friends, to whom I can deny nothing, to resume my design; and I must own, that nothing animated me so much as the hope they flattered me with, that my essay might be inserted in the *Gazetteer*, and so become of service to my country.

That a weaker animal should suck the blood of a stronger without resistance, is wholly improbable and inconsistent with the regard for self-preservation, so observable in every order and species of beings. We must therefore necessarily endeavour after some figurative sense not liable to so insuperable an objection.

Were I to proceed in the same tenor of interpretation, by which I explained the moon and the lilies, I might observe that a horse is the arms of H———. But how then does the horse suck the lion's blood? Money is the blood of the body politic.—But my zeal for the present happy establishment will not suffer me to pursue a train of thought that leads to such shocking conclusions. The idea is detestable, and such as, it ought to be hoped, can enter into the mind of none but a virulent Republican, or bloody Jacobite. There is not one honest man in the nation unconvinced how weak an attempt it would be to endeavour to confute this insinuation. An insinuation which no party will dare to abet, and of so fatal and destructive a tendency, that it may prove equally dangerous to the author, whether true or false.

As therefore I can form no hypothesis on which a consistent interpretation may be built, I must leave these loose and unconnected hints entirely to the candour of the reader, and confess that I do not think my scheme of explication just, since I cannot apply it throughout the whole without involving myself in difficulties, from which the ablest interpreter would find it no easy matter to get free.

Being therefore convinced, upon an attentive and deliberate review of these observations, and a consultation with my friends, of whose abilities I have the highest esteem, and whose impartiality, sincerity, and probity, I have long known and frequently experienced, that my conjectures are in general very uncertain, often improbable, and sometimes little less than apparently false, I was long in doubt whether I ought not entirely to suppress them, and content myself with publishing in the *Gazetteer* the inscription, as it stands engraven on the stone, without translation or commentary, unless that ingenious and learned society should favour the world with their own remarks.

To this scheme, which I thought extremely well calculated for the public good, and therefore very eagerly communicated to my acquaintance and fellow-students, some objections were

started, which, as I had not foreseen, I was unable to answer.

It was observed first, That the *Daily Dissertations* published by that fraternity, are written with such profundity of sentiment, and filled with such uncommon modes of expression as to be themselves sufficiently unintelligible to vulgar readers, and that therefore the venerable obscurity of this prediction, would much less excite the curiosity and awaken the attention of mankind, than if it were exhibited in any other paper, and placed in opposition to the clear and easy style of an author generally understood.

To this argument, formidable as it was, I answered, after a short pause, that, with all proper deference to the great sagacity and advanced age of the objector, I could not but conceive that his position confuted itself, and that a reader of the *Gazetteer*, being by his own confession accustomed to encounter difficulties, and search for meaning where it was not easily to be found, must be better prepared than any other man for the perusal of these ambiguous expressions. And that, besides, the explication of this stone, being a task which nothing could surmount but the most acute penetration joined with indefatigable patience, seemed in reality reserved for those who have given proofs of both in the highest degree, by reading and understanding the *Gazetteer*.

This answer satisfied every one but the objector, who, with an obstinacy not very uncommon, adhered to his own opinion, though he could not defend it: and not being able to make any reply, attempted to laugh away my argument, but found the rest of my friends so little disposed to jest upon this important question, that he was forced to restrain his mirth, and content himself with a sullen and contemptuous silence.

Another of my friends, whom I had assembled on this occasion, having owned the solidity of my answer to the first objection, offered a second, which in his opinion could not be so easily defeated.

"I have observed," says he, "that the essays in the *Gazetteer*, though written on very important subjects by the ablest hands which ambition can incite, friendship engage, or money procure, have never, though circulated through the kingdom with the utmost application, had any remarkable influence upon the people. I know many persons of no common capacity, that hold it sufficient to peruse the papers four times a year; and others who receive them regularly, and, without looking upon them, treasure them under ground for the benefit of posterity. So that the inscription may, by being inserted there, sink once more into darkness and oblivion, instead of informing the age, and assisting our present ministry in the regulation of their measures."

Another observed, that nothing was more unreasonable than my hope, that any remarks or elucidations would be drawn up by that fraternity, since their own employments do not allow them any leisure for such attempts. Every one knows that panegyric is in its own nature no easy task, and that to defend is much more difficult than to attack; consider then, says he, what industry, what assiduity it must require, to praise and vindicate a ministry like ours.

It was hinted by another, that an inscription which had no relation to any particular set of men amongst us, but was composed many ages before the parties, which now divide the nation, had a being, could not be so properly conveyed to the world by means of a paper dedicated to political debates.

Another to whom I had communicated my own observations in a more private manner, and who had inserted some of his own arguments, declared it as his opinion, that they were, though very controvertible and unsatisfactory, yet too valuable to be lost; and that though to insert the inscription in a paper of which such numbers are daily distributed at the expense of the public, would doubtless be very agreeable to the generous design of the author, yet he hoped that as all the students, either of politics or antiquities, would receive both pleasure and improvement from the dissertation with which it is accompanied, none of them would regret to pay for so agreeable an entertainment.

It cannot be wondered that I have yielded at last to such weighty reasons, and such insinuating compliments, and chosen to gratify at once the inclination of friends and the vanity of an author. Yet I should think I had very imperfectly discharged my duty to my country, did I not warn all whom either interest or curiosity shall incite to the perusal of this treatise, not to lay any stress upon my explications.

How a more complete and indisputable interpretation may be obtained, it is not easy to say. This will, I suppose, be readily granted, that it is not to be expected from any single hand, but from the joint inquiries and united labours of a numerous society of able men, instituted by authority, selected with great discernment and impartiality, and supported at the charge of the nation.

I am very far from apprehending that any proposal for the attainment of so desirable an end, will be rejected by this inquisitive and enlightened age, and shall therefore lay before the public the project which I have formed and matured by long consideration, for the institution of a society of commentators upon this inscription.

I humbly propose, that thirty of the most distinguished genius be chosen for this employment, half from the Inns of Court, and half from

the army, and be incorporated into a society for five years, under the name of the SOCIETY or COMMENTATORS.

That great undertakings can only be executed by a great number of hands, is too evident to require any proof; and I am afraid all that read this scheme will think that it is chiefly defective in this respect, and that when they reflect how many commissaries were thought necessary at Seville, and that even their negotiations entirely miscarried, probably for want of more associates, they will conclude that I have proposed impossibilities, and that the ends of the institution will be defeated by an injudicious and ill-timed frugality.

But if it be considered, how well the persons I recommend must have been qualified by their education and profession for the provinces assigned them, the objection will grow less weighty than it appears. It is well known to be the constant study of the lawyers to discover in acts of parliament, meanings which escaped the committees that drew them up, and the senates that passed them into laws, and to explain wills into a sense wholly contrary to the intention of the testator. How easily may an adept in these admirable and useful arts, penetrate into the most hidden import of this prediction? A man accustomed to satisfy himself with the obvious and natural meaning of a sentence, does not easily shake off his habit; but a true-bred lawyer never contents himself with one sense, when there is another to be found.

Nor will the beneficial consequences of this scheme terminate in the explication of this monument; they will extend much farther: for the commentators having sharpened and improved their sagacity by this long and difficult course of study, will, when they return into public life, be of wonderful service to the government, in examining pamphlets, songs, and journals, and in drawing up informations, indictments, and instructions for special juries. They will be wonderfully fitted for the posts of Attorney and Solicitor General, but will excel above all, as licensers for the stage.

The gentlemen of the army will equally adorn the province to which I have assigned them, of setting the discoveries and sentiments of their associates in a clear and agreeable light. The lawyers are well known to be very happy in expressing their ideas, being for the most part able to make themselves understood by none but their own fraternity. But the geniuses of the army have sufficient opportunities, by their free access to the levee and the toilet, their constant attendance on balls and assemblies, and that abundant leisure which they enjoy beyond any other body of men, to acquaint themselves with every new word and prevailing mode of expression, and to attain the utmost nicety and most polished prettiness of language.

It will be necessary, that during their attendance upon the society, they be exempt from any obligation to appear in Hyde-Park: and that upon no emergency, however pressing, they be called away from their studies, unless the nation be in immediate danger by an insurrection of weavers, colliers, or smugglers.

There may not perhaps be found in the army such a number of men, who have ever condescended to pass through the labours and irksome forms of education in use among the lower classes of people, or submitted to learn the mercantile and plebeian arts of writing and reading. I must own, that though I entirely agree with the notions of the uselessness of any such trivial accomplishments in the military profession, and of their inconsistency with more valuable attainments; though I am convinced, that a man who can read and write, becomes, at least, a very disagreeable companion to his brother soldiers, if he does not absolutely shun their acquaintance; that he is apt to imbibe from his books odd notions of liberty and independency, and even sometimes of morality and virtue, utterly inconsistent with the desirable character of a pretty gentleman: though writing frequently stains the whitest finger, and reading has a natural tendency to cloud the aspect, and depress that airy and thoughtless vivacity, which is the distinguishing characteristic of a modern warrior; yet on this single occasion, I cannot but heartily wish, that by a strict search there may be discovered in the army fifteen men who can write and read.

I know that the knowledge of the alphabet is so disreputable among these gentlemen, that those who have by ill fortune formerly been taught it, have partly forgot it by disuse, and partly concealed it from the world, to avoid the raileries and insults to which their education might make them liable: I propose, therefore, that all the officers of the army may be examined upon oath one by one, and that if fifteen cannot be selected who are at present so qualified, the deficiency may be supplied out of those who having once learned to read, may perhaps, with the assistance of a master, in a short time refresh their memories.

It may be thought, at the first sight of this proposal, that it might not be improper to assign to every commentator a reader and secretary; but it may be easily conceived, that not only the public might murmur at such an addition of expense, but that by the unfaithfulness or negligence of their servants, the discoveries of the society may be carried to foreign courts, and made use of to the disadvantage of our own country.

For the residence of this society, I cannot think any place more proper than Greenwich-Hospital, in which they may have thirty apart-

ments fitted up for them, that they may make their observations in private, and meet once a day in the painted hall to compare them.

If the establishment of this society be thought a matter of too much importance to be deferred till the new buildings are finished, it will be necessary to make room for their reception, by the expulsion of such of the seamen as have no pretensions to the settlement there, but fractured limbs, loss of eyes, or decayed constitutions, who have lately been admitted in such numbers, that it is now scarce possible to accommodate a nobleman's groom, footman, or postilion, in a manner suitable to the dignity of his profession, and the original design of the foundation.

The situation of Greenwich will naturally dispose them to reflection and study: and particular caution ought to be used, lest any interruption be suffered to dissipate their attention or distract their meditations: for this reason, all visits and letters from ladies are strictly to be prohibited; and if any of the members shall be detected with a lap-dog, pack of cards, box of dice, draught table, snuff-box, or looking-glass, he shall for the first offence be confined for three months to water-gruel, and for the second be expelled the society.

Nothing now remains, but that an estimate be made of the expenses necessary for carrying on this noble and generous design. The salary to be allowed each professor cannot be less than 2000*l.* a year, which is indeed more than the regular stipend of a commissioner of excise, but it must be remembered, that the commentators have a much more difficult and important employment, and can expect their salaries but for the short space of five years, whereas a commissioner (unless he imprudently suffers himself to be carried away by a whimsical tenderness for his country) has an establishment for life.

It will be necessary to allow the society in general, 30,000*l.* yearly for the support of the public table, and 40,000*l.* for secret service.

Thus will the ministry have a fair prospect of obtaining the full sense and import of the prediction, without burthening the public with more than 650,000*l.* which may be paid out of the sinking fund; or if it be not thought proper to violate that sacred treasure by converting any part of it into uses not primarily intended, may be easily raised by a general poll-tax, or excise upon bread.

Having now completed my scheme, a scheme calculated for the public benefit, without regard to any party, I entreat all sects, factions, and distinctions of men among us, to lay aside for a time their party feuds and petty animosities; and by a warm concurrence on this urgent occasion, teach posterity to sacrifice every private interest to the advantage of their country.

OBSERVATIONS ON THE STATE OF  
AFFAIRS IN 1756.

FROM THE LITERARY MAGAZINE, No. IV.

THE time is now come in which every Englishman expects to be informed of the national affairs, and in which he has a right to have that expectation gratified. For whatever may be urged by ministers, or those whom vanity or interest make the followers of ministers, concerning the necessity of confidence in our governors and the presumption of prying with profane eyes into the recesses of policy, it is evident that this reverence can be claimed only by counsels yet unexecuted, and projects suspended in deliberation. But when a design has ended in miscarriage or success, when every eye and every ear is witness to general discontent, or general satisfaction, it is then a proper time to disentangle confusion, and illustrate obscurity, to show by what causes every event was produced, and in what effects it is likely to terminate; to lay down with distinct particularity what rumour always huddles in general exclamations, or perplexes by undigested narratives; to show whence happiness or calamity is derived, and whence it may be expected; and honestly to lay before the people what inquiry can gather of the past, and conjecture can estimate of the future.

The general subject of the present war is sufficiently known. It is allowed on both sides, that hostilities began in America, and that the French and English quarrelled about the boundaries of their settlements, about grounds and rivers to which, I am afraid, neither can show any other right than that of power, and which neither can occupy but by usurpation, and the dispossession of the natural lords and original inhabitants. Such is the contest, that no honest man can heartily wish success to either party.

It may indeed be alleged, that the Indians have granted large tracts of land both to one and to the other: but these grants can add little to the validity of our titles, till it be experienced how they were obtained; for if they were extorted by violence, or induced by fraud; by threats, which the miseries of other nations had shown not to be vain, or by promises of which no performance was ever intended, what are they but new modes of usurpation, but new instances of cruelty and treachery?

And indeed what but false hope or resistless terror can prevail upon a weaker nation to invite a stronger into their country, to give their lands to strangers whom no affinity of manners, or similitude of opinion, can be said to recommend, to permit them to build towns from which the natives are excluded, to raise fortresses by which they are intimidated, to settle themselves

with such strength that they cannot afterwards be expelled, but are for ever to remain the masters of the original inhabitants, the dictators of their conduct, and the arbiters of their fate?

When we see men acting thus against the precepts of reason, and the instincts of nature, we cannot hesitate to determine, that by some means or other they were debarred from choice; that they were lured or frightened into compliance; that they either granted only what they found impossible to keep, or expected advantages upon the faith of their new inmates, which there was no purpose to confer upon them. It cannot be said, that the Indians originally invited us to their coasts; we went uncalled and unexpected to nations who had no imagination that the earth contained any inhabitants so distant and so different from themselves. We astonished them with our ships, with our arms, and with our general superiority. They yielded to us as to beings of another and higher race, sent among them from some unknown regions, with power which naked Indians could not resist, and which they were therefore, by every act of humility, to propitiate, that they who could so easily destroy, might be induced to spare.

To this influence, and to this only, are to be attributed all the cessions and submissions of the Indian princes, if indeed any such cessions were ever made, of which we have no witness but those who claim from them; and there is no great malignity in suspecting, that those who have robbed have also lied.

Some colonies indeed have been established more peaceably than others. The utmost extremity of wrong has not always been practised; but those that have settled in the new world on the fairest terms, have no other merit than that of a scrivener who ruins in silence, over a plunderer that seizes by force; all have taken what had other owners, and all have had recourse to arms, rather than quit the prey on which they had fastened.

The American dispute between the French and us is therefore only the quarrel of two robbers for the spoils of a passenger; but as robbers have terms of confederacy, which they are obliged to observe as members of the gang, so the English and French may have relative rights, and do injustice to each other, while both are injuring the Indians. And such, indeed, is the present contest; they have parted the northern continent of America between them, and are now disputing about their boundaries, and each is endeavouring the destruction of the other by the help of the Indians, whose interest it is that both should be destroyed.

Both nations clamour with great vehemence about infractions of limits, violation of treaties, open usurpation, insidious artifices, and breach of faith. The English rail at the perfidious

French, and the French at the encroaching English: they quote treaties on each side, charge each other with aspiring to universal monarchy, and complain on either part of the insecurity of possession near such turbulent neighbours.

Through this mist of controversy it can raise no wonder that the truth is not easily discovered. When a quarrel has been long carried on between individuals, it is often very hard to tell by whom it was begun. Every fact is darkened by distance, by interest, and by multitudes. Information is not easily procured from far; those whom the truth will not favour, will not step voluntarily forth to tell it: and where there are many agents, it is easy for every single action to be concealed.

All these causes concur to the obscurity of the question, "By whom were hostilities in America commenced?" Perhaps there never can be remembered a time in which hostilities had ceased. Two powerful colonies inflamed with immemorial rivalry, and placed out of the superintendence of the mother nations, were not likely to be long at rest. Some opposition was always going forward, some mischief was every day done or meditated, and the borderers were always better pleased with what they could snatch from their neighbours, than what they had of their own.

In this disposition to reciprocal invasion a cause of dispute never could be wanting. The forests and deserts of America are without landmarks, and therefore cannot be particularly specified in stipulations; the appellations of those wide-extended regions have in every mouth a different meaning, and are understood on either side as inclination happens to contract or extend them. Who has yet pretended to define how much of America is included in Brazil, Mexico, or Peru? It is almost as easy to divide the Atlantic ocean by a line, as clearly to ascertain the limits of those uncultivated, uninhabitable, unmeasured regions.

It is likewise to be considered, that contracts concerning boundaries are often left vague and indefinite without necessity, by the desire of each party to interpret the ambiguity to its own advantage when a fit opportunity shall be found. In forming stipulations, the commissaries are often ignorant, and often negligent; they are sometimes weary with debate, and contract a tedious discussion into general terms, or refer it to a former treaty, which was never understood. The weaker part is always afraid of requiring explanations, and the stronger always has an interest in leaving the question undecided: thus it will happen, without great caution on either side, that after long treaties solemnly ratified, the rights that had been disputed are still equally open to controversy.

In America, it may be easily supposed, that

there are tracts of land not yet claimed by either party, and therefore mentioned in no treaties, which yet one or the other may be afterwards inclined to occupy; but to these vacant and unsettled countries each nation may pretend, as each conceives itself intitled to all that is not expressly granted to the other.

Here then is a perpetual ground of contest: every enlargement of the possessions of either will be considered as something taken from the other, and each will endeavour to regain what had never been claimed, but that the other occupied it.

Thus obscure in its original is the American contest. It is difficult to find the first invader, or to tell where invasion properly begins; but I suppose it is not to be doubted, that after the last war, when the French had made peace with such apparent superiority, they naturally began to treat us with less respect in distant parts of the world, and to consider us as a people from whom they had nothing to fear, and who could no longer presume to contravene their designs or to check their progress.

The power of doing wrong with impunity seldom waits long for the will; and it is reasonable to believe, that in America the French would avow their purpose of aggrandizing themselves with at least as little reserve as in Europe. We may therefore readily believe, that they were unquiet neighbours, and had no great regard to right, which they believed us no longer able to enforce.

That in forming a line of forts behind our colonies, if in no other part of their attempt, they had acted against the general intention, if not against the literal terms of treaties, can scarcely be denied; for it never can be supposed that we intended to be inclosed between the sea and the French garrisons, or preclude ourselves from extending our plantations backwards to any length that our convenience should require.

With dominion is conferred every thing that can secure dominion. He that has the coast, has likewise the sea to a certain distance; he that possesses a fortress, has the right of prohibiting another fortress to be built within the command of its cannon. When, therefore, we planted the coast of North America, we supposed the possession of the inland region granted to an indefinite extent; and every nation that settled in that part of the world, seems by the permission of every other nation, to have made the same supposition in its own favour.

Here then, perhaps, it will be safest to fix the justice of our cause; here we are apparently and indisputably injured, and this injury may, according to the practice of nations, be justly resentment. Whether we have not in return made some encroachments upon them, must be left doubtful, till our practices on the Ohio shall

be stated and vindicated. There are no two nations confining on each other, between whom a war may not always be kindled with plausible pretences on either part, as there is always passing between them a reciprocatation of injuries, and fluctuation of encroachments.

From the conclusion of the last peace, perpetual complaints of the supplantations and invasions of the French have been sent to Europe from our colonies, and transmitted to our ministers at Paris, where good words were sometimes given us, and the practices of the American commanders were sometimes disowned, but no redress was ever obtained, nor is it probable that any prohibition was sent to America. We were still amused with such doubtful promises as those who are afraid of war are ready to interpret in their own favour, and the French pushed forward their line of fortresses, and seemed to resolve that before our complaints were finally dismissed, all remedy should be hopeless.

We likewise endeavoured at the same time to form a barrier against the Canadians by sending a colony to New Scotland, a cold uncomfortable tract of ground, of which we had long the nominal possession before we really began to occupy it. To this those were invited whom the cessation of war deprived of employment, and made burdensome to their country; and settlers were allured thither by many fallacious descriptions of fertile valleys and clear skies. What effects these pictures of American happiness had upon my countrymen, I was never informed, but I suppose very few sought provision in those frozen regions, whom guilt or poverty did not drive from their native country. About the boundaries of this new colony there were some disputes, but as there was nothing yet worth a contest, the power of the French was not much exerted on that side; some disturbance was however given, and some skirmishes ensued. But perhaps being peopled chiefly with soldiers, who would rather live by plunder than by agriculture, and who consider war as their best trade, New Scotland would be more obstinately defended than some settlements of far greater value; and the French are too well informed of their own interest, to provoke hostility for no advantage, or to select that country for invasion, where they must hazard much and can win little. They therefore pressed on southward behind our ancient and wealthy settlements, and built fort after fort at such distances that they might conveniently relieve one another, invade our colonies with sudden incursions, and retire to places of safety before our people could unite to oppose them.

This design of the French has been long formed, and long known, both in America and Europe, and might at first have been easily repressed, had force been used instead of expostu-

lation. When the English attempted a settlement upon the is and of St. Lucia, the French, whether justly or not, considering it as neutral and forbidden to be occupied by either nation, immediately landed upon it, and destroyed the houses, wasted the plantations, and drove or carried away the inhabitants. This was done in the same peace, when mutual professions of friendship were daily exchanged by the two courts, and was not considered as any violation of treaties, nor was any more than a very soft remonstrance made on our part.

The French therefore taught us how to act; but a Hanoverian quarrel with the house of Austria for some time induced us to court, at any expense, the alliance of a nation whose very situation makes them our enemies. We suffered them to destroy our settlements, and to advance their own, which we had an equal right to attack. The time however came at last, when we ventured to quarrel with Spain, and then France no longer suffered the appearance of peace to subsist between us, but armed in defence of her ally.

The events of the war are well known: we pleased ourselves with a victory at Dettingen, where we left our wounded men to the care of our enemies, but our army was broken at Fontenoy and Val; and though after the disgrace which we suffered in the Mediterranean, we had some naval success, and an accidental dearth made peace necessary for the French, yet they prescribed the conditions, obliged us to give hostages, and acted as conquerors, though as conquerors of moderation.

In this war the Americans distinguished themselves in a manner unknown and unexpected. The New English raised an army, and under the command of Pepperel took Cape Breton, with the assistance of the fleet. This is the most important fortress in America. We pleased ourselves so much with the acquisition, that we could not think of restoring it; and, among the arguments used to inflame the people against Charles Stuart, it was very clamorously urged, that if he gained the kingdom, he would give Cape Breton back to the French.

The French however had a more easy expedient to regain Cape Breton than by exalting Charles Stuart to the English throne. They took in their turn fort St. George, and had our East India Company wholly in their power, whom they restored to the peace to their former possessions, that they may continue to export our silver.

Cape Breton therefore was restored, and the French were re-established in America, with equal power and greater spirit, having lost nothing by the war which they had before gained.

To the general reputation of their arms, and that habitual superiority which they derive from

it, they owe their power in America, rather than to any real strength or circumstances of advantage. Their numbers are yet not great; their trade, though daily improved, is not very extensive; their country is barren; their fortresses, though numerous, are weak, and rather shelters from wild beasts, or savage nations, than places built for defence against bombs or cannons. Cape Breton has been found not to be impregnable; nor, if we consider the state of the places possessed by the two nations in America, is there any reason upon which the French should have presumed to molest us, but that they thought our spirit so broken that we durst not resist them; and in this opinion our long forbearance easily confirmed them.

We forgot, or rather avoided to think, that what we delayed to do must be done at last, and done with more difficulty, as it was delayed longer; that while we were complaining, and they were eluding, or answering our complaints, fort was rising upon fort, and one invasion made a precedent for another.

This confidence of the French is exalted by some real advantages. If they possess in those countries less than we, they have more to gain and less to hazard; if they are less numerous, they are better united.

The French compose one body with one head. They have all the same interest, and agree to pursue it by the same means. They are subject to a governor commissioned by an absolute monarch, and participating the authority of his master. Designs are therefore formed without debate and executed without impediment. They have yet more martial than mercantile ambition, and seldom suffer their military schemes to be entangled with collateral projects of gain: they have no wish but for conquest, of which they justly consider riches as the consequence.

Some advantages they will always have as invaders. They make war at the hazard of their enemies: the contest being carried on in our territories, we must lose more by a victory, than they will suffer by a defeat. They will subsist, while they stay, upon our plantations; and perhaps destroy them when they can stay no longer. If we pursue them, and carry the war into their dominions, our difficulties will increase every step as we advance, for we shall leave plenty behind us, and find nothing in Canada but lakes and forests barren and trackless; our enemies will shut themselves up in their forts, against which it is difficult to bring cannon through so rough a country, and which, if they are provided with good magazines, will soon starve those who besiege them.

All these are the natural effects of their government and situation; they are accidentally more formidable as they are less happy. But the favour of the Indians which they enjoy, with very few exceptions, among all the nations

of the northern continent, we ought to consider with other thoughts; this favour we might have enjoyed, if we had been careful to deserve it. The French, by having these savage nations on their side, are always supplied with spies and guides, and with auxiliaries, like the Tartars to the Turks, or the Hussars to the Germans, of no great use against troops ranged in order of battle, but very well qualified to maintain a war among woods and rivulets, where much mischief may be done by unexpected onsets, and safety be obtained by quick retreats. They can waste a colony by sudden inroads, surprise the straggling planters, frighten the inhabitants into towns, hinder the cultivation of lands, and starve those whom they are not able to conquer.\*

## AN INTRODUCTION

TO THE

POLITICAL STATE OF GREAT BRITAIN.

WRITTEN IN THE YEAR 1756.

FROM THE LITERARY MAGAZINE, No. I

THE present system of English politics may properly be said to have taken rise in the reign of Queen Elizabeth. At this time, the protestant religion was established, which naturally allied us to the reformed state, and made all the popish powers our enemies.

We began in the same reign to extend our trade, by which we made it necessary to ourselves to watch the commercial progress of our neighbours; and if not to incommode and obstruct their traffic, to hinder them from impairing ours.

We then likewise settled colonies in America, which was become the great scene of European ambition; for, seeing with what treasures the Spaniards were annually enriched from Mexico and Peru, every nation imagined, that an American conquest or plantation would certainly fill the mother country with gold and silver. This produced a large extent of very distant dominions, of which we, at this time, neither knew nor foresaw the advantage or incumbrance; we seem to have snatched them into our hands, upon no very just principles of policy, only because every state, according to a prejudice of long continuance, concludes itself more powerful as its territories become larger.

The discoveries of new regions, which were then every day made the profit of remote traffic,

\* In the Magazine this article is promised "To be continued;" but the author was, by whatever means, diverted from it, and no continuation appears.

and the necessity of long voyages, produced, in a few years, a great multiplication of shipping. The sea was considered as the wealthy element; and, by degrees, a new kind of sovereignty arose, called naval dominion.

As the chief trade of the world, so the chief maritime power was at first in the hands of the Portuguese and Spaniards, who, by a compact, to which the consent of other princes was not asked, had divided the newly discovered countries between them; but the crown of Portugal having fallen to the king of Spain, or been seized by him, he was master of the ships of the two nations, with which he kept all the coasts of Europe in alarm, till the Armada, which he had raised at a vast expense for the conquest of England, was destroyed, which put a stop, and almost an end, to the naval power of the Spaniards.

At this time the Dutch, who were oppressed by the Spaniards, and feared yet greater evils than they felt, resolved no longer to endure the insolence of their masters: they therefore revolted; and after a struggle, in which they were assisted by the money and forces of Elizabeth, erected an independent and powerful commonwealth.

When the inhabitants of the low countries had formed their system of government, and some remission of the war gave them leisure to form schemes of future prosperity, they easily perceived that, as their territories were narrow, and their numbers small, they could preserve themselves only by that power which is the consequence of wealth; and that, by a people whose country produced only the necessaries of life, wealth was not to be acquired, but from foreign dominions, and by the transportation of the products of one country into another.

From this necessity, thus justly estimated, arose a plan of commerce, which was for many years prosecuted with industry and success, perhaps never seen in the world before, and by which the poor tenants of mud-walled villages and impassable bogs erected themselves into high and mighty states, who put the greatest monarchs at defiance, whose alliance was courted by the proudest, and whose power was dreaded by the fiercest nation. By the establishment of this state there arose to England a new ally, and a new rival.

At this time, which seems to be the period destined for the change of the face of Europe, France began first to rise into power; and, from defending her own provinces with difficulty and fluctuating success, to threaten her neighbours with encroachments and devastations. Henry the Fourth having, after a long struggle, obtained the crown, found it easy to govern nobles exhausted and wearied with a long civil war, and having composed the disputes between the Protestants and Papists, so as to obtain at least

a truce for both parties, was at leisure to accumulate treasure, and raise forces which he proposed to have employed in a design of settling for ever the balance of Europe. Of this great scheme he lived not to see the vanity, or to feel the disappointment; for he was murdered in the midst of his mighty preparations.

The French, however, were in this reign taught to know their own power; and the great designs of a king, whose wisdom they had so long experienced, even though they were not brought to actual experiment, disposed them to consider themselves as masters of the destiny of their neighbours; and, from that time, he that shall nicely examine their schemes and conduct, will, I believe, find that they began to take an air of superiority to which they had never pretended before; and that they had been always employed more or less openly upon schemes of dominion, though with frequent interruptions from domestic troubles, and with those intermissions which human counsels must always suffer, as men intrusted with great affairs are dissipated in youth, and languid in age, are embarrassed by competitors, or, without any external reason, change their minds.

France was now no longer in dread of insults and invasions from England. She was not only able to maintain her own territories, but prepared, on all occasions, to invade others; and we had now a neighbour whose interest it was to be an enemy, and who has disturbed us, from that time to this, with open hostility or secret machinations.

Such was the state of England and its neighbours, when Elizabeth left the crown to James of Scotland. It has not, I think, been frequently observed by historians at how critical a time the union of the two kingdoms happened. Had England and Scotland continued separate kingdoms, when France was established in the full possession of her natural power, the Scots, in continuance of the league, which it would now have been more than ever their interest to observe, would, upon every instigation of the French court, have raised an army with French money, and harassed us with an invasion, in which they would have thought themselves successful, whatever numbers they might have left behind them. To a people warlike and indigent, an incursion into a rich country is never hurtful. The pay of France and the plunder of the northern counties, would always have tempted them to hazard their lives, and we should have been under the necessity of keeping a line of garrisons along our border.

This trouble, however, we escaped by the accession of King James; but it is uncertain, whether his natural disposition did not injure us more than this accidental condition happened to benefit us. He was a man of great theoretical knowledge, but of no practical wisdom: he was

very well able to discern the true interest of himself, his kingdom, and his posterity, but sacrificed it, upon all occasions, to his present pleasure or his present ease; so conscious of his own knowledge and abilities, that he would not suffer a minister to govern, and so lax of attention, and timorous of opposition, that he was not able to govern for himself. With this character James quietly saw the Dutch invade our commerce; the French grew every day stronger and stronger; and the Protestant interest, of which he boasted himself the head, was oppressed on every side, while he writ, and hunted, and despatched ambassadors, who, when their master's weakness was once known, were treated in foreign courts with very little ceremony. James, however, took care to be flattered at home, and was neither angry nor ashamed at the appearance that he made in other countries.

Thus England grew weaker, or, what is in political estimation the same thing, saw her neighbours grow stronger, without receiving proportionable additions to her own power. Not that the mischief was so great as it is generally conceived or represented; for, I believe, it may be made to appear, that the wealth of the nation was, in this reign, very much increased, though that of the crown was lessened. Our reputation for war was impaired: but commerce seems to have been carried on with great industry and vigour, and nothing was wanting, but that we should have defended ourselves from the incroachments of our neighbours.

The inclination to plant colonies in America still continued, and this being the only project in which men of adventure and enterprise could exert their qualities in a pacific reign, multitudes, who were discontented with their condition in their native country, and such multitudes there will always be, sought relief, or at least a change in the western regions, where they settled in the northern part of the continent, at a distance from the Spaniards, at that time almost the only nation that had any power or will to obstruct us.

Such was the condition of this country when the unhappy Charles inherited the crown. He had seen the errors of his father, without being able to prevent them, and, when he began his reign, endeavoured to raise the nation to its former dignity. The French Papists had begun a new war upon the Protestants: Charles sent a fleet to invade Rhé and relieve Rochelle, but his attempts were defeated, and the Protestants were subdued. The Dutch, grown wealthy and strong, claimed the right of fishing in the British seas: this claim the king, who saw the increasing power of the states of Holland, resolved to contest. But for this end it was necessary to build a fleet, and a fleet could not be built without expence: he was advised to levy ship-mo-

ney, which gave occasion to the civil war, of which the events and conclusion are too well known.

While the inhabitants of this island were embroiled among themselves, the power of France and Holland was every day increasing. The Dutch had overcome the difficulties of their infant commonwealth; and, as they still retained their vigour and industry, from rich grew continually richer, and from powerful more powerful. They extended their traffic, and had not yet admitted luxury; so that they had the means and the will to accumulate wealth without any incitement to spend it. The French, who wanted nothing to make them powerful, but a prudent regulation of their revenues, and a proper use of their natural advantages, by the successive care of skilful ministers, became every day stronger, and more conscious of their strength.

About this time it was, that the French first began to turn their thoughts to traffic and navigation, and to desire, like other nations, an American territory. All the fruitful and valuable parts of the western world were already either occupied or claimed, and nothing remained for France but the leavings of other navigators, for she was not yet haughty enough to seize what the neighbouring powers had already appropriated.

The French therefore contented themselves with sending a colony to Canada, a cold uncomfortable uninviting region, from which nothing but furs and fish were to be had, and where the new inhabitants could only pass a laborious and necessitous life, in perpetual regret of the deliciousness and plenty of their native country.

Notwithstanding the opinion which our countrymen have been taught to entertain of the comprehension and foresight of French politicians, I am not able to persuade myself, that when this colony was first planted, it was thought of much value, even by those that encouraged it; there was probably nothing more intended than to provide a drain into which the waste of an exuberant nation might be thrown, a place where those who could do no good might live without the power of doing mischief. Some new advantage they undoubtedly saw, or imagined themselves to see, and what more was necessary to the establishment of the colony was supplied by natural inclination to experiments, and that impatience of doing nothing, to which mankind perhaps owe much of what is imagined to be effected by more splendid motives.

In this region of desolate sterility they settled themselves, upon whatever principle; and as they have from that time had the happiness of a government by which no interest has been neglected, nor any part of their subjects overlooked, they have, by continual encouragement

and assistance from France, been perpetually enlarging their bounds and increasing their numbers.

These were at first, like other nations who invaded America, inclined to consider the neighbourhood of the natives as troublesome and dangerous, and are charged with having destroyed great numbers: but they are now grown wiser, if not honest, and instead of endeavouring to frighten the Indians away, they invite them to intermarriage and cohabitation, and allure them by all practicable methods to become the subjects of the king of France.

If the Spaniards, when they first took possession of the newly-discovered world, instead of destroying the inhabitants by thousands, had either had the urbanity or the policy to have conciliated them by kind treatment, and to have united them gradually to their own people, such an accession might have been made to the power of the king of Spain, as would have made him far the greatest monarch that ever yet ruled in the globe; but the opportunity was lost by foolishness and cruelty, and now can never be recovered.

When the parliament had finally prevailed over our king, and the army over the parliament, the interest of the two commonwealths of England and Holland soon appeared to be opposite, and a new government declared war against the Dutch. In this contest was exerted the utmost power of the two nations, and the Dutch were finally defeated, yet not with such evidence of superiority as left us much reason to boast our victory: they were obliged however to solicit peace, which was granted them on easy conditions: and Cromwell, who was now possessed of the supreme power, was left at leisure to pursue other designs.

The European powers had not yet ceased to look with envy on the Spanish acquisitions in America, and therefore Cromwell thought, that if he gained any part of these celebrated regions, he should exalt his own reputation and enrich the country. He therefore quarrelled with the Spaniards upon some such subject of contention as he that is resolved upon hostility may always find, and sent Penn and Venables into the western seas. They first landed in Hispaniola, whence they were driven off with no great reputation to themselves; and that they might not return without having done something, they afterwards invaded Jamaica, where they found less resistance, and obtained that island, which was afterwards consigned to us, being probably of little value to the Spaniards, and continues to this day a place of great wealth and dreadful wickedness, a den of tyrants, and a dungeon of slaves.

Cromwell, who perhaps had not leisure to study foreign politics, was very fatally mistaken with regard to Spain and France. Spain had

been the last power in Europe which had openly pretended to give law to other nations, and the memory of this terror remained when the real cause was at an end. We had more lately been frightened by Spain than by France, and though very few were then alive of the generation that had their sleep broken by the Armada, yet the name of the Spaniards was still terrible, and a war against them was pleasing to the people.

Our own troubles had left us very little desire to look out upon the continent, and inveterate prejudice hindered us from perceiving, that for more than half a century the power of France had been increasing, and that of Spain had been growing less; nor does it seem to have been remembered, which yet required no great depth of policy to discern, that of two monarchs, neither of which could be long our friends, it was our interest to have the weaker near us; or that if a war should happen, Spain, however wealthy or strong in herself, was by the dispersion of her territories more obnoxious to the attacks of a naval power, and consequently had more to fear from us, and had it less in her power to hurt us.

All these considerations were overlooked by the wisdom of that age, and Cromwell assisted the French to drive the Spaniards out of Flanders, at a time when it was our interest to have supported the Spaniards against France, as formerly the Hollanders against Spain, by which we might at least retard the growth of the French power, though, I think, it must have finally prevailed.

During this time our colonies, which were less disturbed by our commotions than the mother-country, naturally increased; it is probable that many who were unhappy at home took shelter in those remote regions, where, for the sake of inviting greater numbers, every one was allowed to think and live his own way. The French settlement in the mean time went slowly forward, too inconsiderable to raise any jealousy, and too weak to attempt any encroachments.

When Cromwell died, the confusions that followed produced the restoration of monarchy, and some time was employed in repairing the ruins of our constitution, and restoring the nation to a state of peace. In every change there will be many that suffer real or imaginary grievances, and therefore many will be dissatisfied. This was, perhaps, the reason why several colonies had their beginning in the reign of Charles the Second. The Quakers willingly sought refuge in Pennsylvania; and it is not unlikely that Carolina owed its inhabitants to the remains of that restless disposition, which has given so much disturbance to our country, and had now no opportunity of acting at home.

The Dutch still continuing to increase in

wealth and power, either kindled the resentment of their neighbours by their insolence, or raised their envy by their prosperity. Charles made war upon them without much advantage; but they were obliged at last to confess him the sovereign of the narrow seas. They were reduced almost to extremities by an invasion from France; but soon recovered from their consternation, and, by the fluctuation of war, regained their cities and provinces with the same speed as they had lost them.

During the time of Charles the Second the power of France was every day increasing; and Charles, who never disturbed himself with remote consequences, saw the progress of her arms, and the extension of her dominions, with very little uneasiness. He was indeed sometimes driven by the prevailing faction into confederacies against her: but as he had, probably, a secret partiality in her favour, he never persevered long in acting against her, nor ever acted with much vigour: so that, by his feeble resistance, he rather raised her confidence than hindered her designs.

About this time the French first began to perceive the advantage of commerce, and the importance of a naval force; and such encouragement was given to manufactures, and so eagerly was every project received by which trade could be advanced, that, in a few years, the sea was filled with their ships, and all the ports of the world crowded with their merchants. There is, perhaps, no instance in human story of such a change produced in so short a time in the schemes and manners of a people, of so many new sources of wealth opened, and such numbers of artificers and merchants made to start out of the ground, as was seen in the ministry of Colbert.

Now it was that the power of France became formidable to England. Her dominions were large before, and her armies numerous; but her operations were necessarily confined to the continent. She had neither ships for the transportation of her troops, nor money for their support in distant expeditions. Colbert saw both these wants, and saw that commerce only would supply them. The fertility of their country furnishes the French with commodities; the poverty of the common people keeps the price of labour low. By the obvious practice of selling much and buying little, it was apparent that they would soon draw the wealth of other countries into their own; and, by carrying out their merchandize in their own vessels, a numerous body of sailors would quickly be raised.

This was projected, and this was performed. The king of France was soon enabled to bribe those whom he could not conquer, and to terrify with his fleets those whom his armies could not have approached. The influence of France was suddenly diffused all over the globe; her

arms were dreaded, and her pensions received in remote regions, and those were almost ready to acknowledge her sovereignty, who, a few years before, had scarcely heard her name. She thundered on the coasts of Africa, and received ambassadors from Siam.

So much may be done by one wise man endeavouring with honesty the advantage of the public. But that we may not rashly condemn all ministers as wanting wisdom or integrity whose counsels have produced no such apparent benefits to their country, it must be considered, that Colbert had means of acting, which our government does not allow. He could enforce all his orders by the power of an absolute monarch; he could compel individuals to sacrifice their private profit to the general good; he could make one understanding preside over many hands, and remove difficulties by quick and violent expedients. Where no man thinks himself under any obligation to submit to another, and, instead of co-operating in one great scheme, every one hastens through bye-paths to private profit, no great change can suddenly be made; nor is superior knowledge of much effect, where every man resolves to use his own eyes and his own judgment, and every one applauds his own dexterity and diligence, in proportion as he becomes rich sooner than his neighbour.

Colonies are always the effects and causes of navigation. They who visit many countries, find some in which pleasure, profit, or safety invite them to settle; and these settlements, when they are once made, must keep a perpetual correspondence with the original country to which they are subject, and on which they depend for protection in danger, and supplies in necessity. So that a country once discovered and planted, must always find employment for shipping, more certainly than any foreign commerce, which, depending on casualties, may be sometimes more and sometimes less, and which other nations may contract or suppress. A trade to colonies can never be much impaired, being, in reality, only an intercourse between distant provinces of the same empire, from which intruders are easily excluded; likewise the interest and affection of the correspondent parties, however distant, is the same.

On this reason all nations, whose power has been exerted on the ocean, have fixed colonies in remote parts of the world; and while those colonies subsisted, navigation, if it did not increase, was always preserved from total decay. With this policy the French were well acquainted, and therefore improved and augmented the settlements in America, and other regions, in proportion as they advanced their schemes of naval greatness.

The exact time in which they made their acquisitions in America, or other quarters of the globe, it is not necessary to collect. It is suffi-

cient to observe, that their trade and their colonies increased together: and, if their naval armaments were carried on, as they really were, in greater proportion to their commerce, than can be practised in other countries, it must be attributed to the martial disposition at that time prevailing in the nation, to the frequent wars which Lewis the Fourteenth made upon his neighbours, and to the extensive commerce of the English and Dutch, which afforded so much plunder to privateers, that war was more lucrative than traffic.

Thus the naval power of France continued to increase during the reign of Charles the Second, who, between his fondness of ease and pleasure, the struggles of faction which he could not suppress, and his inclination to the friendship of absolute monarchy, had not much power or desire to repress it. And of James the Second, it could not be expected that he should act against his neighbours with great vigour, having the whole body of his subjects to oppose. He was not ignorant of the real interest of his country; he desired its power and its happiness, and thought rightly, that there is no happiness without religion; but he thought very erroneously and absurdly, that there is no religion without popery.

When the necessity of self-preservation had impelled the subjects of James to drive him from the throne, there came a time in which the passions, as well as interest, of the government, acted against the French, and in which it may perhaps be reasonably doubted, whether the desire of humbling France was not stronger than that of exalting England: of this, however, it is not necessary to inquire, since, though the intention may be different, the event will be the same. All mouths were now open to declare what every eye had observed before, that the arms of France were become dangerous to Europe; and that, if her encroachments were suffered a little longer, resistance would be too late.

It was now determined to re-assert the empire of the sea; but it was more easily determined than performed: the French made a vigorous defence against the united power of England and Holland, and were sometimes masters of the ocean, though the two maritime powers were united against them. At length, however, they were defeated at La Hogue; a great part of their fleet was destroyed, and they were reduced to carry on the war only with their privateers, from whom there was suffered much petty mischief, though there was no danger of conquest or invasion. They distressed our merchants, and obliged us to the continual expense of convoys and fleets of observation; and, by skulking in little coves and shallow waters, escaped our pursuit.

In this reign began our confederacy with the Dutch, which mutual interest has now improved into a friendship, conceived by some to be inseparable; and from that time the States began to be termed, in the style of politicians, our faithful friends, the allies which Nature has given us, our Protestant confederates, and by many other names of national endearment. We have, it is true, the same interest, as opposed to France, and some resemblance of religion, as opposed to popery; but we have such a rivalry, in respect of commerce, as will always keep us from very close adherence to each other. No mercantile man, or mercantile nation, has any friendship but for money, and alliance between them will last no longer than their common safety or common profit is endangered; no longer than they have an enemy, who threatens to take from each more than either can steal from the other.

We were both sufficiently interested in repressing the ambition, and obstructing the commerce of France; and therefore we concurred with as much fidelity and as regular co-operation as is commonly found. The Dutch were in immediate danger, the armies of their enemies hovered over their country, and therefore they were obliged to dismiss for a time their love of money, and their narrow projects of private profit, and to do what a trader does not willingly at any time believe necessary, to sacrifice a part for the preservation of the whole.

A peace was at length made, and the French, with their usual vigour and industry, rebuilt their fleets, restored their commerce, and became in a very few years able to contest again the dominion of the sea. Their ships were well-built, and always very numerously manned; their commanders, having no hopes but from their bravery or their fortune, were resolute, and being very carefully educated for the sea, were eminently skilful.

All this was soon perceived when Queen Anne, the then darling of England, declared war against France. Our success by sea, though sufficient to keep us from dejection, was not such as dejected our enemies. It is, indeed, to be confessed, that we did not exert our whole naval strength; Marlborough was the governor of our counsels, and the great view of Marlborough was a war by land, which he knew well how to conduct, both to the honour of his country, and his own profit. The fleet was therefore starved that the army might be supplied, and naval advantages were neglected for the sake of taking a town in Flanders, to be garrisoned by our allies. The French, however, were so weakened by one defeat after another, that, though their fleet was never destroyed by any total overthrow, they at last retained it in their harbours, and applied their whole force to the

resistance of the confederate army, that now began to approach their frontiers, and threatened to lay waste their provinces and cities.

In the latter years of this war, the danger of their neighbourhood in America seems to have been considered, and a fleet was fitted out and supplied with a proper number of land forces to seize Quebec, the capital of Canada, or New France; but this expedition miscarried, like that of Anson against the Spaniards, by the lateness of the season, and our ignorance of the coasts on which we were to act. We returned with loss, and only excited our enemies to greater vigilance, and perhaps to stronger fortifications.

When the peace of Utrecht was made, which those who clamoured among us most loudly against it, found it their interest to keep, the French applied themselves with the utmost industry to the extension of their trade, which we were so far from hindering, that for many years our ministry thought their friendship of such value, as to be cheaply purchased by whatever concession.

Instead therefore of opposing, as we had hitherto professed to do, the boundless ambition of the House of Bourbon, we became on a sudden solicitous for its exaltation, and studious of its interest. We assisted the schemes of France and Spain with our fleets, and endeavoured to make those our friends by servility, whom nothing but power will keep quiet, and who must always be our enemies while they are endeavouring to grow greater, and we determine to remain free.

That nothing might be omitted which could testify our willingness to continue on any terms the good friends of France, we were content to assist not only their conquests but their traffic; and though we did not openly repeal the prohibitory laws, we yet tamely suffered commerce to be carried on between the two nations, and wool was daily imported, to enable them to make cloth, which they carried to our markets and sold cheaper than we.

During all this time, they were extending and strengthening their settlements in America, contriving new modes of traffic, and framing new alliances with the Indian nations. They began now to find these northern regions, barren and desolate as they are, sufficiently valuable to desire at least a nominal possession, that might furnish a pretence for the exclusion of others; they therefore extended their claim to tracts of land, which they could never hope to occupy, took care to give their dominions an unlimited magnitude, have given in their maps the name of Louisiana to a country, of which part is claimed by the Spaniards, and part by the English, without any regard to ancient boundaries, or prior discovery.

When the return of Columbus from his great voyage had filled all Europe with wonder and

curiosity, Henry the Seventh sent Sebastian Cabot to try what could be found for the benefit of England: he declined the track of Columbus, and steering to the westward, fell upon the island, which, from that time, was called by the English, Newfoundland. Our princes seem to have considered themselves as entitled by their right of prior seizure to the northern parts of America, as the Spaniards were allowed by universal consent their claim to the southern region for the same reason; and we accordingly made our principal settlements within the limits of our own discoveries, and, by degrees, planted the eastern coast from Newfoundland to Georgia.

As we had, according to the European principles, which allow nothing to the natives of these regions, our choice of situation in this extensive country, we naturally fixed our habitations along the coast, for the sake of traffic and correspondence, and all the conveniences of navigable rivers. And when one port or river was occupied, the next colony, instead of fixing themselves in the inland parts behind the former, went on southward, till they pleased themselves with another maritime situation. For this reason our colonies have more length than depth; their extent from east to west, or from the sea to the interior country, bears no proportion to their reach along the coast from north to south.

It was, however, understood, by a kind of tacit compact among the commercial powers, that possession of the coast included a right to the inland: and, therefore, the charters granted to the several colonies limit their districts only from north to south, leaving their possessions from east to west unlimited and discretionary, supposing that, as the colony increases, they may take lands as they shall want them, the possession of the coasts excluding other navigators, and the unhappy Indians having no right of nature or of nations.

This right of the first European possessor was not disputed till it became the interest of the French to question it. Canada, or New France, on which they made their first settlement, is situated eastward of our colonies, between which they pass up the great river of St. Lawrence, with Newfoundland on the north, and Nova Scotia on the south. Their establishment in this country was neither envied nor hindered; and they lived here, in no great numbers, a long time, neither molesting their European neighbours, nor molested by them.

But when they grew stronger and more numerous, they began to extend their territories; and as it is natural for men to seek their own convenience, the desire of more fertile and agreeable habitations tempted them southward. There is land enough to the north and west of their settlements, which they may occupy with as good right as can be shown by the other

European usurpers, and which neither the English nor Spaniards will contest; but of this cold region they have enough already, and their resolution was to get a better country. This was not to be had but by settling to the west of our plantations, on ground which has been hitherto supposed to belong to us.

Hither, therefore, they resolved to remove, and to fix, at their own discretion, the western border of our colonies, which was heretofore considered as unlimited. Thus by forming a line of forts, in some measure parallel to the coast, they inclose us between their garrisons and the sea, and not only hinder our extension westward, but, whenever they have a sufficient navy in the sea, can harass us on each side, as they can invade us at pleasure from one or other of their forts.

This design was not perhaps discovered as soon as it was formed, and was certainly not opposed as soon as it was discovered; we foolishly hoped, that their encroachments would stop, that they would be prevailed on by treaty and remonstrance, to give up what they had taken, or to put limits to themselves. We suffered them to establish one settlement after another, to pass boundary after boundary, and add fort to fort, till at last they grew strong enough to avow their designs, and defy us to obstruct them.

By these provocations long continued, we are at length forced into a war, in which we have had hitherto very ill fortune. Our troops under Braddock were dishonourably defeated; our fleets have yet done nothing more than taken a few merchant-ships, and have distressed some private families, but have very little weakened the power of France. The detention of their seamen makes it indeed less easy for them to fit out their navy; but this deficiency will be easily supplied by the alacrity of the nation, which is always eager for war.

It is unpleasant to represent our affairs to our own disadvantage: yet it is necessary to show the evils which we desire to be removed; and, therefore, some account may very properly be given of the measures which have given them their present superiority.

They are said to be supplied from France with better governors than our colonies have the fate to obtain from England. A French governor is seldom chosen for any other reason than his qualifications for his trust. To be a bankrupt at home, or to be so infamously vicious that he cannot be decently protected in his own country, seldom recommends any man to the government of a French colony. Their officers are commonly skilful either in war or commerce, and are taught to have no expectation of honour or preferment, but from the justice and vigour of their administration.

Their great security is the friendship of the natives, and to this advantage they have certainly

an indubitable right; because it is the consequence of their virtue. It is ridiculous to imagine, that the friendship of nations, whether civil or barbarous, can be gained and kept but by kind treatment; and surely they who intrude, uncalled, upon the country of a distant people, ought to consider the natives as worthy of common kindness, and content themselves to rob without insulting them. The French, as has been already observed, admit the Indians, by intermarriage, to an equality with themselves; and those nations, with which they have no such near intercourse, they gain over to their interest by honesty in their dealings. Our factors and traders, having no other purpose in view than immediate profit, use all the arts of an European counting-house, to defraud the simple hunter of his furs.

These are some of the causes of our present weakness; our planters are always quarrelling with their governor, whom they consider as less to be trusted than the French; and our traders hourly alienate the Indians by their tricks and oppressions, and we continue every day to show by new proofs, that no people can be great who have ceased to be virtuous.

## OBSERVATIONS ON THE TREATY

Between his Britannic Majesty and Imperial Majesty of all the Russias, signed at Moscow, Dec. 11, 1742; the Treaty between his Britannic Majesty and the Landgrave of Hesse Cassel, signed June 13, 1753; and the Treaty between his Britannic Majesty and her Imperial Majesty of all the Russias, signed at St. Petersburg, Sept. 19-30, 1755

FROM THE LITERARY MAGAZINE FOR JULY, 1756.

THESE are the treaties which for many months filled the senate with debates, and the kingdom with clamours; which were represented on one part as instances of the most profound policy and the most active care of the public welfare, and on the other as acts of the most contemptible folly and most flagrant corruption, by which the wealth of Britain is sacrificed to private views, and to a particular province.

What honours our ministers and negotiators may expect to be paid to their wisdom, it is hard to determine, for the demands of vanity are not easily estimated. They should consider, before they call too loudly for encomiums, that they live in an age when the power of gold is no longer a secret, and in which no man finds much difficulty in making a bargain with money in his hand. To hire troops is very easy to those who are willing to pay their price. It appears, therefore, that whatever has been done, was done by means which every man knows how to

use, if fortune is kind enough to put them in his power. To arm the nations of the north in the cause of Britain, to bring down hosts against France from the polar circle, has indeed a sound of magnificence, which might induce a mind unacquainted with public affairs to imagine, that some effort of policy more than human had been exerted, by which distant nations were armed in our defence, and the influence of Britain was extended to the utmost limits of the world. But when this striking phenomenon of negotiation is more nearly inspected, it appears a bargain merely mercantile of one power that wanted troops more than money, with another that wanted money, and was burdened with troops; between whom their mutual wants made an easy contract, and who have no other friendship for each other, than reciprocal convenience happens to produce.

We shall therefore leave the praises of our ministers, to others, yet not without this acknowledgment, that if they have done little, they do not seem to boast of doing much; and that whether influenced by modesty or frugality, they have not wearied the public with mercenary panegyrists, but have been content with the concurrence of the parliament, and have not much solicited the applauses of the people.

In public as in private transactions, men more frequently deviate from the right for want of virtue than of wisdom; and those who declare themselves dissatisfied with these treaties, impute them not to folly, but corruption.

By these advocates for the independence of Britain, who, whether their arguments be just or not, seem to be most favourably heard by the people, it is alleged, that these treaties are expensive without advantage; that they waste the treasure which we want for our own defence, upon a foreign interest; and pour the gains of our commerce into the coffers of princes, whose enmity cannot hurt nor friendship help us; who set their subjects to sale like sheep or oxen, without any inquiry after the intentions of the buyer, and will withdraw the troops with which they have supplied us, whenever a higher bidder shall be found.

This perhaps is true, but whether it be true or false is not worth inquiry. We did not expect to buy their friendship, but their troops; nor did we examine upon what principle we were supplied with assistance; it was sufficient that we wanted forces, and that they were willing to furnish them. Policy never pretended to make men wise and good; the utmost of her power is to make the best use of men such as they are, to lay hold on lucky hours, to watch the present wants and present interests of others, and make them subservient to her own convenience.

It is farther urged with great vehemence, that these troops of Russia and Hesse are not hired

in defence of Britain; that we are engaged in a naval war for territories on a distant continent; and that these troops, though mercenaries, can never be auxiliaries; that they increase the burden of the war, without hastening its conclusion, or promoting its success; since they can neither be sent into America, the only part of the world where England can, on the present occasion, have any employment for land forces, nor be put into our ships, by which, and by which only, we are now to oppose and subdue our enemies.

Nature has stationed us in an island inaccessible but by sea; and we are now at war with an enemy, whose naval power is inferior to our own, and from whom therefore we are in no danger of invasion: to what purpose then are troops hired in such uncommon numbers? To what end do we procure strength which we cannot exert, and exhaust the nation with subsidies at a time when nothing is disputed, which the princes who receive our subsidies can defend? If we had purchased ships, and hired seamen, we had apparently increased our power, and made ourselves formidable to our enemies, and, if any increase of security be possible, had secured ourselves still better from invasions: but what can the regiments of Russia or of Hesse contribute to the defence of the coasts of England; or by what assistance can they repay us the sums which we have stipulated to pay for their costly friendship?

The king of Great Britain has indeed a territory on the continent, of which the natives of this island scarcely knew the name till the present family was called to the throne, and yet know little more than that our king visits it from time to time. Yet for the defence of this country are these subsidies apparently paid, and these troops evidently levied. The riches of our nation are sent into distant countries, and the strength which should be employed in our own quarrel consequently impaired, for the sake of dominions, the interest of which has no connexion with ours, and which, by the act of succession, we took care to keep separate from the British kingdoms.

To this the advocates for the subsidies say, that unreasonable stipulations, whether in the act of settlement or any other contract, are in themselves void; and that if a country connected with England by subjection to the same sovereign, is endangered by an English quarrel, it must be defended by English force; and that we do not engage in a war for the sake of Hanover, but that Hanover is for our sake exposed to danger.

Those who brought in these foreign troops have still something farther to say in their defence, and of no honest plea is it our intention to defraud them. They grant, that the terror of invasion may possibly be groundless, that the

French may want the power or the courage to attack us in our own country; but they maintain, likewise, that an invasion is possible, that the armies of France are so numerous that she may hazard a large body on the ocean, without leaving herself exposed; that she is exasperated to the utmost degree of acrimony, and would be willing to do us mischief at her own peril. They allow that the invaders may be intercepted at sea, or that, if they land, they may be defeated by our native troops. But they say, and say justly, that danger is better avoided than encountered; that those ministers consult more the good of their country who prevent invasion, than repel it; and that if these auxiliaries have only saved us from the anxiety of expecting an enemy at our doors, or from the tumult and distress which an invasion, how soon soever repressed, would have produced, the public money is not spent in vain.

These arguments are admitted by some, and by others rejected. But even those that admit them, can admit them only as pleas of necessity; for they consider the reception of mercenaries into our country as the desperate remedy of desperate distress; and think with great reason, that all means of prevention should be tried to save us from any second need of such doubtful succours.

That we are able to defend our own country, that arms are most safely entrusted to our own hands, and that we have strength, and skill, and courage, equal to the best of the nations of the continent, is the opinion of every Englishman, who can think without prejudice, and speak without influence; and therefore it will not be easy to persuade the nation, a nation long renowned for valour, that it can need the help of foreigners to defend it from invasion. We have been long without the need of arms by our good fortune, and long without the use by our negligence; so long, that the practice and almost the name of our old trained-bands is forgotten. But the story of ancient times will tell us, that the trained-bands were once able to maintain the quiet and safety of their country; and reason without history will inform us, that those men are most likely to fight bravely, or at least to fight obstinately, who fight for their own houses and farms, for their own wives and children.

A bill was therefore offered for the prevention of any future danger or invasion, or necessity of mercenary forces, by re-establishing and improving the militia. It was passed by the Commons, but rejected by the Lords. That this bill, the first essay of political consideration as a subject long forgotten, should be liable to objection, cannot be strange; but surely justice, policy, common reason, require that we should be trusted with our own defence, and be kept no longer in such a helpless state as at once to dread our enemies and confederates.

By the bill, such as it was formed, sixty thousand men would always be in arms. We have shown \* how they may be upon any exigence easily increased to a hundred and fifty thousand; and I believe, neither our friends nor enemies will think it proper to insult our coasts, when they expect to find upon them a hundred and fifty thousand Englishmen with swords in their hands.

## INTRODUCTION

TO THE

### PROCEEDINGS OF THE COMMITTEE

APPOINTED TO MANAGE THE CONTRIBUTIONS REGUN AT LONDON, DEC. 18, 1798, FOR CLOTHING FRENCH PRISONERS OF WAR.

THE Committee entrusted with the money contributed to the relief of the subjects of France, now prisoners in the British dominions, here lay before the public an exact account of all the sums received and expended, that the donors may judge how properly their benefactions have been applied.

Charity would lose its name, were it influenced by so mean a motive as human praise; it is therefore not intended to celebrate by any particular memorial, the liberality of single persons, or distinct societies; it is sufficient that their works praise them.

Yet he who is far from seeking honour, may very justly obviate censure. If a good example has been set, it may lose its influence by misrepresentation; and to free charity from reproach, is itself a charitable action.

Against the relief of the French only one argument has been brought: but that one is so popular and specious, that if it were to remain unexamined, it would by many be thought irrefragable. It has been urged, that charity, like other virtues, may be improperly and unseasonably exerted; that while we are relieving Frenchmen, there remain many Englishmen unrelieved; that while we lavish pity on our enemies, we forget the misery of our friends.

Grant this argument all it can prove, and what is the conclusion?—That to relieve the French is a good action, but that a better may be conceived. This is all the result, and this all is very little. To do the best can seldom be the lot of man: it is sufficient if, when opportunities are presented, he is ready to do good. How little virtue could be practised, if beneficence were to wait always for the most proper objects, and the noblest occasions; occasions that may

\* See Literary Magazine, No. II. p. 63.

never happen, and objects that may never be found.

It is far from certain, that a single Englishman will suffer by the charity of the French. New scenes of misery make new impressions; and much of the charity which produced these donations, may be supposed to have been generated by a species of calamity never known among us before. Some imagine that the laws have provided all necessary relief in common cases, and remit the poor to the care of the public; some have been deceived by fictitious misery, and are afraid of encouraging imposture; many have observed want to be the effect of vice, and consider casual almsgivers as patrons of idleness. But all these difficulties vanish in the present case: we know that for the Prisoners of War there is no legal provision; we see their distress, and are certain of its cause; we know that they are poor and naked, and poor and naked without a crime.

But it is not necessary to make any concessions. The opponents of this charity must allow it to be good, and will not easily prove it not to be the best. That charity is best of which the consequences are most extensive: the relief of enemies has a tendency to unite mankind in fraternal affection; to soften the acrimony of adverse nations, and dispose them to peace and amity: in the mean time, it alleviates captivity, and takes away something from the miseries of war. The rage of war, however mitigated, will always fill the world with calamity and horror; let it not then be unnecessarily extended; let animosity and hostility cease together; and no man be longer deemed an enemy, than while his sword is drawn against us.

The effects of these contributions may, perhaps, reach still further. Truth is best supported by virtue: we may hope from those who feel or who see our charity, that they shall no longer detest as heresy that religion which makes its professors the followers of Him, who has commanded us to "do good to them that hate us."

#### ON THE BRAVERY OF THE ENGLISH COMMON SOLDIERS.

By those who have compared the military genius of the English with that of the French nation, it is remarked, that *the French officers will always lead, if the soldiers will follow*: and that *the English soldiers will always follow, if their officers will lead*.

In all pointed sentences, some degree of accuracy must be sacrificed to conciseness: and, in this comparison, our officers seem to lose what our soldiers gain. I know not any reason for supposing that the English officers are less

willing than the French to lead; but it is, I think, universally allowed, that the English soldiers are more willing to follow. Our nation may boast, beyond any other people in the world, of a kind of epidemic bravery, diffused equally through all its ranks. We can show a peasantry of heroes, and fill our armies with clowns, whose courage may vie with that of their general.

There may be some pleasure in tracing the causes of this plebeian magnanimity. The qualities which commonly make an army formidable, are long habits of regularity, great exactness of discipline, and great confidence in the commander. Regularity may, in time, produce a kind of mechanical obedience to signals and commands, like that which the perverse Cartesians impute to animals; discipline may impress such an awe upon the mind, that any danger shall be less dreaded than the danger of punishment; and confidence in the wisdom or fortune of the general, may induce the soldiers to follow him blindly to the most dangerous enterprise.

What may be done by discipline and regularity, may be seen in the troops of the Russian empress and Prussian monarch. We find that they may be broken without confusion, and repulsed without flight.

But the English troops have none of these requisites in an eminent degree. Regularity is by no means part of their character; they are rarely exercised, and therefore show very little dexterity in their evolutions as bodies of men, or in the manual use of their weapons as individuals; they neither are thought by others, nor by themselves, more active or exact than their enemies, and therefore derive none of their courage from such imaginary superiority.

The manner in which they are dispersed in quarters over the country during times of peace, naturally produces laxity of discipline: they are very little in sight of their officers; and, when they are not engaged in the slight duty of the guard, are suffered to live every man his own way.

The equality of English privileges, the impartiality of our laws, the freedom of our tenures, and the prosperity of our trade, dispose us very little to reverence of superiors. It is not to any great esteem of the officers that the English soldier is indebted for his spirit in the hour of battle; for perhaps it does not often happen that he thinks much better of his leader than of himself. The French Count, who has lately published the *Art of War*, remarks how much soldiers are animated, when they see all their dangers shared by those who were born to be their masters, and whom they consider as beings of a different rank. The Englishman despises such motives of courage: he was born without a master; and looks not on any man, however dignified by lace or titles, as deriving from nature any claims to his

respect, or inheriting any qualities superior to his own.

There are some, perhaps, who would imagine that every Englishman fights better than the subjects of absolute governments, because he has more to defend. But what has the English more than the French soldier? Property they are both commonly without. Liberty is, to the lowest rank of every nation, little more than the choice of working or starving; and this choice is, I suppose, equally allowed in every country. The English soldier seldom has his head very full of the constitution; nor has there been, for more than a century, any war that put the property or liberty of a single Englishman in danger.

Whence then is the courage of the English vulgar? It proceeds, in my opinion, from that dissolution of dependence, which obliges every man to regard his own character. While every man is fed by his own hands, he has no need of any servile arts; he may always have wages for his labour; and is no less necessary to his employer, than his employer is to him. While he looks for no protection from others, he is naturally roused to be his own protector; and having nothing to abate his esteem of himself, he consequently aspires to the esteem of others. Thus every man that crowds our streets is a man of honour, disdainful of obligation, impatient of reproach, and desirous of extending his reputation among those of his own rank; and as courage is in most frequent use, the fame of courage is most eagerly pursued. From this neglect of subordination I do not deny that some inconveniences may from time to time proceed: the power of the law does not always sufficiently supply the want of reverence, or maintain the proper distinction between different ranks; but good and evil will grow up in this world together; and they who complain, in peace, of the insolence of the populace, must remember, that their insolence in peace is bravery in war.

#### THE FALSE ALARM. 1770.

ONE of the chief advantages derived by the present generation from the improvement and diffusion of philosophy, is deliverance from unnecessary terrors, and exemption from false alarms. The unusual appearances, whether regular or accidental, which once spread consternation over ages of ignorance, are now the recreations of inquisitive security. The sun is no more lamented when it is eclipsed, than when it sets; and meteors play their coruscations without prognostic or prediction.

The advancement of political knowledge may be expected to produce in time the like effects.

Causeless discontent and seditious violence will grow less frequent and less formidable, as the science of government is better ascertained, by diligent study of the theory of man.

It is not indeed, to be expected, that physical and political truth should meet with equal acceptance, or gain ground upon the world with equal facility. The notions of the naturalist find mankind in a state of neutrality, or at worst have nothing to encounter but prejudice and vanity; prejudice without malignity, and vanity without interest. But the politician's improvements are opposed by every passion that can exclude conviction or suppress it; by ambition, by avarice, by hope, and by terror, by public faction, and private animosity.

It is evident, whatever be the cause, that this nation, with all its renown for speculation and for learning, has yet made little proficiency in civil wisdom. We are still so much unacquainted with our own state, and so unskilful in the pursuit of happiness, that we shudder without danger, complain without grievances, and suffer our quiet to be disturbed, and our commerce to be interrupted, by an opposition to the Government, raised only by interest, and supported only by clamour, which yet has so far prevailed upon ignorance and timidity, that many favour it as reasonable, and many dread it as powerful.

What is urged by those who have been so industrious to spread suspicion, and incite fury, from one end of the kingdom to the other, may be known by perusing the papers which have been at once presented as petitions to the king, and exhibited in print as remonstrances to the people. It may therefore not be improper to lay before the Public the reflections of a man who cannot favour the opposition, for he thinks it wicked, and cannot fear it, for he thinks it weak.

The grievance which has produced all this tempest of outrage, the oppression in which all other oppressions are included, the invasion which has left us no property, the alarm that suffers no patriot to sleep in quiet, is comprised in a vote of the House of Commons, by which the freeholders of Middlesex are deprived of a Briton's birthright, representation in parliament.

They have, indeed, received the usual writ of election, but that writ, alas! was malicious mockery; they were insulted with the form, but denied the reality, for there was one man excepted from their choice.

*Non de vi, neque cæde, nec veneno,  
Sed lis est mihi de tribus capillis.*

The character of the man thus fatally accepted, I have no purpose to delineate. Lam-poon itself would disdain to speak ill of him of whom no man speaks well. It is sufficient that

he is expelled the House of Commons, and confined in jail as being legally convicted of sedition and impiety.

That this man cannot be appointed one of the guardian counsellors of the church and state, is a grievance not to be endured. Every lover of liberty stands doubtful of the fate of posterity, because the chief county in England cannot take its representative from a jail.

Whence Middlesex should obtain the right of being denominated the chief county, cannot easily be discovered; it is, indeed, the county where the chief city happens to stand, but how that city treated the favourite of Middlesex, is not yet forgotten. The county, as distinguished from the city, has no claim to particular consideration.

That a man was in jail for sedition and impiety, would, I believe, have been within memory a sufficient reason why he should not come out of jail a legislator. This reason, notwithstanding the mutability of fashion, happens still to operate on the House of Commons. Their notions, however strange, may be justified by a common observation, that few are mended by imprisonment, and that he whose crimes have made confinement necessary, seldom makes any other use of his enlargement than to do with greater cunning what he did before with less.

But the people have been told with great confidence, that the House cannot control the right of constituting representatives: that he who can persuade lawful electors to choose him, whatever be his character, is lawfully chosen, and has a claim to a seat in parliament, from which no human authority can depose him.

Here, however, the patrons of opposition are in some perplexity. They are forced to confess, that by a train of precedents sufficient to establish a custom of parliament, the House of Commons has jurisdiction over its own members; that the whole has power over individuals; and that this power has been exercised sometimes in imprisonment, and often in expulsion.

That such power should reside in the House of Commons in some cases, is inevitably necessary, since it is required by every polity, that where there is a possibility of offence, there should be a possibility of punishment. A member of the House cannot be cited for his conduct in parliament before any other court: and therefore if the house cannot punish him, he may attack with impunity the rights of the people, and the title of the king.

This exemption from the authority of other courts, was, I think, first established in favour of the five members in the long parliament. It is not to be considered as a usurpation, for it is implied in the principles of government. If legislative powers are not co-ordinate, they cease in part to be legislative; and if they be

co-ordinate, they are unaccountable; for to whom must that power account, which has no superior?

The House of Commons is, indeed, dissoluble by the king, as the nation has of late been very clamorously told; but while it subsists it is co-ordinate with the other powers, and this co-ordination ceases only when the House by dissolution ceases to subsist.

As the particular representatives of the people are in their public character above the control of the courts of law, they must be subject to the jurisdiction of the House; and as the House, in the exercise of its authority, can be neither directed nor restrained, its own resolutions must be its laws, at least, if there is no antecedent decision of the whole legislature.

This privilege, not confirmed by any written law or positive compact, but by the resistless power of political necessity, they have exercised, probably from their first institution, but certainly, as their records inform us, from the 23d of Elizabeth, when they expelled a member for derogating from their privileges.

It may perhaps be doubted, whether it was originally necessary, that this right of control and punishment should extend beyond offences in the exercise of parliamentary duty, since all other crimes are cognizable by other courts. But they who are the only judges of their own rights, have exerted the power of expulsion on other occasions, and when wickedness arrived at a certain magnitude, have considered an offence against society as an offence against the House.

They have therefore divested notorious delinquents of their legislative character, and delivered them up to shame or punishment, naked and unprotected, that they might not contaminate the dignity of parliament.

It is allowed that a man attainted of felony cannot sit in parliament, and the Commons probably judged, that not being bound to the forms of law, they might treat those as felons, whose crimes were, in their opinion, equivalent to felony: and that as a known felon could not be chosen, a man so like a felon, that he could not easily be distinguished, ought to be expelled.

The first laws had no law to enforce them, the first authority was constituted by itself. The power exercised by the House of Commons is of this kind, a power rooted in the principles of government, and branched out by occasional practice; a power which necessity made just, and precedents have made legal.

It will occur that authority thus uncontrollable, may, in times of heat and contest, be oppressively and injuriously exerted, and that he who suffers injustice, is without redress, however innocent, however miserable.

The position is true, but the argument is use-

less. The Commons must be controlled, or be exempt from control. If they are exempt, they may do injury which cannot be redressed, if they are controlled, they are no longer legislative.

If the possibility of abuse be an argument against authority, no authority ever can be established; if the actual abuse destroys its legality, there is no legal government now in the world.

This power, which the Commons have so long exercised, they ventured to use once more against Mr. Wilkes, and on the 3rd of February, 1769, expelled him the House, "for having printed and published a seditious libel, and three obscene and impious libels."

If these imputations were just, the expulsion was surely seasonable; and that they were just, the House had reason to determine, as he had confessed himself, at the bar, the author of the libel which they term seditious, and was convicted in the King's Bench of both the publications.

But the freeholders of Middlesex were of another opinion. They either thought him innocent, or were not offended by his guilt. When a writ was issued for the election of a knight for Middlesex, in the room of John Wilkes, Esq. expelled the House, his friends on the 16th of February chose him again.

On the 17th, it was resolved, "that John Wilkes, Esq. having been in this session of parliament expelled the House, was, and is, incapable of being elected a member to serve in this present parliament."

As there was no other candidate, it was resolved at the same time, that the election of the 16th was a void election.

The freeholders still continued to think that no other man was fit to represent them, and on the 16th of March elected him once more. Their resolution was now so well known, that no opponent ventured to appear.

The Commons began to find, that power without materials for operation can produce no effect. They might make the election void for ever, but if no other candidate could be found, their determination could only be negative. They, however, made void the last election, and ordered a new writ.

On the 13th of April was a new election, at which Mr. Luttrell, and others, offered themselves candidates. Every method of intimidation was used, and some acts of violence were done to hinder Mr. Luttrell from appearing. He was not deterred, and the poll was taken, which exhibited for

Mr. Wilkes	.	.	1143
Mr. Luttrell	.	.	296

The Sheriff returned Mr. Wilkes; but the House on April the 15th, determined that Mr. Luttrell was lawfully elected.

From this day begun the clamour which has

continued till now. Those who had undertaken to oppose the ministry, having no grievance of greater magnitude, endeavoured to swell this decision into bulk, and distort it into deformity, and then held it out to terrify the nation.

Every artifice of sedition has been since practised to awaken discontent and inflame indignation. The papers of every day have been filled with exhortations and menaces of faction. The madness has spread through all ranks and through both sexes; women and children have clamoured for Mr. Wilkes, honest simplicity has been cheated into fury, and only the wise have escaped infection.

The greater part may justly be suspected of not believing their own position, and with them it is not necessary to dispute. They cannot be convinced who are convinced already, and it is well known that they will not be ashamed.

The decision, however, by which the smaller number of votes was preferred to the greater, has perplexed the minds of some, whose opinions it were indecent to despise, and who by their integrity well deserve to have their doubts appeased.

Every diffuse and complicated question may be examined by different methods, upon different principles; and that truth, which is easily found by one investigator, may be missed by another, equally honest and equally diligent.

Those who inquire whether a smaller number of legal votes can elect a representative in opposition to a greater, must receive from every tongue the same answer.

The question, therefore, must be, whether a smaller number of legal votes, shall not prevail against a greater number of votes not legal?

It must be considered, that those votes only are legal which are legally given, and that those only are legally given, which are given for a legal candidate.

It remains then to be discussed, whether a man expelled can be so disqualified by a vote of the House, as that he shall be no longer eligible by lawful electors?

Here we must again recur, not to positive institutions, but to the unwritten law of social nature, to the great and pregnant principle of political necessity. All government supposes subjects, all authority implies obedience. To suppose in one the right to command what another has the right to refuse, is absurd and contradictory. A state so constituted must rest for ever in motionless equipoise, with equal attractions of contrary tendency, with equal weights of power balancing each other.

Laws which cannot be enforced, can neither prevent nor rectify disorders. A sentence which cannot be executed, can have no power to warn or to reform. If the Commons have only the power of dismissing for a few days the man whom his constituents can immediately send

back, if they can expel but cannot exclude, they have nothing more than nominal authority, to which perhaps obedience never may be paid.

The representatives of our ancestors had an opinion very different; they fined and imprisoned their members; on great provocation, they disabled them for ever; and this power of pronouncing perpetual disability is maintained by Seiden himself.

These claims seem to have been made and allowed, when the constitution of our government had not yet been sufficiently studied. Such powers are not legal, because they are not necessary; and of that power which only necessity justifies, no more is to be admitted than necessity obtrudes.

The Commons cannot make laws, they can only pass resolutions, which, like all resolutions, are of force only to those that make them, and to those only while they are willing to observe them.

The vote of the House of Commons has therefore only so far the force of a law, as that force is necessary to preserve the vote from losing its efficacy; it must begin by operating upon themselves, and extend its influence to others, only by consequences arising from the first intention. He that starts game on his own manor, may pursue it into another.

They can properly make laws only for themselves: a member, while he keeps his seat, is subject to these laws; but when he is expelled, the jurisdiction ceases, for he is now no longer within their dominion.

The disability, which a vote can superinduce to expulsion, is no more than was included in expulsion itself; it is only a declaration of the Commons, that they will permit no longer him, whom they thus censure to sit with them in parliament; a declaration made by that right which they necessarily possess, of regulating their own House, and of inflicting punishment on their own delinquents.

They have therefore no other way to enforce the sentence of incapacity, than that of adhering to it. They cannot otherwise punish the candidate so disqualified for offering himself, nor the electors for accepting him. But if he has any competitor, that competitor must prevail, and if he has none, his election will be void; for the right of the House to reject, annihilates with regard to the man so rejected the right of electing.

It has been urged, that the power of the House terminates with their session; since a prisoner committed by the Speaker's warrant cannot be detained during the recess. That power indeed ceases with the session, which must operate by the agency of others, because, when they do not sit, they can employ no agent, having no longer any legal existence; but that which is exercised on themselves revives at their meeting, when the

subject of that power still subsists. They can in the next session refuse to re-admit him, whom in the former session they expelled.

That expulsion inferred exclusion in the present case, must be, I think, easily admitted. The expulsion, and the writ issued for a new election, were in the same session, and since the House is by the rule of parliament bound for the session by a vote once passed, the expelled member cannot be admitted. He that cannot be admitted, cannot be elected; and the votes given to a man ineligible being given in vain, the highest number for an eligible candidate becomes a majority.

To these conclusions, as to most moral, and to all political, positions, many objections may be made. The perpetual subject of political disquisition is not absolute, but comparative good. Of two systems of government, or two laws relating to the same subject, neither will ever be such as theoretical nicety would desire, and therefore neither can easily force its way against prejudice and obstinacy; each will have its excellences and defects, and every man, with a little help from pride, may think his own the best.

It seems to be the opinion of many, that expulsion is only a dismissal of the representative to his constituents, with such a testimony against him as his sentence may comprise; and that if his constituents, notwithstanding the censure of the House, thinking his case hard, his fault trifling, or his excellences such as overbalance it, should again choose him as still worthy of their trust, the House cannot refuse him, for his punishment has purged his fault, and the right of electors must not be violated.

This is plausible, but not cogent. It is a scheme of representation, which would make a specious appearance in a political romance, but cannot be brought into practice among us, who see every day the towering head of speculation bow down unwillingly to grovelling experience.

Governments formed by chance, and gradually improved by such expedients as the successive discovery of their defects happened to suggest, are never to be tried by a regular theory. They are fabrics of dissimilar materials raised by different architects upon different plans. We must be content with them as they are; should we attempt to mend their disproportions, we might easily demolish, and difficultly rebuild them.

Laws are now made, and customs are established; these are our rules, and by them we must be guided.

It is incontrovertibly certain, that the Commons never intended to leave electors the liberty of returning them an expelled member, for they always require one to be chosen in the room of him that is expelled, and I see not with what propriety a man can be re-chosen in his own room.

Expulsion, if this were its whole effect, might very often be desirable. Sedition, or obscenity, might be no greater crimes in the opinion of other electors, than in that of the freeholders of Middlesex; and many a wretch, whom his colleagues should expel, might come back persecuted into fame, and provoke with harder front a second expulsion.

Many of the representatives of the people can hardly be said to have been chosen at all. Some by inheriting a borough, inherit a seat; and some sit by the favour of others, whom perhaps they may gratify by the act which provoked the expulsion. Some are safe by their popularity, and some by their alliances. None would dread expulsion, if this doctrine were received, but those who bought their elections, and who would be obliged to buy them again at a higher price.

But as uncertainties are to be determined by things certain, and customs to be explained, where it is possible, by written law, the patriots have triumphed with a quotation from an act of the 4th and 5th of Anne, which permits those to be re-chosen, whose seats are vacated by the acceptance of a place of profit. This they wisely consider as an expulsion, and from the permission, in this case, of a re-election, infer that every other expulsion leaves the delinquent entitled to the same indulgence. This is the paragraph:

"If any person, *being chosen a member of the House of Commons, shall accept of any office from the crown, during such time as he shall continue a member*, his election shall be, and is hereby declared to be, void, and a new writ shall issue for a new election, as if such person so accepting was naturally dead. *Nevertheless, such person shall be capable of being again elected, as if his place had not become void as aforesaid.*"

How this favours the doctrine of re-admission by a second choice, I am not able to discover. The statute of 30 Ch. II. had enacted, "That he who should sit in the House of Commons, without taking the oaths and subscribing the test, should be disabled to sit in the House during that parliament, and a writ should issue for the election of a new member in place of the member so disabled, as if such member had naturally died."

This last clause is apparently copied in the act of Anne, but with the common fate of imitators. In the act of Charles, the political death continued during the parliament; in that of Anne, it was hardly worth the while to kill the man whom the next breath was to revive. It is, however, apparent, that in the opinion of the parliament, the dead-doing lines would have kept him motionless, if he had not been recovered by a kind exception. A seat vacated,

could not be regained without express permission of the same statute.

The right of being chosen again to a seat thus vacated, is not enjoyed by any general right, but required a special clause, and solicitous provision.

But what resemblance can imagination conceive between one man vacating his seat by a mark of favour from the crown, and another driven from it for sedition and obscenity? The acceptance of a place contaminates no character; the crown that gives it, intends to give with it always dignity, sometimes authority. The Commons, it is well known, think not worse of themselves or others for their offices of profit; yet profit implies temptation, and may expose a representative to the suspicion of his constituents; though if they still think him worthy of their confidence, they may again elect him.

Such is the consequence. When a man is dismissed by law to his constituents, with new trust and new dignity, they may, if they think him incorruptible, restore him to his seat; what can follow, therefore, but that when the House drives out a varlet with public infamy, he goes away with the like permission to return?

If infatuation be, as the proverb tells us, the forerunner of destruction, how near must be the ruin of a nation that can be incited against its governors by sophistry like this. I may be excused if I catch the panic, and join my groans at this alarming crisis, with the general lamentation of weeping patriots.

Another objection is, that the Commons, by pronouncing the sentence of disqualification, make a law, and take upon themselves the power of the whole legislature. Many quotations are then produced to prove that the House of Commons can make no laws.

Three Acts have been cited, disabling members for different terms on different occasions; and it is profoundly remarked, that if the Commons could by their own privilege have made a disqualification, their jealousy of their privileges would never have admitted the concurrent sanction of the other powers.

I must for ever remind these puny controvertists, that those acts are laws of permanent obligation: that two of them are now in force, and that the other expired only when it had fulfilled its end. Such laws the Commons cannot make; they could, perhaps, have determined for themselves, that they would expel all who should not take the test, but they could leave no authority behind them, that should oblige the next parliament to expel them. They could refuse the South Sea directors, but they could not entail the refusal. They can disqualify by vote, but not by law; they cannot know that the sentence of disqualification pronounced to-day, may not become void to-morrow, by the dissolution

of their own House. Yet while the same parliament sits, the disqualification continues, unless the vote be rescinded, and while it so continues, makes the votes, which freeholders may give to the interdicted candidate, useless and dead, since there cannot exist with respect to the same subject at the same time, an absolute power to choose, and an absolute power to reject.

In 1614, the attorney-general was voted incapable of a seat in the House of Commons; and the nation is triumphantly told, that though the vote never was revoked, the attorney-general is now a member. He certainly may now be a member without revocation of the vote. A law is of perpetual obligation, but a vote is nothing when the voters are gone. A law is a compact reciprocally made by the legislative powers, and therefore not to be abrogated but by all the parties. A vote is simply a resolution, which binds only him that is willing to be bound.

I have thus punctiliously and minutely pursued this disquisition, because I suspect that these reasoners, whose business is to deceive others, have sometimes deceived themselves, and I am willing to free them from their embarrassment, though I do not expect much gratitude for my kindness.

Other objections are yet remaining, for of political objections there cannot easily be an end. It has been observed, that vice is no proper cause of expulsion, for if the worst man in the House were always to be expelled, in time none would be left. But no man is expelled for being worst, he is expelled for being enormously bad; his conduct is compared, not with that of others, but with the rule of action.

The punishment of expulsion being in its own nature uncertain, may be too great or too little for the fault.

This must be the case of many punishments. Forfeiture of chattels is nothing to him that has no possessions. Exile itself may be accidentally a good: and indeed any punishment less than death is very different to different men.

But if this precedent be admitted and established, no man can hereafter be sure that he shall be represented by him whom he would choose. One half of the House may meet early in the morning, and snatch an opportunity to expel the other, and the greater part of the nation may, by this stratagem, be without its lawful representatives.

He that sees all this, sees very far. But I can tell him of greater evils yet behind. There is one possibility of wickedness, which, at this alarming crisis, has not yet been mentioned. Every one knows the malice, the subtilty, the industry, the vigilance, and the greediness of the Scots. The Scotch members are about the number sufficient to make a house. I propose it to the consideration of the supporters of the Bill of Rights, whether there is not reason to

suspect that these hungry intruders from the North are now contriving to expel all the English. We may then curse the hour in which it was determined, that expulsion and exclusion are the same. For who can guess what may be done when the Scots have the whole House to themselves?

Thus agreeable to custom and reason, notwithstanding all objections, real or imaginary; thus consistent with the practice of former times, and thus consequential to the original principles of government, is that decision by which so much violence of discontent has been excited, which has been so dolorously bewailed, and so outrageously resented.

Let us, however, not be seduced to put too much confidence in justice or in truth; they have often been found inactive in their own defence, and give more confidence than help to their friends and their advocates. It may perhaps be prudent to make one momentary concession to falsehood, by supposing the vote in Mr. Luttrell's favour to be wrong.

All wrong ought to be rectified. If Mr. Wilkes is deprived of a lawful seat, both he and his electors have reason to complain: but it will not be easily found, why, among the innumerable wrongs of which a great part of mankind are hourly complaining, the whole care of the public should be transferred to Mr. Wilkes and the freeholders of Middlesex, who might all sink into nonexistence, without any other effect, than that there would be room made for a new rabble, and a new retailer of sedition and obscenity. The cause of our country would suffer little; the rabble, whencesoever they come, will be always patriots, and always supporters of the Bill of Rights.

The House of Commons decides the disputes arising from elections. Was it ever supposed, that in all cases their decisions were right? Every man whose lawful election is defeated, is equally wronged with Mr. Wilkes, and his constituents feel their disappointment with no less anguish than the freeholders of Middlesex. These decisions have often been apparently partial, and sometimes tyrannically oppressive. A majority has been given to a favourite candidate, by expunging votes which had always been allowed, and which therefore had the authority by which all votes are given, that of custom uninterrupted. When the Commons determine who shall be constituents, they may, with some propriety, be said to make law, because those determinations have hitherto, for the sake of quiet, been adopted by succeeding parliaments. A vote, therefore, of the House, when it operates as a law, is to individuals a law only temporary, but to communities perpetual.

Yet though all this has been done, and though at every new parliament much of this is expected to be done again, it has never produced in any

former time such an *alarming crisis*. We have found by experience, that though a squire has given ale and venison in vain, and a borough has been compelled to see its dearest interest in the hands of him whom it did not trust, yet the general state of the nation has continued the same. The sun has risen, and the corn has grown, and whatever talk has been of the danger of property, yet he that ploughed the field commonly reaped it, and he that built a house was master of the door: the vexation excited by injustice suffered, or supposed to be suffered, by any private man, or single community, was local and temporary, it neither spread far, nor lasted long.

The nation looked on with little care, because there did not seem to be much danger. The consequence of small irregularities was not felt, and we had not yet learned to be terrified by very distant enemies.

But quiet and security are now at an end. Our vigilance is quickened, and our comprehension is enlarged. We not only see events in their causes, but before their causes; we hear the thunder while the sky is clear, and see the mine sprung before it is dug. Political wisdom has, by the force of English genius, been improved at last not only to political intuition, but to political prescience.

But it cannot, I am afraid, be said, that as we are grown wise, we are made happy. It is said of those who have the wonderful power called second sight, that they seldom see any thing but evil: political second sight has the same effect; we hear of nothing but of an alarming crisis, of violated rights, and expiring liberties. The morning rises upon new wrongs, and the dreamer passes the night in imaginary shackles.

The sphere of anxiety is now enlarged; he that hitherto cared only for himself, now cares for the public; for he has learned that the happiness of individuals is comprised in the prosperity of the whole, and that his country never suffers, but he suffers with it, however it happens that he feels no pain.

Fired with this fever of epidemic patriotism, the tailor slips his thimble, the draper drops his yard, and the blacksmith lays down his hammer; they meet at an honest alehouse, consider the state of the nation, read or hear the last petition, lament the miseries of the time, are alarmed at the dreadful crisis, and subscribe to the support of the Bill of Rights.

It sometimes indeed happens, that an intruder of more benevolence than prudence attempts to disperse their cloud of dejection, and ease their hearts by seasonable consolation. He tells them, that though the government cannot be too diligently watched, it may be too hastily accused; and that, though private judgment is every man's right, yet we cannot judge of what we do not know; that we feel at present no evils which

government can alleviate, and that the public business is committed to men who have as much right to confidence as their adversaries; that the freeholders of Middlesex, if they could not choose Mr. Wilkes, might have chosen any other man, and that *he trusts we have within the realm five hundred as good as he*; that even if this which has happened to Middlesex had happened to every other county, that one man should be made incapable of being elected, it could produce no great change in the parliament, nor much contract the power of election; that what has been done is probably right, and that if it be wrong, it is of little consequence, since a like case cannot easily occur; that expulsions are very rare, and if they should, by unbounded insolence of faction, become more frequent, the electors may easily provide a second choice.

All this he may say, but not half of this will he heard; his opponents will stun him and themselves with a confused sound of pensions and places, venality and corruption, oppression and invasion, slavery and ruin.

Outcries like these, uttered by malignity, and echoed by folly; general accusations of indeterminate wickedness; and obscure hints of impossible designs, dispersed among those that do not know their meaning, by those that know them to be false, have disposed part of the nation, though but a small part, to pester the court with ridiculous petitions.

The progress of a petition is well known. An ejected placeman goes down to his county or his borough, tells his friends of his inability to serve them, and his constituents of the corruption of the government. His friends readily understand that he who can get nothing, will have nothing to give. They agree to proclaim a meeting; meat and drink are plentifully provided; a crowd is easily brought together, and those who think that they know the reason of their meeting, undertake to tell those who know it not. Ale and clamour unite their powers, the crowd, condensed and heated, begins to ferment with the leaven of sedition. All see a thousand evils, though they cannot show them, and grow impatient for a remedy, though they know not what.

A speech is then made by the *Cicero* of the day; he says much and suppresses more, and credit is equally given to what he tells, and what he conceals. The petition is read and universally approved. Those who are sober enough to write, add their names, and the rest would sign it if they could.

Every man goes home and tells his neighbour of the glories of the day; how he was consulted and what he advised; how he was invited into the great room, where his lordship called him by his name; how he was caressed by Sir Francis, Sir Joseph, or Sir George; how he eat

turtle and venison, and drank unanimity to the three brothers.

The poor loiterer, whose shop had confined him, or whose wife had locked him up, hears the tale of luxury with envy, and at last inquires what was their petition. Of the petition nothing is remembered by the narrator, but that it spoke much of fears and apprehensions, and something very alarming, and that he is sure it is against the government; the other is convinced that it must be right, and wishes he had been there, for he loves wine and venison, and is resolved as long as he lives to be against the government.

The petition is then handed from town to town, and from house to house, and wherever it comes the inhabitants flock together, that they may see that which must be sent to the king. Names are easily collected. One man signs because he hates the papists, another because he has vowed destruction to the turnpikes; one because it will vex the parson, another because he owes his landlord nothing; one because he is rich, another because he is poor: one to show that he is not afraid, and another to show that he can write.

The passage, however, is not always smooth. Those who collect contributions to sedition, sometimes apply to a man of higher rank and more enlightened mind, who, instead of lending them his name, calmly reproves them for being seducers of the people.

You who are here, says he, complaining of venality, are yourselves the agents of those who, having estimated themselves at too high a price, are only angry that they are not bought. You are appealing from the parliament to the rabble, and inviting those who scarcely, in the most common affairs, distinguish right from wrong, to judge of a question complicated with law written and unwritten, with the general principles of government, and the particular customs of the House of Commons; you are showing them a grievance, so distant that they cannot see it, and so light that they cannot feel it; for how, but by unnecessary intelligence and artificial provocation, should the farmers and shopkeepers of Yorkshire and Cumberland know or care how Middlesex is represented? instead of wandering thus round the county to exasperate the rage of party, and darken the suspicious of ignorance, it is the duty of men like you, who have leisure for inquiry, to lead back the people to their honest labour; to tell them, that submission is the duty of the ignorant, and content the virtue of the poor; that they have no skill in the art of government, nor any interest in the dissensions of the great; and when you meet with any, as some there are, whose understandings are capable of conviction, it will become you to allay this foaming ebullition, by showing them that they have as much happiness as the condition of life

will easily receive, and that a government, of which an erroneous or unjust representation of Middlesex is the greatest crime that interest can discover, or malice can upbraid, is government approaching nearer to perfection, than any that experience has known, or history related.

The drudges of sedition wish to change their ground, they hear him with sullen silence, feel conviction without repentance, and are confounded but not abashed; they go forward to another door, and find a kinder reception from a man enraged against the government, because he has just been paying the tax upon his windows.

That a petition for a dissolution of the parliament will at all times have its favourers, may be easily imagined. The people indeed do not expect that one House of Commons will be much honester or much wiser than another; they do not suppose that the taxes will be lightened; or though they have been so often taught to hope it, that soap and candles will be cheaper: they expect no redress of grievances, for of no grievances but taxes do they complain; they wish not the extension of liberty, for they do not feel any restraint; about the security of privilege or property they are totally careless, for they see no property invaded, nor know till they are told, that any privilege has suffered violation.

Least of all do they expect, that any future parliament will lessen its own powers, or communicate to the people that authority which it has once obtained.

Yet a new parliament is sufficiently desirable. The year of election is a year of jollity; and what is still more delightful, a year of equality. The glutton now eats the delicacies for which he longed when he could not purchase them, and the drunkard has the pleasure of wine without the cost. The drone lives a while without work, and the shopkeeper, in the flow of money, raises his price. The mechanic that trembled at the presence of Sir Joseph, now bids him come again for an answer; and the poacher whose gun has been seized, now finds an opportunity to reclaim it. Even the honest man is not displeased to see himself important, and willingly resumes in two years that power which he had resigned for seven. Few love their friends so well as not to desire superiority by unexpensive benefaction.

Yet notwithstanding all these motives to compliance, the promoters of petitions have not been successful. Few could be persuaded to lament evils which they did not suffer, or to solicit for redress which they do not want. The petition has been, in some places, rejected; and perhaps, in all but one, signed only by the meanest and grossest of the people.

Since this expedient, now invented or revived to distress the government, and equally practicable at all times by all who shall be excluded

from power and from profit, has produced so little effect, let us consider the opposition as no longer formidable. The great engine has recoiled upon them. They thought that *the terms they sent were terms of weight*, which would have amazed all and stumbled many; but the consternation is now over, and their foes stand upright, as before.

With great propriety and dignity the king has, in his speech, neglected or forgotten them. He might easily know, that what was presented as the sense of the people, is the sense only of the profligate and dissolute; and that whatever parliament should be convened, the same petitioners would be ready, for the same reason, to request its dissolution.

As we once had a rebellion of the clowns, we have now an opposition of the pedlars. The quiet of the nation has been for years disturbed by a faction, against which all factions ought to conspire; for its original principle is the desire of levelling; it is only animated under the name of zeal, by the natural malignity of the mean against the great.

When, in the confusion which the English invasions produced in France, the villains, imagining that they had found the golden hour of emancipation, took arms in their hands, the knights of both nations considered the cause as common, and, suspending the general hostility, united to chastise them.

The whole conduct of this despicable faction is distinguished by plebeian grossness, and savage indecency. To misrepresent the actions and the principles of their enemies is common to all parties; but the insolence of invective, and brutality of reproach, which have lately prevailed, are peculiar to this.

An infallible characteristic of meanness is cruelty. This is the only faction that has shouted at the condemnation of a criminal, and that, when his innocence procured his pardon, has clamoured for his blood.

All other parties, however enraged at each other, have agreed to treat the throne with decency; but these low-born railers have attacked not only the authority, but the character, of their sovereign, and have endeavoured, surely without effect, to alienate the affections of the people from the only king, who, for almost a century, has much appeared to desire, or much endeavoured to deserve them. They have insulted him with rudeness and with menaces, which were never excited by the gloomy sullenness of William, even when half the nation denied him their allegiance: nor by the dangerous bigotry of James, unless when he was finally driven from his palace; and with which scarcely the open hostilities of rebellion ventured to vilify the unhappy Charles, even in the remarks on the cabinet of Naseby.

It is surely not unreasonable to hope that the nation will consult its dignity, if not its safety, and disdain to be protected or enslaved by the declaimers or the plotters of a city-tavern. Had Rome fallen by the Catilinarian conspiracy, she might have consoled her fate by the greatness of her destroyers; but what would have alleviated the disgrace of England, had her government been changed by Tiler or by Ket?

One part of the nation has never before contended with the other, but for some weighty and apparent interest. If the means were violent, the end was great. The civil war was fought for what each army called and believed the best religion and the best government. The struggle in the reign of Anne, was to exclude or restore an exile king. We are now disputing, with almost equal animosity, whether Middlesex shall be represented or not by a criminal from a jail.

The only comfort left in such degeneracy is, that a lower state can be no longer possible.

In this contemptuous censure, I mean not to include every single man. In all lead, says the chemist, there is silver; and in all copper there is gold. But mingled masses are justly denominated by the greater quantity, and when the precious particles are not worth extraction, a faction and a pig must be melted down together to the forms and offices that chance allots them.

"Fiunt urceoli, pelves, sartago, patella."

A few weeks will now show whether the government can be shaken by empty noise, and whether the faction which depends upon its influence, has not deceived alike the public and itself. That it should have continued till now, is sufficiently shameful. None can, indeed, wonder that it has been supported by the sectaries, the natural fomenters of sedition and confederates of the rabble, of whose religion little now remains but hatred of establishments, and who are angry to find separation now only tolerated, which was once rewarded: but every honest man must lament, that it has been regarded with frigid neutrality by the Tories, who, being long accustomed to signalize their principles by opposition to the court, do not yet consider that they have at last a king who knows not the name of party, and who wishes to be the common father of all his people.

As a man inebriated only by vapours, soon recovers in the open air; a nation discontented to madness, without any adequate cause, will return to its wits and its allegiance when a little pause has cooled it to reflection. Nothing, therefore, is necessary, at this alarming crisis, but to consider the alarm as false. To make concessions, is to encourage encroachment. Let the court despise the faction, and the disappointed people will soon decide it.

## THOUGHTS

ON THE

## LATE TRANSACTIONS RESPECTING FALKLAND'S ISLANDS. 1771.

To proportion the eagerness of contest to its importance, seems too hard a task for human wisdom. The pride of wit has kept ages busy in the discussion of useless questions, and the pride of power has destroyed armies to gain or to keep unprofitable possessions.

Not many years have passed since the cruelties of war were filling the world with terror and with sorrow; rage was at last appeased, or strength exhausted, and to the harassed nations peace was restored with all its pleasures and its benefits. Of this state all felt the happiness, and all implored the continuance; but what continuance of happiness can be expected, when the whole system of European empire can be in danger of a new concussion, by a contention for a few spots of earth, which, in the deserts of the ocean, had almost escaped human notice, and which, if they had not happened to make a sea-mark, had perhaps never had a name?

Fortune often delights to dignify what nature has neglected, and that renown which cannot be claimed by intrinsic excellence or greatness, is sometimes derived from unexpected accidents. The Rubicon was ennobled by the passage of Cæsar, and the time is now come when Falkland's Islands demand their historian.

But the writer to whom this employment shall be assigned, will have few opportunities of descriptive splendour, or narrative elegance. Of other countries it is told how often they have changed their government; these islands have hitherto changed only their name. Of heroes to conquer, or legislators to civilize, here has been no appearance; nothing has happened to them but that they have been sometimes seen by wandering navigators, who passed by them in search of better habitations.

When the Spaniards, who, under the conduct of Columbus, discovered America, had taken possession of its most wealthy regions, they surprised and terrified Europe by a sudden and unexampled influx of riches. They were made at once insupportably insolent, and might perhaps have become irresistibly powerful, had not their mountainous treasures been scattered in the air with the ignorant profusion of unaccustomed opulence.

The greater part of the European potentates saw this stream of riches flowing into Spain without attempting to dip their own hands in the golden fountain. France had no naval skill or power; Portugal was extending her dominions in the east over regions formed in the gayety of nature; the Hanseatic league, being planned

only for the security of traffic, had no tendency to discovery or invasion; and the commercial states of Italy growing rich by trading between Asia and Europe, and not lying upon the ocean, did not desire to seek by great hazards, at a distance, what was almost at home to be found with safety.

The English alone were animated by the success of the Spanish navigators, to try if any thing was left that might reward adventure, or incite appropriation. They sent Cabot into the north, but in the north there was no gold or silver to be found. The best regions were pre-occupied, yet they still continued their hopes and their labours. They were the second nation that dared the extent of the Pacific Ocean, and the second circumnavigators of the globe.

By the war between Elizabeth and Phillip, the wealth of America became lawful prize, and those who were less afraid of danger than of poverty, supposed that riches might easily be obtained by plundering the Spaniards. Nothing is difficult when gain and honour unite their influence; the spirit and vigour of these expeditions enlarged our views of the new world, and made us first acquainted with its remoter coasts.

In the fatal voyage of Cavendish (1592,) Captain Davies, who, being sent out as his associate, was afterwards parted from him or deserted him, as he was driven by violence of weather about the straits of Magellan, is supposed to have been the first who saw the lands now called Falkland's Islands, but his distress permitted him not to make any observation, and he left them as he found them, without a name.

Not long afterwards (1594) Sir Richard Hawkins being in the same seas with the same designs, saw these Islands again, if they are indeed the same islands, and, in honour of his mistress, called them Hawkin's Maiden Land.

This voyage was not of renown sufficient to procure a general reception to the new name; for when the Dutch, who had now become strong enough not only to defend themselves, but to attack their masters, sent (1598) Verhaegen and Sebald de Wert into the South Seas, these islands which were not supposed to have been known before, obtained the denomination of Sebald's Islands, and were from that time placed in the charts; though Frezier tells us, that they were yet considered as of doubtful existence.

Their present English name was probably given them (1689) by Strong, whose journal, yet unprinted, may be found in the Museum. This name was adopted by Halley, and has from that time, I believe, been received into our maps.

The privateers which were put into motion by the wars of William and Anne, saw these

Islands and mentioned them; but they were yet not considered as territories worth a contest. Strong affirmed that there was no wood, and Dampier suspected that they had no water.

Frezier describes their appearance with more distinctness, and mentions some ships of St. Maloes, by which they had been visited, and to which he seems willing enough to ascribe the honour of discovering islands which yet he admits to have been seen by Hawkins, and named by Sebald de Wert. He, I suppose, in honour of his countrymen, called them the Malouines, the denomination now used by the Spaniards, who seem not, till very lately, to have thought them important enough to deserve a name.

Since the publication of Anson's voyage, they have very much changed their opinion, finding a settlement in Pepys's or Falkland's Island recommended by the author as necessary to the success of our future expeditions against the coast of Chili, and as of such use and importance, that it would produce many advantages in peace, and in war would make us masters of the South Sea.

Scarcely any degree of judgment is sufficient to restrain the imagination from magnifying that on which it is long detained. The relator of Anson's voyage had heated his mind with its various events, had partaken the hope with which it was begun, and the vexation suffered by its various miscarriages, and then thought nothing could be of greater benefit to the nation than that which might promote the success of such another enterprise.

Had the heroes of that history even performed and attained all that, when they first spread their sails, they ventured to hope, the consequence would yet have produced very little hurt to the Spaniards, and very little benefit to the English. They would have taken a few towns; Anson and his companions would have shared the plunder or the ransom; and the Spaniards, finding their southern territories accessible, would for the future have guarded them better.

That such a settlement may be of use in war, no man that considers its situation will deny. But war is not the whole business of life; it happens but seldom, and every man, either good or wise, wishes that its frequency were still less. That conduct which betrays designs of future hostility, if it does not excite violence, will always generate malignity; it must for ever exclude confidence and friendship, and continue a cold and sluggish rivalry, by a sly reciprocation of indirect injuries, without the bravery of war, or the security of peace.

The advantage of such a settlement in time of peace is, I think, not easily to be proved. For what use can it have but of a station for contraband traders, a nursery of fraud, and a receptacle of theft? Narborough, about a century ago, was of opinion, that no advantage could be ob-

tained in voyages to the South Sea, except by such an armament as, with a sailor's morality, *might trade by force*. It is well known that the prohibitions of foreign commerce, are, in these countries, to the last degree rigorous, and that no man, not authorized by the king of Spain, can trade there but by force or stealth. Whatever profit is obtained, must be gained by the violence of rapine, or dexterity of fraud.

Government will not, perhaps, soon arrive at such purity and excellence, but that some connivance at least will be indulged to the triumphant and successful cheat. He that brings wealth home, is seldom interrogated by what means it was obtained. This, however, is one of those modes of corruption with which mankind ought always to struggle, and they may in time hope to overcome. There is reason to expect, that, as the world is more enlightened, policy and morality will at last be reconciled, and that nations will learn not to do what they would not suffer.

But the silent toleration of suspected guilt is a degree of depravity far below that which openly incites and manifestly protects it. To pardon a pirate may be injurious to mankind; but how much greater is the crime of opening a port in which all pirates shall be safe! The contraband trader is not more worthy of protections: if, with Narborough, he trades by force, he is a pirate; if he trade secretly, he is only a thief. Those who honestly refuse his traffic, he hates as obstructors of his profit: and those with whom he deals he cheats, because he knows that they dare not complain. He lives with a heart full of that malignity which fear of detection always generates in those who are to defend unjust acquisitions against lawful authority; and when he comes home with riches thus acquired, he brings a mind hardened in evil, too proud for reproof, and too stupid for reflection; he offends the high by his insolence, and corrupts the low by his example.

Whether these truths were forgotten or despised, or whether some better purpose was then in agitation, the representation made in Anson's voyage had such effect upon the statesmen of that time, that (in 1748) some sloops were fitted out for the fuller knowledge of Pepys's and Falkland's Islands, and for further discoveries in the South Sea. This expedition, though perhaps designed to be secret, was not long concealed from Wall, the Spanish ambassador, who so vehemently opposed it, and so strongly maintained the right of the Spaniards, to the exclusive dominion of the South Sea, that the English ministry relinquished part of their original design, and declared that the examination of those two islands was the utmost that their orders should comprise.

This concession was sufficiently liberal or sufficiently submissive; yet the Spanish court was

neither gratified by our kindness, nor softened by our humility. Sir Benjamin Keene, who then resided at Madrid, was interrogated by Carvajal concerning the visit intended to Pepys's and Falkland's Islands in terms of great jealousy and discontent; and the intended expedition was represented, if not as a direct violation of the late peace, yet as an act inconsistent with amicable intentions, and contrary to the professions of mutual kindness which then passed between Spain and England. Keene was directed to protest that nothing more than mere discovery was intended, and that no settlement was to be established. The Spaniard readily replied, that if this was a voyage of wanton curiosity, it might be gratified with less trouble, for he was willing to communicate whatever was known; that to go so far only to come back, was no reasonable act: and it would be a slender sacrifice to peace and friendship to omit a voyage in which nothing was to be gained: that if we left the places as we found them, the voyage was useless; and if we took possession, it was a hostile armament, nor could we expect that the Spaniards would suppose us to visit the southern parts of America only from curiosity, after the scheme proposed by the author of Anson's voyage.

When once we had disowned all purpose of settling, it is apparent that we could not defend the propriety of our expedition by arguments equivalent to Carvajal's objections. This ministry, therefore, dismissed the whole design, but no declaration was required by which our right to pursue it hereafter might be annulled.

From this time Falkland's Island was forgotten or neglected, till the conduct of naval affairs was intrusted to the Earl of Egmont, a man whose mind was vigorous and ardent, whose knowledge was extensive, and whose designs were magnificent; but who had somewhat vitiated his judgment by too much indulgence of romantic projects and airy speculations.

Lord Egmont's eagerness after something new determined him to make inquiry after Falkland's Island, and he sent out Captain Byron, who, in the beginning of the year 1765, took, he says, a formal possession in the name of his Britannic Majesty.

The possession of this place is, according to Mr. Byron's representation, no despicable acquisition. He conceived the island to be six or seven hundred miles round, and represented it a region naked indeed of wood, but which, if that defect were supplied, would have all that nature, almost all that luxury, could want. The harbour he found capacious and secure, and therefore thought it worthy of the name of Egmont. Of water there was no want, and the ground he described as having all the excellences of soil, and as covered with antiscorbutic herbs, the restoratives of the sailor. Provision was easily to be had, for they killed almost every day

a hundred geese to each ship, by pelting them with stones. Not content with physic and with food, he searched yet deeper for the value of the new dominion. He dug in quest of ore, found iron in abundance, and did not despair of nobler metals.

A country thus fertile and delightful, fortunately found where none would have expected it, about the fiftieth degree southern latitude, could not without great supineness be neglected. Early in the next year (January 8, 1766) Captain Macbride arrived at Port Egmont, where he erected a small blockhouse and stationed a garrison. His description was less flattering. He found what he calls a mass of islands and broken lands, of which the soil was nothing but a bog, with no better prospect than that of barren mountains, beaten by storms almost perpetual. Yet this, says he, is summer, and if the winds of winter hold their natural proportion, those who lie but two cables' length from the shore, must pass weeks without any communication with it. The plenty which regaled Mr. Byron, and which might have supported not only armies but armies of Patagons, was no longer to be found. The geese were too wise to stay when men violated their haunts, and Mr. Macbride's crew could only now and then kill a goose when the weather would permit. All the quadrupeds which he met there were foxes, supposed by him to have been brought upon the ice; but of useless animals, such as sea-lions and penguins, which he calls vermin, the number was incredible. He allows, however, that those who touch at these islands may find geese and snipes, and in the summer months, wild celery and sorrel.

No token was seen by either of any settlement ever made upon this island, and Mr. Macbride thought himself so secure from hostile disturbance, that when he erected his wooden blockhouse he omitted to open the ports and loopholes.

When a garrison was stationed at Port Egmont, it was necessary to try what sustenance the ground could be, by culture, excited to produce. A garden was prepared, but the plants that sprung up withered away in immaturity. Some fir-seeds were sown; but though this be the native tree of rugged climates, the young fir that rose above the ground died like weaker herbage. The cold continued long, and the ocean seldom was at rest.

Cattle succeeded better than vegetables. Goats, sheep, and hogs, that were carried thither, were found to thrive and increase as in other places.

*Nil mortalibus arduum est.* There is nothing which human courage will not undertake, and little that human patience will not endure. The garrison lived upon Falkland's Island, shrinking from the blast, and shuddering at the billows.

This was a colony which could never become

independent, for it never could be able to maintain itself. The necessary supplies were annually sent from England, at an expense which the Admiralty began to think would not quickly be repaid. But shame of deserting a project, and unwillingness to contend with a projector that meant well, continued the garrison, and supplied it with regular remittances of stores and provision.

That of which we were almost weary ourselves, we did not expect any one to envy; and therefore supposed that we should be permitted to reside in Falkland's Island, the undisputed lords of tempest-beaten barrenness.

But on the 28th of November, 1769, Captain Hunt, observing a Spanish schooner hovering about the Island and surveying it, sent the commander a message, by which he required him to depart. The Spaniard made an appearance of obeying, but in two days came back with letters written by the Governor of Port Solidad, and brought by the chief officer of a settlement on the east part of Falkland's Island.

In this letter, dated Malouina, November 30th, the governor complains, that Captain Hunt, when he ordered the schooner to depart, assumed a power to which he could have no pretensions, by sending an imperious message to the Spaniards in the king of Spain's own dominions.

In another letter, sent at the same time, he supposes the English to be in that part only by accident, and to be ready to depart at the first warning. This letter was accompanied by a present, of which, says he, "If it be neither equal to my desire nor to your merit, you must impute the deficiency to the situation of us both."

In return to this hostile civility, Captain Hunt warned them from the island, which he claimed in the name of the king, as belonging to the English by right of the first discovery, and the first settlement.

This was an assertion of more confidence than certainty. The right of discovery, indeed, has already appeared to be probable, but the right which priority of settlement confers I know not whether we yet can establish.

On December 10th, the officer sent by the Governor of Port Solidad made three protests against Captain Hunt: for threatening to fire upon him; for opposing his entrance into Port Egmont; and for entering himself into Port Solidad. On the 12th the Governor of Port Solidad formally warned Captain Hunt to leave Port Egmont, and to forbear the navigation of these seas, without permission from the king of Spain.

To this Captain Hunt replied by repeating his former claim; by declaring that his orders were to keep possession: and by once more warning the Spaniards to depart.

The next month produced more protests and

more replies, of which the tenor was nearly the same. The operations of such harmless enmity having produced no effect, were then reciprocally discontinued, and the English were left for a time to enjoy the pleasures of Falkland's island without molestation.

This tranquillity, however, did not last long. A few months afterwards (June 4th, 1770) the *Industry*, a Spanish frigate, commanded by an officer whose name was Madariaga, anchored in Port Egmont, bound, as was said, for Port Solidad, and reduced, by a passage from Buenos Ayres of fifty-three days, to want of water.

Three days afterwards four other frigates entered the port, and a broad pendant, such as is borne by the commander of a naval armament, was displayed from the *Industry*. Captain Farmer, of the *Swift* frigate, who commanded the garrison, ordered the crew of the *Swift* to come on shore, and assist in its defence; and directed Captain Maltby to bring the *Favourite* frigate, which he commanded, nearer to the land. The Spaniards easily discovering the purpose of his motion, let him know, that if he weighed his anchor, they would fire upon his ship; but paying no regard to these menaces, he advanced toward the shore. The Spanish fleet followed, and two shots were fired, which fell at a distance from him. He then sent to inquire the reason of such hostility, and was told that the shots were intended only as signals.

Both the English captains wrote the next day to Madariaga, the Spanish commodore, warning him from the island, as from a place which the English held by right of discovery.

Madariaga, who seems to have had no desire of unnecessary mischief, invited them (June 9th) to send an officer who should take a view of his forces, that they might be convinced of the vanity of resistance, and do that without compulsion, which he was, upon refusal, prepared to enforce.

An officer was sent, who found sixteen hundred men, with a train of twenty-seven cannon, four mortars, and two hundred bombs. The fleet consisted of five frigates, from twenty to thirty guns, which were now stationed opposite to the blockhouse.

He then sent them a formal memorial, in which he maintained his master's right to the whole Magellanic region, and exhorted the English to retire quietly from the settlement, which they could neither justify by right, nor maintain by power.

He offered them the liberty of carrying away whatever they were desirous to remove, and promised his receipt for what should be left, that no loss might be suffered by them.

His propositions were expressed in terms of great civility; but he concludes with demanding an answer in fifteen minutes.

Having, while he was writing, received the

letters of warning written the day before by the English captains, he told them that he thought himself able to prove the king of Spain's title to all those countries, but that this was no time for verbal altercations. He persisted in his determination, and allowed only fifteen minutes for an answer.

To this it was replied by Captain Farmer, that though there had been prescribed yet a shorter time, he would still resolutely defend his charge; that this, whether menace or force, would be considered as an insult on the British flag, and that satisfaction would certainly be required.

On the next day (June 10th) Madariaga landed his forces, and it may be easily imagined that he had no bloody conquest. The English had only a wooden blockhouse, built at Woolwich, and carried in pieces to the island, with a small battery of cannon. To contend with obstinacy had been only to lavish life without use or hope. After the exchange of a very few shots, a capitulation was proposed.

The Spanish commander acted with moderation; he exerted little of the conqueror; what he had offered before the attack, he granted after the victory; the English were allowed to leave the place with every honour, only their departure was delayed, by the terms of the capitulation, twenty days; and to secure their stay, the rudder of the *Favourite* was taken off. What they desired to carry away, they removed without molestation; and of what they left, an inventory was drawn, for which the Spanish officer, by his receipt, promised to be accountable.

Of this petty revolution, so sudden and so distant, the English ministry could not possibly have such notice as might enable them to prevent it. The conquest, if such it may be called, cost but three days; for the Spaniards, either supposing the garrison stronger than it was, or resolving to trust nothing to chance, or considering that, as their force was greater, there was less danger of bloodshed, came with a power that made resistance ridiculous, and at once demanded and obtained possession.

The first account of any discontent expressed by the Spaniards, was brought by Captain Hunt, who arriving at Plymouth, June 3d, 1770, informed the Admiralty that the Island had been claimed in December by the Governor of Port Solidad.

This claim, made by an officer of so little dignity, without any known direction from his superiors, could be considered only as the zeal or officiousness of an individual, unworthy of public notice, or the formality of remonstrance.

In August, Mr. Harris, the resident at Madrid, gave notice to lord Weymouth of an account newly brought to Cadiz, that the English were in possession of Port Cuizada, the same which we call Port Egmont, in the Magellanic

sea; that in January they had warned away two Spanish ships; and that an armament was sent out in May from Buenos Ayres to dislodge them.

It was, perhaps, not yet certain that this account was true; but the information, however faithful, was too late for prevention. It was easily known, that a fleet despatched in May had before August succeeded or miscarried.

In October, Captain Maltby came to England, and gave the account which I have now epitomised, of his expulsion from Falkland's Islands.

From this moment the whole nation can witness that no time was lost. The navy was surveyed, the ships refitted, and commanders appointed; and a powerful fleet was assembled, well manned and well stored, with expedition, after so long a peace, perhaps never known before, and with vigour, which, after the waste of so long a war, scarcely any other nation had been capable of exerting.

This preparation, so illustrious in the eyes of Europe, and so efficacious in its event, was obstructed by the utmost power of that noisy faction which has too long filled the kingdom, sometimes with the roar of empty menace, and sometimes with the yell of hypocritical lamentation. Every man saw, and every honest man saw with detestation, that they who desired to force their sovereign into war, endeavoured at the same time to disable him from action.

The vigour and spirit of the ministry easily broke through all the machinations of these pigmy rebels, and our armament was quickly such as was likely to make our negotiations effectual.

The Prince of Masseran, in his first conference with the English ministers on this occasion, owned that he had from Madrid received intelligence that the English had been forcibly expelled from Falkland's Island by Buccarelli, the Governor of Buenos Ayres, without any particular orders from the king of Spain. But being asked, whether in his master's name he disavowed Buccarelli's violence, he refused to answer without direction.

The scene of negotiation was now removed to Madrid, and in September, Mr. Harris was directed to demand from Grimaldi, the Spanish minister, the restitution of Falkland's Island, and a disavowal of Buccarelli's hostilities.

It was to be expected that Grimaldi would object to us our own behaviour, who had ordered the Spaniards to depart from the same island. To this it was replied, That the English forces were indeed directed to warn other nations away; but if compliance were refused, to proceed quietly in making their settlement, and suffer the subjects of whatever power to remain there without molestation. By possession thus taken, there was only a disputable claim ad-

vanced, which might be peaceably and regularly decided, without insult, and without force; and if the Spaniards had complained at the British court, their reasons would have been heard, and all injuries redressed; but that, by presupposing the justice of their own title, and having recourse to arms, without any previous notice or remonstrance, they had violated the peace, and insulted the British government; and therefore it was expected that satisfaction should be made by public disavowal, and immediate restitution.

The answer of Grimaldi was ambiguous and cold. He did not allow that any particular orders had been given for driving the English from their settlement; but made no scruple of declaring, that such an ejection was nothing more than the settlers might have expected; and that Buccarelli had not, in his opinion, incurred any blame, as the general injunctions to the American governors were, to suffer no encroachments on the Spanish dominions.

In October, the Prince of Masseran proposed a convention for the accommodation of differences by mutual concessions, in which the warning given to the Spaniards by Hunt should be disavowed on one side, and the violence used by Buccarelli on the other. This offer was considered as little less than a new insult, and Grimaldi was told, that injury required reparation; that when either party had suffered evident wrong, there was not the parity subsisting which is implied in conventions and contracts; that we considered ourselves as openly insulted, and demanded satisfaction plenary and unconditional.

Grimaldi affected to wonder that we were not yet appeased by their concessions. They had, he said, granted all that was required; they had offered to restore the island in the state in which they found it; but he thought that they likewise might hope for some regard, and that the warning sent by Hunt would be disavowed.

Mr. Harris, our minister at Madrid, insisted that the injured party had a right to unconditional reparation, and Grimaldi delayed his answer, that a council might be called. In a few days orders were dispatched to Prince Masseran, by which he was commissioned to declare the king of Spain's readiness to satisfy the demands of the king of England, in expectation of receiving from him a reciprocal satisfaction, by the disavowal, so often required, of Hunt's warning.

Finding the Spaniards disposed to make no other acknowledgments, the English ministry considered a war as not likely to be long avoided. In the latter end of November, private notice was given of their danger to the merchants at Cadiz, and the officers absent from Gibraltar were remanded to their posts. Our naval force was every day increased, and we made no abatement of our original demand.

The obstinacy of the Spanish court still continued, and about the end of the year all hope of reconciliation was so nearly extinguished, that Mr. Harris was directed to withdraw, with the usual forms, from his residence at Madrid.

Moderation is commonly firm, and firmness is commonly successful; having not swelled our first requisition with any superfluous appendages, we had nothing to yield, we therefore only repeated our first proposition, prepared for war, though desirous of peace.

About this time, as is well known, the king of France dismissed Choiseul from his employments. What effect this revolution of the French court had upon the Spanish counsels, I pretend not to be informed. Choiseul had always professed pacific dispositions, nor is it certain, however it may be suspected, that he talked in different strains to different parties.

It seems to be almost the universal error of historians to suppose it politically, as it is physically true, that every effect has a proportionate cause. In the inanimate action of matter upon matter, the motion produced can be but equal to the force of the moving power; but the operations of life, whether private or public, admit no such laws. The caprices of voluntary agents laugh at calculation. It is not always that there is a strong reason for a great event. Obstinacy and flexibility, malignity, and kindness, give place alternately to each other, and the reason of these vicissitudes, however important may be the consequences, often escapes the mind in which the change is made.

Whether the alteration which began in January to appear in the Spanish counsels, had any other cause than conviction of the impropriety of their past conduct, and of the danger of a new war, it is not easy to decide; but they began, whatever was the reason, to relax their haughtiness, and Mr. Harris's departure was countermanded.

The demands first made by England were still continued, and on January 22nd, the prince of Masseran delivered a declaration, in which the king of Spain "disavows the violent enterprise of Buccarelli," and promises "to restore the port and fort called Egmont, with all the artillery and stores, according to the inventory."

To this promise of restitution is subjoined, that "this engagement to restore Port Egmont cannot, nor ought in any wise to affect the question of the prior right of sovereignty of the Malouine, Otherwise called Falkland's Islands."

This concession was accepted by the Earl of Rochford, who declared on the part of his master, that the prince of Masseran being authorized by his catholic majesty "to offer in his majesty's name to the king of Great Britain a satisfaction for the injury done him by dispossessing him of Port Egmont," and having

signed a declaration expressing that his catholic majesty "disavows the expedition against Port Egmont, and engages to restore it in the state in which it stood before the 10th of June, 1770, his Britannic majesty will look upon the said declaration, together with the full performance of the engagement on the part of his catholic majesty, as a satisfaction for the injury done to the crown of Great Britain."

This is all that was originally demanded. The expedition is disavowed, and the island is restored. An injury is acknowledged by the reception of Lord Rochford's paper, who twice mentions the word *injury*, and twice the word *satisfaction*.

The Spaniards have stipulated that the grant of possession shall not preclude the question of prior right, a question which we shall probably make no haste to discuss, and a right of which no formal resignation was ever required. This reserve has supplied matter for much clamour, and perhaps the English ministry would have been better pleased had the declaration been without it. But when we have obtained all that was asked, why should we complain that we have not more? When the possession is conceded, where is the evil that the right, which that concession supposes to be merely hypothetical, is referred to the Greek calends for a future disquisition? Were the Switzers less free or less secure, because after their defection from the house of Austria they had never been declared independent, before the treaty of Westphalia? Is the king of France less a sovereign because the king of England partakes his title?

If sovereignty implies undisputed right, scarce any prince is a sovereign through his whole dominions; if sovereignty consists in this, that no superior is acknowledged, our king reigns at Port Egmont with sovereign authority. Almost every new-acquired territory is in some degree controvertible, and till the controversy is decided, a term very difficult to be fixed, all that can be had is real possession and actual dominion.

This surely is a sufficient answer to the feudal gabble of a man who is every day lessening that splendour of character which once illuminated the kingdom, then dazzled, and afterwards inflamed it; and for whom it will be happy if the nation shall at last dismiss him to nameless obscurity, with that equipoise of blame and praise which Corneille allows to Richelieu, a man who, I think, had much of his merit, and many of his faults.

*Chacun parle à son gré de ce grand Cardinal,  
Mais pour moi je n'en dirai rien ;  
Il m'a fait trop de bien pour en dire du mal,  
Il m'a fait trop de mal pour en dire du bien.*

To push advantages too far, is neither generous nor just. Had we insisted on a concession

of antecedent right, it may not misbecome us, either as moralists or politicians, to consider what Grimaldi could have answered. We have already, he might say, granted you the whole effect of right, and have not denied you the name.

We have not said that the right was ours before this concession, but only that what right we had, is not by this concession vacated. We have now for more than two centuries ruled large tracts of the American continent, by a claim which perhaps is valid only upon this consideration, that no power can produce a better; by the right of discovery and prior settlement. And by such titles almost all the dominions of the earth are holden, except that their original is beyond memory, and greater obscurity gives them greater veneration. Should we allow this plea to be annulled, the whole fabric of our empire shakes at the foundation. When you suppose yourselves to have first descried the disputed island, you suppose what you can hardly prove. We were at least the general discoverers of the Magellanic region, and have hitherto held it with all its adjacencies. The justice of this tenure the world has hitherto admitted, and yourselves at least tacitly allowed it, when about twenty years ago you desisted from your purposed expedition, and expressly disowned any design of settling, where you are now not content to settle and to reign, without extorting such a confession of original right, as may invite every other nation to follow you.

To considerations such as these, it is reasonable to impute that anxiety of the Spaniards, from which the importance of this island is inferred by Junius, one of the few writers of his despicable faction whose name does not disgrace the page of an opponent. The value of the thing disputed may be very different to him that gains and him that loses it. The Spaniards, by yielding Falkland's Island, have admitted a precedent of what they think encroachment; have suffered a breach to be made in the outworks of their empire; and, notwithstanding the reserve of prior right, have suffered a dangerous exception to the prescriptive tenure of their American territories.

Such is the loss of Spain; let us now compute the profit of Britain. We have, by obtaining a disavowal of Buccarelli's expedition, and a restitution of our settlement, maintained the honour of the crown, and the superiority of our influence. Beyond this what have we acquired? What, but a bleak and gloomy solitude, an island thrown aside from human use, stormy in winter, and barren in summer; an island which not the southern savages have dignified with habitation; where a garrison must be kept in a state that contemplates with envy the exiles of Siberia; of which the expense will be perpetual, and the use only occasional; and which, if fortune smile upon our labours, may become a nest

of smugglers in peace, and in war the refuge of future Buccaneers. To all this the government has now given ample attestation, for the island has been since abandoned, and perhaps was kept only to quiet clamours, with an intention, not then wholly concealed, of quitting it in a short time.

This is the country of which we have now possession, and of which a numerous party pretends to wish that we had murdered thousands for the titular sovereignty. To charge any men with such madness, approaches to an accusation defeated by its own incredibility. As they have been long accumulating falsehoods, it is possible that they are now only adding another to the heap, and that they do not mean all that they profess. But of this faction what evil may not be credited? They have hitherto shown no virtue, and very little wit, beyond that mischievous cunning for which it is held by Hale that children may be hanged.

As war is the last of remedies, *cuncta prius tentanda*, all lawful expedients must be used to avoid it. As war is the extremity of evil, it is surely the duty of those whose station intrusts them with the care of nations, to avert it from their charge. There are diseases of animal nature which nothing but amputation can remove; so there may, by the deprivation of human passions, be sometimes a gangrene in collective life for which fire and the sword are the necessary remedies; but in what can skill or caution be better shown than preventing such dreadful operations, while there is yet room for gentler methods?

It is wonderful with what coolness and indifference the greater part of mankind see war commenced. Those that hear of it at a distance, or read of it in books, but have never presented its evils to their minds, consider it as little more than a splendid game, a proclamation, an army, a battle, and a triumph. Some indeed must perish in the most successful field, but they die upon the bed of honour, *resign their lives amidst the joys of conquest, and, filled with England's glory, smile in death.*

The life of a modern soldier is ill represented by heroic fiction. War has means of destruction more formidable than the cannon and the sword. Of the thousands and ten thousands that perished in our late contests with France and Spain, a very small part ever felt the stroke of an enemy; the rest languished in tents and ships, amidst damps and putrefaction; pale, torpid, spiritless, and helpless; gasping and groaning, unpitied among men, made obdurate by long continuance of hopeless misery; and were at last whelmed in pits, or heaved into the ocean, without notice and without remembrance. By incommensurable encampments and unwholesome stations, where courage is useless, and en-

terprise impracticable, fleets are silently dispeopled, and armies sluggishly melted away.

Thus is a people gradually exhausted, for the most part, with little effect. The wars of civilized nations make very slow changes in the system of empire. The public perceives scarcely any alteration but an increase of debt; and the few individuals who are benefited, are not supposed to have the clearest right to their advantages. If he that shared the danger enjoyed the profit, and after bleeding in the battle grew rich by the victory, he might show his gains without envy. But at the conclusion of a ten years' war, how are we recompensed for the death of multitudes and the expense of millions, but by contemplating the sudden glories of paymasters and agents, contractors and commissaries, whose equipages shine like meteors, and whose palaces rise like exhalations?

These are the men who, without virtue, labour, or hazard, are growing rich as their country is impoverished; they rejoice when obstinacy or ambition adds another year to slaughter and devastation; and laugh from their desks at bravery and science, while they are adding figure to figure, and cipher to cipher, hoping for a new contract from a new armament, and computing the profits of a siege or tempest.

Those who suffer their minds to dwell on these considerations will think it no great crime in the ministry that they have not snatched with eagerness the first opportunity of rushing into the field, when they were able to obtain by quiet negotiation all the real good that victory could have brought us.

Of victory indeed every nation is confident before the sword is drawn; and this mutual confidence produces that wantonness of bloodshed that has so often desolated the world. But it is evident, that of contradictory opinions one must be wrong; and the history of mankind does not want examples that may teach caution to the daring and moderation to the proud.

Let us not think our laurels blasted by condescending to inquire, whether we might not possibly grow rather less than greater by attacking Spain? Whether we should have to contend with Spain alone, whatever has been promised by our patriots, may very reasonably be doubted. A war declared for the empty sound of an ancient title to a Magellanic rock, would raise the indignation of the earth against us. These encroachers on the waste of nature, says our ally the Russian, if they succeed in their first effort of usurpation, will make war upon us for a title to Kamschatscha. These universal settlers, says our ally the Dane, will in a short time settle upon Greenland, and a fleet will batter Copenhagen, till we are willing to confess that it always was their own.

In a quarrel like this, it is not possible that

any power should favour us, and it is very likely that some would oppose us. The French, we are told, are otherwise employed: the contests between the king of France and his own subjects are sufficient to withhold him from supporting Spain. But who does not know that a foreign war has often put a stop to civil discords? It withdraws the attention of the public from domestic grievances, and affords opportunities of dismissing the turbulent and restless to distant employments. The Spaniards have always an argument of irresistible persuasion. If France will not support them against England, they will strengthen England against France.

But let us indulge a dream of idle speculation, and suppose that we are to engage with Spain, and with Spain alone; it is not even yet very certain that much advantage will be gained.

Spain is not easily vulnerable; her kingdom, by the loss or cession of many fragments of dominion, is become solid and compact. The Spaniards have, indeed, no fleet able to oppose us, but they will not endeavour actual opposition: they will shut themselves up in their own territories, and let us exhaust our seamen in a hopeless siege. They will give commissions to privateers of every nation, who will prey upon our merchants without possibility of reprisal. If they think their Plate fleet in danger, they will forbid it to set sail, and live awhile upon the credit of treasure which all Europe knows to be safe: and which, if our obstinacy should continue till they can no longer be without it, will be conveyed to them with secrecy and security by our natural enemies the French, or by the Dutch our natural allies.

But the whole continent of Spanish America will lie open to invasion; we shall have nothing to do but march into these wealthy regions, and make their present masters confess that they were always ours by ancient right. We shall throw brass and iron out of our houses, and nothing but silver will be seen among us.

All this is very desirable, but it is not certain that it can be easily attained. Large tracts of America were added by the last war to the British dominions; but, if the faction credit their own Apollo, they were conquered in Germany. They at best are only the barren parts of the continent, the refuse of the earlier adventurers, which the French, who came last, had taken only as better than nothing.

Against the Spanish dominions we have never hitherto been able to do much. A few privateers have grown rich at their expense, but no scheme of conquest has yet been successful. They are defended not by walls mounted with cannons which by cannons may be battered, but by the storms of the deep and the vapours of the land, by the flames of calenture and blasts of pestilence.

In the reign of Elizabeth, the favourite peri-

od of English greatness, no enterprises against America had any other consequence than that of extending English navigation. Here Cavenish perished after all his hazards; and here Drake and Hawkins, great as they were in knowledge and in fame, having promised honour to themselves and dominion to the country, sunk by desperation and misery in dishonourable graves.

During the protectorship of Cromwell, a time of which the patriotic tribes still more ardently desire the return, the Spanish dominions were again attempted; but here, and only here, the fortune of Cromwell made a pause. His forces were driven from Hispaniola, his hopes of possessing the West Indies vanished, and Jamaica was taken, only that the whole expedition might not grow ridiculous.

The attack of Carthage is yet remembered, where the Spaniards from the ramparts saw their invaders destroyed by the hostility of the elements; poisoned by the air, and crippled by the dews; where every hour swept away battalions; and in the three days that passed between the descent and re-embarkation, half an army perished.

In the last war the Havanna was taken; at what expense is too well remembered. May my country be never cursed with such another conquest!

These instances of miscarriage, and these arguments of difficulty, may perhaps abate the military ardour of the public. Upon the opponents of the government their operation will be different; they wish for war, but not for conquest; victory would defeat their purposes equally with peace, because prosperity would naturally continue the trust in those hands which had used it fortunately. The patriots gratified themselves with expectations that some sinister accident, or erroneous conduct, might diffuse discontent and inflame malignity. Their hope is malevolence, and their good is evil.

Of their zeal for their country we have already had a specimen. While they were terrifying the nation with doubts whether it was any longer to exist; while they represented invasive armies as hovering in the clouds, and hostile fleets as emerging from the deeps. They obstructed our levies of seamen, and embarrassed our endeavours of defence. Of such men he thinks with unnecessary candour who does not believe them likely to have promoted the miscarriage which they desired, by intimidating our troops or betraying our counsels.

It is considered as an injury to the public by those sanguinary statesmen, that though the fleet has been refitted and manned, yet no hostilities have followed; and they who sat wishing for misery and slaughter are disappointed of their pleasure. But as peace is the end of war, it is the end likewise of preparations for war;

and he may be justly hunted down as the enemy of mankind, that can choose to snatch by violence and bloodshed, what gentler means can equally obtain.

The ministry are reproached as not daring to provoke an enemy, lest ill success should discredit and displace them. I hope that they had better reasons; that they paid some regard to equity and humanity; and considered themselves as intrusted with the safety of their fellow-subjects, and as the destroyers of all that should be superfluously slaughtered. But let us suppose that their own safety had some influence on their conduct, they will not, however, sink to a level with their enemies. Though the motive might be selfish, the act was innocent. They who grow rich by administering physic, are not to be numbered with them that get money by dispensing poison. If they maintain power by harmlessness and peace, they must for ever be at a great distance from ruffians who would gain it by mischief and confusion. The watch of a city may guard it for hire, but are well employed in protecting it from those who lie in wait to fire the streets and rob the houses amidst the conflagration.

An unsuccessful war would undoubtedly have had the effect which the enemies of the ministry so earnestly desire; for who could have sustained the disgrace of folly ending in misfortune? But had wanton invasion undeservedly prospered, had Falkland's Island been yielded unconditionally with every right prior and posterior; though the rabble might have shouted, and the windows have blazed, yet those who know the value of life, and the uncertainty of public credit, would have murmured, perhaps unheard, at the increase of our debt and the loss of our people.

This thirst of blood, however the visible promoters of sedition may think it convenient to shrink from the accusation, is loudly avowed by Junius, the writer to whom his party owes much of its pride, and some of its popularity. Of Junius it cannot be said, as of Ulysses, that he scatters ambiguous expressions among the vulgar; for he cries havoc without reserve, and endeavours to let slip the dogs of foreign or of civil war, ignorant whether they are going, and careless what may be their prey.

Junius has sometimes made his satire felt, but let not injudicious admiration mistake the venom of the shaft for the vigour of the bow. He has sometimes sported with lucky malice; but to him that knows his company, it is not hard to be sarcastic in a mask. While he walks like Jack the Giant-killer in a coat of darkness, he may do much mischief with little strength. Novelty captivates the superficial and thoughtless; vehemence delights the discontented and turbulent. He that contradicts acknowledged truth will always have an audience; he that vi-

lifies established authority will always find abettors.

Junius burst into notice with a blaze of impudence which has rarely glared upon the world before, and drew the rabble after him as a monster makes a show. When he had once provided for his safety by impenetrable secrecy, he had nothing to combat but truth and justice, enemies whom he knows to be feeble in the dark. Being then at liberty to indulge himself in all the immunities of invisibility; out of the reach of danger, he has been bold; out of the reach of shame, he has been confident. As a rhetorician, he has had the art of persuading when he seconded desire; as a reasoner, he has convinced those who had no doubt before; as a moralist, he has taught that virtue may disgrace; and as a patriot, he has gratified the mean by insults on the high. Finding sedition ascendant, he has been able to advance it; finding the nation combustible, he has been able to inflame it. Let us abstract from his wit the vivacity of insolence, and withdraw from his efficacy the sympathetic favour of plebeian malignity; I do not say, that we shall leave him nothing: the cause that I defend scorns the help of falsehood: but if we leave him only his merit, what will be his praise?

It is not by his liveliness of imagery, his pungency of periods, or his fertility of allusion, that he detains the cities of London, and the bores of Middlesex. Of style and sentiment they take no cognizance. They admire him for virtues like their own, for contempt of order and violence of outrage, for rage of defamation and audacity of falsehood. The supporters of the Bill of Rights feel no niceties of composition, nor dexterity of sophistry: their faculties are better proportioned to the bawl of Bellas, or barbarity of Beckford: but they are told that Junius is on their side, and they are therefore sure that Junius is infallible. Those who know not whether he would lead them, resolve to follow him; and those who cannot find his meaning, hope he means rebellion.

Junius is an unusual phenomenon, on which some have gazed with wonder and some with terror, but wonder and terror are transitory passions. He will soon be more closely viewed or more attentively examined, and what folly has taken for a comet that from its flaming hair shook pestilence and war, inquiry will find to be only a meteor formed by vapours of putrifying democracy, and kindled into flame by the effervescence of interest struggling with conviction; which after having plunged its followers in a bog, will leave us inquiring why we regard it.

Yet, though I cannot think the style of Junius secure from criticism, though his expressions are often trite, and his periods feeble, I should never have stationed him where he has placed himself, had I not rated him by his morals

rather than his faculties. What, says Pope, must be the priest, where a monkey is the god? What must be the drudge of a party, of which the heads are Wilkes and Crosby, Sawbridge and Townshend?

Junius knows his own meaning, and can therefore tell it. He is an enemy to the ministry, he sees them growing hourly stronger. He knows that a war at once unjust and unsuccessful would have certainly displaced them, and is therefore, in his zeal for his country, angry that war was not unjustly made, and unsuccessfully conducted. But there are others whose thoughts are less clearly expressed, and whose schemes perhaps are less consequentially digested; who declare that they do not wish for a rupture, yet condemn the ministry for not doing that, by which a rupture would naturally have been made.

If one party resolves to demand what the other resolves to refuse, the dispute can be determined only by arbitration; and between powers who have no common superior, there is no other arbitrator than the sword.

Whether the ministry might not equitably have demanded more, is not worthy a question. The utmost exertion of right is always invidious, and where claims are not easily determinable, is always dangerous. We asked all that was necessary, and persisted in our first claim without mean recession, or wanton aggravation. The Spaniards found us resolute, and complied after a short struggle.

The real crime of the ministry is, that they have found the means of avoiding their own ruin: but the charge against them is multifarious and confused, as will happen, when malice and discontent are ashamed of their complaint. The past and the future are complicated in the censure. We have heard a tumultuous clamour about honour and rights, injuries and insults, the British flag, and the Favourite's rudder, Buccarelli's conduct, and Grimaldi's declarations, the Manilla ransom, delays and reparation.

Through the whole argument of the faction runs the general error, that our settlement on Falkland's Island was not only lawful but unquestionable; that our right was not only certain but acknowledged; and that the equity of our conduct was such, that the Spaniards could not blame or obstruct it without combating their own conviction, and opposing the general opinion of mankind.

If once it be discovered that, in the opinion of the Spaniards, our settlement was usurped, our claim arbitrary, and our conduct insolent, all that has happened will appear to follow by a natural concatenation. Doubts will produce disputes and disquisition, disquisition requires delay, and delay causes inconvenience.

Had the Spanish government immediately

yielded unconditionally all that was required, we might have been satisfied; but what would Europe have judged of their submission? that they shrunk before us as a conquered people, who having lately yielded to our arms, were now compelled to sacrifice to our pride. The honour of the public is indeed of high importance; but we must remember that we have had to transact with a mighty king and a powerful nation, who have unluckily been taught to think that they have honour to keep or lose as well as ourselves.

When the Admiralty were told in June of the warning given to Hunt, they were, I suppose, informed that Hunt had first provoked it by warning away the Spaniards, and naturally considered one act of insolence as balanced by another, without expecting that more would be done on either side. Of representations and remonstrances there would be no end, if they were to be made whenever small commanders are uncivil to each other; nor could peace ever be enjoyed, if upon such transient provocations it be imagined necessary to prepare for war. We might then, it is said, have increased our force with more leisure and less inconvenience; but this is to judge only by the event. We omitted to disturb the public, because we did not suppose that an armament would be necessary.

Some months afterwards, as has been told, Buccarelli, the governor of Buenos Ayres, sent against the settlement of Port Egmont a force which ensured the conquest. The Spanish commander required the English captains to depart, but they, thinking that resistance necessary which they knew to be useless, gave the Spaniards the right of prescribing terms of capitulation. The Spaniards imposed no new condition, except that the sloop should not sail under twenty days; and of this they secured the performance by taking off the rudder.

To an inhabitant of the land there appears nothing in all this unreasonable or offensive. If the English intended to keep their stipulation, how were they injured by the detention of the rudder? If the rudder be to a ship what his tail is in fables to a fox, the part in which honour is placed, and of which the violation is never to be endured, I am sorry that the Favourite suffered an indignity, but cannot yet think it a cause for which nations should slaughter one another.

When Buccarelli's invasion was known, and the dignity of the crown infringed, we demanded reparation and prepared for war, and we gained equal respect by the moderation of our terms, and the spirit of our exertion. The Spanish minister immediately denied that Buccarelli had received any particular orders to seize Port Egmont, nor pretended that he was justified otherwise than by the general instructions by which the American governors are required to exclude the subjects of other powers.

To have inquired whether our settlement at Port Egmont was any violation of the Spanish rights, had been to enter upon a discussion which the pertinacity of political disputants might have continued without end. We therefore called for restitution, not as a confession of right, but as a reparation of honour, which required that we should be restored to our former state upon the island, and that the king of Spain should disavow the action of his governor.

In return to this demand, the Spaniards expected from us a disavowal of the menaces with which they had been first insulted by Hunt; and if the claim to the island be supposed doubtful, they certainly expected it with equal reason. This, however, was refused, and our superiority of strength gave validity to our arguments.

But we are told that the disavowal of the king of Spain is temporary and fallacious; that Buccarelli's armament had all the appearance of regular forces and a concerted expedition; and that he is not treated at home as a man guilty of piracy, or as disobedient to the orders of his master.

That the expedition was well planned, and the forces properly supplied, affords no proof of communication between the governor and his court. Those who are intrusted with the care of kingdoms in another hemisphere, must always be trusted with power to defend them.

As little can be inferred from his reception at the Spanish court. He is not punished indeed, for what has he done that deserves punishment? He was sent into America to govern and defend the dominions of Spain. He thought the English were encroaching, and drove them away. No Spaniard thinks that he has exceeded his duty, nor does the king of Spain charge him with excess. The boundaries of dominion in that part of the world have not yet been settled; and he mistook, if a mistake there was, like a zealous subject, in his master's favour.

But all this inquiry is superfluous. Considered as a reparation of honour, the disavowal of the king of Spain, made in the sight of all Europe is of equal value whether true or false. There is indeed no reason to question its veracity; they, however, who do not believe it, must allow the weight of that influence by which a great prince is reduced to disown his own commission.

But the general orders upon which the governor is acknowledged to have acted, are neither disavowed nor explained. Why the Spaniards should disavow the defence of their own territories, the warmest disputant will find it difficult to tell; and if by an explanation is meant an accurate delineation of the southern empire, and the limitation of their claims beyond the line, it cannot be imputed to any very culpable remissness, that what has been denied

for two centuries to the European powers, was not obtained in a hasty wrangle about a petty settlement.

The ministry were too well acquainted with negotiation to fill their heads with such idle expectations. The question of right was inexplicable and endless. They left it as it stood. To be restored to actual possession was easily practicable. This restoration they required and obtained.

But they should, say their opponents, have insisted upon more; they should have exacted not only reparation of our honour, but repayment of our expense. Nor are they all satisfied with the recovery of the costs and damages of the present contest; they are for taking this opportunity of calling in old debts, and reviving our right to the ransom of Manilla.

The Manilla ransom has, I think, been most mentioned by the inferior bellowers of sedition. Those who lead the faction, know that it cannot be remembered much to their advantage. The followers of Lord Rockingham remember that his ministry began and ended without obtaining it; the adherents to Grenville would be told, that he could never be taught to understand our claim. The law of nations made little of his knowledge. Let him not, however, be depreciated in his grave. If he was sometimes wrong, he was often right.

Of reimbursement the talk has been more confident, though not more reasonable. The expenses of war have been often desired, have been sometimes required, but were never paid; or never but when resistance was hopeless, and there remained no choice between submission and destruction.

Of our late equipments I know not from whom the charge can be very properly expected. The king of Spain disavows the violence which provoked us to arm, and for the mischiefs which he did not do, why should he pay? Buccarelli, though he had learned all the arts of an East-Indian governor, could hardly have collected at Buenos Ayres a sum sufficient to satisfy our demands. If he be honest, he is hardly rich; and if he be disposed to rob, he has the misfortune of being placed where robbers have been before him.

The king of Spain, indeed, delayed to comply with our proposals, and our armament was made necessary by unsatisfactory answers and dilatory debates. The delay certainly increased our expenses, and it is not unlikely that the increase of our expenses put an end to delay.

But this is the inevitable process of human affairs. Negotiation requires time. What is not apparent to intuition, must be found by inquiry. Claims that have remained doubtful for ages, cannot be settled in a day. Reciprocal complaints are not easily adjusted but by reciprocal compliance. The Spaniards thinking

themselves entitled to the island, and injured by Captain Hunt, in their turn demanded satisfaction, which was refused; and where is the wonder if their concessions were delayed! They may tell us, that an independent nation is to be influenced not by command, but by persuasion; that if we expect our proposals to be received without deliberation, we assume that sovereignty which they do not grant us; and that if we arm while we are deliberating, we must indulge our martial ardour at our own charge.

The English ministry asked all that was reasonable, and enforced all that they asked. Our national honour is advanced, and our interest, if any interest we have, is sufficiently secured. There can be none amongst us to whom this transaction does not seem happily concluded, but those who, having fixed their hopes on public calamities, sat like vultures waiting for a day of carnage. Having worn out all the arts of domestic sedition, having wearied violence, and exhausted falsehood, they yet flattered themselves with some assistance from the pride or malice of Spain; and when they could no longer make the people complain of grievances which they did not feel, they had the comfort yet of knowing that real evils were possible, and their resolution is well known of charging all evil on their governors.

The reconciliation was therefore considered as the loss of their last anchor; and received not only with the fretfulness of disappointment, but the rage of desperation. When they found that all were happy in spite of their machinations, and the soft effulgence of peace shone out upon the nation, they felt no motion but that of sullen envy; they could not, like Milton's prince of hell, abstract themselves a moment from their evil; as they have not the wit of Satan, they have not his virtue; they tried once again what could be done by sophistry without art, and confidence without credit. They represented their sovereign as dishonoured, and their country as betrayed, or, in their fiercer paroxysms of fury, reviled their sovereign as betraying it.

Their pretences I have here endeavoured to expose, by showing that more than has been yielded was not to be expected, that more perhaps was not to be desired, and that, if all had been refused, there had scarcely been an adequate reason for war.

There was perhaps never much danger of war or of refusal; but what danger there was, proceeded from the faction. Foreign nations, unacquainted with the insolence of Common Councils, and unaccustomed to the howl of plebeian patriotism, when they heard of rabbles and riots, of petitions and remonstrances, of discontent in Surrey, Derbyshire, and Yorkshire, when they saw the chain of subordination broken, and the legislature threatened and defied, naturally imagined that such a government had little leisure

for Falkland's Island; they supposed that the English, when they returned ejected from Port Egmont, would find Wilkes invested with the protectorate; or see the Mayor of London, what the French have formerly seen their mayors of the palace, the commander of the army and tutor of the king; that they would be called to tell their tale before the Common Council; and that the world was to expect war or peace from a vote of the subscribers to the Bill of Rights.

But our enemies have now lost their hopes, and our friends, I hope, are recovered from their fears. To fancy that our government can be subverted by the rabble, whom its lenity has pampered into impudence, is to fear that a city may be drowned by the overflowing of its kennels. The distemper which cowardice or malice thought either decay of the vitals, or resolution of the nerves, appears at last to have been nothing more than a political *phthiriasis*, a disease too loathsome for a plainer name; but the effect of negligence rather than of weakness, and of which the shame is greater than the danger.

Among the disturbers of our quiet are some animals of greater bulk, whom their power of roaring persuaded us to think formidable, but we now perceive that sound and force do not always go together. The noise of a savage proves nothing but his hunger.

After all our broils, foreign and domestic, we may at last hope to remain a while in quiet, amused with the view of our own success. We have gained political strength by the increase of our reputation; we have gained real strength by the reparation of our navy; we have shown Europe that ten years of war have not yet exhausted us; and we have enforced our settlement on an island on which twenty years ago we durst not venture to look.

These are the gratifications only of honest minds; but there is a time in which hope comes to all. From the present happiness of the public, the patriots themselves may derive advantage. To be harmless, though by impotence, obtains some degree of kindness: no man hates a worm as he hates a viper; they were once dreaded enough to be detested, as serpents that could bite; they have now shown that they can only hiss, and may therefore quietly sink into holes, and change their slough unmolested and forgotten.

## THE PATRIOT:

ADDRESSED TO THE ELECTORS OF GREAT BRITAIN, 1774.

They bawl for freedom in their senseless mood,  
Yet still revolt when truth should set them free;  
License they mean, when they cry liberty,  
For who loves that must first be wise and good.

MILTON.

To improve the golden moment of opportunity,

and catch the good that is within our reach, is the great art of life. Many wants are suffered, which might once have been supplied; and much time is lost in regretting the time which had been lost before.

At the end of every seven years comes the Saturnalian season, when the freemen of Great Britain may please themselves with the choice of their representatives. This happy day has now arrived, somewhat sooner than it could be claimed.

To select and depute those by whom laws are to be made, and taxes to be granted, is a high dignity, and an important trust: and it is the business of every elector to consider how this dignity may be well sustained, and this trust faithfully discharged.

It ought to be deeply impressed on the minds of all who have voices in this national deliberation, that no man can deserve a seat in parliament who is not a patriot. No other man will protect our rights, no other man can merit our confidence.

A PATRIOT is he whose public conduct is regulated by one single motive, the love of his country; who, as an agent in parliament, has for himself neither hope nor fear, neither kindness nor resentment, but refers every thing to the common interest.

That of five hundred men, such as this degenerate age affords, a majority can be found thus virtuously abstracted, who will affirm? Yet there is no good in despondence: vigilance and activity often effect more than was expected. Let us take a Patriot where we can meet him; and that we may not flatter ourselves by false appearances, distinguish those marks which are certain from those which may deceive: for a man may have the external appearance of a Patriot, without the constituent qualities; as false coins have often lustre, though they want weight.

Some claim a place in the list of Patriots by an acrimonious and unremitting opposition to the court.

This mark is by no means infallible. Patriotism is not necessarily included in rebellion. A man may hate his king, yet not love his country. He that has been refused a reasonable or unreasonable request, who thinks his merit underrated, and sees his influence declining, begins soon to talk of natural equality, the absurdity of *many made for one*, the original compact, the foundation of authority, and the majesty of the people. As his political melancholy increases, he tells, and perhaps dreams, of the advances of the prerogative, and the dangers of arbitrary power; yet his design in all his declamation is not to benefit his country, but to gratify his malice.

These, how ever, are the most honest of the opponents of government; their patriotism is a

species of disease; and they feel some part of what they express. But the greater, far the greater, number of those who rave and rail, and inquire and accuse, neither respect, nor fear, nor care for the public; but hope to force their way to riches by virulence and invective, and are vehement and clamorous, only that they may be sooner hired to be silent.

A man sometimes starts up a Patriot only by disseminating discontent, and propagating reports of secret influence, of dangerous counsels, of violated rights, and encroaching usurpation.

This practice is no certain note of patriotism. To instigate the populace with rage beyond the provocation, is to suspend public happiness, if not to destroy it. He is no lover of his country, that unnecessarily disturbs its peace. Few errors, and few faults of government, can justify an appeal to the rabble; who ought not to judge of what they cannot understand, and whose opinions are not propagated by reason, but caught by contagion.

The fallaciousness of this note of patriotism is particularly apparent when the clamour continues after the evil is past. They who are still filling our ears with Mr. Wilkes and the Freeholders of Middlesex, lament a grievance that is now at an end. Mr. Wilkes may be chosen, if any will choose him, and the precedent of his exclusion makes not any honest, or any decent, man think himself in danger.

It may be doubted whether the name of a Patriot can be fairly given as the reward of secret satire, or open outrage. To fill the newspapers with sly hints of corruption and intrigue, to circulate the Middlesex Journal, and London Paquet, may, indeed, be zeal; but it may likewise be interest and malice. To offer a petition, not expected to be granted; to insult a king with a rude remonstrance, only because there is no punishment for legal insolence, is not courage, for there is no danger; nor patriotism, for it tends to the subversion of order, and lets wickedness loose upon the land, by destroying the reverence due to sovereign authority.

It is the quality of patriotism to be jealous and watchful, to observe all secret machinations, and to see public dangers at a distance. The true lover of his country is ready to communicate his fears, and to sound the alarm, whenever he perceives the approach of mischief. But he sounds no alarm, when there is no enemy: he never terrifies his countrymen till he is terrified himself. The patriotism therefore may be justly doubted of him, who professes to be disturbed by incredibilities; who tells, that the last peace was obtained by bribing the Princess of Wales; that the king is grasping at arbitrary power; and that because the French in the new conquests enjoy their own laws, there is a design at court of abolishing in England the trial by juries.

Still less does the true Patriot circulate opinions which he knows to be false. No man, who loves his country, fills the nation with clamorous complaints, that the protestant religion is in danger, because *popery is established in the extensive province of Quebec*—a falsehood so open and shameless, that it can need no confutation among those who know that of which it is almost impossible for the most unenlightened zealot to be ignorant,

That Quebec is on the other side of the Atlantic, at too great a distance to do much good or harm to the European world :

That the inhabitants, being French, were always papists, who are certainly more dangerous as enemies, than as subjects :

That though the province be wide, the people are few, probably not so many as may be found in one of the larger English counties :

That persecution is not more virtuous in a protestant than a papist ; and that while we blame Lewis the Fourteenth for his dragoons and his galleys, we ought, when power comes into our hands, to use it with greater equity :

That when Canada with its inhabitants was yielded, the free enjoyment of their religion was stipulated ; a condition, of which king William, who was no propagator of popery, gave an example nearer home, at the surrender of Limerick :

That in an age, where every mouth is open for *liberty of conscience*, it is equitable to show some regard to the conscience of a papist, who may be supposed, like other men, to think himself safest in his own religion ; and that those, at least, who enjoy a toleration, ought not to deny it to our new subjects.

If liberty of conscience be a natural right, we have no power to withhold it ; if it be an indulgence, it may be allowed to papists, while it is not denied to other sects.

A Patriot is necessarily and invariably a lover of the people. But even this mark may sometimes deceive us.

The people is a very heterogeneous and confused mass of the wealthy and the poor, the wise and the foolish, the good and the bad. Before we confer on a man, who caresses the people, the title of Patriot, we must examine to what part of the people he directs his notice. It is proverbially said, that he who dissembles his own character, may be known by that of his companions. If the candidate of patriotism endeavours to infuse right opinions into the higher ranks, and by their influence to regulate the lower ; if he consorts chiefly with the wise, the temperate, the regular, and the virtuous, his love of the people may be rational and honest. But if his first or principal application be to the indigent, who are always inflammable ; to the weak, who are naturally suspicious ; to the ignorant, who are easily misled ; and to the pro-

fligate, who have no hope but from mischief and confusion ; let his love of the people be no longer boasted. No man can reasonably be thought a lover of his country, for roasting an ox, or burning a boot, or attending the meeting at Mile End, or registering his name in the Lumber Troop. He may, among the drunkards, be a hearty fellow, and among sober handicraftsmen, a free-spoken gentleman ; but he must have some better distinction before he is a Patriot.

A Patriot is always ready to countenance the just claims, and animate the reasonable hopes, of the people ; he reminds them frequently of their rights, and stimulates them to resent encroachments, and to multiply securities.

But all this may be done in appearance, without real patriotism. He that raises false hopes to serve a present purpose, only makes a way for disappointment and discontent. He who promises to endeavour, what he knows his endeavours unable to effect, means only to delude his followers by an empty clamour of ineffectual zeal.

A true Patriot is no lavish promiser : he undertakes not to shorten parliaments ; to repeal laws ; or to change the mode of representation, transmitted by our ancestors : he knows that futurity is not in his power, and that all times are not alike favourable to change.

Much less does he make a vague and indefinite promise of obeying the mandates of his constituents. He knows the prejudices of faction, and the inconstancy of the multitude. He would first inquire, how the opinion of his constituents shall be taken. Popular instructions are commonly the work, not of the wise and steady, but the violent and rash ; meetings held for directing representatives are seldom attended but by the idle and the dissolute ; and he is not without suspicion, that of his constituents, as of other numbers of men, the smaller part may often be the wiser.

He considers himself as deputed to promote the public good, and to preserve his constituents, with the rest of his countrymen, not only from being hurt by others, but from hurting themselves.

The common marks of patriotism having been examined, and shown to be such as artifice may counterfeit, or folly misapply, it cannot be improper to consider, whether there are not some characteristic modes of speaking or acting, which may prove a man to be *not a patriot*.

In this inquiry, perhaps, clearer evidence may be discovered, and firmer persuasion attained ; for it is commonly easier to know what is wrong than what is right ; to find what we should avoid, than what we should pursue.

As war is one of the heaviest of national

evils, a calamity in which every species of misery is involved; as it sets the general safety to hazard, suspends commerce, and desolates the country; as it exposes great numbers to hardships, dangers, captivity, and death; no man, who desires the public prosperity, will inflame general resentment by aggravating minute injuries, or enforcing disputable rights of little importance.

It may therefore be safely pronounced, that those men are no Patriots, who, when the national honour was vindicated in the sight of Europe, and the Spaniards having invaded what they call their own, had shrunk to a disavowal of their attempt, and a relaxation of their claim, would still have instigated us to a war for a bleak and barren spot in the Magellanic ocean, of which no use could be made, unless it were a place of exile for the hypocrites of patriotism.

Yet let it not be forgotten, that, by the howling violence of patriotic rage, the nation was for a time exasperated to such madness, that for a barren rock, under a stormy sky, we might have now been fighting and dying, had not our competitors been wiser than ourselves; and those who are now courting the favour of the people by noisy professions of public spirit, would, while they were counting the profits of their artifice, have enjoyed the patriotic pleasure of hearing sometimes, that thousands had been slaughtered in a battle, and sometimes that a navy had been dispeopled by poisoned air and corrupted food.

He that wishes to see his country robbed of its rights, cannot be a Patriot.

That man therefore is no Patriot, who justifies the ridiculous claims of American usurpation; who endeavours to deprive the nation of its natural and lawful authority over its own colonies; those colonies which were settled under English protection; were constituted by an English charter; and have been defended by English arms.

To suppose, that by sending out a colony, the nation established an independent power; that when, by indulgence and favour, emigrants are become rich, they shall not contribute to their own defence, but at their own pleasure; and that they shall not be included, like millions of their fellow-subjects, in the general system of representation; involves such an accumulation of absurdity, as nothing but the show of patriotism could palliate.

He that accepts protection, stipulates obedience. We have always protected the Americans; we may therefore subject them to government.

The less is included in the greater. That power which can take away life, may seize upon property. The parliament may enact for America a law of capital punishment; it may

therefore establish a mode and proportion of taxation.

But there are some who lament the state of the poor Bostonians, because they cannot all be supposed to have committed acts of rebellion, yet all are involved in the penalty imposed. This, they say, is to violate the first rule of justice, by condemning the innocent to suffer with the guilty.

This deserves some notice, as it seems dictated by equity and humanity, however it may raise contempt by the ignorance which it betrays of the state of man, and the system of things. That the innocent should be confounded with the guilty, is undoubtedly an evil; but it is an evil which no care or caution can prevent. National crimes require national punishments, of which many must necessarily have their part, who have not incurred them by personal guilt. If rebels should fortify a town, the cannon of lawful authority will endanger equally the harmless burghers and the criminal garrison.

In some cases, those suffer most who are least intended to be hurt. If the French, in the late war, had taken an English city, and permitted the natives to keep their dwellings, how could it have been recovered, but by the slaughter of our friends? A bomb might as well destroy an Englishman as a Frenchman; and by famine we know that the inhabitants would be the first that should perish.

This infliction of promiscuous evil may therefore be lamented, but cannot be blamed. The power of lawful government must be maintained; and the miseries which rebellion produces can be charged only on the rebels.

That man, likewise, is not a Patriot, who denies his governors their due praise, and who conceals from the people the benefits which they receive. Those, therefore, can lay no claim to this illustrious appellation, who impute want of public spirit to the late parliament; an assembly of men, whom, notwithstanding some fluctuation of counsel, and some weakness of agency, the nation must always remember with gratitude, since it is indebted to them for a very ample concession in the resignation of protections, and a wise and honest attempt to improve the constitution, in the new judicature instituted for the trial of elections.

The right of protection, which might be necessary when it was first claimed, and was very consistent with that liberality of immunities in which the feudal constitution delighted, was, by its nature, liable to abuse, and had in reality been sometimes misapplied, to the evasion of the law, and the defeat of justice. The evil was perhaps not adequate to the clamour; nor is it very certain, that the possible good of this privilege was not more than equal to the possible evil. It is, however, plain, that whether they

save any thing or not to the public, they at least lost something from themselves. They divested their dignity of a very splendid distinction, and showed that they were more willing than their predecessors to stand on a level with their fellow-subjects.

The new mode of trying elections, if it be found effectual, will diffuse its consequences further than seems yet to be foreseen. It is, I believe, generally considered as advantageous only to those who claim seats in parliament; but, if to choose representatives be one of the most valuable rights of Englishmen, every voter must consider that law as adding to his happiness, which makes his suffrage efficacious; since it was vain to choose, while the election could be controlled by any other power.

With what imperious contempt of ancient rights, and what audaciousness of arbitrary authority, former parliaments have judged the disputes about elections, it is not necessary to relate. The claim of a candidate, and the right of electors, are said scarcely to have been, even in appearance, referred to conscience; but to have been decided by party, by pass-on, by prejudice, or by frolic. To have friends in the borough was of little use to him who wanted friends in the house; a pretence was easily found to evade a majority, and the seat was at last his, that was chosen not by his electors, but his fellow-senators.

Thus the nation was insulted with a mock election, and the parliament was filled with spurious representatives; one of the most important claims, that of right to sit in the supreme council of the kingdom, was debated in jest, and no man could be confident of success from the justice of his cause.

A disputed election is now tried with the same scrupulousness and solemnity as any other title. The candidate that has deserved well of his neighbours, may now be certain of enjoying the effect of their approbation; and the elector, who has voted honestly for known merit, may be certain that he has not voted in vain.

Such was the parliament, which some of those, who are now aspiring to sit in another, have taught the rabble to consider as an unlawful convention of men, worthless, venal, and prostitute, slaves of the court and tyrants of the people.

That the next House of Commons may act upon the principles of the last, with more constancy and higher spirit, must be the wish of all who wish well to the public; and it is surely not too much to expect that the nation will recover from its delusion, and unite in a general abhorrence of those who, by deceiving the credulous with fictitious mischiefs, overbearing the weak by audacity of falsehood, by appealing to the judgment of ignorance, and flattering the vanity of meanness, by slandering honesty and

insulting dignity, have gathered round them whatever the kingdom can supply of base, and gross, and profligate; and, *raised by merit to this bad eminence*, arrogate to themselves the name of PATRIOTS.

## TAXATION NO TYRANNY;

AN ANSWER TO THE RESOLUTIONS AND ADDRESS OF THE AMERICAN CONGRESS, 1775.

IN all the parts of human knowledge, whether terminating in science merely speculative, or operating upon life private or civil, are admitted some fundamental principles, or common axioms, which being generally received are little doubted, and being little doubted have been rarely proved.

Of these gratuitous and acknowledged truths it is often the fate to become less evident by endeavours to explain them, however necessary such endeavours may be made by the misapprehensions of absurdity, or the sophistries of interest. It is difficult to prove the principles of science; because notions cannot always be found more intelligible than those which are questioned. It is difficult to prove the principles of practice, because they have for the most part not been discovered by investigation, but obtruded by experience; and the demonstrator will find, after an operose deduction, that he has been trying to make that seen which can be only felt.

Of this kind is the position, that "the supreme power of every community has the right of requiring from all its subjects, such contributions as are necessary to the public safety or public prosperity," which was considered by all mankind as comprising the primary and essential condition of all political society, till it became disputed by those zealots of anarchy, who have denied to the parliament of Britain the right of taxing the American Colonies.

In favour of this exemption of the Americans from the authority of their lawful sovereign, and the dominion of their mother-country, very loud clamours have been raised, and many wild assertions advanced, which by such as borrow their opinions from the reigning fashion have been admitted as arguments; and, what is strange, though their tendency is to lessen English honour, and English power, have been heard by Englishmen with a wish to find them true. Passion has in its first violence controlled interest, as the eddy for a while runs against the stream.

To be prejudiced is always to be weak; yet there are prejudices so near to laudable, that they have been often praised, and are always pardoned. To love their country has been considered as virtue in men, whose love could not be otherwise than blind, because their prefer-

ence was made without a comparison; but it has never been my fortune to find, either in ancient or modern writers, any honourable mention of those, who have with equal blindness hated their country.

These antipatriotic prejudices are the abortions of folly impregnated by faction, which being produced against the standing order of nature, have not strength sufficient for long life. They are born only to scream and perish, and leave those to contempt or detestation, whose kindness was employed to nurse them into mischief.

To perplex the opinion of the public, many artifices have been used, which, as usually happens when falsehood is to be maintained by fraud, lose their force by counteracting one another.

The nation is sometimes to be mollified by a tender tale of men, who fled from tyranny to rocks and deserts, and is persuaded to lose all claims of justice, and all sense of dignity, in compassion for a harmless people, who having worked hard for bread in a wild country, and obtained by the slow progression of manual industry the accommodations of life, are now invaded by unprecedented oppression, and plundered of their properties by the harpies of taxation.

We are told how their industry is obstructed by unnatural restraints, and their trade confined by rigorous prohibitions; how they are forbidden to enjoy the products of their own soil, to manufacture the materials which nature spreads before them, or to carry their own goods to the nearest market: and surely the generosity of English virtue will never heap new weight upon those that are already overlaid; will never delight in that dominion, which cannot be exercised but by cruelty and outrage.

But while we are melting in silent sorrow, and in the transports of delirious pity dropping both the sword and balance from our hands, another friend of the Americans thinks it better to awaken another passion, and tries to alarm our interest, or excite our veneration, by accounts of their greatness and their opulence, of the fertility of their land, and the splendour of their towns. We then begin to consider the question with more evenness of mind, are ready to conclude that those restrictions are not very oppressive which have been found consistent with this speedy growth of prosperity; and begin to think it reasonable that they, who thus flourish under the protection of our government, should contribute something towards its expense.

But we are soon told that the Americans, however wealthy, cannot be taxed; that they are the descendants of men who left all for liberty, and that they have constantly preserved the principles and stubbornness of their pro-

genitors; that they are too obstinate for persuasion, and too powerful for constraint; that they will laugh at argument, and defeat violence; that the continent of North America contains three millions, not of men merely, but of Whigs, of Whigs fierce for liberty, and disdainful of dominion; that they multiply with the fecundity of their own rattlesnakes, so that every quarter of a century doubles their numbers.

Men accustomed to think themselves masters, do not love to be threatened. This talk is, I hope, commonly thrown away, or raises passions different from those which it was intended to excite. Instead of terrifying the English hearer to tame acquiescence, it disposes him to hasten the experiment of bending obstinacy before it is become yet more obdurate, and convinces him that it is necessary to attack a nation thus prolific while we may yet hope to prevail. When he is told through what extent of territory we must travel to subdue them, he recollects how far, a few years ago, we travelled in their defence. When it is urged that they will shoot up like the hydra, he naturally considers how the hydra was destroyed.

Nothing dejects a trader like the interruption of his profits. A commercial people, however magnanimous, shrinks at the thought of declining traffic, and an unfavourable balance. The effect of this terror has been tried. We have been stunned with the importance of our American commerce, and heard of merchants with warehouses that are never to be emptied, and of manufacturers starving for want of work.

That our commerce with America is profitable, however less than ostentations or deceitful estimates have made it, and that it is our interest to preserve it, has never been denied; but surely it will most effectually be preserved, by being kept always in our own power. Concessions may promote it for a moment, but superiority only can ensure its continuance. There will always be a part, and always a very large part, of every community that have no care but for themselves, and whose care for themselves reaches little farther than impatience of immediate pain, and eagerness for the nearest good. The blind are said to feel with peculiar nicety. They who look but little into futurity, have perhaps the quickest sensation of the present. A merchant's desire is not of glory, but of gain; not of public wealth, but of private emolument; he is therefore rarely to be consulted about war and peace, or any designs of wide extent and distant consequence.

Yet this, like other general characters, will sometimes fail. The traders of Birmingham have rescued themselves from all imputation of narrow selfishness by a manly recommendation to parliament of the rights and dignity of their native country.

To these men I do not intend to ascribe an

absurd and enthusiastic contempt of interest, but to give them the rational and just praise of distinguishing real from seeming good, of being able to see through the cloud of interposing difficulties, to the lasting and solid happiness of victory and settlement.

Lest all these topics of persuasion should fail, the greater actor of patriotism has tried another, in which terror and pity are happily combined, not without a proper superaddition of that admiration which latter ages have brought into the drama. The heroes of Boston, he tells us, if the stamp act had not been repealed, would have left their town, their port, and their trade, have resigned the splendour of opulence, and quitted the delights of neighbourhood, to disperse themselves over the country, where they would till the ground, and fish in the rivers, and range the mountains, AND BE FREE.

These surely are brave words. If the mere sound of freedom can operate thus powerfully, let no man hereafter doubt the story of the Pied Piper. *The removal of the people of Boston into the country*, seems even to the Congress not only difficult in its execution, but important in its consequences. The difficulty of execution is best known to the Bostonians themselves; the consequence, alas! will only be, that they will leave good houses to wiser men.

Yet before they quit the comforts of a warm home for the sounding something which they think better, he cannot be thought their enemy who advises them to consider well whether they shall find it. By turning fishermen or hunters, woodmen or shepherds, they may become wild, but it is not so easy to conceive them free; for who can be more a slave than he that is driven by force from the comforts of life, is compelled to leave his house to a casual comer, and whatever he does, or wherever he wanders, finds every moment some new testimony of his own subjection? If choice of evil be freedom, the felon in the galleys has his option of labour or of stripes. The Bostonian may quit his house to starve in the fields; his dog may refuse to set, and smart under the lash, and they may then congratulate each other upon the smiles of liberty, *profuse of bliss and pregnant with delight*.

To treat such designs as serious, would be to think too contemptuously of Bostonian understandings. The artifice indeed is not new; the blusterer who threatened in vain to destroy his opponent, has sometimes obtained his end, by making it believed that he would hang himself.

But terrors and pity are not the only means by which the taxation of the Americans is opposed. There are those who profess to use them only as auxiliaries to reason and justice, who tell us, that to tax the colonies is usurpation and oppression, an invasion of natural and legal rights, and a violation of those principles

which support the constitution of English government.

This question is of great importance. That the Americans are able to bear taxation, is indubitable; that their refusal may be overruled, is highly probable; but power is no sufficient evidence of truth. Let us examine our own claim, and the objections of the recusants, with caution proportioned to the event of the decision, which must convict one part of robbery, or the other of rebellion.

A tax is a payment exacted by authority from part of the community for the benefit of the whole. From whom, and in what proportion, such payment shall be required, and to what uses it shall be applied, those only are to judge to whom government is intrusted. In the British dominions taxes are apportioned, levied, and appropriated by the states assembled in parliament.

Of every empire all the subordinate communities are liable to taxation, because they all share the benefits of government, and therefore ought all to furnish their proportion of the expense.

This the Americans have never openly denied. That it is their duty to pay the costs of their own safety, they seem to admit; nor do they refuse their contribution to the exigences, whatever they may be, of the British empire; but they make this participation of the public burden a duty of very uncertain extent, and imperfect obligation, a duty temporary, occasional, and elective, of which they reserve to themselves the right of settling the degree, the time, and the duration, of judging when it may be required, and when it has been performed.

They allow to the supreme power nothing more than the liberty of notifying to them its demands or its necessities. Of this notification they profess to think for themselves, how far it shall influence their counsels, and of the necessities alleged, how far they shall endeavour to relieve them. They assume the exclusive power of settling not only the mode but the quantity of this payment. They are ready to co-operate with all the other dominions of the king; but they will co-operate by no means which they do not like, and at no greater charge than they are willing to bear.

This claim, wild as it may seem, this claim, which supposes dominion without authority, and subjects without subordination, has found among the libertines of policy many clamorous and hardy vindicators. The laws of nature, the rights of humanity, the faith of charters, the danger of liberty, the encroachments of usurpation, have been thundered in our ears, sometimes by interested faction, and sometimes by honest stupidity.

It is said by Fontenelle, that if twenty philosophers should resolutely deny that the presence

of the sun makes the day, he will not despair but whole nations may adopt the opinion. So many political dogmatists have denied to the Mother-country the power of taxing the Colonies, and have enforced their denial with so much violence of outcry, that their sect is already very numerous, and the public voice suspends its decision.

In moral and political questions the contest between interest and justice has been often tedious and often fierce, but perhaps it never happened before, that justice found much opposition with interest on her side.

For the satisfaction of this inquiry, it is necessary to consider how a Colony is constituted, what are the terms of migration as dictated by nature, or settled by compact, and what social or political rights the man loses, or acquires, that leaves his country to establish himself in a distant plantation.

Of two modes of migration the history of mankind informs us, and so far as I can yet discover, of two only.

In countries where life was yet unadjusted, and policy unformed, it sometimes happened that by the dissensions of heads of families, by the ambition of daring adventurers, by some accidental pressure of distress, or by the mere discontent of idleness, one part of the community broke off from the rest, and numbers, greater or smaller, forsook their habitations, put themselves under the command of some favourite of fortune, and with or without the consent of their countrymen or governors, went out to see what better regions they could occupy, and in what place, by conquest or by treaty, they could gain a habitation.

Sons of enterprise like these, who committed to their own swords their hopes and their lives, when they left their country, became another nation, with designs, and prospects, and interests of their own. They looked back no more to their former home; they expected no help from those whom they had left behind; if they conquered, they conquered for themselves; if they were destroyed, they were not by any other power either lamented or revenged.

Of this kind seem to have been all the migrations of the early world, whether historical or fabulous, and of this kind were the eruptions of those nations which from the North invaded the Roman empire, and filled Europe with new sovereignties.

But when by the gradual admission of wiser laws and gentler manners, society became more compacted and better regulated, it was found that the power of every people consisted in union, produced by one common interest, and operating in joint efforts and consistent counsels.

From this time independence perceptibly wasted away. No part of the nation was permitted to act for itself. All now had the same

enemies and the same friends; the government protected individuals, and individuals were required to refer their designs to the prosperity of the government.

By this principle it is, that states are formed and consolidated. Every man is taught to consider his own happiness as combined with the public prosperity, and to think himself great and powerful, in proportion to the greatness and power of his governors.

Had the western continent been discovered between the fourth and tenth century, when all the northern world was in motion; and had navigation been at that time sufficiently advanced to make so long a passage easily practicable, there is little reason for doubting but the intumescence of nations would have found its vent, like all other expansive violence, where there was least resistance; and that Huns and Vandals, instead of fighting their way to the south of Europe, would have gone by thousands and by myriads under their several chiefs to take possession of regions smiling with pleasure and waving with fertility, from which the naked inhabitants were unable to repel them.

Every expedition would in those days of laxity have produced a distinct and independent state. The Scandinavian heroes might have divided the country among them, and have spread the feudal subdivision of regality from Hudson's Bay to the Pacific Ocean.

But Columbus came five or six hundred years too late for the candidates of sovereignty. When he formed his project of discovery, the fluctuations of military turbulence had subsided, and Europe began to regain a settled form, by established government and regular subordination. No man could any longer erect himself into a chieftain, and lead out his fellow-subjects by his own authority to plunder or to war. He that committed any act of hostility by land or sea, without the commission of some acknowledged sovereign, was considered by all mankind as a robber or pirate, names which were now of little credit, and of which therefore no man was ambitious.

Columbus in a remoter time would have found his way to some discontented Lord, or some younger brother of a petty sovereign, who would have taken fire at his proposal, and have quickly kindled with equal heat a troop of followers; they would have built ships, or have seized them, and have wandered with him at all adventures as far as they could keep hope in their company. But the age being now past of vagrant excursion and fortuitous hostility, he was under the necessity of travelling from court to court, scorned and repulsed as a wild projector, an idle promiser of kingdoms in the clouds; nor has any part of the world yet had reason to rejoice that he found at last reception and employment.

In the same year, in a year hitherto disastrous

to mankind, by the Portuguese was discovered the passage of the Indies, and by the Spaniards the coast of America. The nations of Europe were fired with boundless expectations, and the discoverers pursuing their enterprise, made conquests in both hemispheres of wide extent. But the adventurers were not contented with plunder: though they took gold and silver to themselves, they seized islands and kingdoms in the name of their sovereigns. When a new region was gained, a governor was appointed by that power which had given the commission to the conqueror; nor have I met with any European but Stukeley of London that formed a design of exalting himself in the newly found countries to independent dominion.

To secure a conquest, it was always necessary to plant a colony, and territories thus occupied and settled were rightly considered as mere extensions, or processes of empire; as ramifications which, by the circulation of one public interest, communicated with the original source of dominion, and which were kept flourishing and spreading by the radical vigour of the Mother-country.

The colonies of England differ no otherwise from those of other nations, than as the English constitution differs from theirs. All government is ultimately and essentially absolute, but subordinate societies may have more immunities, or individuals greater liberty, as the operations of government are differently conducted. An Englishman in the common course of life and action feels no restraint. An English colony has very liberal powers of regulating its own manners and adjusting its own affairs. But an English individual may by the supreme authority be deprived of liberty, and a colony divested of its powers for reasons of which that authority is the only judge.

In sovereignty there are no gradations. There may be limited royalty, there may be limited consularship; but there can be no limited government. There must in every society be some power or other from which there is no appeal, which admits no restrictions, which pervades the whole mass of the community, regulates and adjusts all subordination, enacts laws or repeals them, erects or annuls judicatures, extends or contracts privileges, exempt itself from question or control, and bounded only by physical necessity.

By this power, wherever it subsists, all legislation and jurisdiction is animated and maintained. From this all legal rights are emanations, which, whether equitably or not, may be legally recalled. It is not infallible, for it may do wrong; but it is irresistible, for it can be resisted only by rebellion, by an act which makes it questionable what shall be thenceforward the supreme power.

An English colony is a number of persons, to

whom the king grants a charter, permitting them to settle in some distant country, and enabling them to constitute a corporation, enjoying such powers as the charter grants, to be administered in such forms as the charter prescribes. As a corporation, they make laws for themselves; but as a corporation subsisting by a grant from higher authority, to the control of that authority they continue subject.

As men are placed at a greater distance from the supreme council of the kingdom, they must be intrusted with ampler liberty of regulating their conduct by their own wisdom. As they are more secluded from easy recourse to national judicature, they must be more extensively commissioned to pass judgment on each other.

For this reason our more important and opulent colonies see the appearance and feel the effect of a regular legislature, which in some places has acted so long with unquestioned authority, that it has forgotten whence that authority was originally derived.

To their charters the colonies owe, like other corporations, their political existence. The solemnities of legislation, the administration of justice, the security of property, are all bestowed upon them by the royal grant. Without their charter there would be no power among them, by which any law could be made, or duties enjoined, any debt recovered, or criminal punished.

A charter is a grant of certain powers or privileges given to a part of the community for the advantage of the whole, and is therefore liable by its nature to change or to revocation. Every act of government aims at public good. A charter, which experience has shown to be detrimental to the nation is to be repealed; because general prosperity must always be preferred to particular interest. If a charter be used to evil purposes, it is forfeited, as the weapon is taken away which is injuriously employed.

The charter therefore by which provincial governments are constituted, may be always legally, and where it is either inconvenient in its nature or misapplied in its use, may be equitably repealed; by such repeal the whole fabric of subordination is immediately destroyed, and the constitution sunk at once into a chaos: the society is dissolved into a tumult of individuals, without authority to command, or obligation to obey; without any punishment of wrongs but by personal resentment, or any protection of right but by the hand of the possessor.

A colony is to the Mother-country as a member to the body, deriving its action and its strength from the general principle of vitality; receiving from the body, and communicating to it all the benefits and evils of health and disease; liable in dangerous maladies to sharp ap-

plications, of which the body however must partake the pain; and exposed, if incurably tainted, to amputation, by which the body likewise will be mutilated.

The Mother-country always considers the colonies thus connected, as parts of itself; the prosperity or unhappiness of either, is the prosperity or unhappiness of both: not perhaps of both in the same degree, for the body may subsist, though less commodiously, without a limb, but the limb must perish if it be parted from the body.

Our colonies therefore, however distant, have been hitherto treated as constituent parts of the British empire. The inhabitants incorporated by English charters, are entitled to all the rights of Englishmen. They are governed by English laws, entitled to English dignities, regulated by English counsels, and protected by English arms; and it seems to follow by consequence not easily avoided, that they are subject to English government, and chargeable by English taxation.

To him that considers the nature, the original, the progress, and the constitution of the colonies, who remembers that the first discoverers had commissions from the crown, that the first settlers owe to a charter their civil forms and regular magistracy, and that all personal immunities and legal securities, by which the condition of the subject has been from time to time improved, have been extended to the colonists, it will not be doubted but the parliament of England has a right to bind them by statutes, and to *bind them on all cases whatsoever*, and has therefore a natural and constitutional power of laying upon them any tax or impost, whether external or internal, upon the product of land, or the manufactures of industry, in the exigencies of war, or in the time of profound peace, for the defence of America, *for the purpose of raising a revenue*, or for any other end beneficial to the empire.

There are some, and those not inconsiderable for number, nor contemptible for knowledge, who except the power of taxation from the general dominion of parliament, and hold, that whatever degrees of obedience may be exacted, or whatever authority may be exercised in other acts of government, there is still reverence to be paid to money, and that legislation passes its limits when it violates the purse.

Of this exception, which, by a head not fully impregnated with politics, is not easily comprehended, it is alleged as an unanswerable reason, that the colonies send no representatives to the House of Commons.

It is, say the American advocates, the natural distinction of a freeman, and the legal privilege of an Englishman, that he is able to call his possessions his own, that he can sit secure in the enjoyment of inheritance or acquisition, that his

house is fortified by the law, and that nothing can be taken from him but by his own consent. This consent is given for every man by his representative in parliament. The Americans unrepresented, cannot consent to English taxation as a corporation, and they will not consent as individuals.

Of this argument, it has been observed by more than one, that its force extends equally to all other laws, for a freeman is not to be exposed to punishment, or be called to any onerous service, but by his own consent. The Congress has extracted a position from the fanciful Montesquieu, that "in a free state every man being a free agent, ought to be concerned in his own government." Whatever is true of taxation, is true of every other law, that he who is bound by it, without his consent, is not free, for he is not concerned in his own government.

He that denies the English parliament the right of taxation, denies it likewise the right of making any other laws civil or criminal, yet this power over the colonies was never yet disputed by themselves. They have always admitted statutes for the punishment of offences, and for the redress or prevention of inconveniences; and the reception of any law draws after it, by a chain which cannot be broken, the unwelcome necessity of submitting to taxation.

That a freeman is governed by himself, or by laws to which he has consented, is a position of mighty sound; but every man that utters it, with whatever confidence, and every man that hears it, with whatever acquiescence, if consent be supposed to imply the power of refusal, feels it to be false. We virtually and implicitly allow the institutions of any government of which we enjoy the benefit, and solicit the protection. In wide-extended dominions, though power has been diffused with the most even hand, yet a very small part of the people are either primarily or secondarily consulted in legislation. The business of the public must be done by delegation. The choice of delegates is made by a select number, and those who are not electors stand idle and helpless spectators of the commonweal, *wholly unconcerned in the government of themselves*.

Of the electors, the hap is but little better. They are often far from unanimity in their choice, and where the numbers approach to equality, almost half must be governed not only without, but against their choice.

How any man can have consented to institutions established in distant ages, it will be difficult to explain. In the most favourite residence of liberty, the consent of individuals is merely passive, a tacit admission, in every community, of the terms which that community grants and requires. As all are born the subjects of some state or other, we may be said to have been all born consenting to some system

of government. Other consent than this, the condition of civil life does not allow. It is the unmeaning clamour of the pedants of policy, the delicious dream of republican fanaticism.

But hear, ye sons and daughters of liberty, the sounds which the winds are wafting from the Western Continent. The Americans are telling one another, what, if we may judge from their noisy triumph, they have but lately discovered, and what yet is a very important truth, "That they are entitled to life, liberty, and property, and that they have never ceded to any sovereign power whatever a right to dispose of either without their consent."

While this resolution stands alone, the Americans are free from singularity of opinion; their wit has not yet betrayed them to heresy. While they speak as the naked sons of nature, they claim but what is claimed by other men, and have withheld nothing but what all withhold. They are here upon firm ground, behind encroachments which never can be forced.

Humanity is very uniform. The Americans have this resemblance to Europeans, that they do not always know when they are well. They soon quit the fortress that could neither have been mined by sophistry, nor battered by declamation. Their next resolution declares, that "Their ancestors, who first settled the colonies, were, at the time of their emigration from the Mother-country, entitled to all the rights, liberties, and immunities of free and natural-born subjects within the realm of England."

This likewise is true; but when this is granted, their boast of original rights is at an end; they are no longer in a state of nature. These Lords of themselves, these kings of *me*, these demi-gods of independence, sink down to colonists, governed by a charter. If their ancestors were subjects, they acknowledged a sovereign; if they had a right to English privileges, they were accountable to English laws, and what must grieve the lover of liberty to discover, had ceded to the king and parliament, whether the right or not, at least the power of disposing *without their consent, of their lives, liberties, and properties*. It therefore is required of them to prove, that the parliament never ceded to them a dispensation from that obedience, which they owe as natural-born subjects, or any degree of independence or immunity not enjoyed by other Englishmen.

They say, That by such emigration they by no means forfeited, surrendered, or lost any of those rights; but that *they were, and their descendants now are, entitled to the exercise and enjoyment of all such of them as their local and other circumstances enable them to exercise and enjoy*.

That they who form a settlement by a lawful charter, having committed no crime, forfeit no privileges, will be readily confessed: but what

they do not forfeit by any judicial sentence, they may lose by natural effects. As man can be but in one place at once, he cannot have the advantages of multiplied residence. He that will enjoy the brightness of sunshine, must quit the coolness of the shade. He who goes voluntarily to America, cannot complain of losing what he leaves in Europe. He perhaps had a right to vote for a knight or burgess; by crossing the Atlantic, he has not nullified his right; but he has made its exertion no longer possible.\* By his own choice he has left a country where he had a vote and little property, for another where he has great property, but no vote. But as this preference was deliberate and unconstrained, he is still *concerned in the government of himself*; he has reduced himself from a voter to one of the innumerable multitude that have no vote. He has truly *ceded his right*, but he still is governed by his own consent; because he has consented to throw his atom of interest into the general mass of the community. Of the consequences of his own act he has no cause to complain; he has chosen, or intended to choose, the greater good; he is represented, as himself desired, in the general representation.

But the privileges of an American scorn the limits of place; they are part of himself, and cannot be lost by departure from his country; they float in the air, or glide under the ocean.

*Doris amara suam non intermisceat undam.*

A planter, wherever he settles, is not only a freeman, but a legislator, *ubi imperator, ibi Roma*. "As the English colonists are not represented in the British parliament, they are entitled to a free and exclusive power of legislation in their several legislatures, in all cases of taxation and internal polity, subject only to the negative of the sovereign, in such manner as has been heretofore used and accustomed. We cheerfully consent to the operation of such acts of the British parliament as are *bona fide* restrained to the regulation of our external commerce—excluding every idea of taxation, internal or external, for raising a revenue on the subjects of America without their consent."

Their reason for this claim is, "That the foundation of English liberty, and of all government, is a right in the people to participate in their legislative council."

"They inherit," they say, "from their ancestors, the right which their ancestors possessed, of enjoying all the privileges of Englishmen." That they inherit the right of their ancestors, is allowed; but they can inherit no more. Their ancestors left a country where the representatives of the people were elected by men par-

\* Of this consenting, I owe part to a conversation with Sir John Black.

ticularly qualified, and where those who wanted qualifications, or who did not use them, were bound by the decisions of men, whom they had not deputed.

The colonists are the descendants of men, who either had no vote in elections, or who voluntarily resigned them for something, in their opinion, of more estimation; they have therefore exactly what their ancestors left them, not a vote in making laws, or in constituting legislators, but the happiness of being protected by law, and the duty of obeying it.

What their ancestors did not carry with them, neither they nor their descendants have since acquired. They have not by abandoning their part in one legislature, obtained the power of constituting another, exclusive and independent, any more than the multitudes, who are now debarred from voting, have a right to erect a separate parliament for themselves.

Men are wrong for want of sense, but they are wrong by halves for want of spirit. Since the Americans have discovered that they can make a parliament, whence comes it that they do not think themselves equally empowered to make a king? If they are subjects, whose government is constituted by a charter, they can form no body of independent legislature. If their rights are inherent and undervied, they may by their own suffrages encircle with a diadem the brows of Mr. Cushing.

It is farther declared by the Congress of Philadelphia, "That his Majesty's colonies are entitled to all the privileges and immunities granted and confirmed to them by royal charters, or secured to them by their several codes of provincial laws."

The first clause of this resolution is easily understood, and will be readily admitted. To all the privileges which a charter can convey, they are by a royal charter evidently entitled. The second clause is of greater difficulty: for how can a provincial law secure privileges or immunities to a province? Provincial laws may grant to certain individuals of the province the enjoyment of gainful, or an immunity from onerous, offices; they may operate upon the people to whom they relate; but no province can confer provincial privileges on itself. They may have a right to all which the king has given them; but it is a conceit of the other hemisphere, that men have a right to all which they have given to themselves.

A corporation is considered in law as an individual, and can no more extend its own immunities, than a man can by his own choice assume dignities or titles.

The legislature of a colony (let not the comparison be too much disdained) is only the vestry of a larger parish, which may lay a cess on the inhabitants, and enforce the payment; but can extend no influence beyond its own district,

must modify its particular regulations by the general law, and whatever may be its internal expenses, is still liable to taxes laid by superior authority.

The charters given to different provinces are different, and no general right can be extracted from them. The charter of Pennsylvania, where this congress of anarchy has been impudently held, contains a clause admitting in express terms taxation by the parliament. If in the other charters no such reserve is made, it must have been omitted as not necessary, because it is implied in the nature of subordinate government. They who are subject to laws, are liable to taxes. If any such immunity had been granted, it is still revocable by the legislature, and ought to be revoked, as contrary to the public good, which is in every charter ultimately intended.

Suppose it true that any such exemption is contained in the charter of Maryland, it can be pleaded only by the Marylanders. It is of no use for any other province; and, with regard even to them, must have been considered as one of the grants in which the king has been deceived, and annulled as mischievous to the public, by sacrificing to one little settlement the general interest of the empire; as infringing the system of dominion, and violating the compact of government. But Dr. Tucker has shown, that even this charter promises no exemption from parliamentary taxes.

In the controversy agitated about the beginning of this century, whether the English laws could bind Ireland, Davenant, who defended against Molyneux the claims of England, considered it as necessary to prove nothing more, than that the present Irish must be deemed a colony.

The necessary connection of representatives with taxes, seems to have sunk deep into many of those minds, that admit sounds without their meaning.

Our nation is represented in parliament by an assembly as numerous as can well consist with order and despatch, chosen by persons so differently qualified in different places, that the mode of choice seems to be, for the most part, formed by chance, and settled by custom. Of individuals, far the greater part have no vote, and of the voters, few have any personal knowledge of him to whom they intrust their liberty and fortune.

Yet this representation has the whole effect expected or desired; that of spreading so wide the care of general interest, and the participation of public counsels, that the advantage or corruption of particular men can seldom, operate with much injury to the public.

For this reason many populous and opulent towns neither enjoy nor desire particular representatives; they are included in the general

scheme of public administration, and cannot suffer but with the rest of the empire.

It is urged that the Americans have not the same security, and that a British legislator may wanton with their property; yet if it be true, that their wealth is our wealth, and that their ruin will be our ruin, the parliament has the same interest in attending to them, as to any other part of the nation. The reason why we place any confidence in our representatives is, that they must share in the good or evil which their counsels shall produce. Their share is, indeed, commonly consequential and remote; but it is not often possible that any immediate advantage can be extended to such numbers as may prevail against it. We are therefore as secure against intentional deprivations of government, as human wisdom can make us, and upon this security the Americans may venture to repose.

It is said by the Old Member who has written an Appeal against the tax, that "as the produce of American labour is spent in British manufactures, the balance of trade is greatly against them; whatever you take directly in taxes, is in effect taken from your own commerce. If the minister seizes the money with which the American should pay his debts and come to market, the merchant cannot expect him as a customer, nor can the debts already contracted be paid.—Suppose we obtain from America a million, instead of one hundred thousand pounds, it would be supplying one personal exigence by the future ruin of our commerce."

Part of this is true; but the Old Member seems not to perceive, that if his brethren of the legislature know this as well as himself, the Americans are in no danger of oppression, since by men commonly provident they must be so taxed, as that we may not lose one way what we gain another.

The same Old Member has discovered that the judges formerly thought it illegal to tax Ireland, and declares, that no cases can be more alike than those of Ireland and America; yet the judges whom he quotes have mentioned a difference. Ireland, they say, *hath a parliament of its own*. When any Colony has an independent parliament acknowledged by the parliament of Britain, the cases will differ less. Yet by the 6 Geo. I. chap. 5, the acts of the British parliament bind Ireland.

It is urged, that when Wales, Durham, and Chester, were divested of their particular privileges, or ancient government, and reduced to the state of English counties, they had representatives assigned them.

To those from whom something had been taken, something in return might properly be given. To the Americans their charters are left as they were, nor have they lost any thing except that of which their sedition has deprived them. If they were to be represented in par-

liament, something would be granted, though nothing is withdrawn.

The inhabitants of Chester, Durham, and Wales, were invited to exchange their peculiar institutions for the power of voting, which they wanted before. The Americans have voluntarily resigned the power of voting, to live in distant and separate governments, and what they have voluntarily quitted, they have no right to claim.

It must always be remembered, that they are represented by the same virtual representation as the greater part of Englishmen; and that if by change of place they have less share in the legislature than is proportionate to their opulence, they by their removal gained that opulence, and had originally, and have now, their choice of a vote at home, or riches at a distance.

We are told, what appears to the Old Member and to others a position that must drive us into inextricable absurdity, that we have either no right, or the sole right, of taxing the Colonies. The meaning is, that if we can tax them, they cannot tax themselves; and that if they can tax themselves, we cannot tax them. We answer, with very little hesitation, that for the general use of the empire we have the sole right of taxing them. If they have contributed any thing in their own assemblies, what they contributed was not paid, but given; it was not a tax or tribute, but a present. Yet they have the natural and legal power of levying money on themselves for provincial purposes, of providing for their own expense, at their own discretion. Let not this be thought new or strange; it is the state of every parish in the kingdom.

The friends of the Americans are of different opinions. Some think that being unrepresented, they ought to tax themselves; and others, that they ought to have representatives in the British parliament.

If they are to tax themselves, what power is to remain in the supreme legislature? That they must settle their own mode of levying their money, is supposed. May the British parliament tell them how much they shall contribute? If the sum may be prescribed, they will return few thanks for the power of raising it; if they are at liberty to grant or to deny, they are no longer subjects.

If they are to be represented, what number of these western orators are to be admitted? This, I suppose, the parliament must settle; yet if men have a natural and unalienable right to be represented, who shall determine the number of their delegates? Let us however suppose them to send twenty-three, half as many as the kingdom of Scotland, what will this representation avail them? To pay taxes, will be still a grievance. The love of money will not be lessened, nor the power of getting it increased.

Whither will this necessity of representation drive us? Is every petty settlement to be out of the reach of government, till it has sent a senator to parliament; or may two of them, or a greater number, be forced to unite in a single deputation? What at last is the difference between him that is taxed by compulsion without representation, and him that is represented by compulsion in order to be taxed?

For many reigns the House of Commons was in a state of fluctuation: new burgesses were added from time to time, without any reason now to be discovered; but the number has been fixed for more than a century and a half, and the king's power of increasing it has been questioned. It will hardly be thought fit to new-model the constitution in favour of the planters, who, as they grow rich, may buy estates in England, and, without any innovation, effectually represent their native colonies.

The friends of the Americans, indeed, ask for them what they do not ask for themselves. This inestimable right of representation they have never solicited. They mean not to exchange solid money for such airy honour. They say, and say willingly, that they cannot conveniently be represented; because their inference is, that they cannot be taxed. They are too remote to share the general government, and therefore claim the privilege of governing themselves.

Of the principles contained in the resolutions of the Congress, however wild, indefinite, and obscure, such has been the influence upon American understanding, that from New England to South Carolina there is formed a general combination of all the provinces against their Mother-country. The madness of independence has spread from colony to colony, till order is lost, and government despised, and all is filled with misrule, uproar, violence, and confusion. To be quiet is disaffection, to be loyal is treason.

The Congress of Philadelphia, an assembly convened by its own authority, has promulgated a declaration, in compliance with which the communication between Britain and the greatest part of North America is now suspended. They ceased to admit the importation of English goods in December, 1774, and determine to permit the exportation of their own no longer than to November, 1775.

This might seem enough, but they have done more. They have declared, that they shall treat all as enemies who do not concur with them in disaffection and perverseness, and that they will trade with none that shall trade with Britain.

They threaten to stigmatize in their Gazette these who shall consume the products or merchandise of their Mother-country, and are now searching suspected houses for prohibited goods.

These hostile declarations they profess them-

selves ready to maintain by force. They have armed the militia of their provinces, and seized the public stores of ammunition. They are therefore no longer subjects, since they refuse the laws of their sovereign, and in defence of that refusal are making open preparations for war.

Being now in their own opinion free states, they are not only raising armies, but forming alliances; not only hastening to rebel themselves, but seducing their neighbours to rebellion. They have published an address to the inhabitants of Quebec, in which discontent and resistance are openly incited, and with very respectful mention of the sagacity of Frenchmen invite them to send deputies to the Congress of Philadelphia, to that seat of Virtue and Veracity, whence the people of England are told, that to establish popery, a religion, fraught with sanguinary and impious tenets, even in Quebec, a country of which the inhabitants are papists, is so contrary to the constitution, that it cannot be lawfully done by the legislature itself; where it is made one of the articles of their association, to deprive the conquered French of their religious establishment; and whence the French of Quebec are, at the same time, flattered into sedition, by professions of expecting "from the liberality of sentiment distinguishing their nation, that difference of religion will not prejudice them against a hearty amity, because the transcendent nature of freedom elevates all, who unite in the cause, above such low-minded infirmities."

Quebec, however, is at a great distance. They have aimed a stroke from which they may hope for greater and more speedy mischief. They have tried to infect the people of England with the contagion of disloyalty. Their credit is happily not such as gives them influence proportionate to their malice. When they talk of their pretended immunities guaranteed by the plighted faith of Government, and the most solemn compacts with English Sovereigns, we think ourselves at liberty to inquire when the faith was plighted, and the compact made; and when we can only find that king James and king Charles the First promised the settlers in Massachusetts's Bay, now famous by the appellation of Bostonians, exemption from taxes for seven years, we infer with Mr. Mauduit, that by this solemn compact they were, after the expiration of the stipulated term, liable to taxation.

When they apply to our compassion, by telling us, that they are to be carried from their own country to be tried for certain offences, we are not so ready to pity them, as to advise them not to offend. While they are innocent, they are safe.

When they tell of laws made expressly for their punishment, we answer, that tumults and sedition were always punishable, and that the new law prescribes only the mode of execution.

When it is said that the whole town of Boston is distressed for a misdemeanour of a few, we wonder at their shamelessness; for we know that the town of Boston, and all the associated provinces, are now in rebellion to defend or justify the criminals.

If frauds in the imposts of Boston are tried by commission without a jury, they are tried here in the same mode; and why should the Bostonians expect from us more tenderness for them than for ourselves?

If they are condemned unheard, it is because there is no need of a trial. The crime is manifest and notorious. All trial is the investigation of something doubtful. An Italian philosopher observes, that no man desires to hear what he has already seen.

If their assemblies have been suddenly dissolved, what was the reason? Their deliberations were indecent, and their intentions seditious. The power of dissolution is granted and reserved for such times of turbulence. Their best friends have been lately soliciting the King to dissolve his parliament, to do what they so loudly complain of suffering.

That the same vengeance involves the innocent and guilty, is an evil to be lamented, but human caution cannot prevent it, nor human power always redress it. To bring misery on those who have not deserved it, is part of the aggregated guilt of rebellion.

That governors have been sometimes given them only that a great man might get ease from impotency, and that they have had judges not always of the deepest learning or the purest integrity, we have no great reason to doubt, because such misfortunes happen to ourselves. Whoever is governed, will sometimes be governed ill, even when he is most concerned in his own government.

That improper officers or magistrates are sent, is the crime or folly of those that sent them. When incapacity is discovered, it ought to be removed; if corruption is detected, it ought to be punished. No government could subsist for a day, if single errors could justify defection.

One of their complaints is not such as can claim much commiseration from the softest bosom. They tell us, that we have changed our conduct, and that a tax is now laid by parliament on those who were never taxed by parliament before. To this we think it may be easily answered, that the longer they have been spared, the better they can pay.

It is certainly not much their interest to represent innovation as criminal or invidious; for they have introduced into the history of mankind a new mode of disaffection, and have given, I believe, the first example of a proscription published by a colony against the Mother-country.

To what is urged of new powers granted to

the Courts of Admiralty, or the extension of authority conferred on the judges, it may be answered in a few words, that they have themselves made such regulations necessary; that they are established for the prevention of greater evils; at the same time it must be observed, that these powers have not been extended since the rebellion in America.

One mode of persuasion their ingenuity has suggested, which it may perhaps be less easy to resist. That we may not look with indifference on the American contest, or imagine that the struggle is for a claim, which, however decided, is of small importance and remote consequence, the Philadelphian Congress has taken care to inform us, that they are resisting the demands of parliament, as well for our sakes as their own.

Their keenness of perspicacity has enabled them to pursue consequences to a greater distance; to see through clouds impervious to the dimness of European sight; and to find, I know not how, that when they are taxed, we shall be enslaved.

That slavery is a miserable state, we have been often told, and doubtless many a Briton will tremble to find it so near as in America; but how it will be brought hither, the Congress must inform us. The question might distress a common understanding; but the statesmen of the other hemisphere can easily resolve it. "Our ministers," they say, "are our enemies, and if they should carry the point of taxation, may with the same army enslave us. It may be said, we will not pay them; but remember," say the western sages, "the taxes from America, and we may add the men, and particularly the Roman Catholics of this vast continent, will then be in the power of your enemies. Nor have you any reason to expect, that after making slaves of us, many of us will refuse to assist in reducing you to the same abject state."

These are dreadful menaces; but suspecting that they have not much the sound of probability, the Congress proceeds: "Do not treat this as chimerical. Know that in less than half a century the quit-rents reserved to the crown from the numberless grants of this vast continent, will pour large streams of wealth into the royal coffers. If to this be added the power of taxing America at pleasure, the crown will possess more treasure than may be necessary to purchase the remains of liberty in your island."

All this is very dreadful; but amidst the terror that shakes my frame, I cannot forbear to wish that some sluice were opened for these streams of treasure. I shall gladly see America return half of what England has expended in her defence; and of the stream that will flow so largely in less than half a century, I hope a small rill at least may be found to quench the thirst of the present generation, which seems to think

itself in more danger of wanting money than of losing liberty.

It is difficult to judge with what intention such airy bursts of malevolence are vented; if such writers hope to deceive, let us rather repel them with scorn than refute them by disputation.

In this last terrific paragraph are two positions, that, if our fears do not overpower our reflection, may enable us to support life a little longer. We are told by these croakers of calamity, not only that our present ministers design to enslave us, but that the same malignity of purpose is to descend through all their successors, and that the wealth to be poured into England by the Pactolus of America, will, whenever it comes, be employed to purchase *the remains of liberty*.

Of those who now conduct the national affairs, we may, without much arrogance, presume to know more than themselves, and of those who shall succeed them, whether minister or king, not to know less.

The other position is, that "the Crown," if this laudable opposition should not be successful, "will have the power of taxing America at pleasure." Surely they think rather too meanly of our apprehensions, when they suppose us not to know what they well know themselves, that they are taxed, like all other British subjects, by parliament; and that the Crown has not by the new imposts, whether right or wrong, obtained any additional power over their possessions.

It were a curious, but an idle, speculation to inquire, what effect these dictators of sedition expect from the dispersion of their Letter among us. If they believe their own complaints of hardship, and really dread the danger which they describe, they will naturally hope to communicate the same perceptions to their fellow-subjects. But probably in America, as in other places, the chiefs are incendiaries, that hope to rob in the tumults of a conflagration, and toss brands among a rabble passively combustible. Those who wrote the Address, though they have shown no great extent or profundity of mind, are yet probably wiser than to believe it: but they have been taught by some master of mischief, how to put in motion the engine of political electricity; to attract by the sounds of Liberty and Property, to repel by those of Popery and Slavery; and to give the great stroke by the name of Boston.

When subordinate communities oppose the decrees of the general legislature with defiance thus audacious, and malignity thus acrimonious, nothing remains but to conquer or to yield; to allow their claim of independence, or to reduce them by force to submission and allegiance.

It might be hoped that no Englishman could be found, whom the menaces of our own Colo-

nists, just rescued from the French, would not move to indignation, like that of the Scythians, who, returning from war, found themselves excluded from their own houses by their slaves.

That corporations constituted by favour, and existing by sufferance, should dare to prohibit commerce with their native country, and threaten individuals by infamy, and societies with at least suspension of amity, for daring to be more obedient to government than themselves, is a degree of insolence which not only deserves to be punished, but of which the punishment is loudly demanded by the order of life, and the peace of nations.

Yet there have risen up, in the face of the public, men who, by whatever corruptions or whatever infatuation, have undertaken to defend the Americans, endeavour to shelter them from resentment, and propose reconciliation without submission.

As political diseases are naturally contagious, let it be supposed for a moment that Cornwall, seized with the Philadelphian frenzy, may resolve to separate itself from the general system of the English constitution, and judge of its own rights in its own parliament. A congress might then meet at Truro, and address the other counties in a style not unlike the language of the American patriots

#### "FRIENDS AND FELLOW-SUBJECTS,

"We, the delegates of the several towns and parishes of Cornwall, assembled to deliberate upon our own state and that of our constituents, having, after serious debate and calm consideration, settled the scheme of our future conduct, hold it necessary to declare the resolutions which we think ourselves entitled to form by the unalienable rights of reasonable Beings, and into which we have been compelled by grievances and oppressions, long endured by us in patient silence, not because we did not feel, or could not remove them, but because we were unwilling to give disturbance to a settled government, and hoped that others would in time find, like ourselves, their true interest and their original powers, and all co-operate to universal happiness.

"But since having long indulged the pleasing expectation, we find general discontent not likely to increase, or not likely to end in general defection, we resolve to erect alone the standard of liberty.

"*Know then*, that you are no longer to consider Cornwall as an English county, visited by English judges, receiving law from an English parliament, or including in any general taxation of the kingdom; but as a state distinct and independent, governed by its own institutions, administered by its own magistrates, and exempt from any tax or tribute but such as we shall impose upon ourselves.

"We are the acknowledged descendants of the earliest inhabitants of Britain, of men, who before the time of history, took possession of the island desolate and waste, and therefore open to the first occupants. Of this descent, our language is a sufficient proof, which, not quite a century ago, was different from yours.

"Such are the Cornishmen; but who are you? who, but the unauthorised and lawless children of intruders, invaders, and oppressors? who, but the transmitters of wrong, the inheritors of robbery? In claiming independence, we claim but little. We might require you to depart from a land which you possess by usurpation, and to restore all that you have taken from us.

"Independence is the gift of Nature. No man is born the master of another. Every Cornishman is a freeman, for we have never resigned the rights of humanity; and he only can be thought free, who is not governed but by his own consent.

"You may urge that the present system of government has descended through many ages, and that we have a larger part in the representation of the kingdom than any other county.

"All this is true, but it is neither cogent nor persuasive. We look to the original of things. Our union with the English counties was either compelled by force, or settled by compact.

"That which was made by violence, may by violence be broken. If we were treated as a conquered people, our rights might be obscured, but could never be extinguished. The sword can give nothing but power, which a sharper sword can take away.

"If our union was by compact, whom could the compact bind but those that concurred in the stipulations? We gave our ancestors no commission to settle the terms of future existence. They might be cowards that were frightened, or blockheads that were cheated; but whatever they were, they could contract only for themselves. What they could establish, we can annul.

"Against our present form of government it shall stand in the place of all argument, that we do not like it. While we are governed as we do not like, where is our liberty? We do not like taxes, we will therefore not be taxed: we do not like your laws, and will not obey them.

"The taxes laid by our representatives, are laid, you tell us, by our own consent; but we will no longer consent to be represented. Our number of legislators was originally a burden, and ought to have been refused; it is now considered as a disproportionate advantage; who, then, will complain if we resign it?

"We shall form a senate of our own, under a President whom the King shall nominate, but whose authority we will limit, by adjusting his salary to his merit. We will not withhold a

proper share of contribution to the necessary expense of lawful government, but will decide for ourselves what share is proper, what expense is necessary, and what government is lawful.

"Till our council is proclaimed independent and unaccountable, we will, after the tenth day of September, keep our tin in our own hands: you can be supplied from no other place, and must therefore comply, or be poisoned with the copper of your own kitchens.

"If any Cornishman shall refuse his name to this just and laudable association, he shall be tumbled from St. Michael's Mount, or buried alive in a tin-mine; and if any emissary shall be found seducing Cornishmen to their former state, he shall be smeared with tar and rolled in feathers, and chased with dogs out of our dominions.

*"From the Cornish Congress at Truro."*

Of this memorial what could be said but that it was written in jest, or written by a madman? Yet I know not whether the warmest admirers of Pennsylvanian eloquence can find any argument in the Address of the Congress, that is not with greater strength urged by the Cornishman.

The argument of the irregular troops of controversy, stripped of its colours, and turned out naked to the view, is no more than this. Liberty is the birthright of man, and where obedience is compelled, there is no liberty. The answer is equally simple. Government is necessary to man, and where obedience is not compelled, there is no government.

If the subject refuses to obey, it is the duty of authority to use compulsion. Society cannot subsist but by the power, first of making laws, and then of enforcing them.

To one of the threats hissed out by the Congress, I have put nothing similar into the Cornish proclamation; because it is too wild for folly and too foolish for madness. If we do not withhold our King and his parliament from taxing them, they will cross the Atlantic and enslave us.

How they will come, they have not told us: perhaps they will take wing and light upon our coasts. When the cranes thus begin to flutter, it is time for pigmies to keep their eyes about them. The Great Orator observes, that they will be very fit, after they have been taxed, to impose chains upon us. If they are so fit as their friend describes them, and so willing as they describe themselves, let us increase our army, and double our militia.

It has been of late a very general practice to talk of slavery among those who are setting at defiance every power that keeps the world in order. If the learned Author of the "Reflections on Learning" has rightly observed, that no man ever could give law to language, it will

be vain to prohibit the use of the word *slavery*: but I could wish it more discreetly uttered; it is driven at one time too hard into our ears by the loud hurricane of Pennsylvanian eloquence, and at another glides too cold into our hearts by the soft conveyance of a female patriot bewailing the miseries of her *friends and fellow-citizens*.

Such has been the progress of sedition, that those who a few years ago disputed only our right of laying taxes, now question the validity of every act of legislation. They consider themselves as emancipated from obedience, and as being no longer the subjects of the British crown. They leave us no choice but of yielding or conquering, of resigning our dominion, or maintaining it by force.

From force, many endeavours have been used either to dissuade or to deter us. Sometimes the merit of the Americans is exalted, and sometimes their sufferings are aggravated. We are told of their contributions to the last war, a war incited by their outcries, and continued for their protection, a war by which none but themselves were gainers. All that they can boast is, that they did something for themselves, and did not wholly stand inactive while the sons of Britain were fighting in their cause.

If we cannot admire, we are called to pity them; to pity those that show no regard to their Mother-country; have obeyed no law which they could violate; have imparted no good which they could withhold; have entered into associations of fraud to rob their creditors; and into combinations to distress all who depended on their commerce. We are reproached with the cruelty of shutting one port, where every port is shut against us. We are censured as tyrannical for hindering those from fishing, who have condemned our merchants to bankruptcy, and our manufacturers to hunger.

Others persuade us to give them more liberty, to take off restraints, and relax authority: and tell us what happy consequences will arise from forbearance: how their affections will be conciliated, and into what diffusions of beneficence their gratitude will luxuriate. They will love their friends. They will reverence their protectors. They will throw themselves into our arms, and lay their property at our feet. They will buy from no other what we can sell them; they will sell to no other what we wish to buy.

That any obligations should overpower their attention to profit, we have known them long enough not to expect. It is not to be expected from a more liberal people. With what kindness they repay benefits, they are now showing us, who, as soon as we have delivered them from France, are defying and proscribing us.

But if we will permit them to tax themselves, they will give us more than we require. If we proclaim them independent, they will during pleasure pay us a subsidy. The contest is not

now for money, but for power. The question is not how much we shall collect, but by what authority the collection shall be made.

Those who find that the Americans cannot be shown in any form that may raise love or pity, dress them in habiliments of terror, and try to make us think them formidable. The Bostonians can call into the field ninety thousand men. While we conquer all before us, new enemies will rise up behind, and our work will be always to begin. If we take possession of the towns, the colonists will retire into the inland regions, and the gain of victory will be only empty houses, and a wide extent of waste and desolation. If we subdue them for the present, they will universally revolt in the next war, and resign us without pity to subjection and destruction.

To all this it may be answered, that between losing America and resigning it, there is no great difference; that it is not very reasonable to jump into the sea, because the ship is leaky. All those evils may befall us, but we need not hasten them.

The Dean of Gloucester has proposed, and seems to propose it seriously, that we should at once release our claims, declare them masters of themselves, and whistle them down the wind. His opinion is, that our gain from them will be the same, and our expense less. What they can have most cheaply from Britain, they will still buy; what they can sell to us at the highest price, they will still sell.

It is, however, a little hard, that having so lately fought and conquered for their safety, we should govern them no longer. By letting them loose before the war, how many millions might have been saved. One wild proposal is best answered by another. Let us restore to the French what we have taken from them. We shall see our colonists at our feet, when they have an enemy so near them. Let us give the Indians arms, and teach them discipline, and encourage them now and then to plunder a plantation. Security and leisure are the parents of sedition.

While these different opinions are agitated, it seems to be determined by the legislature, that force shall be tried. Men of the pen have seldom any great skill in conquering kingdoms, but they have strong inclination to give advice. I cannot forbear to wish, that this commotion may end without bloodshed, and that the rebels may be subdued by terror rather than by violence; and therefore recommend such a force as may take away, not only the power, but the hope of resistance, and by conquering without a battle, save many from the sword.

If their obstinacy continues without actual hostilities, it may perhaps be mollified by turning out the soldiers to free quarters, forbidding any personal cruelty or hurt. It has been proposed, that the slaves should be set free, an act which

surely the lovers of liberty cannot but commend. If they are furnished with fire-arms for defence, and utensils for husbandry, and settled in some simple form of government within the country, they may be more grateful and honest than their masters.

Far be it from any Englishman to thirst for the blood of his fellow-subjects. Those who most deserve our resentment, are unhappily at less distance. The Americans, when the Stamp Act was first proposed, undoubtedly disliked it, as every nation dislikes an impost; but they had no thought of resisting it, till they were encouraged and incited by European intelligence, from men whom they thought their friends, but who were friends only to themselves.

On the original contrivers of mischief let an insulted nation pour out its vengeance. With whatever design they have inflamed this pernicious contest, they are themselves equally detestable. If they wish success to the colonies, they are traitors to this country; if they wish their defeat, they are traitors at once to America and England. To them, and them only, must be imputed the interruption of commerce, and the miseries of war, the sorrow of those that shall be ruined, and the blood of those that shall fall.

Since the Americans have made it necessary to subdue them, may they be subdued with the least injury possible to their persons and their possessions! When they are reduced to obedience, may that obedience be secured by stricter laws and stronger obligations!

Nothing can be more noxious to society, than that erroneous clemency, which, when a rebellion is suppressed, exacts no forfeiture and establishes no securities, but leaves the rebels in their former state. Who would not try the experiment which promises advantage without expense? If rebels once obtain a victory, their wishes are accomplished; if they are defeated, they suffer little, perhaps less than their conquerors; however often they play the game, the chance is always in their favour. In the mean time, they are growing rich by victualling the troops that we have sent against them, and perhaps gain more by the residence of the army than they lose by the obstruction of their port.

Their charters being now, I suppose, legally forfeited, may be modelled as shall appear most commodious to the Mother-country. Thus the privileges which are found by experience liable to misuse, will be taken away, and those who now bellow as patriots, bluster as soldiers, and

domineer as legislators, will sink into sober merchants and silent planters, peaceably diligent, and securely rich.

But there is one writer, and perhaps many who do not write, to whom the contraction of these pernicious privileges appears very dangerous, and who startle at the thoughts of *England free and America in chains*. Children fly from their own shadow, and rhetoricians are frightened by their own voices. *Chains* is undoubtedly a dreadful word; but perhaps the masters of civil wisdom may discover some gradations between chains and anarchy. Chains need not be put upon those who will be restrained without them. This contest may end in the softer phrase of English Superiority and American Obedience.

We are told, that the subjection of Americans may tend to the diminution of our own liberties: an event, which none but very perspicacious politicians are able to foresee. If slavery be thus fatally contagious, how is it that we hear the loudest yelps for liberty among the drivers of negroes?

But let us interrupt a while this dream of conquest, settlement, and supremacy. Let us remember that being to contend, according to one orator, with three millions of Whigs, and according to another, with ninety thousand patriots of Massachusetts's Bay, we may possibly be checked in our career of reduction. We may be reduced to peace upon equal terms, or driven from the western continent, and forbidden to violate a second time the happy borders of the land of liberty. The time is now perhaps at hand, which Sir Thomas Browne predicted between jest and earnest,

When America should no more send out her treasure,  
But spend it at home in American pleasure.

If we are allowed upon our defeat to stipulate conditions, I hope the treaty of Boston will permit us to import into the confederated Cantons such products as they do not raise, and such manufactures as they do not make, and cannot buy cheaper from other nations, paying like others the appointed customs; that if an English ship salutes a fort with four guns, it shall be answered at least with two; and that if an Englishman be inclined to hold a plantation, he shall only take an oath of allegiance to the reigning powers, and be suffered, while he lives inoffensively, to retain his own opinion of English rights, unmolested in his conscience by an oath of abjuration.

# A JOURNEY

TO THE

## WESTERN ISLANDS OF SCOTLAND.

---

I HAD desired to visit the Hebrides, or Western Islands of Scotland, so long, that I scarcely remember how the wish was originally excited; and was in the Autumn of the year 1773 induced to undertake the journey, by finding in Mr. Boswell a companion, whose acuteness would help my inquiry, and whose gayety of conversation and civility of manners are sufficient to counteract the inconveniences of travel, in countries less hospitable than we have passed.

On the eighteenth of August we left Edinburgh, a city too well known to admit description, and directed our course northward, along the eastern coast of Scotland, accompanied the first day by another gentleman, who could stay with us only long enough to show us how much we lost at separation.

As we crossed the Frith of Forth, our curiosity was attracted by Inch Keith, a small island, which neither of my companions had ever visited, though, lying within their view, it had all their lives solicited their notice. Here by climbing with some difficulty over shattered crags, we made the first experiment of unfrequented coasts. Inch Keith is nothing more than a rock covered with a thin layer of earth, not wholly bare of grass, and very fertile of thistles. A small herd of cows grazes annually upon it in the summer. It seems never to have afforded to man or beast a permanent habitation.

We found only the ruins of a small fort, not so injured by time but that it might be easily restored to its former state. It seems never to have been intended as a place of strength, nor was it built to endure a siege, but merely to afford cover to a few soldiers, who perhaps had the charge of a battery, or were stationed to give signals of approaching danger. There is therefore no provision of water within the walls, though the spring is so near, that it might have been easily enclosed. One of the stones had this inscription: "Maria Reg. 1564." It has probably been neglected from the time that the whole island had the same king.

We left this little island with our thoughts

employed a while on the different appearance that it would have made, if it had been placed at the same distance from London, with the same facility of approach; with what emulation of price a few rocky acres would have been purchased, and with what expensive industry they would have been cultivated and adorned.

When we landed, we found our chaise ready, and passed through Kinghorn, Kirkcaldy, and Cowpar, places not unlike the small or straggling market-towns in those parts of England where commerce and manufactures have not yet produced opulence.

Though we were yet in the most populous part of Scotland, and at so small a distance from the capital, we met few passengers.

The roads are neither rough nor dirty; and it affords a southern stranger a new kind of pleasure to travel so commodiously without interruption of tollgates. Where the bottom is rocky, as it seems commonly to be in Scotland, a smooth way is made indeed with great labour, but it never wants repairs; and in those parts where adventitious materials are necessary, the ground once consolidated is rarely broken: for the inland commerce is not great, nor are heavy commodities often transported otherwise than by water. The carriages in common use are small carts, drawn each by one little horse; and a man seems to derive some degree of dignity and importance from the reputation of possessing a two-horse cart.

ST. ANDREWS.

At an hour somewhat late we came to St. Andrews, a city once archiepiscopal; where that university still subsists in which philosophy was formerly taught by Buchanan, whose name has as fair a claim to immortality as can be conferred by modern latinity, and perhaps a fairer than the instability of vernacular languages admits.

We found, that by the interposition of some invisible friend, lodgings had been provided for us at the house of one of the professors, whose

easy civility quickly made us forget that we were strangers; and in the whole time of our stay we were gratified by every mode of kindness, and entertained with all the elegance of lettered hospitality.

In the morning we arose to perambulate a city, which only history shows to have once flourished, and surveyed the ruins of ancient magnificence, of which even the ruins cannot long be visible, unless some care be taken to preserve them; and where is the pleasure of preserving such mournful memorials? They have been till very lately so much neglected, that every man carried away the stones who fancied that he wanted them.

The cathedral, of which the foundations may be still traced, and a small part of the wall is standing, appears to have been a spacious and majestic building, not unsuitable to the primacy of the kingdom. Of the architecture, the poor remains can hardly exhibit, even to an artist, a sufficient specimen. It was demolished, as is well known, in the tumult and violence of Knox's reformation.

Not far from the cathedral, on the margin of the water, stands a fragment of the castle, in which the archbishop anciently resided. It was never very large, and was built with more attention to security than pleasure. Cardinal Beaton is said to have had workmen employed in improving its fortifications, at the time when he was murdered by the ruffians of reformation, in the manner of which Knox has given what he himself calls a merry narrative.

The change of religion in Scotland, eager and vehement as it was, raised an epidemical enthusiasm, compounded of sullen scrupulousness and warlike ferocity, which, in a people whom idleness resigned to their own thoughts, and who, conversing only with each other, suffered no dilution of their zeal from the gradual influx of new opinions, was long transmitted in its full strength from the old to the young, but by trade and intercourse with England, is now visibly abating, and giving way too fast to that laxity of practice, and indifference of opinion, in which men, not sufficiently instructed to find the middle point, too easily shelter themselves from rigour and constraint.

The city of St. Andrews, when it had lost its archiepiscopal pre-eminence, gradually decayed: one of its streets is now lost; and in those that remain, there is the silence and solitude of inactive indigence and gloomy depopulation.

The university, within a few years, consisted of three colleges, but is now reduced to two; the college of St. Leonard being lately dissolved by the sale of its buildings, and the appropriation of its revenues to the professors of the two others. The chapel of the alienated college is yet standing, a fabric not inelegant of external structure: but I was always, by some civil excuse, hin-

dered from entering it. A decent attempt, as I was since told, has been made to convert it into a kind of green-house, by planting its area with shrubs. This new method of gardening is unsuccessful; the plants do not hitherto prosper. To what use it will next be put, I have no pleasure in conjecturing. It is something, that its present state is at least not ostentatiously displayed. Where there is yet shame, there may in time be virtue.

The dissolution of St. Leonard's College was doubtless necessary; but of that necessity there is reason to complain. It is surely not without just reproach that a nation, of which the commerce is hourly extending, and the wealth increasing, denies any participation of its prosperity to its literary societies; and while its merchants or its nobles are raising palaces, suffers its universities to moulder into dust.

Of the two colleges yet standing, one is by the institution of its founder appropriated to divinity. It is said to be capable of containing fifty students; but more than one must occupy a chamber. The library, which is of late erection, is not very spacious, but elegant and luminous.

The doctor, by whom it was shown, hoped to irritate or subdue my English vanity, by telling me, that we had no such repository of books in England.

St. Andrews seems to be a place eminently adapted to study and education, being situated in a populous, yet a cheap country, and exposing the minds and manners of young men neither to the levity and dissoluteness of a capital city, nor to the gross luxury of a town of commerce, places naturally unpropitious to learning; in one the desire of knowledge easily gives way to the love of pleasure, and in the other, is in danger of yielding to the love of money.

The students however are represented as at this time not exceeding a hundred. Perhaps it may be some obstruction to their increase that there is no episcopal chapel in the place. I saw no reason for imputing their paucity to the present professors; nor can the expense of an academical education be very reasonably objected. A student of the highest class may keep his annual session, or, as the English call it, his term, which lasts seven months, for about fifteen pounds, and one of lower rank for less than ten; in which board, lodging, and instruction are all included.

The chief magistrate resident in the university, answering to our vice-chancellor, and to the *rector magnificus* on the continent, had commonly the title of Lord Rector; but being addressed only as Mr. Rector in an inaugural speech by the present chancellor, he has fallen from his former dignity of style. Lordship was very liberally annexed by our ancestors to any station or character of dignity: they said, the

Lord General, and Lord Ambassador; so we still say, my Lord, to the judge upon the circuit, and yet retain in our Liturgy, the Lords of the Council.

In walking among the ruins of religious buildings, we came to two vaults over which had formerly stood the house of the sub-prior. One of the vaults was inhabited by an old woman, who claimed the right of abode there, as the widow of a man whose ancestors had possessed the same gloomy mansion for no less than four generations. The right, however it began, was considered as established by legal prescription, and the old woman lives undisturbed. She thinks however that she has a claim to something more than sufferance; for as her husband's name was Bruce, she is allied to royalty, and told Mr. Boswell, that when there were persons of quality in the place, she was distinguished by some notice; that indeed she is now neglected, but she spins a thread, has the company of a cat, and is troublesome to nobody.

Having now seen whatever this ancient city offered to our curiosity, we left it with good wishes, having reason to be highly pleased with the attention that was paid us. But whoever surveys the world, must see many things that give him pain. The kindness of the professors did not contribute to abate the uneasy remembrance of a university declining, a college alienated, and a church profaned and hastening to the ground.

St. Andrews indeed has formerly suffered more atrocious ravages, and more extensive destruction; but recent evils affect with greater force. We were reconciled to the sight of archiepiscopal ruins. The distance of a calamity from the present time seems to preclude the mind from contact or sympathy. Events long past are barely known; they are not considered. We read with as little emotion the violence of Knox and his followers, as the irruptions of Alaric and the Goths. Had the university been destroyed two centuries ago, we should not have regretted it; but to see it pining in decay, and struggling for life, fills the mind with mournful images and ineffectual wishes.

#### ABERBROTHICK.

As we knew sorrow and wishes to be vain, it was now our business to mind our way. The roads of Scotland afford little diversion to the traveller, who seldom sees himself either encountered or overtaken, and who has nothing to contemplate but grounds that have no visible boundaries, or are separated by walls of loose stone. From the bank of the Tweed to St. Andrews, I had never seen a single tree, which I did not believe to have grown up far within the present century. Now and then about a gentleman's house stands a small plantation,

which in Scotch is called a *policy*, but of these there are few, and those few all very young. The variety of sun and shade is here utterly unknown. There is no tree for either shelter or timber. The oak and the thorn is equally a stranger, and the whole country is extended in uniform nakedness, except that in the road between Kirkcaldy and Cowpar, I passed for a few yards between two hedges. A tree might be a show in Scotland, as a horse in Venice. At St. Andrews, Mr. Boswell found only one, and recommended it to my notice; I told him that it was rough and low, or looked as if I thought so. This, said he, is nothing to another a few miles off. I was still less delighted to hear that another tree was not to be seen nearer. Nay, said a gentleman that stood by, I know but of this and that tree in the country.

The Lowlands of Scotland had once undoubtedly an equal portion of woods with other countries. Forests are every where gradually diminished, as architecture and cultivation prevail, by the increase of people, and the introduction of arts. But I believe few regions have been denuded like this, where many centuries must have passed in waste, without the least thought of future supply. Davies observes in his account of Ireland, that no Irishman had ever planted an orchard. For that negligence some excuse might be drawn from an unsettled state of life, and the instability of property; but in Scotland possession has long been secure, and inheritance regular, yet it may be doubted whether before the Union any man between Edinburgh and England had ever set a tree.

Of this improvidence no other account can be given than that it probably began in times of tumult, and continued because it had begun. Established custom is not easily broken, till some great event shakes the whole system of things, and life seems to recommence upon new principles. That before the Union the Scots had little trade and little money, is no valid apology; for plantation is the least expensive of all methods of improvement. To drop a seed into the ground can cost nothing, and the trouble is not great of protecting the young plant, till it is out of danger; though it must be allowed to have some difficulty in places like these, where they have neither wood for palisades, nor thorns for hedges.

Our way was over the Firth of Tay, where, though the water was not wide, we paid four shillings for ferrying the chaise. In Scotland the necessities of life are easily procured, but superfluities and elegances are of the same price at least as in England, and therefore may be considered as much dearer.

We stopped a while at Dundee, where I remember nothing remarkable, and mounting our chaise again, came about the close of the day to Aberbrothick.

The monastery of Aberbrothick is of great renown in the history of Scotland. Its ruins afford ample testimony of its ancient magnificence: its extent might, I suppose, easily be found by following the walls among the grass and weeds, and its height is known by some parts yet standing. The arch of one of the gates is entire, and of another only so far dilapidated as to diversify the appearance. A square apartment of great loftiness is yet standing; its use I could not conjecture, as its elevation was very disproportionate to its area. Two corner towers particularly attracted our attention. Mr. Boswell, whose inquisitiveness is seconded by great activity, scrambled in at a high window, but found the stairs within broken, and could not reach the top. Of the other tower we were told that the inhabitants sometimes climbed it, but we did not immediately discern the entrance, and as the night was gathering upon us, thought proper to desist. Men skilled in architecture might do what we did not attempt; they might probably form an exact ground-plot of this venerable edifice. They may from some parts yet standing conjecture its general form, and perhaps by comparing it with other buildings of the same kind and the same age, attain an idea very near to truth. I should scarcely have regretted my journey, had it afforded nothing more than the sight of Aberbrothick.

## MONTROSE.

LEAVING these fragments of magnificence, we travelled on to Montrose, which we surveyed in the morning, and found it well built, airy, and clean. The town-house is a handsome fabric with a portico. We then went to view the English chapel, and found a small church, clean to a degree unknown in any other part of Scotland, with commodious galleries, and, what was yet less expected, with an organ.

At our inn we did not find a reception such as we thought proportionate to the commercial opulence of the place; but Mr. Boswell desired me to observe that the innkeeper was an Englishman, and I then defended him as well as I could.

When I had proceeded thus far, I had opportunities of observing what I had never heard, that there were many beggars in Scotland. In Edinburgh the proportion is, I think, not less than in London, and in the smaller places it is far greater than in English towns of the same extent. It must, however, be allowed, that they are not importunate, nor clamorous. They solicit silently, or very modestly, and, therefore, though their behaviour may strike with more force the heart of a stranger, they are certainly in danger of missing the attention of their countrymen. Novelty has always some power; an

unaccustomed mode of begging, excites an unaccustomed degree of pity. But the force of novelty is by its own nature soon at an end; the efficacy of outcry and perseverance is permanent and certain.

The road from Montrose exhibited a continuation of the same appearances. The country is still naked, the hedges are of stone, and the fields so generally plowed, that it is hard to imagine where grass is found for the horses that till them. The harvest, which was almost ripe, appeared very plentiful.

Early in the afternoon Mr. Boswell observed, that we were at no great distance from the house of lord Monboddo. The magnetism of his conversation easily drew us out of our way, and the entertainment which we received would have been a sufficient recompense for a much greater deviation.

The roads beyond Edinburgh, as they are less frequented, must be expected to grow gradually rougher; but they were hitherto by no means incommodious. We travelled on with the gentle pace of a Scotch driver, who, having no rivals in expedition, neither gives himself nor his horses unnecessary trouble. We did not affect the impatience we did not feel, but were satisfied with the company of each other, as well riding in the chaise, as sitting at an inn. The night and the day are equally solitary and equally safe; for where there are so few travellers, why should there be robbers?

## ABERDEEN.

WE came somewhat late to Aberdeen, and found the inn so full, that we had some difficulty in obtaining admission, till Mr. Boswell made himself known: his name overpowered all objection, and we found a very good house, and civil treatment.

I received the next day a very kind letter from Sir Alexander Gordon, whom I had formerly known in London, and after a cessation of all intercourse for near twenty years, met here professor of physic in the King's College. Such unexpected renewals of acquaintance may be numbered among the most pleasing incidents of life.

The knowledge of one professor soon procured me the notice of the rest, and I did not want any token of regard, being conducted wherever there was any thing which I desired to see, and entertained at once with the novelty of the place, and the kindness of communication.

To write of the cities of our own island with the solemnity of geographical description, as if we had been cast upon a newly-discovered coast, has the appearance of a very frivolous ostentation; yet as Scotland is little known to the greater part of those who may read these obser-

vations, it is not superfluous to relate, that under the name of Aberdeen are comprised two towns, standing about a mile distant from each other, but governed, I think, by the same magistrates.

Old Aberdeen is the ancient episcopal city, in which are still to be seen the remains of the cathedral. It has the appearance of a town in decay, having been situated, in times when commerce was yet unstudied, with very little attention to the commodiousness of the harbour.

New Aberdeen has all the bustle of prosperous trade, and all the show of increasing opulence. It is built by the water-side. The houses are large and lofty, and the streets spacious and clean. They build almost wholly with the granite used in the new pavement of the streets of London, which is well known not to want hardness, yet they shape it easily. It is beautiful, and must be very lasting.

What particular parts of commerce are chiefly exercised by the merchants of Aberdeen, I have not inquired. The manufacture which forces itself upon a stranger's eye, is that of knit-stockings, on which the women of the lower class are visibly employed.

In each of these towns there is a college, or in stricter language, a university; for in both there are professors of the same parts of learning, and the colleges hold their sessions, and confer degrees separately, with total independence of one on the other.

In Old Aberdeen stands the King's College, of which the first president was Hector Boece, or Boethius, who may be justly revered as one of the revivers of elegant learning. When he studied at Paris, he was acquainted with Erasmus, who afterwards gave him a public testimony of his esteem, by inscribing to him a catalogue of his works. The style of Boethius, though, perhaps, not always rigorously pure, is formed with great diligence upon ancient models, and wholly uninfected with monastic barbarity. His history is written with elegance and vigour, but his fabulousness and credulity are justly blamed. His fabulousness, if he was the author of the fictions, is a fault for which no apology can be made; but his credulity may be excused in an age when all men were credulous. Learning was then rising on the world; but ages so long accustomed to darkness, were too much dazzled with its light to see anything distinctly. The first race of scholars in the fifteenth century, and some time after, were, for the most part, learning to speak, rather than to think, and were therefore more studious of elegance than of truth. The contemporaries of Boethius thought it sufficient to know what the ancients had delivered. The examination of tenets and of facts was reserved for another generation.

Boethius, as president of the university, enjoyed a revenue of forty Scottish marks, about two pounds four shillings and sixpence of ster-

ling money. In the present age of trade and taxes, it is difficult even for the imagination so to raise the value of money, or so to diminish the demands of life, as to suppose four and forty shillings a year an honourable stipend; yet it was probably equal, not only to the needs, but to the rank of Boethius. The wealth of England was undoubtedly to that of Scotland more than five to one, and it is known that Henry the Eighth, among whose faults avarice was never reckoned, granted to Roger Ascham, as a reward of his learning, a pension of ten pounds a year.

The other, called the Marischal College, is in the new town. The hall is large and well lighted. One of its ornaments is the picture of Arthur Johnston, who was principal of the college, and who holds among the Latin poets of Scotland, the next place to the elegant Buchanan.

In the library I was shown some curiosities; a Hebrew manuscript of exquisite penmanship, and a Latin translation of Aristotle's Politics, by Leonardus Aretinus, written in the Roman character, with nicety and beauty, which, as the art of printing has made them no longer necessary, are not now to be found. This was one of the latest performances of the transcribers, for Aretinus died but about twenty years before typography was invented. This version has been printed, and may be found in libraries, but is little read; for the same books have been since translated both by Victorius and Lambinus, who lived in an age more cultivated, but perhaps owed in part to Aretinus that they were able to excel him. Much is due to those who first broke the way to knowledge, and left only to their successors the task of smoothing it.

In both these colleges the methods of instruction are nearly the same; the lectures differing only by the accidental difference of diligence, or ability in the professors. The students wear scarlet gowns, and the professors black, which is, I believe, the academical dress in all the Scottish universities, except that of Edinburgh, where the scholars are not distinguished by any particular habit. In the King's College there is kept a public table, but the scholars of the Marischal College are boarded in the town. The expense of living is here, according to the information that I could obtain, somewhat more than at St. Andrews.

The course of education is extended to four years, at the end of which those who take a degree, who are not many, become masters of arts; and whoever is a master may, if he pleases, immediately commence doctor. The title of doctor, however, was for a considerable time bestowed only on physicians. The advocates are examined and approved by their own body; the ministers were not ambitious of titles, or were afraid of being censured for ambition; and the doctorate in every faculty was commonly given

or sold into other countries. The ministers are now reconciled to distinction, and as it must always happen that some will excel others, have thought graduation a proper testimony of uncommon abilities or acquisitions.

The indiscriminate collation of degrees has justly taken away that respect which they originally claimed, as stamps by which the literary value of men so distinguished was authoritatively denoted. That academical honours, or any others, should be conferred with exact proportion to merit, is more than human judgment or human integrity have given reason to expect. Perhaps degrees in universities cannot be better adjusted by any general rule, than by the length of time passed in the public profession of learning. An English or Irish doctorate cannot be obtained by a very young man, and it is reasonable to suppose, what is likewise by experience commonly found true, that he who is by age qualified to be a doctor, has in so much time gained learning sufficient not to disgrace the title, or wit sufficient not to desire it.

The Scotch universities hold but one term or session in the year. That of St. Andrew's continues eight months, that of Aberdeen only five, from the first of November to the first of April.

In Aberdeen there is an English chapel, in which the congregation was numerous and splendid. The form of public worship used by the church of England, is in Scotland legally practised in licensed chapels served by clergymen of English or Irish ordination, and by tacit connivance quietly permitted in separate congregations, supplied with ministers by the successors of the bishops, who were deprived at the Revolution.

We came to Aberdeen on Saturday, August 21st. On Monday we were invited into the town-hall, where I had the freedom of the city given me by the Lord Provost. The honour conferred had all the decorations that politeness could add, and, what I am afraid I should not have had to say of any city south of the Tweed, I found no petty officer bowing for a fee.

The parchment containing the record of admission is, with the seal appending, fastened to a ribbon, and worn for one day by the new citizen in his hat.

By a lady who saw us at the chapel, the earl of Errol was informed of our arrival, and we had the honour of an invitation to his seat, called Slanes Castle, as I am told, improperly, from the castle of that name, which once stood at a place not far distant.

The road beyond Aberdeen grew more stony, and continued equally naked of all vegetable decoration. We travelled over a tract of ground near the sea, which not long ago suffered a very uncommon and unexpected calamity. The sand of the shore was raised by a tempest in such

quantities, and carried to such a distance, that an estate was overwhelmed and lost. Such and so hopeless was the barrenness superinduced, that the owner, when he was required to pay the usual tax, desired rather to resign the ground.

#### SLANES CASTLE. THE BULLER OF BUCHAN.

WE came in the afternoon to Slanes Castle, built upon the margin of the sea, so that the walls of one of the towers seem only a continuation of a perpendicular rock, the foot of which is beaten by the waves. To walk round the house seemed impracticable. From the windows the eye wanders over the sea that separates Scotland from Norway, and when the winds beat with violence, must enjoy all the terrific grandeur of the tempestuous ocean. I would not for my amusement wish for a storm; but as storms, whether wished or not, will sometimes happen, I may say, without violence of humanity, that I should willingly look out upon them from Slanes Castle.

When we were about to take our leave, our departure was prohibited by the countess, till we should have seen two places upon the coast, which she rightly considered as worthy of curiosity, Dun Bay, and the Buller of Buchan, to which Mr. Boyd very kindly conducted us.

Dun Bay, which in Erse is said to signify the Yellow Rock, is a double protuberance of stone, open to the main sea on one side, and parted from the land by a very narrow channel on the other. It has its name and its colour from the dung of innumerable sea-fowls, which in the spring choose this place as convenient for incubation, and have their eggs and their young taken in great abundance. One of the birds that frequent this rock has, as we were told, i. e. body not larger than a duck's, and yet lays eggs as large as those of a goose. This bird is by the inhabitants named a *Coot*. That which is called *Coot* in England, is here a *Cooter*.

Upon these rocks there was nothing that could long detain attention, and we soon turned our eyes to the Buller, or Bouilloir of Buchan, which no man can see with indifference, who has either sense of danger, or delight in rarity. It is a rock perpendicularly tubulated, united on one side with a high shore, and on the other rising steep to a great height above the main sea. The top is open, from which may be seen a dark gulf of water which flows into the cavity, through a breach made in the lower part of the enclosing rock. It has the appearance of a vast well bordered with a wall. The edge of the Buller is not wide, and to those that walk round, appears very narrow. He that ventures to look downward, sees that if his foot should slip, he must fall from his dreadful elevation upon stones on one side, or into the water on the other. We

however went round, and were glad when the circuit was completed.

When we came down to the sea, we saw some boats, and rowers, and resolved to explore the Buller, at the bottom. We entered the arch, which the water had made, and found ourselves in a place, which, though we could not think ourselves in danger, we could scarcely survey without some recoil of the mind. The basin in which we floated was nearly circular, perhaps thirty yards in diameter. We were enclosed by a natural wall, rising steep on every side to a height which produced the idea of insurmountable confinement. The interception of all lateral light caused a dismal gloom. Round us was a perpendicular rock, above us the distant sky, and below an unknown profundity of water. If I had any malice against a walking spirit, instead of laying him in the Red Sea, I would condemn him to reside in the Buller of Buchan.

But terror without danger is only one of the sports of fancy, a voluntary agitation of the mind that is permitted no longer than it pleases. We were soon at leisure to examine the place with minute inspection, and found many cavities which, as the watermen told us, went backward to a depth which they had never explored. Their extent we had not time to try; they are said to serve different purposes. Ladies come hither sometimes in the summer with collations, and smugglers make them storehouses for clandestine merchandise. It is hardly to be doubted but the pirates of ancient times often used them as magazines of arms, or repositories of plunder.

To the little vessels used by the northern rowers, the Buller may have served as a shelter from storms, and perhaps as a retreat from enemies; the entrance might have been stopped, or guarded with little difficulty, and though the vessels that were stationed within would have been battered with stones showered on them from above, yet the crews would have lain safe in the caverns.

Next morning we continued our journey, pleased with our reception at Slanes Castle, of which we had now leisure to recount the grandeur and the elegance; for our way afforded us few topics of conversation. The ground was neither uncultivated nor unfruitful; but it was still all arable. Of flocks or herds there was no appearance. I had now travelled two hundred miles in Scotland, and seen only one tree not younger than myself.

#### BAMFF.

We dined this day at the house of Mr. Frazer of Streichton, who showed us in his grounds some stones yet standing of a Druidical circle, and what I began to think more worthy of notice, some forest-trees of full growth.

At night we came to Bamff, where I remember nothing that particularly claimed my attention. The ancient towns of Scotland have generally an appearance unusual to Englishmen. The houses, whether great or small, are for the most part built of stones. Their ends are now and then next the streets, and the entrance into them is very often by a flight of steps, which reaches up to the second story; the floor which is level with the ground being entered only by stairs descending within the house.

The art of joining squares of glass with lead is little used in Scotland, and in some places is totally forgotten. The frames of their windows are all of wood. They are more frugal of their glass than the English, and will often, in houses not otherwise mean, compose a square of two pieces, not joining like cracked glass, but with one edge laid perhaps half an inch over the other. Their windows do not move upon hinges, but are pushed up and drawn down in grooves, yet they are seldom accommodated with weights and pulleys. He that would have his window open, must hold it with his hand, unless what may be sometimes found among good contrivers, there be a nail which he may stick into a hole, to keep it from falling.

What cannot be done without some uncommon trouble or particular expedient, will not often be done at all. The incommodiousness of the Scotch windows keeps them very closely shut. The necessity of ventilating human habitations has not yet been found by our northern neighbours; and even in houses well built, and elegantly furnished, a stranger may be sometimes forgiven, if he allows himself to wish for fresher air.

These diminutive observations seem to take away something from the dignity of writing, and therefore are never communicated but with hesitation, and a little fear of abasement and contempt. But it must be remembered, that life consists not of a series of illustrious actions, or elegant enjoyments; the greater part of our time passes in compliance with necessities, in the performance of daily duties, in the removal of small inconveniences, in the procurement of petty pleasures; and we are well or ill at ease, as the main stream of life glides on smoothly, or is ruffled by small obstacles and frequent interruption. The true state of every nation is the state of common life. The manners of a people are not to be found in the schools of learning, or the palaces of greatness, where the national character it obscured or obliterated by travel or instruction, by philosophy or vanity: nor is public happiness to be estimated by the assemblies of the gay, or the banquets of the rich. The great mass of nations is neither rich nor gay; they whose aggregate constitutes the people, are found in the streets and the villages, in the shops and farms; and from them, col-

lectively considered, must the measure of general prosperity be taken. As they approach to delicacy, a nation is refined; as their conveniences are multiplied, a nation, at least a commercial nation, must be denominated wealthy.

## ELGIN.

FINDING nothing to detain us at Bamff, we set out in the morning, and having breakfasted at Cullen, about noon came to Elgin, where, in the inn that we supposed the best, a dinner was set before us which we could not eat. This was the first time, and, except one, the last, that I found any reason to complain of a Scottish table; and such disappointments, I suppose, must be expected in every country, where there is no great frequency of travellers.

The ruin of the cathedral of Elgin afforded us another proof of the waste of reformation. There is enough yet remaining to show, that it was once magnificent. Its whole plot is easily traced. On the north side of the choir, the chapter-house, which is roofed with an arch of stone, remains entire; and on the south side, another mass of building, which we could not enter, is preserved by the care of the family of Gordon; but the body of the church is a mass of fragments.

A paper was here put into our hands, which deduced from sufficient authorities the history of this venerable ruin. The church of Elgin had, in the intestine tumults of the barbarous ages, been laid waste by the irruption of a Highland chief, whom the bishop had offended; but it was gradually restored to the state of which the traces may be now discerned, and was at last not destroyed by the tumultuous violence of Knox, but more shamefully suffered to dilapidate by deliberate robbery and frigid indifference. There is still extant, in the books of the council, an order, of which I cannot remember the date, but which was doubtless issued after the reformation, directing that the lead, which covers the two cathedrals of Elgin and Aberdeen, shall be taken away, and converted into money for the support of the army. A Scotch army was in those times very cheaply kept; yet the lead of two churches must have borne so small a proportion to any military expense, that it is hard not to believe the reason alleged to be merely popular, and the money intended for some private purse. The order, however, was obeyed; the two churches were stripped, and the lead was shipped to be sold in Holland. I hope every reader will rejoice that this cargo of sacrilege was lost at sea.

Let us not, however, make too much haste to despise our neighbours. Our own cathedrals are mouldering by unregarded dilapidation. It seems to be part of the despicable philosophy of the time to despise monuments of sacred mag-

nificence, and we are in danger of doing that deliberately, which the Scots did not do but in the unsettled state of an imperfect constitution.

Those who had once uncovered the cathedrals, never wished to cover them again; and being thus made useless, they were first neglected, and perhaps, as the stone was wanted, afterwards demolished.

Elgin seems a place of little trade, and thinly inhabited. The episcopal cities of Scotland, I believe, generally fell with their churches, though some of them have since recovered by a situation convenient for commerce. Thus Glasgow, though it has no longer an archbishop, has risen beyond its original state by the opulence of its traders; and Aberdeen, though its ancient stock had decayed, flourishes by a new shoot in another place.

In the chief street of Elgin, the houses jut over the lowest story, like the old buildings of timber in London, but with greater prominence; so that there is sometimes a walk for a considerable length under a cloister, or portico, which is now indeed frequently broken, because the new houses have another form, but seems to have been uniformly continued to the old city.

## FORES. CALDER. FORT GEORGE.

We went forwards the same day to Fores, the town to which Macbeth was travelling when he met the weird sisters in his way. This to an Englishman is classic ground. Our imaginations were heated, and our thoughts recalled to their old amusements.

We had now a prelude to the Highlands. We began to leave fertility and culture behind us, and saw for a great length of road nothing but heath; yet at Fochabars, a seat belonging to the duke of Gordon, there is an orchard, which in Scotland I had never seen before, with some timber-trees, and a plantation of oaks.

At Fores we found good accommodation, but nothing worthy of particular remark, and next morning entered upon the road on which Macbeth heard the fatal prediction; but we travelled on, not interrupted by promises of kingdoms, and came to Nairn, a royal burgh, which, if once it flourished, is now in a state of miserable decay; but I know not whether its chief annual magistrate has not still the title of Lord Provost.

At Nairn we may fix the verge of the Highlands; for here I first saw peat fires, and first heard the Erse language. We had no motive to stay longer than to breakfast, and went forward to the house of Mr. Macaulay, the minister, who published an account of St. Kilda, and by his direction visited Calder Castle, from which Macbeth drew his second title. It has been formerly a place of strength. The draw-

bridge is still to be seen, but the moat is now dry. The tower is very ancient. Its walls are of great thickness, arched on the top with stone, and surrounded with battlements. The rest of the house is later, though far from modern.

We were favoured by a gentleman, who lives in the castle, with a letter to one of the officers at Fort George, which being the most regular fortification in the island, well deserves the notice of a traveller, who has never travelled before. We went thither next day, found a very kind reception, were led round the works by a gentleman, who explained the use of every part, and entertained by Sir Eyre Coote, the Governor, with such elegance of conversation, as left us no attention to the delicacies of his table.

Of Fort George I shall not attempt to give any account. I cannot delineate it scientifically, and a loose and popular description is of use only when the imagination is to be amused. There was every where an appearance of the utmost neatness and regularity. But my suffrage is of little value, because this and Fort Augustus are the only garrisons that I ever saw.

We did not regret the time spent at the fort, though in consequence of our delay we came somewhat late to Inverness, the town which may properly be called the capital of the Highlands. Hither the inhabitants of the inland parts come to be supplied with what they cannot make for themselves: hither the young nymphs of the mountains and valleys are sent for education, and, as far as my observation has reached, are not sent in vain.

#### INVERNESS.

INVERNESS was the last place which had a regular communication by high roads with the southern counties. All the ways beyond it have, I believe, been made by the soldiers in this century. At Inverness therefore Cromwell, when he subdued Scotland, stationed a garrison, as at the boundary of the Highlands. The soldiers seem to have incorporated afterwards with the inhabitants, and to have peopled the place with an English race; for the language of this town has been long considered as peculiarly elegant.

Here is a castle, called the castle of Macbeth, the walls of which are yet standing. It was no very capacious edifice, but stands upon a rock so high and steep, that I think it was once not accessible, but by the help of ladders, or a bridge. Over against it, on another hill, was a fort built by Cromwell, now totally demolished; for no faction of Scotland loved the name of Cromwell, or had any desire to continue his memory.

Yet what the Romans did to other nations, was in a great degree done by Cromwell to the

Scots; he civilized them by conquest, and introduced by useful violence the arts of peace. I was told at Aberdeen, that the people learned from Cromwell's soldiers to make shoes and to plant kail.

How they lived without kail, it is not easy to guess; they cultivate hardly any other plant for common tables, and when they had not kail they probably had nothing. The numbers that go barefoot are still sufficient to show that shoes may be spared; they are not yet considered as necessities of life; for tall boys, not otherwise meanly dressed, run without them in the streets; and in the islands the sons of gentlemen pass several of their first years with naked feet.

I know not whether it be not peculiar to the Scots to have attained the liberal, without the manual arts, to have excelled in ornamental knowledge, and to have wanted not only the elegances, but the conveniences of common life. Literature, soon after its revival, found its way to Scotland, and from the middle of the sixteenth century, almost to the middle of the seventeenth, the politer studies were very diligently pursued. The Latin poetry of *Delicia Poëtarum Scotorum* would have done honour to any nation; at least till the publication of May's Supplement, the English had very little to oppose.

Yet men thus ingenious and inquisitive were content to live in total ignorance of the trades by which human want are supplied, and to supply them by the grossest means. Till the Union made them acquainted with English manners, the culture of their lands was unskilful, and their domestic life unformed; their tables were coarse as the feasts of Eskimeaux, and their houses filthy as the cottages of Hot-tentots.

Since they have known that their condition was capable of improvement, their progress in useful knowledge has been rapid and uniform. What remains to be done they will quickly do, and then wonder, like me, why that which was so necessary and so easy was so long delayed. But they must be for ever content to owe to the English that elegance and culture, which, if they had been vigilant and active, perhaps the English might have owed to them.

Here the appearance of life began to alter. I had seen a few women with plaids at Aberdeen; but at Inverness the Highland manners are common. There is, I think, a kirk in which only the Erse language is used. There is likewise an English chapel, but meanly built, where on Sunday we saw a very decent congregation.

We were now to bid farewell to the luxury of travelling, and to enter a country upon which perhaps no wheel has ever rolled. We could indeed have used our postchaise one day longer,

along the military road to Fort Augustus, but we could have hired no horses beyond Inverness, and we were not so sparing of ourselves, as to lead them, merely that we might have one day longer the indulgence of a carriage.

At Inverness therefore we procured three horses for ourselves and a servant, and one more for our baggage, which was no very heavy load. We found in the course of our journey the convenience of having disencumbered ourselves by laying aside whatever we could spare; for it is not to be imagined without experience, how in climbing crags, and treading bogs, and winding through narrow and obstructed passages, a little bulk will hinder, and a little weight will burden; or how often a man that has pleased himself at home with his own resolution, will, in the hour of darkness and fatigue, be content to leave behind him every thing but himself.

#### LOUGH NESS.

WE took two Highlanders to run beside us, partly to show us the way, and partly to take back from the sea-side the horses, of which they were the owners. One of them was a man of great liveliness and activity, of whom his companion said, that he would tire any horse in Inverness. Both of them were civil and ready-handed. Civility seems part of the national character of Highlanders. Every chieftain is a monarch, and politeness, the natural product of royal government, is diffused from the laird through the whole clan. But they are not commonly dexterous: their narrowness of life confines them to a few operations, and they are accustomed to endure little wants more than to remove them.

We mounted our steeds on the twenty-eighth of August, and directed our guides to conduct us to Fort Augustus. It is built at the head of Lough Ness, of which Inverness stands at the outlet. The way between them has been cut by the soldiers, and the greater part of it runs along a rock, levelled with great labour and exactness, near the water-side.

Most of this day's journey was very pleasant. The day, though bright, was not hot; and the appearance of the country, if I had not seen the Peak, would have been wholly new. We went upon a surface so hard and level, that we had little care to hold the bridle, and were therefore at full leisure for contemplation. On the left were high and steep rocks shaded with birch, the hardy native of the north, and covered with fern or heath. On the right the limpid waters of Lough Ness were beating their bank, and waving their surface by a gentle agitation. Beyond them were rocks sometimes covered with verdure, and sometimes towering in horrid nakedness. Now and then we espied a little corn-

field, which served to impress more strongly the general barrenness.

Lough Ness is about twenty-four miles long, and from one mile to two miles broad. It is remarkable that Boethius, in his description of Scotland, gives it twelve miles of breadth. When historians or geographers exhibit false accounts of places far distant, they may be forgiven, because they can tell but what they are told; and that their accounts exceed the truth, may be justly supposed, because most men exaggerate to others, if not to themselves: but Boethius lived at no great distance; if he never saw the lake, he must have been very incurious, and if he had seen it, his veracity yielded to very slight temptations.

Lough Ness, though not twelve miles broad, is a very remarkable diffusion of water without islands. It fills a large hollow between two ridges of high rocks, being supplied partly by the torrents which fall into it on either side, and partly, as is supposed, by springs at the bottom. Its water is remarkably clear and pleasant, and is imagined by the natives to be medicinal. We were told, that it is in some places a hundred and forty fathoms deep, a profundity scarcely credible, and which probably those that relate it have never sounded. Its fish are salmon, trout, and pike.

It was said at Fort Augustus, that Lough Ness is open in the hardest winters, though a lake not far from it is covered with ice. In discussing these exceptions from the course of nature, the first question is whether the fact be justly stated. That which is strange is delightful, and a pleasing error is not willingly detected. Accuracy of narration is not very common, and there are so few rigidly philosophical, as not to represent as perpetual, what is only frequent, or as constant, what is really casual. If it be true that Lough Ness never freezes, it is either sheltered by its high banks from the cold blasts, and exposed only to those winds which have more power to agitate than congeal, or it is kept in perpetual motion by the rush of streams from the rocks that enclose it. Its profundity, though it should be such as is represented, can have little part in this exemption; for though deep wells are not frozen, because their water is secluded from the external air, yet, where a wide surface is exposed to the full influence of a freezing atmosphere, I know not why the depth should keep it open. Natural philosophy is now one of the favourite studies of the Scottish nation, and Lough Ness well deserves to be diligently examined.

The road on which we travelled, and which was itself a source of entertainment, is made along the rock, in the direction of the lough, sometimes by breaking off protuberances, and sometimes by cutting the great mass of stone to

a considerable depth. The fragments are piled in a loose wall on either side, with apertures left at very short spaces, to give a passage to the wintry currents. Part of it is bordered with low trees, from which our guides gathered nuts, and would have had the appearance of an English lane, except that an English lane is almost always dirty. It has been made with great labour, but has this advantage, that it cannot, without equal labour, be broken up.

Within our sight there were goats feeding or playing. The mountains have red deer, but they came not within view; and if what is said of their vigilance and subtlety be true, they have some claim to that palm of wisdom, which the eastern philosopher, whom Alexander interrogated, gave to those beasts which live farthest from men.

Near the way, by the water-side, we espied a cottage. This was the first Highland hut that I had seen; and as our business was with life and manners, we were willing to visit it. To enter a habitation without leave, seems to be not considered here as rudeness or intrusion. The old laws of hospitality still give this license to a stranger.

A hut is constructed with loose stones, ranged for the most part with some tendency to circularity. It must be placed where the wind cannot act upon it with violence, because it has no cement; and where the water will run easily away, because it has no floor but the naked ground. The wall, which is commonly about six feet high, declines from the perpendicular a little inward. Such rafters as can be procured are then raised for a roof, and covered with heath, which makes a strong and warm thatch, kept from flying off by ropes of twisted heath, of which the ends, reaching from the centre of the thatch to the top of the wall, are held firm by the weight of a large stone. No light is admitted but at the entrance, and through a hole in the thatch, which gives vent to the smoke. This hole is not directly over the fire, lest the rain should extinguish it; and the smoke therefore naturally fills the place before it escapes. Such is the general structure of the houses in which one of the nations of this opulent and powerful island has been hitherto content to live. Huts however are not more uniform than palaces; and this which we were inspecting was very far from one of the meanest, for it was divided into several apartments; and its inhabitants possessed such property as a pastoral poet might exalt into riches.

When we entered, we found an old woman boiling goat's flesh in a kettle. She spoke little English, but we had interpreters at hand, and she was willing enough to display her whole system of economy. She has five children, of which none are yet gone from her. The eldest, a boy of thirteen, and her husband, who is eighty

years old, were at work in the wood. Her two next sons were gone to Inverness to buy *meal*, by which oatmeal is always meant. Meal she considered as expensive food, and told us, that in spring, when the goats gave milk, the children could live without it. She is mistress of sixty goats, and I saw many kids in an enclosure at the end of her house. She had also some poultry. By the lake we saw a potato-garden, and a small spot of ground on which stood four shocks, containing each twelve sheaves of barley. She has all this from the labour of their own hands, and for what is necessary to be bought, her kids and her chickens are sent to market.

With the true pastoral hospitality, she asked us to sit down and drink whisky. She is religious, and though the kirk is four miles off, probably eight English miles, she goes thither every Sunday. We gave her a shilling, and she begged snuff; for snuff is the luxury of a Highland cottage.

Soon afterwards we came to the General's Hut, so called because it was the temporary abode of Wade while he superintended the works upon the road. It is now a house of entertainment for passengers, and we found it not ill stocked with provisions.

#### FALL OF FIERS.

TOWARDS evening we crossed, by a bridge, the river which makes the celebrated Fall of Fiers. The country at the bridge strikes the imagination with all the gloom and grandeur of Siberian solitude. The way makes a flection, and the mountains, covered with trees, rise at once on the left hand and in front. We desired our guides to show us the Fall, and dismounting, clambered over very rugged crags, till I began to wish that our curiosity might have been gratified with less trouble and danger. We came at last to a place where we could overlook the river, and saw a channel torn, as it seems, through black piles of stone, by which the stream is obstructed and broken, till it comes to a very steep descent, of such dreadful depth, that we were naturally inclined to turn aside our eyes.

But we visited the place at an unseasonable time, and found it divested of its dignity and terror. Nature never gives every thing at once. A long continuance of dry weather, which made the rest of the way easy and delightful, deprived us of the pleasure expected from the Fall of Fiers. The river having now no water but what the springs supply, showed us only a swift current, clear and shallow, fretting over the asperities of the rocky bottom; and we were left to exercise our thoughts, by endeavouring to conceive the effect of a thousand streams poured from the mountains into one channel, struggling for expansion in a narrow passage, exasperated

by rocks rising in their way, and at last discharging all their violence of waters by a sudden fall through the horrid chasm.

The way now grew less easy, descending by an uneven declivity, but without either dirt or danger. We did not arrive at Fort Augustus till it was late. Mr. Boswell, who, between his father's merit and his own, is sure of reception wherever he comes, sent a servant before to beg admission and entertainment for that night. Mr. Trapaud, the governor, treated us with that courtesy which is so closely connected with the military character. He came out to meet us beyond the gates, and apologized that, at so late an hour, the rules of a garrison suffered him to give us entrance only at the postern.

#### FORT AUGUSTUS.

IN the morning we viewed the fort, which is much less than that of St. George, and is said to be commanded by the neighbouring hills. It was not long ago taken by the Highlanders. But its situation seems well chosen for pleasure, if not for strength; it stands at the head of the lake, and, by a sloop of sixty tons, is supplied from Inverness with great convenience.

We were now to cross the Highlands towards the western coast, and to content ourselves with such accommodations, as a way so little frequented could afford. The journey was not formidable, for it was but of two days, very unequally divided, because the only house where we could be entertained was not farther off than a third of the way. We soon came to a high hill, which we mounted by a military road, cut in traverses, so that, as we went upon a higher stage, we saw the baggage following us below in a contrary direction. To make this way, the rock has been hewn to a level, with labour that might have broken the perseverance of a Roman legion.

The country is totally denuded of its wood, but the stumps both of oaks and firs, which are still found, show that it has been once a forest of large timber. I do not remember that we saw any animals, but we were told that, in the mountains, there are stags, roebucks, goats, and rabbits.

We did not perceive that this tract was possessed by human beings, except that once we saw a corn-field, in which a lady was walking with some gentlemen. Their house was certainly at no great distance, but so situated that we could not descry it.

Passing on through the dreariness of solitude, we found a party of soldiers from the fort, working on the road under the superintendence of a sergeant. We told them how kindly we had been treated at the garrison, and as we were enjoying the benefit of their labours, begged leave to show our gratitude by a small present.

#### ANOCH.

EARLY in the afternoon we came to Anoch, a village in Glenmollison of three huts, one of which is distinguished by a chimney. Here we were to dine and lodge, and were conducted through the first room, that had the chimney, into another lighted by a small glass window. The landlord attended us with great civility, and told us what he could give us to eat and drink. I found some books on a shelf, among which were a volume or more of *Prideaux's Connection*.

This I mentioned as something unexpected, and perceived that I did not please him. I praised the propriety of his language, and was answered that I need not wonder, for he had learned it by grammar.

By subsequent opportunities of observation I found that my host's diction had nothing peculiar. Those Highlanders that can speak English, commonly speak it well, with few of the words, and little of the tone, by which a Scotchman is distinguished. Their language seems to have been learned in the army or the navy, or by some communication with those who could give them good examples of accent and pronunciation. By their Lowland neighbours they would not willingly be taught; for they have long considered them as a mean and degenerate race. These prejudices are wearing fast away; but so much of them still remains, that when I asked a very learned minister in the islands, which they considered as their most savage clans: "*Those*," said he, "*that live next the Lowlands*."

As we came hither early in the day, we had time sufficient to survey the place. The house was built like other huts, of loose stones; but the part in which we dined and slept was lined with turf and wattled with twigs, which kept the earth from falling. Near it was a garden of turnips, and a field of potatoes. It stands in a glen or valley, pleasantly watered by a winding river. But this country, however it may delight the gazer or amuse the naturalist, is of no great advantage to its owners. Our landlord told us of a gentleman who possesses lands eighteen Scotch miles in length, and three in breadth; a space containing at least a hundred square English miles. He has raised his rents, to the danger of depopulating his farms, and he fells his timber, and by exerting every art of augmentation, has obtained a yearly revenue of four hundred pounds, which for a hundred square miles is three halfpence an acre.

Some time after dinner we were surprised by the entrance of a young woman, not inelegant either in mien or dress, who asked us whether we would have tea. We found that she was the daughter of our host, and desired her to make it. Her conversation, like her appear-

ance, was gentle and pleasing. We knew that the girls of the Highlands are all gentlewomen, and treated her with great respect, which she received as customary and due, and was neither elated by it, nor confused, but repaid my civilities without embarrassment, and told me how much I honoured her country by coming to survey it.

She had been at Inverness to gain the common female qualifications, and had, like her father, the English pronunciation. I presented her with a book, which I happened to have about me, and should not be pleased to think that she forgets me.

In the evening the soldiers, whom we had passed on the road, came to spend at our inn the little money that we had given them. They had the true military impatience of coin in their pockets, and had marched at least six miles to find the first place where liquor could be bought. Having never been before in a place so wild and unfrequented, I was glad of their arrival, because I knew that we had made them friends; and to gain still more of their good will, we went to them where they were carousing in the barn, and added something to our former gift. All that we gave was not much, but it detained them in the barn, either merry or quarrelling, the whole night, and in the morning they went back to their work, with great indignation at the bad qualities of whisky.

We had gained so much the favour of our host, that, when we left his house in the morning, he walked by us a great way, and entertained us with conversation both on his own condition, and that of the country. His life seemed to be merely pastoral, except that he differed from some of the ancient Nomades in having a settled dwelling. His wealth consists of one hundred sheep, as many goats, twelve milk-cows, and twenty-eight beeves ready for the drover.

From him we first heard of the general dissatisfaction which is now driving the Highlanders into the other hemisphere; and when I asked him whether they would stay at home, if they were well treated, he answered with indignation, that no man willingly left his native country. Of the farm, which he himself occupied, the rent had, in twenty-five years, been advanced from five to twenty pounds, which he found himself so little able to pay, that he would be glad to try his fortune in some other place. Yet he owned the reasonableness of raising the Highland rents in a certain degree, and declared himself willing to pay ten pounds for the ground which he had formerly had for five.

Our host, having amused us for a time, resigned us to our guides. The journey of this day was long, not that the distance was great, but that the way was difficult. We were now in the bosom of the Highlands, with full leisure

to contemplate the appearance and properties of mountainous regions, such as have been, in many countries, the last shelters of national distress, and are every where the scenes of adventures, stratagems, surprises, and escapes.

Mountainous countries are not passed but with difficulty, not merely from the labour of climbing; for to climb is not always necessary: but because that which is not mountain is commonly bog, through which the way must be picked with caution. Where there are hills, there is much rain, and the torrents pouring down into the intermediate spaces, seldom find so ready an outlet, as not to stagnate, till they have broken the texture of the ground.

Of the hills, which our journey offered to the view on either side, we did not take the height, nor did we see any that astonished us with their loftiness. Towards the summit of one, there was a white spot, which I should have called a naked rock, but the guides, who had better eyes, and were acquainted with the phenomena of the country, declared it to be snow. It had already lasted to the end of August, and was likely to maintain its contest with the sun, till it should be reinforced by winter.

The height of mountains philosophically considered, is properly computed from the surface of the next sea; but as it affects the eye or imagination of the passenger, as it makes either a spectacle or an obstruction, it must be reckoned from the place where the rise begins to make a considerable angle with the plain. In extensive continents the land may, by gradual elevation, attain great height, without any other appearance than that of a plane gently inclined, and if a hill placed upon such raised ground be described, as having its altitude equal to the whole space above the sea, the representation will be fallacious.

These mountains may be properly enough measured from the inland base; for it is not much above the sea. As we advanced at evening towards the western coast, I did not observe the declivity to be greater than is necessary for the discharge of the inland waters.

We passed many rivers and rivulets, which commonly ran with a clear shallow stream over a hard pebbly bottom. These channels, which seem so much wider than the water that they convey would naturally require, are formed by the violence of wintry floods, produced by the accumulation of innumerable streams that fall in rainy weather from the hills, and bursting away with resistless impetuosity, make themselves a passage proportionate to their mass.

Such capricious and temporary waters cannot be expected to produce many fish. The rapidity of the wintry deluge sweeps them away, and the scantiness of the summer stream would hardly sustain them above the ground. This is the reason why, in fording the northern rivers, no

fishes are seen, as in England, wandering in the water.

Of the hills many may be called, with Homer's *Ida*, abundant in springs, but few can deserve the epithet which he bestows upon *Pellon*, by waving their leaves. They exhibit very little variety; being almost wholly covered with dark heath, and even that seems to be checked in its growth. What is not heath is nakedness, a little diversified by now and then a stream rushing down the steep. An eye accustomed to flowery pastures and waving harvests, is astonished and repelled by this wide extent of hopeless sterility. The appearance is that of matter incapable of form or usefulness, dismissed by Nature from her care, and disinherited of her favours, left in its original elemental state, or quickened only with one sullen power of useless vegetation.

It will very readily occur, that this uniformity of barrenness can afford very little amusement to the traveller; that it is easy to sit at home and conceive rocks, and heath, and waterfalls; and that these journeys are useless labours, which neither impregnate the imagination, nor enlarge the understanding. It is true, that of far the greater part of things, we must content ourselves with such knowledge as description may exhibit, or analogy supply; but it is true, likewise, that these ideas are always incomplete, and that, at least, till we have compared them with realities, we do not know them to be just. As we see more, we become possessed of more certainties, and consequently gain more principles of reasoning, and found a wider basis of analogy.

Regions mountainous and wild, thinly inhabited, and little cultivated, make a great part of the earth, and he that has never seen them, must live unacquainted with much of the face of nature, and with one of the great scenes of human existence.

As the day advanced towards noon, we entered a narrow valley not very flowery, but sufficiently verdant. Our guides told us, that the horses could not travel all day without rest or meat, and entreated us to stop here, because no grass would be found in any other place. The request was reasonable, and the argument cogent. We therefore willingly dismounted, and diverted ourselves as the place gave us opportunity.

I sat down on a bank, such as a writer of romance might have delighted to feign. I had, indeed, no trees to whisper over my head, but a clear rivulet streamed at my feet. The day was calm, the air was soft, and all was rudeness, silence, and solitude. Before me, and on either side, were high hills, which, by hindering the eye from ranging, forced the mind to find entertainment for itself. Whether I spent the

hour well I know not; for here I first conceived the thought of this narration.

We were in this place at ease and by choice, and had no evils to suffer or to fear; yet the imaginations excited by the view of an unknown and untravelled wilderness are not such as arise in the artificial solitude of parks and gardens, a flattering notion of self-sufficiency, a placid indulgence of voluntary delusions, a secure expansion of the fancy, or a cool concentration of the mental powers. The phantoms which haunt a desert are want, and misery, and danger; the evils of dereliction rush upon the thoughts; man is made unwillingly acquainted with his own weakness, and meditation shows him only how little he can sustain, and how little he can perform. There were no traces of inhabitants, except perhaps a rude pile of clods called a summer hut, in which a herdsman had rested in the favourable seasons. Whoever had been in the place where I then sat, unprovided with provisions, and ignorant of the country, might, at least before the roads were made, have wandered among the rocks, till he had perished with hardship, before he could have found either food or shelter. Yet what are these hillocks to the ridges of *Taurus*, or these spots of wilderness to the deserts of *America*?

It was not long before we were invited to mount, and continued our journey along the side of a lough, kept full by many streams, which with more or less rapidity and noise crossed the road from the hills on the other hand. These currents, in their diminished state, after several dry months, afford, to one who has always lived in level countries, an unusual and delightful spectacle; but in the rainy season, such as every winter may be expected to bring, must precipitate an impetuous and tremendous flood. I suppose the way by which we went is at this time impassable.

#### GLENSHEALS.

THE lough at last ended in a river broad and shallow like the rest, but that it may be passed when it is deeper, there is a bridge over it. Beyond it is a valley called *Glensheals*, inhabited by the clan of *Macrae*. Here we found a village called *Auknasheals*, consisting of many huts, perhaps twenty, built all of *dry-stone*, that is, stones piled up without mortar.

We had, by the direction of the officers at *Fort Augustus*, taken bread for ourselves, and tobacco for those *Highlanders* who might show us any kindness. We were now at a place where we could obtain milk, but must have wanted bread if we had not brought it. The people of this valley did not appear to know any English, and our guides now became doubly necessary as interpreters. A woman, whose

but was distinguished by greater spaciousness and better architecture, brought out some pails of milk. The villagers gathered about us in considerable numbers, I believe, without any evil intention, but with a very savage wildness of aspect and manner. When our meal was over, Mr. Boswell sliced the bread, and divided it amongst them, as he supposed them never to have tasted a wheaten loaf before. He then gave them little pieces of twisted tobacco, and among the children we distributed a small handful of halfpence, which they received with great eagerness. Yet I have been since told, that the people of that valley are not indigent; and when we mentioned them afterwards as needy and pitiable, a Highland lady let us know, that we might spare our commiseration; for the dame whose milk we drank, had probably more than a dozen milk-cows. She seemed unwilling to take any price, but being pressed to make a demand, at last named a shilling. Honesty is not greater, where elegance is less. One of the by-standers, as we were told afterwards, advised her to ask more, but she said a shilling was enough. We gave her half-a-crown, and I hope got some credit by our behaviour; for the company said, if our interpreters did not flatter us, that they had not seen such a day since the old laird of Macleod passed through their country.

The Macraes, as we heard afterwards in the Hebrides, were originally an indigent and subordinate clan, and having no farms nor stock, were in great numbers servants to the Maclellans, who, in the war of Charles the First, took arms at the call of the heroic Montrose, and were, in one of his battles, almost all destroyed. The women that were left at home, being thus deprived of their husbands, like the Scythian ladies of old, married their servants, and the Macraes became a considerable race.

#### THE HIGHLANDS.

As we continued our journey, we were at leisure to extend our speculations, and to investigate the reason of those peculiarities by which such rugged regions as these before us are generally distinguished.

Mountainous countries commonly contain the original, at least the oldest, race of inhabitants, for they are not easily conquered, because they must be entered by narrow ways, exposed to every power of mischief from those that occupy the heights; and every new ridge is a new fortress, where the defendants have again the same advantages. If the assailants either force the strait, or storm the summit, they gain only so much ground; their enemies are fled to take possession of the next rock, and the pursuers stand at gaze, knowing neither where the ways of escape wind among the steeps, nor where the

bog has firmness to sustain them: besides that, mountaineers have an agility in climbing and descending, distinct from strength or courage, and attainable only by use.

If the war be not soon concluded, the invaders are dislodged by hunger; for in those anxious and toilsome marches, provisions cannot easily be carried, and are never to be found. The wealth of mountains is cattle, which, while the men stand in the passes the women drive away. Such lands at last cannot repay the expense of conquest, and therefore, perhaps, have not been so often invaded by the mere ambition of dominion, as by resentment of robberies and insults, or the desire of enjoying in security the more fruitful provinces.

As mountaineers are long before they are conquered, they are likewise long before they are civilized. Men are softened by intercourse mutually profitable, and instructed by comparing their own notions with those of others. Thus Cæsar found the maritime parts of Britain made less barbarous by their commerce with the Gauls. Into a barren and rough tract no stranger is brought either by the hope of gain or of pleasure. The inhabitants having neither commodities for sale, nor money for purchase, seldom visit more polished places; or if they do visit them, seldom return.

It sometimes happens that by conquest, intermixture or gradual refinement, the cultivated parts of a country change their language. The mountaineers then become a distinct nation, cut off by dissimilitude of speech from conversation with their neighbours. Thus in Biscay, the original Cantabrian, and in Dalecarlia, the old Swedish still subsists. Thus Wales and the Highlands speak the tongue of the first inhabitants of Britain, while the other parts have received first the Saxon, and in some degree afterwards the French, and then formed a third language between them.

That the primitive manners are continued where the primitive language is spoken, no nation will desire me to suppose, for the manners of mountaineers are commonly savage, but they are rather produced by their situation than derived from their ancestors.

Such seems to be the disposition of man, that whatever makes a distinction produces rivalry. England, before other causes of enmity were found, was disturbed for some centuries by the contests of the northern and southern counties; so that at Oxford the peace of study could for a long time be preserved only by choosing annually one of the proctors from each side of the Trent. A tract intersected by many ridges of mountains naturally divides its inhabitants into petty nations, which are made by a thousand causes enemies to each other. Each will exalt its own chiefs, each will boast the valour of its men, or the beauty of its women, and every

claim of superiority irritates competition; injuries will sometimes be done, and be more injuriously defended; retaliation will sometimes be attempted, and the debt exacted with too much interest.

In the Highlands it was a law, that if a robber was sheltered from justice, any man of the same clan might be taken in his place. This was a kind of irregular justice, which, though necessary in savage times, could hardly fail to end in a feud; and a feud once kindled among an idle people, with no variety of pursuits to divert their thoughts, burnt on for ages, either sullenly glowing in secret mischief, or openly blazing into public violence. Of the effects of this violent judicature, there are not wanting memorials. The cave is now to be seen, to which one of the Campbells, who had injured the Macdonalds, retired with a body of his own clan. The Macdonalds required the offender, and being refused, made a fire at the mouth of the cave, by which he and his adherents were suffocated together.

Mountaineers are warlike, because by their feuds and competitions they consider themselves as surrounded with enemies, and are always prepared to repel incursions, or to make them. Like the Greeks in their unpolished state, described by Thucydides, the Highlanders, till lately, went always armed, and carried their weapons to visits, and to church.

Mountaineers are thievish, because they are poor, and having neither manufactures nor commerce, can grow richer only by robbery. They regularly plunder their neighbours, for their neighbours are commonly their enemies; and having lost that reverence for property by which the order of civil life is preserved, soon consider all as enemies whom they do not reckon as friends, and think themselves licensed to invade whatever they are not obliged to protect.

By a strict administration of the laws, since the laws have been introduced into the Highlands, this disposition to thievery is very much repressed. Thirty years ago no herd had ever been conducted through the mountains without paying tribute in the night to some of the clans; but cattle are now driven, and passengers travel, without danger, fear, or molestation.

Among a warlike people, the quality of highest esteem is personal courage, and with the ostentatious display of courage are closely connected promptitude of offence, and quickness of resentment. The Highlanders, before they were disarmed, were so addicted to quarrels, that the boys used to follow any public procession or ceremony, however festive or however solemn, in expectation of the battle, which was sure to happen before the company dispersed.

Mountainous regions are sometimes so remote from the seat of government, and so difficult of

access, that they are very little under the influence of the sovereign, or within the reach of national justice. Law is nothing without power; and the sentence of a distant court could not be easily executed, nor perhaps very safely promulgated, among men, ignorantly proud, and habitually violent, unconnected with the general system, and accustomed to reverence only their own lords. It has therefore been necessary to erect many particular jurisdictions, and commit the punishment of crimes, and the decision of right, to the proprietors of the country who could enforce their own decrees. It immediately appears that such judges will be often ignorant, and often partial; but in the immaturity of political establishments no better expedient could be found. As government advances towards perfection, provincial judicature is perhaps in every empire gradually abolished.

Those who had thus the dispensation of law, were by consequence themselves lawless. Their vassals had no shelter from outrages and oppressions; but were condemned to endure, without resistance, the caprices of wantonness and the rage of cruelty.

In the Highlands, some great lords had an hereditary jurisdiction over counties; and some chieftains over their own lands; till the final conquest of the Highlands afforded an opportunity of crushing all the local courts, and of extending the general benefits of equal law to the low and the high, in the deepest recesses, and obscurest corners.

While the chiefs had this resemblance of royalty, they had little inclination to appeal, on any question, to superior judicatures. A claim of lands between two powerful lairds was decided like a contest for dominion between sovereign powers. They drew their forces into the field, and right attended on the strongest. This was, in ruder times, the common practice, which the kings of Scotland could seldom control.

Even so lately as in the last years of king William a battle was fought at Mull Roy, on a plain a few miles to the south of Inverness, between the clans of Mackintosh and Macdonald of Keppoch. Colonel Macdonald, the head of a small clan, refused to pay the dues demanded from him by Mackintosh, as his superior lord. They disdained the interposition of judges and laws, and calling each his followers to maintain the dignity of the clan, fought a formal battle, in which several considerable men fell on the side of Mackintosh, without a complete victory to either. This is said to have been the last open war made between the clans by their own authority.

The Highland lords made treaties, and formed alliances, of which some traces may still be found, and some consequences still remain as lasting evidences of petty legality. The terms

of one of these confederacies were, that each should support the other in the right, or in the wrong, except against the king.

The inhabitants of mountains form distinct races, and are careful to preserve their genealogies. Men in a small district necessarily mingled blood by intermarriages, and combine at last into one family, with a common interest in the honour and disgrace of every individual. Then begins that union of affections, and co-operation of endeavours, that constitute a clan. They who consider themselves as ennobled by their family, will think highly of their progenitors; and they who through successive generations live always together in the same place, will preserve local stories and hereditary prejudices. Thus every Highlander can talk of his ancestors, and recount the outrages which they suffered from the wicked inhabitants of the next valley.

Such are the effects of habitation among mountains, and such were the qualities of the Highlanders, while their rocks secluded them from the rest of mankind, and kept them an unaltered and discriminated race. They are now losing their distinction, and hastening to mingle with the general community.

#### GLENELG.

We left Auknasheals and the Macraes in the afternoon, and in the evening came to Ratiken, a high hill on which a road is cut, but so steep and narrow that it is very difficult. There is now a design of making another way round the bottom. Upon one of the precipices, my horse, weary with the steepness of the rise, staggered a little, and I called in haste to the Highlander to hold him. This was the only moment of my journey, in which I thought myself endangered.

Having surmounted the hill at last, we were told, that at Glenelg, on the seaside, we should come to a house of lime and slate and glass. This image of magnificence raised our expectation. At last we came to our inn, weary and peevish, and began to inquire for meat and beds.

Of the provisions the negative catalogue was very copious. Here was no meat, no milk, no bread, no eggs, no wine. We did not express much satisfaction. Here, however, we were to stay. Whisky we might have, and I believe at last they caught a fowl and killed it. We had some bread, and with that we prepared ourselves to be contented, when we had a very eminent proof of Highland hospitality. Along some miles of the way, in the evening, a gentleman's servant had kept us company on foot with very little notice on our part. He left us near Glenelg, and we thought on him no more till he came to us again in about two hours, with a present from his master of rum and sugar. The

man had mentioned his company, and the gentleman, whose name I think is Gordon, well knowing the penury of the place, had this attention to two men, whose names perhaps he had not heard, by whom his kindness was not likely to be ever repaid, and who could be recommended to him only by their necessities.

We were now to examine our lodging. Out of one of the beds on which we were to repose, started up, at our entrance, a man black as a Cyclops from the forge. Other circumstances of no elegant recital concurred to disgust us. We had been frightened by a lady at Edinburgh, with discouraging representations of Highland lodgings. Sleep, however, was necessary. Our Highlanders had at last found some hay, with which the inn could not supply them. I directed them to bring a bundle into the room, and slept upon it in my riding coat. Mr. Boswell being more delicate, laid himself sheets with hay over and under him, and lay in linen like a gentleman.

#### SKY. ARMIDEL.

IN the morning, September the twentieth, we found ourselves on the edge of the sea. Having procured a boat, we dismissed our Highlanders, whom I would recommend to the service of any future travellers, and were ferried over to the isle of Sky. We landed at Armidel, where we were met on the sands by Sir Alexander Macdonald, who was at that time there with his lady, preparing to leave the island and reside at Edinburgh.

Armidel is a neat house, built where the Macdonalds had once a seat, which was burnt in the commotions that followed the Revolution. The walled orchard, which belonged to the former house, still remains. It is well shaded by tall ash-trees, of a species, as Mr. James the fossilist informed me, uncommonly valuable. This plantation is very properly mentioned by Dr. Campbell, in his new account of the state of Britain, and deserves attention; because it proves that the present nakedness of the Hebrides is not wholly the fault of nature.

As we sat at Sir Alexander's table, we were entertained, according to the ancient usage of the north, with the melody of the bagpipe. Every thing in those countries has its history. As the bagpiper was playing, an elderly gentleman informed us, that in some remote time, the Macdonalds of Glengary having been injured, or offended, by the inhabitants of Culloden, and resolving to have justice or vengeance, came to Culloden on a Sunday, where, finding their enemies at worship, they shut them up in the church, which they set on fire: and this, said he, is the tune which the piper played while they were burning.

Narrations like this, however uncertain, de-

serve the notice of a traveller, because they are the only records of a nation that has no historians, and afford the most genuine representation of the life and character of the ancient Highlanders.

Under the denomination of Highlander, are comprehended in Scotland all that now speak the Erse language, or retain the primitive manners, whether they live among the mountains or in the islands; and in that sense I use the name, when there is not some apparent reason for making a distinction.

In Sky I first observed the use of brogues, a kind of artless shoes, stitched with thongs so loosely, that though they defend the foot from stones, they do not exclude water. Brogues were formerly made of raw hides, with the hair inwards, and such are perhaps still used in rude and remote parts: but they are said not to last above two days. Where life is somewhat improved, they are now made of leather tanned with oak-bark, as in other places, or with the bark of birch, or roots of tormentil, a substance recommended in defect of bark, about forty years ago, to the Irish tanners, by one to whom the parliament of that kingdom voted a reward. The leather of Sky is not completely penetrated by vegetable matter, and therefore cannot be very durable.

My inquiries about brogues gave me an early specimen of Highland information. One day I was told, that to make brogues was a domestic art, which every man practised for himself, and that a pair of brogues was the work of an hour. I supposed that the husband made brogues as the wife made an apron, till next day it was told me, that a brogue-maker was a trade, and that a pair would cost half-a-crown. It will easily occur that these representations may both be true, and that, in some places, men may buy them, and in others make them for themselves; but I had both the accounts in the same house within two days.

Many of my subsequent inquiries upon more interesting topics ended in the like uncertainty. He that travels in the Highlands may easily saturate his soul with intelligence, if he will acquiesce in the first account. The Highlander gives to every question an answer so prompt and peremptory, that scepticism itself is dared into silence, and the mind sinks before the bold reporter in unresisting credulity; but if a second question be ventured, it breaks the enchantment; for it is immediately discovered, that what was told so confidently was told at hazard, and that such fearlessness of assertion was either the sport of negligence, or the refuge of ignorance.

If individuals are thus at variance with themselves, it can be no wonder that the accounts of different men are contradictory. The traditions of an ignorant and savage people have been for

ages negligently heard, and unskilfully related. Distant events must have been mingled together and the actions of one man given to another. These, however, are deficiencies in story, for which no man is now to be censured. It were enough, if what there is yet opportunity of examining were accurately inspected and justly represented; but such is the laxity of Highland conversation, that the inquirer is kept in continual suspense, and, by a kind of intellectual retrogradation, knows less as he hears more.

In the islands the plaid is rarely worn. The law by which the Highlanders have been obliged to change the form of their dress, has, in all the places that we have visited, been universally obeyed. I have seen only one gentleman completely clothed in the ancient habit, and by him it was worn only occasionally and wantonly. The common people do not think themselves under any legal necessity of having coats; for they say that the law against plaids was made by Lord Hardwicke, and was in force only for his life: but the same poverty that made it then difficult for them to change their clothing, hinders them now from changing it again.

The fillibeg, or lower garment, is still very common, and the bonnet almost universal; but their attire is such as produces, in a sufficient degree, the effect intended by the law, of abolishing the dissimilitude of appearance between the Highlanders and the other inhabitants of Britain; and, if dress be supposed to have much influence, facilitates their coalition with their fellow-subjects.

What we have long used, we naturally like; and therefore the Highlanders were unwilling to lay aside their plaid, which yet to an unprejudiced spectator must appear an inconvenient and cumbersome dress; for hanging loose upon the body, it must flutter in a quick motion, or require one of the hands to keep it close. The Romans always laid aside the gown when they had any thing to do. It was a dress so unsuitable to war, that the same word which signified a gown, signified peace. The chief use of a plaid seems to be this, that they could commodiously wrap themselves in it when they were obliged to sleep without a better cover.

In our passage from Scotland to Sky, we were wet for the first time with a shower. This was the beginning of the Highland winter, after which we were told that a succession of three dry days was not to be expected for many months. The winter of the Hebrides consists of little more than rain and wind. As they are surrounded by an ocean never frozen, the blasts that come to them over the water, are too much softened to have the power of congelation. The salt loughs, or inlets of the sea, which shoot very far into the island, never have any ice upon them, and the pools of fresh water will never bear the walker. The snow that

sometimes falls, is soon dissolved by the air, or the rain.

This is not the description of a cruel climate, yet the dark months are here a time of great distress; because the summer can do little more than feed itself, and winter comes with its cold and its scarcity upon families very slenderly provided.

#### CORIATACHAN IN SKY.

THE third or fourth day after our arrival at Armidel, brought us an invitation to the isle of Raasay, which lies east of Sky. It is incredible how soon the account of any event is propagated in these narrow countries by the love of talk, which much leisure produces, and the relief given to the mind in the penury of insular conversation by a new topic. The arrival of strangers at a place so rarely visited, excites rumour, and quickens curiosity. I know not whether we touched at any corner, where fame had not already prepared us a reception.

To gain a commodious passage to Raasay, it was necessary to pass over a large part of Sky. We were furnished therefore with horses and a guide. In the islands there are no roads, nor any marks by which a stranger may find his way. The horseman has always at his side a native of the place, who, by pursuing game, or tending cattle, or being often employed in messages or conduct, has learned where the ridge of the hill has breadth sufficient to allow a horse and his rider a passage, and where the moss or bog is hard enough to bear them. The bogs are avoided as toilsome at least, if not unsafe, and therefore the journey is made generally from precipice to precipice; from which if the eye ventures to look down, it sees below a gloomy cavity, whence the rush of water is sometimes heard.

But there seems to be in all this more alarm than danger. The Highlander walks carefully before, and the horse accustomed to the ground, follows him with little deviation. Sometimes the hill is too steep for the horseman to keep his seat, and sometimes the moss is too tremulous to bear the double weight of horse and man. The rider then dismounts, and all shift as they can.

Journeys made in this manner are rather tedious than long. A very few miles require several hours. From Armidel we came at night to Coriatachan, a house very pleasantly situated between two brooks, with one of the highest hills of the island behind it. It is the residence of Mr. Mackinnon, by whom we were treated with very liberal hospitality, among a more numerous and elegant company than it could have been supposed easy to collect.

The hill behind the house we did not climb. The weather was rough, and the height and

steepness discouraged us. We were told that there is a cairn upon it. A cairn is a heap of stones thrown upon the grave of one eminent for dignity of birth, or splendour of achievements. It is said, that by digging, an urn is always found under these cairns; they must therefore have been thus piled by a people whose custom was to burn the dead. To pile stones is, I believe, a northern custom, and to burn the body was the Roman practice; nor do I know when it was that these two acts of sepulture were united.

The weather was next day too violent for the continuation of our journey; but we had no reason to complain of the interruption. We saw in every place, what we chiefly desired to know, the manners of the people. We had company, and if we had chosen retirement, we might have had books.

I never was in any house of the islands, where I did not find books in more languages than one, if I staid long enough to want them, except one from which the family was removed. Literature is not neglected by the higher rank of the Hebridians.

It need not, I suppose, be mentioned, that in countries so little frequented as the islands, there are no houses where travellers are entertained for money. He that wanders about these wilds, either procures recommendations to those whose habitations lie near his way, or when night and weariness come upon him, takes the chance of general hospitality. If he finds only a cottage, he can expect little more than shelter; for the cottagers have little more for themselves; but if his good fortune brings him to the residence of a gentleman, he will be glad of a storm to prolong his stay. There is, however, one inn by the sea-side at Sconsor, in Sky, where the post-office is kept.

At the tables where a stranger is received, neither plenty nor delicacy is wanting. A tract of land so thinly inhabited must have much wild fowl; and I scarcely remember to have seen a dinner without them. The moorgame is every where to be had. That the sea abounds with fish, needs not to be told, for it supplies a great part of Europe. The isle of Sky has stags and roebucks, but no hares. They send very numerous droves of oxen yearly to England, and therefore cannot be supposed to want beef at home. Sheep and goats are in great numbers, and they have the common domestic fowls.

But as here is nothing to be bought, every family must kill its own meat, and roast part of it somewhat sooner than Apicius would prescribe. Every kind of flesh is undoubtedly excelled by the variety and emulation of English markets; but that which is not best may be yet very far from bad, and he that shall complain of his fare in the Hebrides, has improved his delicacy more than his manhood.

Their fowls are not like those plumped for sale by the poulterers of London, but they are as good as other places commonly afford, except that the geese, by feeding in the sea, have universally a fishy rankness.

These geese seem to be of a middle race, between the wild and domestic kinds. They are so tame as to own a home, and so wild as sometimes to fly quite away.

Their native bread is made of oats, or barley. Of oatmeal they spread very thin cakes, coarse and hard, to which unaccustomed palates are not easily reconciled. The barley cakes are thicker and softer; I began to eat them without unwillingness; the blackness of their colour raises some dislike, but the taste is not disagreeable. In most houses there is wheat-flour, with which we were sure to be treated if we staid long enough to have it kneaded and baked. As neither yeast nor leaven are used among them, their bread of every kind is unfermented. They make only cakes, and never mould a loaf.

A man of the Hebrides, for of the women's diet I can give no account, as soon as he appears in the morning, swallows a glass of whisky; yet they are not a drunken race, at least I never was present at much intemperance; but no man is so abstemious as to refuse the morning dram, which they call a *shalk*.

The word *whisky* signifies water, and is applied by way of eminence to *strong water*, or distilled liquor. The spirit drunk in the North is drawn from barley. I never tasted it, except once for experiment at the inn in Inverary, when I thought it preferable to any English malt brandy. It was strong, but not pungent, and was free from the empyreumatic taste or smell. What was the process I had no opportunity of inquiring, nor do I wish to improve the art of making poison pleasant.

Not long after the dram, may be expected the breakfast, a meal in which the Scots, whether of the lowlands or mountains, must be confessed to excel us. The tea and coffee are accompanied not only with butter, but with honey, conserves, and marmalades. If an epicure could remove by a wish, in quest of sensual gratifications, wherever he had supped he would breakfast in Scotland.

In the islands, however, they do what I found it not very easy to endure. They pollute the tea-table by plates piled with large slices of Cheshire cheese, which mingles its less grateful odours with the fragrance of the tea.

Where many questions are to be asked, some will be omitted. I forgot to inquire how they were supplied with so much exotic luxury. Perhaps the French may bring them wine for wool, and the Dutch give them tea and coffee at the fishing season, in exchange for fresh provision. Their trade is unconstrained; they pay no customs, for there is no officer to demand

them; whatever, therefore, is made dear only by impost, is obtained here at an easy rate.

A dinner in the Western Islands differs very little from a dinner in England, except that, in the place of tarts, there are always set different preparations of milk. This part of their diet will admit some improvement. Though they have milk, and eggs, and sugar, few of them know how to compound them in a custard. Their gardens afford them no great variety, but they have always some vegetables on the table. Potatoes at least are never wanting, which, though they have not known them long, are now one of the principal parts of their food. They are not of the mealy, but the viscous kind.

Their more elaborate cookery, or made dishes, an Englishman, at the first taste, is not likely to approve, but the culinary compositions of every country are often such as become grateful to other nations only by degrees; though I have read a French author, who, in the elation of his heart, says, that French cookery pleases all foreigners, but foreign cookery never satisfies a Frenchman.

Their suppers are like their dinners, various and plentiful. The table is always covered with elegant linen. Their plates for common use are often of that kind of manufacture which is called cream-coloured, or queen's ware. They use silver on all occasions where it is common in England, nor did I ever find a spoon of horn but in one house.

The knives are not often either very bright, or very sharp. They are indeed instruments of which the Highlanders have not been long acquainted with the general use. They were not regularly laid on the table, before the prohibition of arms, and the change of dress. Thirty years ago the Highlander wore his knife as a companion to his dirk or dagger, and when the company sat down to meat, the men who had knives cut the flesh into small pieces for the women, who with their fingers conveyed it to their mouths.

There was, perhaps, never any change of national manners so quick, so great, and so general, as that which has operated in the Highlands by the last conquest, and the subsequent laws. We came thither too late to see what we expected, a people of peculiar appearance, and a system of antiquated life. The clans retain little now of their original character; their ferocity of temper is softened, their military ardour is extinguished, their dignity of independence is depressed, their contempt of government is subdued, and their reverence for their chiefs abated. Of what they had before the late conquest of their country, there remain only their language and their poverty. Their language is attacked on every side. Schools are erected, in which English only is taught, and

there were lately some who thought it reasonable to refuse them a version of the holy scriptures, that they might have no monument of their mother-tongue.

That their poverty is gradually abated, cannot be mentioned among the unpleasing consequences of subjection. They are now acquainted with money, and the possibility of gain will by degrees make them industrious. Such is the effect of the late regulations, that a longer journey than to the Highlands must be taken by him whose curiosity pants for savage virtues and barbarous grandeur.

#### RAASAY.

At the first intermission of the stormy weather we were informed, that the boat, which was to convey us to Raasay, attended us on the coast. We had from this time our intelligence facilitated, and our conversation enlarged, by the company of Mr. Macqueen, minister of a parish in Sky, whose knowledge and politeness give him a title equally to kindness and respect, and who, from this time, never forsook us till we were preparing to leave Sky, and the adjacent places.

The boat was under the direction of Mr. Malcolm Macleod, a gentleman of Raasay. The water was calm, and the rowers were vigorous; so that our passage was quick and pleasant. When we came near the island, we saw the laird's house, a neat modern fabric, and found Mr. Macleod, the proprietor of the island, with many gentlemen, expecting us on the beach. We had, as at all other places, some difficulty in landing. The crags were irregularly broken, and a false step would have been very mischievous.

It seemed that the rocks might, with no great labour, have been hewn almost into a regular flight of steps; and as there are no other landing places, I considered this rugged ascent as the consequence of a form of life inured to hardships, and therefore not studious of nice accommodations. But I know not whether, for many ages, it was not considered as a part of military policy, to keep the country not easily accessible. The rocks are natural fortifications, and an enemy climbing with difficulty was easily destroyed by those who stood high above him.

Our reception exceeded our expectations. We found nothing but civility, elegance, and plenty. After the usual refreshments, and the usual conversation, the evening came upon us. The carpet was then rolled off the floor; the musician was called, and the whole company was invited to dance, nor did ever fairies trip with greater alacrity. The general air of festivity, which predominated in this place, so far remote from all those regions which the mind

has been used to contemplate as the mansions of pleasure, struck the imagination with a delightful surprise, analogous to that which is felt at an unexpected emersion from darkness into light.

When it was time to sup, the dance ceased, and six and thirty persons sat down to two tables in the same room. After supper the ladies sung Erse songs, to which I listened as an English audience to an Italian opera, delighted with the sound of words which I did not understand.

I inquired the subjects of the songs, and was told of one, that it was a love-song, and of another, that it was a farewell composed by one of the islanders that was going, in this epidemical fury of emigration, to seek his fortune in America. What sentiments would rise, on such an occasion, in the heart of one who had not been taught to lament by precedent, I should gladly have known; but the lady, by whom I sat, thought herself not equal to the work of translating.

Mr. Macleod is the proprietor of the islands of Raasay, Rona, and Fladda, and possesses an extensive district in Sky. The estate has not, during four hundred years, gained or lost a single acre.

One of the old Highland alliances has continued for two hundred years, and is still subsisting between Macleod of Raasay, and Macdonald of Sky, in consequence of which, the survivor always inherits the arms of the deceased; a natural memorial of military friendship. At the death of the late Sir James Macdonald, his sword was delivered to the present laird of Raasay.

The family of Raasay consists of the laird, the lady, three sons, and ten daughters. For the sons there is a tutor in the house, and the lady is said to be very skilful and diligent in the education of her girls. More gentleness of manners, or a more pleasing appearance of domestic society, is not found in the most polished countries.

Raasay is the only inhabited island in Mr. Macleod's possession. Rona and Fladda afford only pasture for cattle, of which one hundred and sixty winter in Rona, under the superintendence of a solitary herdsman.

The length of Raasay is, by computation, fifteen miles, and the breadth two. These countries have never been measured, and the computation by miles is negligent and arbitrary. We observed in travelling, that the nominal and real distance of places had very little relation to each other. Raasay probably contains near a hundred square miles. It affords not much ground, notwithstanding its extent, either for tillage or pasture; for it is rough, rocky, and barren. The cattle often perish by falling from the precipices. It is like the other islands, I

think, generally naked of shade, but it is naked by neglect; for the laird has an orchard, and very large forest trees grow about his house. Like other hilly countries, it has many rivulets. One of the brooks turns a corn-mill, and at least one produces trouts.

In the streams or fresh lakes of the islands, I have never heard of any other fish than trouts and eels. The trouts which I have seen are not large; the colour of their flesh is tinged as in England. Of their eels I can give no account, having never tasted them; for I believe they are not considered as wholesome food.

It is not very easy to fix the principles upon which mankind have agreed to eat some animals, and reject others; and as the principle is not evident, it is not uniform. That which is selected as delicate in one country, is by its neighbours abhorred as loathsome. The Neapolitans lately refused to eat potatoes in a famine. An Englishman is not easily persuaded to dine on snails with an Italian, on frogs with a Frenchman, or on horse-flesh with a Tartar. The vulgar inhabitants of Sky, I know not whether of the other islands, hold not only eels, but pork and bacon, in abhorrence, and accordingly I never saw a hog in the Hebrides, except one at Dunvegan.

Raasay has wild fowl in abundance, but neither deer, hares, nor rabbits. Why it has them not, might be asked, but that of such questions there is no end. Why does any nation want what it might have? Why are not spices transplanted to America? Why does tea continue to be brought from China? Life improves but by slow degrees, and much in every place is yet to do. Attempts have been made to raise roebucks in Raasay, but without effect. The young ones it is extremely difficult to rear, and the old can very seldom be taken alive.

Hares and rabbits might be more easily obtained. That they have few or none of either in Sky, they impute to the ravage of the foxes, and have therefore set, for some years past, a price upon their heads, which, as the number was diminished, has been gradually raised, from three shillings and sixpence to a guinea, a sum so great in this part of the world, that in a short time Sky may be as free from foxes, as England from wolves. The fund for these rewards is a tax of sixpence in the pound, imposed by the farmers on themselves, and said to be paid with great willingness.

The beasts of prey in the islands are foxes, otters, and weasels. The foxes are bigger than those of England; but the otters exceed ours in a far greater proportion. I saw one at Armidel, of a size much beyond that which I supposed them ever to attain; and Mr. Maclean, the heir of Col, a man of middle stature, informed me that he once shot an otter, of which the tail reached the ground, when he held up the head to a level

with his own. I expected the otter to have a foot particularly formed for the art of swimming; but upon examination, I did not find it differing much from that of a spaniel. As he preys in the sea, he does little visible mischief, and is killed only for his fur. White otters are sometimes seen.

In Raasay they might have hares and rabbits, for they have no foxes. Some depredations, such as were never made before, have caused a suspicion that a fox has been lately landed in the island by spite or wantonness. This imaginary stranger has never yet been seen, and therefore, perhaps, the mischief was done by some other animal. It is not likely that a creature so ungentele, whose head could have been sold in Sky for a guinea, should be kept alive only to gratify the malice of sending him to prey upon a neighbour: and the passage from Sky is wider than a fox would venture to swim, unless he were chased by dogs into the sea, and perhaps then his strength would enable him to cross. How beasts of prey came into any islands, is not easy to guess. In cold countries they take advantage of hard winters, and travel over the ice; but this is a very scanty solution; for they are found where they have no discoverable means of coming.

The corn of this island is but little. I saw the harvest of a small field. The women reaped the corn, and the men bound up the sheaves. The strokes of the sickle were timed by the modulation of the harvest-song, in which all their voices were united. They accompany in the Highlands every action, which can be done in equal time, with an appropriated strain, which has, they say, not much meaning; but its effects are regularity and cheerfulness. The ancient proceleusmatic song, by which the rowers of galleys were animated, may be supposed to have been of this kind. There is now an oar-song used by the Hebridians.

The ground of Raasay seems fitter for cattle than for corn, and of black cattle I suppose the number is very great. The laird himself keeps a herd of four hundred, one hundred of which are annually sold. Of an extensive domain, which he holds in his own hands, he considers the sale of cattle as repaying him the rent, and supports the plenty of a very liberal table with the remaining product.

Raasay is supposed to have been very long inhabited. On one side of it they show caves into which the rude nations of the first ages retreated from the weather. These dreary vaults might have had other uses. These are still a cavity near the house called the oar-cave, in which the seamen, after one of those piratical expeditions which in rougher times was very frequent, used, as tradition tells, to hide their oars. This hollow was near the sea, that nothing so necessary might be far to be fetched;

and it was secret, that enemies, if they landed, could find nothing. Yet it is not very evident of what use it was to hide their oars from those, who, if they were masters of the coast, could take away their boats.

A proof much stronger of the distance at which the first possessors of this island lived from the present time, is afforded by the stone heads of arrows, which are very frequently picked up. The people call them elf-bolts, and believe that the fairies shoot them at the cattle. They nearly resemble those which Mr. Banks has lately brought from the savage countries in the Pacific Ocean, and must have been made by a nation to which the use of metals was unknown.

The number of this little community has never been counted by its ruler, nor have I obtained any positive account, consistent with the result of political computation. Not many years ago, the late laird led out one hundred men upon a military expedition. The sixth part of a people is supposed capable of bearing arms: Raasay had therefore six hundred inhabitants. But because it is not likely that every man able to serve in the field would follow the summons, or that the chief would leave his lands totally defenceless, or take away all the hands qualified for labour, let it be supposed, that half as many might be permitted to stay at home. The whole number then will be nine hundred, or nine to a square mile; a degree of populousness greater than those tracts of desolation can often show. They are content with their country, and faithful to their chiefs, and yet uninfected with the fever of migration.

Near the house at Raasay is a chapel unroofed and ruinous, which has long been used only as a place of burial. About the churches in the islands are small squares enclosed with stone, which belong to particular families, as repositories for the dead. At Raasay there is one, I think, for the proprietor, and one for some collateral house.

It is told by Martin, that at the death of the lady of the island, it has been here the custom to erect a cross. This we found not to be true. The stones that stand about the chapel at a small distance, some of which, perhaps, have crosses cut upon them, are believed to have been not funeral monuments, but the ancient boundaries of the sanctuary or consecrated ground.

Martin was a man not illiterate: he was an inhabitant of Sky, and therefore was within reach of intelligence, and with no great difficulty might have visited the places which he undertakes to describe; yet with all his opportunities, he has often suffered himself to be deceived. He lived in the last century, when the chiefs of the clans had lost little of their original influence. The mountains were yet

unpenetrated, no inlet was opened to foreign novelties, and the feudal institutions operated upon life with their full force. He might therefore have displayed a series of subordination and a form of government, which in more luminous and improved regions, have been long forgotten, and have delighted his readers with many uncouth customs that are now disused, and wild opinions that prevail no longer. But he probably had not knowledge of the world sufficient to qualify him for judging what would deserve or gain the attention of mankind. The mode of life which was familiar to himself, he did not suppose unknown to others, nor imagine that he could give pleasure by telling that, of which it was, in his little country, impossible to be ignorant.

What he has neglected, cannot now be performed. In nations, where there is hardly the use of letters, what is once out of sight is lost for ever. They think but little, and of their few thoughts, none are wasted on the past, in which they are neither interested by fear nor hope. Their only registers are stated observances and practical representations. For this reason an age of ignorance is an age of ceremony. Pageants, and processions, and commemorations, gradually shrink away, as better methods come into use of recording events, and preserving rights.

It is not only in Raasay that the chapel is unroofed and useless; through the few islands which we visited we neither saw nor heard of any house of prayer, except in Sky, that was not in ruins. The malignant influence of Calvinism has blasted ceremony and decency together; and if the remembrance of papal superstition is obliterated, the monuments of papal piety are likewise effaced.

It has been, for many years, popular to talk of the lazy devotion of the Romish Clergy; over the sleepy laziness of men that erected churches, we may indulge our superiority with a new triumph, by comparing it with the fervid activity of those who suffer them to fall.

Of the destruction of churches, the decay of religion must in time be the consequence; for while the public acts of the ministry are now performed in houses, a very small number can be present; and as the greater part of the islanders make no use of books, all must necessarily live in total ignorance who want the opportunity of vocal instruction.

From these remains of ancient sanctity, which are every where to be found, it has been conjectured that, for the last two centuries, the inhabitants of the islands have decreased in number. This argument, which supposes that the churches have been suffered to fall, only because they were no longer necessary, would have some force, if the houses of worship still remaining were sufficient for the people. But since they have

now no churches at all, these venerable fragments do not prove the people of former times to have been more numerous, but to have been more devout. If the inhabitants were doubled, with their present principles, it appears not that any provision for public worship would be made. Where the religion of a country enforces consecrated buildings, the number of those buildings may be supposed to afford some indication, however uncertain, of the populousness of the place; but where by a change of manners a nation is contented to live without them, their decay implies no diminution of inhabitants.

Some of these dilapidations are said to be found in islands now uninhabited: but I doubt whether we can thence infer that they were ever peopled. The religion of the middle age is well known to have placed too much hope in lonely austerities. Voluntary solitude was the great art of propitiation, by which crimes were effaced, and conscience was appeased: it is therefore not unlikely, that oratories were often built in places where retirement was sure to have no disturbance.

Raasay has little that can detain a traveller, except the laird and his family; but their power wants no auxiliaries. Such a seat of hospitality, amidst the winds and waters, fills the imagination with a delightful contrariety of images. Without is the rough ocean and the rocky land, the beating billows and the howling storm: within is plenty and elegance, beauty and gayety, the song and the dance. In Raasay, if I could have found an Ulysses, I had fancied a Phæacia.

#### DUNVEGAN.

At Raasay, by good fortune, Macleod, so the chief of the clan is called, was paying a visit, and by him we were invited to his seat at Dunvegan. Raasay has a stout boat, built in Norway, in which, with six oars, he conveyed us back to Sky. We landed at Port Re, so called because James the Fifth of Scotland, who had curiosity to visit the islands, came into it. The port is made by an inlet of the sea, deep and narrow, where a ship lay waiting to dispeople Sky, by carrying the natives away to America.

In coasting Sky, we passed by the cavern in which it was the custom, as Martin relates, to catch birds in the night, by making a fire at the entrance. This practice is disused; for the birds, as is known often to happen, have changed their haunts.

Here we dined at a public house, I believe the only inn of the island, and having mounted our horses, travelled in the manner already described, till we came to Kingsborough, a place distinguished by that name, because the king lodged here when he landed at Port Re. We were entertained with the usual hospitality by Mr. Macdonald, and his lady Flora Macdonald,

a name that will be mentioned in history, and if courage and fidelity be virtues, mentioned with honour. She is a woman of middle stature, soft features, gentle manners, and elegant presence.

In the morning we sent our horses round a promontory to meet us, and spared ourselves part of the day's fatigue, by crossing an arm of the sea. We had at last some difficulty in coming to Dunvegan: for our way led over an extensive moor, where every step was to be taken with caution, and we were often obliged to alight because the ground could not be trusted. In travelling this watery flat, I perceived that it had a visible declivity, and might without much expense or difficulty be drained. But difficulty and expense are relative terms, which have different meanings in different places.

To Dunvegan we came, very willing to be at rest, and found our fatigue amply recompensed by our reception. Lady Macleod, who had lived many years in England, was newly come hither with her son and four daughters, who knew all the arts of southern elegance, and all the modes of English economy. Here therefore we settled, and did not spoil the present hour with thoughts of departure.

Dunvegan is a rocky prominence, that juts out into a bay, on the west side of Sky. The house, which is the principal seat of Macleod, is partly old and partly modern; it is built upon the rock, and looks upon the water. It forms two sides of a small square: on the third side is the skeleton of a castle of unknown antiquity, supposed to have been a Norwegian fortress, when the Danes were masters of the islands. It is so nearly entire, that it might have easily been made habitable, were there not an ominous tradition in the family, that the owner shall not long outlive the reparation. The grandfather of the present laird, in defiance of prediction, began the work, but desisted in a little time, and applied his money to worse uses.

As the inhabitants of the Hebrides lived, for many ages, in continual expectation of hostilities, the chief of every clan resided in a fortress. This house was accessible only from the water, till the last possessor opened an entrance by stairs upon the land.

They had formerly reason to be afraid, not only of declared wars and authorised invaders, or of roving pirates, which in the northern seas must have been very common; but of inroads and insults from rival clans, who, in the plenitude of feudal independence, asked no leave of their sovereign to make war on one another. Sky has been ravaged by a feud between the two mighty powers of Macdonald and Macleod. Macdonald having married a Macleod, upon some discontent dismissed her, perhaps because she had brought him no children. Before the reign of James the Fifth, a Highland laird made a trial of his wife for a certain time, and if she did not

please him, he was then at liberty to send her away. This however must always have offended, and Macleod resenting the injury, whatever were its circumstances, declared, that the wedding had been solemnized without a bonfire, but that the separation should be better illuminated; and raising a little army, set fire to the territories of Macdonald, who returned a visit, and prevailed.

Another story may show the disorderly state of insular neighbourhood. The inhabitants of the isle of Egg, meeting a boat manned by Macleods, tied the crew hand and foot, and set them adrift. Macleod landed upon Egg, and demanded the offenders; but the inhabitants refusing to surrender them, retreated to a cavern, into which they thought their enemies unlikely to follow them. Macleod choked them with smoke, and left them lying dead by families as they stood.

Here the violence of the weather confined us for some time, not at all to our discontent or inconvenience. We would indeed very willingly have visited the islands, which might be seen from the house, scattered in the sea, and I was particularly desirous to have viewed Isay; but the storms did not permit us to launch a boat, and we were condemned to listen in idleness to the wind, except when we were better engaged by listening to the ladies.

We had here more wind than waves, and suffered the severity of a tempest, without enjoying its magnificence. The sea being broken by the multitude of islands, does not roar with so much noise, nor beat the storm with such foamy violence, as I have remarked on the coast of Sussex. Though, while I was in the Hebrides, the wind was extremely turbulent, I never saw very high billows.

The country about Dunvegan is rough and barren. There are no trees except in the orchard, which is a low sheltered spot surrounded with a wall.

When this house was intended to sustain a siege, a well was made in the court, by boring the rock downwards, till water was found, which though so near to the sea, I have not heard mentioned as brackish, though it has some hardness, or other qualities, which make it less fit for use; and the family is now better supplied from a stream, which runs by the rock, from two pleasing waterfalls.

Here we saw some traces of former manners, and heard some standing traditions. In the house is kept an ox's horn, hollowed so as to hold perhaps two quarts, which the heir of Macleod was expected to swallow at one draught, as a test of his manhood, before he was permitted to bear arms, or could claim a seat among the men. It is held that the return of the laird to Dunvegan, after any considerable absence, produces a plentiful capture of herrings; and that, if any

woman crosses the water to the opposite island, the herrings will desert the coast. Boetius tells the same of some other place. This tradition is not uniform. Some hold that no woman may pass, and others that none may pass but a Macleod.

Among other guests which the hospitality of Dunvegan brought to the table, a visit was paid by the laird and lady of a small island south of Sky, of which the proper name is Muack, which signifies swine. It is commonly called Muck, which the proprietor not liking, has endeavoured, without effect, to change to Monk. It is usual to call gentlemen in Scotland by the name of their possessions, as Raasay, Bernera, Loch Buy, a practice necessary in countries inhabited by clans, where all that live in the same territory have one name, and must be therefore discriminated by some addition. This gentleman, whose name, I think, is Maclean, should be regularly called Muck; but the appellation, which he thinks too coarse for his island, he would like still less for himself, and he is therefore addressed by the title of Isle of Muck.

This little island, however it be named, is of considerable value. It is two English miles long, and three quarters of a mile broad, and consequently contains only nine hundred and sixty English acres. It is chiefly arable. Half of this little dominion the laird retains in his own hand, and on the other half, live one hundred and sixty persons, who pay their rent by exported corn. What rent they pay, we were not told, and could not decently inquire. The proportion of the people to the land is such, as the most fertile countries do not commonly maintain.

The laird having all his people under his immediate view, seems to be very attentive to their happiness. The devastation of the small-pox, when it visits places where it comes seldom, is well known. He has disarmed it of its terror at Muack, by inoculating eighty of his people. The expense was two shillings and sixpence ahead. Many trades they cannot have among them, but upon occasion, he fetches a smith from the isle of Egg, and has a tailor from the main land, six times a-year. This island well deserved to be seen, but the laird's absence left us no opportunity.

Every inhabited island has its appendant and subordinate islets. Muck, however small, has yet others smaller about it, one of which has only ground sufficient to afford pasture for three wethers.

At Dunvegan I had tasted lotus, and was in danger of forgetting that I was ever to depart, till Mr. Boswell sagely reproached me with my sluggishness and softness. I had no very forcible defence to make; and we agreed to pursue our journey. Macleod accompanied us to Ulinish, where we were entertained by the sheriff of the island.

ULINISH.

Mr. MACQUEEN travelled with us, and directed our attention to all that was worthy of observation. With him we went to see an ancient building, called a dun or borough. It was a circular enclosure, about forty-two feet in diameter, walled round with loose stones, perhaps to the height of nine feet. The walls are very thick, diminishing a little towards the top, and though in these countries stone is not brought far, must have been raised with much labour. Within the great circle were several smaller rounds of wall, which formed distinct apartments. Its date and its use are unknown. Some suppose it the original seat of the chiefs of the Macleods. Mr. Macqueen thought it a Danish fort.

The entrance is covered with flat stones, and is narrow, because it was necessary that the stones which lie over it, should reach from one wall to the other; yet, strait as the passage is, they seem heavier than could have been placed where they now lie, by the naked strength of as many men as might stand about them. They were probably raised by putting long pieces of wood under them, to which the action of a long line of lifters might be applied. Savages, in all countries, have patience proportionate to their unskilfulness, and are content to attain their end by very tedious methods.

If it was ever roofed, it might once have been a dwelling, but as there is no provision for water, it could not have been a fortress. In Sky, as in every other place, there is an ambition of exalting whatever has survived memory, to some important use, and referring it to very remote ages. I am inclined to suspect that in lawless times, when the inhabitants of every mountain stole the cattle of their neighbour, these enclosures were used to secure the herds and flocks in the night. When they were driven within the wall, they might be easily watched, and defended as long as could be needful; for the robbers durst not wait till the injured clan should find them in the morning.

The interior enclosures, if the whole building were once a house, were the chambers of the chief inhabitants. If it was a place of security for cattle, they were probably the shelters of the keepers.

From the Dun we were conducted to another place of security, a cave carried a great way under ground, which had been discovered by digging after a fox. These caves, of which many have been found, and many probably remain concealed, are formed, I believe, commonly by taking advantage of a hollow, where banks or rocks rise on either side. If no such place can be found, the ground must be cut away. The walls are made by piling stones against the earth, on either side. It is then

roofed by large stones laid across the cavern, which therefore cannot be wide. Over the roof, turfs were placed, and grass was suffered to grow; and the mouth was concealed by bushes, or some other cover.

These caves were represented to us as the cabins of the first rude inhabitants, of which, however, I am by no means persuaded. This was so low, that no man could stand upright in it. By their construction they are all so narrow, that two can never pass along them together, and being subterraneous, they must be always damp. They are not the work of an age much ruder than the present; for they are formed with as much art as the construction of a common hut requires. I imagine them to have been places only of occasional use, in which the islander, upon a sudden alarm, hid his utensils or his clothes, and perhaps sometimes his wife and children.

This cave we entered, but could not proceed the whole length, and went away without knowing how far it was carried. For this omission we shall be blamed, as we perhaps have blamed other travellers; but the day was rainy, and the ground was damp. We had with us neither spades nor pickaxes, and if love of ease surmounted our desire of knowledge, the offence has not the invidiousness of singularity.

Edifices, either standing or ruined, are the chief records of an illiterate nation. In some part of this journey, at no great distance from our way, stood a shattered fortress, of which the learned minister, to whose communication we are much indebted, gave us an account.

Those, said he, are the walls of a place of refuge, built in the time of James the Sixth, by Hugh Macdonald, who was next heir to the dignity and fortune of his chief. Hugh, being so near his wish, was impatient of delay; and had art and influence sufficient to engage several gentlemen in a plot against the laird's life. Something must be stipulated on both sides; for they would not dip their hands in blood merely for Hugh's advancement. The compact was formally written, signed by the conspirators, and placed in the hands of one Macleod.

It happened that Macleod had sold some cattle to a drover, who, not having ready money, gave him a bond for payment. The debt was discharged, and the bond redemanded; which Macleod, who could not read, intending to put into his hands, gave him the conspiracy. The drover, when he had read the paper, delivered it privately to Macdonald, who being thus informed of his danger, called his friends together, and provided for his safety. He made a public feast, and inviting Hugh Macdonald and his confederates, placed each of them at the table between two men of known fidelity. The compact of conspiracy was then shown, and every man confronted with his own name. Macdonald

acted with great moderation. He upbraided Hugh both with disloyalty and ingratitude; but told the rest, that he considered them as men deluded and misinformed. Hugh was sworn to fidelity, and dismissed with his companions; but he was not generous enough to be reclaimed by lenity; and finding no longer any countenance among the gentlemen, endeavoured to execute the same design by meaner hands. In this practice he was detected, taken to Macdonald's castle, and imprisoned in the dungeon. When he was hungry, they let down a plentiful meal of salted meat; and when, after his repast, he called for drink, conveyed to him a covered cup, which, when he lifted the lid, he found empty. From that time they visited him no more, but left him to perish in solitude and darkness.

We were then told of a cavern by the seaside, remarkable for the powerful reverberation of sounds. After dinner we took a boat, to explore this curious cavity. The boatmen, who seemed to be of a rank above that of common drudges, inquired who the strangers were; and being told we came one from Scotland, and the other from England, asked if the Englishman could recount a long genealogy. What answer was given them, the conversation being in Erse, I was not much inclined to examine.

They expected no good event of the voyage; for one of them declared that he heard the cry of an English ghost. This omen I was not told till after our return, and therefore cannot claim the dignity of despising it.

The sea was smooth. We never left the shore, and came without any disaster to the cavern, which we found rugged and misshapen, about one hundred and eighty feet long, thirty wide in the broadest part, and in the loftiest, as we guessed, about thirty high. It was now dry, but at high water the sea rises in it near six feet. Here I saw what I had never seen before, limpets and muscles in their natural state. But as a new testimony to the veracity of common fame, here was no echo to be heard.

We then walked through a natural arch in the rock, which might have pleased us by its novelty, had the stones, which encumbered our feet, given us leisure to consider it. We were shown the gummy seed of the kelp, that fastens itself to a stone, from which it grows into a strong stalk.

In our return, we found a little boy upon the point of a rock, catching with his angle a supper for the family. We rowed up to him, and borrowed his rod, with which Mr. Boswell caught a cuddy.

The cuddy is a fish of which I know not the philosophical name. It is not much bigger than a gudgeon, but it is of great use in these islands, as it affords the lower people both food and oil

for their lamps. Cuddies are so abundant, at some times of the year, that they are caught like white bait in the Thames, only by dipping a basket and drawing it back.

If it were always practicable to fish, these islands could never be in much danger from famine: but unhappily, in the winter, when other provision fails, the seas are commonly too rough for nets, or boats.

#### TALISKER IN SKY.

FROM Ulinish our next stage was to Talisker, the house of colonel Macleod, an officer in the Dutch service, who in this time of universal peace, has for several years been permitted to be absent from his regiment. Having been bred to physic, he is consequently a scholar, and his lady, by accompanying him in his different places of residence, is become skilful in several languages. Talisker is the place beyond all that I have seen, from which the gay and the jovial seem utterly excluded; and where the hermit might expect to grow old in meditation, without possibility of disturbance or interruption. It is situated very near the sea, but upon a coast where no vessel lands but when it is driven by a tempest on the rocks. Towards the land are lofty hills streaming with waterfalls. The garden is sheltered by firs, or pines, which grow there so prosperously, that some which the present inhabitant planted, are very high and thick.

At this place we very happily met with Mr. Donald Maclean, a young gentleman, the eldest son of the laird of Col, heir to a very great extent of land, and so desirous of improving his inheritance, that he spent a considerable time among the farmers of Hertfordshire and Hampshire, to learn their practice. He worked with his own hands at the principal operations of agriculture, that he might not deceive himself by a false opinion of skill, which if he should find it deficient at home, he had no means of completing. If the world has agreed to praise the travels and manual labours of the czar of Muscovy, let Col have his share of the like applause, in the proportion of his dominions to the empire of Russia.

This young gentleman was sporting in the mountains of Sky, and when he was weary with following his game, repaired for lodging to Talisker. At night he missed one of his dogs, and when he went to seek him in the morning, found two eagles feeding on his carcass.

Col, for he must be named by his possessions, hearing that our intention was to visit Iona, offered to conduct us to his chief, Sir Allan Maclean, who lived in the isle of Inch Kenneth, and would readily find us a convenient passage. From this time was formed an acquaintance, which being begun by kindness, was accident-

ally continued by constraint; we derived much pleasure from it, and I hope have given him no reason to repent it.

The weather was now almost one continued storm, and we were to snatch some happy intermission to be conveyed to Mull, the third island of the Hebrides, lying about a degree south of Sky, whence we might easily find our way to Inch Kenneth, where Sir Allan Maclean resided, and afterward to Iona.

For this purpose the most commodious station that we could take was Armidel, which Sir Alexander Macdonald had now left to a gentleman who lived there as his factor or steward.

In our way to Armidel was Coriatachan, where we had already been, and to which therefore we were very willing to return. We staid however so long at Talisker, that a great part of our journey was performed in the gloom of the evening. In travelling even thus almost without light through naked solitude, when there is a guide whose conduct may be trusted, a mind not naturally too much disposed to fear, may preserve some degree of cheerfulness; but what must be the solicitude of him who should be wandering, among the crags and hollows, benighted, ignorant, and alone?

The fictions of the Gothic romances were not so remote from credibility as they are now thought. In the full prevalence of the feudal institution, when violence desolated the world, and every baron lived in a fortress, forests and castles were regularly succeeded by each other, and the adventurer might very suddenly pass from the gloom of woods, or the ruggedness of moors, to seats of plenty, gayety, and magnificence. Whatever is imaged in the wildest tale, if giants, dragons, and enchantment be excepted, would be felt by him, who, wandering in the mountains without a guide, or upon the sea without a pilot, should be carried, amidst his terror and uncertainty, to the hospitality and elegance of Raasay or Dunvegan.

To Coriatachan at last we came, and found ourselves welcomed as before. Here we staid two days, and made such inquiries as curiosity suggested. The house was filled with company, among whom Mr. Macpherson and his sister distinguished themselves by their politeness and accomplishments. By him we were invited to Ostig, a house not far from Armidel, where we might easily hear of a boat, when the weather would suffer us to leave the island.

#### OSTIG IN SKY.

At Ostig, of which Mr. Macpherson is minister, we were entertained for some days, then removed to Armidel, where we finished our observations on the island of Sky.

As this island lies in the fifty-seventh degree, the air cannot be supposed to have much warmth.

The long continuance of the sun above the horizon, does indeed sometimes produce great heat in northern latitudes; but this can only happen in sheltered places, where the atmosphere is to a certain degree stagnant, and the same mass of air continues to receive for many hours the rays of the sun, and the vapours of the earth. Sky lies open on the west and north to a vast extent of ocean, and is cooled in the summer by a perpetual ventilation, but by the same blast is kept warm in winter. Their weather is not pleasing. Half the year is deluged with rain. From the autumnal to the vernal equinox, a dry day is hardly known, except when the showers are suspended by a tempest. Under such skies can be expected no great exuberance of vegetation. Their winter overtakes their summer, and their harvest lies upon the ground drenched with rain. The autumn struggles hard to produce some of our early fruits. I gathered gooseberries in September; but they were small, and the husk was thick.

The winter is seldom such as puts a full stop to the growth of plants, or reduces the cattle to live wholly on the surplusage of the summer. In the year seventy-one they had a severe season, remembered by the name of the Black Spring, from which the island has not yet recovered. The snow lay long upon the ground, a calamity hardly known before. Part of their cattle died for want, part were unseasonably sold to buy sustenance for the owners; and, what I have not read or heard of before, the kine that survived were so emaciated and dispirited, that they did not require the male at the usual time. Many of the roebucks perished.

The soil, as in other countries, has its diversities. In some parts there is only a thin layer of earth spread upon a rock, which bears nothing but short brown heath, and perhaps is not generally capable of any better product. There are many bogs or mosses of greater or less extent, where the soil cannot be supposed to want depth, though it is too wet for the plough. But we did not observe in these any aquatic plants. The valleys and the mountains are alike darkened with heath. Some grass, however, grows here and there, and some happier spots of earth are capable of tillage.

Their agriculture is laborious, and perhaps rather feeble than unskilful. Their chief manure is seaweed, which, when they lay it to rot upon the field, gives them a better crop than those of the Highlands. They heap sea-shells upon the dunghill, which in time moulder into a fertilizing substance. When they find a vein of earth where they cannot use it, they dig it up, and add it to the mould of a more commodious place.

Their corn grounds often lie in such intricacies among the crags, that there is no room for the action of a team and plough. The soil

is then turned up by manual labour, with an instrument called a crooked spade, of a form and weight which to me appeared very inconvenient, and would perhaps be soon improved in a country where workmen could be easily found and easily paid. It has a narrow blade of iron fixed to a long and heavy piece of wood, which must have, about a foot and a half above the iron, a knee or flexure with the angle downwards. When the farmer encounters a stone, which is the great impediment of his operations, he drives the blade under it, and bringing the knee or angle to the ground, has in the long handle a very forcible lever.

According to the different mode of tillage, farms are distinguished into *long land* and *short land*. Long land is that which affords room for a plough, and short land is turned up by the spade.

The grain which they commit to the furrows thus tediously formed, is either oats or barley. They do not sow barley without very copious manure, and then they expect from it ten for one, an increase equal to that of better countries; but the culture is so onerous that they content themselves commonly with oats; and who can relate without compassion, that after all their diligence, they are to expect only a triple increase? It is in vain to hope for plenty, when a third part of the harvest must be reserved for seed.

When their grain is arrived at a state which they must consider as ripeness, they do not cut, but pull, the barley: to the oats they apply the sickle. Wheel carriages they have none, but make a frame of timber which is drawn by one horse, with the two points behind pressing on the ground. On this they sometimes drag home their sheaves, but often convey them home in a kind of open pannier, or frame of sticks, upon the horse's back.

Of that which is obtained with so much difficulty, nothing surely ought to be wasted; yet their method of clearing their oats from the husk is by parching them in the straw. Thus with the genuine improvidence of savages, they destroy that fodder for want of which their cattle may perish. From this practice they have two petty conveniences; they dry the grain so that it is easily reduced to meal, and they escape the theft of the thrasher. The taste contracted from the fire by the oats, as by every other scorched substance, use must long ago have made grateful. The oats that are not parched must be dried in a kiln.

The barns of Sky I never saw. That which Macleod of Raasay had erected near his house was so contrived, because the harvest is seldom brought home dry, as by perpetual perfilation to prevent the mow from heating.

Of their gardens I can judge only from their tables. I did not observe that the common

greens were wanting, and suppose, that by choosing an advantageous exposition, they can raise all the more hardy esculent plants. Of vegetable fragrance or beauty they are not yet studious. Few vows are made to Flora in the Hebrides.

They gather a little hay, but the grass is mown late; and is so often almost dry, and again very wet, before it is housed, that it becomes a collection of withered stalks without taste or fragrance; it must be eaten by cattle that have nothing else, but by most English farmers would be thrown away.

In the islands I have not heard that any subterraneous treasures have been discovered, though where there are mountains, there are commonly minerals. One of the rocks in Col has a black vein, imagined to consist of the ore of lead; but it was never yet opened or essayed. In Sky a black mass was accidentally picked up, and brought into the house of the owner of the land, who found himself strongly inclined to think it a coal, but unhappily it did not burn in the chimney. Common ores would be here of no great value; for what requires to be separated by fire, must if it were found, be carried away in its mineral state, here being no fuel for the smelting house or forge. Perhaps by diligent search in this world of stone, some valuable species of marble might be discovered. But neither philosophical curiosity, nor commercial industry, have yet fixed their abode here, where the importunity of immediate want, supplied but for the day, and craving on the morrow, has left little room for excursive knowledge, or the pleasing fancies of distant profit.

They have lately found a manufacture considerably lucrative. Their rocks abound with kelp, a sea-plant, of which the ashes are melted into glass. They burn kelp in great quantities, and then send it away in ships, which come regularly to purchase them. This new source of riches has raised the rents of many maritime farms; but the tenants pay, like all other tenants, the additional rent with great unwillingness; because they consider the profits of the kelp as the mere product of personal labour, to which the landlord contributes nothing. However, as any man may be said to give what he gives the power of gaining, he has certainly as much right to profit from the price of kelp as of any thing else found or raised upon his ground.

This new trade has excited a long and eager litigation between Macdonald and Macleod, for a ledge of rocks, which, till the value of kelp was known, neither of them desired the reputation of possessing.

The cattle of Sky are not so small as is commonly believed. Since they have sent their beeves in great numbers to southern marts, they have probably taken more care of their breed. At stated times the annual growth of cattle is

driven to a fair, by a general drover, and with the money which he returns to the farmer, the rents are paid.

The price regularly expected, is from two to three pounds a head; there was once one sold for five pounds. They go from the islands very lean, and are not offered to the butcher till they have been long fatted in English pastures.

Of their black cattle some are without horns, called by the Scots, *humble* cows, as we call a bee an *humble* bee, that wants a sting. Whether this difference be specific, or accidental, though we inquired with great diligence, we could not be informed. We are not very sure that the bull is ever without horns, though we have been told that such bulls there are. What is produced by putting a horned and unhorned male and female together, no man has ever tried that thought the result worthy of observation.

Their horses are, like their cows, of a moderate size. I had no difficulty to mount myself commodiously by the favour of the gentlemen. I heard of very little cows in Barra, and very little horses in Rum, where perhaps no care is taken to prevent that diminution of size, which must always happen, where the greater and the less copulate promiscuously, and the young animal is restrained from growth by penury of sustenance.

The goat is the general inhabitant of the earth, complying with every difference of climate and of soil. The goats of the Hebrides are like others: nor did I hear any thing of their sheep to be particularly remarked.

In the penury of these malignant regions, nothing is left that can be converted to food. The goats and the sheep are milked like the cows. A single meal of a goat is a quart, and of a sheep a pint. Such at least was the account which I could extract from those of whom I am not sure that they ever had inquired.

The milk of goats is much thinner than that of cows, and that of sheep is much thicker. Sheep's milk is never eaten before it is boiled; as it is thick, it must be very liberal of curd, and the people of St. Kilda form it into small cheeses.

The stags of the mountains are less than those of our parks or forests, perhaps not bigger than our fallow deer. Their flesh has no rankness, nor is inferior in flavour to our common venison. The roebuck I neither saw nor tasted. These are not countries for a regular chase. The deer are not driven with horns and hounds. A sportsman, with his gun in his hand, watches the animal, and when he has wounded him, traces him by the blood.

They have a race of brindled greyhounds, larger and stronger than those with which we course hares, and those are the only dogs used by them for the chase.

Man is by the use of fire-arms made so much

an overmatch for other animals, that in all countries, where they are in use, the wild part of the creation sensibly diminishes. There will probably not be long either stags or roebucks in the islands. All the beasts of chase would have been lost long ago in countries well inhabited, had they not been preserved by laws for the pleasure of the rich.

There are in Sky neither rats nor mice, but the weasel is so frequent, that he is heard in houses rattling behind chests or beds, as rats in England. They probably owe to his predominance that they have no other vermin; for since the great rat took possession of this part of the world, scarce a ship can touch at any port, but some of his race are left behind. They have within these few years begun to infest the isle of Col, where being left by some trading vessel, they have increased for want of weasels to oppose them.

The inhabitants of Sky, and of the other islands, which I have seen, are commonly of the middle stature, with fewer among them very tall or very short, than are seen in England; or perhaps, as their numbers are small, the chances of any deviation from the common measure are necessarily few. The tallest men that I saw are among those of higher rank. In regions of barrenness and scarcity, the human race is hindered in its growth by the same causes as other animals.

The ladies have as much beauty here as in other places, but bloom and softness are not to be expected among the lower classes, whose faces are exposed to the rudeness of the climate, and whose features are sometimes contracted by want, and sometimes hardened by the blasts. Supreme beauty is seldom found in cottages or workshops, even where no real hardships are suffered. To expand the human face to its full perfection, it seems necessary that the mind should co-operate by placidness of content, or consciousness of superiority.

Their strength is proportionate to their size, but they are accustomed to run upon rough ground, and therefore can with great agility skip over the bog, or clamber the mountain. For a campaign in the wastes of America, soldiers better qualified could not have been found. Having little work to do, they are not willing, nor perhaps able, to endure a long continuance of manual labour, and are therefore considered as habitually idle.

Having never been supplied with those accommodations, which life extensively diversified with trades affords, they supply their wants by very insufficient shifts, and endure many inconveniences, which a little attention would easily relieve. I have seen a horse carrying home the harvest on a crate. Under his tail was a stick for a crupper, held at the two ends by twists of straw. Hemp will grow in their islands, and

therefore ropes may be had. If they wanted hemp, they might make better cordage of rushes, or perhaps of nettles, than of straw.

Their method of life neither secures them perpetual health, nor exposes them to any particular diseases. There are physicians in the islands, who, I believe, all practise chirurgery, and all compound their own medicines.

It is generally supposed, that life is longer in places where there are few opportunities of luxury; but I found no instance here of extraordinary longevity. A cottager grows old over his oaten cakes, like a citizen at a turtle feast. He is indeed seldom incommoded by corpulence. Poverty preserves him from sinking under the burden of himself, but he escapes no other injury of time. Instances of long life are often related, which those who hear them are more willing to credit than examine. To be told that any man has attained a hundred years, gives hope and comfort to him who stands trembling on the brink of his own climacteric.

Length of life is distributed impartially to very different modes of life in very different climates; and the mountains have no greater examples of age and health than the low lands, where I was introduced to two ladies of high quality, one of whom, in her ninety-fourth year, presided at her table with the full exercise of all her powers; and the other has attained her eighty-fourth, without any diminution of her vivacity, and with little reason to accuse time of depredations on her beauty.

In the islands, as in most other places, the inhabitants are of different rank, and one does not encroach here upon another. Where there is no commerce nor manufacture, he that is born poor can scarcely become rich; and if none are able to buy estates, he that is born to land cannot annihilate his family by selling it. This was once the state of these countries. Perhaps there is no example, till within a century and half, of any family whose estate was alienated otherwise than by violence or forfeiture. Since money has been brought amongst them, they have found, like others, the art of spending more than they receive; and I saw with grief the chief of a very ancient clan, whose island was condemned by law to be sold for the satisfaction of his creditors.

The name of the highest dignity is Laird, of which there are in the extensive isle of Sky only three, Macdonald, Macleod, and Mackinnon. The laird is the original owner of the land, whose natural power must be very great, where no man lives but by agriculture; and where the produce of the land is not conveyed through the labyrinths of traffic, but passes directly from the hand that gathers it, to the mouth that eats it. The laird has all those in his power that live upon his farms. Kings can, for the most part, only exalt or degrade. The laird at plea-

sure can feed or starve, can give a read, or withhold it. This inherent power was yet strengthened by the kindness of consanguinity, and the reverence of patriarchal authority. The laird was the father of the clan, and his tenants commonly bore his name. And to these principles of original command was added, for many ages, an exclusive right of legal jurisdiction.

This multifarious and extensive obligation operated with force scarcely credible. Every duty, moral or political, was absorbed in affection and adherence to the chief. Not many years have passed since the clans knew no law but the laird's will. He told them to whom they should be friends or enemies, what king they should obey, and what religion they should profess.

When the Scots first rose in arms against the succession of the House of Hanover, Lovat, the chief of the Frasers, was in exile for a rape. The Frasers were very numerous, and very zealous against the government. A pardon was sent to Lovat. He came to the English camp, and the clan immediately deserted to him.

Next in dignity to the laird is the Tacksman; a large taker or leaseholder of land, of which he keeps part as a domain in his own hand, and lets part to under-tenants. The tacksman is necessarily a man capable of securing to the laird the whole rent, and is commonly a collateral relation. These *tacks*, or subordinate possessions, were long considered as hereditary, and the occupant was distinguished by the name of the place at which he resided. He held a middle station, by which the highest and the lowest orders were connected. He paid rent and reverence to the laird, and received them from the tenants. This tenure still subsists, with its original operation, but not with the primitive stability. Since the islanders, no longer content to live, have learned the desire of growing rich, an ancient dependent is in danger of giving way to a higher bidder, at the expense of domestic dignity and hereditary power. The stranger, whose money buys him preference, considers himself as paying for all that he has, and is indifferent about the laird's honour or safety. The commodiousness of money is indeed great; but there are some advantages which money cannot buy, and which therefore no wise man will by the love of money be tempted to forego.

I have found in the hither parts of Scotland, men, not defective in judgment or general experience, who consider the tacksman as a useless burden of the ground, as a drone who lives upon the product of an estate, without the right of property, or the merit of labour, and who impoverishes at once the landlord and the tenant. The land, say they, is let to the tacksman at sixpence an acre, and by him to the tenant at tenpence. Let the owner be the immediate land-

lord to all the tenants; if he sets the ground at eightpence, he will increase his revenue by a fourth part, and the tenant's burden will be diminished by a fifth.

Those who pursue this train of reasoning, seem not sufficiently to inquire whither it will lead them, nor to know that it will equally show the propriety of suppressing all wholesale trade, of shutting up the shops of every man who sells what he does not make, and of extruding all whose agency and profit intervene between the manufacturer and the consumer. They may, by stretching their understandings a little wider, comprehend, that all those who, by undertaking large quantities of manufacture, and affording employment to many labourers, make themselves considered as benefactors to the public, have only been robbing their workmen with one hand, and their customers with the other. If Crowley had sold only what he could make, and all his smiths had wrought their own iron with their own hammers, he would have lived on less, and they would have sold their work for more. The salaries of superintendents and clerks would have been partly saved, and partly shared, and nails become sometimes cheaper by a farthing in a hundred. But then if the smith could not have found an immediate purchaser, he must have deserted his anvil; if there had by accident at any time been more sellers than buyers, the workmen must have reduced their profit to nothing, by underselling one another; and as no great stock could have been in any hand, no sudden demand of large quantities could have been answered, and the builder must have stood still till the nailer could supply him.

According to these schemes, universal plenty is to begin and end in universal misery. Hope and emulation will be utterly extinguished; and as all must obey the call of immediate necessity, nothing that requires extensive views, or provides for distant consequences, will ever be performed.

To the southern inhabitants of Scotland, the state of the mountains and the islands is equally unknown with that of Borneo or Sumatra; of both they have only heard a little, and guess the rest. They are strangers to the language and the manners, to the advantages and the wants of the people, whose life they would model, and whose evils they would remedy.

Nothing is less difficult than to procure one convenience by the forfeiture of another. A soldier may expedite his march by throwing away his arms. To banish the tacksman is easy, to make a country plentiful by diminishing the people, is an expeditious mode of husbandry; but that abundance, which there is nobody to enjoy, contributes little to human happiness.

As the mind must govern the hands, so in every society the man of intelligence must di-

rect the man of labour. If the tacksman be taken away, the Hebrides must in their present state be given up to grossness and ignorance; the tenant, for want of instruction, will be unskilful, and for want of admonition, will be negligent. The laird, in these wide estates, which often consist of islands remote from one another, cannot extend his personal influence to all his tenants; and the steward having no dignity annexed to his character, can have little authority among men taught to pay reverence only to birth, and who regard the tacksman as their hereditary superior; nor can the steward have equal zeal for the prosperity of an estate profitable only to the laird, with the tacksman, who has the laird's income involved in his own.

The only gentlemen in the islands are the lairds, the tacksmen, and the ministers, who frequently improve their livings by becoming farmers. If the tacksmen be banished, who will be left to impart knowledge, or impress civility? The laird must always be at a distance from the greater part of his lands; and if he resides at all upon them, must drag his days in solitude, having no longer either a friend or a companion; he will therefore depart to some more comfortable residence, and leave the tenants to the wisdom and mercy of a factor.

Of tenants there are different orders, as they have greater or less stock. Land is sometimes leased to a small fellowship, who live in a cluster of huts, called a Tenant's Town, and are bound jointly and separately for the payment of their rent. These, I believe, employ in the care of their cattle, and the labour of tillage, a kind of tenants yet lower; who having a hut, with grass for a certain number of cows and sheep, pay their rent by a stipulated quantity of labour.

The condition of domestic servants or the price of occasional labour, I do not know with certainty. I was told that the maids have sheep, and are allowed to spin for their own clothing; perhaps they have no pecuniary wages, or none but in very wealthy families. The state of life which has hitherto been purely pastoral, begins now to be a little variegated with commerce; but novelties enter by degrees, and till one mode has fully prevailed over the other, no settled notion can be formed.

Such is the system of insular subordination, which having little variety, cannot afford much delight in the view, nor long detain the mind in contemplation. The inhabitants were for a long time perhaps not unhappy; but their content was a muddy mixture of pride and ignorance, an indifference for pleasures which they did not know, a blind veneration for their chiefs, and a strong conviction of their own importance.

Their pride has been crushed by the heavy hand of a vindictive conqueror, whose severities

have been followed by laws, which, though they cannot be called cruel, have produced much discontent, because they operate upon the surface of life, and make every eye bear witness to subjection. To be compelled to a new dress, has always been found painful.

Their chiefs being now deprived of their jurisdiction, have already lost much of their influence; and as they gradually degenerate from patriarchal rulers to rapacious landlords, they will divest themselves of the little that remains.

That dignity which they derived from an opinion of their military importance, the law, which disarmed them, has abated. An old gentleman, delighting himself with the recollection of better days, related, that forty years ago, a chieftain walked out attended by ten or twelve followers with their arms rattling. That animating rabble has now ceased. The chief has lost his formidable retinue; and the Highlander walks his heath unarmed and defenceless, with the peaceful submission of a French peasant, or English cottager.

Their ignorance grows every day less, but their knowledge is yet of little other use than to show them their wants. They are now in the period of education, and feel the uneasiness of discipline, without yet perceiving the benefit of instruction.

The last law, by which the Highlanders are deprived of their arms, has operated with efficacy beyond expectation. Of former statutes made with the same design, the execution had been feeble, and the effect inconsiderable. Concealment was undoubtedly practised, and perhaps often with connivance. There was tenderness or partiality on one side, and obstinacy on the other. But the law, which followed the victory of Culloden, found the whole nation dejected and intimidated; informations were given without danger and without fear, and the arms were collected with such rigour, that every house was despoiled of its defence.

To disarm part of the Highlands, could give no reasonable occasion of complaint. Every government must be allowed the power of taking away the weapon that is lifted against it. But the loyal clans murmured with some appearance of justice, that, after having defended the king, they were forbidden for the future to defend themselves; and that the sword should be forfeited, which had been legally employed. Their case is undoubtedly hard, but in political regulations, good cannot be complete, it can only be predominant.

Whether by disarming a people thus broken into several tribes, and thus remote from the seat of power, more good than evil has been produced, may deserve inquiry. The supreme power in every community has the right of debarring every individual, and every subordinate

society, from self-defence, only because the supreme power is able to defend them; and therefore where the governor cannot act, he must trust the subject to act for himself. These islands might be wasted with fire and sword before their sovereign would know their distress. A gang of robbers, such as has been lately found confederating themselves in the Highlands, might lay a wide region under contribution. The crew of a petty privateer might land on the largest and most wealthy of the islands, and riot without control in cruelty and waste. It was observed by one of the chiefs of Sky, that fifty armed men might, without resistance, ravage the country. Laws that place the subjects in such a state, contravene the first principles of the compact of authority; they exact obedience, and yield no protection.

It affords a generous and manly pleasure to conceive a little nation gathering its fruits and tending its herds with fearless confidence, though it lies open on every side to invasion, where, in contempt of walls and trenches, every man sleeps securely with his sword beside him: where all on the first approach of hostility, came together at the call to battle, as at a summons to a festal show; and committing their cattle to the care of those whom age or nature has disabled, engaged the enemy with that competition for hazard and for glory, which operate in men that fight under the eye of those whose dislike or kindness they have always considered as the greatest evil or the greatest good.

This was, in the beginning of the present century, the state of the Highlands. Every man was a soldier, who partook of national confidence, and interested himself in national honour. To lose this spirit, is to lose what no small advantage will compensate.

It may likewise deserve to be inquired, whether a great nation ought to be totally commercial? whether amidst the uncertainty of human affairs, too much attention to one mode of happiness may not endanger others? whether the pride of riches must not sometimes have recourse to the protection of courage? and whether, if it be necessary to preserve in some part of the empire the military spirit, it can subsist more commodiously in any place, than in remote and unprofitable provinces, where it can commonly do little harm, and whence it may be called forth at any sudden exigence?

It must however be confessed, that a man who places honour only in successful violence, is a very troublesome and pernicious animal in time of peace; and that the martial character cannot prevail in a whole people, but by the diminution of all other virtues. He that is accustomed to resolve all right into conquest, will have very little tenderness or equity. All the friendship in such a life can be only a confede-

racy of invasion, or alliance of defence. The strong must flourish by force, and the weak subsist by stratagem.

Still the Highlanders lost their ferocity with their arms, they suffered from each other all that malignity could dictate, or precipitance could act. Every provocation was revenged with blood, and no man that ventured into a numerous company, by whatever occasion brought together, was sure of returning without a wound. If they are now exposed to foreign hostilities, they may talk of the danger, but can seldom feel it. If they are no longer martial, they are no longer quarrelsome. Misery is caused, for the most part, not by a heavy crush of disaster, but by the corrosion of less visible evils, which canker enjoyment, and undermine security. The visit of an invader is necessarily rare, but domestic animosities allow no cessation.

The abolition of the local jurisdictions, which had for so many ages been exercised by the chiefs, has likewise its evils and its good. The feudal constitution naturally diffused itself into long ramifications of subordinate authority. To this general temper of the government was added the peculiar form of the country, broken by mountains into many subdivisions scarcely accessible but to the natives, and guarded by passes, or perplexed with intricacies, through which national justice could not find its way.

The power of deciding controversies, and of punishing offences, as some such power there must always be, was intrusted to the lairds of the country, to those whom the people considered as their natural judges. It cannot be supposed that a rugged proprietor of the rocks, unprincipled and unenlightened, was a nice resolver of entangled claims, or very exact in proportioning punishment to offences. But the more he indulged his own will, the more he held his vassals in dependence. Prudence and innocence, without the favour of the chief, conferred no security; and crimes involved no danger, when the judge was resolute to acquit.

When the chiefs were men of knowledge and virtue, the convenience of a domestic judicature was great. No long journeys were necessary, nor artificial delays could be practised; the character, the alliances, and interests of the litigants were known to the court, and all false pretences were easily detected. The sentence, when it was just, could not be evaded; the power of the laird superseded formalities, and justice could not be defeated by interest or stratagem.

I doubt not but that since the regular judges have made their circuits through the whole country, right has been every where more wisely and more equally distributed; the complaint is, that litigation is grown troublesome, and that

the magistrates are too few, and therefore often too remote for general convenience.

Many of the smaller islands have no legal officer within them. I once asked, if a crime should be committed, by what authority the offender could be seized? and was told, that the laird would exert his right; a right which he must now usurp, but which surely necessity must vindicate, and which is therefore yet exercised in lower degrees, by some of the proprietors, when legal processes cannot be obtained.

In all greater questions, however, there is now happily an end to all fear or hope from malice or from favour. The roads are secure in those places, through which, forty years ago, no traveller could pass without a convoy. All trials of right by the sword are forgotten, and the mean are in as little danger from the powerful as in other places. No scheme of policy has, in any country, yet brought the rich and poor on equal terms into courts of judicature. Perhaps experience, improving on experience, may in time effect it.

Those who have long enjoyed dignity and power, ought not to lose it without some equivalent. There was paid to the chiefs by the public, in exchange for their privileges, perhaps a sum greater than most of them had ever possessed, which excited a thirst for riches, of which it showed them the use. When the power of birth and station ceases, no hope remains but from the prevalence of money. Power and wealth supply the place of each other. Power confers the ability of gratifying our desire without the consent of others. Wealth enables us to obtain the consent of others to our gratification. Power, simply considered, whatever it confers on one, must take from another. Wealth enables its owner to give to others, by taking only from himself. Power pleases the violent and proud: wealth delights the placid and the timorous. Youth therefore flies at power, and age grovels after riches.

The chiefs, divested of their prerogatives, necessarily turned their thoughts to the improvement of their revenues, and expect more rent, as they have less homage. The tenant, who is far from perceiving that his condition is made better in the same proportion as that of his landlord is made worse, does not immediately see why his industry is to be taxed more heavily than before. He refuses to pay the demand, and is ejected; the ground is then let to a stranger, who perhaps brings a larger stock, but who taking the land at its full price, treats with the laird upon equal terms, and considers him not as a chief, but as a trafficker in land. Thus the estate perhaps is improved, but the clan is broken.

It seems to be the general opinion, that the rents have been raised with too much eagerness.

Some regard must be paid to prejudice. Those who have hitherto paid but little, will not suddenly be persuaded to pay much, though they can afford it. As ground is gradually improved, and the value of money decreases, the rent may be raised without any diminution of the farmer's profits; yet it is necessary in these countries, where the ejection of a tenant is a greater evil than in more populous places, to consider not merely what the land will produce, but with what ability the inhabitant can cultivate it. A certain stock can allow but a certain payment; for if the land be doubled, and the stock remains the same, the tenant becomes no richer. The proprietors of the Highlands might perhaps often increase their income, by subdividing the farms, and allotting to every occupier only so many acres as he can profitably employ, but that they want people.

There seems now, whatever be the cause, to be through a great part of the Highlands a general discontent. That adherence which was lately professed by every man to the chief of his name, has now little prevalence; and he that cannot live as he desires at home, listens to the tale of fortunate islands, and happy regions, where every man may have land of his own, and eat the product of his labour without a superior.

Those who have obtained grants of American lands, have, as is well known, invited settlers from all quarters of the globe; and among other places, where oppression might produce a wish for new habitations, their emissaries would not fail to try their persuasions in the isles of Scotland, where at the time when the clans were newly disunited from their chiefs, and exasperated by unprecedented exactions, it is no wonder that they prevailed.

Whether the mischiefs of emigration were immediately perceived, may be justly questioned. They who went first, were probably such as could best be spared; but the accounts sent by the earliest adventurers, whether true or false, inclined many to follow them; and whole neighbourhoods formed parties for removal; so that departure from their native country is no longer exile. He that goes thus accompanied, carries with him all that makes life pleasant. He sits down in a better climate, surrounded by his kindred and his friends: they carry with them their language, their opinions, their popular songs, and hereditary merriment; they change nothing but the place of their abode; and of that change they perceive the benefit.

This is the real effect of emigration, if those that go away together settle on the same spot, and preserve their ancient union. But some relate that these adventurous visitants of unknown regions, after a voyage passed in dreams of plenty and felicity, are dispersed at last upon a sylvan wilderness, where their first years must be spent in toil to clear the ground which is afterwards

to be tilled, and that the whole effect of their undertaking is only more fatigue and equal scarcity.

Both accounts may be suspected. Those who are gone, will endeavour by every art to draw others after them; for as their numbers are greater, they will provide better for themselves. When Nova Scotia was first peopled, I remember a letter, published under the character of a New Planter, who related how much the climate put him in mind of Italy. Such intelligence the Hebridiens probably receive from their transmarine correspondents. But with equal temptations of interest, and perhaps with no greater niceness of veracity, the owners of the islands spread stories of American hardships to keep their people content at home.

Some method to stop this epidemic desire of wandering, which spreads its contagion from valley to valley, deserves to be sought with great diligence. In more fruitful countries, the removal of one only makes room for the succession of another; but in the Hebrides, the loss of an inhabitant leaves a lasting vacuity; for nobody born in any other parts of the world will choose this country for his residence; and an island once depopulated will remain a desert, as long as the present facility of travel gives every one, who is discontented and unsettled, the choice of his abode.

Let it be inquired, whether the first intention of those who are fluttering on the wing, and collecting a flock that they may take their flight, be to attain good or avoid evil? If they are dissatisfied with that part of the globe which their birth has allotted them, and resolve not to live without the pleasures of happier climates; if they long for bright suns, and calm skies, and flowery fields, and fragrant gardens, I know not by what eloquence they can be persuaded, or by what offers they can be hired to stay.

But if they are driven from their native country by positive evils, and disgusted by ill-treatment, real or imaginary, it were fit to remove their grievances, and quiet their resentment; since, if they have been hitherto undutiful subjects, they will not much mend their principles by American conversation.

To allure them into the army, it was thought proper to indulge them in the continuance of their national dress. If this concession could have any effect, it might easily be made. That dissimilitude of appearance, which was supposed to keep them distinct from the rest of the nation, might disincline them from coalescing with the Pennsylvanians, or people of Connecticut. If the restitution of their arms will reconcile them to their country, let them have again those weapons, which will not be more mischievous at home than in the colonies. That they may not fly from the increase of rent, I know not whether the general good does not require that the

landlords be, for a time, restrained in their demands, and kept quiet by pensions proportionate to their loss.

To hinder insurrection by driving away the people, and to govern peaceably, by having no subjects, is an expedient that argues no great profundity of politics. To soften the obdurate, to convince the mistaken, to mollify the resentful, are worthy of a statesman; but it affords a legislator little self-applause to consider, that where there was formerly an insurrection, there is now a wilderness.

It has been a question often agitated, without solution, why those northern regions are now so thinly peopled, which formerly overwhelmed with their armies the Roman empire? The question supposes what I believe is not true, that they had once more inhabitants than they could maintain, and overflowed only because they were full.

This is to estimate the manners of all countries and ages by our own. Migration, while the state of life was unsettled, and there was little communication of intelligence between distant places, was among the wilder nations of Europe capricious and casual. An adventurous projector heard of a fertile coast unoccupied, and led out a colony; a chief of renown for bravery called the young men together, and led them out to try what fortune would present. When Cæsar was in Gaul, he found the Helvetians preparing to go they knew not whither, and put a stop to their motions. They settled again in their own country, where they were so far from wanting room, that they had accumulated three years' provision for their march.

The religion of the north was military; if they could not find enemies, it was their duty to make them: they travelled in quest of danger, and willingly took the chance of empire or death. If their troops were numerous, the countries from which they were collected are of vast extent, and without much exuberance of people, great armies may be raised where every man is a soldier. But their true numbers were never known. Those who were conquered by them are their historians, and shame may have excited them to say, that they were overwhelmed with multitudes. To count is a modern practice, the ancient method was to guess; and when numbers are guessed, they are always magnified.

Thus England has for several years been filled with the achievements of seventy thousand Highlanders employed in America. I have heard from an English officer, not much inclined to favour them, that their behaviour deserved a very high degree of military praise; but their number has been much exaggerated. One of the ministers told me, that seventy thousand men could not have been found in all the Highlands, and that more than twelve

thousand never took the field. Those that went to the American war, went to destruction. Of the old Highland regiment, consisting of twelve hundred, only seventy-six survived to see their country again.

The Gothic swarms have at least been multiplied with equal liberality. That they bore no great proportion to the inhabitants in whose countries they settled, is plain from the paucity of northern words now found in the provincial languages. Their country was not deserted for want of room, because it was covered with forests of vast extent; and the first effect of plenitude of inhabitants is the destruction of wood. As the Europeans spread over America, the lands are gradually laid naked.

I would not be understood to say, that necessity had never any part in their expeditions. A nation whose agriculture is scanty or unskilful, may be driven out by famine. A nation of hunters may have exhausted their game. I only affirm that the northern regions were not, when their irruptions subdued the Romans, overpeopled with regard to their real extent of territory, and power of fertility. In a country fully inhabited, however afterwards laid waste, evident marks will remain of its former populousness. But of Scandinavia and Germany, nothing is known but that as we trace their state upwards into antiquity, their woods were greater, and their cultivated ground was less.

That causes very different from want of room may produce a general disposition to seek another country is apparent from the present conduct of the Highlanders, who are in some places ready to threaten a total secession. The numbers which have already gone, though like other numbers they may be magnified, are very great, and such as if they had gone together and agreed upon any certain settlement, might have founded an independent government in the depths of the western continent. Nor are they only the lowest and most indigent; many men of considerable wealth have taken with them their train of labourers and dependants; and if they continue the feudal scheme of polity, may establish new clans in the other hemisphere.

That the immediate motives of their desertion must be imputed to their landlords, may be reasonably concluded, because some lords of more prudence and less rapacity have kept their vassals undiminished. From Raasay only one man had been seduced, and at Col, there was no wish to go away.

The traveller who comes hither from more opulent countries, to speculate upon the remains of pastoral life, will not much wonder that a common Highlander has no strong adherence to his native soil; for of animal enjoyments, or of physical good, he leaves nothing that he may not find again wheresoever he may be thrown.

The habitations of men in the Hebrides may

be distinguished into huts and houses. By a house, I mean a building with one story over another: by a hut a dwelling with only one floor. The laird, who formerly lived in a castle, now lives in a house; sometimes sufficiently neat, but seldom very spacious or splendid. The tacksmen and the ministers have commonly houses. Wherever there is a house, the stranger finds a welcome, and to the other evils of exterminating tacksmen, may be added the unavoidable cessation of hospitality, or the devolution of too heavy a burden on the ministers.

Of the houses little can be said. They are small, and by the necessity of accumulating stores, where there are so few opportunities of purchase, the rooms are very heterogeneously filled. With want of cleanliness it were ingratitude to reproach them. The servants having been bred upon the naked earth, think every floor clean, and the quick succession of guests, perhaps not always over-elegant, does not allow much time for adjusting their apartments.

Huts are of many gradations; from murky dens to commodious dwellings.

The wall of a common hut is always built without mortar, by a skilful adaption of loose stones. Sometimes perhaps a double wall of stones is raised, and an intermediate space filled with earth. The air is thus completely excluded. Some walls are, I think, formed of turfs, held together by a wattle, or texture of twigs. Of the meanest huts the first room is lighted by the entrance, and the second by the smoke hole. The fire is usually made in the middle. But there are huts or dwellings of only one story inhabited by gentlemen, which have walls cemented with mortar, glass windows, and boarded floors. Of these all have chimneys, and some chimneys have grates.

The house and the furniture are not always nicely suited. We were driven once by missing a passage, to the hut of a gentleman, where, after a very liberal supper, when I was conducted to my chamber, I found an elegant bed of Indian cotton, spread with fine sheets. The accommodation was flattering; I undressed myself, and felt my feet in the mire. The bed stood upon the bare earth, which a long course of rain had softened to a puddle.

In pastoral countries, the condition of the lowest rank of people is sufficiently wretched. Among manufacturers, men that have no property may have art and industry, which make them necessary, and therefore valuable. But where flocks and corn are the only wealth, there are always more hands than work, and of that work there is little in which skill and dexterity can be much distinguished. He therefore who is born poor, never can be rich. The son merely occupies the place of the father, and life knows nothing of progression or advancement.

The petty tenants, and labouring peasants,

live in miserable cabins, which afford them little more than shelter from the storms. The boor of Norway is said to make all his own utensils. In the Hebrides, whatever might be their ingenuity, the want of wood leaves them no materials. They are probably content with such accommodations as stones of different forms and sizes can afford them.

Their food is not better than their lodging. They seldom taste the flesh of land-animals; for here are no markets. What each man eats is from his own stock. The great effect of money is to break property into small parts. In towns, he that has a shilling may have a piece of meat; but where there is no commerce, no man can eat mutton but by killing a sheep.

Fish in fair weather they need not want; but, I believe, man never lives long on fish, but by constraint; he will rather feed upon roots and berries.

The only fuel of the islands is peat. Their wood is all consumed, and coal they have not yet found. Peat is dug out of the marshes, from the depth of one foot to that of six. That is accounted the best which is nearest the surface. It appears to be a mass of black earth held together by vegetable fibres. I know not whether the earth be bituminous, or whether the fibres be not the only combustible part; which, by heating the interposed earth red-hot, make a burning mass. The heat is not very strong or lasting. The ashes are yellowish, and in a large quantity. When they dig peat, they cut it into square pieces, and pile it up to dry beside the house. In some places it has an offensive smell. It is like wood charred for the smith. The common method of making peat-fires is by heaping it on the hearth; but it burns well in grates, and in the best houses is so used.

The common opinion is, that peat grows again where it has been cut; which, as it seems to be chiefly a vegetable substance, is not unlikely to be true, whether known or not to those who relate it.

There are watermills in Sky and Raasay: but where they are too far distant, the housewives grind their oats with a quern, or hand-mill, which consists of two stones, about a foot and a half in diameter; the lower is a little convex, to which the concavity of the upper must be fitted. In the middle of the upper stone is a round hole, and on one side is a long handle. The grinder sheds the corn gradually into the hole with one hand, and works the handle round with the other. The corn slides down the convexity of the lower stone, and by the motion of the upper is ground in its passage. These stones are found in Lochabar.

The islands afford few pleasures, except to the hardy sportsman, who can tread the moor and climb the mountain. The distance of one family from another, in a country where travel-

ling has so much difficulty, makes frequent intercourse impracticable. Visits last several days, and are commonly paid by water; yet I never saw a boat furnished with benches, or made commodious by any addition to the first fabric. Conveniences are not missed where they never were enjoyed.

The solace which the bagpipe can give, they have long enjoyed; but among other changes, which the last revolution introduced, the use of the bagpipe begins to be forgotten. Some of the chief families still entertain a piper, whose office was anciently hereditary. Macrimmon was piper to Macleod, and Rankin to Maclean of Col.

The tunes of the bagpipe are traditional. There has been in Sky, beyond all time of memory, a college of pipers, under the direction of Macrimmon, which is not quite extinct. There was another in Mull, superintended by Rankin, which expired about sixteen years ago. To these colleges, while the pipe retained its honour, the students of music repaired for education. I have had my dinner exhilarated by the bagpipe, at Armidale, at Dunvegan, and in Col.

The general conversation of the islanders has nothing particular. I did not meet with the inquisitiveness of which I have read, and suspect the judgment to have been rashly made. A stranger of curiosity comes into a place where a stranger is seldom seen: he importunes the people with questions, of which they cannot guess the motive, and gazes with surprise on things which they, having had them always before their eyes, do not suspect of any thing wonderful. He appears to them like some being of another world, and then thinks it peculiar that they take their turn to inquire whence he comes, and whither he is going.

The islands were long unfurnished with instruction for youth, and none but the sons of gentlemen could have any literature. There are now parochial schools, to which the lord of every manor pays a certain stipend. Here the children are taught to read; but by the rule of their institution, they teach only English, so that the natives read a language which they may never use or understand. If a parish, which often happens, contains several islands, the school being but in one, cannot assist the rest. This is the state of Col, which, however, is more enlightened than some other places; for the deficiency is supplied by a young gentleman, who, for his own improvement, travels every year on foot over the Highlands to the session at Aberdeen; and at his return, during the vacation, teaches to read and write in his native island.

In Sky there are two grammar-schools, where boarders are taken to be regularly educated. The price of board is from three pounds, to four pounds ten shillings a-year, and that of instruc-

tion is half-a-crown a quarter. But the scholars are birds of passage, who live at school only in the summer; for in winter provisions cannot be made for any considerable number in one place. This periodical dispersion impresses strongly the scarcity of these countries.

Having heard of no boarding-school for ladies nearer than Inverness, I suppose their education is generally domestic. The elder daughters of the higher families are sent into the world, and may contribute by their acquisitions to the improvement of the rest.

Women must here study to be either pleasing or useful. Their deficiencies are seldom supplied by very liberal fortunes. A hundred pounds is a portion beyond the hope of any but the laird's daughter. They do not indeed often give money with their daughters; the question is, How many cows a young lady will bring her husband? A rich maiden has from ten to forty; but two cows are a decent fortune for one who pretends to no distinction.

The religion of the islands is that of the kirk of Scotland. The gentlemen with whom I conversed are all inclined to the English liturgy; but they are obliged to maintain the established minister, and the country is too poor to afford payment to another, who must live wholly on the contribution of his audience.

They therefore all attend the worship of the kirk, as often as a visit from their minister, or the practicability of travelling, gives them opportunity; nor have they any reason to complain of insufficient pastors; for I saw not one in the islands, whom I had reason to think either deficient in learning, or irregular in life; but found several with whom I could not converse without wishing, as my respect increased, that they had not been presbyterians.

The ancient rigour of puritanism is now very much relaxed, though all are not yet equally enlightened. I sometimes met with prejudices sufficiently malignant, but they were prejudices of ignorance. The ministers in the islands had attained such knowledge as may justly be admired in men, who have no motive to study, but generous curiosity, or what is still better, desire of usefulness; with such politeness as so narrow a circle of converse could not have supplied, but to minds naturally disposed to elegance.

Reason and truth will prevail at last. The most learned of the Scottish doctors would now gladly admit a form of prayer, if the people would endure it. The zeal or rage of congregations has its different degrees. In some parishes the Lord's Prayer is suffered: in others it is still rejected as a form; and he that should make it part of his supplication would be suspected of heretical pravity.

The principle upon which extemporary prayer was originally introduced, is no longer admitted. The minister formerly, in the effusion of his

prayer, expected immediate, and perhaps perceptible inspiration, and therefore thought it his duty not to think before what he should say. It is now universally confessed, that men pray as they speak on other occasions, according to the general measure of their abilities and attainments. Whatever each may think of a form prescribed by another, he cannot but believe that he can himself compose by study and meditation, a better prayer than will rise in his mind at a sudden call; and if he has any hope of supernatural help, why may he not as well receive it when he writes as when he speaks?

In the variety of mental powers, some must perform extemporary prayer with much imperfection; and in the eagerness and rashness of contradictory opinions, if public liturgy be left to the private judgment of every minister, the congregation may often be offended or misled.

There is in Scotland, as among ourselves, a restless suspicion of popish machinations, and a clamour of numerous converts to the Romish religion. The report is, I believe, in both parts of the island equally false. The Romish religion is professed only in Egg and Canna, two small islands, into which the reformation never made its way. If any missionaries are busy in the Highlands, their zeal entitles them to respect, even from those who cannot think favourably of their doctrine.

The political tenets of the islanders I was not curious to investigate, and they were not eager to obtrude. Their conversation is decent and inoffensive. They disdain to drink for their principles, and there is no disaffection at their tables. I never heard a health offered by a Highlander that might not have circulated with propriety within the precincts of the king's palace.

Legal government has yet something of novelty to which they cannot perfectly conform. The ancient spirit that appealed only to the sword, is yet among them. The tenant of Scalpa, an island belonging to Macdonald, took no care to bring his rent; when the landlord talked of exacting payment, he declared his resolution to keep his ground, and drive all intruders from the island, and continued to feed his cattle as on his own land, till it became necessary for the sheriff to dislodge him by violence.

The various kinds of superstition which prevailed here, as in all other regions of ignorance, are by the diligence of the ministers almost exterminated.

Of *Brownie*, mentioned by Martin, nothing has been heard for many years. Brownie was a sturdy fairy; who, if he was fed, and kindly treated, would, as they said, do a great deal of work. They now pay him no wages, and are content to labour for themselves.

In Troda, within these three-and-thirty years, milk was put every Saturday for *Greogach* or

the *Old Man with the Long Beard*. Whether *Greogach* was courted as kind, or dreaded as terrible, whether they meant, by giving him the milk, to obtain good or avert evil, I was not informed. The minister is now living by whom the practice was abolished.

They have still among them a great number of charms for the cure of different diseases; they are all invocations, perhaps transmitted to them from the times of popery, which increasing knowledge will bring into disuse.

They have opinions which cannot be ranked with superstition, because they regard only natural effects. They expect better crops of grain by sowing their seed in the moon's increase. The moon has great influence in vulgar philosophy. In my memory it was a precept annually given in one of the English almanacks, "to kill hogs when the moon was increasing, and the bacon would prove the better in boiling."

We should have had little claim to the praise of curiosity, if we had not endeavoured with particular attention to examine the question of the *Second Sight*. Of an opinion received for centuries by a whole nation, and supposed to be confirmed through its whole descent by a series of successive facts, it is desirable that the truth should be established, or the fallacy detected.

The *Second Sight* is an impression made either by the mind upon the eye, or by the eye upon the mind, by which things distant or future are perceived, and seen as if they were present. A man on a journey far from home falls from his horse; another, who is perhaps at work about the house, sees him bleeding on the ground commonly with a landscape of the place where the accident befalls him. Another seer, driving home his cattle, or wandering in idleness, or musing in the sunshine, is suddenly surprised by the appearance of a bridal ceremony, or funeral procession, and counts the mourners or attendants, of whom, if he knows them, he relates the names, if he knows them not, he can describe the dresses. Things distant are seen at the instant when they happen. Of things future I know not that there is any rule for determining the time between the sight and the event.

This receptive faculty, for power it cannot be called, is neither voluntary nor constant. The appearances have no dependence upon choice: they cannot be summoned, detained, or recalled. The impression is sudden, and the effect often painful.

By the term *Second Sight*, seems to be meant a mode of seeing, superadded to that which nature generally bestows. In the Erse it is called *Taish*; which signifies likewise a spectre, or a vision. I know not, nor is it likely that the Highlanders ever examined, whether by *Taish*, used for *Second Sight*, they mean the power of seeing, or the thing seen.

I do not find it to be true, as it is reported,

that to the *Second Sight* nothing is presented but phantoms of evil. Good seems to have the same proportion in those visionary scenes as it obtains in real life: almost all remarkable events have evil for their basis; and are either miseries incurred, or miseries escaped. Our sense is so much stronger of what we suffer than of what we enjoy, that the ideas of pain predominate in almost every mind. What is recollection but a revival of vexations, or history but a record of wars, treasons, and calamities? Death, which is considered as the greatest evil, happens to all. The greatest good, be it what it will, is the lot but of a part.

That they should often see death, is to be expected; because death is an event frequent and important. But they see likewise more pleasing incidents. A gentleman told me, that when he had once gone far from his own island, one of his labouring servants predicted his return, and described the livery of his attendant, which he had never worn at home; and which had been, without any previous design, occasionally given him.

Our desire of information was keen, and our inquiry frequent. Mr. Boswell's frankness and gayety made every body communicative; and we heard many tales of these airy shows, with more or less evidence and distinctness.

It is the common talk of the Lowland Scots, that the notion of the *Second Sight* is wearing away with other superstitions: and that its reality is no longer supposed but by the grossest people. How far its prevalence ever extended, or what ground it has lost, I know not. The islanders of all degrees, whether of rank or understanding, universally admit it, except the ministers, who universally deny it, and are suspected to deny it, in consequence of a system, against conviction. One of them honestly told me, that he came to Sky with the resolution not to believe it.

Strong reasons for incredulity will readily occur. This faculty of seeing things out of sight is local, and commonly useless. It is a breach of the common order of things, without any visible reason or perceptible benefit. It is ascribed only to a people very little enlightened; and among them for the most part, to the mean and ignorant.

To the confidence of these objections it may be replied, that by presuming to determine what is fit, and what is beneficial, they presuppose more knowledge of the universal system than man has attained; and therefore depend upon principles too complicated and extensive for our comprehension; and there can be no security in the consequence, when the premises are not understood; that the *Second Sight* is only wonderful because it is rare, for, considered in itself, it involves no more difficulty than dreams, or perhaps than the regular exercise of the cognitive

faculty; that a general opinion of communicative impulses, or visionary representations, has prevailed in all ages and all nations; that particular instances have been given, with such evidence as neither Bacon nor Boyle has been able to resist; that sudden impressions, which the event has verified, have been felt by more than own or publish them; that the *Second Sight* of the Hebrides implies only the local frequency of a power which is no where totally unknown; and that where we are unable to decide by antecedent reason we must be content to yield to the force of testimony.

By pretension to *Second Sight*, no profit was ever sought or gained. It is an involuntary affection, in which neither hope nor fear are known to have any part. Those who profess to feel it, do not boast of it as a privilege, nor are considered by others as advantageously distinguished. They have no temptation to feign; and their hearers have no motive to encourage their imposture.

To talk with any of these seers is not easy. There is one living in Sky, with whom we would have gladly conversed; but he was very gross and ignorant, and knew no English. The proportion in these countries of the poor to the rich is such, that if we suppose the quality to be accidental, it can very rarely happen to a man of education; and yet on such men it has sometimes fallen. There is now a second-sighted gentleman in the Highlands, who complains of the terrors to which he is exposed.

The foresight of the seers is not always precise: they are impressed with images, of which the event only shows them the meaning. They tell what they have seen to others, who are at that time not more known than themselves, but may become at last very adequate witnesses, by comparing the narrative with its verification.

To collect sufficient testimonies for the satisfaction of the public, or of ourselves, would have required more time than we could bestow. There is, against it, the seeming analogy of things confusedly seen, and little understood; and for it, the indistinct cry of national persuasion, which may be perhaps resolved at last into prejudice and tradition. I never could advance my curiosity to conviction; but came away at last only willing to believe.

As there subsists no longer in the islands much of that peculiar and discriminative form of life, of which the idea had delighted our imagination, we were willing to listen to such accounts of past times as would be given us. But we soon found what memorials were to be expected from an illiterate people, whose whole time is a series of distress; where every morning is labouring with expedients for the evening; and where all mental pains or pleasures arose from the dread of winter, the expectation of spring, the caprices of their chiefs, and the motions of the neighbouring

clans; where there was neither shame from ignorance, nor pride in knowledge; neither curiosity to inquire, nor vanity to communicate.

The chiefs indeed were exempt from urgent penury and daily difficulties; and in their houses were preserved what accounts remained of past ages. But the chiefs were sometimes ignorant and careless, and sometimes kept busy by turbulence and contention; and one generation of ignorance effaces the whole series of unwritten history. Books are faithful repositories, which may be for a while neglected or forgotten; but when they are opened again, will again impart their instruction: memory, once interrupted, is not to be recalled. Written learning is a fixed luminary, which, after the cloud that had hidden it has passed away, is again bright in its proper station. Tradition is but a meteor, which, if once it falls, cannot be rekindled.

It seems to be universally supposed, that much of the local history was preserved by the bards, of whom one is said to have been retained by every great family. After these bards were some of my first inquiries; and I received such answers as, for a while, made me please myself with my increase of knowledge; for I had not then learned how to estimate the narration of a Highlander.

They said that a great family had a *bard* and a *senachi*, who were the poet and historian of the house; and an old gentleman told me that he remembered one of each. Here was a dawn of intelligence. Of men that had lived within memory, some certain knowledge might be attained. Though the office had ceased, its effects might continue; the poems might be found, though there was no poet.

Another conversation indeed informed me, that the same man was both bard and *senachi*. This variation discouraged me; but as the practice might be different in different times, or at the same time in different families, there was yet no reason for supposing that I must necessarily sit down in total ignorance.

Soon after I was told by a gentleman, who is generally acknowledged the greatest master of Hebridian antiquities, that there had indeed once been both bards and *senachies*; and that *senachi* signified the *man of talk*, or of conversation; but that neither bard nor *senachi* had existed for some centuries. I have no reason to suppose it exactly known at what time the custom ceased, nor did it probably cease in all houses at once. But whenever the practice of recitation was disused, the works, whether poetical or historical, perished with the authors; for in those times nothing had been written in the Erse language.

Whether the *man of talk* was an historian, whose office was to tell truth, or a story-teller, like those which were in the last century, and perhaps are now among the Irish, whose trade

was only to amuse, it now would be vain to inquire.

Most of the domestic offices were, I believe, hereditary; and probably the laureat of a clan was always the son of the last laureat. The history of the race could no otherwise be communicated or retained; but what genius could be expected in a poet by inheritance?

The nation was wholly illiterate. Neither bards nor *senachies* could write or read; but if they were ignorant, there was no danger of detection; they were believed by those whose vanity they flattered.

The recital of genealogies, which has been considered as very efficacious to the preservation of a true series of ancestry, was anciently made when the heir of the family came to manly age. This practice has never subsisted within time of memory, nor was much credit due to such rehearsers, who might obtrude fictitious pedigrees, either to please their masters, or to hide the deficiency of their own memories.

Where the chiefs of the Highlands have found the histories of their descent, is difficult to tell; for no Erse genealogy was ever written. In general this only is evident, that the principal house of a clan must be very ancient, and that those must have lived long in a place, of whom it is not known when they came thither.

Thus hopeless are all attempts to find any traces of Highland learning. Nor are their primitive customs and ancient manner of life otherwise than very faintly and uncertainly remembered by the present race.

The peculiarities which strike the native of a commercial country, proceeded in a great measure from the want of money. To the servants and dependents that were not domestics, and, if an estimate be made from the capacity of any of their old houses which I have seen, their domestics could have been but few, were appropriated certain portions of land for their support. Macdonald has a piece of ground yet called the Bards' or *Senachies' field*. When a beef was killed for the house, particular parts were claimed as fees by the several officers, or workmen. What was the right of each I have not learned. The head belonged to the smith, and the udder of the cow to the piper; the weaver had likewise his particular part; and so many pieces followed these prescriptive claims, that the laird's was at last but little.

The payment of rent in kind has been so long disused in England, that it is totally forgotten. It was practised very lately in the Hebrides, and probably still continues, not only at St. Kilda, where money is not yet known, but in others of the smaller and remoter islands. It were perhaps to be desired, that no change in this particular should have been made. When the laird could only eat the produce of his lands, he was

under the necessity of residing upon them; and when the tenant could not convert his stock into more portable riches, he could never be tempted away from his farm, from the only place where he could be wealthy. Money confounds subordination, by overpowering the distinctions of rank and birth, and weakens authority, by supplying power of resistance, or expedients for escape. The feudal system is formed for a nation employed in agriculture, and has never long kept its hold where gold and silver have become common.

Their arms were anciently the *Claymore*, or great two-handed sword, and afterwards the two-edged sword and target, or buckler, which was sustained on the left arm. In the midst of the target, which was made of wood, covered with leather, and studded with nails, a slender lance, about two feet long, was sometimes fixed; it was heavy and cumbrous, and accordingly has for some time past been gradually laid aside. Very few targets were at Culloden. The dirk, or broad dagger, I am afraid, was of more use in private quarrels than in battles. The Lochaber axe is only a slight alteration of the old English bill.

After all that has been said of the force and terror of the Highland sword, I could not find that the art of defence was any part of common education. The gentlemen were perhaps sometimes skilful gladiators, but the common men had no other powers than those of violence and courage. Yet it is well known, that the onset of the Highlanders was very formidable. As an army cannot consist of philosophers, a panic is easily excited by any unwonted mode of annoyance. New dangers are naturally magnified; and men accustomed only to exchange bullets at a distance, and rather to hear their enemies than see them, are discouraged and amazed when they find themselves encountered hand to hand, and catch the gleam of steel flashing in their faces.

The Highland weapons gave opportunity for many exertions of personal courage, and sometimes for single combats in the field; like those which occur so frequently in fabulous wars. At Falkirk a gentleman now living was, I suppose after the retreat of the king's troops, engaged at a distance from the rest with an Irish dragoon. They were both skilful swordsmen, and the contest was not easily decided: the dragoon at last had the advantage, and the Highlander called for quarter; but quarter was refused him, and the fight continued till he was reduced to defend himself upon his knee. At that instant one of the Macleods came to his rescue; who, as it is said, offered quarter to the dragoon, but he thought himself obliged to reject what he had before refused, and as battle gives little time to deliberate, was immediately killed.

Funerals were formerly solemnized by calling multitudes together, and entertaining them at a great expense. This emulation of useless cost has been for some time discouraged, and at last in the isle of Sky is almost suppressed.

Of the Erse language, as I understand nothing, I cannot say more than I have been told. It is the rude speech of a barbarous people, who had few thoughts to express, and were content, as they conceived grossly, to be grossly understood. After what has been lately talked of Highland bards, and Highland genius, many will startle when they are told, that the Erse never was a written language; that there is not in the world an Erse manuscript a hundred years old; and that the sounds of the Highlanders were never expressed by letters, till some little books of piety were translated, and a metrical version of the Psalms was made by the synod of Argyle. Whoever therefore now writes in this language, spells according to his own perception of the sound, and his own idea of the power of the letters. The Welsh and the Irish are cultivated tongues. The Welsh two hundred years ago, insulted their English neighbours for the instability of their orthography; while the Erse merely floated in the breath of the people, and could therefore receive little improvement.

When a language begins to teem with books, it is tending to refinement; as those who undertake to teach others must have undergone some labour in improving themselves, they set a proportionate value on their own thoughts, and wish to enforce them by efficacious expressions; speech becomes embodied and permanent; different modes and phrases are compared, and the best obtains an establishment. By degrees, one age improves upon another. Exactness is first obtained, and afterwards elegance. But diction, merely vocal, is always in its childhood. As no man leaves his eloquence behind him, the new generations have all to learn. There may possibly be books without a polished language, but there can be no polished language without books.

That the bards could not read more than the rest of their countrymen, it is reasonable to suppose; because, if they had read, they could probably have written; and how high their compositions may reasonably be rated, an inquirer may best judge by considering what stores of imagery, what principles of ratiocination, what comprehension of knowledge, and what delicacy of elocution, he has known any man attain who cannot read. The state of the bards was yet more hopeless. He that cannot read, may now converse with those that can; but the bard was a barbarian among barbarians, who, knowing nothing himself, lived with others that knew no more.

There has lately been in the islands one of these illiterate poets, who hearing the Bible

read at church, is said to have turned the sacred history into verse. I heard part of a dialogue composed by him, translated by a young lady at Mull, and thought it had more meaning than I expected from a man totally uneducated; but he had some opportunities of knowledge; he lived among a learned people. After all that has been done for the instruction of the Highlanders, the antipathy between their language and literature still continues; and no man that has learned only Erse, is at this time, able to read.

The Erse has many dialects, and the words used in some islands are not always known in others. In literate nations, though the pronunciation, and sometimes the words of common speech, may differ, as now in England, compared with the south of Scotland, yet there is a written diction, which pervades all dialects, and is understood in every province. But where the whole language is colloquial, he that has only one part, never gets the rest, as he cannot get it but by change of residence.

In an unwritten speech, nothing that is not very short is transmitted from one generation to another. Few have opportunities of hearing a long composition often enough to learn it, or have inclination to repeat it so often as is necessary to retain it; and what is once forgotten, is lost for ever. I believe there cannot be recovered in the whole Erse language five hundred lines of which there is any evidence to prove them a hundred years old. Yet I hear that the father of Ossian boasts of two chests more of ancient poetry, which he suppresses, because they are too good for the English.

He that goes into the Highlands with a mind naturally acquiescent, and a credulity eager for wonders, may come back with an opinion very different from mine; for the inhabitants, knowing the ignorance of all strangers in their language and antiquities, perhaps are not very scrupulous adherents to truth; yet I do not say that they deliberately speak studied falsehood, or have a settled purpose to deceive. They have inquired and considered little, and do not always feel their own ignorance. They are not much accustomed to be interrogated by others; and seem never to have thought upon interrogating themselves; so that if they do not know what they tell to be true, they likewise do not distinctly perceive it to be false.

Mr. Boswell was very diligent in his inquiries; and the result of his investigations was, that the answer to the second question was commonly such as nullified the answer to the first.

We were a while told, that they had an old translation of the Scriptures; and told it till it would appear obstinacy to inquire again. Yet by continued accumulation of questions we found, that the translation meant, if any meaning there were, was nothing else than the Irish Bible.

We heard of manuscripts that were, or that had been, in the hands of somebody's father, or grandfather; but at last we had no reason to believe they were other than Irish. Martin mentions Irish, but never any Erse manuscripts, to be found in the islands in his time.

I suppose my opinion of the poems of Ossian is already discovered. I believe they never existed in any other form than that which we have seen. The editor, or author, never could show the original; nor can it be shown by any other. To revenge reasonable incredulity, by refusing evidence, is a degree of insolence, with which the world is not yet acquainted; and stubborn audacity is the last refuge of guilt. It would be easy to show it if he had it; but whence could it be had? It is too long to be remembered, and the language formerly had nothing written. He has doubtless inserted names that circulate in popular stories, and may have translated some wandering ballads, if any can be found; and the names, and some of the images, being recollected, make an inaccurate auditor imagine, by the help of Caledonian bigotry, that he has formerly heard the whole.

I asked a very learned minister in Sky, who had used all arts to make me believe the genuineness of the book, whether at last he believed it himself? but he would not answer. He wished me to be deceived, for the honour of his country; but would not directly and formally deceive me. Yet has this man's testimony been publicly produced, as of one that held Fingal to be the work of Ossian.

It is said, that some men of integrity profess to have heard parts of it, but they all heard them when they were boys; and it was never said that any of them could recite six lines. They remember names, and perhaps some proverbial sentiments; and having no distinct ideas, coin a resemblance without an original. The persuasion of the Scots, however, is far from universal; and in a question so capable of proof, why should doubt be suffered to continue? The editor has been heard to say, that part of the poem was received by him, in the Saxon character. He has then found, by some peculiar fortune, an unwritten language, written in a character which the natives probably never beheld.

I have yet supposed no imposture but in the publisher; yet I am far from certainty, that some translations have not been lately made, that may now be obtruded as parts of the original work. Credulity on one part is a strong temptation to deceit on the other, especially to deceit of which no personal injury is the consequence, and which flatters the author with his own ingenuity. The Scots have something to plead for their easy reception of an improbable fiction: they are seduced by their fondness for their supposed ancestors. A Scotchman must

be a very sturdy moralist, who does not love Scotland better than truth; he will always love it better than inquiry; and if falsehood flatters his vanity, will not be very diligent to detect it. Neither ought the English to be much influenced by Scotch authority; for of the past and present state of the whole Erse nation, the Lowlanders are at least as ignorant as ourselves. To be ignorant is painful; but it is dangerous to quiet our uneasiness by the delusive opiate of hasty persuasion.

But this is the age in which those who could not read, have been supposed to write; in which the giants of antiquated romance have been exhibited as realities. If we know little of the ancient Highlanders, let us not fill the vacuity with Ossian. If we have not searched the Magellanic regions, let us however forbear to people them with Patagons.

Having waited some days at Armidel, we were flattered at last with a wind that promised to convey us to Mull. We went on board a boat that was taking in kelp, and left the isle of Sky behind us. We were doomed to experience, like others, the danger of trusting to the wind, which blew against us, in a short time, with such violence, that we, being no seasoned sailors, were willing to call it a tempest. I was seasick, and lay down. Mr. Boswell kept the deck. The master knew not well whither to go; and our difficulties might perhaps have filled a very pathetic page, had not Mr. Maclean of Col, who, with every other qualification which insular life requires, is a very active and skilful mariner, piloted us safe into his own harbour.

## COL.

In the morning we found ourselves under the isle of Col, where we landed; and passed the first day and night with captain Maclean, a gentleman who has lived some time in the East Indies, but having dethroned no Nabob, is not too rich to settle in his own country.

Next day the wind was fair, and we might have had an easy passage to Mull; but having, contrarily to our own intention, landed upon a new island, we would not leave it wholly unexamined. We therefore suffered the vessel to depart without us, and trusted the skies for another wind.

Mr. Maclean of Col, having a very numerous family, has, for some time past, resided at Aberdeen, that he may superintend their education, and leaves the young gentleman, our friend, to govern his dominions, with the full power of a Highland chief. By the absence of the laird's family, our entertainment was made more difficult, because the house was in a great degree disfurnished; but young Col's kindness and ac-

tivity supplied all defects, and procured us more than sufficient accommodation.

Here I first mounted a little Highland steed; and if there had been many spectators, should have been somewhat ashamed of my figure in the march. The horses of the islands, as of other barren countries, are very low; they are indeed musculous and strong, beyond what their size gives reason for expecting; but a bulky man upon one of their backs makes a very disproportionate appearance.

From the habitation of captain Maclean we went to Grissipol, but called by the way on Mr. Hector Maclean, the minister of Col, whom we found in a hut, that is, a house of only one floor, but with windows and chimney, and not inelegantly furnished. Mr. Maclean has the reputation of great learning: he is seventy-seven years old, but not infirm, with a look of venerable dignity excelling what I remember in any other man.

His conversation was not unsuitable to his appearance. I lost some of his good will, by treating a heretical writer with more regard than, in his opinion, a heretic could deserve. I honoured his orthodoxy, and did not much censure his asperity. A man who has settled his opinions, does not love to have the tranquillity of his conviction disturbed; and at seventy-seven it is time to be in earnest.

Mention was made of the Erse translation of the New Testament, which has been lately published, and of which the learned Mr. Macqueen of Sky spoke with commendation; but Mr. Maclean said, he did not use it, because he could make the text more intelligible to his auditors by an extemporary version. From this I inferred, that the language of the translation was not the language of the isle of Col.

He has no public edifice for the exercise of his ministry; and can officiate to no greater number than a room can contain; and the room of a hut is not very large. This is all the opportunity of worship that is now granted to the inhabitants of the islands, some of whom must travel thither perhaps ten miles. Two chapels were erected by their ancestors, of which I saw the skeletons, which now stand faithful witnesses of the triumph of Reformation.

The want of churches is not the only impediment to piety; there is likewise a want of ministers. A parish often contains more islands than one; and each island can have the minister only in its own turn. At Raasay they had, I think, a right to service only every third Sunday. All the provision made by the present ecclesiastical constitution, for the inhabitants of about a hundred square miles, is a prayer and sermon in a little room, once in three weeks: and even this parsimonious distribution is at the mercy of the weather: and in these islands where the mini-

ter does not reside, it is impossible to tell how many weeks or months may pass without any public exercise of religion.

#### GRISSIPOL IN COL.

AFTER a short conversation with Mr. Maclean, we went on to Grissipol, a house and farm tenanted by Mr. Macsweyn, where I saw more of the ancient life of a Highlander than I had yet found. Mrs. Macsweyn could speak no English, and had never seen any other places than the islands of Sky, Mull, and Col: but she was hospitable and good-humoured, and spread her table with sufficient liberality. We found tea here as in every other place, but our spoons were of horn.

The house of Grissipol stands by a brook very clear and quick; which is, I suppose, one of the most copious streams in the island. This place was the scene of an action, much celebrated in the traditional history of Col, but which probably no two relaters will tell alike.

Some time in the obscure ages, Macneil of Barra married the lady Maclean, who had the isle of Col for her jointure. Whether Macneil detained Col, when the widow was dead, or whether she lived so long as to make her heirs impatient, is perhaps not now known. The younger son, called John Gerves, or John the Giant, a man of great strength, who was then in Ireland, either for safety or for education, dreamed of recovering his inheritance; and getting some adventurers together, which in those unsettled times was not hard to do, invaded Col. He was driven away, but was not discouraged, and collecting new followers, in three years came again with fifty men. In his way he stopped at Artorinish in Morvern, where his uncle was prisoner to Macleod, and was then with his enemies in a tent. Maclean took with him only one servant, whom he ordered to stay at the outside: and where he should see the tent pressed outwards, to strike with his dirk; it being the intention of Maclean, as any man provoked him, to lay hands upon him, and push him back. He entered the tent alone, with his Lochaber axe in his hand, and struck such terror into the whole assembly, that they dismissed his uncle.

When he landed at Col, he saw the sentinel, who kept watch towards the sea, running off to Grissipol, to give Macneil, who was there with a hundred and twenty men, an account of the invasion. He told Macgill, one of his followers, that if he intercepted that dangerous intelligence, by catching the courier, he would give him certain lands in Mull. Upon this promise Macgill pursued the messenger, and either killed or stopped him; and his posterity, till very lately, held the lands in Mull.

The alarm being thus prevented, he came un-

expectedly upon Macneil. Chiefs were in those days never wholly unprovided for an enemy. A fight ensued, in which one of their followers is said to have given an extraordinary proof of activity, by bounding backwards over the brook of Grissipol. Macneil being killed, and many of his clan destroyed, Maclean took possession of the island, which the Macneils attempted to conquer by another invasion, but were defeated and repulsed.

Maclean, in his turn, invaded the estate of the Macneils, took the castle of Brecatig, and conquered the isle of Barra, which he held for seven years, and then restored it to the heirs.

#### CASTLE OF COL.

FROM Grissipol, Mr. Maclean conducted us to his father's seat; a neat new house erected near the old castle, I think, by the last proprietor. Here we were allowed to take our station, and lived very commodiously while we waited for moderate weather and a fair wind, which we did not so soon obtain, but we had time to get some information of the present state of Col, partly by inquiry, and partly by occasional excursions.

Col is computed to be thirteen miles in length, and three in breadth. Both the ends are the property of the duke of Argyle, but the middle belongs to Maclean, who is called Col, as the only laird.

Col is not properly rocky; it is rather one continued rock, of a surface much diversified with protuberances, and covered with a thin layer of earth, which is often broken, and discovers the stone. Such a soil is not for plants that strike deep roots; and perhaps in the whole island nothing has ever yet grown to the height of a table. The uncultivated parts are clothed with heath, among which industry has interspersed spots of grass and corn; but no attempt has been made to raise a tree. Young Col, who has a very laudable desire of improving his patrimony, purposes some time to plant an orchard; which, if it be sheltered by a wall, may perhaps succeed. He has introduced the culture of turnips, of which he has a field, where the whole work was performed by his own hand. His intention is to provide food for his cattle in the winter. This innovation was considered by Mr. Macsweyn as the idle project of a young head, heated with English fancies; but he has now found that turnips will really grow, and that hungry sheep and cows will really eat them.

By such acquisitions as these, the Hebrides may in time rise above their annual distress. Wherever heath will grow, there is reason to think something better may draw nourishment; and by trying the production of other places, plants will be found suitable to every soil.

Col has many lochs, some of which have trouts and eels, and others have never yet been stocked; another proof of the negligence of the islanders, who might take fish in the inland waters when they cannot go to sea.

Their quadrupeds are horses, cows, sheep, and goats. They have neither deer, hares, nor rabbits. They have no vermin except rats, which have been lately brought thither by sea, as to other places; and are free from serpents, frogs, and toads.

The harvest in Col, and in Lewis, is ripe sooner than in Sky, and the winter in Col is never cold, but very tempestuous. I know not that I ever heard the wind so loud in any other place; and Mr. Boswell observed, that its noise was all its own, for there were no trees to increase it.

Noise is not the worst effect of the tempests; for they have thrown the sand from the shore over a considerable part of the land, and it is said still to encroach and destroy more and more pasture; but I am not of opinion, that by any surveys or landmarks, its limits have been ever fixed, or its progression ascertained. If one man has confidence enough to say, that it advances, nobody can bring any proof to support him in denying it. The reason why it is not spread to a greater extent, seems to be, that the wind and rain come almost together, and that it is made close and heavy by the wet before the storms can put it in motion. So thick is the bed, and so small the particles, that if a traveller should be caught by a sudden gust in dry weather, he would find it very difficult to escape with life.

For natural curiosities I was shown only two great masses of stone, which lie loose upon the ground; one on the top of a hill, and the other at a small distance from the bottom. They certainly were never put into their present place by human strength or skill; and though an earthquake might have broken off the lower stone, and rolled it into the valley, no account can be given of the other, which lies on the hill, unless, which I forgot to examine, there be still near it some higher rock, from which it might be torn. All nations have a tradition, that their earliest ancestors were giants, and these stones are said to have been thrown up and down by a giant and his mistress. There are so many more important things of which human knowledge can give no account, that it may be forgiven us, if we speculate no longer on two stones in Col.

This island is very populous. About nine-and-twenty years ago, the fencible men of Col were reckoned one hundred and forty; which is the sixth of eight hundred and forty; and probably some contrived to be left out of the list. The minister told us, that a few years ago the inhabitants were eight hundred, between the ages of seven and of seventy. Round numbers are seldom exact. But in this case the authority is good, and the error likely to be little. If

to the eight hundred be added what the laws of computation require, they will be increased to at least a thousand; and if the dimensions of the country have been accurately related, every mile maintains more than twenty-five.

This proportion of habitation is greater than the appearance of the country seems to admit; for wherever the eye wanders, it sees much waste and little cultivation. I am more inclined to extend the land, of which no measure has ever been taken, than to diminish the people, who have been really numbered. Let it be supposed, that a computed mile contains a mile and a half, as was commonly found true in the mensuration of the English roads, and we shall then allot nearly twelve to a mile, which agrees much better with ocular observation.

Here, as in Sky, and other islands, are the laird, the tacksmen, and the under-tenants.

Mr. Maclean, the laird, has very extensive possessions, being proprietor, not only of far the greater part of Col, but of the extensive island of Rum, and a very considerable territory in Mull.

Rum is one of the larger islands almost square, and therefore of great capacity in proportion to its sides. By the usual method of estimating computed extent, it may contain more than a hundred and twenty square miles.

It originally belonged to Clanronald, and was purchased by Col; who, in some dispute about the bargain, made Clanronald prisoner, and kept him nine months in confinement. Its owner represents it as mountainous, rugged, and barren. In the hills there are red deer. The horses are very small, but of a breed eminent for beauty. Col, not long ago, bought one of them from a tenant; who told him that as he was of a shape uncommonly elegant, he could not sell him but at a high price; and that whoever had him should pay a guinea and a half.

There are said to be in Barra a race of horses yet smaller, of which the highest is not above thirty-six inches.

The rent of Rum is not great. Mr. Maclean declared that he should be very rich, if he could set his land at two-pence halfpenny an acre. The inhabitants are fifty-eight families, who continued papists for some time after the laird became a protestant. Their adherence to their old religion was strengthened by the countenance of the laird's sister, a zealous Romanist, till one Sunday as they were going to mass under the conduct of their patroness, Maclean met them on the way, gave one of them a blow on the head with a *yellow stick*, I suppose a cane, for which the Erse had no name, and drove them to the kirk, from which they have never since departed. Since the use of this method of conversion, the inhabitants of Egg and Canna, who continue papists, call the protestantism of Rum, the religion of the *Yellow Stick*.

The only popish islands are Egg and Canna. Egg is the principal island of a parish, in which, though he has no congregation, the protestant minister resides. I have heard of nothing curious in it, but the cave in which a former generation of the islanders were smothered by Macleod.

If we had travelled with more leisure, it had not been fit to have neglected the popish islands. Popery is favourable to ceremony; and among ignorant nations ceremony is the only preservative of tradition. Since protestantism was extended to the savage parts of Scotland, it has perhaps been one of the chief labours of the ministers to abolish stated observances, because they continued the remembrance of the former religion. We, therefore, who came to see old traditions, and see antiquated manners, should probably have found them among the papists.

Canna, the other popish island, belongs to Clanronald. It is said not to comprise more than twelve miles of land, and yet maintains as many inhabitants as Rum.

We were at Col under the protection of the young laird, without any of the distresses which Mr. Pennant, in a fit of simple credulity, seems to think almost worthy of an elegy by Ossian. Wherever we roved, we were pleased to see the reverence with which his subjects regarded him. He did not endeavour to dazzle them by any magnificence of dress: his only distinction was a feather in his bonnet: but as soon as he appeared, they forsook their work and clustered about him: he took them by the hand, and they seemed mutually delighted. He has the proper disposition of a chieftain, and seems desirous to continue the customs of his house. The bagpiper played regularly, when dinner was served, whose person and dress made a good appearance; and he brought no disgrace upon the family of Rankin, which has long supplied the lairds of Col with hereditary music.

The tacksmen of Col seem to live with less dignity and convenience than those of Sky; where they had good houses, and tables not only plentiful, but delicate. In Col only two houses pay the window tax; for only two have six windows, which, I suppose, are the laird's and Mr. Macsweyn's.

The rents have, till within seven years, been paid in kind, but the tenants finding that cattle and corn varied in their price, desired for the future to give their landlord money; which, not having yet arrived at the philosophy of commerce, they consider as being every year of the same value.

We were told of a particular mode of under-tenure. The tacksmen admits some of his inferior neighbours to the cultivation of his grounds, on condition that, performing all the work, and giving a third part of the seed, they shall keep a certain number of cows, sheep, and

goats, and reap a third part of the harvest. Thus, by less than the tillage of two acres, they pay the rent of one.

There are tenants below the rank of tacksmen, that have got smaller tenants under them; for in every place, where money is not the general equivalent, there must be some whose labour is immediately paid by daily food.

A country that has no money, is by no means convenient for beggars, both because such countries are commonly poor, and because charity requires some trouble and some thought. A penny is easily given upon the first impulse of compassion, or impatience of importunity; but few will deliberately search their cupboards or their granaries to find out something to give. A penny is likewise easily spent; but victuals, if they are unprepared, require house room, and fire, and utensils, which the beggar knows not where to find.

Yet beggars there sometimes are, who wander from island to island. We had in our passage to Mull the company of a woman and her child, who had exhausted the charity of Col. The arrival of a beggar on an island is accounted a sinistrous event. Every body considers that he shall have the less for what he gives away. Their alms, I believe, is generally oatmeal.

Near to Col is another island called *Tir-eyr*, eminent for its fertility. Though it has but half the extent of Rum, it is so well peopled, that there have appeared, not long ago, nine hundred and fourteen at a funeral. The plenty of this island enticed beggars to it, who seemed so burthensome to the inhabitants, that a formal compact was drawn up, by which they obliged themselves to grant no more relief to casual wanderers, because they had among them an indigent woman of high birth, whom they considered as entitled to all that they could spare. I have read the stipulation, which was indited with juridical formality, but was never made valid by regular subscription.

If the inhabitants of Col have nothing to give, it is not that they are oppressed by their landlord; their leases seem to be very profitable. One farmer, who pays only seven pounds a-year has maintained seven daughters and three sons, of whom the eldest is educated at Aberdeen for the ministry; and now, at every vacation, opens a school in Col.

Life is here, in some respects, improved beyond the condition of some other islands. In Sky, what is wanted can only be bought, as the arrival of some wandering pedlar may afford an opportunity; but in Col there is a standing shop, and in Mull there are two. A shop in the islands, as in other places of little frequentation, is a repository of every thing requisite for common use. Mr. Boswell's journal was filled, and he bought some paper in Col. To a man that ranges the streets of London, where he is tempted

to contrive wants for the pleasure of supplying them, a shop affords no image worthy of attention, but in an island it turns the balance of existence between good and evil. To live in perpetual want of little things, is a state not indeed of torture, but of constant vexation. I have in Sky had some difficulty to find ink for a letter; and if a woman breaks her needle, the work is at a stop.

As it is, the islanders are obliged to content themselves with succedaneous means for many common purposes. I have seen the chief man of a very wide district riding with a halter for a bridle, and governing his hobby with a wooden curb.

The people of Col, however, do not want dexterity to supply some of their necessities. Several arts which make trades, and demand apprenticeships in great cities, are here the practices of daily economy. In every house candles are made, both moulded and dipped. Their wicks are small shreds of linen cloth. They all know how to extract from the cuddy oil for their lamps. They all tan skins and make brogues.

As we travelled through Sky, we saw many cottages, but they very frequently stood single on the naked ground. In Col, where the hills opened a place convenient for habitation, we found a petty village, of which every hut had a little garden adjoining; thus they made an appearance of social commerce and mutual offices, and of some attention to convenience and future supply. There is not in the Western Islands any collection of buildings that can make pretensions to be called a town, except in the isle of Lewis, which I have not seen.

If Lewis is distinguished by a town, Col has also something peculiar. The young laird has attempted what no islander perhaps ever thought on. He has begun a road capable of a wheel-carriage. He has carried it about a mile, and will continue it by annual elongation from his house to the harbour.

Of taxes here is no reason for complaining; they are paid by a very easy composition. The multi-tax for Col is twenty shillings. Whisky is very plentiful: there are several stills in the island, and more is made than the inhabitants consume.

The great business of insular policy is now to keep the people in their own country. As the world has been let in upon them, they have heard of happier climates and less arbitrary government; and if they are disgusted, have emissaries among them ready to offer them land and houses, as a reward for deserting their chief and clan. Many have departed both from the main of Scotland and from the islands; and all that go may be considered as subjects lost to the British crown; for a nation scattered in the boundless regions of America, resembles rays diverging from a focus. All the rays remain,

but the heat is gone. Their power consisted in their concentration; when they are dispersed, they have no effect.

It may be thought that they are happier by the change; but they are not happy as a nation, for they are a nation no longer. As they contribute not to the prosperity of any community, they must want that security, that dignity, that happiness, whatever it be, which a prosperous community throws back upon individuals.

The inhabitants of Col have not yet learned to be weary of their heath and rocks, but attend their agriculture and their dairies, without listening to American seducements.

There are some however who think that this emigration has raised terror disproportionate to its real evil; and that it is only a new mode of doing what was always done. The Highlands, they say, never maintained their natural inhabitants: but the people, when they found themselves too numerous, instead of extending cultivation, provided for themselves by a more compendious method, and sought better fortune in other countries. They did not indeed go away in collective bodies, but withdrew invisibly, a few at a time; but the whole number of fugitives was not less, and the difference between other times and this, is only the same as between evaporation and effusion.

This is plausible, but I am afraid it is not true. Those who went before, if they were not sensibly missed, as the argument supposes, must have gone either in less number, or in a manner less detrimental, than at present; because formerly there was no complaint. Those who then left the country, were generally the idle dependants on overburdened families, or men who had no property, and therefore carried away only themselves. In the present eagerness of emigration, families, and almost communities, go away together. Those who were considered as prosperous and wealthy, sell their stock and carry away the money. Once none went away but the useless and poor; in some parts there is now reason to fear, that none will stay but those who are too poor to remove themselves, and too useless to be removed at the cost of others.

Of antiquity there is not more knowledge in Col than in other places; but every where something may be gleaned.

How ladies were portioned, when there was no money, it would be difficult for an Englishman to guess. In 1649, Maclean of Dronart in Mull married his sister Fingala to Maclean of Col, with a hundred and eighty kine; and stipulated, that if she became a widow, her jointure should be three hundred and sixty. I suppose some proportionate tract of land was appropriated to their pasturage.

The disposition to pompous and expensive funerals, which has at one time or other pre-

valled in the most parts of the civilized world, is not yet suppressed in the islands, though some of the ancient solemnities are worn away, and singers are no longer hired to attend the procession. Nineteen years ago, at the burial of the laird of Col, were killed thirty cows, and about fifty sheep. The number of the cows is positively told, and we must suppose other vicinals in like proportion.

Mr. Maclean informed us of an old game, of which he did not tell the original, but which may perhaps be used in other places, where the reason of it is not yet forgot. At New-year's eve, in the hall or castle of the laird, where, at festal seasons, there may be supposed a very numerous company, one man dresses himself in a cow's hide, upon which other men beat with sticks. He runs with all this noise round the house, which all the company quits in a counterfeited fright; the door is then shut. At New-year's eve there is no great pleasure to be had out of doors in the Hebrides. They are sure soon to recover from their terror enough to solicit for re-admission; which, for the honour of poetry, is not to be obtained but by repeating a verse, with which those that are knowing and provident take care to be furnished.

Very near the house of Maclean stands the castle of Col, which was the mansion of the laird, till the house was built. It is built upon a rock, as Mr. Boswell remarked, that it might not be mined. It is very strong, and having been not long uninhabited, is yet in repair. On the wall was, not long ago, a stone with an inscription, importing, that if any man of the clan of Maclonich shall appear before this castle, though he come at midnight, with a man's head in his hand, he shall there find safety and protection against all but the king.

This is an old Highland treaty, made upon a very memorable occasion. Maclean, the son of John Gerves, who recovered Col, and conquered Barra, had obtained, it is said, from James the Second, a grant of the lands of Lochiel, forfeited, I suppose, by some offence against the state.

Forfeited estates were not in those days quietly resigned; Maclean, therefore, went with an armed force to seize his new possessions, and I know not for what reason, took his wife with him. The Camerons rose in defence of their chief, and a battle was fought at the head of Loch Ness, near the place where Fort Augustus now stands, in which Lochiel obtained the victory, and Maclean, with his followers, was defeated and destroyed.

The lady fell into the hands of the conquerors, and being found pregnant, was placed in the custody of Maclonich, one of a tribe or family trunched from Cameron, with orders, if she brought a boy, to destroy him, if a girl, to spare her

Maclonich's wife, who was with child likewise, had a girl about the same time at which lady Maclean brought a boy; and Maclonich, with more generosity to his captive, than fidelity to his trust, contrived that the children should be changed.

Maclean being thus preserved from death, in time recovered his original patrimony; and in gratitude to his friend, made his castle a place of refuge to any of the clan that should think himself in danger; and as a proof of reciprocal confidence, Maclean took upon himself and his posterity the care of educating the heir of Maclonich.

This story, like all other traditions of the Highlands, is variously related; but though some circumstances are uncertain, the principal fact is true. Maclean undoubtedly owed his preservation to Maclonich; for the treaty between the two families has been strictly observed: it did not sink into disuse and oblivion, but continued in its full force while the chieftains retained their power. I have read a demand of protection, made not more than thirty-seven years ago, for one of the Maclonichs, named Ewen Cameron, who had been accessory to the death of Macmartin, and had been banished by Lochiel, his lord, for a certain term; at the expiration of which he returned married from France; but the Macmartins, not satisfied with the punishment, when he attempted to settle, still threatened him with vengeance. He therefore asked, and obtained, shelter in the isle of Col.

The power of protection subsists no longer; but what the law permits is yet continued, and Maclean of Col now educates the heir of Maclonich.

There still remains in the islands, though it is passing fast away, the custom of fosterage. A laird, a man of wealth and eminence, sends his child, either male or female, to a tacksman, or tenant, to be fostered. It is not always his own tenant, but some distant friend, that obtains this honour; for an honour such a trust is very reasonably thought. The terms of fosterage seem to vary in different islands. In Mull, the father sends with his child a certain number of cows, to which the same number is added by the fosterer. The father appropriates a proportionable extent of ground, without rent, for their pasturage. If every cow brings a calf, half belongs to the fosterer, and half to the child; but if there be only one calf between two cows, it is the child's, and when the child returns to the parents, it is accompanied by all the cows given, both by the father and by the fosterer, with half of the increase of the stock by propagation. These beasts are considered as a portion, and called Macalvie cattle, of which the father has the produce, but is supposed not to have the full property, but to owe the same number to the

child, as a portion to the daughter, or a stock for the son.

Children continue with the fosterer perhaps six years, and cannot, where this is the practice, be considered as burdensome. The fosterer, if he gives four cows, receives likewise four, and has, while the child continues with him, grass for eight without rent, with half the calves, and all the milk, for which he pays only four cows when he dismisses his *dall*, for that is the name for a fostered child.

Fosterage is, I believe, sometimes performed upon more liberal terms. Our friend, the young laird of Col, was fostered by Macsweyn of Grissipol. Macsweyn then lived a tenant of Sir James Macdonald in the isle of Sky; and therefore Col, whether he sent him cattle or not, could grant him no land. The *dall*, however, at his return, brought back a considerable number of Macalivie cattle, and of the friendship so formed there have been good effects. When Macdonald raised his rents, Macsweyn was, like other tenants, discontented, and resigning his farm, removed from Sky to Col, and was established at Grissipol.

These observations we made by favour of the contrary wind that drove us to Col, an island not often visited; for there is not much to amuse curiosity, or to attract avarice.

The ground has been hitherto, I believe, used chiefly for pasturage. In a district, such as the eye can command, there is a general herdsman, who knows all the cattle of the neighbourhood, and whose station is upon a hill from which he surveys the lower grounds; and if one man's cattle invade another's grass, drives them back to their own borders. But other means of profit begin to be found; kelp is gathered and burnt, and sloops are loaded with the concreted ashes. Cultivation is likely to be improved by the skill and encouragement of the present heir, and the inhabitants of those obscure valleys will partake of the general progress of life.

The rents of the parts which belong to the duke of Argyle, have been raised from fifty-five to one hundred and five pounds, whether from the land or the sea I cannot tell. The bounties of the sea have lately been so great, that a farm in Southuist has risen in ten years from a rent of thirty pounds to one hundred and eighty.

He who lives in Col, and finds himself condemned to solitary meals, and incommunicable reflection, will find the usefulness of that middle order of tacksmen, which some who applaud their own wisdom are wishing to destroy. Without intelligence, man is not social, he is only gregarious; and little intelligence will there be, where all are constrained to daily labour, and every mind must wait upon the hand.

After having listened for some days to the tempest, and wandered about the island till our

curiosity was satisfied, we began to think about our departure. To leave Col in October was not very easy. We however found a sloop which lay on the coast to carry kelp; and for a price which we thought levied upon our necessities, the master agreed to carry us to Mull, whence we might readily pass back to Scotland.

## MULL.

As we were to catch the first favourable breath, we spent the night not very elegantly nor pleasantly in the vessel, and were landed next day at Tabor Morar, a port in Mull, which appears to an unexperienced eye formed for the security of ships; for its mouth is closed by a small island, which admits them through narrow channels into a bason sufficiently capacious. They are indeed safe from the sea, but there is a hollow between the mountains, through which the wind issues from the land with very mischievous violence.

There was no danger while we were there, and we found several other vessels at anchor; so that the port had a very commercial appearance.

The young laird of Col, who had determined not to let us lose his company, while there was any difficulty remaining, came over with us. His influence soon appeared; for he procured us horses, and conducted us to the house of Dr. Maclean, where we found very kind entertainment, and very pleasing conversation. Miss Maclean, who was born, and had been bred, at Glasgow, having removed with her father to Mull, added to other qualifications, a great knowledge of the Erse language, which she had not learned in her childhood, but gained by study, and was the only interpreter of Erse poetry that I could ever find.

The isle of Mull is perhaps in extent the third of the Hebrides. It is not broken by waters, nor shot into promontories, but is a solid and compact mass, of breadth nearly equal to its length. Of the dimensions of the larger islands, there is no knowledge approaching to exactness. I am willing to estimate it as containing about three hundred square miles.

Mull had suffered like Sky by the black winter of seventy-one, in which, contrary to all experience, a continued frost detained the snow eight weeks upon the ground. Against a calamity never known, no provision had been made, and the people could only pine in helpless misery. One tenant was mentioned, whose cattle perished to the value of three hundred pounds; a loss which probably more than the life of man is necessary to repair. In countries like these, the descriptions of famine become intelligible. Where by vigorous and artful cultivation of a soil naturally fertile, there is commonly a super-

fluous growth both of grain and grass; where the fields are crowded with cattle; and where every hand is able to attract wealth from a distance, by making something that promotes ease, or gratifies vanity, a dear year produces only a comparative want, which is rather seen than felt, and which terminates commonly in no worse effect, than that of condemning the lower orders of the community to sacrifice a little luxury to convenience, or at most a little convenience to necessity.

But where the climate is unkind, and the ground penurious, so that the most fruitful years produce only enough to maintain themselves; where life, unimproved and unadorned, fades into something little more than naked existence, and every one is busy for himself, without any arts by which the pleasure of others may be increased; if to the daily burden of distress any additional weight be added, nothing remains but to despair and die. In Mull the disappointment of a harvest, or a murrain among the cattle, cuts off the regular provision; and they who have no manufactures, can purchase no part of the superfluities of other countries. The consequence of a bad season is here not scarcity, but emptiness; and they whose plenty was barely a supply of natural and present need, when that slender stalk fails, must perish with hunger.

All travel has its advantages. If the passenger visits better countries, he may learn to improve his own, and if fortune carries him to worse, he may learn to enjoy it.

Mr. Boswell's curiosity strongly impelled him to survey Iona, or Icolmkill, which was to the early ages the great school of theology, and is supposed to have been the place of sepulture for the ancient kings. I, though less eager, did not oppose him.

That we might perform this expedition, it was necessary to traverse a great part of Mull. We passed a day at Dr. Maclean's, and could have been well contented to stay longer. But Col provided us horses, and we pursued our journey. This was a day of inconvenience, for the country is very rough, and my horse was but little. We travelled many hours through a tract, black and barren, in which, however, there were the reliques of humanity; for we found a ruined chapel in our way.

It is natural, in traversing this gloom of desolation, to inquire, whether something may not be done to give nature a more cheerful face; and whether those hills and moors that afford heath, cannot, with a little care and labour, bear something better? The first thought that occurs is to cover them with trees, for that in many of these naked regions trees will grow, is evident, because stumps and roots are yet remaining; and the speculatist hastily proceeds to censure

that negligence and laziness that has omitted for so long a time so easy an improvement.

To drop seeds into the ground, and attend their growth, requires little labour and no skill. He who remembers that all the woods, by which the wants of man have been supplied from the Deluge till now, were self-sown, will not easily be persuaded to think all the art and preparation necessary, which the georgic writers prescribe to planters. Trees certainly have covered the earth with very little culture. They wave their tops among the rocks of Norway, and might thrive as well in the Highlands and Hebrides.

But there is a frightful interval between the seed and timber. He that calculates the growth of trees, has the unwelcome remembrance of the shortness of life driven hard upon him. He knows that he is doing what will never benefit himself; and when he rejoices to see the stem rise, is disposed to repine that another shall cut it down.

Plantation is naturally the employment of a mind unburdened with care, and vacant to futurity, saturated with present good, and at leisure to derive gratification from the prospect of posterity. He that pines with hunger, is in little care how others shall be fed. The poor man is seldom studious to make his grandson rich. It may be soon discovered, why in a place, which hardly supplies the cravings of necessity, there has been little attention to the delights of fancy, and why distant convenience is unregarded, where the thoughts are turned with incessant solicitude upon every possibility of immediate advantage.

Neither is it quite so easy to raise large woods as may be conceived. Trees intended to produce timber must be sown where they are to grow; and ground sown with trees must be kept useless for a long time, inclosed at an expense from which many will be discouraged by the remoteness of the profit, and watched with that attention, which, in places where it is most needed, will neither be given nor bought. That it cannot be ploughed, is evident: and if cattle be suffered to graze upon it, they will devour the plants as fast as they rise. Even in coarser countries, where herds and flocks are not fed, not only the deer and the wild goats will browse upon them, but the hare and rabbit will nibble them. It is therefore reasonable to believe, what I do not remember any naturalist to have remarked, that there was a time when the world was very thinly inhabited by beasts, as well as men, and that the woods had leisure to rise high before animals had bred numbers sufficient to intercept them.

Sir James Macdonald, in part of the wastes of his territory, set or sowed trees to the number, as I have been told, of several millions, ex-

pecting, doubtless, that they would grow up into future navies and cities; but for want of inclosure, and of that care which is always necessary, and will hardly ever be taken, all his cost and labour have been lost, and the ground is likely to continue an useless heath.

Having not any experience of a journey in Mull, we had no doubt of reaching the sea by daylight, and therefore had not left Dr. Maclean's very early. We travelled diligently enough, but found the country, for road there was none, very difficult to pass. We were always struggling with some obstruction or other, and our vexation was not balanced by any gratification of the eye or mind. We were now long enough acquainted with hills and heath to have lost the emotion that they once raised, whether pleasing or painful, and had our mind employed only on our own fatigue. We were however sure, under Col's protection, of escaping all real evils. There was no house in Mull to which he could not introduce us. He had intended to lodge us, for that night, with a gentleman that lived upon the coast, but discovered on the way, that he then lay in bed without hope of life.

We resolved not to embarrass a family, in a time of so much sorrow, if any other expedient could be found; and as the island of Ulva was over-against us, it was determined that we should pass the strait and have recourse to the laird, who, like the other gentlemen of the islands, was known to Col. We expected to find a ferry-boat, but when at last we came to the water the boat was gone.

We were now again at a stop. It was the sixteenth of October, a time when it is not convenient to sleep in the Hebrides without a cover, and there was no house within our reach, but that which we had already declined.

#### ULVA.

WHILE we stood deliberating, we were happily espied from an Irish ship, that lay at anchor in the strait. The master saw that we wanted a passage, and with great civility sent us his boat, which quickly conveyed us to Ulva, where we were very liberally entertained by Mr. Macquarry.

To Ulva we came in the dark, and left it before noon the next day. A very exact description therefore will not be expected. We were told, that it is an island of no great extent, rough and barren, inhabited by the Macquarrys; a clan not powerful nor numerous, but of antiquity, which most other families are content to reverence. The name is supposed to be a deprecation of some other; for the Erse language does not afford it any etymology. Macquarry is proprietor both of Ulva and some adjacent islands, among which is Staffa, so lately raised to renown by Mr. Banks.

When the islanders were reproached with their ignorance or insensibility of the wonders of Staffa, they had not much to reply. They had indeed considered it little, because they had always seen it; and none but philosophers, nor they always, are struck with wonder, otherwise than by novelty. How would it surprise an unenlightened ploughman, to hear a company of sober men inquiring by what power the hand tosses a stone, or why the stone, when it is tossed, falls to the ground!

Of the ancestors of Macquarry, who thus lie hid in this unfrequented island, I have found memorials in all places where they could be expected.

Inquiring after the reliques of former manners, I found that in Ulva, and, I think, no where else, is continued the payment of the *mercheta mulierum*; a fine in old times due to the laird at the marriage of a virgin. The original of this claim, as of our tenure of *borough English*, is variously delivered. It is pleasant to find ancient customs in old families. This payment like others, was, for want of money, made anciently in the produce of the land. Macquarry was used to demand a sheep, for which he now takes a crown, by that inattention to the uncertain proportion between the value and the denomination of money, which has brought much disorder into Europe. A sheep has always the same power of supplying human wants, but a crown will bring at one time more, at another less.

Ulva was not neglected by the piety of ancient times; it has still to show what was once a church.

#### INCH KENNETH.

In the morning we went again into the boat, and were landed on Inch Kenneth, an island about a mile long, and perhaps half a mile broad, remarkable for pleasantness and fertility. It is verdant and grassy, and fit both for pasture and tillage; but it has no trees. Its only inhabitants were Sir Allan Maclean and two young ladies, his daughters, with their servants.

Romance does not often exhibit a scene that strikes the imagination more than this little desert in these depths of western obscurity, occupied not by a gross herdsman, or amphibious fisherman, but by a gentleman and two ladies, of high birth, polished manners, and elegant conversation, who, in a habitation raised not very far above the ground, but furnished with unexpected neatness and convenience, practised all the kindness of hospitality, and refinement of courtesy.

Sir Allan is the chieftain of the great clan of Maclean, which is said to claim the second place among the Highland families, yielding only to Macdonald. Though by the misconduct

of his ancestors, most of the extensive territory, which would have descended to him, has been alienated, he still retains much of the dignity and authority of his birth. When soldiers were lately wanting for the American war, application was made to Sir Allan, and he nominated a hundred men for the service, who obeyed the summons, and bore arms under his command.

He had then, for some time, resided with the young ladies in Inch Kenneth, where he lives not only with plenty, but with elegance, having conveyed to his cottage a collection of books, and what else is necessary to make his hours pleasant.

When we landed, we were met by Sir Allan and the ladies, accompanied by Miss Macquarry, who had passed some time with them, and now returned to Ulva with her father.

We all walked together to the mansion, where we found one cottage for Sir Allan, and, I think, two more for the domestics and the offices. We entered, and wanted little that palaces afford. Our room was neatly floored, and well lighted; and our dinner, which was dressed in one of the other huts, was plentiful and delicate.

In the afternoon Sir Allan reminded us, that the day was Sunday, which he never suffered to pass without some religious distinction, and invited us to partake in his acts of domestic worship; which I hope neither Mr. Boswell nor myself will be suspected of a disposition to refuse. The elder of the ladies read the English service.

Inch Kenneth was once a seminary of ecclesiastics, subordinate, I suppose, to Icolmkill. Sir Allan had a mind to trace the foundations of the college, but neither I nor Mr. Boswell, who bends a keener eye on vacancy, were able to perceive them.

Our attention, however, was sufficiently engaged by a venerable chapel, which stands yet entire, except that the roof is gone. It is about sixty feet in length and thirty in breadth. On one side of the altar is a bas-relief of the Blessed Virgin, and by it lies a little bell; which, though cracked, and without a clapper, has remained there for ages guarded only by the venerableness of the place. The ground round the chapel is covered with grave-stones of chiefs and ladies; and still continues to be a place of sepulture.

Inch Kenneth is a proper prelude to Icolmkill. It was not without some mournful emotion that we contemplated the ruins of religious structures, and the monuments of the dead.

On the next day we took a more distinct view of the place, and went with the boat to see oysters in the bed, out of which the boatmen forced up as many as were wanted. Even Inch Kenneth has a subordinate island, named Sandiland, I suppose in contempt, where we landed, and found a rock, with a surface of perhaps four

acres, of which one is naked stone, another spread with sand and shells, some of which I picked up for their glossy beauty, and two covered with a little earth and grass, on which Sir Allan has a few sheep. I doubt not but when there was a college at Inch Kenneth, there was a hermitage upon Sandiland.

Having wandered over those extensive plains, we committed ourselves again to the winds and waters: and after a voyage of about ten minutes, in which we met with nothing very observable, were again safe upon dry ground.

We told Sir Allan our desire of visiting Icolmkill, and entreated him to give us his protection, and his company. He thought proper to hesitate a little; but the ladies hinted, that as they knew he would not finally refuse, he would do better if he preserved the grace of ready compliance. He took their advice, and promised to carry us on the morrow in his boat.

We passed the remaining part of the day in such amusements as were in our power. Sir Allan related the American campaign, and at evening one of the ladies played on her harpsichord, while Col and Mr. Boswell danced a Scottish reel with the other.

We could have been easily persuaded to a longer stay upon Inch Kenneth, but life will not be all passed in delight. The session at Edinburgh was approaching, from which Mr. Boswell could not be absent.

In the morning our boat was ready; it was high and strong. Sir Allan victualled it for the day, and provided able rowers. We now parted from the young laird of Col, who had treated us with so much kindness, and concluded his favours by consigning us to Sir Allan. Here we had the last embrace of this amiable man, who, while these pages were preparing to attest his virtues, perished in the passage between Ulva and Inch Kenneth.

Sir Allan, to whom the whole region was well known, told us of a very remarkable cave, to which he would show us the way. We had been disappointed already by one cave, and were not much elevated by the expectation of another.

It was yet better to see it, and we stopped at some rocks on the coast of Mull. The mouth is fortified by vast fragments of stone, over which we made our way, neither very nimbly, nor very securely. The place, however, well repaid our trouble. The bottom, as far as the flood rushes in, was encumbered with large pebbles; but as we advanced, was spread over with smooth sand. The breadth is about forty-five feet; the roof rises in an arch, almost regular, to a height which we could not measure; but I think it about thirty feet.

This part of our curiosity was nearly frustrated; for though we went to see a cave, and knew that caves are dark, we forgot to carry

capers, and did not discover our omission till we were awakened by our wants. Sir Allan then sent one of the boatmen into the country, who soon returned with one little candle. We were thus enabled to go forward, but could not venture far. Having passed inward from the sea to a great depth, we found on the right hand a narrow passage, perhaps not more than six feet wide, obstructed by great stones, over which we climbed, and came into a second cave in breadth twenty-five feet. The air in this apartment was very warm, but not oppressive, nor loaded with vapours. Our light showed no tokens of a feculent or corrupted atmosphere. Here was a square stone, called, as we are told, *Fingal's table*.

If we had been provided with torches, we should have proceeded in our search, though we had already gone as far as any former adventurer except some who are reported never to have returned; and measuring our way back, we found it more than a hundred and sixty yards, the eleventh part of a mile.

Our measures were not critically exact, having been made with a walking pole, such as it is convenient to carry in these rocky countries, of which I guessed the length by standing against it. In this there could be no great error, nor do I much doubt but the Highlander, whom we employed, reported the number right. More nicety, however, is better, and no man should travel unprovided with instruments for taking heights and distances.

There is yet another cause of error not always easily surmounted, though more dangerous to the veracity of itinerary narratives, than imperfect mensuration. An observer deeply impressed by any remarkable spectacle, does not suppose, that the traces will soon vanish from his mind, and having commonly no great convenience for writing, defers the description to a time of more leisure and better accommodation.

He who has not made the experiment, or who is not accustomed to require rigorous accuracy from himself, will scarcely believe how much a few hours take from certainty of knowledge, and distinctness of imagery; how the succession of objects will be broken, how separate parts will be confused, and how many particular features and discriminations will be compressed and conglobated into one gross and general idea.

To this dilatory notation must be imputed the false relations of travellers, where there is no imaginable motive to deceive. They trusted to memory what cannot be trusted safely but to the eye, and told by guess what a few hours before they had known with certainty. Thus it was that Wheeler and Spon described with irreconcilable contrariety things which they

surveyed together, and which both undoubtedly designed to show as they saw them.

When we had satisfied our curiosity in the cave, so far as our penury of light permitted us, we clambered again to our boats, and proceeded along the coast of Mull to a headland, called Atun, remarkable for the columnar form of the rocks, which rise in a series of pilasters, with a degree of regularity which Sir Allan thinks not less worthy of curiosity than the shore of Staffa.

Not long after we came to another range of black rocks, which had the appearance of broken pilasters, set one behind another to a great depth. This place was chosen by Sir Allan for our dinner. We were easily accommodated with seats, for the stones were of all heights, and refreshed ourselves and our boatmen, who could have no other rest till we were at Icolmkill.

The evening was now approaching, and we were yet at a considerable distance from the end of our expedition. We could therefore stop no more to make remarks in the way, but set forward with some degree of eagerness. The day soon failed us, and the moon presented a very solemn and pleasing scene. The sky was clear, so that the eye commanded a wide circle; the sea was neither still nor turbulent; the wind neither silent nor loud. We were never far from one coast or another, on which, if the weather had become violent, we could have found shelter, and therefore contemplated at ease the region through which we glided in the tranquillity of the night, and saw now a rock and now an island grow gradually conspicuous and gradually obscure. I committed the fault which I have just been censuring, in neglecting, as we passed, to note the series of this placid navigation.

We were very near an island, called Nun's Island, perhaps from an ancient convent. Here is said to have been dug the stone which was used in the buildings of Icolmkill. Whether it is now inhabited we could not stay to inquire.

At last we came to Icolmkill, but found no convenience for landing. Our boat could not be forced very near the dry ground, and our Highlanders carried us over the water.

We were now treading that illustrious island, which was once the luminary of the Caledonian regions, whence savage clans and roving barbarians derived the benefits of knowledge, and the blessings of religion. To abstract the mind from all local emotion would be impossible, if it were endeavoured, and would be foolish, if it were possible. Whatever withdraws us from the power of our senses; whatever makes the past, the distant, or the future predominate over the present, advances us in the dignity of thinking beings. Far from me and from my

friends be such frigid philosophy, as may conduct us indifferent and unmoved over any ground which has been dignified by wisdom, bravery, or virtue. That man is little to be envied, whose patriotism would not gain force upon the plain of Marathon, or whose piety would not grow warmer among the ruins of Iona.

We came too late to visit monuments; some care was necessary for ourselves. Whatever was in the island, Sir Allan could demand, for the inhabitants were Macleans; but having little, they could not give us much. He went to the headman of the island, whom fame, but fame delights in amplifying, represents as worth no less than fifty pounds. He was perhaps proud enough of his guests, but ill prepared for our entertainment; however, he soon produced more provision than men not luxurious require. Our lodging was next to be provided. We found a barn well stocked with hay, and made our beds as soft as we could.

In the morning we rose and surveyed the place. The churches of the two convents are both standing, though unroofed. They were built of unhewn stone, but solid, and not inelegant. I brought away rude measures of the buildings, such as I cannot much trust myself, inaccurately taken, and obscurely noted. Mr. Pennant's delineations, which are doubtless exact, have made my unskilful description less necessary.

The episcopal church consists of two parts, separated by the belfry, and built at different times. The original church had, like others, the altar at one end, and the tower at the other; but as it grew too small, another building of equal dimension was added, and the tower then was necessarily in the middle.

That these edifices are of different ages, seems evident. The arch of the first church is Roman, being part of a circle; that of the additional building is pointed, and therefore Gothic or Saracenic; the tower is firm, and wants only to be floored and covered.

Of the chambers or cells belonging to the monks, there are some walls remaining, but nothing approaching to a complete apartment.

The bottom of the church is so encumbered with mud and rubbish, that we could make no discoveries of curious inscriptions, and what there are have been already published. The place is said to be known where the black stones lie concealed, on which the old Highland chiefs, when they made contracts and alliances, used to take the oath, which was considered as more sacred than any other obligation, and which could not be violated without the blackest infamy. In those days of violence and rapine, it was of great importance to impress upon savage minds the sanctity of an oath, by some particular and extraordinary circumstances. They would not have recourse to the black stones up-

on small or common occasions, and when they had established their faith by this tremendous sanction, inconstancy and treachery were no longer feared.

The chapel of the nunnery is now used by the inhabitants as a kind of general cowhouse, and the bottom is consequently too miry for examination. Some of the stones which covered the later abbesses have inscriptions, which might yet be read, if the chapel were cleansed. The roof of this, as of all the other buildings, is totally destroyed, not only because timber quickly decays when it is neglected, but because in an island utterly destitute of wood, it was wanted for use, and was consequently the first plunder of needy rapacity.

The chancel of the nuns' chapel is covered with an arch of stone, to which time has done no injury; and a small apartment communicating with the choir, on the north side, like the chapter-house in cathedrals, roofed with stone in the same manner, is likewise entire.

In one of the churches was a marble altar, which the superstition of the inhabitants has destroyed. Their opinion was, that a fragment of this stone was a defence against shipwrecks, fire, and miscarriages. In one corner of the church the basin for holy water is yet unbroken.

The cemetery of the nunnery was, till very lately, regarded with such reverence, that only women were buried in it. These reliques of veneration always produce some mournful pleasure. I could have forgiven a great injury more easily than the violation of this imaginary sanctity.

South of the chapel stands the walls of a large room, which was probably the hall, or refectory, of the nunnery. This apartment is capable of repair. Of the rest of the convent there are only fragments.

Besides the two principal churches, there are, I think, five chapels yet standing, and three more remembered. There are also crosses, of which two bear the names of St. John and St. Matthew.

A large space of ground about these consecrated edifices is covered with grave-stones, few of which have any inscription. He that surveys it, attended by an insular antiquary, may be told where the kings of many nations are buried, and if he loves to soothe his imagination with the thoughts that naturally rise in places where the great and the powerful lie mingled with the dust, let him listen in submissive silence; for if he asks any questions, his delight is at an end.

Iona has long enjoyed, without any very credible attestation, the honour of being reputed the cemetery of the Scottish kings. It is not unlikely, that, when the opinion of local sanctity was prevalent, the chieftains of the isles, and perhaps some of the Norwegian or Irish princes, were repositied in this venerable inclo-

sure. But by whom the subterraneous vaults are peopled, is now utterly unknown. The graves are very numerous, and some of them undoubtedly contain the remains of men, who did not expect to be so soon forgotten.

Not far from this awful ground may be traced the garden of the monastery; the fish-ponds are yet discernible, and the aqueduct which supplied them is still in use.

There remains a broken building, which is called the Bishop's House, I know not by what authority. It was once the residence of some man above the common rank, for it has two stories and a chimney. We were shown a chimney at the other end, which was only a niche, without perforation; but so much does antiquarian credulity, or patriotic vanity, prevail, that it was not much more safe to trust the eye of our instructor than the memory.

There is in the island one house more, and only one, that has a chimney; we entered it; and found it neither wanting repair nor inhabitants; but to the farmers who now possess it, the chimney is of no great value; for their fire was made on the floor, in the middle of the room, and notwithstanding the dignity of their mansion, they rejoiced, like their neighbours, in the comforts of smoke.

It is observed, that ecclesiastical colleges are always in the most pleasant and fruitful places. While the world allowed the monks their choice, it is surely no dishonour that they chose well. This island is remarkably fruitful. The village near the churches is said to contain seventy families, which, at five in a family, is more than a hundred inhabitants to a mile. There are perhaps other villages; yet both corn and cattle are annually exported.

But the fruitfulness of Iona is now its whole prosperity. The inhabitants are remarkably gross, and remarkably neglected: I know not if they are visited by any minister. The island, which was once the metropolis of learning and piety, has now no school for education, nor temple for worship, only two inhabitants that can speak English, and not one that can write or read.

The people are of the clan of Maclean; and though Sir Allan had not been in the place for many years, he was received with all the reverence due to their chieftain. One of them being sharply reprimanded by him, for not sending him some rum, declared after his departure, in Mr. Boswell's presence, that he had no design of disappointing him, "for (said he) I would cut my bones for him; and if he had sent his dog for it, he should have had it."

When we were to depart, our boat was left by the ebb at a great distance from the water; but no sooner did we wish it afloat, than the islanders gathered round it, and, by the union of many hands, pushed it down the beach; every man

who could contribute his help, seemed to think himself happy in the opportunity of being, for a moment, useful to his chief.

We now left those illustrious ruins, by which Mr. Boswell was much affected; nor would I willingly be thought to have looked upon them without some emotion. Perhaps, in the revolutions of the world, Iona may be some time again the instructress of the western regions.

It was no long voyage to Mull, where, under Sir Allan's protection, we landed in the evening, and were entertained for the night by Mr. Maclean, a minister that lives upon the coast, whose elegance of conversation, and strength of judgment, would make him conspicuous in places of greater celebrity. Next day we dined with Dr. Maclean, another physician, and then travelled on to the house of a very powerful laird, Maclean of Lochbuy; for in this country every man's name is Maclean.

Where races are thus numerous, and thus combined, none but the chief of a clan is addressed by his name. The laird of Dunvegan is called Macleod, but other gentlemen of the same family are denominated by the places where they reside, as *Raasay* or *Talisker*. The distinction of the meaner people is made by their christian names. In consequence of this practice, the late laird of Macfarlane, an eminent genealogist, considered himself as disrespectfully treated, if the common addition was applied to him. Mr. Macfarlane, said he, may with equal propriety be said to many; but I, and I only, am Macfarlane.

Our afternoon journey was through a country of such gloomy desolation, that Mr. Boswell thought no part of the Highlands equally terrific, yet we came without any difficulty, at evening to Lochbuy, where we found a true Highland laird, rough and haughty, and tenacious of his dignity: who, hearing my name, inquired whether I was of the Johnstons of Glencoe, or of Ardnamurchan?

Lochbuy has, like the other insular chieftains, quitted the castle that sheltered his ancestors, and lives near it, in a mansion not very spacious or splendid. I have seen no houses in the islands much to be envied for convenience or magnificence, yet they bear testimony to the progress of arts and civility, as they show that rapine and surprise are no longer dreaded, and are much more commodious than the ancient fortresses.

The castles of the Hebrides, many of which are standing, and many ruined, were always built upon points of land, on the margin of the sea. For the choice of this situation there must have been some general reason, which the change of manners has left in obscurity. They were of no use in the days of piracy, as defences of the coast; for it was equally accessible in other places. Had they been sea-marks or light-houses, they would have been of more use to the

invader than the natives, who could want no such directions on their own waters; for a watch-tower, a cottage on a hill would have been better, as it would have commanded a wider view.

If they be considered merely as places of retreat, the situation seems not well chosen; for the laird of an island is safest from foreign enemies in the centre: on the coast he might be more suddenly surprised than in the inland parts; and the invaders, if their enterprise miscarried, might more easily retreat. Some convenience, however, whatever it was, their position on the shore afforded; for uniformity of practice seldom continues long without good reason.

A castle in the islands is only a single tower of three or four stories, of which the walls are sometimes eight or nine feet thick, with narrow windows, and close winding stairs of stone. The top rises in a cone, or pyramid of stone, encompassed by battlements. The intermediate floors are sometimes frames of timber, as in common houses, and sometimes arches of stone, or alternately stone and timber; so that there was very little danger from fire. In the centre of every floor, from top to bottom, is the chief room, of no great extent, round which there are narrow cavities, or recesses formed by small vaults, or by a double wall. I know not whether there be ever more than one fire-place. They had not capacity to contain many people, or much provision; but their enemies could seldom stay to blockade them; for if they failed in their first attack, their next care was to escape.

The walls were always too strong to be shaken by such desultory hostilities; the windows were too narrow to be entered, and the battlements too high to be scaled. The only danger was at the gates, over which the wall was built with a square cavity not unlike a chimney, continued to the top. Through this hollow the defendants let fall stones upon those who attempted to break the gate, and poured down water, perhaps scalding water, if the attack was made with fire. The castle of Lochbuy was secured by double doors, of which the outer was an iron grate.

In every castle is a well and a dungeon. The use of the well is evident. The dungeon is a deep subterranean cavity, walled on the sides, and arched on the top, into which the descent is through a narrow door, by a ladder or a rope, so that it seems impossible to escape, when the rope or ladder is drawn up. The dungeon was, I suppose, in war a prison for such captives as were treated with severity; and in peace, for such delinquents as had committed crimes within the laird's jurisdiction; for the mansions of many lairds were, till the late privation of their privileges, the halls of justice to their own tenants.

As these fortifications were the productions of mere necessity, they are built only for safety,

with little regard to convenience, and with none to elegance or pleasure. It was sufficient for a laird of the Hebrides, if he had a strong house, in which he could hide his wife and children, from the next clan. That they are not larger, nor splendid, is no wonder. It is not easy to find how they are raised, such as they are, by men who had no money, in countries where the labourers and artificers could scarcely be fed. The buildings in different parts of the islands show their degrees of wealth and power. I believe that for all the castles which I have seen beyond the Tweed, the ruins yet remaining of some one of those which the English built in Wales, would supply materials.

These castles afford another evidence that the fictions of romantic chivalry had for their basis the real manners of the feudal times, when every lord of a seignory lived in his hold lawless and unaccountable, with all the licentiousness and insolence of uncontested superiority and unprincipled power. The traveller, whoever he might be, coming to the fortified habitation of a chieftain, would, probably, have been interrogated from the battlements, admitted with caution at the gate, introduced to a petty monarch, fierce with habitual hostility, and vigilant with ignorant suspicion; who, according to his general temper, or accidental humour, would have seated a stranger as his guest at the table, or as a spy, confined him in the dungeon.

Lochbuy means the Yellow Lake, which is the name given to an inlet of the sea, upon which the castle of Mr. Maclean stands. The reason of the appellation we did not learn.

We were now to leave the Hebrides, where we had spent some weeks with sufficient amusement, and where we had amplified our thoughts with new scenes of nature, and new modes of life. More time would have given us a more distinct view, but it was necessary that Mr. Boswell should return before the courts of justice were opened; and it was not proper to live too long upon hospitality, however liberally imparted.

Of these islands it must be confessed, that they have not many allurements, but to the mere lover of naked nature. The inhabitants are thin, provisions are scarce, and desolation and penury give little pleasure.

The people, collectively considered, are not few, though their numbers are small in proportion to the space which they occupy. Mull is said to contain six thousand, and Sky fifteen thousand. Of the computation respecting Mull I can give no account; but when I doubted the truth of the numbers attributed to Sky, one of the ministers exhibited such facts as conquered my incredulity.

Of the proportion which the product of an island bears to the people, an estimate is commonly made according to the pecuniary price of

necessaries of life; a principle of judgment which is never certain, because it supposes, what is far from truth, that the value of money is always the same, and so measures an unknown quantity by an uncertain standard. It is competent enough when the markets of the same country, at different times, and those times not too distant, are to be compared; but of very little use for the purpose of making one nation acquainted with the state of another. Provisions, though plentiful, are sold in places of great pecuniary opulence for nominal prices, to which, however scarce, where gold and silver are yet scarcer, they can never be raised.

In the Western Islands there is so little internal commerce, that hardly any thing has a known or settled rate. The price of things brought in, or carried out, is to be considered as that of a foreign market; and even this there is some difficulty in discovering, because their denominations of quantity are different from ours; and when there is ignorance on both sides, no appeal can be made to a common measure.

This, however, is not the only impediment. The Scots, with a vigilance of jealousy which never goes to sleep, always suspect that an Englishman despises them for their poverty, and to convince him that they are not less rich than their neighbours, are sure to tell him a price higher than the true. When Lesley, two hundred years ago, related so punctiliously, that a hundred hen's eggs, new laid, were sold in the islands for a penny, he supposed that no inference could possibly follow, but that eggs were of great abundance. Posterity has since grown wiser; and having learned, that nominal and real value may differ, they now tell no such stories, lest the foreigner should happen to collect, not that eggs are many, but that pence are few.

Money and wealth have, by the use of commercial language, been so long confounded, that they are commonly supposed to be the same; and this prejudice has spread so widely in Scotland, that I know not whether I found man or woman, whom I interrogated concerning pay, without its of money, that could surmount the illiberal desire of deceiving me, by representing every thing as dearer than it is.

From Lochbuy we rode a very few miles to the side of Mull which faces Scotland, where, having taken leave of our kind protector, Sir Allan, we embarked in a boat, in which the seat provided for our accommodation was a heap of rough brushwood; and on the twenty-second of October reposed at a tolerable inn on the main land.

On the next day we began our journey southwards. The weather was tempestuous. For the day the ground was rough, and our horses were still small. Had they required much restraint, we might have been reduced to

difficulties; for, I think, we had amongst us but one bridle. We fed the poor animals liberally, and they performed their journey well. In the latter part of the day we came to a firm and smooth road, made by the soldiers, on which we travelled with great security, busied with contemplating the scene about us. The night came on while we had yet a great part of the way to go, though not so dark but that we could discern the cataracts which poured down the hills on one side, and fell into one general channel that ran with great violence on the other. The wind was loud, the rain was heavy, and the whistling of the blast, the fall of the shower, the rush of the cataracts, and the roar of the torrent, made a nobler chorus of the rough music of nature than it had ever been my chance to hear before. The streams which ran across the way from the hills to the main current, were so frequent, that after a while I began to count them; and, in ten miles, reckoned fifty-five, probably missing some, and having let some pass before they forced themselves on my notice. At last we came to Inverary, where we found an inn, not only commodious, but magnificent.

The difficulties of peregrination were now at an end. Mr. Boswell had the honour of being known to the duke of Argyle, by whom we were very kindly entertained at his splendid seat, and supplied with conveniences for surveying his spacious park and rising forests.

After two days' stay at Inverary we proceeded southward over Glencroe, a black and dreary region, now made easily passable by a military road, which rises from either end of the glen by an acclivity not dangerously steep, but sufficiently laborious. In the middle, at the top of the hill, is a seat with this inscription, *Rest, and be thankful*. Stones were placed to mark the distances, which the inhabitants have taken away, resolved, they said, to have no new miles.

In this rainy season the hills streamed with waterfalls, which, crossing the way, formed currents on the other side, that ran in contrary directions as they fell to the north or south of the summit. Being, by the favour of the duke, well mounted, I went up and down the hill with great convenience.

From Glencroe we passed through a pleasant country to the banks of Loch Lomond, and were received at the house of Sir James Colquhoun, who is owner of almost all the thirty islands of the loch, which we went in a boat next morning to survey. The heaviness of the rain shortened our voyage, but we landed on one island planted with yew, and stocked with deer, and on another containing perhaps not more than half an acre, remarkable for the ruins of an old castle, on which the osprey builds her annual nest. Had Loch Lomond been in a happier climate, it would have been the boast of wealth and vanity to own one of the little spots which it incloses,

and to have employed upon it all the arts of embellishment. But as it is, the islets, which court the gazer at a distance, disgust him at his approach, when he finds instead of soft lawns and shady thickets, nothing more than uncultivated ruggedness.

Where the loch discharges itself into a river called the Leven, we passed a night with Mr. Smollett, a relation of Dr. Smollett, to whose memory he has raised an obelisk on the bank near the house in which he was born. The civility and respect which we found at every place, it is ungrateful to omit, and tedious to repeat. Here we were met by a post-chaise, that conveyed us to Glasgow.

To describe a city so much frequented as Glasgow, is unnecessary. The prosperity of its commerce appears by the greatness of many private houses, and a general appearance of wealth. It is the only episcopal city whose cathedral was left standing in the rage of reformation. It is now divided into many separate places of worship, which, taken all together, compose a great pile, that had been some centuries in building, but was never finished; for the change of religion intercepted its progress, before the cross aisle was added, which seems essential to a Gothic cathedral.

The college has not had a sufficient share of the increasing magnificence of the place. The session was begun; for it commences on the tenth of October, and continues to the tenth of June, but the students appeared not numerous, being, I suppose, not yet returned from their several homes. The division of the academical year into one session, and one recess, seems to me better accommodated to the present state of life, than that variegation of time by terms and vacations, derived from distant centuries, in which it was probably convenient, and still continued in the English universities. So many solid months as the Scotch scheme of education joins together, allow and encourage a plan for each part of the year: but with us, he that has settled himself to study in the college, is soon tempted into the country; and he that has adjusted his life in the country, is summoned back to his college.

Yet when I have allowed to the universities of Scotland a more rational distribution of time, I have given them, so far as my inquiries have informed me, all that they can claim. The students for the most part, go thither boys, and depart before they are men; they carry with them little fundamental knowledge, and therefore the superstructure cannot be lofty. The grammar-schools are not generally well supplied; for the character of a schoolmaster being there less honourable than in England, is seldom accepted by men who are capable to adorn it, and where the school has been deficient, the college can effect little.

Men bred in the universities of Scotland, cannot be expected to be often decorated with the splendours of ornamental erudition, but they obtain a mediocrity of knowledge, between learning and ignorance, not inadequate to the purposes of common life, which is, I believe, very widely diffused among them, and which, countenanced in general by a national combination, so invidious, that their friends cannot defend it, and actuated in particulars by a spirit of enterprise, so vigorous, that their enemies are constrained to praise it, enables them to find, or to make their way, to employment, riches, and distinction.

From Glasgow we directed our course to Auchinleck, an estate devolved, through a long series of ancestors, to Mr. Boswell's father, the present possessor. In our way we found several places remarkable enough in themselves, but already described by those who viewed them at more leisure, or with much more skill; and stopped two days at Mr. Campbell's, a gentleman married to Mr. Boswell's sister.

Auchinleck, which signifies a *stony field*, seems not now to have any particular claim to its denomination. It is a district generally level and sufficiently fertile, but, like all the western side of Scotland, incommoded by very frequent rain. It was, with the rest of the country, generally naked, till the present possessor finding, by the growth of some stately trees near his old castle, that the ground was favourable enough to timber, adorned it very diligently with annual plantations.

Lord Auchinleck, who is one of the judges of Scotland, and therefore not wholly at leisure for domestic business or pleasure, has yet found time to make improvements in his patrimony. He has built a house of hewn stone, very stately and durable, and has advanced the value of his lands with great tenderness to his tenants.

I was, however, less delighted with the elegance of the modern mansion, than with the sullen dignity of the old castle. I clambered with Mr. Boswell among the ruins, which afford striking images of ancient life. It is, like other castles, built upon a point of rock, and was, I believe, anciently surrounded with a moat. There is another rock near it, to which the draw-bridge, when it was let down, is said to have reached. Here, in the ages of tumult and rapine, the laird was surprised and killed by the neighbouring chief, who perhaps might have extinguished the family, had he not in a few days been seized and hanged, together with his sons, by Douglas, who came with his forces to the relief of Auchinleck.

At no great distance from the house runs a pleasing brook, by a red rock, out of which has been hewn a very agreeable and commodious summer-house, at less expense, as Lord Auchinleck told me, than would have been required to

build a room of the same dimensions. The rock seems to have no more dampness than any other wall. Such opportunities of variety it is judicious not to neglect.

We now returned to Edinburgh, where I passed some days with men of learning, whose names want no advancement from my commemoration, or with women of elegance, which perhaps disclaims a pedant's praise.

The conversation of the Scots grows every day less unpleasing to the English: their peculiarities wear fast away; their dialect is likely to become in half a century provincial and rustic, even to themselves. The great, the learned, the ambitious, and the vain, all cultivate the English phrase, and the English pronunciation, and in splendid companies Scotch is not much heard, except now and then from an old lady.

There is one subject of philosophical curiosity to be found in Edinburgh, which no other city has to show; a college of the deaf and dumb, who are taught to speak, to read, to write, and to practise arithmetic, by a gentleman, whose name is Braidwood. The number which attends him is, I think, about twelve, which he brings together into a little school, and instructs according to their several degrees of proficiency.

I do not mean to mention the instruction of the deaf as new. Having been first practised upon the son of a constable of Spain, it was afterwards cultivated with much emulation in England by Wallis and Holder, and was lately professed by Mr. Baker, who once flattered me with hopes of seeing his method published. How far any former teachers have succeeded, it is not easy to know; the improvement of Mr. Braidwood's pupils is wonderful. They not only speak, write, and understand what is written, but if he that speaks looks towards them, and modifies his organs by distinct and full utterance, they know so well what is spoken, that it is an expression scarcely figurative to say they hear with the eye. That any have attained to the power mentioned by Burnet, of feeling sounds, by laying a hand on the speaker's mouth, I know not; but I have seen so much, that I can

believe more; a single word, or a short sentence, I think, may possibly be so distinguished.

It will be readily supposed by those that consider this subject, that Mr. Braidwood's scholars spell accurately. Orthography is vitiated among such as learn first to speak and then to write, by imperfect notions of the relation between letters and vocal utterance; but to those students every character is of equal importance; for letters are to them not symbols of names, but of things; when they write, they do not represent a sound, but delineate a form.

This school I visited, and found some of the scholars waiting for their master, whom they are said to receive at his entrance with smiling countenances and sparkling eyes, delighted with the hope of new ideas. One of the young ladies had her slate before her, on which I wrote a question consisting of three figures, to be multiplied by two figures. She looked upon it, and quivering her fingers in a manner which I thought very pretty, but of which I knew not whether it was art or play, multiplied the sum regularly in two lines, observing the decimal place; but did not add the two lines together, probably disdaining so easy an operation. I pointed at the place where the sum total should stand, and she noted it with such expedition as seemed to show that she had it only to write.

It was pleasing to see one of the most desperate of human calamities capable of so much help; whatever enlarges hope, will exalt courage; after having seen the deaf taught arithmetic, who would be afraid to cultivate the Hebrides?

Such are the things which this journey has given me an opportunity of seeing, and such are the reflections which that sight has raised. Having passed my time almost wholly in cities, I may have been surprised by modes of life and appearances of nature, that are familiar to men of wider survey and more varied conversation. Novelty and ignorance must always be reciprocal, and I cannot but be conscious that my thoughts on national manners are the thoughts of one who has seen but little.

THE END.
